Original bill of complaint.—May 28, A. D. 1877.

In the circuit court of the United States, second circuit, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust,
vs.
THOMAS L. JAMES, U. S. POSTMASTER, NEW York.

To the honorable the judges of the circuit court of the United States within and for the southern district of New York:

Christopher C. Campbell, of East Chatham, in the town of Chatham, county of Columbia, and State of New York, and a citizen of the said State, and also a citizen of the United States of America, brings this his bill into this honorable court against Thomas L. James, United States postmaster in and for the city of New York, State and southern district of New York, aforesaid, who is a citizen of said State, and also a citizen of said United States; and thereupon your orator complains, and says: That the above named defendant is now, and has been for several years last past, postmaster for the United States of
2 America at the city of New York, in the county of New York, State and southern district aforesaid, he having been appointed to the office of postmaster for the United States post-office in the said city of New York by the President of the said United States, and duly confirmed as such by the Senate of the Congress of the said United States, and thereupon was duly commissioned by the President of the said United States as such postmaster; whereupon the said defendant entered upon the duties of the said office, and during all of the time aforesaid has exercised the functions of that office, and managed and controlled the business and affairs of the same, as this complainant is informed, and verily believes the same to be true.

And your orator, the above-named complainant, further complains and says: That heretofore, and before the 14th day of April, A. D. 1863, Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, was the true, original and first inventor of a certain new and useful improvement in post-office post-marking and canceling hand stamp, machine or device for the post marking of letters or other mail matter, and for the cancellation of the postage stamps thereon in the manner and by the means hereinafter more fully described and set forth; and the same was not known or used before the invention and discovery thereof by the said Marcus P. Norton, and was not, at the time of his application for the letters patent of the said United States thereon, in public use or on sale with his knowledge, consent or allowance.

And your said orator further shows unto your honors, that the said Marcus P. Norton so being the inventor of said improvements and invention, and being a citizen of the United States aforesaid, in due and lawful time made an application in writing to the Commissioner of Patents, and to the proper department of the Government of the United States of America for letters patent, in accordance to and with the then existing laws or acts of the Congress of the said United States; and he having duly complied in all respects with the conditions and require-
3 ments of the said laws or acts of Congress, on the 14th day of April, A. D. 1863, the letters patent of the said United States of

America, signed, sealed and executed in due form of law, for his said discovery, improvements and invention, were issued and delivered to him, the said Marcus P. Norton, and the same were dated so as aforesaid, and were numbered 38175 by the said Commissioner of Patents; whereby and by means thereof there was secured to him, his heirs, executors, administrators and assigns for the full term of seventeen years from and after the said 14th day of April, A. D. 1863, the full and the exclusive right, liberty and privilege of making, using and vending to others to use and to be used, the said improvements or invention.

And your said orator further shows unto your honors that the aforesaid named and described letters patent were duly and lawfully issued and delivered in the name of the United States of America, and were under the seal of the Patent Office of said United States of America, and they were duly signed by the Secretary of the Interior, and were countersigned by the Commissioner of Patents, and they were thereafter duly delivered to the said Marcus P. Norton; that the said letters patent, after reciting that the said Marcus P. Norton had invented new and useful improvements in a machine or device for post-marking letters or other mail packets, and for the cancellation of the postage stamp or stamps thereon, which he stated had not been used before his said application for letters patent thereon, save by himself and others, with his approval, in the line of lawful experiments, to test and to prove the true character, usefulness, and value of his said improvements and invention, and had made oath that he was a citizen of the United States, and that he did verily believe that he was the original and first inventor and discoverer of the said improvements and invention, and that the same had not, to the best of his knowledge, information, and belief, been previously known or used by any other person or persons, except-
4 ing and only for the purposes of experimenting in the manner hereinbefore stated, and had presented a petition in writing to the Commissioner of Patents signifying a desire of obtaining an exclusive right and property in said improvements in post-marking and postage-canceling hand-stamp, and praying that the letters patent of the United States of America might be duly granted to him for that purpose, did grant to him, the said Marcus P. Norton, his heirs, administrators or assigns, for the term of seventeen years from and after the said fourteenth day of April, A. D. 1863, the full and exclusive right, liberty, and privilege of making, constructing, using, and vending to others to vend, or to use, or to be used, the said improvements and invention, a description whereof is given in the words, figures, and drawings contained in the schedule of specifications annexed to said letters patent, and making a part thereof, which said letters patent so granted, issued, and delivered unto the said Marcus P. Norton, your orator prays may be deemed to be and taken as a part of this bill of complaint, and to which your orator most respectfully asks the leave of this honorable court at all times to refer, as the same or the case shall or may require.

Your said orator most respectfully shows to this honorable court that the said Marcus P. Norton was and is the true, original, and first inventor of the aforesaid named improvement and invention set forth, described, and claimed in and by the said letters patent so dated and numbered; that the same were not known or used by any other person or persons before the invention or discovery thereof by the said Marcus P. Norton, and were not at the time of his said application for letters patent upon the same in public use or on sale with his knowledge, consent, or allowance previous to a term of two years prior to the said application to the Commissioners of Patents for the letters patent there-

for and thereon, made in due form of law as hereinbefore set forth, other than the legitimate experimenting by the said Marcus P. Norton as hereinbefore stated.

5 And your orator further shows unto this honorable court that a description and specifications in writing of the aforesaid named improvement and invention were given in the schedule annexed to the said letters patent, and the same were accompanied by certain drawings referred to in said last-mentioned schedule, and forming a part of said original letters patent; that the aforesaid mentioned and described letters patent were duly entered of record in the Patent Office of the said United States as by law required.

And your orator further shows unto your honors that on or about the 20th day of April, A. D. 1863, the said Marcus P. Norton, by an assignment in writing, bearing that date, but not of record in the said Patent Office until about one year thereafter, sold, assigned, and transferred in trust, unto Jacob Shavor and Albert C. Corse, of the said city of Troy, all his right, title, and interest in and to the said letters patent and invention, which assignment was recorded in the Patent Office of said United States, as by a duly authenticated copy thereof, and the certificate of such recording thereto affixed, ready in this court to be produced, will fully and at large appear.

And your orator further shows unto this honorable court that the said Jacob Shavor and Albert C. Corse, at the request of the said Marcus P. Norton, surrendered the aforesaid mentioned and described original letters patent to the Commissioner of Patents, and having made application in writing therefor, and having in all things complied with the acts of Congress, and with the law in such case made and provided, did, on the 23d day of August, A. D. 1864, obtain new letters patent for the same invention, upon reformed and amended specifications and claims, for the residue of the said term of seventeen years then unexpired, numbered 1748 of reissued letters patent, which last-mentioned letters patent so reissued were issued in due form of law, under the seal of the Patent Office of said United States, signed by the Secretary of the Interior, and countersigned by the Commissioner of Patents, and bearing date on the said 23d of August, A. D. 1864, and were num-

6 bered 1748, as aforesaid stated, as by the said last-mentioned letters patent, or by a duly certified copy thereof, ready in this court to be produced, will at large appear.

And your orator further shows unto your honors, that immediately after the granting and issuing of the said reissued letters patent, dated and numbered as last aforesaid, the said Jacob Shavor and Albert C. Corse commenced a suit at law in the circuit court of the said United States, in and for the northern district of New York, second circuit, against one Edmund Hoole, who was at that time infringing upon the said letters patent so granted and reissued, by manufacturing hand-stamps and machines for use in the postal service of the said United States, under a contract made with the Postmaster General of said United States, or with some other person authorized by him to manufacture the said invention and improvements for use in such postal service, in violation of the rights and privileges secured in and by the said letters patent, which said suit was brought on for trial at a regular term of the said court, held at the city of Albany, State of New York, in the month of October, 1864, before a jury and the court, and upon pleadings and evidence then and there duly submitted under the rulings of said court, the said jury returned a verdict in favor of the said plaintiffs, to wit: Jacob Shavor and Albert C. Corse; and thereupon the court directed

said jury by special verdict to find, that said defendant had infringed upon the said letters patent, as charged in the narr or complaint in that suit; and that said letters patent were good and valid, as by an exemplified or duly authenticated copy of the pleadings and proceedings in that court in the said cause, now ready here in this honorable court to be produced for the purpose of showing to your honors that the aforesaid named letters patent have been declared to be good, sufficient, and valid in law, by a court of competent jurisdiction, will fully and at large appear by an inspection of the said authenticated court record.

7 And your orator further shows unto your honors, that on or about the 23d day of February, A. D. 1864, the said Jacob Shavor and Albert C. Corse, by a deed of assignment bearing that date, sold, reassigned, and reconveyed unto the said Marcus P. Norton the aforesaid named letters patent and any and all reissues thereof, which assignment and deed of reconveyance being accompanied by the sworn statement of the said Jacob Shavor and Albert C. Corse, the said statement and affidavit being thereto attached and a part thereof, were each duly and lawfully entered of record in said United States Patent Office, on the 24th day of July. A. D. 1869, in Liber U 11, page 319 of Transfers of Patents, as will fully and at large appear by the original deed of assignment, reconveyance, and retransfer, now in the possession of your orator, or by a duly authenticated copy of the same, now ready in this honorable court to be produced, will also fully and at large appear, which said deed of assignment and reconveyance with said statement and affidavit thereto attached and made a part thereof, your orator prays your honors that the same may be deemed and taken as a part of this his bill of complaint.

And your orator further shows unto this honorable court, that the said Marcus P. Norton, having for good and lawful cause surrendered said last-mentioned reissued letters patent to the Commissioner of Patents, and having made due application in writing therefor as by the law made and provided, and he having in all things complied with the acts of Congress in such case provided, did, on the third day of August, A. D. 1869, obtain new letters patent for the same invention and improvements, upon reformed, corrected, and amended specifications for the residue of the said term of seventeen years then unexpired; which last-mentioned reissued letters patent were issued to, and in the name of the said Marcus P. Norton, the original and first inventor of the said improvements and invention so as aforesaid stated; and the same were in due form of law, and were under the seal of the Patent Office

8 of the United States; and they were duly signed by the Secretary of the Interior, and were countersigned by the Commissioner of Patents, and were dated the third day of August, A. D. 1869, and were numbered 3586 of reissue of patents, as by the said last-mentioned reissued letters patent, or a duly authenticated copy thereof, in court ready to be produced, will fully and at large appear.

And your orator further shows unto this honorable court, that on or about the 20th day of October, A. D. 1869, by an assignment and transfer in writing of that date, the said Marcus P. Norton sold, assigned, and transferred unto Helen M. Ingalls, of the city of Troy, county of Rensselaer, and State of New York, his entire right, title, and interest in and to the said letters patent and invention and all reissues of the same; and also all and every right to compensation, and to recover by suit or otherwise for the use of the same, past or future or for both, or for any violation of or infringement upon the said letters patent by any one; which deed of assignment was duly recorded in the Patent Office

of said United States on the 1st day of August, A. D. 1870, in Liber B 13, page 351, of Transfers of Patents, as by the said deed of assignment or a duly authenticated copy thereof, and the certificate of such recording thereto affixed, ready in this court to be produced, will fully and at large appear.

And your orator further shows unto this honorable court, that the said Helen M. Ingalls being the true and lawful owner and holder of the said invention and letters patent, duly surrendered the same to the Commissioner of Patents for the purpose of reissuing the said letters patent in two divisions, as by law then provided; and thereupon, upon the petition of the said Helen M. Ingalls, in writing, to the Commissioner of Patents, in conformity to the law, the said Commissioner of Patents in due time allowed and thereupon granted a reissue of the said letters patent unto the said Helen M. Ingalls according to her said petition so made and filed by her in said Patent Office. The said reissue was granted
9 and was issued to her in two divisions, under and bearing date the fourth day of October, A. D. 1870, to wit: "Division A" and "Division B," and each bearing the same date, namely, October, 4th, A. D. 1870—"Division A" being numbered 4143, and "Division B" being numbered 4144 of reissue of patents in said Patent Office, and to the specifications, drawings, and claims, of each of which reference is now and hereby had for a more full, correct, and perfect description of the said improvements and invention, as well as of the letters patent upon which this bill is founded. The specifications, drawings, and claims, or summary of invention in the aforesaid named and described "Division A" are the same, or substantially and materially the same, as those contained in the said reissued letters patent granted, issued, and delivered to the said Marcus P. Norton on the 3d day of August, A. D. 1869, and numbered 3586 of reissued patents in said Patent Office, as aforesaid stated; which said letters patent, so reissued in two divisions, in the manner and form as stated herein, were issued in due form of law, under the seal of the Patent Office of said United States, and the same were duly signed by W. T. Otto, Acting Secretary of the Interior, and were countersigned by Samuel S. Fisher, Commissioner of Patents, and bearing date as aforesaid stated, to wit: the 4th day of October, A. D. 1870, and in two divisions, as hereinbefore stated—"Division A" being numbered 4143, as by the said last-mentioned division of the said last reissued letters patent, or a duly authenticated copy thereof, now ready in this court to be produced, will more fully and at large appear.

And your orator further shows unto your honors, that on or about the 4th day of March, A. D. 1871, the said Helen M. Ingalls, by an assignment in writing of that date, conditionally assigned and transferred unto William W. Secombe, then of the city, county, and State of New York, and in trust, according to the terms and conditions of a deed of trust, signed by the said William W. Secombe, and bearing date on the said 4th day of March, A. D. 1871, and by him delivered to the
10 said Helen M. Ingalls, and a part of the said conditional assignment and transfer of the said letters patent, her right, title, and interest in and to the said "Division A" of the said reissued letters patent and invention, which said assignment was recorded in the Patent Office of the said United States, on the 11th day of March, A. D. 1871, in Liber X 13, page 316 of Transfers of Patents, as by said assignment, or a duly certified copy thereof, and the certificate of such recording thereto affixed, ready in this court to be produced, will fully appear; which deed of assignment being in trust and upon certain conditions stated in the said deed of trust so signed, executed, and deliv-

ered unto said Helen M. Ingalls, by the said William W. Secombe, has long since become absolutely void and of none effect either in law or in equity; that the said William W. Secombe has not only wholly and entirely failed to keep and to maintain the conditions and obligations stated in said deed of trust, and made as a part of the said deed of assignment from the said Helen M. Ingalls, to him, the said William W. Secombe, dated and recorded so as aforesaid, as the sole and only grounds for the said "trust" assignment, but he has repeatedly refused to keep, observe, and carry out the same in good faith. The considerations wherein and whereby the said deed of assignment and trust were executed and delivered, so as aforesaid stated, were not, and have not been kept, maintained, and observed by and on the part of the said William W. Secombe, as in said "deed of trust" was and is required of him, but on the contrary, the same were and have been utterly disregarded, neglected, and refused, on the part and behalf of him, the said William W. Secombe; whereupon the said invention and letters patent, and each and every part thereof, whether of right, title, ownership, or interest therein or thereto, became in law as well as in equity, reinvested in, and the sole and exclusive property of her, the said Helen M. Ingalls, the same as though no assignment "in trust" had been made by her to the said William W. Secombe; and therefore, and by rea-
11 son of such facts, so as aforesaid stated with reference to said assignment in trust, your orator most respectfully asks this honorable court to make its order and decree, declaring, and absolutely and forever rendering the said assignment in trust to the said William W. Secombe null and void, and without force or effect in law or in equity, if it shall be found necessary by your honors so to do.

And your orator further shows unto this honorable court that on or about the second day of January, A. D. 1877, the said Helen M. Ingalls, by an assignment in writing of that date, sold, assigned, and transferred in trust unto your orator, Christopher C. Campbell, of East Chatham, in the town of Chatham, county of Columbia, and State of New York, all her right, title, and interest in and to the said letters patent and invention reissued on the fourth day of October, A. D. 1870, as "Division A," and numbered 4143 of reissued patents in the said Patent Office, which deed of assignment in trust has been duly recorded in the Patent Office of said United States, as by said assignment, or a duly certified copy of the same, and the certificate of such recording thereto affixed, now ready here in this court to be produced, will fully and at large appear. Your orator further shows unto your honors that the said deed of assignment and transfer in trust was and is in the following words and figures, that is to say:

Whereas letters patent of the United States of America were duly granted, issued, and delivered unto Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, for and upon new and useful improvements in post-office postmarking and canceling hand-stamp for post-marking of letters, and for the cancellation of the postage stamps in the manner, and for the purposes, and by the means therein described and set forth; which letters patent were issued and delivered bearing date the 14th day of April, A. D. 1863, and were numbered 38175, which letters patent have been three times reissued in the manner as by law provided, to wit, on the 23d day of August, A.
12 D. 1864, numbered 1748; also, on the 3d day of August, A. D. 1869, numbered 3586; and again, and for the third and the last time, reissued on the 4th day of October, A. D. 1870, in two divisions of the same

date, to wit, "Division A" and "Division B," division A being numbered 4143, and division B being numbered 4144, of reissue of patents in the said Patent Office, to the specifications and drawings of each reference is now and hereby had for a more full and perfect description of the said invention and improvements, as well as for full information of the same, and of the letters patent herein and hereby assigned in trust in the manner and form following in this deed of trust as herein stated and set forth.

And whereas the original letters patent, dated as aforesaid, on the 14th day of April, A. D. 1863, and numbered 38175, were by the said Marcus P. Norton, on the 20th day of April, A. D. 1863, assigned and transferred, in trust, to Jacob Shavor and Albert C. Corse, of the said city of Troy, in the manner and for the purposes stated in the reassignment and retransfer to the said Marcus P. Norton, dated February 23d, 1864; and whereas, on the 23d day of February, A. D. 1864, they, the said Jacob Shavor and Albert C. Corse, reassigned and reconveyed the aforesaid named letters patent and all reissues thereof to the said Marcus P. Norton, which assignment and deed of reconveyance being accompanied by the sworn affidavit and statement of the said Jacob Shavor and of the said Albert C. Corse, was duly and lawfully entered of record, and was recorded in the said United States Patent Office on the 24th day of July, A. D. 1869, in liber U, 11, page 319, of transfer of patents, as will fully and at large appear by the original deed of reassignment and retransfer, now in the possession of the undersigned; and whereas the said Marcus P. Norton did, on the 20th day of October, A. D. 1869, by deed of assignment and transfer, and for a valuable consideration, sell, assign, and convey unto Helen M. Ingalls, of the said city of Troy, county of Rensselaer, and State of New York, his
13 entire right, title, and interest in the invention, improvements, and letters patent, and of any and every reissue of the same; and also all and every right to compensation and to recover by suit or otherwise for the use of the same, past or future, or for both, by the said United States, as by reference thereto will fully and at large appear. The said Helen M. Ingalls, being the true and lawful owner and holder of the said invention and letters patent, duly surrendered the same to the Commissioner of Patents for the purpose of reissuing the same in two divisions; and thereupon, upon the petition of the said Helen M. Ingalls, the said Commissioner of Patents, in conformity to law, granted a reissue of the said letters patent unto the said Helen M. Ingalls, according to her said petition so made and filed by her in said Patent Office.

The said reissue was granted to her in two parts or divisions, under date of October 4, 1870, as hereinbefore stated, of which "Division A" is the same, or substantially the same, as the said reissued letters patent granted to the said Marcus P. Norton on the 3d day of August, A. D. 1869, and numbered 3586, as aforesaid stated. The said deed of assignment to the said Helen M. Ingalls was duly entered of record and was recorded in said Patent Office on the 1st day of August, A. D. 1870, in liber B 13, page 351 of transfers of patents, as will appear by reference to the original deed of assignment and conveyance now in the possession of the undersigned, Helen M. Ingalls; and whereas on or about the 4th day of March, A. D. 1871, the said Helen M. Ingalls, by a certain deed of assignment, and upon the terms and conditions stated therein as a part thereof, did, in trust, assign and convey to William W. Secombe, then of the city, county, and State of New York, her right and title to the said invention and letters patent, which was recorded in

said Patent Office on the 11th day of March, A. D. 1871, in liber X 13, page 316, of transfers of patents, and which deed of assignment "in trust" has long since become void and of none effect, because and for
14 the reason that the said William W. Secombe has not only wholly and entirely failed to keep and carry out the conditions therein named as the sole and only grounds for that "trust" but has repeatedly refused so to do. The consideration wherein said deed of trust was executed and delivered so as aforesaid and named therein were not and have not been kept and faithfully observed by the said William W. Secombe in the manner as in the said deed of trust was and is required of him in and thereby, but, on the other hand, the same were and have been utterly neglected and refused on the part and behalf of him, the said William W. Secombe; whereupon the said invention and letters patent, and each and every right, title, and interest became reinvested in, and the sole and exclusive property of the said Helen M. Ingalls, the same as though no assignment "in trust" had been made to the said William W. Secombe in the manner as aforesaid.

And whereas, it has been deemed advisable that Christopher C. Campbell, of East Chatham, county of Columbia and State of New York, should become fully vested with, and should have vested in him, in trust, all the right, title, and interest which I now have, or ever have had, in, to, or for the said invention and letters patent, and of each of the several reissues thereof; also, of any and every claim or claims for past use of the said invention in the postal service of the said United States from the date of the said letters patent, to wit, the 14th day of April, A. D. 1863.

The right, title, and ownership of the said invention and letters patent is, in trust, vested in the said Christopher C. Campbell upon the conditions that he shall have the sole management of said trust, and be at the expense of the same, until a fair, just, and reasonable settlement shall be had with the United States aforesaid for such use of said invention in the postal service of said United States by the Post-Office Department, for which the said Christopher C. Campbell shall have and shall receive one-third of such sum as may here-
15 after be determined upon by the Court of Claims of said United States, in payment for the past or for the future use of said invention in the said postal service; and the said Helen M. Ingalls shall have and shall receive two-thirds of such sum as may hereafter be determined upon by the said Court of Claims, in payment for the past or for the future use of the said invention in said postal service; and the said Court of Claims, in the making and entering of any judgment against said United States for the use of said invention, improvements, and letters patent in such postal service, is now and hereby authorized and *and* requested to make and enter such judgment, as follows, to wit, one-third of the whole sum or amount to the said Christopher C. Campbell, and two-thirds of the whole sum or amount to the said Helen M. Ingalls, and thereby to require each of said named persons to sign and acknowledge satisfaction of such judgment, or to receipt therefor when the same is paid by the Treasurer of the said United States, in the manner provided by law, which payment shall be at the same time, and in the presence of each, who thereupon shall sign a receipt or make satisfaction for such judgment on receipt of payment, or by their legal representatives, as by law may be provided; and the said Court of Claims shall have full power to make such an order or decree in the premises as hereinbefore stated, so that one-third of the recovery or judgment determined and fixed by said court as by law may be provided, shall be

paid to the said Christopher C. Campbell, and two-thirds thereof shall be paid to the said Helen M. Ingalls, directly from the Treasury of said United States, and in no other manner shall payment be made for such use by the said United States of the said invention and letters patent.

Now, therefore, this deed of assignment and transfer, in trust, witnesseth, that for and in consideration of the sum of one dollar to me in hand paid, the receipt whereof is now and hereby acknowledged, and in the further and other valuable consideration hereinbefore
16 and herein stated as the main conditions upon which this instrument is now and hereby made and executed in trust, I, the said Helen M. Ingalls, have, in trust, so as aforesaid sold, assigned, and transfered, and I do in like manner hereby sell, assign, and transfer in trust unto the said Christopher C. Campbell, all the right, title and interest which I now have or ever had, in, to, or for the said invention and letters patent, and the several re-issues thereof, which is, as aforesaid stated, the entire invention, improvements, and letters patent, named, dated, and numbered so as aforesaid, and in like manner, in trust, and upon the same terms and conditions. I also sell, assign, and convey unto him, the said Christopher C. Campbell, all the right, interest, and claim for and to the past use of the said invention and improvements under the said letters patent, or any reissue thereof obtained by me from the said Marcus P. Norton, by the said deed of assignment, dated the 20th day of October, A. D. 1869, and now of record, in the manner so as aforesaid stated and set forth, intending herein and hereby to sell, assign and convey, in trust, unto the said Christopher C. Campbell, in the manner herein provided and set forth, all my right, title, and interest, or claim against said United States, for the past or future use of the invention and letters patent in the postal service of said United States by the Post Office Department; and also, in like manner, the entire invention, improvements, and letters patent, and all and every reissue of the same since the 14th day of April, A. D. 1863. The same, and each and every thereof, to be held in trust in the manner and for the benefit of each of the persons herein named and as herein specified and set forth, and on no other grounds and for no other use or purpose.

In testimony whereof, I have on this second day of January, A. D. 1877, hereto set my hand and seal.

HELEN M. INGALLS. [SEAL.]

Sealed and delivered in presence of—
JOHN W. SMITH.

17 STATE OF NEW YORK,
Columbia County, ss:

On this second day of January, A. D. 1877, before me, the subscriber, personally appeared Helen M. Ingalls, to me known to be the person described in, and who executed the within instrument, and acknowledged that she executed the same.

JOHN W. SMITH,
Justice of the Peace, in and for Columbia County, N. Y.

And now your orator hereby prays this honorable court, that the aforesaid named letters patent, dated the 14th day of April, A. D. 1863, numbered 38175; also the reissued letters patent, dated the 23d day of August, A. D. 1864, numbered 1748, of reissue of letters patent; also the reissued letters patent, dated the 3d day of August, A. D. 1869, numbered 3586; also the reissued letters patent, reissued in two divisions, to wit, "division A" and "division B," dated the 4th day of Oc-

said Patent Office on the 11th day of March, A. D. 1871, in liber X 13, page 316, of transfers of patents, and which deed of assignment "in trust" has long since become void and of none effect, because and for
14 the reason that the said William W. Secombe has not only wholly and entirely failed to keep and carry out the conditions therein named as the sole and only grounds for that "trust" but has repeatedly refused so to do. The consideration wherein said deed of trust was executed and delivered so as aforesaid and named therein were not and have not been kept and faithfully observed by the said William W. Secombe in the manner as in the said deed of trust was and is required of him in and thereby, but, on the other hand, the same were and have been utterly neglected and refused on the part and behalf of him, the said William W. Secombe; whereupon the said invention and letters patent, and each and every right, title, and interest became reinvested in, and the sole and exclusive property of the said Helen M. Ingalls, the same as though no assignment "in trust" had been made to the said William W. Secombe in the manner as aforesaid.

And whereas, it has been deemed advisable that Christopher C. Campbell, of East Chatham, county of Columbia and State of New York, should become fully vested with, and should have vested in him, in trust, all the right, title, and interest which I now have, or ever have had, in, to, or for the said invention and letters patent, and of each of the several reissues thereof; also, of any and every claim or claims for past use of the said invention in the postal service of the said United States from the date of the said letters patent, to wit, the 14th day of April, A. D. 1863.

The right, title, and ownership of the said invention and letters patent is, in trust, vested in the said Christopher C. Campbell upon the conditions that he shall have the sole management of said trust, and be at the expense of the same, until a fair, just, and reasonable settlement shall be had with the United States aforesaid for such use of said invention in the postal service of said United States by the Post-Office Department, for which the said Christopher C. Campbell shall have and shall receive one-third of such sum as may here-
15 after be determined upon by the Court of Claims of said United States, in payment for the past or for the future use of said invention in the said postal service; and the said Helen M. Ingalls shall have and shall receive two-thirds of such sum as may hereafter be determined upon by the said Court of Claims, in payment for the past or for the future use of the said invention in said postal service; and the said Court of Claims, in the making and entering of any judgment against said United States for the use of said invention, improvements, and letters patent in such postal service, is now and hereby authorized and *and* requested to make and enter such judgment, as follows, to wit, one-third of the whole sum or amount to the said Christopher C. Campbell, and two-thirds of the whole sum or amount to the said Helen M. Ingalls, and thereby to require each of said named persons to sign and acknowledge satisfaction of such judgment, or to receipt therefor when the same is paid by the Treasurer of the said United States, in the manner provided by law, which payment shall be at the same time, and in the presence of each, who thereupon shall sign a receipt or make satisfaction for such judgment on receipt of payment, or by their legal representatives, as by law may be provided; and the said Court of Claims shall have full power to make such an order or decree in the premises as hereinbefore stated, so that one-third of the recovery or judgment determined and fixed by said court as by law may be provided, shall be

paid to the said Christopher C. Campbell, and two-thirds thereof shall be paid to the said Helen M. Ingalls, directly from the Treasury of said United States, and in no other manner shall payment be made for such use by the said United States of the said invention and letters patent.

Now, therefore, this deed of assignment and transfer, in trust, witnesseth, that for and in consideration of the sum of one dollar to me in hand paid, the receipt whereof is now and hereby acknowledged, and in the further and other valuable consideration hereinbefore
16 and herein stated as the main conditions upon which this instrument is now and hereby made and executed in trust, I, the said Helen M. Ingalls, have, in trust, so as aforesaid sold, assigned, and transfered, and I do in like manner hereby sell, assign, and transfer in trust unto the said Christopher C. Campbell, all the right, title and interest which I now have or ever had, in, to, or for the said invention and letters patent, and the several re-issues thereof, which is, as aforesaid stated, the entire invention, improvements, and letters patent, named, dated, and numbered so as aforesaid, and in like manner, in trust, and upon the same terms and conditions. I also sell, assign, and convey unto him, the said Christopher C. Campbell, all the right, interest, and claim for and to the past use of the said invention and improvements under the said letters patent, or any reissue thereof obtained by me from the said Marcus P. Norton, by the said deed of assignment, dated the 20th day of October, A. D. 1869, and now of record, in the manner so as aforesaid stated and set forth, intending herein and hereby to sell, assign and convey, in trust, unto the said Christopher C. Campbell, in the manner herein provided and set forth, all my right, title, and interest, or claim against said United States, for the past or future use of the invention and letters patent in the postal service of said United States by the Post Office Department; and also, in like manner, the entire invention, improvements, and letters patent, and all and every reissue of the same since the 14th day of April, A. D. 1863. The same, and each and every thereof, to be held in trust in the manner and for the benefit of each of the persons herein named and as herein specified and set forth, and on no other grounds and for no other use or purpose.

In testimony whereof, I have on this second day of January, A. D. 1877, hereto set my hand and seal.

HELEN M. INGALLS. [SEAL.]

Sealed and delivered in presence of—
JOHN W. SMITH.

17 STATE OF NEW YORK,
Columbia County, ss:

On this second day of January, A. D. 1877, before me, the subscriber, personally appeared Helen M. Ingalls, to me known to be the person described in, and who executed the within instrument, and acknowledged that she executed the same.

JOHN W. SMITH,
Justice of the Peace, in and for Columbia County, N. Y.

And now your orator hereby prays this honorable court, that the aforesaid named letters patent, dated the 14th day of April, A. D. 1863, numbered 38175; also the reissued letters patent, dated the 23d day of August, A. D. 1864, numbered 1748, of reissue of letters patent; also the reissued letters patent, dated the 3d day of August, A. D. 1869, numbered 3586; also the reissued letters patent, reissued in two divisions, to wit, "division A" and "division B," dated the 4th day of Oc-

ments and invention as those which are described in the aforesaid described reissued letters patent, dated the 4th day of October, A. D. 1870, "division A," numbered 4143 of reissued letters patent by the said Commissioner of Patents, and therein and thereby claimed in and by the several claims thereof, and secured to your orator in the manner hereinbefore stated, and the same was and are an infringement of and upon the said letters patent so mentioned, numbered and dated, and are in violation of the exclusive rights and privileges thereunder and thereby secured.

And your orator further shows unto your honors that after the granting of the said letters patent so as aforesaid, and before and since the making of the deed of assignment of the same in trust, in the manner as hereinbefore stated, and during the term of time of the said reissued letters patent from the date thereof, and at divers times and on divers days, and before the commencement of this suit, hitherto, to wit, at the said city of New York, and in the said post-office of the said United States in and for the said city of New York, the said defendant Thomas L. James unlawfully and wrongfully, and without the consent, permission, or license, and against the will of your orator, the complainant, Christopher C. Campbell, did purchase, or caused to be purchased and used, and did use, and did put in practice the said machines, devices, improvements, and invention for the post-marking of letters or other mail matter, and for the cancellation of postage stamps thereon, substantially as specified and described in the specifications, drawings, and claims of the said last-mentioned reissued letters patent of the date of October 4th, 1870, "division A," and numbered 4143, all and every of which was and is in violation of and in infringement upon the said exclusive rights and privileges so secured to your orator, the complainant herein, by the said letters patent, so reissued, dated, numbered, and assigned in trust in the manner aforesaid; and the same
22 was and is contrary to the form, force, and effect of the statutes of the said United States in such case made and provided by the Congress of the said United States in Senate and House of Representatives assembled.

Whereby, and by the means of which grievances, your orator, Christopher C. Campbell, has been greatly injured and deprived of large gains, profits, and advantages which he might and otherwise would have derived from said improvements and said invention and letters patent thereon, reissued, dated, and numbered as last aforesaid, to wit, at the post-office of the United States of America in and for the city of New York, county and State aforesaid, southern district of New York, and within the jurisdiction of this honorable court, and has sustained by such several and continued acts of unjust and deliberate infringement by the said defendant, Thomas L. James, postmaster of said United States, actual damages to the sum and amount of thirty thouand dollars and upwards, and more than that sum and amount for and during each and every year of the use of the said improvements and invention, and infringements upon the said letters patent by the said defendant.

And your orator further shows unto this honorable court that by the means of the several facts and premises, and by the force and provisions of the laws or statutes of said United States hereinbefore mentioned, an action or suit in equity has accrued to him, your said orator and complainant, Christopher C. Campbell, and against the said defendant, Thomas L. James, to recover in this court, by and through this bill of complaint, the said actual damages and such additional sum or amount

not exceeding in the whole sum three times the amount of all such actual damages as this honorable court may be pleased to order, adjudge, and determine under and as provided by sections 55 and 59 of the act of the Congress of the said United States entited *an* "An act to revise, consolidate, and amend the statutes relating to patents and copyrights," approved on the 8th day of July, A. D. 1870.

23 And forasmuch as your orator is utterly remediless at the common law, and can have no relief except in this court, in or upon the premises herein stated and set forth:

To the end, therefore, that the said defendant, Thomas L. James, United States postmaster, in and for the United States post-office at the said city of New York, may, if he can, show why your said orator should not have the relief herein demanded and hereby prayed for, and upon his corporal oath, and according to the best and uttermost knowledge, remembrance, information and belief, full, true, direct and perfect answers make to the premises, and to all the several matters hereinbefore stated, set forth, and charged, as fully and as particularly as if interrogated as to each and every of such matters; and that said defendant may be compelled to account for and to pay to your orator the profits acquired, and also the damages suffered by your orator from and by reason of the aforesaid infringements and unlawful acts of said defendant,

May it please your honors to grant unto your orator the writ of injunction issuing out of and under the seal, and by the order and authority of this honorable court in due form of law, commanding, enjoining, and restraining the said defendant, his servants, agents, attorneys, and workmen, and each and every of them, and all other persons under the command or the control of the said defendant, from directly or indirectly making, using, or vending to others to be used, or in any manner counterfeiting or imitating the said invention or any part or portion thereof, or from using, or furnishing others to use or to be used, any post office post-marking and canceling hand stamp or other machine or device embracing the improvements or the invention, or any part or any portion thereof, or anything substantially and materially the same, invented, patented, and assigned as aforesaid stated and set forth; and that such injunction be made by your honors perpetual in its character and operation.

And to grant unto your orator such other or further relief as
24 shall be agreeable to equity, and as this honorable court shall deem meet and sufficient. And specially, that your honors, upon the entering of your decree for an infringement as above prayed for, may also proceed to assess or cause to be assessed, under your direction, in addition to the profits and gains to be accounted for by the defendant aforesaid, the damages your orator has sustained by reason of such infringements; and that your honors may increase the actual damages so assessed to a sum equal to three times the amount of such assessment, under the circumstances of the unlawful acts and the unjust infringements by the said defendant at the times and at the place hereinbefore set forth, and as provided by the "patent act" of July 8, A. D. 1870, and hereinbefore referred to by the title thereof, and especially sections 55 and 59 of the said patent law.

And your orator, Christopher C. Campbell, prays your honors that the said defendant, Thomas L. James, United States postmaster at the said city of New York, may, by the order of this honorable court, be decreed and required to pay to your orator all the costs and expenses of this suit, because of the unjust and unlawful acts of infringement upon and violation of the said letters-patent, in the manner and during

the time hereinbefore stated; and that damages may be recovered herein in the manner aforesaid; and that the preliminary injunction, upon due notice to the said defendant, as well as a perpetual injunction at the final hearing of this cause, may each be granted and issued as and in the manner herein prayed; and that all other relief asked for by this bill may be fully decreed and ordered by your honors,

May it please your honors to grant to your orator, Christopher C. Campbell, a provisional or preliminary injunction, issuing out of and under the seal of this honorable court, restraining the defendant, Thomas L. James, his attorneys, solicitors, clerks, servants, workmen and agents, to the same purport, tenor and effect hereinbefore prayed for, in regard to a perpetual injunction.

25 May it also please your honors to grant to your orator, Christopher C. Campbell, a writ of subpœna ad respondendum, issuing out of and under the seal of this honorable court, directed to the said defendant, Thomas L. James, United States postmaster at the said post-office in the said city of New York, commanding him to be and to appear in this court, and then and there to make answer unto this bill of complaint, and to perform and to abide by such order and decree herein as to this court may seem meet and to be required by the law, by the principles of equity and of good conscience.

And your orator, as in duty bound, will every pray, &c.

Dated this 28th day of May, A. D. 1877.

CHRISTOPHER C. CAMPBELL,
Complainant and assignee in trust.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

GEORGE H. WILLIAMS,
Of counsel for Complainant, Washington, D. C.

26 UNITED STATES OF AMERICA,
State of New York, County of Columbia, ss:

Christopher C. Campbell, the complainant named in the foregoing bill of complaint as orator, personally appeared before me, the undersigned, county judge of the county court and court of sessions, the same being courts of record, and having a seal, and he, the said Christopher C. Campbell, being by me duly sworn, says on oath that he has read the foregoing bill of complaint in equity signed by him, and that he knows the contents thereof, and that the same is true of his own knowledge, except as to those matters which are therein stated on belief and on information derived from others, and as to those matters he believes it to be true.

And he further says: That he verily believes that the aforesaid named Marcus P. Norton, patentee and assignee to Helen M. Ingalls as stated and set forth in said bill, to be the original, true and first inventor and discoverer of the new, useful and valuable invention and improvements in machines, devices, or post-office post-marking and canceling hand-stamps which is and are described and mentioned in the said bill of complaint, and more especially specified, set forth, described and claimed in and by the drawings and specifications of the letters patent granted to the said Marcus P. Norton on the 14th day of April, A. D. 1863, numbered 38175, and for the third and last time reissued on the 4th day of October, A. D. 1870, "division A" of that reissue, numbered 4143, and mentioned and described in the foregoing bill of complaint

as the reissued or new letters patent upon which the said foregoing bill is founded or predicated.

And the deponent further says that he verily believes that the title of the complainant to said improvements, invention and letters patent, as set forth in detail and at large in said bill, is true, correct and lawful, and that the said letters patent contained in the said bill by date and number as therein stated and set forth are good, sufficient and
27 valid in law and in equity, and that the said invention and improvements contained in the drawings, specifications and claims of such letters patent, and in each of the several reissues thereof, are useful, valuable, and of very great importance to the public in the postal service of the United States for the use and purposes stated, specified and claimed therein.

CHRISTOPHER C. CAMPBELL,
Complainant and Assignee in trust.

Subscribed and sworn to before me on this 30th day of May, A. D. 1877.

JOHN CADMAN,
County Judge of Columbia County, N. Y.

MARCUS P. NORTON,
Counsel for Complainant, Troy, N. Y.

GEORGE H. WILLIAMS,
Of counsel for Complainant, Washington, D. C.

(Here follows diagram, marked page 28.)

29 No. 4143. Reissue.

The United States of America to all to whom these letters patent shall come:

Whereas Marcus P. Norton, of Troy, N. Y., assignor to Helen M. Ingalls, of same place, has alleged that he has invented a new and useful improvement in post-office post-marking and canceling hand-stamps (for which letters patent were issued to him, dated April 14, 1863, the same surrendered and new letters issued to him, dated August 23, 1864, which second letters were surrendered and new letters issued to him, dated August 3, 1869; which last letters, having been surrendered, as well as letters patent for improvement in hand stamps issued to Helen M. Ingalls, as assignee of said Marcus P. Norton, dated August 23, 1870, the said two letters patent last named have been canceled and new letters ordered to issue to said assignee on two separate amended specifications), has made oath that he is a citizen of the United States; that he verily believes he is the original and first inventor or discoverer of the said improvement, and that the same hath not, to his knowledge and belief, been previously known or used; said assignee having paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents praying that a patent may be issued therefor:

These are, therefore, to grant to said Helen M. Ingalls, her executors, administrators, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, using, and vending to others to be used, the said improvement, a description whereof is given in the annexed schedule and made a part of these presents.

In testimony whereof I have caused these letters to be made patent, and the seal of the Patent Office to be hereunto affixed.

30 Given under my hand, at the city of Washington, this fourth day of October, in the year of our Lord one thousand eight hundred and seventy, and of the Independence of the United States of America the ninety-fifth.

W. T. OTTO,
Acting Sec. of the Interior.

Countersigned and sealed with the seal of the Patent Office.

SAM'L S. FISHER,
Commissioner of Patents.

UNITED STATES PATENT OFFICE.

Marcus P. Norton, of Troy, New York, assignor to Helen M. Ingalls, of same place.

Letters patent Nos. 38175, dated April 14, 1863; reissue No. 1748, dated August 23, 1864; reissue No. 3586, dated August 3, 1869; reissue No. 4143, dated October 4, 1870; and also letters patent No. 106716, dated Aug. 23, 1870.

DIVISION A.

Improvement in post-office post-marking and canceling hand-stamps.

The schedule referred to in these letters patent and making part of the same.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer and State of New York, have invented new and useful improvements in "post-marking letters," "packets," &c., and in the "canceling" of the "postage stamps" thereon, in the manner and by the means substantially as hereinafter described and set forth; that letters pat-

31 ent of the United States were duly issued thereon, under and bearing date April 14, 1863, which were assigned and transferred under a certain agreement, and by virtue of a certain instrument in writing, bearing date the 20th day of April, 1863, and recorded in the United States Patent Office on the 8th day of March, 1864, in liber C^7, page 458 of transfers of patents, to Jacob Shavor and Albert C. Corse, of said city of Troy, county and State, and who, on or about the 23d day of February, A. D. 1864, duly reassigned and retransferred the said invention, improvements and letters patent to the said Marcus P. Norton, inventor and assignee aforesaid, by a certain instrument in writing, duly executed, and bearing date on the said 23d day of February, 1864, and which assignment and transfer from Jacob Shavor and Albert C. Corse was duly recorded in the said United States Patent Office on the 24th day of July, 1869, in liber U^{11}, page 319 of transfers of patents. On or about the 23d day of October, A. D. 1869, I, the said Marcus P. Norton, by deed of assignment in writing, did lawfully assign and transfer unto Helen M. Ingalls, of the city of Troy, State of New York, the said invention and letters patent dated and reissued as hereinbefore stated and set forth, which deed of assignment was duly recorded in the United States Patent Office on the 1st day of August, 1870, in liber

B[13], page 351 of transfers of patents, and who is now the lawful owner thereof under and by virtue of the said sale, assignment and transfer so made, executed and delivered, and recorded as before stated.

Now, therefore, I, the said Marcus P. Norton, do hereby declare the following to be a full, clear and exact description of the construction and operation thereof, reference being had hereinafter to the accompanying drawings and to the letters of reference marked thereon, which drawings so marked and lettered hereby make a part of these my specifications of and concerning my said invention and improvements herein contained and set forth.

Like letters refer to and represent like and corresponding parts of my said invention.

32 Figure 1 represents a side elevation of the postage-stamp canceling and post-marking device hereinafter described and set forth for canceling postage stamps with any suitable ink contained upon such instrument at the same time, blow, and operation of the making of the post-mark on the letter, envelope, or packet, one side of, and from, such postage stamp or frank so canceled.

Figure 2 represents a vertical section. taken on a line through the center of the various parts of the post-marking and postage-canceling device or instrument herein contained, described, and set forth.

Figure 3 represents a face view of the device, showing the post-marking stamp ready for use, and the postage-canceling die or device, made of wood, used endwise, or of cork, rubber, or other suitable material therein inserted, in the manner substantially as shown and more at large described hereinafter.

Figure 4 shows a device for the purpose of canceling postage stamps or letter-franks used to represent value, by the use and power of any suitable ink, by the means of wood, cork, or any elastic material for the type or dye, which may be used for that purpose separate and alone or in combination with any suitably-constructed post-marking stamp or device, substantially as shown at fig. 3 of the said drawings.

Figure 5 represents a vertical section of a post-marking and postage-stamp canceling device or die combined, and constructed entirely of iron, steel, or other metal, and more fully described hereinafter.

Figure 6 is a plan or face view of fig. 5, showing the postage-stamp canceling device or die, made of iron, steel or other suitable metal or material.

Figure 7 represents the wrench used for securing the dating type in a proper place within the post-marking device, having the name of the town or post-office where used engraved thereon in relief letters.

Figure 8 represents the tool or instrument used for removing the cork, wood, or rubber die or type used for canceling postage-
33 stamps from the tube or surrounding case where held or contained, so as to repair or replace the same with a new one when worn out or unfit for use.

The nature of my said invention and improvements herein contained and described consists in the employment and combination of a device or die used for the more complete and perfect cancellation of postage-stamps and letter-franks, by means of soft wood, used endwise, or of cork, rubber, or other suitable material, whereby such stamp or frank is effaced and canceled, in and by indelible or other ink, in the manner substantially as herein described and set forth.

It also consists in the combination of a postage-stamp canceling device or die, constructed of wood, cork, rubber, or any suitable material, with

any suitably-arranged and constructed post-marking stamp or device, so as to cancel, efface, or destroy the postage-stamp or letter-frank with indelible or any suitable ink at the same time, blow, or operation of the stamp or instrument by which the post-mark is given or made upon the letter, envelope, or packet, substantially as herein described and set forth.

It also consists of the post-marking of letters, envelopes, or packets and in the cancellation of the postage-stamp or stamps thereon with, in, or by any suitable ink, or similar material, by means of some soft wood, used endwise against the postage-stamp, or by the means of cork, rubber, iron, or steel, or by means of any other suitable material, so combined with the post-marking stamp or instrument as to cancel, efface, or destroy the postage-stamp or stamps at one and the same blow or operation of the entire instrument, thus constructed for that purpose, whereby to prevent a second or re-use of such postage stamp or stamps.

To enable others skilled in the art to which my said invention and improvements relate to make and use the same, I will here proceed to describe the construction and operation thereof, which are substantially as follows; that is to say:

34 I construct the post-marking device or stamp D of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device and die or type.

E, fig. 3, is the mortise or recess, of suitable dimensions to receive the type for the month, day of the month, and for the year, and called or known as the dating-type, around which is the name of the town or post-office where used, in relief-letters, and upon the lower face of such post-marking stamp or device.

I construct the postage canceling stamp or device G (for the purpose of canceling, in a more perfect and thorough manner, the postage-stamps on letters, envelopes, or packets), of wood, used endwise upon the postage-stamp, or of cork, rubber, or of any suitable or elastic material, and insert the same in the tube or recess F, which is that part of the canceling device marked C of the accompanying drawings, and which is connected to and combined with the said cross piece B, as herein described.

I prefer to have the diameter of the canceling device and die or type F, figs. 2, 3, and 4, about the same as the width of the postage-stamp to be canceled or destroyed by means of the same.

The said canceling-die or type G may be of any length required, and so made as to correspond with the tube or recess F, and closely to fit the same, and it may be made of wood, cork, rubber or of any elastic material as aforesaid.

The face of this device may contain a plan or form for canceling the postage stamp in, with, or by ink, like unto that shown at fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

The said device, die, or type G will project somewhat below the face of the post-marking device D, if deemed best so to do, and it may be removed out of the said tube or recess F by means of a pin or bolt, substantially like that shown at fig. 8, the lower end of which operates in and through the aperture *a*, figs. 2 and 4, for the purpose of repairs, or to replace it by a new one when desired.

35 A is the operating handle, firmly secured to the cross-bar B by any suitable mechanical means, and it will be made of wood, &c.

The said postage-stamp canceling device, die, or type G, being thus constructed of cork, wood, or rubber, or other elastic material, and com-

bined with the said device C, with recess or tube F therein as aforesaid, will receive and contain on the face or configuration thereof the ink aforesaid in quantities sufficient to permanently cancel, efface, or destroy the postage-stamp whereon the same is used while post-marking letters, packets, &c., in such manner as to prevent the said postage-stamp being cleansed of the said canceling ink by any chemical or other process; for the said canceling ink, so put upon the postage stamp by means of said cork die or type, would be so effectual that any attempt or effort to remove it therefrom would entirely destroy, or nearly so, the aforesaid postage-stamp, and thus and thereby render the same incapable for or of a second or other use without immediate detection.

The said cork, rubber, or other suitable elastic material, used as aforesaid, will render the said post-marking and postage-stamp canceling die or type of a more easy, and consequently rapid use, because of there being a yielding of the said canceling die or type G when the blow is given upon the letter, envelope, or packet, and postage stamp as aforesaid; the operator will not tire as much by means of a constant, continuous, and rapid use of the same; and it will also somewhat aid the operator in raising the entire instrument or apparatus from the paper or packet and postage-stamp when the impression thereon and the cancellation of such postage-stamp shall have been given by the operator in the manner subs antially as aforesaid.

The said canceling type or dye can be easily repaired or replaced by a new one whenever desired, and at very little expense; and such canceling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small
36 bolt. In such case there would not be any tube or pipe surrounding said canceling die or type G. The operation or effect produced would in such case of construction be the same.

The said postage-stamp canceling device, die, or type G may be of any desired distance from the aforesaid post-marking or dating device or stamp D, or it may be securely fastened to the immediate side of the said post-marking and dating part or stamp or device D by any convenient and suitable mechanical means.

The said canceling die, type, or device G, I prefer to use made of cork, as it will hold a much greater quantity of canceling ink upon, and in the lower face thereof, and when it comes in contact with the printed surface of the postage stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with the said canceling ink, whereby such postage-stamp so operated upon, and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be refused or used a second time in fraud upon the postal revenue without immediate detection of the same.

Soft wood, used endwise, will answer nearly the same purpose. Still long and continued use after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling die or type used upon postage stamps as aforesaid.

The said tube or cylinder C, figs. 2, 3, and four, may be constructed in any suitable manner, or by any convenient means, and thereafter fastened to the under side of the said cross-bar B in or by any mechanical means which will answer the required purpose. It may also be of any form or shape deemed best.

I also construct my said postage-stamp canceling device, die, or type of cast-iron, steel, or other suitable metal, substantially as shown at G′, figs. 5 and 6, and which may be secured to the said cross-bar or piece B,

any suitably-arranged and constructed post-marking stamp or device, so as to cancel, efface, or destroy the postage-stamp or letter-frank with indelible or any suitable ink at the same time, blow, or operation of the stamp or instrument by which the post-mark is given or made upon the letter, envelope, or packet, substantially as herein described and set forth.

It also consists of the post-marking of letters, envelopes, or packets and in the cancellation of the postage-stamp or stamps thereon with, in, or by any suitable ink, or similar material, by means of some soft wood, used endwise against the postage-stamp, or by the means of cork, rubber, iron, or steel, or by means of any other suitable material, so combined with the post-marking stamp or instrument as to cancel, efface, or destroy the postage-stamp or stamps at one and the same blow or operation of the entire instrument, thus constructed for that purpose, whereby to prevent a second or re-use of such postage stamp or stamps.

To enable others skilled in the art to which my said invention and improvements relate to make and use the same, I will here proceed to describe the construction and operation thereof, which are substantially as follows; that is to say:

34 I construct the post-marking device or stamp D of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device and die or type.

E, fig. 3, is the mortise or recess, of suitable dimensions to receive the type for the month, day of the month, and for the year, and called or known as the dating-type, around which is the name of the town or post-office where used, in relief-letters, and upon the lower face of such post-marking stamp or device.

I construct the postage canceling stamp or device G (for the purpose of canceling, in a more perfect and thorough manner, the postage-stamps on letters, envelopes, or packets), of wood, used endwise upon the postage-stamp, or of cork, rubber, or of any suitable or elastic material, and insert the same in the tube or recess F, which is that part of the canceling device marked C of the accompanying drawings, and which is connected to and combined with the said cross piece B, as herein described.

I prefer to have the diameter of the canceling device and die or type F, figs. 2, 3, and 4, about the same as the width of the postage-stamp to be canceled or destroyed by means of the same.

The said canceling-die or type G may be of any length required, and so made as to correspond with the tube or recess F, and closely to fit the same, and it may be made of wood, cork, rubber or of any elastic material as aforesaid.

The face of this device may contain a plan or form for canceling the postage stamp in, with, or by ink, like unto that shown at fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

The said device, die, or type G will project somewhat below the face of the post-marking device D, if deemed best so to do, and it may be removed out of the said tube or recess F by means of a pin or bolt, substantially like that shown at fig. 8, the lower end of which operates in and through the aperture *a*, figs. 2 and 4, for the purpose of repairs, or to replace it by a new one when desired.

35 A is the operating handle, firmly secured to the cross-bar B by any suitable mechanical means, and it will be made of wood, &c.

The said postage-stamp canceling device, die, or type G, being thus constructed of cork, wood, or rubber, or other elastic material, and com-

bined with the said device C, with recess or tube F therein as aforesaid, will receive and contain on the face or configuration thereof the ink aforesaid in quantities sufficient to permanently cancel, efface, or destroy the postage-stamp whereon the same is used while post-marking letters, packets, &c., in such manner as to prevent the said postage-stamp being cleansed of the said canceling ink by any chemical or other process; for the said canceling ink, so put upon the postage stamp by means of said cork die or type, would be so effectual that any attempt or effort to remove it therefrom would entirely destroy, or nearly so, the aforesaid postage-stamp, and thus and thereby render the same incapable for or of a second or other use without immediate detection.

The said cork, rubber, or other suitable elastic material, used as aforesaid, will render the said post-marking and postage-stamp canceling die or type of a more easy, and consequently rapid use, because of there being a yielding of the said canceling die or type G when the blow is given upon the letter, envelope, or packet, and postage stamp as aforesaid; the operator will not tire as much by means of a constant, continuous, and rapid use of the same; and it will also somewhat aid the operator in raising the entire instrument or apparatus from the paper or packet and postage-stamp when the impression thereon and the cancellation of such postage-stamp shall have been given by the operator in the manner subs antially as aforesaid.

The said canceling type or dye can be easily repaired or replaced by a new one whenever desired, and at very little expense; and such canceling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small
36 bolt. In such case there would not be any tube or pipe surrounding said canceling die or type G. The operation or effect produced would in such case of construction be the same.

The said postage-stamp canceling device, die, or type G may be of any desired distance from the aforesaid post-marking or dating device or stamp D, or it may be securely fastened to the immediate side of the said post-marking and dating part or stamp or device D by any convenient and suitable mechanical means.

The said canceling die, type, or device G, I prefer to use made of cork, as it will hold a much greater quantity of canceling ink upon, and in the lower face thereof, and when it comes in contact with the printed surface of the postage stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with the said canceling ink, whereby such postage-stamp so operated upon, and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be refused or used a second time in fraud upon the postal revenue without immediate detection of the same.

Soft wood, used endwise, will answer nearly the same purpose. Still long and continued use after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling die or type used upon postage stamps as aforesaid.

The said tube or cylinder C, figs. 2, 3, and four, may be constructed in any suitable manner, or by any convenient means, and thereafter fastened to the under side of the said cross-bar B in or by any mechanical means which will answer the required purpose. It may also be of any form or shape deemed best.

I also construct my said postage-stamp canceling device, die, or type of cast-iron, steel, or other suitable metal, substantially as shown at G′, figs. 5 and 6, and which may be secured to the said cross-bar or piece B,

in like manner as the said tube or cylinder C, figs 2 and 4, and which is done either by screw and nut where the same unites with the said
37 cross-bar, or it may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto.

The said post-marking and dating device D is also secured to the under side of said cross-bar or piece B, and at or near the end thereof opposite that where said tube or cylinder C, or canceling die, type, or device G, is securely fastened, as aforesaid, in like manner and by substantially the same means as used for such fastening of said canceling device to said cross-bar upon the under side of the same as aforesaid.

The aforesaid metal canceling device, die, or type G′, figs. 5 and 6, may also be fastened or secured to the immediate side of the said post-marking device by any good and sufficient means substantially as hereinbefore described and set forth, in reference to the said device C, or tube or cylinder, constructed to receive and contain the said type or die G, figs. 2, 3, and 4.

Such metallic device, die, or type may also have, upon its lower face or lower surface, any suitable configuration deemed best to use for the purpose of canceling the postage-stamp in, with, or by any suitable ink at the same time, blow, and operation of the instrument or apparatus, as hereinbefore stated and set forth.

In any and every case the post marking of the letter, envelope, or packet, and the effacing or cancellation of the postage-stamp or letter frank thereon representing value, are done at the same time, and by the same blow or operation of the said several devices and parts, constructed and combined in the manner and by the means substantially as herein described and set forth.

Both the post-marking and cancellation of the said postage-stamp are done with indelible or other and suitable ink used for such cancellation or effacing of the postage-stamp, and that, too, without any injury to the letter, envelope, or packet, or to the contents thereof, as would be the case were the said postage stamp cancelled by being cut in several parts and places by means of cutters or knives constructed for
38 that express use and purpose, as is the case by the cutters or knives contained and set forth in letters patent granted to me on the ninth day of August, A. D. 1859, also on the 16th day of December, A. D. 1862, the first of which contains no guard or guards to said knives or cutters, while the second contains such guard or guards for the purpose of preventing such cutters or knives from cutting too much or too deep in and upon said postage-stamps.

The said instrument and devices herein set forth and described will not, under any circumstances, cut either the letter, envelope, or postage-stamp thereon in any way or manner, but perform the cancellation required to be done in, with, and by ink only, as aforesaid, no cutting device whatever being used. But the said cork device, die, or type will, when it comes in contact with the printed or enameled-like surface of the postage-stamp, somewhat mar, bruise, or break the same, by means of the blow given by the instrument, whereby to prepare the same to be filled by or impregnated with any suitable ink used for such cancellation, substantially as aforesaid.

In no case could a fraud be committed by a second or reuse of the government postage-stamp or letter-frank representing value without being discovered.

This arrangement and combination of devices will greatly hasten or

facilitate the making up of the mails for transportation. It will also economize in labor, and reduce the labor in post-marking letters, and in the canceling of the postage-stamps thereon, to about, if not entirely, one half of the number of workmen, laborers, or clerks absolutely necessary when and where this combined instrument is not used in the manner aforesaid.

It therefore saves at least one-half of the labor required in the post-marking of letters, envelopes, or packets, and in the cancellation of the postage-stamps thereon. It also makes the cancellation of the postage-stamps more effectual or permanent, so as to prevent a second or reuse of such postage stamps by any means whatever, which is very important in the successful management of the post-offices in this coun-
39 try, whereby and by means of which large sums of money are annually saved this government; and frauds upon the postal revenue, by the second or reuse of postage-stamps, are also prevented by the use of my invention and improvements herein contained, described, and set forth.

By the use of said invention the letters to be mailed and prepared for transportation, by means of post-marking the same, and in canceling the postage-stamps thereon, as aforesaid, need not be handled over but once, thus and thereby economizing in time and in labor.

The cross-bar, or piece B, figs. 1, 2, 3, and 5, may be of any suitable width or thickness, or of any metal which will answer the required purpose. It may also be of any length deemed best to use, in order to get the said post-marking device and the said postage-canceling device, die, or type suitably arranged upon the lower surface of the same, and thereto firmly and securely fastened or attached, in the manner substantially as aforesaid.

The type whereby to give the date are arranged in the said mortise E, as shown at figs. 3 and 6, and are there held in their proper place by means of a set-screw, substantially as shown in figs. 2, 3, and 6.

The cork or other material used for the canceling-device, die, or type will be pressed into the said tube or pipe at recess F, cylinder C, fig. 2, and the same is there firmly held, substantially as shown at G, fig. 4.

The device or configuration for the cancellation of the postage-stamp, in the manner substantially as aforesaid, may be seen at C and G, fig. 3, where cork is used; but when iron, steel, or other suitable metal is used the device or configuration may be seen at G′, fig. 6.

The invention and improvements contained in and covered by the several claims hereto annexed, or below given, is and are not contained in the letters patent granted on my application, in due form, on "the 9th day of August, 1859," nor is, nor are, the same to be found in my said letters patent granted to me "December 16, 1862;" but the said invention and improvements are contained in my caveat duly
40 filed in the United States Patent-Office in the year 1853, containing also other improvements.

Having thus described my original invention and improvements in "post-marking" and "postage-canceling" devices, combined and arranged for the purpose aforesaid,

What I claim and desire to secure by letters patent of the United States of America is—

1. The postage-stamp-canceling device, cylinder or tube C, containing a die or type G, made of cork, wood, or other suitable material, or any equivalent for said cylinder or tube C, or for the said canceling die or type G, whereby to efface, cancel, or destroy the postage-stamp with in-

delible or other ink, in the manner and for the purposes substantially as herein described and set forth.

2. The canceling device, cylinder or tube C, with cork or wood, or any substantial equivalent thereof, forming the die or type G therein, in combination with the cross-bar or piece B, and with the post-marking device D, substantially as and for the purposes herein described and set forth.

3. The post-marking of letters, envelopes, and packets, and the cancellation of the postage-stamps thereon with ink at one and the same blow, or operation of the instrument, in the manner and by the means substantially as herein described and set forth.

4. The employment and combination of a post-marking device with a postage stamp-canceling device, both being operated by one and the same handle, for the post-marking of letters, envelopes, or packets, and for the cancellation of the postage-stamps thereon, with indelible or other ink, in the manner substantially as herein described and set forth.

In testimony whereof I have on this 14th day of September, 1870, hereunto set my hand in the presence of two witnesses, to wit:

MARCUS P. NORTON.

Witnesses:
FRED'K KOONES.
EDW. W. DONN.

41 The President of the United States of America to Thomas L. James, United States postmaster, New York, greeting:

You are hereby commanded that you personally appear before the judges of the circuit court of the United States of America for the southern district of New York, in the second circuit court, in equity, on the first Monday of July, A. D. 1877, wherever the said court shall then be, to answer a bill of complaint exhibited against you in the said court by Christopher C. Campbell, assignee in trust, and to do further and receive what the said court shall have considered in that behalf. And this you are not to omit under the penalty on you of two hundred and fifty dollars.

Witness honorable Morrison R. Waite, Chief Justice of the Supreme Court of the United States, at the city of New York, on the 4th day of June, in the year one thousand eight hundred and seventy-seven, and of the Independence of the United States of America the hundred and first.

JOHN I. DAVENPORT,
Clerk.

MARCUS P. NORTON,
Complainant's Solicitor.

The defendant is required to enter appearance in the above cause in the clerk's office of this court on or before the first Monday of July, 1877, or the bill will be taken pro confesso against him.

J. I. D., *Clerk,*

(Endorsed:)

I hereby certify that on the 4th day of June, 1877, at the city of New York, in my district, I personally served the within writ upon the within-named Thomas L. James, by exhibiting to him the within original, and at the same time leaving with him a copy thereof.

Dated June 23, 1877.

LOUIS F. PAYN.
U. S. Marshal, S. D. N. Y.

Filed June 23, 1877.

JOHN I. DAVENPORT, *Clerk.*

42 U. S. circuit court, southern district of New York.

CHRISTOPHER C. CAMPBELL, ASSIGNEE,
against
THOMAS L. JAMES, UNITED STATES POSTMASTER, New York.

You will please to enter my appearance for the defendant, Thomas L. James, in the cause above entitled; and all papers herein are hereby demanded to be served on me, at my office, in the post-office building, New York City.

Dated New York, July 2d, 1877.

Yours, &c.,

STEWART L. WOODFORD,
U. S. Attorney, and Solicitor for Def't.

To JOHN I. DAVENPORT, Esq.,
Clerk of U. S. Circuit Court.

And to MARCUS P. NORTON,
Solicitor for Complainant.

(Endorsed) U. S. circuit court. Christopher C. Campbell, assignee, &c., v. Thomas L. James, postmaster. Notice of appearance. Filed July 3, 1877. John I. Davenport, clerk.

43 *Amended bill of complaint.—July* 17, *A. D.* 1877.

In the circuit court of the United States, second circuit, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust,
vs.
THOMAS L. JAMES, U. S. POSTMASTER, NEW York.

To the honorable the judges of the circuit court of the United States, within and for the southern district of New York.

Christopher C. Campbell, of East Chatham, in the town of Chatham, county of Columbia, and State of New York, and a citizen of the said State, and also a citizen of the United States of America, brings this his bill into this honorable court against Thomas L. James, United States postmaster in and for the city of New York, State, and southern district of New York aforesaid, who is a citizen of said State, and also a citizen of said United States; and thereupon your orator complains, and says, that the above-named defendant is now, and has been
44 for several years last past, postmaster for the United States of America at the city of New York, in the county of New York, State and southern district aforesaid, he having been appointed to the office of postmaster for the United States post office in the said city of New York by the President of the said United States, and duly confirmed as such by the Senate of the Congress of the said United States, and thereupon was duly commissioned by the President of the said United States as such postmaster; whereupon the said defendant entered upon the duties of the said office, and during all of the time aforesaid has exercised the functions of that office, and managed and controlled

the business and affairs of the same, as this complainant is informed, and verily believes the same to be true.

And your orator, the above-named complainant, further complains and says that heretofore, and before the 14th day of April, A. D., 1863, Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, was the true, original and first inventor of a certain new and useful improvement in post-office, post-marking and canceling hand-stamp machine, or device for the post-marking of letters or other mail matter, and for the cancellation of the postage-stamp or stamps thereon, in the manner, and by the means, hereinafter more fully described and set forth, as will more fully and at large appear by his caveat duly filed in the United States Patent Office, in the years A. D. 1853 and 1854, and to which reference is hereby made for greater certainty, and that said improvement was not known or used before the invention and discovery thereof by the said Marcus P. Norton, and was not at the time of his application for the letters patent of the said United States thereon in public use or on sale with his knowledge, consent or allowance.

And your said orator further shows unto your honors that the said Marcus P. Norton so being the inventor of said improvements and invention, and being a citizen of the United States aforesaid, in due and lawful time made an application in writing to the Commissioner
45 of Patents, and to the proper department of the Government of the United States of America for letters patent, in accordance to and with the then existing laws or acts of the Congress of the said United States; and he having duly complied in all respects with the conditions and requirements of the said laws or acts of Congress, on the 14th day of April, A. D. 1863, the letters patent of the said United States of America, signed, sealed and executed in due form of law, for his said discovery, improvements and invention, were issued and delivered to him, the said Marcus P. Norton, and the same were dated so as aforesaid, and were numbered 38175 by the said Commissioner of Patents; whereby, and by means thereof there was secured to him, his heirs, executors, administrators and assigns for the full term of seventeen years from and after the said 14th day of April, A. D. 1863, the full and the exclusive right, liberty and privilege of making, using and vending to others to use and to be used, the said improvements or invention.

And your said orator further shows unto your honors, that the aforesaid named and described letters patent were duly and lawfully issued and delivered in the name of the United States of America, and were under the seal of the Patent Office of said United States of America, and they were duly signed by the Secretary of the Interior, and were countersigned by the Commissioner of Patents, and they were thereafter duly delivered to the said Marcus P. Norton. That the said letters patent, after reciting that the said Marcus P. Norton had invented new and useful improvements in a machine or device for post marking letters or other mail packets, and for the cancellation of the postage-stamp or stamps thereon, which he stated had not been used before his said application for letters patent thereon, save by himself and others, with his approval, in the line of lawful experiments, to test and to prove the true character, usefulness and value of his said improvements and invention, and had made oath that he was a citizen of the United States, and that he did verily believe that he was the original and first
46 inventor and discoverer of the said improvements and invention, and that the same had not, to the best of his knowledge, information and belief, been previously known or used by any other person or persons, excepting, and only for the purposes of experimenting in the

manner hereinbefore stated, and had presented a petition in writing to the Commissioner of Patents, signifying a desire of obtaining an exclusive right and property in said improvements in post-marking and postage-canceling hand stamp, and praying that the letters patent of the United States of America might be duly granted to him for that purpose, did grant to him, the said Marcus P. Norton, his heirs, administrators or assigns, for the term of seventeen years from and after the said fourteenth day of April, A. D. 1863, the full and exclusive right, liberty and privilege of making, constructing, using, and vending to others to vend, or to use, or to be used, the said improvements and invention, a description whereof is given in the words, figures and drawings contained in the schedule of specifications annexed to said letters patent, and making a part thereof, which said letters patent so granted, issued, and delivered unto the said Marcus P. Norton, your orator prays may be deemed to be and taken as a part of this bill of complaint, and to which your orator most respectfully asks the leave of this honorable court, at all times, to refer, as the same or the case shall or may require.

Your said orator most respectfully shows to this honorable court that the said Marcus P. Norton was and is the true, original and first inventor of the aforesaid named improvement and invention set forth, described and claimed in and by the said letters patent so dated and numbered; that the same were not known or used by any other person or persons before the invention or discovery thereof by the said Marcus P. Norton, and were not at the time of his said application for letters patent upon the same in public use or on sale with his knowledge, consent, or allowance previous to a term of two years prior to the said application to the Commissioners of Patents for the letters patent therefor and thereon, made in due form of law as hereinbefore set forth, other than the legitimate experimenting by the said Marcus P. Norton as hereinbefore stated.

47

And your orator further shows unto this honorable court that a description and specifications in writing of the aforesaid named improvement and invention were given in the schedule annexed to the said letters patent, and the same were accompanied by certain drawings referred to in said last mentioned schedule and forming a part of said original letters patent; that the aforesaid mentioned and described letters patent were duly entered of record in the Patent Office, of the said United States as by law required.

And your orator further shows unto your honors that on or about the 20th day of April, A. D. 1863, the said Marcus P. Norton, by an assignment in writing bearing that date, but not of record in the said Patent Office until about one year thereafter, sold, assigned, and transferred in trust, unto Jacob Shavor and Albert C. Corse, of the said city of Troy, all his right, title, and interest in and to the said letters patent and invention, which assignment was recorded in the Patent Office of said United States, as by a duly authenticated copy thereof, and the certificate of such recording thereto affixed, ready in this court to be produced, will fully and at large appear.

And your orator further shows unto this honorable court that the said Jacob Shavor and Albert C. Corse, at the request of the said Marcus P. Norton, surrendered the aforesaid mentioned and described original letters patent to the Commissioner of Patents, and having made application in writing therefor, and having in all things complied with the acts of Congress, and with the law in such case made and provided, did, on the 23d day of August, A. D. 1864, obtain new letters patent for the same invention, upon reformed and amended specifications and claims,

for the residue of the said term of seventeen years then unexpired, numbered 1748 of reissued letters patent, which last mentioned
48 letters patent so reissued were issued in due form of law, under the seal of the Patent Office of said United States, signed by the Secretary of the Interior, and countersigned by the Commissioner of Patents, and bearing date on the said 23d day of August, A. D. 1864, and numbered 1748, as aforesaid stated, as by the said last mentioned letters patent, or by a duly certified copy thereof ready in this court to be produced, will at large appear.

And your orator further shows unto your honors that immediately after the granting and issuing of the said reissued letters patent, dated and numbered as last aforesaid, the said Jacob Shavor and Albert C. Corse commenced a suit at law in the circuit court of the said United States, in and for the northern district of New York, second circuit, against one Edmund Hoole, a subcontractor of Fairbanks & Co., of the city of New York, who was at that time infringing upon the said letters patent so granted and reissued by manufacturing hand stamps and machines for use in the postal service of the said United States, under a contract made with the Postmaster General of said United States, or with some other person authorized by him to manufacture the said invention and improvements for use in such postal service, in violation of the rights and privileges secured in and by the said letters patent, which said suit was brought on for trial at a regular term of the said court, held at the city of Albany, State of New York, in the month of October, 1864, before a jury and the court, and upon pleadings and evidence then and there duly submitted under the rulings of said court, the said jury returned a verdict in favor of the said plaintiff, to wit, Jacob Shavor and Albert C. Corse; and thereupon the court directed said jury by special verdict to find that said defendant had intringed upon the said letters patent, as charged in the narr. or complaint in that suit; and that said letters patent were good and valid, as by an exemplified or duly authenticated copy of the pleadings and proceedings in that court in the said cause, now ready here in this honorable court to be pro-
49 duced for the purpose of showing to your honors that the aforesaid named letters patent have been declared to be good, sufficient and valid in law, by a court of competent jurisdiction, will fully and at large appear by an inspection of the said authenticated court record.

And your orator further shows that in the year 1867 said Shavor & Corse commenced a suit in the Court of Claims against the United States for the use of said invention for four years, alleging in their petition that the Postmaster-General had promised to pay them for said use; that the United States appeared and answered in said suit by their proper counsel; that proofs were taken by both parties as to the novelty, utility and use by the Post-Office Department of said invention, so patented by said Marcus P. Norton on the fourteenth day of April, A. D. 1863, and reissued as aforesaid, as well as to said alleged promise, and the said court upon due consideration found and decided in effect that said patent was valid; that said invention had been used by said department since 1863, and that it had been of great use and value to the defendants, but also found and decided that there was no promise by said Postmaster-General as alleged, and upon that ground dismissed the petition; all of which will more fully and at large appear by the record and proceedings in said case in said Court of Claims, and to which your orator asks leave of this court to refer for greater certainty.

Your orator further shows that in 1866 a petition in the name of the

said Shavor & Corse was presented to the House of Representatives of the 38th and of the 39th Congress, praying compensation for the use of said invention by the Post-Office Department of the United States; that said petition was duly referred to the Committee on Post-Offices and Post-Roads of said House of the 39th Congress, who, after due consideration of the subject, reported to said House in substance and effect that said invention, for which letters patent of date April 14th, 1863, were granted to Marcus P. Norton, was an indispensable requisite to the safe, rapid and economical operation of marking, stamping, and canceling in the postal department; and they recommended an appropriation of $50,000 by Congress to pay for said invention and the use thereof, as by said report (No. 98, House of Representatives, 39th Congress, 1st session) will more fully and at large appear, and to which report your orator begs leave for greater certainty to refer; but no action was taken on said report by said House.

50

Your orator further shows that a petition, in the name of said Shavor and Corse, was presented to the Senate, in the second session of said 39th Congress, praying for compensation for the use of said invention by the Post-Office Department of the United States; that said petition was duly referred to the Committee on Post-Offices and Post-Roads of said body, who, after due consideration of the subject, reported to said Senate in substance and effect, as did the said committee of the House as aforesaid, and recommended an appropriation of $100,000 to pay for said invention and the use thereof, as by said report (No. 164, Senate, 39th Congress, 2d session) will more fully and at large appear, and to which for greater certainty your orator begs leave to refer; and your orator further shows that a bill passed said Senate at said session, appropriating said sum for said purpose, but it did not pass the House.

Your orator further shows that the Committee on Post Offices and Post-Roads in the Senate of the 41st Congress had the same subject under consideration, and reported to said Senate, in substance and effect, that the said invention, for which letters patent of date April 14th, 1863, were issued to said Marcus P. Norton, was of great importance and utility to the postal service, in which it had been used for a long time, and they further reported that it had been "conclusively" shown to them, "that by its use the government had actually saved from one-third to one half the stamping and canceling clerk hire theretofore required and employed, and that it greatly facilitates the despatch of letters for transportation in the mails, and that it greatly economizes in the time for the preparation of the mails for transportation; that it cancels in the most perfect and permanent manner the postage-stamps on letters, packets, &c., and at the same time gives upon the envelope, near the postage-stamp, a plain and intelligent postmark; and that it also contributes largely to prevent frauds upon the postal revenue, by the washing and chemical cleansing of postage-stamps that have once been used, for reuse or reissue; and that letters do not require to be handled a second time, as was the case under the old system for the performing of the post-marking and postage stamp cancellation;" and said committee recommended the passage of a joint resolution by Congress to refer the subject to the Postmaster-General for a settlement between the claimants and the government, as by said report (No. 243, Senate, 41st Congress, 2d session) will more fully and at large appear, and to which your orator, for greater certainty, begs leave to refer; and your orator further shows that a joint resolution, recommended by said committee, did pass the said Congress, but the Postmaster General, after finding that Helen M. Ingals, herein-

51

after named, was then the owner of the said patent, issued April 14th, 1863, and its reissues, and that the combined stamp thereby patented had been in use by and was valuable to the postal service, declined to decide what amount the government ought to pay for the use of said invention, upon the ground that a controversy arose before him as to who should share in such compensation, which was a question, in his judgment, that "could only be properly settled by judicial authority," as will more fully and at large appear by the official letter of the Postmaster-General, dated February 25th, 1871, to the Hon. Schuyler Colfax, Vice-President of the United States and President of the Senate (Ex. Doc. No. 49, Senate, 41st Congress, 3d session), and to which, for greater certainty, your orator begs leave to refer.

Your orator further shows that in the 2d session of the 42d Congress the Committee on Post-Offices and Post-Roads of the Senate of the United States made a report to said Senate, in substance and effect, that said Marcus P. Norton was the first and original inventor of
52 the said invention, for which letters patent were issued to him of date April 14th, 1863; that it had been used by the Post-Office Department of the government, and was of great value to it, and recommended the passage of an act of Congress referring the claim, for the past and future use of said invention, to the Court of Claims, as by said report (No. 183, Senate, 42d Congress, 2d session) will more fully and at large appear, and to which your orator begs leave, for greater certainty, to refer; but no action has been taken by Congress upon said report.

And your orator further shows that said Shavor & Corse, prior to the 1st day of July, A. D. 1868, and at the request of the said Marcus P. Norton, notified the then Postmaster-General, and filed in the Post-Office Department at Washington, a communication in writing, addressed to him, in which they forbade and prohibited the use of said invention (patented to the said Marcus P. Norton, April 14th, 1863, as aforesaid) after said date, by said Postmaster-General, or postmasters, unless prior thereto said Postmaster General made some definite arrangement for the use, in the postal service, of said invention; and your orator further shows that, since said notice, no arrangement has been made for the use of said invention so demanded and required as aforesaid.

And your orator further shows that prior to the 1st day of April, A. D. 1871, the said Helen M. Ingalls, hereinafter named, the assignee and owner of the said patent and all its reissues, notified the then Postmaster General in a similar manner, that from and after the said 1st day of April, unless a just compensation was made to her for the past use of said invention as aforesaid and a contract entered into with her for the right to use it, she would invoke the interposition of the courts for relief and to enjoin postmasters using said invention from its further use; and your orator further shows that no compensation has been given or contract made or license obtained for the use of said invention by
53 postmasters or by said department, its officers or employees, as required and demanded by the said Helen M. Ingalls, the rightful and lawful owner of said letters patent, and of each and every reissue thereof.

And your orator further shows unto your honors that on or about the 23d day of February, A. D. 1864, the said Jacob Shavor and Albert C. Corse, by a deed of assignment bearing that date, sold, reassigned, and reconveyed unto the said Marcus P. Norton the aforesaid named letters patent and any and all reissues thereof, which assignment and deed of reconveyance being accompanied by the sworn statement of the said Jacob Shavor and Albert C. Corse, the said statement and affi-

davit being thereto attached and a part thereof, were each duly and lawfully entered of record in said United States Patent Office, on the 24th day of July, A. D. 1869, in Liber U, 11, page 319 of transfers of patents, as will fully and at large appear by the original deed of assignment, reconveyance, and retransfer, now in the possession of your arator, or by a duly authenticated copy of the same, now ready in this honorable court to be produced, will also fully and at large appear, which said deed of assignment and reconveyance, with said statement and affidavit thereto attached and made a part thereof, your orator prays your honors that the same may be deemed and taken as a part of this his bill of complaint.

And your orator further shows unto this honorable court, that the said Marcus P. Norton having for good and lawful cause surrendered said last-mentioned reissued letters patent to the Commissioner of Patents, and having made due application in writing therefor, as by the law made and provided, and he having in all things complied with the acts of Congress in such case provided, did, on the third day of August, A. D. 1869, obtain new letters patent for the same invention and improvements, upon reformed, corrected, and amended specifications, for the residue of the said term of seventeen years then unexpired, which last-mentioned reissued letters patent were issued to and in the name
54 of the said Marcus P. Norton, the original and first inventor of the said improvements and invention so as aforesaid stated; and the same were in due form of law, and were under the seal of the Patent Office of the said United States; and they were duly signed by the Secretary of the Interior, and were countersigned by the Commissioner of Patents, and were dated the third day of August, A. D. 1869, and were numbered 3586 of reissue of patents, as by the said last-mentioned reissued letters patent, or a duly authenticated copy thereof, in court ready to be produced, will fully and at large appear.

And your orator further shows unto this honorable court, that on or about the 20th day of October, A. D. 1869, by an assignment and transfer in writing of that date, the said Marcus P. Norton sold, assigned, and transferred unto Helen M. Ingalls, of the city of Troy, county of Rensselaer, and State of New York, his entire right, title, and interest in and to the said letters patent and invention, and all reissues of the same; and also all and every right to compensation, and to recover by suit, or otherwise, for the use of the same, past or future, or for both, or for any violation of or infringement upon the said letters patent by any one; which deed of assignment was duly recorded in the Patent Office of said United States on the 1st day of August, A. D. 1870, in Liber B, 13, page 351, of transfers of patents, as by the said deed of assignment, or a duly authenticated copy thereof, and the certificate of such recording thereto affixed, ready in this court to be produced, will fully and at large appear.

And your orator further shows unto this honorable court, that the said Helen M. Ingalls, being the true and lawful owner and holder of the said invention and letters patent, duly surrendered the same to the Commissioner of Patents for the purpose of reissuing the said letters patent in two divisions, as by law then provided; and thereupon, upon the petition of the said Helen M. Ingalls, in writing, to the Commissioner of Patents, in conformity to the law, the said Commissioner of Patents in due time allowed, and thereupon granted a re-
55 issue of the said letters patent unto the said Helen M. Ingalls, according to her said petition so made and filed by her in said Patent Office. The said reissue was granted and was issued to her in two di-

visions, under and bearing date the fourth day of October, A. D. 1870, to wit, Division A and Division B, and each bearing the same date, namely, October 4th, A. D. 1870—Division A being numbered 4143 and Division B being numbered 4144 of reissue of patents in said Patent Office, and to the specifications, drawings, and claims of each of which reference is now and hereby had for a more full, correct, and perfect description of the said improvements and invention, as well as of the letters patent upon which this bill is founded. The specifications, drawings, and claims or summary of invention in the aforesaid named and described Division A are the same, or substantially and materially the same, as those contained in the said reissued letters patent granted, issued, and delivered to the said Marcus P. Norton on the 3d day of August, A. D. 1869, and numbered 3586 of reissued patents in said Patent Office, as aforesaid stated; which said letters patent, so reissued in two divisions, in the manner and form as stated herein, were issued in due form of law, under the seal of the Patent Office of said United States, and the same were duly signed by W. T. Otto, Acting Secretary of the Interior, and were countersigned by Samuel S. Fisher, Commissioner of Patents, and bearing date as aforesaid stated, to wit, the 4th day of October, 1870, and in two divisions, as hereinbefore stated—Division A being numbered 4143, as by the said last mentioned division of the said last reissued letters patent, or a duly authenticated copy thereof, now ready in this court to be produced, will more fully and at large appear.

And your orator further shows unto your honors that on or about the 4th day of March, A. D. 1871, the said Helen M. Ingalls, by an assignment in writing of that date, conditionally assigned and transferred unto William W. Secombe, then of the city, county, and State of New
56 York, and in trust, according to the terms and conditions of a deed of trust, signed by the said William W. Secombe, and bearing date on the said 4th day of March, A. D. 1871, and by him delivered to the said Helen M. Ingalls, and a part of the said conditional assignment and transfer of the said letters patent, her right, title, and interest in and to the said Division A of the said reissued letters patent and invention, which said assignment was recorded in the Patent Office of the said United States on the 11th day of March, A. D. 1871, in Liber X, 13, page 316 of transfers of patents, as by said assignment, or a duly certified copy thereof, and the certificate of such recording thereto affixed, ready in this court to be produced, will fully appear; which deed of assignment being in trust and upon certain conditions stated in the said deed of trust so signed, executed, and delivered unto said Helen M. Ingalls by the said William W. Secombe, has long since become absolutely void and of none effect either in law or in equity; that the said William W. Secombe has not only wholly and entirely failed to keep and to maintain the conditions and obligations stated in said deed of trust and made as a part of the said deed of assignment from the said Helen M. Ingalls to him the said William W. Secombe, dated and recorded so as aforesaid, as the sole and only grounds for the said trust assignment, but your orator shows that, by deed of assignment dated July 10th, 1873, and duly recorded in the United States Patent Office, in Liber B, 17, page 430 of the transfer of patents, said W. W. Secombe, with whom joined the Secombe Manufacturing Company, assigned, transferred, and reconveyed to said Helen M. Ingalls all the right, title, interest, claims or demands which they or either of them had or had acquired under or by virtue of said assignment, in trust to said Secombe as aforesaid, and all right, title, interest, claims or demands of them or either of them to or under said patent of April 14th, 1863, and its reissues as aforesaid, as

by said deed of assignment, or a duly certified copy now ready here in this court to be produced, will more fully and at large appear.

57 And your orator further shows unto this honorable court, that on or about the second day of January, A. D. 1877, the said Helen M. Ingalls, by an assignment in writing of that date, sold, assigned and transferred in trust, unto your orator, Christopher C. Campbell, of East Chatham, in the town of Chatham, county of Columbia, and State of New York, all her right, title and interest in and to the said letters patent and invention so patented, reissued, and last reissued on the fourth day of ctober, A. D. 1870, as "Division A," and numbered 4143 of reissue patents in the said Patent Office, which deed of assignment in trust has been duly recorded in the Patent Office of said United States, as by said assignment, or a duly certified copy of the same, and the certificate of such recording thereto affixed, now ready here in this court to be produced, will fully and at large appear. Your orator further shows unto your honors, that the said deed of assignment and transfer, in trust, was and is in the following words and figures, that is to say:

Whereas letters patent of the United States of America were duly granted, issued and delivered unto Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, for and upon new and useful improvements in post-office post marking and canceling hand stamp, for post marking of letters, and for the cancellation of the postage stamps in the manner, and for the purposes, and by the means therein described and set forth; which letters patent were issued and delivered bearing date the 14th day of April, A. D. 1863, and were numbered 38175; which letters patent have been three times reissued in the manner as by law provided, to wit, on the 23d day of August, A. D. 1864, numbered 1748; also on the 3d day of August, A. D. 1869, numbered 3586; and again, and for the third and the last time, reissued on the 4th day of October, A. D. 1870, in two divisions of the same date, to wit: "Division A" and "Division B"—division A being numbered 4143, and division B being numbered 4144, of reissue of

58 patents in the said Patent Office, to the specifications and drawings of each reference is now and hereby had, for a more full and perfect description of the said invention and improvements as well as for full information of the same, and of the letters patent, herein and hereby assigned in trust, in the manner and form following in this deed of trust as herein stated and set forth;

And whereas the original letters patent dated as aforesaid, on the 14th day of April, A. D. 1863, and numbered 38175, were by the said Marcus P. Norton, on the 20th day of April, A. D. 1863, assigned and transferred, in trust, to Jacob Shavor and Albert C. Corse, of the said city of Troy, in the manner and for the purposes stated in the reassignment and retransfer to the said Marcus P. Norton, dated February 23d, 1864; and whereas, on the 23d day of February, A. D. 1864, they, the said Jacob Shavor and Albert C. Corse, reassigned and reconveyed the aforesaid named letters patent and all reissues thereof, to the said Marcus P. Norton, which assignment and deed of reconveyance being accompanied by the sworn affidavit and statement of the said Jacob Shavor, and of the said Albert C. Corse, was duly and lawfully entered of record, and was recorded in the said United States Patent Office, on the 24th day of July, A. D. 1869, in Liber U 11, page 319 of transfer of patents, as will fully and at large appear by the original deed of reassignment and retransfer now in the possession of the undersigned; and whereas the said Marcus P. Norton did, on the 20th day of Octo-

ber, A. D. 1869, by deed of assignment and transfer, and for a valuable consideration, sell, assign, and convey unto Helen M. Ingalls, of the said city of Troy, county of Rensselaer, and State of New York, his entire right, title, and interest in the invention, improvements, and letters patent, and of any and every reissue of the same, and also all and every right to compensation, and to recover by suit or otherwise for the use of the same, past or future, or for both, by the said United States, as by reference thereto will fully and at large appear. The
59 said Helen M. Ingalls being the true and lawful owner and holder of the said invention and letters patent, duly surrendered the same to the Commissioner of Patents, for the purpose of reissuing the same in two divisions; and thereupon, upon the petition of the said Helen M. Ingalls, the said Commissioner of Patents, in conformity to law, granted a reissue of the said letters patent unto the said Helen M. Ingalls, according to her said petition so made and filed by her in said Patent Office.

The said reissue was granted to her in two parts or divisions, under date of October 4, 1870, as hereinbefore stated; of which Division A is the same, or substantially the same, as the said reissued letters patent granted to the said Marcus P. Norton on the 3d day of August, A. D. 1869, and numbered 3586, as aforesaid stated. The said deed of assignment to the said Helen M. Ingalls was duly entered of record, and was recorded in said Patent Office on the 1st day of August, A. D. 1870, in Liber B 13, page 351, of transfers of patents, as will appear by reference to the original deed of assignment and conveyance now in the possession of the undersigned Helen M. Ingalls; and

Whereas, on or about the 4th day of March, A. D. 1871, the said Helen M. Ingalls, by a certain deed of assignment, and upon the terms and conditions stated therein as a part thereof, did, in trust, assign and convey to William W. Secombe, then of the city, county, and State of New York, her right and title to the said invention and letters patent; which was recorded in said Patent Office on the 11th day of March, A. D. 1871, in Liber X 13, page 316, of transfers of patents, and which deed of assignment "in trust" has long since become void and of none effect, because and for the reason that the said William W. Secombe has not only wholly and entirely failed to keep and carry out the conditions therein named as the sole and only grounds for that "trust," but has repeatedly refused so to do. The consideration wherein said deed of trust was executed and delivered so as aforesaid, and named
60 therein, were not and have not been kept and faithfully observed by the said William W. Secombe, in the manner as in the said deed of trust was and is required of him in and thereby; but, on the other hand, the same were and have been utterly neglected and refused on the part and behalf of him, the said William W. Secombe; whereupon the said invention and letters patent, and each and every right, title and interest became reinvested in and the sole and exclusive property of the said Helen M. Ingalls, the same as though no assignment "in trust" had been made to the said William W. Secombe in the manner as aforesaid;

And whereas it has been deemed advisable that Christopher C. Campbell, of East Chatham, county of Columbia, and State of New York, should become fully vested with, and should have vested in him in trust, all the right, title, and interest which I now have or ever have had in, to, or for the said invention and letters patent, and of each of the several reissues thereof; also of any and every claim or claims for past use of the said invention in the postal service of the said United

States from the date of the said letters patent, to wit, the 14th day of April, A. D. 1863;

The right, title, and ownership of the said invention and letters patent is, in trust, vested in the said Christopher C. Campbell, upon the conditions that he shall have the sole management of said trust, and be at the expense of the same, until a fair, just, and reasonable settlement shall be had with the United States aforesaid for such use of said invention in the postal service of said United States by the Post-Office Department, for which the said Christopher C. Campbell shall have and shall receive one-third of such sum as may hereafter be determined upon by the Court of Claims of said United States, in payment for the past or for the future use of said invention in the said postal service; and the said Helen M. Ingalls shall have and shall receive two-thirds of such sum as may hereafter be determined upon by the said Court of Claims, in payment for the past or for the future use
61 of the said invention in said postal service; and the said Court of Claims, in the making and entering of any judgment against said United States for the use of said invention, improvements, and letters patent in such postal service, is now and hereby authorized and *and* requested to make and enter such judgment as follows, to wit: one-third of the whole sum or amount to the said Christopher C. Campbell, and two-thirds of the whole sum or amount to the said Helen M. Ingalls, and thereby to require each of said named persons to sign and acknowledge satisfaction of such judgment, or to receipt therefor when the same is paid by the Treasurer of the said United States, in the manner provided by law, which payment shall be at the same time, and in the presence of each, who thereupon shall sign a receipt or make satisfaction for such judgment on receipt of payment, or by their legal representatives, as by law may be provided; and the said Court of Claims shall have full power to make such an order or decree in the premises as hereinbefore stated, so that one-third of the recovery or judgment determined and fixed by said court as by law may be provided shall be paid to the said Christopher C. Campbell, and two-thirds thereof shall be paid to the said Helen M. Ingalls, directly from the Treasury of said United States, and in no other manner shall payment be made for such use by the said United States of the said invention and letters patent.

Now, therefore, this deed of assignment and transfer, in trust, witnesseth, that for and in consideration of the sum of one dollar to me in hand paid, the receipt whereof is now and hereby acknowledged, and in the further and other valuable consideration hereinbefore and herein stated as the main conditions upon which this instrument is now and hereby made and executed, in trust, I, the said Helen M. Ingalls, have, in trust, so as aforesaid, sold, assigned, and transferred, and I do in like manner hereby sell, assign, and transfer, in trust, unto the said Christopher C. Campbell, all the right, title, and interest which I now
62 have or ever had, in, to, or for the said invention and letters patent, and the several reissues thereof, which is, as aforesaid stated, the entire invention, improvements, and letters patent, named, dated, and numbered so as aforesaid; and in like manner, in trust, and upon the same terms and conditions. I also sell, assign, and convey unto him, the said Christopher C. Campbell, all the right, interest, and claim for and to the past use of the said invention and improvements under the said letters patent, or any reissue thereof obtained by me from the said Marcus P. Norton, by the said deed of assignment, dated the 20th day of October, A. D. 1869, and now of record in the manner

so as aforesaid stated and set forth, intending herein and hereby to sell' assign, and convey, in trust, unto the said Christopher C. Campbell, in the manner herein provided and set forth, all my right, title, and interest, or claim against said United States, for the past or future use of the invention and letters patent in the postal service of said United States by the Post Office Department; and also, in like manner, the entire invention, improvements, and letters patent, and all and every reissue of the same since the 14th day of April, A. D. 1863. The same and each and every thereof to be held in trust, in the manner and for the benefit of each of the persons herein specified and set forth, and on no other grounds, and for no other use or purpose.

In testimony whereof I have, on this second day of January, A. D. 1877, hereto set my hand and seal.

HELEN M. INGALLS. [SEAL.]

Sealed and delivered in presence of—
JOHN W. SMITH.

STATE OF NEW YORK,
Columbia County, ss:

On this second day of January, A. D. 1877, before me, the subscriber, personally appeared Helen M. Ingalls, to me known to be the per-
63 son described in and who executed the within instrument, and acknowledged that she executed the same.

JOHN W. SMITH,
Justice of the Peace in and for Columbia County, N. Y.

And now your orator hereby prays this honorable court that the aforesaid named letters patent, dated the 14th day of April, A. D. 1863, numbered 38175; also the reissued letters patent, dated the 23d day of August, A. D. 1864, numbered 1748 of reissue of letters patent; also the reissued letters patent dated the 3d day of August, A. D. 1869, numbered 3586; also the reissued letters patent reissued in two divisions, to wit: "division A" and "division B," dated the 14th day of October, A. D. 1870; "division A" being numbered 4143, and the same or substantially the same as the said reissued letters patent dated the 3d day of August, A. D. 1869, and numbered 3586, as hereinafter stated and set forth, together with the several schedules or specifications annexed thereto so as aforesaid stated, and also the said deed of assignment in trust so made and entered of record in said Patent Office as required by law, and last above described and set forth in detail and at large, may each and every thereof be deemed and taken as a part of this bill of complaint, and to the original of which, or a duly authenticated copy thereof, and of each of the same now in your orator's possession and ready to be produced in this court, your orator craves the leave of your honors to refer to the same at all times whenever it becomes necessary so to do.

And your orator further shows unto this honorable court, that he, the said Christopher C. Campbell, has, ever since the date of the said deed of assignment last above described and set forth in detail and at large, been and now is entitled to all the rights, interests, and privileges thereby secured unto him in the manner set forth in the said deed of assignment in trust, so at large and in detail specified in this your
64 orator's bill, and to all and every of the rights, interests, and privileges, secured in and by the said letters patent, dated the 14th day of April, A. D. 1863, numbered 38175, and also each and every reissue of the same, each being dated and numbered so as aforesaid,

and containing the said improvements and invention hereinbefore described and specified; and your orator now is and ever since the date of the said deed of assignment in trust, has been justly entitled to the exclusive right, liberty, and privilege to manufacture, to vend and to use the said improvements and invention particularly set forth, described in and claimed by the several claims stated in the said letters patent, within the United States aforesaid.

And your orator further shows unto this honorable court that said improvements and invention so as aforesaid patented is of very great utility and value, and that the same has been and now is being extensively introduced into public use; and your orator would, but for the unlawful and wrongful acts of the said defendant Thomas L. James, United States postmaster in and for the city of New York, State and southern district aforesaid, and of others acting in concert with him, the said defendant, have made large gains and profits, and would have derived many valuable advantages from the sale and use of the said improvements, invention, and letters patent; and your orator would, but for the wrongful and unlawful acts and doings of the said defendant Thomas L. James, postmaster at said city of New York, for the Government of the United States of America, as hereinbefore stated, and of others in confederacy with him, the said defendant, now be enabled to manufacture and to vend for use in the public and postal service of the said United States the said improvements and invention to which your orator in law and in equity is entitled to the full and exclusive right and title and ownership so as aforesaid stated and set forth, with great profit, benefit, and advantage to him, the said Christopher C. Campbell, complainant and assignee in trust as hereinbefore stated, but that by such wrongful and unlawful acts and doings of the said defendant the said
65 complainant is now hindered and prevented from so doing, to his great injury and damage substantially as herein set forth.

And your orator further shows unto your honors, that the said improvements, invention, with the said letters patent thereon so granted and reissued, are of great value in and to the post-office of the said United States, in and for the said city of New York, in the State of New York and southern district aforesaid, to wit, of the value of thirty thousand dollars per year in that post office, as your orator is informed, and he verily believes the same to be true; and that your orator is now the sole and exclusive owner of the said invention and letters patent, and of each and every reissue thereof in the manner and form herein stated and set forth; and also of all the rights and privileges granted and secured, or intended to be granted or secured therein and thereby, within the said United States of America, as by the said deed of assignment in trust is stated and in detail and at large set forth.

Yet the said defendant, well knowing the premises and the rights and privileges secured so as aforesaid, but contriving to wrong your orator and to deprive him of the benefits and advantages which might and otherwise would accrue unto him from the said invention, improvements, and letters patent, did, at the city of New York, in the State and southern district aforesaid, and on or about the first day of January, A. D. 1872, and on divers other days and times since then, and continuously therefrom, and until this present time, and during all the time intervening, as your orator is informed and verily believes the same to be true, without the license or consent of your orator, and in violation of the said exclusive rights and privileges so secured to your orator, and in violation of and in infringement upon the said letters patent—"division A"—dated the 4th day of October, A. D. 1870, and numbered 4113 of

reissued patents, wrongfully and unlawfully caused to be manufactured, sold, and used, and did put the same into general use in the postal service of the said United States, in the post-office of the said United
66 States in and for the said city of New York, in the post-marking of letters and other mail matter, and in the cancellation of postage stamps thereon in the manner, and by the means, and by the device specified and described in the specifications, drawings, and embraced in and covered by the first, second, third, and fourth claims of the said reissued letters patent, so dated and numbered as last aforesaid, a copy of which is hereto annexed and made a part of this bill of complaint for the purpose of showing unto this honorable court the machine, device, invention, and improvements used and now in use by the said defendant in the postal service of said United States, in the post-office of said United States in and for the said city of New York, for the post-marking of letters and other mail packages, and for the cancellation of postage stamps thereon in the manner and for the purposes substantially set forth, described, and claimed in the said "division A," dated October 4th, 1870, and numbered 4143.

And your orator further shows unto your honors that the machines or devices for the post-marking of letters as well as other mail matter, and for the cancellation of postage stamps thereon at one and the same operation thereof, which the said defendant has caused to be manufactured, sold, and has used and caused others in his employ to use and to be used in the United States post-office in and for said city of New York, State and southern district aforesaid, contrary to the statute in such case made and provided, as hereinbefore stated and charged as having been used at the said United States post-office in said city of New York, and which the said defendant and others under his instructions and authority is and are now using at that place without rightful authority and in violation of law, embrace in their construction and in the mode of their operation, and in the results attained thereby, the same, or substantially the same, features, improvements, and invention as those which are described in the aforesaid described reissued letters patent, dated the 4th day of October, A. D. 1870—"division A"—
67 numbered 4143 of reissued letters patent by the said Commissioner of Patents, and therein and thereby claimed in and by the several claims thereof, and secured to your orator in the manner hereinbefore stated, and the same was and are an infringement of and upon the said letters patent so mentioned, numbered, and dated, and are in violation of the exclusive rights and privileges thereunder and thereby secured.

And your orator further shows unto your honors that after the granting of the said letters patent so as aforesaid, and before and since the making of the deed of assignment of the same in trust, in the manner as hereinbefore stated, and during the term of time of the said reissued letters patent from the date thereof, and at divers times and on divers days, and before the commencement of this suit, hitherto, to wit, at the said city of New York, and in the said post-office of the said United States in and for the said city of New York, the said defendant, Thomas L. James, unlawfully and wrongfully, and without the consent and permission, or license, and against the will of your orator, the complainant, Christopher C. Campbell, did purchase, or caused to be purchased and used, and did use, and did put in practice the said machines, devices, improvements, and invention for the post-marking of letters or other mail matter, and for the cancellation of postage-stamps thereon, substantially as specified and described in the specifications, drawings,

and claims of the said last-mentioned reissued letters patent of the date of October 4th, 1870, "Division A," and numbered 4143, all and every of which was and is in violation of, and in infringement upon the said exclusive rights and privileges so secured to your orator, the complainant herein, by the said letters patent so reissued, dated, numbered, and assigned in trust in the manner aforesaid; and the same was and is contrary to the form, force, and effect of the statutes of the said United States in such case made and provided by the Congress of the United States in Senate and House of Representatives assembled.

68 Whereby, and by the means of which grievances, your orator, Christopher C. Campbell, has been greatly injured and deprived of large gains, profits, and advantages which he might and otherwise would have derived from said improvements and said invention and letters patent thereon, reissued, dated and numbered as last aforesaid, to wit, at the post-office of the United States of America in and for the city of New York, county and State aforesaid, southern district of New York, and within the jurisdiction of this honorable court, and has sustained by such several and continued acts of unjust and deliberate infringement, by the said defendant, Thomas L. James, postmaster of said United States, actual damages to the sum and amount of thirty thousand dollars and upwards, and more than that sum and amount for and during each and every year of the use of the said improvements and invention and infringements upon the said letters patent by the said defendant.

And your orator further shows unto this honorable court that by the means of the several facts and premises, and by the force and provisions of the laws or statutes of said United States hereinbefore mentioned, an action or suit in equity has accrued to him, your said orator and complainant, Christopher C. Campbell, and against the said defendant, Thomas L. James, to recover in this court by and through this bill of complaint, the said actual damages and such additional sum or amount not exceeding in the whole sum three times the amount of all such actual damages, as this honorable court may be pleased to order, adjudge, and determine under and as provided by sections 55 and 59 of the act of the Congress of the said United States, entitled "An act to revise, consolidate, and amend the statutes relating to patents and copyrights," approved on the 8th day of July, A. D. 1870.

And forasmuch as your orator is utterly remediless at the common law, and can have no relief except in this court, in or upon the premises herein stated and set forth:

To the end, therefore, that the said defendant, Thomas L.
69 James, United States postmaster in and for the United States post-office at the said city of New York, may, if he can, show why you said orator should not have the relief herein demanded, and hereby prayed for, and upon his corporal oath, and according to the best and uttermost knowledge, remembrance, information, and belief, full, true, direct, and perfect answers make to the premises, and to all the several matters hereinbefore stated, set forth, and charged, as fully and as particularly as if interrogated as to each and every of such matters; and that said defendant may be compelled to account for and to pay to your orator the profits acquired, and also the damages suffered by your orator from and by reason of the aforesaid infringements and unlawful acts of said defendant—

May it please your honors to grant unto your orator the writ of injunction issuing out of and under the seal, and by the order and

authority of this honorable court, in due form of law, commanding, enjoining, and restraining the said defendant, his servants, agents, attorneys, and workmen, and each and every of them, and all other persons under the command or the control of the said defendant, from directly or indirectly making, using, or vending to others to be used, or in any manner counterfeiting or imitating the said invention, or any part or portion thereof, or from using or furnishing others to use or to be used, any post-office post-marking and canceling hand-stamp, or other machine or device embracing the improvements, or the invention, or any part, or any portion thereof, or anything substantially and materially the same, invented, patented, and assigned as aforesaid stated and set forth; and that such injunction be made by your honors perpetual in its character and operation;

And to grant unto your orator such other or further relief as shall be agreeable to equity, and as this honorable court shall deem meet and sufficient, and specially, that your honors, upon the entering of your decree for an infringement as above prayed for, may also proceed to assess, or cause to be assessed, under your direction, in addition
70 to the profits and gains to be accounted for by the defendant aforesaid, the damages your orator has sustained by reason of such infringements; and that your honors may increase the actual damages so assessed to a sum equal to three times the amount of such assessment, under the circumstances of the unlawful acts, and the unjust infringements by the said defendant at the times and at the place hereinbefore set forth, and as provided by the "patent act" of July 8, A. D. 1870, and hereinbefore referred to by the title thereof, and especially sections 55 and 59 of the said patent law.

And your orator, Christopher C. Campbell, prays your honors that the said defendant, Thomas L. James, United States postmaster at the said city of New York, may, by the order of this honorable court, be decreed and required to pay to your orator all the costs and expenses of this suit, because of the unjust and unlawful acts of infringement upon and violation of the said letters patent, in the manner and during the time hereinbefore stated; and that damages may be recovered herein in the manner aforesaid; and that the preliminary injunction, upon due notice to the said defendant, as well as a perpetual injunction at the final hearing of this cause, may each be granted and issued, as and in the manner herein prayed; and that all other relief asked for by this bill may be fully decreed and ordered by your honors.

May it please your honors to grant to your orator, Christopher C. Campbell, a provisional or preliminary injunction, issuing out of and under the seal of this honorable court, restraining the defendant, Thomas L. James, his attorneys, solicitors, clerks, servants, workmen, and agents to the same purport, tenor, and effect hereinbefore prayed for, in regard to a perpetual injunction.

May it also please your honors to grant to your orator, Christopher C. Campbell, a writ of subpœna ad respondendum, issuing out of and under the seal of this honorable court, directed to the said defendant, Thomas L. James, United States postmaster at the said post-
71 office, in the said city of New York, commanding him to be and to appear in this court, and then and there to make answer unto this bill of complaint, and to perform and to abide by such order and decree herein as to this court may seem meet, and to be required by the law, by the principles of equity and of good conscience.

And your orator, as in duty bound, will every pray, &c.
Dated this 17th day of July, A. D. 1877.

CHRISTOPHER C. CAMPBELL,
Complainant and Assignees in trust.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.
GEORGE H. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

72 UNITED STATES OF AMERICA,
State and Southern District of New York, ss:

Christopher C. Campbell, the complainant named in the foregoing amended bill of complaint as orator, personally appeared before me, the undersigned, a United States commissioner, and he, the said Campbell, being by me duly sworn, doth depose and say, that he has read the foregoing amended bill of complaint, in equity, signed by him, and that he knows the contents thereof, and that the same is true of his own knowledge, except as to those matters which are therein stated on belief or on information derived from others, and as to those matters he believes it to be true.

CHRISTOPHER C. CAMPBELL,
Complainant and Assignee in trust.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.
GEORGE H. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

Sworn to before me, this 17th day of July, 1877.

JOHN A. SHIELDS,
U. S. Commissioner Southern District of New York.

(Here follows diagram marked page 73.)

74 No. 4143. Reissue.

The United States of America to all to whom these letters patent shall come:

Whereas Marcus P. Norton of Troy, N. Y., assignor to Helen M. Ingalls, of same place, has alleged that he has invented a new and useful improvement in post-office post-marking and canceling hand-stamps, (for which letters patent were issued to him, dated April 14, 1863, the same surrendered, and new letters issued to him dated August 23, 1864; which second letters were surrendered, and new letters issued to him dated August 3, 1869; which last letters having been surrendered, as well as letters-patent for improvement in hand-stamps issued to Helen M. Ingalls, as assignee of said Marcus P. Norton, dated August 23, 1870, the said two letters patent last named have been canceled, and new letters ordered to issue to said assignee on two separate amended specifications,) and has made oath that he is a citizen of the United States, that he verily believes he is the original and first inventor or discoverer of the said improvement, and that the same hath not to his knowledge and belief been previously known or used; said assignee having paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents praying that a patent may be issued therefor:

These are, therefore, to grant to the said Helen M. Ingalls, her execu-

tors, administrators, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, using, and vending to others to be used, the said improvement, a description whereof is hereby given in the annexed schedule, and made a part of these presents.

In testimony whereof, I have caused these letters to be made patent, and the seal of the Patent Office to be hereunto affixed.

75 Given under my hand at the city of Washington, this fourth day of October, in the year of our Lord one thousand eight hundred and seventy, and of the Independence of the United States of America the ninety-fifth.

W. T. OTTO,
Acting Sec. of the Interior.

Countersigned and sealed with the seal of the Patent Office.
[L. S.] SAM'L S. FISHER,
Commissioner of Patents.

UNITED STATES PATENT OFFICE.

Marcus P. Norton, of Troy, New York, assignor to Helen M. Ingalls, of same place.

Letters-patent Nos. 38175, dated April 14, 1863; reissue No. 1748, dated August 23, 1864; reissue No. 3586, dated August 3, 1869; reissue No. 4143, dated October 4, 1870. And also letters-patent No. 106716, dated Aug. 23, 1870.

DIVISION A.

Improvement in post-office post-marking and canceling hand-stamps.

The schedule referred to in these letters-patent and making part of the same.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer, and State of New York, have invented new and useful improvements in "post-marking letters," "packets," &c., and in the "canceling" of the "postage stamps" thereon, in the manner, and by the means substantially as hereinafter described and set forth; that letters-patent of the United 76 States were duly issued thereon, under and bearing date April 14, 1863, which were assigned and transferred under a certain agreement, and by virtue of a certain instrument in writing, bearing date the 20th day of April, 1863, and recorded in the United States Patent-Office on the 8th day of March, 1864, in liber C⁷, page 458 of transfers of patents, to Jacob Shavor and Albert C. Corse, of said city of Troy, county and State, and who, on or about the 23d day of February, A. D. 1864, duly reassigned and retransferred the said invention, improvements and letters patent to the said Marcus P. Norton, inventor and assignee aforesaid, by a certain instrument in writing duly executed, and bearing date on the said 23d day of February, 1864, and which assignment and transfer from Jacob Shavor and Albert C. Corse was duly recorded in the said United States Patent-Office on the 24th day of

July, 1869, in liber U^{11}, page 319 of transfers of patents; on or about the 23d day of October, A. D. 1869, I, the said Marcus P. Norton, by deed of assignment in writing, did lawfully assign and transfer unto Helen M. Ingalls, of the city of Troy, State of New York, the said invention and letters patent, dated and reissued as hereinbefore stated and set forth, which deed of assignment was duly recorded in the United States Patent-Office on the 1st day of August, 1870, in Liber B^{13}, page 351 of transfers of patents, and who is now the lawful owner thereof under and by virtue of the said sale, assignment and transfer so made, executed and delivered and recorded as before stated.

Now, therefore, I, the said Marcus P. Norton, do hereby declare the following to be a full, clear, and exact description of the construction and operation thereof, reference being had hereinafter to the accompanying drawings and to the letters of reference marked thereon, which drawings so marked and lettered hereby make a part of these my specifications of and concerning my said invention and improvements herein contained and set forth.

Like letters refer to and represent like and corresponding parts of my said invention.

77 Figure 1 represents a side elevation of the postage-stamp canceling and post-marking device hereinafter described and set forth for canceling postage stamps, with any suitable ink contained upon such instrument, at the same time, blow, and operation of the making of the post-mark on the letter, envelope, or packet, one side of and from such postage stamp or frank so canceled.

Figure 2 represents a vertical section taken on a line through the center of the various parts of the post-marking and postage-canceling device or instrument herein contained, described, and set forth.

Figure 3 represents a face view of the device, showing the post-marking stamp ready for use, and the postage-canceling die or device made of wood, used endwise, or of cork, rubber, or other suitable material therein inserted in the manner substantially as shown, and more at large described hereinafter.

Figure 4 shows a device for the purpose of canceling postage stamps or letter franks, used to represent value, by the use and power of any suitable ink by the means of wood, cork, or any elastic material for the type or die which may be used for that purpose separate and alone or in combination with any suitably-constructed post-marking stamp or device, substantially as shown at Fig. 3 of the said drawings.

Figure 5 represents a vertical section of a post-marking and postage-stamp canceling device or die combined and constructed entirely of iron, steel, or other metal, and more fully described hereinafter.

Figure 6 is a plan or face view of Fig. 5, showing the postage-stamp canceling device or die made of iron, steel, or other suitable metal or material.

Figure 7 represents the wrench used for securing the dating-type in a proper place within the post-marking device, having the name of the town or post-office where used engraved thereon in relief letters.

Figure 8 represents the tool or instrument used for removing the cork, wood, or rubber die or type used for canceling postage-
78 stamps from the tube or surrounding case where held or contained, so as to repair or replace the same with a new one when worn out or unfit for use.

The nature of my said invention and improvements herein contained and described consists in the employment and combination of a device or die used for the more complete and perfect cancellation of postage-

stamps and letter-franks, by means of soft wood, used endwise, or of cork, rubber, or other suitable material, whereby such stamp or frank is effaced and canceled, in and by indelible or other ink, in the manner substantially as herein described and set forth.

It also consists in the combination of a postage-stamp canceling device or die, constructed of wood, cork, rubber, or any suitable material, with any suitably arranged and constructed post-marking stamp or device, so as to cancel, efface, or destroy the postage-stamp or letter-frank with indelible or any suitable ink at the same time, blow, or operation of the stamp or instrument, by which the post-mark is given or made upon the letter, envelope, or packet, substantially as herein described or set forth.

It also consists of the post-marking of letters, envelopes, or packets, and in the cancellation of the postage stamp or stamps thereon with, in, or by any suitable ink, or similar material, by means of some soft wood, used endwise against the postage-stamp, or by the means of cork, rubber, iron, or steel, or by means of any other suitable material, so combined with the post-marking stamp or instrument as to cancel, efface, or destroy the *the* postage-stamp or stamps at one and the same blow or operation of the entire instrument, thus constructed for that purpose, whereby to prevent a second or reuse of such postage stamp or stamps.

To enable others skilled in the art to which my said invention and improvements relate to make and use the same, I will here proceed to describe the construction and operation thereof, which are substantially as follows; that is to say:

79 I construct the post-marking device or stamp D of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device and die or type.

E, Fig. 3, is the mortise or recess, of suitable dimensions to receive the type for the month, day of the month, and for the year, and called or known as the dating-type, around which is the name of the town or post-office where used, in relief letters, and upon the lower face of such post-marking stamp or device.

I construct the postage canceling stamp or device G (for the purpose of canceling, in a more perfect and thorough manner, the postage-stamps on letters, envelopes, or packets), of wood, used endwise upon the postage-stamp, or of cork, rubber, or of any suitable or elastic material, and insert the same in the tube or recess F, which is that part of the canceling device marked C of the accompanying drawings, and which is connected to and combined with the said cross-piece B, as herein described.

I prefer to have the diameter of the cancelling device and die or type F, Figs. 2, 3, and 4, about the same as the width of the postage-stamp to be cancelled or destroyed by means of the same.

The said canceling-die or type G may be of any length required, and so made as to correspond with the tube or recess F, and closely to fit the same, and it may be made of wood, cork, rubber, or of any elastic material as aforesaid.

The face of this device may contain a plan or form for canceling the postage-stamp in, with, or by ink, like unto that shown at Fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

The said device, die, or type G will project somewhat below the face of the post-marking device D, if deemed best so to do, and it may be removed out of the said tube or recess F by means of a pin or bolt, sub-

stantially like that shown at Fig. 8, the lower end of which operates in and through the aperature *a*, Figs. 2 and 4, for the purpose of repairs, or to replace it by a new one, when desired.

80 A is the operating handle, firmly secured to the cross-bar B by any suitable mechanical means, and it will be made of wood, &c.

The said postage-stamp canceling device, die, or type G, being thus constructed of cork, wood, or rubber, or other elastic material, and combined with the said device C, with recess or tube F therein as aforesaid, will receive and contain, on the face or configuration thereof, the ink aforesaid, in quantities sufficient to permanently cancel, efface, or destroy the postage-stamp whereon the same is used while post-marking letters, packets, &c., in such manner as to prevent the said postage-stamp being cleansed of the said canceling ink by any chemical or other process; for the said canceling-ink, so put upon the postage-stamp by means of said cork, die, or type, would be so effectual that any attempt or effort to remove it therefrom would entirely destroy, or nearly so, the aforesaid postage-stamp, and thus and thereby render the same incapable for or of a second or other use without immediate detection.

The said cork, rubber, or other suitable elastic material, used as aforesaid, will render the said post-marking and postage stamp canceling die or type of a more easy, and consequently rapid use, because of there being a yielding of the said canceling die, or type G, when the blow is given upon the letter, envelope, or packet and postage-stamp as aforesaid; the operator will not tire as much by means of a constant, continuous, and rapid use of the same; and it will also somewhat aid the operator in raising the entire instrument or apparatus from the paper or packet and postage stamp, when the impression thereon and the cancellation of such postage-stamp shall have been given by the operator, in the manner substantially as aforesaid.

The said canceling type or die can be easily repaired, or replaced by a new one, whenever desired, and at very little expense; and such canceling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small

81 bolt. In such case there would not be any tube or pipe surrounding said canceling die or type G. The operation and effect produced would, in such case of construction, be the same.

The said postage-stamp canceling device, die, or type G may be of any desired distance from the aforesaid post-marking or dating device or stamp D, or it may be securely fastened to the immediate side of the said post-marking and dating part or stamp or device D, by any convenient and suitable mechanical means.

The said canceling die, type, or device G I prefer to use made of cork, as it will hold a much greater quantity of canceling-ink upon and in the lower face thereof, and when it comes in contact with the printed surface of the postage-stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with the said canceling ink, whereby such postage stamp, so operated upon and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be reused, or used a second time in fraud upon the postal revenue, without immediate detection of the same.

Soft wood used endwise will answer nearly the same purpose. Still, long and continued use, after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling die or type used upon postage-stamps as aforesaid.

The said tube or cylinder C, Figs. 2, 3, and 4, may be constructed in any suitable manner or by any convenient means, and thereafter fastened to the under side of the cross-bar B in or by any mechanical means, which will answer the required purpose. It may also be of any form or shape deemed best.

I also construct my said postage-stamp canceling device, die, or type of cast-iron, steel, or other suitable metal, substantially as shown at G′, Figs. 5 and 6, and which may be secured to the said cross-bar or piece B in like manner as the said tube or cylinder C, Figs. 2 and 4, and which is done either by screw and nut where the same unites with the
82 said cross-bar, or it may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto.

The said post-marking and dating device D is also secured to the under side of said cross-bar or piece B, and at or near the end thereof, opposite that where said tube or cylinder C or canceling die, type, or device G, is securely fastened, as aforesaid, in like manner and by substantially the same means as used for such fastening of said canceling device to said cross bar upon the under side of the same as aforesaid.

The aforesaid metal canceling device, die, or type G′, figs. 5 and 6, may also be fastened or secured to the immediate side of the said post-marking device by any good and sufficient means, substantially as hereinbefore described and set forth, in reference to the said device C, or tube, or cylinder, constructed to receive and contain the said type or die G, figs. 2, 3, and 4.

Such metallic device, die, or type, may also have, upon its lower face or lower surface, any suitable configuration deemed best to use for the purpose of canceling the postage-stamp in, with, or by any suitable ink at the same time, blow, and operation of the instrument or apparatus, as hereinbefore stated and set forth.

In any and every case the post-marking of the letter, envelope, or packet, and the effacing or cancellation of the postage-stamp or letter-frank thereon representing value, are done at the same time, and by the same blow or operation of the said several devices and parts, constructed and combined in the manner and by the means substantially as herein described and set forth.

Both the post-marking and cancellation of the said postage-stamp are done with indelible or other and suitable ink used for such cancellation or effacing of the postage-stamp, and that, too, without any injury to the letter, envelope, or packet, or to the contents thereof, as would be the case were the said postage stamp cancelled by being cut in several parts and places by means of cutters or knives constructed for
83 that express use and purpose, as is the case by the cutters or knives contained and set forth in letters patent granted to me on the 9th day of August, A. D. 1859, also on the 16th day of December, A. D. 1862, the first of which contains no guard or guards to said knives or cutters, while the second contains such guard or guards, for the purpose of preventing such cutters or knives from cutting too much or too deep in and upon said postage-stamps.

The said instrument and devices herein set forth and described will not, under any circumstances, cut either the letter, envelope, or postage-stamp thereon, in any way or manner, but perform the cancellation required to be done, in, with, and by, ink only, as aforesaid, no cutting device whatever being used. But the said cork device, die, or type will, when it comes in contact with the printed or enameled like surface of

the postage-stamp, somewhat mar, bruise, or break the same, by means of the blow given by the instrument, whereby to prepare the same to be filled by or impregnated with any suitable ink used for such cancellation, substantially as aforesaid.

In no case could a fraud be committed by a second or reuse of the government postage-stamp or letter-frank representing value without being discovered.

This arrangement and combination of devices will greatly hasten or facilitate the making up of the mails for transportation. It will also economize in labor, and reduce the labor in post-marking letters and in the canceling of the postage-stamps thereon, to about, if not entirely, one-half of the number of workmen, laborers, or clerks absolutely necessary when and where this combined instrument is not used in the manner aforesaid.

It therefore saves at least one-half of the labor required in the post-marking of letters, envelopes, or packets, and in the cancellation of the postage-stamps thereon. It also makes the cancellation of the postage-stamps more effectual or permanent, so as to prevent a second or reuse of such postage-stamps by any means whatever, which is very important in the successful management of the post-offices in this country,
84 whereby and by means of which large sums of money are annually saved this government; and frauds upon the postal revenue, by the second or reuse of postage-stamps, are also prevented by the use of my invention and improvements herein contained, described and set forth.

By the use of said invention the letters to be mailed and prepared for transportation, by means of post-marking the same, and in canceling the postage-stamps thereon, as aforesaid, need not be handled over but once, thus and thereby economizing in time and in labor.

The cross bar or piece B, Figs. 1, 2, 3, and 5, may be of any suitable width or thickness, or of any metal which will answer the required purpose. It may also be of any length deemed best to use in order to get the said post marking device and the said postage canceling device, die, or type suitably arranged upon the lower surface of the same, and thereto firmly and securely fastened or attached in the manner substantially as aforesaid.

The type whereby to give the date are arranged in the said mortise E, as shown in Figs. 3 and 6, and are there held in their proper place by means of a set-screw, substantially as shown in Figs. 2, 3, and 6.

The cork or other material used for the canceling device, die, or type, will be pressed into the said tube or pipe at recess F, cylinder C, Fig. 2, and the same is there firmly held, substantially as shown at G, Fig. 4.

The device or configuration for the cancellation of the postage stamp, in the manner substantially as aforesaid, may be seen at C and G, Fig. 3, where cork is used; but when iron, steel, or other suitable metal is used, the device or configuration may be seen at G′, Fig. 6.

The invention and improvements contained in and covered by the several claims hereto annexed or below given is and are not contained in the letters patent granted on my application, in due form, on "the 9th day of August, 1859," nor is, nor are the same to be found in my said letters patent granted to me "December 16, 1862;" but the said invention and improvements are contained in my caveat duly
85 filed in the United States Patent Office, in the year 1853, containing, also, other improvements.

Having thus described my original invention and improvements in

"post marking" and "postage-canceling" devices, combined and arranged for the purpose aforesaid—

What I claim, and desire to secure by letters patent of the United States of America, is:

1. The postage-stamp canceling device, cylinder, or tube C, containing a die or type, G, made of cork, wood, or other suitable material, or any equivalent for said cylinder or tube C, or for the said canceling die or type G, whereby to efface, cancel, or destroy the postage stamp with indelible or other ink, in the manner and for the purposes substantially as herein described and set forth.

2. The canceling device, cylinder, or tube C, with cork or wood, or any substantial equivalent thereof, forming the die or type G therein, in combination with the cross-bar or piece B, and with the post-marking device D, substantially as and for the purposes herein described and set forth.

3. The post-marking of letters, envelopes, and packets, and the cancellation of the postage-stamps thereon with ink at one and the same blow or operation of the instrument in the manner and by the means substantially as herein described and set forth.

4. The employment and combination of a post-marking device with a postage-stamp canceling device, both being operated by one and the same handle, for the post marking of letters, envelopes, or packets, and for the cancellation of the postage-stamps thereon with indelible or other ink, in the manner substantially as herein described and set forth.

In testimony whereof I have on this 14th day of September, 1870, hereunto set my hand, in the presence of two witnesses, to wit:

MARCUS P. NORTON.

Witnesses:
FRED'K KOONES.
EDW. W. DONN.

86 *The answer of Thomas L. James, defendant, to the bill of complaint of Christopher C. Campbell, assignee in trust, complainant.*

Circuit court of the United States, for the southern district of New York, in the second circuit, in equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN Trust,
against
THOMAS L. JAMES, UNITED STATES POSTMASTER New York.

This defendant now and all times hereafter, saving and reserving unto himself all benefit and advantage of exception which can or may be had to the many errors, uncertainties and other imperfections in the said complainant's said bill of complaint contained, for answer thereto, or to so much, and such parts thereof, as this defendant is advised is or are material or necessary for him to make answer thereto, respectfully says:

That defendant admits that he is a citizen of the State of New York, and of the United States; that on April 1st, 1873, he was appointed postmaster at the city of New York; that he was confirmed by the Senate, and duly commissioned by the President of the United States; that on the day aforesaid he entered upon the performance of the
87 duteis of said office, andsince said day has, under the direction

of the Post-Office Department of the United States, managed and controlled the business and affairs of the same.

That he has no knowledge or information—except from said bill—that the complainant herein is a citizen of the United States, and of the State of New York, and therefore he leaves complainant to make such proof thereof as he may be advised.

And further answering, defendant admits, that on the 14th day of April, 1863, letters patent of the United States, bearing date on that day, and numbered 38175, were issued to one Marcus P. Norton; and that said letters patent purported to secure to said Norton, his heirs, executors, administrators and assigns, for the full term of seventeen years from the said 14th day of April, 1863, the full and exclusive right, liberty and privilege of making, using, and vending to others to use and to be used, certain alleged improvements therein described; but says that he has no knowledge or information—except from said bill—whether the said patent was duly granted, issued and recorded pursuant to law, and therefore defendant leaves complainant to make such proof thereof as he may be advised; and defendant denies, upon the grounds hereinafter stated, that said letters-patent were regularly and lawfully issued, or secured any rights whatever to said Norton, or any other person; and defendant says that he has no knowledge or information—except from said bill—that on or about the 20th day of April, 1863, said Norton did by an assignment in writing, bearing that date, sell, assign, and transfer in trust to Jacob Shavor and Albert C. Corse of the city of Troy, and State of New York, all his right, title and interest in and to the said letters-patent and invention; or that such alleged assignment was duly recorded in the Patent-Office of the United States; and therefore defendant leaves complainant to make such proof thereof as he may be advised; defendant says that on the contrary, he has been informed and believes, that on or about the 14th of April, 1863, said Norton
88 assigned absolutely, and not in trust, all his right, title, and interest, in and to the said alleged letters patent of 14th of April, 1863, No. 38175, to said Shavor and to said Corse.

Defendant admits that said Shavor and Corse on or about the 23d day of August, 1864, for purposes of reissue, surrendered the said alleged letters-patent to the Commissioner of Patents, but defendant says that he has no knowledge or information—except from said bill—that such surrender was at the request of said Norton, and therefore leaves complainant to make such proof thereof as he may be advised.

Defendant admits that on the 23d day of August, 1864, new letters-patent, purporting to be for the same invention, upon what purported to be reformed and amended specifications and claims, for the residue of the said term of seventeen years then unexpired, and numbered 1748 of reissued letters-patent, were issued and granted to said Shavor and said Corse; and defendant says that he has no knowledge or information—except from said bill—whether said reissued letters-patent were duly granted, issued, and recorded, pursuant to law, and therefore he leaves complainant to make such proof thereof as he may be advised. But defendant denies that the specifications in the patent dated April 14th, 1863, surrendered by said Shavor and Corse, were defective or insufficient through any error arising from inadvertency, accident, or mistake; and defendant says that said letters-patent were not so surrendered for the purpose of correcting any such error, and that the reissue based on such surrender was, in a substantial part thereof, for entirely distinct and different alleged inventions or improvements, and was therefore in every respect invalid, inoperative, and void.

Defendant further says that he has no knowledge whether on or about the 23d day of February, 1864, the said Shavor and the said Corse did, by a deed of assignment bearing that date, sell, assign, and reconvey unto said Norton the said patent, and any and all reissues thereof, and therefore he leaves complainant to make such proof thereof
89 as he may be advised. But defendant says that on the contrary he has been informed and believes that the said Shavor and the said Corse did not sell, reassign, and reconvey the said patent, and any and all reissues thereof, to the said Norton on the 23d day of February, 1864, or at any other time; and defendant on information and belief charges the fact to be that the paper writing—if any such there be—which purports to be such sale, reassignment, and reconveyance, as alleged, was obtained by fraud and misrepresentation; and that any such paper writing that may be produced, and alleged to be executed by said Shavor and Corse, was made by said Shavor and said Corse, or by one of them—if it was made by them at all—through mistake, fraud, misrepresentation by or on behalf of said Norton, accident, and misunderstanding of its purport, terms, and legal effect; and therefore any such paper has and had no validity, and could not and did not operate to pass in whole or in part the title to the said letters-patent, or any of its reissues. And defendant admits that a paper writing purporting to be dated February 23d, 1864, and to be a deed of reassignment and reconveyance of said letters-patent and its reissues, and purporting to be executed by said Shavor and by said Corse, and accompanied by what purported to be a sworn statement purporting to have been made by said Shavor and said Corse, was entered of record in the Patent Office on the 24th of July, 1869, in Liber U 11, page 319, of transfers of patents; but defendant denies that any such paper writing was duly executed, so as to entitle the same to be recorded, or to entitle said paper to any of the advantages whatever of such record; and defendant hereby demands an inspection of said alleged original deed of assignment, reconveyance, and retransfer, alleged in said bill to be in the possession of said complainant.

And further answering, defendant admits that on the 3d of August, 1869, new letters patent upon alleged reformed, corrected, and amended specifications, purporting to be for the same alleged invention and improvement aforesaid, for the residue of the said term of seven-
90 teen years, were issued to said Norton, he, the said Norton, having ostensibly—although not in fact, as defeendant is informed and believes—surrendered to the Commissioner of Patents the reissued letters patent so aforesaid issued to said Shavor and said Corse; and that said reissued letters-patent alleged in said bill of complaint to have been issued to said Norton were dated August 3d, 1869, and were numbered 3586 of reissued patents; and defendant, on information and belief, alleges and charges the fact to be, that the said alleged reissue, dated August 3d, 1869, was not regularly, properly, or lawfully issued, but was issued unlawfully, irregularly, fraudulently, and under a misapprehension of fact, and that said reissue was and is null and void, and of no validity whatever; and defendant denies that the specifications in the letters-patent purported to be surrendered as alleged in said bill were defective or insufficient through any error arising from inadvertency, accident or mistake; and defendant avers that said letters patent purporting to be surrendered were not surrendered for the purpose of correcting any such error, and that said reissue dated August 3d, 1869, was obtained by fraud on the part of him obtaining it, and was in a substantial part for entirely distinct and different alleged in-

ventions or improvements, and was therefore in every respect invalid, inoperative, and void.

And, further answering, defendant says that he is informed and believes that said Norton was not at any time vested with the title, or rights, or interests of any kind, legal and equitable, therein, to the letters patent reissued as aforesaid in 1864 to Shavor and Corse, and therefore said Norton was not capable in law of making a valid surrender of the same, and did not surrender the same to the Commissioner of Patents, and therefore for this, and divers other good and sufficient grounds in law and equity, which defendant reserves to himself the right to establish, the said reissued letters-patent, alleged to have been granted to said Norton on August 3d, 1869, and numbered 3586, had no virtue or efficacy in law to convey to or to vest in, and did not convey
91 to or vest in said Norton any right, title, interest or privilege of any kind, nature or description whatsoever.

And further answering, defendant says that he has no knowledge or information—except from said bill—whether on or about the 20th day of October, 1869, or at any other time, said Norton did by a deed of assignment or transfer in writing, of that date, sell, assign and transfer to Helen M. Ingalls, of the city of Troy and State of New York, the said letters patent and all reissued of the same, together with all his rights, interests and privileges which had theretofore accrued to him, the said Norton, under said letters-patent or its reissues; and therefore defendant leaves complainant to make such proof thereof as he may be advised. And defendant says that he is informed and believes that at or about the time of the alleged assignment last aforesaid said Norton had no right or title in or to the said letters-patent or any of its reissues, and that therefore the alleged assignment to said Ingalls, if such there was, could not have had any virtue or efficacy in law to pass, and did not convey any right, title, or interest of any nature or description whatsoever in or to said letters patent or its reissues to said Ingalls.

And, further answering, defendant admits that on or about October 4th, 1870, letters-patent were issued to said Ingalls purporting to be a reissue of the letters-patent aforesaid and its reissues, in two divisions; division *a* being numbered 4143, and dated October 4th, 1870, and division *b* being dated October 4th, 1870, and numbered 4144, and purporting to be issued to said Ingalls on a surrender by her, said Ingalls, to the Commissioner of Patents of the reissued letters patent of August 3d, 1869. And defendant says that he has no knowledge or information—except from said bill—that said reissued letters patent denominated division *a*, and numbered 4143, were duly and pursuant to law issued and granted to said Ingalls, nor whether said reissued letters patent had virtue and efficacy in law to pass any right, title, or interest of any kind or description what-
92 soever to said Ingalls, and therefore leaves complainant to make such proof of the allegations in that behalf in said bill contained as he may be advised; and defendant reserves to himself the right to establish the contrary thereof. And on information and belief defendant denies that said Ingalls had any power or capacity, legal or equitable, to surrender the said alleged reissue of August 3d, 1869; and that a valid surrender thereof was made, and that the Commissioner of Patents had any power or jurisdiction to reissue as alleged on the 4th day day of October, 1870, the said alleged reissued letters patent of August 3d, 1869, on amended specifications, and that any valid reissues were made on the said 4th day of October, 1870; and defendant on

information and belief charges and alleges the fact to be that the said alleged reissue dated October 4th, 1870, was not regularly, properly or lawfully issued, but was issued irregularly, improperly and unlawfully, and under a misapprehension of fact, and that said reissue was and is null and void, and of no validity whatever; and defendant denies that the specification in the letters patent purported to be surrendered as alleged were defective or insufficient through any error arising from inadvertency, accident or mistake; and defendant avers that said letters-patent purported to be surrendered were not surrendered for the purpose of correcting any such error, and that said reissue dated October 4th, 1870, was obtained by fraud on the part of him or her obtaining it, and was in a substantial part for entirely differerent and distinct alleged inventions and discoveries, and was therefore in every respect invalid, inoperative and void.

And further answering, defendant says that he has no knowledge—except from said bill—whether said Ingalls did on or about the 4th of March, 1871, make a conditional assignment in trust to W. W. Secombe, as alleged in said bill at the 51st and immediately following folios thereof, and therefore defendant leaves complainant to make such proof thereof as he may be advised; but defendant alleges that such assignment,
93 if executed, as alleged by complainant, did convey the legal title to the letters-patent purported to be assigned absolutely and without condition to said W. W. Secombe, individually; and defendant says that he has no knowledge or information—except from said bill—whether at the time of the alleged assignment to Secombe he, the said Secombe, executed to said Ingalls a deed of trust as alleged in said bill at the 51st and 52d folios thereof; and defendant therefore leaves complainant to make such proof thereof as he may be advised; and defendant hereby demands an inspection of said alleged deed of trust. And defendant says that he has no knowledge or information—except from said bill—that said alleged conditional assignment to said Secombe has become void and of no effect in law and in equity; or that said Secombe wholly failed to keep and maintain the conditions and obligations alleged in said bill to have constituted a part of said alleged assignment by said Ingalls to said Secombe, and therefore defendant leaves complainant to make such proof of the allegations in that behalf as he may be advised.

And defendant further says that he has no knowledge—except from said bill—that said Secombe did, by deed of assignment, on or about the 10th day of July, 1873, assign, transfer, and reconvey to said Ingalls all the rights and interests which in said bill are alleged to have been vested in said Secombe by the alleged assignment to said Secombe from said Ingalls; or that on the 10th of July aforesaid said Secombe assigned, transferred, and reconveyed all his right, title, interest, claims or demands to or under said letters-patent of the 14th of April, 1863, and its reissues; or that said Secombe, being joined with the Secombe Manufacturing Company, so as aforesaid transferred, assigned and reconveyed; and therefore defendant leaves complainant to make such proof thereof as he may be advised.

And defendant on information and belief avers, and charges the fact to be, that the alleged assignment by said Secombe, joined with the Secombe Manufacturing Company, set out at the 54th and 55th
94 folios of said bill, was executed by said Secombe, if executed at all by him, as president of the Secombe Manufacturing Company, and not individually, and that it could not and did not operate, and could not have had nor did have virtue and efficacy in law to divest

said Secombe of any right or title whatever which was prior thereto vested in him individually.

And defendant further says that he has no knowledge or information—except from said bill—that said Ingalls on or about the 2d day of January, 1877, by an assignment in writing, sold, assigned and transferred, in trust, unto Christopher C. Campbell, the complainant herein, all her right, title and interest in and to said alleged reissued letters-patent denominated division *a*, numbered 4143, and dated the 4th day of October, 1870; or that the said alleged assignment to said Campbell was in the words and figures or recorded as set forth in said bill; and therefore defendant leaves complainant to make such proof thereof as he may be advised. And defendant expressly alleges, on information and belief, that said Ingalls did not on the 2d day of January, 1877, have any right, title, or interest in or to the alleged letters-patent of April 14th, 1863, or to any valid reissue thereof, and therefore said complainant was not and is not vested with any right, title or interest in or to said alleged letters patent, or to any valid reissue thereof; and therefore complainant is not entitled to maintain this action.

And, further answering, defendant on information and belief avers that by the said alleged assignment by said Ingalls to said Campbell no right or title to the said subject matter of said alleged original letters patent, or reissue thereof, passed to said Campbell; and that the only right or title vested in said Campbell by said alleged assignment—if any right or title did vest in said Campbell by any such instrument, which defendant on information and belief denies—was a right or title to a chose in action or claim against the United States for past alleged infringements of said alleged letters patent and its reissues, or for the use of the alleged
95 patented invention, and a right to make an arrangement or agreement with the United States, binding upon said Ingalls, with reference to a future use by said United States of the alleged patented invention; wherefore again defendant alleges that complainant has no right or title to maintain his bill of complaint against this defendant.

And said defendant says that he is informed and believes, and therefore charges the fact to be, that on the same day, to wit, on or about the 23d day of October, 1869, on or about which day it is alleged that said Norton assigned and conveyed to said Ingalls the said reissue of August 3d, 1869, said Norton executed an assignment and conveyance of a third interest in and to the alleged reissue of August 3d, 1869, and of his alleged claims based on the alleged patent of April 14th, 1863, and reissues to one Charles Eddy, as trustee for said Eddy, Albert C. Corse, and Jacob Shavor, and that the above said Ingalls could not and did not make a valid surrender of said alleged reissued letters patent of August 3d, 1869, and that the said alleged reissue of October 4th, 1870, is invalid and inoperative; and that by said alleged assignment to said Eddy, as trustee as aforesaid, the said Eddy became a co-tenant in law in and to whatever rights or interest created by or arising under said patent of April 14th, 1863—if any rights or interests were so created, or so arose, which on information and belief defendant denies—were vested in said Norton at the time of the alleged assignment by said Norton to said Ingalls; and said Eddy should consequently be made a party to this controversy, and defendant prays that he, said Eddy, as trustee aforesaid, may be made a party herein prior to the final hearing and determination of this cause.

And further answering with reference to the case of Shavor and Corse vs. Hoole, in which it is alleged at the 21st, 22d and 23d folios of said bill that the validity of the patent of April 14th, 1863, was established,

defendant on information and belief says that the defendant in
96 said case made default, and no evidence on his behalf was presented to the judge and jury; that the decision in said case was obtained by fraud and collusion, and that therefore the proceedings in said action are of no value, relevancy, materiality or validity whatever concerning any matter in this cause.

And as to the allegations in said bill of complaint contained at or about the 24th, 25th and 26th folios thereof, defendant on information and belief denies that the Court of Claims, in the claim made by Shavor and Corse against the United States, decided that the said alleged patent of April 14th, 1863, was valid; but defendant alleges that said court dismissed the petition of said Shavor and Corse upon its merits; and that it was not necessary for said court to pass upon nor did said court pass judicially upon the validity, novelty and utility of said patent; and defendant avers further that the novelty, validity and utility, and alleged infringement of said or any patent was not fully or fairly litigated in said cause.

And defendant further says that he is informed and believes that if said complainant has any interest or right or title in or to the alleged reissued letters patent No. 4143, and dated October 4th, 1870, and denominated division *a*—which defendant on information and belief denies—such right, title or interest is not a sole and exclusive right, title or interest; and that there are other parties—whom defendant is not within the limited time allowed for this answer able to designate with greater particularity, but defendant prays that he be permitted so to do at some future time during the progress of this cause, and by amended answer and other appropriate proceeding—who have an equally good title, right or interest with said complainant in or to said reissued letters patent No. 4143, and who in equity and good conscience should be parties to this controversy; and defendant prays that they may be made parties before a final hearing and determination upon the question of the right of complainant to maintain this cause against defendant.

97 And, further answering, defendant alleges on information and belief that each and all of the said alleged reissues of the said alleged letters patent of April 14th, 1863, so as alleged to have been granted to said Norton, is and are, even if the said letters patent No. 38175, of April 14th, 1863, are valid—which on information and belief defendant denies—defective, insufficient, null and void, because, among other reasons, they contain claims for material new matter, and upon the several other grounds hereinbefore set forth, and for divers other reasons which defendant proposes to establish in this cause.

And, further answering, defendant on information and belief alleges that said Norton is not and was not the original and first inventor and discoverer of the alleged discovery, contrivance and combination described in said letters patent No. 38175, of April 14th, 1863, or of any material and substantial portion thereof; but on the contrary thereof defendant says that the alleged contrivance and device set forth in the letters patent of April 14th, 1863, was not novel or patentable, and is substantially described and anticipated in the following letters patent, dated and numbered respectively as indicated:

1. Patent to T. J. W. Robertson, dated September 22d, 1857, No. 18249.
2. Patent issued in England to Pearson Hall, September 15th, 1857, and dated March 25th, 1857, and No. 832.
3. Patent to M. P. Norton, December 16th, 1862, No. 37175.

4. Patent to F. G. Ransford and Peter Low, August 9th, 1859, No. 25036.

5. Patent to M. P. Norton and Charles Eddy & Co., January 14, 1862, No. 34184; and that the said alleged contrivance and device was known to and used by or with the knowledge of the persons following, at the places indicated, prior to the alleged invention and discovery thereof by said Norton:

John A. Dix, of New York City, at New York City.
98 C. C. Wheeler (of place unknown), at Cleveland, Ohio.
James M. Burgess, of Janesville, Wis., at Janesville, Wis.
Isaac V. Fowler, at New York City.
Ezra Miller, of New York City, at Janesville, Wis.
William B. Taylor, at New York City.
James Harper, of New York City, at New York City.
Abram Wakeman, at New York City.
John R. Hoole, of New York City, at New York City.
Henry McCollon (of place unknown), at Owego, Tioga Co., N. Y.
James Kelly, at New York City.
Isaac McGay, of New York City, at New York City.
Robert Rogers, of New York City, at New York City.
Thomas H. Corbett, of New York City, at New York City.
Abraham C. Beardsley, of New York City, at New York City.
William A. Clement, of New York City, at New York City.
Charles Smith, of New York City, at New York City.
Munson Clarke, of New York City, at New York City.
John A. A. Post, of New York City, at New York City.
James Gaylor, of New York City, at New York City.
James Riley, of New York City, at New York City.
Eugene G. Doane, of New York City, at New York City.
Alfred Ryer, of New York City, at New York City.
John Gallagher, of New York City, at New York City.
Charles Forrester, of New York City, at New York City.
Frank Evans, of New York City, at New York City.
Joseph Dunton, of New York City, at New York City.
John W. Brady, of New York City, at New York City.
Thomas Theban, of New York City, at New York City.
Michael Carberry, of New York City, at New York City.
99 Joseph J. Button, of New York City, at New York City.
Anthony Yeomans, of New York City, at New York City.
Charles Forrester, jr., of New York City, at New York City.
Andrew K. Hyde, of New York City, at New York City.
Orin Collin, of New York City, at New York City.
John Powers, of Buffalo, at Buffalo, N. Y.
Israel T. Hatch, of Buffalo, at Buffalo, N. Y.
Henry Smith, of Buffalo, at Buffalo, N. Y.

And defendant further says that he believes that there are other persons who were acquainted with and used, or have knowledge of the use, of said device and contrivance prior to the alleged discovery thereof by said Norton, and more than two years before said Norton's application for the letters patent of April 14th, 1863; and with reference to these persons defendant begs leave to make such further proof to this court as he may be able to make before the final determination of this cause, without prejudice because of his present inability to denominate and describe said persons.

And defendant alleges that he has hitherto been unable, within the limited time allowed for the preparation of this answer, to indicate the

proofs with greater particularity; and, therefore, defendant prays leave of the court to amend and to supplement this his answer in respect to the want of novelty of the contrivances alleged in the bill of complaint to have been patented or infringed, when the investigations now being made in defendant's behalf shall have been concluded.

And further answering, with reference to the caveat referred to in the said bill at the 6th folio thereof, as duly filed in the Patent Office in 1853. and 1854, defendant alleges, on information and belief, that the alleged caveat of 1853 is that on which the patent of August 9th, 1859, to F. G. Ransford and P. Low is based, and that no caveat was written or filed by said Norton in 1854.

100 And defendant, further answering, says that he is informed and believes that the subject-matters of the said alleged patent of April 14th, 1863, were publicly known and publicly used in this country more than two years before said Norton made an application for the patent of April 14th, 1863; and said Norton, if in truth he was the original and first inventor of said contrivance and device, had abandoned the same to the public prior to his application for a patent therefor, and the same was publicly manufactured, used, and sold prior thereto, with said Norton's consent and allowance; and that the said contrivance and device was so publicly used more than two years before said Norton's application, by or with the knowledge of the persons hereinbefore indicated as having known and used said contrivance or device before the alleged invention thereof by said Norton, and at the places severally indicated.

And, further answering, defendant says that he is informed and believes that said Norton surreptitiously and unjustly obtained the letters patent of April 14th, 1863, for that which was in fact contrived and devised by divers other persons, and amongst them said John A. Dix, or by some one in his employ, by said John A. A. Post and said John Powers, who were using reasonable diligence in adapting and perfecting the same.

And defendant further alleges on information and belief that if there be any part of the subject-matter of the alleged invention which purports to be described in the specification and drawing of the said letters patent of April 14th, 1863, of which said Norton was in fact the first inventor and discoverer, which, on information and belief, defendant denies, then such part was not of any utility or value and defendant has not infringed the same; and defendant denies that he is now using or has ever used any machine or device for the postmarking of letters and the cancellation of the postage-stamps thereon which is an infringement upon or violation of any right secured, if any there be, to the said Norton by the said letters patent of April 14th, 1863, or to
101 him or his assignees, by any of the reissues of said letters patent.

And defendant respectfully insists that in and by said bill he is charged and made a defendant solely as United States postmaster in and for the city of New York, and in his official capacity, and not otherwise or individually, and that by the law of the land said officer is not answerable in his said official capacity to a suit in this court.

And defendant respectfully shows to the court that the several acts set forth in said bill and therein alleged to constitute an infringement of said plaintiff's alleged patented rights appear on the face of said bill to have been performed by said defendant in the regular course of his duty as an executive officer of the Government of the United States and that he is not liable to suit for actions done in that capacity.

And, further answering, defendant says that he has never used any instrument or device for the postmarking of letters and the cancellation

of the stamps thereon, either directly or by subordinates, for his own private advantage or purposes, and that any and all postmarking and cancelling devices which have ever been used by him were so used as an officer and agent of the United States in his office of postmaster at the city of New York; and defendant alleges that all such use by him was with the consent, approbation, and approval and under the direction of the Postmaster-General of the United States; and that therefore he, defendant, is not liable to suit for such use or to any judgment, order or decree of this court for his action in the premises.

And defendant further says, on information and belief, that the devices and contrivances which have been used at the post-offices in the city of New York for the postmarking of letters and the cancellation of the postage-stamps thereon since about the year 1860 were so used with the knowledge, consent, license, approbation, and allowance of said Norton, and of his alleged assignees, and that from the time that
102 defendant became postmaster of the city of New York down to the time when this suit was brought no objection to the continuance of such use in the post-office at the city of New York was ever brought to the knowledge or notice of defendant, and that therefore there has never been as to defendant a revocation of the license aforesaid, and defendant alleges that until this suit was brought he has never received any notification from or on behalf of complainant or any of his alleged assignors, or on the part of Norton, or of any one claiming by, through, or under him in respect to the use by defendant of such contrivances as have been used by the clerks in the New York post-office for the postmarking and cancelling of stamps.

And defendant avers that the allegations from folio 27 to folio 39 inclusive are irrelevant and immaterial to said bill of complaint, and defendant prays that the same may be stricken out of said bill; and as to all the allegations in the said bill of complaint contained not hereinbefore mentioned, defendant leaves the complainant to make such proof thereof as he may be advised.

And defendant says that he is advised that by reason of his defences, and particularly by reason of the defence that complainant has no title whereon to base his said bill of complaint, he is not bound to make other or further answer to said bill of complaint; and that as to all the matters and things by him alleged, he is ready and willing to maintain and prove the same as this honorable court shall direct, and humbly prays to be hence dismissed, with his reasonable costs and charges in this behalf most wrongfully sustained.

STEWART L. WOODFORD,
United States Attorney, Solicitor for Defendant.

H. E. TREMAIN,
Of Counsel.

103 SOUTHERN DISTRICT OF NEW YORK, *ss:*

On this third day of December, 1877, personally appeared before me, a United States commissioner, Thomas L. James, who, being by me duly sworn, says that he has read the foregoing answer, and that the allegations therein contained are true of his own knowledge, except the allegations therein stated on information and belief, and that as to those he believes them to be true.

THOMAS L. JAMES.

Subscribed and sworn to before me this 3d day of December, 1877.

JOHN A. SHIELDS,
U. S. Commissioner S. D. of N. Y.

104 *Replication.*

In the circuit court of the United States, southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT AND assignee in trust,
versus
THOMAS L. JAMES, DEFENDANT, AND UNITED States postmaster at the city of New York.

The replication of Christopher C. Campbell, complainant and assignee in trust, as stated in the title of this cause, to the answer of Thomas L. James, United States postmaster of the city of New York, and defendant, as stated in the title of this cause.

This repliant, saving and reserving to himself now and at all times hereafter all manner of benefit and advantage of exception which may be had or taken to the manifold insufficiencies of the said answer, for replication thereunto says that he will aver, maintain and prove his bill of complaint, and the several matters, and each and every thereof therein contained to be true, certain and sufficient in the law; and that the said answer of the said defendant Thomas L. James, United States postmaster at the city of New York, in the district aforesaid, is uncertain, untrue and insufficient to be replied unto by this repliant; that any other
105 matter or thing whatsoever in the said answer contained material or effectual in the law to be replied unto and not herein and hereby well and sufficiently replied unto, confessed and avoided, traversed or denied, is true; all of which matters and things this repliant is and will be ready to aver, to maintain, and to prove as this honorable court shall direct, and humbly prays, as in and by his said bill of complaint he has already prayed.

Dated this 4th day of December, A. D. 1877.

CHRISTOPHER C. CAMPBELL,
Complainant and Assignee in Trust.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.
GEORGE N. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

106 Circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN TRUST,
vs.
THOMAS L. JAMES, UNITED STATES POSTMASTER at New York.

The amended answer of Thomas L. James, defendant, to the bill of complaint of Christopher C. Campbell, assignee in trust, complainant.

This defendant, now and at all times hereafter saving and reserving unto himself all benefit and advantage of exception which can or may be had to the many errors, uncertainties, and other imperfections in the said complainant's said bill of complaint contained, for answer thereto, or to so much and such parts thereof as this defendant is advised is or are material or necessary for him to make answer thereto, respectfully says:

That defendant admits that he is a citizen of the State of New York, and of the United States; that on April 1st, 1873, he was appointed postmaster of the city of New York: that he was confirmed by the Senate and duly commissioned by the President of the United States; that on the day aforesaid he entered upon the performance of the duties of said office, and since said day has, under the direction of the Post-Office Department of the United States, managed and controlled the business and affairs of the same.

107 That he has no knowledge or information, except from said bill, that the complainant herein is a citizen of the United States, and of the State of New York, and therefore he leaves complainant to make such proof thereof as he may be advised.

And, further answering, defendant admits that on the 14th day of April, 1863, letters patent of the United States, bearing date on that day, and numbered 38175, were issued to one Marcus P. Norton; and that said letters patent purported to secure to said Norton, his heirs, executors, administrators and assigns, for the full term of seventeen years from the said 14th day of April, 1863, the full and exclusive right, liberty and privilege of making, using, and vending to others to use and to be used, certain alleged improvements therein described; but says that he has no knowledge or information, except from said bill, whether the said patent was duly granted, issued and recorded pursuant to law, and therefore defendant leaves complainant to make such proof thereof as he may be advised; and defendant denies, upon the grounds hereinafter stated, that said letters patent were regularly and lawfully issued, or secured any rights whatever to said Norton or any other person; and defendant says that he has no knowledge or information, except from said bill, that on or about the 20th day of April, 1863, said Norton did by an assignment in writing, bearing that date, sell, assign and transfer in trust to Jacob Shavor and Albert C. Corse, of the city of Troy, and State of New York, all his right, title and interest in and to the said letters patent and invention; or that such alleged assignment was duly recorded in the Patent Office of the United States, and therefore defendant leaves complainant to make such proof thereof as he may be advised; defendant says that on the contrary he has been informed and believes that on or about the 14th of April, 1863, said Norton assigned absolutely, and not in trust, all his right, title and interest in and to the said alleged letters patent of 14th April, 1863, No. 38175 to said Shavor and said Corse.

108 Defendant admits that said Shavor and Corse, on or about the 23d day of August, 1864, for purposes of reissue, surrendered the said alleged letters patent to the Commissioner of Patents, but defendant says that he has no knowledge or information, except from said bill, that such surrender was at the request of said Norton, and therefore leaves complainant to make such proof thereof as he may be advised.

Defendant admits that on the 23d day of August, 1864, new letters patent purporting to be for the same invention, upon what purported to be reformed and amended specifications and claims, for the residue of the said term of seventeen years then unexpired, and numbered 1748 of reissued letters patent, were issued and granted to said Shavor and said Corse; and defendant says that he has no knowledge or information, except from said bill, whether said reissued letters patent were duly granted, issued, and recorded pursuant to law, and therefore he leaves complainant to make such proof thereof as he may be advised.

But defendant denies that the specifications in the patent dated April

14th, 1863, surrendered by said Shavor and Corse, were defective or insufficient through any error arising from inadvertency, accident, or mistake; and defendant says that said letters patent were not so surrendered for the purpose of correcting any such error, and that the reissue based on such surrender was in a substantial part thereof for entirely distinct and different alleged inventions or improvements, and was, therefore, in every respect invalid, inoperative, and void.

Defendant further says that he had no knowledge whether on or about the 23d day of February, 1864, the said Shavor and the said Corse did, by a deed of assignment bearing that date, sell, assign, and reconvey unto said Norton the said patent, and any and all reissues thereof, and therefore he leaves complainant to make such proof thereof as he may be advised; but defendant says that, on the contrary, he
109 has been informed and believes that the said Shavor and the said Corse did not sell, reassign, and reconvey the said patent and any and all reissues thereof to the said Norton on the 23d day of February, 1864, or at any other time; and defendant, on information and belief, charges the fact to be that the paper writing—if any such there be—which purports to be such sale, reassignment, and reconveyance, as alleged, was obtained by fraud and misrepresentation, and that any such paper writing that may be produced, and alleged to be executed by said Shavor and Corse, was made by said Shavor and said Corse, or by one of them—if it was made by them at all—through mistake, fraud, misrepresentation by or on behalf of said Norton, accident, and misunderstanding of its purport, terms, nd legal effect, and therefore any such paper has and had no validity, and could not and did not operate to pass in whole or in part the title to the said letters patent or any of its reissues. And defendant admits that a paper writing, purporting to be dated February 23d, 1864, and to be a deed of reassignment and reconveyance of said letters patent and its reissues, and purporting to be executed by said Shavor and by said Corse, and accompanied by what purported to be a sworn statement, purporting to have been made by said Shavor and said Corse, was entered of record in the Patent Office on the 24th of July, 1869, in Liber U 11, page 319, of transfers of patents; but defendant denies that any such paper writing was duly executed, so as to entitle the same to be recorded, or to entitle said paper to any of the advantages whatever of such record; and defendant hereby demands an inspection of said alleged original deed of assignment, reconveyance, and retransfer, alleged in said bill to be in the possession of said complainant.

And, further answering, defendant admits that on the third of August, 1869, new letters patent upon alleged reformed, corrected, and amended specifications, purported to be for the same alleged invention
110 and improvement aforesaid, for the residue of the said term of seventeen years, were issued to said Norton, he, the said Norton, having ostensibly, although not in fact, as defendant is informed and believes, surrendered to the Commissioner of Patents the reissued letters patent so aforesaid issued to said Shavor and said Corse, and that said reissued letters patent alleged in said bill of complaint to have been issued to said Norton were dated August 3d, 1869, and were numbered 3586 of reissued patents. And defendant, on information and belief, alleges and charges the fact to be that the said alleged reissue, dated August 3d, 1869, was not regularly, properly, or lawfully issued, but was issued unlawfully, irregularly, fraudulently, and under a misapprehension of fact, and that said reissue was and is null and void, and of no validity whatever; and defendant denies that the specifications in

the letters patent purported to be surrendered, as alleged in said bill, were defective or insufficient through any error arising from inadvertency, accident, or mistake; and defendant avers that said letters patent purporting to be surrendered were not surrendered for the purpose of correcting any such error, and that said reissue, dated August 3d, 1869, was obtained by fraud on the part of him obtaining it, and was, in a substantial part, for entirely distinct and different alleged inventions or improvements, and was therefore, in every respect, invalid, inoperative and void.

And, further answering, defendant says that he is informed and believes that said Norton was not at any time vested with the title or rights or interests of any kind, legal or equitable, therein, to the letters patent reissued as aforesaid, in 1864, to Shavor and Corse, and therefore said Norton was not capable in law of making a valid surrender of the same, and did not surrender the same to the Commissioner of Patents; and therefore for this and divers other good and sufficient grounds in law and equity, which defendant reserves to himself the right
111 to establish, the said reissued letters patent, alleged to have been granted to said Norton on August 3d, 1869, and numbered 3586, had no virtue or efficacy in law to convey to or vest in and did not convey to or vest in said Norton any right, title, interest, or privilege of any kind, nature or description whatsoever.

And, further answering, defendant says that he has no knowledge or information, except from said bill, whether on or about the 20th day of October, 1869, or at any other time, said Norton did, by deed of assignment or transfer in writing, of that date, sell, assign, and transfer to Helen M. Ingalls, of the city of Troy, and State of New York, the said letters patent and all reissues of the same, together with all his rights, interests, and privileges which had heretofore accrued to him, the said Norton, under said letters patent or its reissues; and therefore defendant leaves complainant to make such proof thereof as he may be advised; and defendant says that he is informed and believes that, at or about the time of the alleged assignment last aforesaid, said Norton had no right or title in or to the said letters patent or any of its reissues, and that therefore the alleged assignment to said Ingalls, if such there was, could not have had any virtue or efficacy in law to pass and did not convey any right, title, or interest, of any nature or description whatever, in or to said letters patent or its reissues to said Ingalls.

And, further answering, defendant admits that on or about October 4th, 1870, letters patent were issued to said Ingalls, purporting to be a reissue of the letters patent aforesaid and its reissues, in two divisions; division A being numbered 4143, and dated October 4th, 1870; and division B being dated October 4th, 1870, and numbered 4144, and purporting to be issued to said Ingalls on a surrender by her, said Ingalls, to the Commissioner of Patents, of the reissued letters patent of August 3d, 1869; and defendant says that he has no knowledge or
112 information, except from said bill, that said reissued letters patent denominated division A, and numbered 4143, were duly and pur- to law issued and granted to said Ingalls, nor whether said reissued letters patent had virtue and efficacy in law to pass any right, title, or interest of any kind or description whatsoever to said Ingalls, and, therefore, leaves complainant to make such proof or allegations in that behalf in said bill contained as he may be advised, and defendant reserves to himself the right to establish the contrary thereof; and on information and belief defendant denies that said Ingalls had any power or capacity, legal or equitable, to surrender the said alleged reissue of August 3d, 1869, and

that a valid surrender thereof was made, and that the Commissioner of Patents had any power or jurisdiction to reissue, as alleged, on the 4th day of October, 1870, the said alleged reissued letters patent of August 3d, 1869, on amended specifications, and that any valid reissue was made on the said 4th day of October, 1870; and defendant on information and belief charges and alleges the fact to be that the said alleged reissue, dated October 4th, 1870, was not regularly, properly, or lawfully issued, but was issued irregularly, improperly, and unlawfully, and under a misapprehension of fact, and that said reissue was and is null and void, and of no validity whatever; and defendant denies that the specification in the letters patent purported to be surrendered, as alleged, were defective or insufficient through any error arising from inadvertency, accident, or mistake; and defendant avers that said letters patent purported to be surrendered were not surrendered for the purpose of correcting any such error, and that said reissue, dated October 4th, 1870, was obtained by fraud on the part of him or her obtaining it, and was in a substantial part for entirely different and distinct alleged inventions and discoveries, and was therefore in every respect invalid, inoperative, and void.

113 And, further answering, defendant says that he has no knowledge, except from said bill, whether said Ingalls did, on or about the 4th of March, 1871, make a conditional assignment in trust to W. W. Secombe, as alleged in said bill at the 51st and immediately following folios thereof; and, therefore, defendant leaves complainant to make such proof thereof as he may be advised; but defendant alleges that such assignment, if executed, as alleged by complainant, did convey the legal title to the letters patent purported to be assigned absolutely and without condition to said W. W. Secombe individually; and defendant says that he has no knowledge or information, except from said bill, whether at the time of the alleged assignment to Secombe, he, the said Secombe, executed to said Ingalls a deed of trust, as alleged in said bill, at the 51st and 52d folios thereof; and defendant therefore leaves complainant to make such proof thereof as he may be advised; and defendant hereby demands an inspection of said alleged deed of trust, and defendant says that he has no knowledge or information, except from said bill, that said alleged conditional assignment to said Secombe has become void and of no effect in law and in equity; or that said Secombe wholly failed to keep and maintain the conditions and obligations alleged in said bill to have constituted a part of said alleged assignment by said Ingalls to said Secombe; and therefore defendant leaves complianant to make such proof of the allegations in that behalf as he may be advised.

And defendant further says, that he has no knowledge, except from said bill, that said Secombe did by deed of assignment, on or about the 10th day of July, 1873, assign, transfer, and reconvey to said Ingalls all the rights and interests which in said bill are alleged to have been vested in said Secombe by the alleged assignment to said Secombe from said Ingalls; or that, on the 10th of July aforesaid, said Secombe assigned, transferred, and reconveyed all his right, title, interest, claims, or demands to or under said letters patent of the 14th of April,

114 1863, and its reissues; or that said Secombe, being joined with the Secombe Manufacturing Company, so, as aforesaid, transferred, assigned, and reconveyed; and therefore defendant leaves complainant to make such proof thereof as he may be advised.

And defendant on information and belief avers, and charges the fact to be, that the alleged assignment by said Secombe, joined with the Se-

combe Manufacturing Company, set out at the 54th and 55th folios of said bill, was executed by said Secombe, if executed at all by him, as president of the Secombe Manufacturing Company, and not individually, and that it could not and did not operate, and could not have had, nor did have virtue and efficacy in law to divest said Secombe of any right or title whatever which was prior thereto vested in him individually.

And defendant further says, that he has no knowledge or information, except from said bill, that said Ingalls, on or about the 2d day of January, 1877, by assignment in writing, sold, assigned, and transferred, in trust, unto Christopher C. Campbell, the complainant herein, all her right, title, and interest in and to said alleged reissued letters patent, denominated division A, numbered 4143, and dated the 4th day of October, 1870; or that the said alleged assignment to said Campbell was in the words and figures, or recorded, as set forth in said bill; and therefore defendant leaves complainant to make such proof thereof as he may be advised, and defendant expressly alleges, on information and belief, that said Ingalls did not, on the 2d day of January, 1877, have any right, title, or interest in or to the alleged letters patent of April 14th, 1863, or to any valid issue thereof, and therefore said complainant was not, and is not, vested with any right, title, or interest in or to said alleged letters patent, or to any valid issue thereof; and therefore complainant is not entitled to maintain this action.

And further answering, defendant, on information and belief,
115 avers that by the said alleged assignment by said Ingalls to said Campbell no right or title to the said subject matter of said alleged original letters patent, or any reissue thereof, passed to said Campbell; and that the only right or title vested in said Campbell, by said alleged assignment—if any right or title did vest in said Campbell by any such instrument, which defendant, on information and belief, denies—was a right or title to choses in action, or claim against the United States, for past alleged infringments of said alleged letters patent and its reissues, or for the use of the alleged patented invention, and a right to make an arrangement or agreement with the United States, binding upon said Ingalls, with reference to a future use by said United States of alleged patented invention; wherefore, again defendant alleges that complainant has no right or title to maintain his bill of complaint against this defendant.

And said defendant says that he is informed and believes, and therefore charges the fact to be, that on the same day, to wit: on or about the 23d day of October, 1869, on or about which day it is alleged that said Norton assigned and conveyed to said Ingalls the said reissue of August 3d, 1869, said Norton executed an assignment and conveyance of a third interest in and to the alleged reissue of August 3d, 1869, and of his alleged claims based on the alleged patent of April 14th, 1863, and reissues, to one Charles Eddy, as trustee for said Eddy, Albert C. Corse, and Jacob Shavor, and that therefore said Ingalls could not and did not make a valid surrender of said alleged reissued letters patent of August 3d, 1869, and that the said alleged reissue of October 4th, 1870, is invalid and inoperative; and that by said alleged assignment to said Eddy, as trustee as aforesaid, the said Eddy became a co-tenant in law in and to whatever rights or interests, created by or arising under said patent of April 14th, 1863—if any rights or interests were so created, or so
arose, which, on information and belief, defendant denies—were
116 vested in the said Norton at the time of the alleged assignment by said Norton to said Ingalls; and said Eddy should consequently be made a party to this controversy, and defendant prays that he, said

Eddy, as trustee afore said, may be made a party herein prior to the final hearing and determination of this cause.

And further answering, with reference to the case of Shavor and Corse v. Hoole, in which it is alleged at the 21st, 22d, and 23d folios of said bill that the validity of the patent of April 14th, 1863, was established, defendant, on information and belief, says that the defendant in said case made default, and no evidence on his behalf was presented to the judge and jury; that the decision in said case was obtained by fraud and collusion, and that therefore the proceedings in said action are of no value, relevance, materiality, or validity whatever concerning any matter in this case.

And as to the allegations in said bill of complaint contained at or about the 24th, 25th, and 26th folios thereof, defendant, on information and belief, denies that the court of claims in the claim made by Shavor & Corse against the United States, decided that the said alledged patent of April 14th, 1863, was valid; but defendant alleges that said court dismissed the petition of said Shavor & Corse upon its merits; and that it was not necessary for said court to pass upon, nor did said court pass judicially upon the validity, novelty, and utility of said patent; and defendant avers further that the novelty, validity, and utility, and alleged infringement of said or any patent was not fully or fairly litigated in said cause.

And defendant further says, that he is informed and believes that if said complainant has any interest or right or title in or to the alleged reissued letters patent, No. 4143, and dated October 4th, 1870, and denominated division A—which defendant, on information and belief, denies—such right, title, or interest is not a sole and exclusive right,
117 title, or interest, and that there are other parties whom dedefendant is not, within the limited time allowed for this answer, able to designate with greater particularity; but defendant prays that he be permitted so to do at some future time during the progress of this cause, and by amended answer or other appropriate proceeding, who have an equally good title, right, or interest with said complainant, in or to said reissued letters patent, No. 4143, and who, in equity and good conscience, should be parties to this controversy; and defendant prays that they may be made parties before a final hearing and determination upon the question of the right of complainant to maintain this cause against defendant.

And further answering, defendant alleges, on information and belief, that each and all of the said alleged reissues of the said alleged letters patent of April 14th, 1863, so as alleged to have been granted to said Norton, is and are, even if the said letters patent, No. 38175, of April 14th, 1863, are valid—which on information and belief defendant denies—defective, insufficient, null and void, because among other reasons, they contain claims for material, new matter, and upon the several other grounds hereinbefore set forth, and for divers other reasons, which defendant proposes to establish in this cause.

And further answering, defendant, on information and belief, alleges that said Norton is not, and was not, the original and first inventer and discoverer of the alleged discovery, contrivance, and combination described in said letters patent, No. 38175, of April 14th, 1863, or of any material and substantial portion thereof; but on the contrary thereof defendant says that the alleged contrivance and device set forth in the letters patent of April 14th, 1863, was not novel or patentable, and is substantially described and anticipated in the following letters patent, dated and numbered respectively as indicated:

1. Patent to T. J. W. Robertson, dated September 22d, 1857, No. 18249.

118 2. Patent issued in England to Pearson Hall, September 15th, 1857, and dated March 25th, 1857, and No. 832.

3. Patent to M. P. Norton, December 16th, 1862, No. 37175.

4. Patent to F. G. Ransford and Peter Low, August 9th, 1859, No. 25036.

5. Patent to M. P. Norton and Charles Eddy & Co., January 14th, 1862, No. 34184.

6. Patent to B. Chambers, September 23d, 1851, and numbered 8384.

7. Patent to S. P. Ruggles, August 21st, 1855, and numbered 13470.

8. Patent to Emery N. Moore, January 16th, 1849, and numbered 6036.

9. Patent to Ezra Miller, March 22d, 1859, and numbered 23307.

10. English patent, issued in 1839, and numbered 8316, to David Morrison, of Finsbury, Middlesex County.

11. English patent, issued in 1857, and numbered 2563, to George Thomas Robinson, of Leamington Priors, Warwick County.

And that the said alleged contrivance and device was known to and used by or with the knowledge of the persons following, at the places indicated, prior to the alleged invention and discovery thereof by said Norton:

John A. Dix, of New York City, at New York City; C. C. Wheeler, of Cleveland, Ohio, at Cleveland, Ohio; James M. Burgess, of Janesville, Wis., at Janesville, Wis.; Isaac V. Fowler, at New York City; Ezra Miller, of New York City, at Janesville, Wis.; William
119 Taylor, at New York City; James Harper, of New York City, at New York City; Abram Wakeman, at New York City; John R. Hoole, of New York City, at New York City; Henry McCollon, of , at Oswego, Tioga Co., N. Y.; James Kelley, at New York City; Isaac McGay, of New York City, at New York City; Robert Rogers, of New York City, at New York City; Thomas H. Corbett, of New York City, at New York; Abraham C. Beardsley, of New York City, at New York City; William A. Clement, of New York City, at New York City; Charles Smith, of New York City, at New York City; Munson Clarke, of New York City, at New York City; John A. A. Post, of New York City, at New York City; James Gaylor, of New York City, at New York City; James Riley, of New York City, at New York City; Eugene G. Duane, of New York City, at New York City; Alfred Ryer, of New York City, at New York City; John Gallagher, of New York City, at New York City; Charles Forrester, of New York City, at New York City; Frank Evans, of New York City, at New York City; Joseph Dunton, of New York City, at New York City; John W. Brady, of New York City, at New York City; Thomas Theban, of New York City, at New York City; Michael Carberry, of New York City, at New York City; Joseph J. Button, of New York City, at New York City; Anthony Yeomans, of New York City, at New York City; Charles Forrester, jr., of New York City, at New York City; Amasa K. Hide, of New York City, at New York City; Orin Collin, of New York City, at New York City; John Powers, of Buffalo, at Buffalo, N. Y.; Israel T. Hatch, of Buffalo, at Buffalo, N. Y.; Henry Smith, of Buffalo, at Buffalo, N. Y.; E. Rogers, of North Adams, Mass., at the post-office in North Adams, Mass.; S. N. Anthony, of Geneva, New York, at the post-office in Geneva, N. Y.; Rebecca Wetherbee, of North Adams, Mass., at North Adams, Mass.

And defendant further says that he believes that there are other

120 persons who were acquainted with and used, or have knowledge of the use of said device and contrivance prior to the alleged discovery thereof by said Norton, and more than two years before said Norton's application for the letters patent of April 14th, 1863; and with reference to these persons, defendant begs leave to make such further proof to this court as he may be able to make before the final determination of this cause without prejudice, because of his present inability to denominate and describe said persons.

And defendant alleges that he has hitherto been unable within the limited time allowed for the preparation of this answer, to indicate the proofs with greater particularity; and therefore defendant prays leave of the court to amend and to supplement this his answer, in respect to the want of novelty of the contrivances alleged in the bill of complaint to have been patented or infringed, when the investigations now being made in defendant's behalf shall have been concluded.

And further answering, with reference to the caveat referred to in said bill at the 6th folio thereof, as duly filed in the Patent Office in 1853 and 1854, defendant alleges on information and belief, that the alleged caveat of 1853 is that on which the patent of August 9th, 1859, to F. G. Ransford and P. Leow is based, and that no caveat was written or filed by said Norton in 1854.

And defendant, further answering, says that he is informed and believes that the subject matters of the said alleged patent of April 14th, 1863, were publicly known and publicly used in this country more than two years before said Norton made an application for the patent of April 14th, 1863; and said Norton, if in truth he was the original and first inventor of said contrivance and device, had abandoned the same to the public prior to his application for a patent therefor, and the same was publicly manufactured, used, and sold prior thereto, with said Norton's consent and allowance; and that the said contrivance
121 and device was so publicly used more than two years before said Norton's application, by or with the knowledge of the persons hereinbefore indicated as having known and used said contrivance or device before the alleged invention thereof by said Norton and at the places severally indicated.

And further answering defendant says, that he is informed and believes that said Norton surreptitiously and unjustly obtained the letters patent of April 14th, 1863, for that which was in fact contrived and devised by divers other persons, and amongst them said John A. Dix, or by some one in his employ; by said John A. A. Post, and said John Powers, who were using reasonable diligence in adapting and perfecting the same.

And defendant further alleges on information and belief, that if there be any part of the subject matter of the alleged invention which purports to be described in the specification and drawings of the said letters patent of April 14th, 1863, of which said Norton was in fact the first inventor and discoverer—which on information and belief defendant denies—then such part was not of any utility or value, and defendant has not infringed the same; and defendant denies that he is now using, or has ever used any machine or device for the post marking of letters, and the cancellation of the postage stamps thereon, which is an infringement upon, or violation of any right secured, if any there be, to the said Norton by the said letters patent of April 14th, 1863, or to him or to his assignees by any of the reissues of said letters patent.

And defendant respectfully insists that in and by said bill he is charged and made a defendant solely as United States postmaster in

and for the city of New York, and in his official capacity, and not otherwise or individually, and that by the law of the land said officer is not answerable in his said official capacity to a suit in this court.

And defendant respectfully shows to the court that the several
122 acts set forth in said bill and therein alleged to constitute an infringement of said plaintiff's alleged patented rights, appear on the face of said bill to have been performed by said defendant in the regular course of his duty as an executive officer of the government of the United States, and that he is not liable to suit for actions done in that capacity.

And further answering defendant says, that he has never used any instrument or device for the postmarking of letters and the cancellation of the stamps thereon, either directly or by subordinates, for his own private advantage or purposes, and that any and all postmarking and cancelling devices which have ever been used by him, were so used as an officer and agent of the United States in his office of postmaster at the city of New York; and defendant alleges that all such use by him was with the consent, approbation and approval, and under the direction of the Postmaster-General of the United States; and that therefore he, defendant, is not liable to suit for such use, or to any judgment, order or decree of this court for his action in the premises.

And defendant further says, on information and belief, that the devices and contrivances which have been used at the post office in the city of New York for the postmarking of letters and the cancellation of the postage stamps thereon since about the year 1860, were so used with the knowledge, consent, license, approbation and allowance of said Norton, and of his alleged assignees; and that from the time that defendant became postmaster at the city of New York, down to the time when this suit was brought, no objection to the continuance of such use in the post-office at the city of New York was ever brought to the knowledge or notice of defendant, and that therefore there has never been, as to defendant, a revocation of the license aforesaid; and defendant alleges that until this suit was brought he has never received any notification
from or on behalf of complainant or any of his alleged assignors,
123 or on the part of Norton, or of any one claiming by, through, or under him, in respect to the use by defendant of such contrivances as have been used by the clerks in the New York post office for the post marking and cancelling of stamps.

And defendant avers that the allegations from folio 27 to folio 39 inclusive are irrelevant and immaterial to the said bill of complaint, and defendant prays that the same may be stricken out of said bill, and as to all the allegations in the said bill of complaint contained, not hereinbefore mentioned, defendant leaves the complainant to make such proof thereof as he may be advised.

And defendant says, that he is advised that by reason of his defenses, and particularly by reason of the defense that complainant has no title whereon to base his said bill of complaint, he is not bound to make other or further answer to said bill of complaint; and that as to all the matters and things by him alleged he is ready and willing to maintain and prove the same as this honorable court shall direct; and humbly prays to be hence dismissed with his reasonable costs and charges in this behalf most wrongfully sustained.

STEWART L. WOODFORD,
United States Attorney, and Solicitor for Defendant.

STEWART L. WOODFORD,
Of Counsel.

124 SOUTHERN DISTRICT OF NEW YORK, *ss*:

On this twenty-third day of January, 1878, personally appeared before me, a United States commissioner, Thomas L. James, who being by me duly sworn, says that he has read the foregoing answer, and that the allegations therein contained are true of his own knowledge, except the allegations therein stated on information and belief, and that as to those he believes them to be true.

THOMAS L. JAMES.

Subscribed and sworn to before me this 23d day of January, A. D. 1878.

J. M. DEUEL,
U. S. Com. S. D. of N. Y.

125 In the circuit court of the United States of America, second circuit, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
vs.
THOMAS L. JAMES, DEFENDANT, AND UNITED States postmaster at the city of New York.

The replication of Christopher C. Campbell, complainant and assignee in trust in this cause to the amended answer of Thomas L. James, defendant, and United States postmaster at the city of New York, which amendments were sworn to by defendant on the 23d day of January, A. D. 1878, before J. M. Deuel, a United States commissioner, and filed in this court on this 24th day of January, A. D. 1878, by defendant's solicitor.

This replicant, saving and reserving to himself now and at all times hereafter, all and all manner of benefit and advantage of exception which may be had or taken to the manifold insufficiencies of the said amendments to the said defendant's original answer, or amended answer so sworn to and filed in this cause, for replication thereunto, says, that he will aver, maintain, and prove his bill of complaint in this
126 cause to be true, certain, and sufficient in the law to be answered unto, and that the said amendments or amended answer of the said defendant is uncertain, untrue, and insufficient to be replied unto by this replicant without this, that any other matter or thing whatsoever in the said amendments or amended answer contained, material or effectual in the law to be replied unto, and not herein and hereby well and sufficiently replied unto, confessed and avoided, traversed or denied, is true; all which matters and things this replicant avers, and will be ready to aver, maintain, and prove, as this honorable court shall direct, and humbly prays as in and by his said bill of complaint he has already prayed.

Dated this 25th day of January, A. D. 1878.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

GEORGE H. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

(Endorsed:) In the circuit court of the United States of America, second circuit, southern district of New York. In equity. Christopher C. Campbell, complainant and assignee in trust, vs. Thomas L. James, defendant and United States postmaster at the city of New York. Com-

plainant's replication to the amendments of defendant's original answer, or amended answer. Filed in this cause Jan. 24th, A. D. 1878. Marcus P. Norton, solicitor for complainant, Troy, N. Y. George H. Williams, of counsel for complainant, Washington, D. C. United States circuit court. Filed January 25th, 1878. John I. Davenport, clerk.

127 PLAINTIFF'S TESTIMONY.

128 In the circuit court of the United States of America, southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES, DEFENDANT AND UNITED States postmaster at the city of New York.

To the defendant, and to Stewart L. Woodford, United States attorney, solicitor for defendant, New York City:

GENTLEMEN: You and each of you will please to take notice, and due notice is now and hereby given to you and each of you, that on Saturday, the 8th day of December, A. D. 1877, at half-past ten o'clock, forenoon of that day, I shall commence the taking of the evidence and proofs on the part of, and in the behalf of the above-named complainant in this cause, and I shall continue the examination from day to day until the same shall have been completed.

You will further take due notice that the said evidence and proofs in this cause so to be taken on the part and behalf of the said complainant, will be so taken by and before John A. Shields, one of the standing examiners of this court, at his office in the new post-office and court-
129 house building of said United States, in the city of New York, and room No. 40 of said building, the same to commence on said 8th day of December, A. D. 1877, at 10.30 o'clock in the forenoon of that day, as aforesaid stated.

You will also take due notice that the said evidence and proofs so to be taken will be taken under and in pursuance to and with the 67th equity rule of this court and all amendments thereof. You will also please to take due notice that all evidence and proofs so taken will be duly filed in the office of the clerk of this court, and the same being so filed will be used at and upon the final hearing of this cause.

Dated this 5th day of December, A. D. 1877.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

GEORGE H. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

Examiner's order.

An application having been made to the undersigned, one of the standing examiners of this court, by the complainant's solicitor, to take evidence and proofs in the aforesaid entitled cause, in pursuance to the above and foregoing notice of time and place for the taking of the testimony on the part and behalf of said complainant, as stated in said notice bearing date this 5th day of December, A. D. 1877:

It it now and hereby ordered that the examination of witnesses and the taking of documentary proofs, and the filing of exhibits, or other

evidence according to said notice, take place before me at the time and place designated in the said notice. You are requested to be present to attend the same for and on the part of said defendant, if you shall deem it best so to do.

Dated Dec. 5, 1877.

JOHN A. SHIELDS,
Examiner, etc.

130 *Subpœna duces tecum.*

The President of the United States of America to Thomas L. James, United States postmaster at the city of New York, greeting:

We command you that, all business and excuses being laid aside, you appear and attend before John A. Shields, one of the standing examiners of the circuit court of the United States of America in and for the southern district of New York, second circuit, on the tenth day of December, A. D. 1877, at 12 o'clock noon, to testify and give evidence in a certain action now pending undetermined in the circuit court of the United States for the southern district of New York, in equity, and between Christopher C. Campbell, complainant and assignee in trust, and Thomas L. James, defendant and United States postmaster at the city of New York, on the part of the complainant, and that you bring with you and produce at the time and place aforesaid certain letter-press books used by John A. Dix, postmaster at the said city of New York during the years A. D. 1860 and 1861; also certain other letter-press books used by Abram Wakeman, postmaster at said city of New York during the years A. D. 1862 and 1863, containing letters of correspondence with the Post-Office Department at the city of Washington, D. C.; also one original post-marking and postage-canceling hand-stamp of each and every form or kind used in the New York City post-office since and during the time you have been postmaster at said post-office, if now there and now in your custody, and all other deeds, evidences, and writings which you have in your custody or power concerning the premises. And for a failure to attend you will be deemed guilty of a contempt of court, and liable to pay all loss and damages sustained thereby to the party aggrieved, and forfeit two hundred and fifty dollars in addition thereto.

Witness Hon. Morrison R. Waite, Chief Justice of the United States, at the city of New York, the eighth day of December, 1877.

[SEAL.] JOHN I. DAVENPORT, *Clerk.*

131 Circuit court of the United States, southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

Testimony taken before John A. Shields, examiner, under and pursuant to the 67th rule of the Supreme Court of the United States, as amended.

SATURDAY, *December* 8, 1877.

Present, Marcus P. Norton, esq., and George H. Williams, esq., counsel for complainant, and Samuel B. Clarke, esq., on the part of the defendant.

On motion of complainant's solicitor, it is ordered that the testimony of complainant's witnesses be taken down by question and answer.

Adjourned to December 10th, 1877, at 12 m.

NEW YORK, *December* 10*th*, 1877, 12 m.

Pursuant to adjournment.

Present, counsel as before.

THOMAS L. JAMES, Esq., a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

132 A. Thomas L. James; I am 46 years of age; I reside at 125 East 60th street, New York City, and I am postmaster at the city of New York.

Q. 2. Have you, in obedience to the subpœna served upon you, brought one original post-marking and postage-cancelling hand-stamp of each and every form or kind used in the New York City post-office since you have been postmaster?

A. I have not brought one of each kind.

Q. 3. Have you brought any; and, if so, what ones?

A. I have; those used in stamping, post-marking, cancelling city and distribution matters.

Q. 4. How many of them are there?

A. Two.

Q. 5. Will you produce them?

A. I will and do.

(Complainant files the two stamps produced, marked respectively Complainant's Exhibits A and B.—J. A. S., Ex'r.)

Cross-examined:

X Q. 6. Look at Exhibit A and state whether to your knowledge that stamp or stamps of the same pattern have been used in the post-office at any time.

A. To my knowledge, they have.

X Q. 7. At what time?

A. From the 1st April, 1873, to some time in the last of 1874.

X Q. 8. You say that stamps of the same pattern have been used; by saying pattern, do you mean identically the same?

A. I do.

Redirect:

R. D. Q. 9. Are you the defendant in this case?

A. I am, as postmaster.

THOMAS L. JAMES.

Subscribed and sworn to before me, this December 10th, 1877.

JOHN A. SHIELDS,
Examiner, &c.

133 ANTHONY YEOMAN, a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. Anthony Yeoman; I am 45 years of age; I reside at 112 Sullivan street; and I am general superintendent of the third division, New York City post-office.

Q. 2. How long have you been engaged in the New York City post-office?

A. About 24 years.

Q. 3. Have you been connected in any way with the business of stamping letters in said post-office during said time; and, if so, in what way and how long?

A. I was a stamper 4 or 5 years, and the remaining portion of the time I have been connected with stamping letters one way or another up to the present time.

Q. 4. State the different official positions that you have occupied in connection with the stamping division.

A. First, I was a stamper; next, I made up mails on the table where the letters were mailed with these cancelled stamps; the next, I had charge of bagging what was called the Great South Mail at that time, which contained the letters; the next I was appointed assistant superintendent of that department; then I was made superintendent; then the letter department and the newspaper department were combined together and I was made general superintendent of the division which I now occupy.

Q. 5. Look upon Complainant's Exhibit A and state if you know whether that or similar stamps have been used in the New York City post-office since Mr. James became postmaster; and, if so, for what purpose, and how long?

(Objected to on the ground that the question is too broad, since it should be limited to the time since the alleged assignment by Helen M. Ingalls to the complainant herein, and since what stamp was used prior to that assignment is immaterial and irrelevant matter for this issue.)

134 A. I do know; it was for the purposes to put the post-mark on the letter and cancel the stamp at one blow. It was used up to January, 1876.

Q. 6. Observe the recess in the post-marking part of the stamp and state if, when it is used, there is anything in it, and if so, what.

A. There is type placed in it for months, days, and hours.

Q. 7. While this form of the stamp was in use, state of what materials the cancelling part of the stamp was made.

(Objected to on the ground of immateriality.)

A. During the time stated there there were two different materials used. First there was the common cork, and the next was rubber used for corks for bottles.

Q. 8. State what you mean by saying rubber used for corks for bottles.

A. I mean articles that were made for bottle-stoppers, of rubber.

Q. 9. State if all, or if not all, how much of the post-marking and stamp-cancelling was done by means of this kind of stamp while it was in use as above stated.

(Objected to as irrelevant.)

A. I should judge about half.

Q. 10. How was the other half marked and stamps cancelled?

(Same objection.)

A. They were cancelled with a plain cork; some with rubber, and some with cork and no postmarks at all.

Q. 11. State if any of the letters stamped in the New York post-office during said time were stamped and marked otherwise than by this kind of a stamp. I do not mean circulars, but ordinary letters.

(Same objection.)

A. No; they were not.

135 Q. 12. Were the letters marked and the postage-stamp can-

celled during the time referred to by means of this kind of a stamp—referring to Exhibit A?

(Same objection.)

A. They were during that time, until January, 1876, about.

Q. 13. Look upon Complainant's Exhibit B and state what you know about the use of that in the New York City post-office since Mr. James has been postmaster, and for what purpose.

(Same objection.)

A. It was used, and for the same purpose that the other was used.

Q. 14. State about what time its use was commenced in the New York post-office.

(Same objection.)

A. About January, 1876.

Q. 15. What post-marking and stamp-cancelling instrument is now used in the New York City post-office?

A. One substantially the same as Exhibit B.

Cross-examined:

X Q. 16. In speaking of Exhibit A you said that all letters were post-marked and the stamps thereon cancelled were post-marked and cancelled by that sort of instrument. Do you mean that foreign letters were so cancelled and post-marked?

A. No; I don't mean foreign letters.

X Q. 17. Your remarks were confined then to the division in which domestic letters only were dealt with?

A. Yes, sir.

X Q. 18. Look at Exhibit B and state for what reason that sort of instrument was substituted for what had been used before.

A. It gives a better impression; the type is placed in the back, instead of the old way of putting in the front, and held in with a finger screw.

136 X Q. 19. Point out the principal differences as they occur to you between the sort of instrument which Exhibit B represents and the sort of instrument that was used before.

(Objected to because the witness is not called, nor does he appear to be an expert as to patents and patented inventions.)

A. In the first place the type are made with a shoulder, on being screwed into a cup, comes perfectly flush, and must fetch the type level with the rest portion of the stamp.

X Q. 20. You mean, do you, so that the types by which the dates are made come flush with the type by which the name of the place (New York in this exhibit) is post-marked?

A. I do.

X Q. 21. Do you know where this stamp, Exh. B, or that sort of a stamp was first made; was it not first made in England?

(Objected to, unless the witness can state of his personal knowledge, and also because it is leading.)

A. To the best of my knowledge and belief it was first made in England; not this same stamp, but similar ones.

Redirect:

X Q. 22. Do you make your last answer upon what you have heard, or do you know of your personal knowledge where stamps like Exh. B were first made?

A. I know that there was a stamp brought from England by an employee of the New York post-office, and copied or manufactured from it by a party in New York.

X Q. 23. Do you know that that employee brought that stamp from England otherwise than by his telling you so?

137 A. I do not, with the exception that it was corroborated by another employee who came over from England at the same time.

X Q. 24. When was the stamp referred to in the above question and answer brought into the New York post-office?

A. I can't tell you the dates.

X Q. 25. Was it brought within the last five years, and since Mr. James was postmaster?

A. Yes, sir.

ANTHONY YEOMAN.

Subscribed and sworn to before me this December 10th, 1877.

JOHN A. SHIELDS,
Examiner, &c.

DWIGHT A. LAWRENCE, a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. Dwight A. Lawrence. I am 34 years of age. I reside at 127 West 20th street. I am superintendent of foreign department, New York City post-office.

Q. 2. How long have you been connected with that department?

A. Since the fall of 1876, I think.

Q. 3. Are you acquainted with the business of post-marking and postage-stamp cancelling of foreign letters in the New York City post-office, and if so, how long?

A. I have had a general knowledge ever since I have been in the office; a positive knowledge since having charge of the department.

Q. 4. Do you know what post-marking and stamp-cancelling instrument has been used for letters in that department since Mr. James has been postmaster?

A. Only for the past year and a quarter I have positive knowledge.

Q. 5. What sort of a stamp has been used there since you had positive knowledge?

138 (Objected to on the ground that the inquiry should be confined to the time since the alleged assignment by Ingalls to complainant.)

A. The department has used instruments like complainant's Exhibits A and B, with the exception, in Exhibit B, the grooves on the cancelling portion of the stamp run in directions opposite to what they do in Exhibit B, and we do not use the hour type like they do in the distribution.

DWIGHT A. LAWRENCE.

Subscribed and sworn to before me this 11th day of December, 1877.

JOHN A. SHIELDS,
Examiner, &c.

Adjourned to Tuesday, December 11th, 1877, at 12 o'clock m.

NEW YORK, *December 11th*, 1877—12 o'clock m.

Pursuant to adjournment.

Present, counsel as before.

Complainant offers in evidence and files as his Exhibit C a certified

copy of the caveat of Marcus P. Norton, and referred to and described at folios 6 and 7, on page 2 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit C.—J. A. S., ex'r.

(Objected to on the distinct and separate grounds:

1st. That the certificate which is to the effect "that the annexed is a true copy from the files of this office" is not a form of certificate authorized by law.

2d. Because the stamp and the ribbon bear apparent marks of having been disturbed, and the disturbance is not explained.

139 3d. Because the document contains a paper, to wit, the paper at the end thereof, just before the contents, which is signed by Marcus P. Norton, and dated Tinmouth, Vermont, August 7, 1854, which paper is not countersigned or endorsed as having been filed or recorded at any time in the Patent Office. And

4th. The paper referred to under the 3d ground of objection above is specially objected to for the reason stated, and also because the dates of said paper being compared with the date of filing the caveat of 1853, preceding it in the document, shows that said paper is not and was not a part of said caveat of 1853, and because it purports to be an amendment or addition to said caveat of 1853, and because no authority in law is or was given to the Commissioner of Patents, or to any officer connected with the Patent Office, to receive and file or record an amendment or addition to a caveat, and because

Lastly and separately, it does not appear when said paper was written or filed, if, in fact, it was filed.)

Complainant offers in evidence and files a certified copy of the original patent, issued to Marcus P. Norton, dated April 14, 1863, No. 38175, and referred to in folios 7, 8, and 9, and on pages 2 and 3 of complainant's amended bill of complaint, marked Complainant's Exhibit D.—J. A. S., ex'r.

(Objected to upon the ground that the original patent itself is a muniment of complainant's title and presumably under his control, and it should be produced or its absence explained before any copy is admissible.)

Complainant offers in evidence and files a certified copy of the assignment by Marcus P. Norton to Jacob Shavor and Albert C. Corse,

140 dated the 20th day of April, 1863, and referred to in folios 17 and 18, on page 5 of complainant's amended bill of complaint, and marked Complainant's Exhibit E.—J. A. S., ex'r.

(Objected to on the ground above stated as the objection to Exhibit D, and also separately because the original should not only be produced, but its execution and validity proved before a copy is admissible in evidence, and also separately because it is irrelevant to the allegation in the bill, which calls for an assignment in trust.)

Complainant offers in evidence and files a certified copy of the reissue of letters patent, granted Shavor and Corse, dated August 23, 1864, No. 1748, and referred to in folios 18, 19, and 20, on pages 5 and 6 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit F.—J. A. S., ex'r.

(Objected to on the ground stated as the objection to Exhibit D.)

Complainant offers in evidence and files a certified copy of an affidavit and assignment, signed by Jacob Shavor and Albert C. Corse, to Marcus P. Norton, and dated February 23, 1864, and referred to at folios 40, 41, and 42, on page 11 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit G.—J. A. S., ex'r.

(Objected to on the ground stated as the objection to Exhibit D, and

also separately because the original should not only be produced, but its execution and validity proved before a copy is admissible in evidence, and also separately because there is no authority in law for the filing or recording an affidavit such as said Exhibit G pur-
141 ports to be a copy of, and also separately because it is not proved or acknowledged in such form as to entitle it to be filed or recorded in the Patent Office as an assignment; and also separately because it does not appear by whom such alleged assignment and affidavit were filed, or that the persons by whom they were filed were duly authorized to file the same.)

Complainant offers in evidence and files a certified copy of the reissue letters patent to Marcus P. Norton, dated August 3, 1869, No. 3586, and referred to at folios 42, 43, and 44, on pages 11 and 12 of complainant's amended bill of complaint, and marked Complainant's Exhibit H.—J. A. S., ex'r.

(Objected to on the ground stated as the objection to Exhibit D.)

Complainant offers in evidence and files a certified copy of an assignment by Marcus P. Norton to Helen M. Ingalls, dated on or about October 23, 1869, and referred to at folios 45, 46, on page 12 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit I.—J. A. S., ex'r.

(Objected to on the separate grounds stated as the objections to Exhibit D, and to Exhibit E with the exception of the last objection to Exhibit E, and also separately because it is irrelevant to the allegation in the bill, which calls for an assignment on October 20, 1869, while this assignment purports to be an assignment made on October 23d.)

Complainant offers in evidence and files a certified copy of the reissue of letters patent granted Helen M. Ingalls, dated October 4, 1870,
142 No. 4143, Division A, and referred to at folios 47, 48, 49, 50, and 51, on pages 12 and 13 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit K.—J. A. S., ex'r.

(Objected to on the ground stated as the objection to Exhibit D.)

Complainant offers in evidence and files a certified copy of an assignment by Helen M. Ingalls to William W. Secombe, dated March 4, 1871, and referred to at folios 51, 52, 53, 54, and 55, on pages 13 and 14 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit L.—J. A. S., ex'r.

(Objected to on the separate ground stated as the objection to Exhibit D and to Exhibit E, except the last objection to Exhibit E, and also separately because the alleged assignment does not appear to have been so acknowledged and proved as to entitle it to be filed or recorded as an assignment.)

Complainant offers in evidence and files the reissue of letters patent granted Secombe Manufacturing Company, dated October 4, 1870, No. 4144, division B, and referred to at folios 48, 49, 50, and 51, on page 13 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit M.—J. A. S., ex'r.

Complainant offers in evidence and files a certified copy of an assignment by the Secombe Manufacturing Company, and W. W. Secombe to Helen M. Ingalls, dated July 10, 1873, and referred to at folios 54 and 55, page 14 of complainant's amended bill of complaint, and marked Complainant's Exhibit N.—J. A. S., ex'r.

143 (Objected to on the separate grounds stated as the objections to Exhibit D, and to Exhibit E, except the last objection to Exhibit E, and also because said Exhibit N, purporting to be an assignment by W. W. Secombe, president of the Secombe Manufacturing

Company, is irrelevant to the allegation in the bill, which calls for an absolute assignment to said Secombe.)

Complainant offers in evidence the copy of the assignment by Helen M. Ingalls to Christopher C. Campbell, the complainant in this case, dated January 2d, 1877, recorded March 23, 1877, which is set out verbatim in complainant's amended bill of complaint at folios 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, and 80, on pages 15, 16, 17, 18, 19, 20, and 21 of said amended bill of complaint.

Defendant's counsel consents to treat the copy offered as though it was certified as the other copies of assignments heretofore offered are certified, and objects to its admission in evidence on the ground stated as the objection to the admission of Exhibit D, and of Exhibit E, except the last objection to Exhibit E.

Complainant offers in evidence and files report of the Committee on Post-Office and Post-Roads of the House of Representatives, No. 98, 1st session of the 39th Congress, referred to in folios 26, 27, and 28, on pages 7 and 8 of complainant's bill of complaint, marked Complainant's Exhibit O.—J. A. S., ex'r.

(Objected to on the ground that it is immaterial, and on the separate ground that the authenticity and genuineness of said Exhibit O is not proved.)

Complainant offers in evidence and files report of the Committee on Post-Offices and Post-Roads of the Senate of the United
144 States, No. 164, 2d session of the 39th Congress, referred to in folios 29 and 30, on page 8 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit P.—J. A. S., ex'r.

(Objected to on the grounds stated as the objection to the admission of the objection to Exhibit O.)

Complainant offers in evidence and files report of the Committee on Post-Offices and Post-Roads of the Senate of the United States, No. 243, 2d session 41st Congress, referred to at folios 31, 32, and 34, on pages 8 and 9 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit Q.—J. A. S., ex'r.

(Same objection as to Exhibit O.)

Complainant offers and files copy of the joint resolution of Congress approved July 14, 1870, and referred to at folios 33, 34, and 35, on page 9 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit R.—J. A. S., ex'r.

(The same objection as last above stated.)

Complainant offers in evidence and files Executive Document No. 49, 3d session, 41st Congress, letter of the Postmaster-General, referred to at folios 34 and 35, on page 9 of complainant's amended bill of complaint, and the same is marked Complainant's Exhibit S.—J. A. S., ex'r.

(Same objection.)

Complainant offers in evidence and files report of the Committee of Post-Offices and Post-Roads of the Senate of the United States, No. 186, 2d session of the 42d Congress, and referred to at folios
145 35 and 36, on pages 9 and 10 of the complainant's amended bill of complaint, and marked Complainant's Exhibit T.—J. A. S., ex'r.

(The same objection.)

Adjourned to Wednesday, Dec. 12th, 1877, at 2 p. m.

NEW YORK, *December 12th*, 1877—2 o'clock p. m.

Pursuant to adjournment.

Present, counsel as before.

ANTHONY YEOMAN recalled:

Q. 26. Look upon Complainant's Exhibit No. 1, and state if you know what it is.

A. It is an impression taken under my supervision of a stamp similar to Complainant's Exhibit A.

Q. 27. Look upon complainant's Exhibit No. 2, and state what that is, if you know.

A. It is an impression of a stamp taken under my supervision similar to Exhibit B.

Q. 28. Look upon Exhibit No. 3 and state, if you know, what that is.

A. It is an impression of a stamp used in the foreign department of the New York City post-office, taken by myself.

Q. 29. You stated that the cancelling part of stamps like Exhibit No. 1 was made of cork and rubber; state how the cork was fastened on to the bar, when cork was used.

A. The same as the rubber on Exhibit A.

Q. 30. State under whose direction and authority the business of the New York City post office, including the business of stamping, is conducted.

A. Thomas L. James.

146 Q. 31. State about how many clerks in the New York City post-office are engaged in or connected with the business of stamping foreign and domestic letters.

A. I should judge about forty; not including the stations in the city.

Q. 32. State how many stations there are in the city.

A. About nineteen.

Q. 33. State if letters are post marked and stamps cancelled in the same way that they are in the city post-office.

A. They are; sometimes they send some down to the general post-office without being cancelled. That is when they are short of help.

Cross examined:

X Q. 34. Look at Exhibit No. 1. I notice that the impression is rather indistinct; what is the reason of that?

A. The impression was made from an old and worn out stamp.

X Q. 35. Look at the impression, Exhibit No. 3. I notice that the impression is somewhat blurred; what is the reason of that?

A. I did that myself, not being an expert stamper. To-day I acknowledge that my men can do it better.

(Witness withdraws the old impression of the foreign stamp and produces a new impression, which is marked Complainant's Exhibit No. 3.)

X Q. 36. I understand you to say that the business of the New York City post-office, including the business of stamping, is done under the direction and authority of Mr. James; you mean, do you not, that the business is done by Mr. James as postmaster, and as deputy of the Postmaster-General of the United States, who has general supervision and direction of the business of the office, and that the special business of stamping letters in the office is done under your own direction?

(Objected to as immaterial.)

A. Yes.

147 Redirect:

R. D. Q. 37. Are you not subject to the directions of Mr. James, the defendant, in the performance of your official duties?

A. I am.

Recross:

R. X Q. 38. Is not Mr. James subject to the direction of the Postmaster-General in the performance of his official duties?

(Objected to as immaterial.)

A. He is.

ANTHONY YEOMAN.

Subscribed and sworn to before me, this 12th day of December, 1877.

JOHN A. SHIELDS,
Examiner, &c.

SAMUEL P. KITTLE, a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. Samuel P. Kittle. I am 52 years of age. I reside in New York City, and I am a manufacturer and dealer in spring mattresses, bedding, &c.

Q. 2. State if you have been engaged more or less in any other business than that above specified; and, if so, what?

A. My life since boyhood has been given to mechanical pursuits, practically and theoretically. I have been frequently called upon during the last past 25 years to examine mechanical constructions and printed descriptions of machines and mechanical devices, and to read American and foreign patents and to examine machinery in motion and at rest, to inform myself as regards mechanical combinations, modifications, similarities and differences of different constructions more
148 or less alike, for the purpose of giving an intelligent opinion to parties interested, or for the guidance of the court.

Q. 3. Have you ever before been a witness in a case involving the validity or infringement of patented inventions; if so, in what capacity were you called, and have you so testified few or many times?

A. I have been frequently called as a mechanical expert in the United States courts in different districts, to give my views as a mechanical expert where questions of similarity or difference existed, to determine the question of infringement of patents. I have also been called for the same purpose in cases in interference in the Patent Office. I think I have also given my testimony in regard to the Norton patent for cancelling and stamping before the Court of Claims, if I mistake not.

Q. 4. Do you consider yourself qualified as an expert to express an opinion as to whether or not a machine or an instrument is, or is not, within the description and claims of a patent?

A. I certainly think I am qualified to give an opinion of the kind referred to in the question, and should be surprised at this late day if it had no weight.

Q. 5. State if you have read the patent—a certified copy of letters patent—granted Helen M. Ingalls, dated October 4, 1870, No. 4143, marked as Exhibit K, in this case, a copy of which is attached to the bill of complaint.

A. I have.

Q. 6. Take and examine Complainant's Exhibit A, and state whether or not it is a device or instrument embraced within the description and claims of said letters patent, marked Complainant's Exhibit K.

(Objected to as irrelevant and immaterial.)

A. I think it is.

Q. 7. Take and examine Complainant's Exhibit B, and state whether or not that is within the description and claims of said letters pat-
149 ent, marked Complainant's Exhibit K, and give the reasons for your opinion.

A. I think it is described in the patent referred to, and covered in the claims thereof. The invention set out in the patent Exhibit K is very clearly illustrated in the drawing, and the description is more than usually full in the words of the specification, and the specification of claim very clear. The Exhibit B seems to me to be fully specified in the 4th or last claim. I think the illustrations, figures 5 and 6, answer very well as descriptions of this invention in view of the fact. I do not mean to be understood, however, as stating that the instrument Exhibit B is absolutely delineated in the figures referred to of the drawings of Exhibit K. However, figure 5 of Exhibit K, which is a vertical section cutting the instruments through the centre, together with the part or screw pin which is to secure the handle, clearly shows a top plate, B, which carries the handle and a solid die, G, which is screwed on to such top plate B. The fact that the top plate in Exhibit B is thicker than the top plate illustrated in figure five, Exhibit K, can certainly be regarded as nothing more than a mechanical difference, nor can the fact that the die G is screwed into said plate B, and is separate in its lower extremity from the type receiving date thimble or die, be regarded as anything more than a colorable or a mechanical change in view of the words of the claim 4 of the patent Exhibit K, which I quote: "The employment and combination of a post-marking device with a postage-stamp cancelling device, both being operated by one and the same handle, for the post-marking of letters, envelopes, or packets, and for the cancellation of the postage stamp thereon with indellible or other ink, in the manner substantially as herein described and set forth," and for the further reason of the words of the specification which I find in the printed record of this case at page 40, describing the said invention in the words of the patent Exhibit K, in the last paragraph on the said page I quote,

"I also construct my said postage-stamp cancelling device, die,
150 or type, of cast iron, steel, or other suitable metal, substantially as shown at G′, figures 5 and 6, and which may be secured to the said cross-bar or piece B in like manner as said tube or cylinder C, figures 2 and 4, and which is done either by screw and nut where the same unites with the said cross-bar, or may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto."

The fact that the cancelling face and the date die, with the exception of the removal of the letters or figures, are in one piece on their face with Exhibit B, I do not regard as a material or substantial alteration or change in the construction of the instrument described in Exhibit K; neither do I think that the employment of the circular plate with a thread on the inner surface correspond to the screw part of the dies, Exhibit B, instead of the two screws illustrated in figure 5, patent Exhibit K, as anything more than a mechanical change, for really when these parts are in place and screwed up to the plate which carries the handle, it becomes one solid instrument, and the division is mainly in the depth of the line between the cancelling die and the post-office date die, so that in Exhibit B I find the combination of the parts in the 4th specification of claim, for the purposes, and in the manner therein sub-

stantially set forth, operating the same way and producing the same result.

Q. 8. Referring to the description contained in folio 161, on page 41, of the amended bill, state if that includes an instrument of a circular form or of a form dispensing with the cross-bar.

A. It seems to indicate that the two parts are to be made together; it may be circular, or there may be two partly cylindrical parts substantially solid and as one; in either case the bar B would not be requisite, the handle-pin might immediately run off from these dies.

Adjourned to Thursday, December 13, at 1 p. m.

Pursuant to adjournment.

Present, counsel as before.

Examination of SAMUEL P. KITTLE continued:

Q. 9. Please to read claim No. 3, in Exhibit K, and state the difference between that claim and claim No. 4, and whether or not Complainant's Exhibit A and B are within said claim No. 3, and the reasons for your opinion.

(Objected to, so far as regards Exhibit A, on the ground of irrelevancy and immateriality.)

A. Claim No. 3 reads as follows. I quote: "The post marking of letters, envelopes, and packets, and the cancellation of the postage stamps thereon with ink, at one and the same blow or operation of the instrument, in the manner and by the means substantially as herein described and set forth." The claim quoted is for the operation of the combined post-marking and postage-stamp cancelling contrivance or device, as set forth and illustrated in the specifications of the patent Exhibit K, in actual use, having been inked and impressed upon an envelope, packet, or other mail matter for the purpose of giving the post-office mark or imprint, and at the same time cancelling the postage stamp in such a manner as to prevent the second use of the stamp, having imparted any ink to the postage-stamp and the letter, envelope, or packet which would successfully accomplish that end, and the same being accomplished by the application of the face or faces of the die in such relations to each other and so combined in the handle for operating both, as that by a single blow or application the post-office address is imprinted and the postage stamp is cancelled in the manner described, that is to say, in brief, having an instrument consisting of a handle to hold it by, and a cancelling die adapted to receive and impart
152 ink, and also a die with letters to imprint the post-office mark and date, adapted to receive and impart ink, so combined with each other as to be capable of operating together, and, being operated together, the accomplishment of the print with the post-office mark and the cancelling of the postage stamp at one and the same time, in the hand of the operator.

The 4th claim of the patent Complainant's Exhibit K, reads as follows. I quote: "The employment and combination of the post-marking device with a postage-stamp cancelling device, both being operated by one and the same handle, for the post-marking of letters, envelopes, or packets, and for the cancellation of the postage stamps thereon with indelible or other ink." It seems to me clear that while the claim No. 3 is for the mode of operation or the process of cancelling and printing as before described, the 4th claim is as clearly for a combination of the

parts and elements of the device, contrivance or thing by which the work is done, and without which it could not be done. The device or thing, Exhibit A, is such a construction as is referred to employed in accomplishing the work specified in claim No. 3, Complainant's Exhibit K. Complainant's Exhibit A had not the type giving the date in the post-office die, but has the place or space for it, and the means of securing the same property, for the purpose of receiving the ink and imparting the date. The cancelling die is of rubber, and pretty thoroughly used up by past service. This cancelling die is secured to the cross-bar by an ordinary screw through the bar into it, while the post-office die seems to be soldered (I should think) to the cross-bar by which they are connected to and with each other and through which the handle is connected to them. The fact that this India rubber stamp cancelling die is not enclosed in a thimble or ring, or is not made of wood used endwise, or any of the other materials spoken of in the exhibit Complainant's Exhibit K, is of no consequence, more than mechanical change or modification indeed the construction of the instrument is substantially the same as de-
153 scribed and illustrated in the Complainant's Patent Exhibit K, and the purpose, and the mode of operation, and the results are all the same as that set out in the claim of specification No. 3, while the modification and deficiencies which I have referred to are not material, as the type could be easily placed in the printing die, and the defective cancelling die could be easily substituted for a new one, as is plainly directed, in the words of the patent, Complainant's Exhibit K, from which I quote, see printed record page 39 of the amended bill, last paragraph. "The said cancelling type or die can be easily repaired, or replaced by a new one, whenever desired, and at very little expense, and such cancelling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small bolt; in such case there would not be any tube or pipe surrounding said cancelling die or type G; the operation and effect produced would in such case of construction be the same." As to the complainant's Exhibit B, and its operation for the purposes and in the manner specified in the 3d claim of the patent Complainant's Exhibit K, I would state that the two die pieces specified in the patent referred to are here made of one piece of metal and which is so cut away as to leave the impressing or acting faces so that they will produce substantially the same appearance as would the die illustrated and described in the patent, Complainant's Exhibit K, and it strongly resembles the illustration in said patent figure 3, the acting faces of the combined dies, Complainant's Exhibit B, are screwed on to a circular plate, which supports the handle, and the type in the post-office marking die are inserted from the back, and secured by the dies being screwed down under the circular handle plate or bar. I say circular plate or bar, because this is a modified construction in some respects of the Norton invention, the circular cup-like plate with a thread on the inner periphery or ledge would accomplish the same purpose were its opposite sides cut away to a considerable extent; or the same result might be accomplished were the metal forming the dies made with an upward projecting rim, and the
154 plate had a thread on the outside and the die on the inside; all these changes are merely mechanical, and are common with constructors, therefore I give them little or no importance; they certainly do not constitute substantially alterations or differences. To be sure it does not seem proper to call a circular plate a bar, nevertheless when it performs the office of a bar, for a given purpose, it becomes a mechanical equivalent for the same. Looking at the Exhibit B, in the

above light and in the light of the illustration, specification, and described modifications in the Patent Exhibit K, I am decidedly of the opinion that said exhibit in its use and operation, and in the hand of the operator is substantially the same in its purpose, in its combination, its operation, and in its results of operation; in other words it is intended for the same thing, it is the same thing, it operates in the same way, and may be used by the same hand and must produce the same result, and is clearly within the 3d claim specification.

Q. 10. State whether or not the description in Exhibit K of the postage-stamp cancelling device mentions rubber as one of the materials out of which that device can be made.

A. Certainly it does.

Q. 11. Take and examine complainant's exhibit marked U, and state whether or not it is an instrument or device within the specifications and claims of Complainant's Exhibit K.

A. It is clearly; see figures 1 and 2.

(Complainant's counsel now offers the same as Exhibit U, and it is marked Complainant's Exhibit U.—J. A. S., ex'r.)

Q. 12. Take and examine Complainant's Exhibit V, and state whether or not it is within the specifications and claims of Complainant's Exhibit K, and state briefly the difference between Exhibits U and V, if there be any.

A. I think it is within the said specifications and claims, and the difference between U and V is found substantially in the difference as
155 illustrated in the drawing of said patent, to wit: Exhibit is such a modification of U as is found illustrated in Figures 5 and 6 of the drawings, Complainant's Exhibit K; that is to say, the cancelling die is of metal, instead of cork, rubber or wood. The figure 6 represents the face view of figure 5, and differs from the face view of Complainant's Exhibit V in that the bars run across in an illeptical form instead of round or in a circle; of course such differences are merely colorable.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit V.—J. A. S., ex'r.)

Q. 13. Look upon Exhibit W, and state whether or not it is within the specifications and claims of Exhibit K, and briefly the difference, if any, between it and Exhibit U.

A. It is clearly within the specifications and claims referred to. The difference between the Exhibit U and W is wholly formal or mechanical, and not material or substantial, and exists in the form of the bar B, and the depth of the die or the distance of removal of the acting faces, form the bar B; the bar B is an elongated bar in Exhibit U, and a circular plate in Exhibit W; they are both the connecting device between the acting face and the operating handle, and between the two operating faces; I mean the cancelling die and the post-office or dating faces. In the Exhibit W, India rubber is used, while in Exhibit U, cork is used for the postage-stamp cancelling, print, or face. The face view of Exhibit W will be found fairly illustrated in figure 3 of the drawings of Complainant's Exhibit K; however, the circular form has reference there to the handle.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit W.—J. A. S., ex'r.)

Cross-examined:

X Q. 14. In your answer to the last question of Judge Williams,
156 you say that the circular form in figure 3 of Comp'ainant's Ex-

hibit K has reference there to the handle; please explain what ou mean by that.

A. I mean the circular line nearly enclosing the two faces indicates the diameter of the bulb or knob of the handle, but might easily be received as a suggestion for a circular plate instead of a bar.

X Q. 15. You do not see, do you, any indication or hint in the figures and drawings of Complainant's Exhibit K of a cross-bar in a circular or elliptical form?

A. Why, yes; the bar B, all the way through, comes near being an elliptical form, if it was slightly widened; and if it was widened further it would become circular.

X Q. 16. Do you mean by that answer that the figures suggest to your mind a cross-bar in a circular form?

A. The figures of themselves, I think, are suggestive of circular, elliptic, or any convenient form. The cross bars in the different figures are not alike, and therefore the suggestion is that they may be modified, if there is any suggestion necessary; I do not think these variations in form of a cross-bar, as indicated in the face views, figures 6 and 3, for instance, wherein the case of figure 6, the end of the bar B on which the die G is secured, is evidently smaller than the opposite end on which the type or die D is secured, which is not the case in figure 3; the drawings evidently were not made with the above variation for the purpose of special suggesting any definite and fixed line of modification or form.

X Q. 17. If you were going to construct a model according to any figures in the drawings annexed to Exhibit K, exactly according to the pattern of any one of those figures, would you make the cross-bar of such model in a circular form?

A. No.

X Q. 18. Would you make it in an elliptical form?

A. No; I would make it exactly as the lines represent, if I was going to make an exact form.

X Q. 19. What do the lines represent in each figure?

A. A flat bar with a downward projecting rim, in figures 1 and
157 2; the face or under side of a bar, circular ends, slightly narrowed centre, in 3 and 6; 5 is a vertical section of the bar in other parts very similar in form to that seen in figure 2; I would state, however, that in figure 5 there seems to be a sunken circular portion in which there is a screw thread running round on the inner periphery of such sunken portion at each end of the bar, on the under side of same, which I do not find in figure 2.

X Q. 20. What does that difference indicate that you refer to between figures 2 and 5?

A. A modification of construction that would become desirable in case of using solid or metal dies. I think if there is any importance as there seems to be, connected with these slight modifications in the mind of the counsel, it may be due that I should say that I regard the form or shape of any part or parts of little or no consequence, so long as that form or shape is not subversive of the purpose, or of the combination, or the operation, or the result, but any form or size of any of the parts that in any way contribute to the economy or convenience of producing the same combination, application and result is admissible, and I may say desirable, or even the adding of beauty of finish or elegance thereby would be admissible and probably desirable.

X Q. 21. You have used the term die frequently in your testimony; precisely what meaning do you attach to it?

A. I mean the thing that is connected to the cross bar, and that im-

parts the imprint of post-office and date and cancellation, whether it be in one or two distinct instruments, but generally I have meant the combined instrument having the last named pieces, and excluding the handle and cross bar; the die or dies being attached or secured to such cross bar; the die proper being the thing that bears the type or configuration in or on its face, even including the lettering in part or whole, for the purpose of giving the post-office mark and the cancelling mark, that is to say, the thing that speaks on the postage stamp, and on the
158 envelope, and informs the mind where the envelope is from, and of the fact that the stamp has been used.

X Q. 22. Look at Complainant's Exhibit U; point out and state what is the die or dies on that instrument?

A. The two projections of cylindrical form secured to the connecting plate B, and on the opposite side from the handle.

X Q. 23. The post marker in Exhibit U (by post marker I mean the cylinder attached to the cross bar, by aid of which it is intended to post-mark the envelope) consists of two parts, the cylinder itself, and something attached within the lower part of it by a screw, does it not, and which of those two parts which plainly may be easily separated, is the die?

A. Yes, to the first part of the question; the die may be said to consist of more than two parts; in this case there is an outer rim and inner rim of broader face, adapted for engraving letters but not having any on; the type within the inner rim and the cavity for the type, and the set screw for the type, and the handle for the same, and, &c., &c.; it is like asking me what parts of my specks I mean when I speak of my specks; there are several parts.

X Q. 24. You mean, do you, that the post marker in Exhibit U, as a whole type, outer and inner rims, set screw, thread, and all the cylinder attached to the cross bar, is a die?

A. Yes, and I mean further even than that; if it is desirable to add the additional purpose or means of cancellation on one side of the above thing, that you have described and connected therewith in a $\frac{1}{16}$ of an inch of the acting face, or less or more, so long as it is operative and convenient, it is still a die for all the practical purposes and intent of the die or device about which I am giving testimony; and further, the substitution of forms different, or even means largely somewhat different, so long as the practical ends and purposes and combinations are retained, will make no difference, and yet I do not wish to be
159 understood to say that a screw may be a die, or that a screw is necessary for a die; a die may have or be without a screw, may have an inside or an outside rim or neither; may be a circular or square or any other shape; may have type to connect with it, or as a part of it; may have engraved letters, or neither, but some configuration of form or device instead of letters.

X Q. 25. Look at Exhibit U, and state what is the die in the case of the cancelling cylinder?

A. It's the acting face or thing secured to the cross bar, and standing opposite what you term the post marker.

X Q. 26. That is composed of two parts, is it not?

A. Yes.

X Q. 27. What are they?

A. Yes, three parts, the thimble or cylinder, the head or circular inside base that secures to cross bar, and the acting face of cork; I speak of these as constituting the device or thing in this construction, when combined with the bar and post marker as a die or double die, if you

please; I have got it as one; the fact of the acting faces or the essential parts being removed to greater or less distance from the lower side of the bar B, on which they are mounted, being of no special consequence, so long as they are conveniently so attached and are operative.

X Q. 28. You said that the cancelling cylinder consists of three parts; the head, by which the cylinder is attached to the cross bar; the cylinder itself, and the acting face of cork; do these altogether, in your opinion, constitute a die?

A. Yes, or a die may be constituted of all the parts; in this case those parts would be probably included in the construction there shown.

Adjourned to Friday, December 14th, 1877, at 11 o'clock a. m.

160 NEW YORK, *December* 14, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 29. You say, then, do you, that the cancelling die in Exhibit U consists of all that is connected to the cross-bar, at the end of the cross-bar opposite the post marker?

A. Yes, with this explanation, the cancelling die or stamp, irrespective of the post marker, is the part or face which is caused to imprint or saturate with ink the postage stamp, and the same is necessarily to be connected or attached to the cross-bar and post marker in order to come within the claims specifications 3 and 4, as set forth in the patent, Complainant's Exhibit K, and as I have stated before, I repeat, that I may be distinctly understood, that I do not regard the specific relation of the elementary parts referred to, nor their size, as of special importance, and while I say in answer to the question, that the die or stamp consists of the parts named, I distinctly disclaim saying or intending to say that these parts are the only parts or the exact parts necessarily constituting the cancelling stamp or device. As I understand, the specifications and modifications describing the invention set out in the patent Complainant's Exhibit K.

X Q. 30. Have you used the term die in your testimony, always precisely the same signification attached to it?

A. Possibly not.

X Q. 31. Give as many different meanings to the term as you remember to have used?

A. I don't remember using that term with any other meaning than to express or point out one or the other, or both of the imprinting or ink imparting faces under and connected to the cross-bar, carrying the handle of the instrument, thing or device or combination of parts,
161 constituting the cancelling face and post marker, as a mechanical construction.

X Q. 32. Do you mean that you have sometimes used the term as synonymous with the canceller, at other times as synonymous with the post marker, and still other times as synonymous with the canceller and post marker as one instrument connected by the cross-bar?

A. Not exactly. I mean that I may have used the term in describing separately either of the parts, the post marker or the cancelling die or stamp, in describing them separately, and that I certainly had used that term to represent the combined faces, and I now state, that however I may have used the term die, I do not think I have given a confused idea with regard to what meaning I attach to it, and if I have I wish distinctly to be understood now as meaning by the term die the same that

I would mean by the term stamp, cancelling-stamp or post-office marker, when speaking of it or them as the thing covered by and embraced in either the 3d or 4th claim of the specifications of the patent, Complainant's Exhibit K. That is to say, the die as I would have it understood is the thing that is carried by means of the handle having the cross-bar underneath or its equivalent, to which are secured the post office marker, and the postage-stamp cancelling face, the same being combined for the purpose of receiving ink, which when stamped or struck upon an envelope and postage-stamp will so impregnate the postage-stamp as to effectually inform the holder or user of its having been used once, and that the same impression, stamp, or blow will impart the information of the post-office and the date when and where such cancellation or stamping was made.

X Q. 33. In your answer to the last question you state that you "certainly have used that term to represent the combined faces." What do you mean by that?

A. The same as I would mean if I were to speak of the various bars on one part of the die forming the combined configuration, or the various letters in the post-office mark being combined to give the
162 post-office. That is to say, the different portions put together make the acting face or the thing. I mean by combined, put into juxtaposition or proper relation to be acted upon, and to act upon, in a convenient, practical and efficient manner, for the purposes intended, and for producing the result, to wit: At one blow, stamp, or impression, by the aid of a handle connecting to them through the medium of a cross bar, printing the post-office mark and somewhat effacing the postage stamp on the envelope, so as to prevent the second use of the stamp, and at the same time inform of the location and date and office where the cancellation was performed in ink.

X Q. 34. Bearing that explanation in mind, please state whether the term die in the sense of a representation of the combined faces (I take the words underscored from your answer to Q. 32d) is applicable to Exhibit U?

A. Yes.

X Q. 35. Considering Exhibit U as made up of the four elements handles, cross bar, canceller, and post-marker, how many of these elements, and which do you take to make up the die, using the term die in the sense referred to in the last question?

A. The acting face or faces of the canceller and post marker, with sufficient metal or other suitable material to afford the requisite practical resistance and strength, laying back or above the acting face or faces, and securing thereby the same to the cross-bar.

X Q. 36. Can you answer Q. 35 using only the elements therein specified? if you can, do so.

A. I think I have answered the question in that way, by excluding the handle and cross bar in my answer. I do not see how I could be more explicit and definite. I am ready to answer any question.

X Q. 37. Do you mean that the die in the sense inquired about consists only of post-marker and canceller, using the terms post-ma'ker and canceller as two of the elements specified in Q. 35?

A. I mean that the post-marker and canceller as an element or the element when having the qualifications that I stated in my last two
163 answers, constitutes the die. Now, if you wish me to speak of the instrument Complainant's Exhibit U, having only the post-marker connected with the handle as before stated, then the acting face of it, having the relation to the other parts (the handle and the inter-

mediate portion), would be the die. Or, if you exclude the post-marker and use only the canceller, then, its acting face being provided, as before stated, would be the die. Now, if you prefer, I have no objection to your considering either acting face, having the qualifications before stated, as separate dies, or a combination of dies, but I think it proper and right to call the entire face of the marker, the canceller, a die, when they have the construction I have referred to before repeatedly, and the fact of the elongated cylindrical projections from the cross bar, carrying this face or these faces, I regard as of no importance, for it is manifest that they may be increased or diminished very largely without any material difference of result, and certainly without anything more than a mechanical modification, fully set out and shown, and justified in the specifications of the patent, Compl't's Exh. K; and furthermore the said patent distinctly states a modification and illustrates the same, that justifies this view, and moreover the marker and canceller under the specification may be made in one piece or two pieces soldered together; I quote from the amended bill, 39th page, last paragraph: "The said cancelling type or die can be easily repaired by a new one, whenever desired, and at very little expense; and such cancelling die or type, G, may extend upward to the cross-bar B, and there be connected to the same by means of a screw, pin, or small bolt. In such case there would not be any tube or pipe surrounding said cancelling die or type, G. The oper'tion and effect produced would in such case of construction be the same"; and on the 40th page, first paragraph, I quote: "The said postage-stamp cancelling device, die, or type, G, may be of any desired distance from the aforesaid post-marking or dating device, or stamp, D, or it may be securely fastened to the immediate side
164 of the said post-marking and dating part or stamp, or device D, by any convenient and suitable mechanical means." The said cancelling die, type, or device, G, I prefer to use made of cork, as it would hold a much greater quantity of cancelling ink upon and in the lower face thereof, and when it comes in contact with the printed surface of the postage-stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with said cancelling ink, whereby such postage-stamp so operated upon," and, &c., &c. I further quote the last paragraph on the 40th page as above: "I also construct my said postage-stamp cancelling device, die, or type, of cast-iron, steel, or any suitable metal substantially as shown at G, Figs. 5 and 6, and which may be secured to the cross-bar or piece, B, in like manner as the said tube, or cylinder, C, Figs. 2 and 4, and which is done either by screw and nut, where the same unite with the said cross-bar, or it may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece, B, or otherwise attached thereto," and &c., &c. In explanation of my view in regard to the part or parts inquired about, I still further quote from the same specification of complainant's patent, as found on the 42d page of the amended bill, commencing at the 2d paragraph: "The cross-bar to piece B, Figs. 1, 2. 3, and 5, may be of any suitable width or thickness, or any material which will answer the required purpose. It may also be of any length deemed best to use, in order to get the said post-marking device, and the said postage cancelling device, die, or type, suitably arranged upon the lower surface of the same, and thereto firmly and securely fastened or attached in the manner substantially as aforesaid." Now, I understand that the inventor intended to and did clearly instruct the public to make his invention in any of the ways suggested

or described as regards the face or die, or stamping part, which, to the manufacturers or users should seem preferable, and he did not
165 intend to confine himself exclusively or at all to the particular form or forms illustrated in his drawings, but to inform the maker or user instead that they could have the instrument in any form, or any size or shape in the separate parts, and that if they did combine or use or vend an instrument with a handle, having a cross-bar on the lower side, of which was secured a die combining a post-ma'ker and postage-stamp canceller that was his invention; and that that part below the cross-bar, carrying the acting surfaces and performing the work was the die, stamp, or the acting part for receiving and imparting ink to the envelope packet and postage-stamp, for the purpose of giving post-office and date and cancelling the postage-stamp effectually at one blow, stroke, or operation, the cancelling face always to be struck upon the postage-stamp for the purpose of cancellation.

X Q. 38. Can you not answer my questions without going so much at large into side matters?

A. The fact is it seemed to me that I had not made myself distinctly understood, and my anxiety to make my meaning and understanding clear led me into the quotations and explanations I have given. I did not, and do not suppose, that I was going into side matters any further than was necessary, as the post-marker and stamp-canceller are side matters, side by side, fixed together, and secured together on the under side to the bar B. I will try to answer any question in as few words as possible and make myself understood.

(Counsel for defendant objects to the answer to the question 37 as being irresponsive to the question.)

X Q. 39. It seems to me that question 37 can be answered by yes or no; accordingly, I put it to you again (Question 37 read).

A. Yes; in view of my understanding, as above shown.

X Q. 40. Can you not answer question 37 without any limitation?

A. Yes.

X Q. 41. Please do so. (Question 37 read.)

A. No.

166 X Q. 42. What other elements besides post marker and canceller do you take to make up the die, using the term die in the sense specified in question 34, and using the term elements in the sense specified in question 35?

A. I do not consider the combined faces as two elements, but as one element, and I think I have fully explained that; I refer to the die with its face as an element of the invention, and given my reasons for that. Counsel seems to insist on a separation of the face into separate parts, which I do not regard as the correct way of looking upon it, for it is manifest that the die and the face of the die, treated as a whole, for the purpose of imparting certain and definite results which are post mark and cancellation postage stamp. Now, if it was thought desirable by the counsel to divide these faces, not into two elements, but parts, calling each configuration an element, each type, each line, or bar, he might do so, and I might be called upon to answer whether this or that or the other modification or change was a new one or different element, when it is clear enough that the face or die of the instrument is one, and any modification does not alter or change it, so long as any post-office mark, or date, and any configuration of postage stamps cancellation is the thing, and the die or the face of it is one element of the combination, properly speaking.

X Q. 43. Without any reference to the sense in which you prefer to

use the word "element," I ask you whether you cannot regard Exhibit U, looking at it as one solid thing, as made up of the following elements, to wit: 1st. Handle, or all that part of Exhibit U which is above the plane of the upper surface of the cross-bar, as Exhibit U, rests upright upon the table. 2d. Canceller, or that portion of Exhibit U which is designed solely for the cancellation of the postage stamp, and which is beneath the plane of the lower surface of the cross-bar in Exhibit U, as Exhibit U stands upright on the table. 3d. Post marker, or that portion of Exhibit U which is designed solely for the postmarking of the envelope, and which is beneath the plane of the lower surface of the cross-bar in Exhibit U, stands upright on the table. 4th. Cross-
167 bar, or all the rest of the matter, or substance, or substances of which Exhibit U is composed.

A. Yes.

X Q. 44. Regarding Ex. U as made up of the four elements specified in the preceding question, how many of these elements and which do you take to make up the die in Ex. U, using the term die in the sense specified in Q. 34? (Q. 34 read.)

A. All that is connected to the under side of the cross-bar.

X Q. 45. Do you mean that if the die in the sense inquired about consists only of the post marker and canceller?

A. Yes.

X Q. 46. When Q. 37 was asked you, did you understand in your answer that the four elements specified in Q. 37 were used in the same sense severally as you understood them in your answer to Q. 45? (Q's 37 and 45 read.)

A. I think so.

X Q. 47. Have you any doubt of it?

A. I don't realize any difference of understanding, only that I was called upon, two or three q's back, to state whether I could not regard the post marker as one element, the cancellar as another element, and the bar as another, and the handle as another, or substantially that question to which I answered yes, and in view of that I answered the subsequent question, and I confess I am unable to see any difference in my opinion regarding the different elements.

X Q. 48. I am afraid that you did not understand Q. 46; I now ask it again. Where Q. 37 was asked you, did you understand in your answer that the four elements specified copied in Q. 37 were used in Q. 37 in the same sense severally as you understood them in your answer to Q. 45, to be used in Q. 45? (Q's 37 and 45 read.)

A. Yes.

X Q. 49. You have no doubt of it?

168 A. No; and I gave the explanation there that my understanding may be fully imparted, and now call attention to it again in this connection.

X Q. 50. Is what you refer to your answer to Q. 37?

A. Yes.

X Q. 51. Does your answer to 37 give you any doubt of the correctness of your answer to Q. 48?

A. No; I have not read the two questions and answers in connection, and I don't care to. The answer to question 37 is fully correct, I think. In regard to giving me any doubt to the correctness of my answer to the 48th question, I am not aware of its having that special effect on my mind, and perhaps I did not fully understand question 48. If there is any inconsistency in the two answers, I will thank the counsel to question me in regard to such inconsistencies, or point them out to me.

X Q. 52. My question does not relate to whether you fully understood question 48, but to whether, with your understanding of it, the elements there specified were there used in the same sense in which you understood them to be used in question 37. With that explanation, I ask you again whether your answer to question 37 raises any doubt in your mind as to whether your answer to question 48 is correct?

A. I confess to have been influenced by an earnest desire during the last few questions and answers, including the one now referred to, to let my mind run in the same line of viewing, or regarding the elements of the invention or parts being inquired about, that the counsel's mind seemed to be running in, and to put my answers in such words, as far as consistent with truth and fairness, as would conform them to his apparently restricted view or views, which seemed to be somewhat different from my own in regard to the limitations of the elements and the combination in question, and now I wish again to repeat that I am not aware of any doubt about the correctness of the answer referred to question 48, and if there is any inconsistency between that and my answer to question 37, my answer to question 37 is my correct answer.

Adjourned to Saturday, Dec. 15, 1877, at 11 a. m.

169 NEW YORK, *Dec. 15th*, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 52*. In your answer to Q. 41, you virtually said that you did not mean that the die in the sense of the representation of the combined faces did consist only of post marker and canceller. In your answer to Q. 45 you stated that you meant that the die in the sense inquired about did consist only of the post marker and canceller. How do you reconcile these two answers?

A. The question first referred to in the present question inquires if the post marker and canceller were two elements, and I said no, because I had treated them in my answers as one element; with this understanding, I think any want of consistency between the answers will be reconciled. And in another answer, I remember having stated that I could treat them as two elements if desired, and repeat that now. It is only a question of choice of manner of speaking of the face or acting part with sufficient metal or strength lying back of the acting face which is secured to the cross-bar of the instrument.

X Q. 53. Did not you state, in your answer to Q. 48, that you understood in your answer to Q. 37 that the four elements specified in Q. 37 were used in Q. 37 in the same sense severally as you understood them in your answer to Q. 45, to be used in Q. 45, the precise definition of those in the sense in which I wished you to use them, having been stated in Q. 43?

A. I confess that the calling of the Q's by numbers, and referring back to them in the same manner counsel seems to persist in referring to them, tends somewhat to confuse my recollection of just what view I was taking at the time of answering in brief or categorically, and with a desire to treat the post marker and the postage-stamp canceller in language acceptable to the counsel, and whatever apparant discrepancy, if any, there ex-
170 ists either in the record of my answers or the counsel's mind in *the* these confusing questions, I do not think there can possibly be any misunderstanding of what my judgment and view is in regard to the parts, or elements, or combination of the device in question, as specified

in Complainant's Patent Exhibit K; and I now request the counsel, if he desires to get my view in regard to any part or portion, or combination of parts or portions without mixing together a number of my previous answers to his questions, about which we have this morning found that he and myself were more or less confused, at least so far as the numbers were concerned, and I wish to put on the record this further fact that I have not any doubt about my clear and correct understanding of what this invention is, according to the specification, and at the same time I am satisfied the counsel may be able by referring to a half dozen questions and answers, more or less, by number, to frame questions that may confuse me.

X Q. 54. Do you mean that you have been confused by the references to questions by their numbers?

A. I mean that we were both in error, to say the least, both in questions and in the answers, supposing that we were referring to a different question than what the number indicates.

X Q. 55. You refer, do you not, to certain changes made in the numbers stated in the questions and answers of yesterday's testimony, which changes were made this morning before you began to testify?

A. Yes.

X Q. 56. Did you not then agree that when, for instance, the No. 35 was changed to the No. 37, that you had, with me, supposed that it was really Q. 37, and not Q. 35, which was referred to?

A. Yes, and that is the reason why I don't like this kind of reference, finding that we both made a mistake we may again.

X Q. 57. Was it not rather dark in the room yesterday after-
171 noon when the questions in which corrections as to numbers have been made, so that a mistake as to a number might easily be made?

A. No; it was not so bright as it is this morning; but there was light enough to see very well all the while.

X Q. 58. It was towards evening, was it not, late in the afternoon, when most of the questions in which corrections have been made were asked?

A. Yes; it was in the evening, some of the last of them, but we had good gas light.

X Q. 59. From a chandelier some ten feet from the table, was it?

A. Yes; the light falling immediately across the counsel's right shoulder, who sat much nearer the light than the examiner or myself, and the window at the counsel's left, with glass four or five feet by fourteen or fifteen feet, I should think.

X Q. 60. Though there was a mistake as to numbers, there was no mistake, was there, as to the questions and answers that were really meant?

A. I didn't think there was at the time. I don't think there is now. Still, having made a mistrke once in that particular, I see a liability to err; therefore, I am not positive.

X Q. 61. You have taken all the time that you desire to answer all the questions that have been put to you, have you not?

A. Yes; but have not always qualified my answers as fully as I should have done had not the counsel seemed specially anxious to have categorical answers in several cases.

X Q. 62. Have not preceding questions and answers been read to you whenever you asked them to be read?

A. I think so; particularly when I required it.

X Q. 63. Do you not remember that I frequently suggested that you had better refer back to the questions and answers?

A. You have several times.

X Q. 64. Do you wish to add anything to your answer to Q. 52? (Q. 52 and answer read.)

172 A. If there is any apparent or real discrepancy, I would refer to my answer to the 37th interrogatory as expressing my views most fully.

X Q. 65. Is that all that you wish to add?

A. I think so.

X Q. 66. Look at Exhibit U, and state whether the die, in the sense of the representation of the combined faces, consists only of post-marker and canceller, using those terms in the senses that I have indicated.

A. The die in Exhibit U is the combined faces attached to the cross-bar. I mean the post-marker and canceller as an element combined with each other and secured to the underside of the cross-bar.

X Q. 67. Is the cross-bar a part of the die, using the term die in the sense of the representation of the combined faces, and the term cross-bar in the sense indicated in Q. 43?

(Q. 43 read).

A. No.

X Q. 68. Do you mean that the thing which connects the post-marker and canceller—which combines them—is not a part of the die, using that term as a representation of the combined faces.

A. It may be or may not be; we have spoken of it all the way through as a cross-bar and separate element, so it is spoken of in the patent—Complainant's Exhibit K. It is the piece or part, or element, carrying or sustaining the die, stamp, or acting faces, and also the handle. If the canceller and post-marker were made in one piece, or soldered together as suggested in the specification of the patent as found in the amended bill, page 41, second paragraph, it would not then require a cross-bar for the purposes of combination, as suggested in the question I quote, "The aforesaid metal cancelling device, die, or type G′, Figure 5 and 6, may also be fastened or secured to the immediate side of the said post-marking device by any good and sufficient means," &c.

(Counsel for defendant objects to all of the last answer except the first 4 or 5 words, "It may or may not be," as irresponsive, and re-
173 quests the witness to endeavor to thoroughly understand each question as it is asked, and to confine his answer strictly to that question, in order not to encumber the record with irresponsive matter, or with personal explanations, which, if necessary, can be brought out at the proper time by questions from complainant's counsel.)

X Q. 69. Look at Complainant's Exhibit B, and state what the die is in that exhibit, using the term die in the sense of a representation of the combined faces.

A. The part bearing or containing the face or faces, to wit, the post-marker and the postage-stamp canceller, which is connected by screw, by its projection and screw, to the circular bar or plate, which bar or plate has a downward projecting rim, with thread on the inner periphery of said rim, adapted so as to connect the combined faces to the bar or plate, by means of the threads, for securing the same together.

X Q. 70. You mean, do you, that the die is the lower part of Exhibit B, which screws into the cup, and which has the mark 40 on one side?

A. Yes, as one piece.

X Q. 71. How does the die in Exhibit U differ from the die in Exhibit B?

A. Simply in extent or distance of removal of the acting face or faces from the cross-bar and manner of connecting the same; the two cylindrical projections downward, from the bar or plate, have considerable length, and each is secured separately to the under side of the bar; the post-marker by a screw, and the postage-stamp canceller through the medium of a barrel or cylinder, with head and rivet, and possibly some solder; while in Exhibit B the die bearing or having the acting faces, is by a projection on the opposite side of the face, and of a circular form, which has a screw or thread, which connects with the bar by means of a downward projecting rim on the under side of the bar or plate of circular form, and having a thread on the inner periphery of the projection or rim, adapted to the projection on the back of
174 the acting faces of the die, and in the size and configuration of the acting faces, and also in the material of which the postage-stamp canceller is composed.

X Q. 72. Suppose the die in Exhibit B, and the die in Exhibit U, to be separated from the cross bar, you will have then two pieces in your hand in the case of Exhibit U, and only one in the case of Exhibit B; is this difference between the two dies substantial or material?

A. I think not, in view of the limitations of the specifications of the patent in suit, complainant's Exhibit K; certainly not as the modifications clearly indicate, as may be seen in my last quotation from the patent.

X Q. 73. You mean, do you not, that the die in Exhibit U is, as a whole and in its parts, the mechanical equivalent of the die in Exhibit B, considered as a whole and in its parts?

A. Certainly or vice versa, in view of the limitations stated in my last answer.

X Q. 74. Do you not mean that the two are mechanical equivalents of each other, without any limitation, as an abstract question in practical mechanics?

A. No; that is to say, had the two, the post marker and the canceller, of Exhibit U, never been combined through having an existence as separate instruments and used separately, and only separately, and some one had never put them together so as to be used successfully, then they could not be considered an equivalent for the combined faces as had or found in Exhibit U or Exhibit B.

X Q. 75. But when the post-marker and canceller are combined, as they are in Exhibit U, they are practically mechanical equivalent to the die in Exhibit B, are they?

A. Certainly, and vice versa, in view of the construction as set out and claimed in the patent, Complainant's Exhibit K.

X Q. 76. (75 in original). Wouldn't you say that the two were mechanical equivalents of each other, if you had never seen the patent Exhibit K?

175 A. Were they put together as I have contemplated in my last answer, or constructed capable of use for such combination, and only to be used in such combination, then I would say yes.

X Q. 77. (76 in orig). Considering the post-marker by itself, would you consider it, as it is represented in Exhibit U, a mechanical equivalent for the post-marker in Exhibit B, if you had never examined the patent at all?

A. If you exclude the postage-stamp canceller of Exhibit B, then I would, not otherwise.

X Q. 78. (77). And so of the canceller as represented in Exhibit U?

A. Yes; excluding the post-marker in Exhibit B.

X Q 79. (78). And so of the cross bar in Exhibit U, with reference to what corresponds to it in Exhibit B, and not considering the patent at all?

A. Yes; that is to say, the bar would be a mechanical equivalent in either case, it being for the purpose of connecting the handle and the die, or acting face or faces of a post-marker and a postage-stamp canceller.

X Q. 80. (79). Do you mean that exactly?

A. I understand you to ask me, irrespective of the patent, had I presented to me a handle secured on to a cross bar or plate like the handle and bar and plate in Exhibit U and B, and adapted for the reception and securing to the under side of the bar or plate a die or dies, face or faces, stamp or stamps, to be secured thereto, and operated thereby at one operation, would then the bars or plates be mechanical equivalents of each other; I answer yes, irrespective of the patent.

X Q. 81. (80). What, in Exhibit B, corresponds to the cross bar in Exhibit U?

A. The part to which the handle is secured on one side, and the die marker and canceller on the other.

X Q. 82. (81). Is that the means by which the post-marker and canceller are connected together in Exhibit B?

A. No; they are made in one piece, and connected to the bar by means of a screw and nut, or the inner or outer threads found on the die proper, and the downwards projecting rim of the bar proper.

176 X Q. 83. (82). Would Exhibit B be substantially changed if the cross bar or plate were not used at all, but the handle was screwed directly to the die proper, except, perhaps, in point of strength?

A. It might be modified, I think, in the way suggested, without anything more than mechanical change by running a spindle up through the handle, or by uniting it by pin and thread, screwed into the handle. Or by cutting the die through in the centre, at a line between the post-marker and canceller it might be modified, and still nothing more than a mechanical change take place; but if the question is meant to call forth my answer or view as whether in such case as first supposed in my answer, whether there then would exist any bar, my answer would be there certainly would, in whatever united firmly the acting face or faces, and afforded additional strength and firmness for retaining and operating successfully the post-marker and canceller by means of the handle.

X Q. 84. (83). In case of such changes as you first supposed, the instrument so changed would still be the mechanical equivalent of Exhibit B and Exhibit W, wouldn't it?

A. Yes.

X Q. 85. (84). Look at complainant's Exhibit A, and state whether, as a whole, you would regard it as a mechanical equivalent of Exhibits B and U, and of Exhibit W, and of Exhibit V, if you had never considered the patent at all?

A. Yes, as a device or instrument.

X Q. 86. (85). And you would consider the cancellers and the post-markers and the cross bars respectively, in each, as they are constructed, and as they lie before you, the mechanical equivalents of the same parts in all the other instruments.

A. Yes. I do not wish to be understood, however, as answering other than broadly, for it is evident that had the introduction of these devices

come into use one after the other, there would have been an advance from A to W; in some of the details of construction, nevertheless,
177 as a combined post-marker and postage-stamp canceller, they could not be considered other than mechanical equivalents, and the different parts, to wit, the handle in each instrument, is equivalent to the handle in the others. The bar connecting the handle to the die, stamp, or marker and canceller, to the handle in each case, would be an equivalent to the bar in the other instruments, and the postage stamp canceller, with the post-office marker, would constitute an equivalent stamp or die, secured to the under side of the bar, which would be an equivalent to each of the others. This answer is given irrespective of the patent.

X Q. 87. (86). You don't notice any difference, do you, between any two of these instruments, other than a mechanical change or difference?

A. I wouldn't like to say that irrespective of the patent. But in view of the specifications, and claims, and modifications, described in the patent, complainant's Exhibit K, I say, no; there is no difference.

X Q. 88. (87). Please point out any difference which you would regard as substantial and not mechanical, if you had never considered complainant's patent at all.

A. Starting with Exhibit A, which we will suppose was the state of the art at a given time, with the construction there shown, plain and simple, if one had introduced a rim, barrel or tube, for enclosing the India rubber canceller, for the first time ever known, I would say he had made a substantial difference of construction, and a patentable invention, or he would have done something in a new way. Second, if cork had never been used for cancelling, and there was no patent covering an analogous or like material to rubber, and another should come and introduce cork, or wood, endwise, or some yielding substance, not including rubber, that would operate successfully, and introduce that for the first time, for the purpose of postage-stamp cancelling, or like uses, I would say he had found out a new way of doing a thing, if not a new application of material, and made a substantial advance. Again, if another, later, should appear with constructions like B and V, and metal faces had never been before used for postage stamp cancelling or
178 like purposes, or described for the same, and he was the first that made such construction and combination of such material, and the same had never been before known or used, and the previous constructers had made no pretensions of such being capable of being used, I would then say he had done a thing in a new way, and the difference was substantial. But if the man who contrived, and introduced, and patented Exhibit A, as a contrivance, construction, or a thing to cancel the postage stamps or franks on letters, packets or mail matter, had informed the public how to do that and at the same time put on the envelope the post-office mark, and date in combination therewith, and also stated that he contemplated modifications of his construction, and illustrated and described the same, embracing all of the previous suppositious cases, and even many more that might be made, and at the same time inform the public that all these were only the different mechanical changes and modifications of construction whereby and wherein he embodied and proposed to produce and give to the public the benefits of his ingenuity and skill, then I would say, in view of such a specification, or revelation, and description, these changes were only mechanical as regards the invention, and not only mechanical changes for carrying out the invention, but such as were described clearly and distinctly, and could not be regarded other than mechanical, or colorable changes, thereafter. This answer is given

in view of the illustrations, description, and claims such as I clearly find in the patent, Complainant's Exhibit K; yet the truth would remain the same, without any reference to the patent referred to here, had the inventor of the device or Exhibit A made such a description public; that is to say, the modifications found in the different exhibits inquired about would only be formal, colorable, or mechanical, and not substantial or material.

Adjourned to Monday, December 17, 1877, at 1 p. m.

179 NEW YORK, *December* 17, 1877—1 o'clock p. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

(Counsel for defendant objects to the last answer as irresponsive.)

X Q. 89. (88). As Exhibits A, B, U, V, and W stand on the table before you, take any two of them, and point out a single difference between those two which you would regard as substantial, and not merely mechanical, if you had never known anything about the complainant's patent. I wish you to base your answer on your general mechanical knowledge only.

A. It seems to me that I have done that clearly in my last answer; I don't think I could do it better. As a device for post-marking letters and cancelling postage stamps at one operation, each of the exhibits are the same; they are all operated by means of a handle, the same; each has the handle secured to a cross-bar or plate, which carries the die or stamp for both cancelling postage stamps and post-marking alike. The different shapes, and forms, and sizes, are certainly only mechanical modifications. The matter of size, breadth, thickness *or* and depth of the die proper are not material so long as the purpose or object of the instrument remain the same, the relation of parts and their combination remain the same, the mode of operation and the result remain the same, all of which conditions are entirely fulfilled in each of the instruments or exhibits referred to in the question.

X Q. 90. (89). Suppose you knew nothing of complainant's patent, and were to go into the New York City post-office, and should see Exhibits A and U in operation, and should examine them, would you from your general mechanical knowledge say that there was any substantial, and not merely mechanical, difference between them?

180 A. I would say that Exhibit U, having a tube with cork, was the better of the two, but the matter of substantial difference I should be unable to see farther than I have before expressed and explained in my answer to Q. 87.

X Q. 91. (90). You mean that a canceller consisting of a brass tube and cork is substantially different from a canceller consisting of rubber, all the rest of the instrument remaining the same?

A. I mean that the tube is a good thing to have either for cork or rubber, in my opinion; particularly where the rubber is so long and broad as in Exhibit A. The tube encircling the elastic canceller would tend to preserve it and add to its durability, though I think there is no substantial difference in the two instruments, when considered broadly, as instruments for cancelling the postage stamp and applying the Post-office mark at one and the same operation.

X Q. 92. (91). Suppose you don't consider them broadly, does that make any difference in your opinion?

A. I refer you again to my answer to Q. 87.

come into use one after the other, there would have been an advance from A to W; in some of the details of construction, nevertheless,
177 as a combined post-marker and postage-stamp canceller, they could not be considered other than mechanical equivalents, and the different parts, to wit, the handle in each instrument, is equivalent to the handle in the others. The bar connecting the handle to the die, stamp, or marker and canceller, to the handle in each case, would be an equivalent to the bar in the other instruments, and the postage stamp canceller, with the post-office marker, would constitute an equivalent stamp or die, secured to the under side of the bar, which would be an equivalent to each of the others. This answer is given irrespective of the patent.

X Q. 87. (86). You don't notice any difference, do you, between any two of these instruments, other than a mechanical change or difference?

A. I wouldn't like to say that irrespective of the patent. But in view of the specifications, and claims, and modifications, described in the patent, complainant's Exhibit K, I say, no; there is no difference.

X Q. 88. (87). Please point out any difference which you would regard as substantial and not mechanical, if you had never considered complainant's patent at all.

A. Starting with Exhibit A, which we will suppose was the state of the art at a given time, with the construction there shown, plain and simple, if one had introduced a rim, barrel or tube, for enclosing the India rubber canceller, for the first time ever known, I would say he had made a substantial difference of construction, and a patentable invention, or he would have done something in a new way. Second, if cork had never been used for cancelling, and there was no patent covering an analogous or like material to rubber, and another should come and introduce cork, or wood, endwise, or some yielding substance, not including rubber, that would operate successfully, and introduce that for the first time, for the purpose of postage-stamp cancelling, or like uses, I would say he had found out a new way of doing a thing, if not a new application of material, and made a substantial advance. Again, if another, later, should appear with constructions like B and V, and metal faces had never been before used for postage stamp cancelling or
178 like purposes, or described for the same, and he was the first that made such construction and combination of such material, and the same had never been before known or used, and the previous constructers had made no pretensions of such being capable of being used, I would then say he had done a thing in a new way, and the difference was substantial. But if the man who contrived, and introduced, and patented Exhibit A, as a contrivance, construction, or a thing to cancel the postage stamps or franks on letters, packets or mail matter, had informed the public how to do that and at the same time put on the envelope the post-office mark, and date in combination therewith, and also stated that he contemplated modifications of his construction, and illustrated and described the same, embracing all of the previous suppositi'ous cases, and even many more that might be made, and at the same time inform the public that all these were only the different mechanical changes and modifications of construction whereby and wherein he embodied and proposed to produce and give to the public the benefits of his ingenuity and skill, then I would say, in view of such a specification, or revelation, and description, these changes were only mechanical as regards the invention, and not only mechanical changes for carrying out the invention, but such as were described clearly and distinctly, and could not be regarded other than mechanical, or colorable changes, thereafter. This answer is given

in view of the illustrations, description, and claims such as I clearly find in the patent, Complainant's Exhibit K; yet the truth would remain the same, without any reference to the patent referred to here, had the inventor of the device or Exhibit A made such a description public; that is to say, the modifications found in the different exhibits inquired about would only be formal, colorable, or mechanical, and not substantial or material.

Adjourned to Monday, December 17, 1877, at 1 p. m.

179 NEW YORK, *December* 17, 1877—1 o'clock p. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

(Counsel for defendant objects to the last answer as irresponsive.)

X Q. 89. (88). As Exhibits A, B, U, V, and W stand on the table before you, take any two of them, and point out a single difference between those two which you would regard as substantial, and not merely mechanical, if you had never known anything about the complainant's patent. I wish you to base your answer on your general mechanical knowledge only.

A. It seems to me that I have done that clearly in my last answer; I don't think I could do it better. As a device for post-marking letters and cancelling postage stamps at one operation, each of the exhibits are the same; they are all operated by means of a handle, the same; each has the handle secured to a cross-bar or plate, which carries the die or stamp for both cancelling postage stamps and post-marking alike. The different shapes, and forms, and sizes, are certainly only mechanical modifications. The matter of size, breadth, thickness *or* and depth of the die proper are not material so long as the purpose or object of the instrument remain the same, the relation of parts and their combination remain the same, the mode of operation and the result remain the same, all of which conditions are entirely fulfilled in each of the instruments or exhibits referred to in the question.

X Q. 90. (89). Suppose you knew nothing of complainant's patent, and were to go into the New York City post-office, and should see Exhibits A and U in operation, and should examine them, would you from your general mechanical knowledge say that there was any substantial, and not merely mechanical, difference between them?

180 A. I would say that Exhibit U, having a tube with cork, was the better of the two, but the matter of substantial difference I should be unable to see farther than I have before expressed and explained in my answer to Q. 87.

X Q. 91. (90). You mean that a canceller consisting of a brass tube and cork is substantially different from a canceller consisting of rubber, all the rest of the instrument remaining the same?

A. I mean that the tube is a good thing to have either for cork or rubber, in my opinion; particularly where the rubber is so long and broad as in Exhibit A. The tube encircling the elastic canceller would tend to preserve it and add to its durability, though I think there is no substantial difference in the two instruments, when considered broadly, as instruments for cancelling the postage stamp and applying the Post-office mark at one and the same operation.

X Q. 92. (91). Suppose you don't consider them broadly, does that make any difference in your opinion?

A. I refer you again to my answer to Q. 87.

X Q. 93. (92). Do you think my last question can be answered by yes or no?

A. No, nor any other way better than it has been.

X Q. 94. (93). What is the difficulty in answering Q. 91 by yes or no?

A. I have to consider the Exhibit A and U, either broadly or with reference to the exact construction, and when considering them as exact constructions (I mean identical in all their parts), and supposing, if you please, them to be instruments for the same purpose, yet produced at different times or by different makers, neither of which set up any claim or pretension to being the first to make or invent an instrument with the combination, of post-office marker and postage stamp-canceller in combination that having been done, and well known in some manner prior to the production of either of the exhibits, then the question is narrowed down to simply the mechanical construction and combination of the two instruments as mechanical constructions and combinations.

181 In that narrow view, I understand your question now to ask me whether there is anything more than a mechanical difference, in which case I say, as I have said before, I think there would be found what might be considered, in a narrow view, a substantial difference, but that only when considering Exhibit U as an advanced or improved construction over A, for the same purpose.

X Q. 95. (94). Suppose you went into the post-office as already indicated, and saw Exhibit U and A in operation, and did not know when either of them was first made, or by whom it was first made, or which preceded the other, would you say that there was a substantial difference between them?

A. In the narrow view above referred to I should, but I will modify my previous answer this far. As after all, being in doubt whether one might be considered better than the other, in view of the fact that the post-office canceler in A might be made of harder rubber, and the die altogether made shorter, so that it would be difficult for me to state, even then, in this narrow view that I am trying to take of the two exhibits, whether there would be any substantial difference, I am inclined to think there would not.

X Q. 96. (95). I understand you to mean that considering Exhibits A and U as they are before you, with the limitations that I have indicated in my previous questions, that the canceler in Exhibit A is substantially different from the canceler in Exhibit U. Do I understand you correctly?

A. Yes, if you take into consideration my reason, for the fact is, I think, that the canceler in Exhibit A is a used up part of the instrument, as it is before me, and substantially worthless and impracticable, having been virtually worn out, or at least so much so as to be capable of giving no definite type or configuration of cancellation; but supposing that it is still capable of use for practical purposes, then no rather than yes, to your question. And supposing it to be fresh and new, and of rubber sufficiently hard to be practical, the question comes down to this, is such a rubber postage-stamp cancelling part sub-

182 stantially the same as a thimble or tube, containing cork, for the postage-stamp cancelling device; substantially the same, or different, in any view irrespective of any state of the art? If I am correct in my understanding of your question, as above explained, and without any reference to anything else, I am inclined to think that one would be fairly considered a mechanical equivalent for the other.

X Q 97 (96). Can you mention any other practical mechanical case in

which a band or tube is used to protect the softer material, in order to protect the softer material from spreading or quickly wearing out?

A. I don't think of any now.

X Q. 98 (97). Look at Exhibits A and U, without consid*sid*ering the cancelers at all. Is there any other difference between them, but merely mechanical difference?

A. No.

X Q. 99 (98). Look at Exhibit U and V, and say whether under the limitations of my preceding questions there is any difference other than a merely mechanical one between them?

A. I think not; I simply state as I have stated before, that one would be suggestive of the other, and therefore the difference would be mechanical; and although I have stated in my answer to X Q. 87, that under some circumstances, the changes in view of the different material employed, as there explained, might be considered substantial, yet the substitution of the metal acting surface in place of the cork, for imprinting with ink, might in some limited sense be considered substantially different, although on a closer examination, and more careful thought, I believe they can be considered only mechanical equivalents, as presented in the question now being answered.

X Q. 100 (99). Look at Exhibits V and A, and state how it would be in the case of these two under the limitations indicated in my preceding questions, and irrespective of the canceller in Exhibit A being so much worn?

A. The canceller in Exhibit V has a face of metal, of elliptical form, having bars and letters on the face, which seem to me to be only
183 formal modifications, and the substitution of a harder material, which really is only a mechanical change or modification of Exhibit A. It now occurs to me that it is common among mechanics to employ rings or rims of metal around mallets, chisel handles, old-fashioned beetles for driving wedges, and around the top of spiles, and for many other purposes to prevent bruising or splitting, consequent upon frequent strokes or blows, as also it is common among mechanics to use wood of different degrees of hardness, or knots for mallets, or lignum-vitæ, or metal; therefore I am still further confirmed by closer examination, and by further reflection, that the modification or change in the Post Office cancelling device is purely mechanical, and not substantial or material.

X Q. 101 (100). Do you mean what you last stated in the last part of your answer to apply to Exhibit U and A, irrespective of complainant's patent, and irrespective of the time when and by whom each was made?

A. Yes.

Adjourned to Wednesday, Dec. 19th, 1877, at 1 p. m.

NEW YORK, *December 19th*, 1877—1 o'clock p. m.

Pursuant to adjournment.

Present, counsel as before,

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 102 (101). Look at Exhibit U and Exhibit W, and state whether under the limitations indicated in my previous questions, you see any difference other than merely mechanical between them?

A. The postage-stamp canceller in Exhibit W is of rubber, and of different configuration on its face, as well as of elliptical form, and stuck fast to the bar or plate, whereas the postage-stamp canceller in Exhibit

W is of cork, as stated in my previous answers, and the plate or bar on which the post-office marker and the postage-stamp canceller, is of circular form in Exhibit W, instead of being an elongated bar, as
184 in Exhibit U. The metal employed in the post office marker, and the bar or plate is of brass in W, while the same is of iron or steel in Exhibit U. There are other slight or unimportant variations, all of which, with these specified, I regard as merely mechanical, referring you to my reasons repeatedly given in my previous answers.

X Q. 103 (102). Look at Exhibit A, Exhibit W, and Exhibit V, and Exhibit U, and state whether, under the limitations stated, you see other than mechanical differences between them?

A. I do not; referring you again, as in the last answer, to my previous answers and the reasons there given.

X Q. 104 (103). Compare Exhibit B with either Exhibit A, V, U or W, and state whether under the same limitations there is any difference other than mechanical, between Exhibit B and the other which you select?

A. These two Exhibits A and B are unquestionably *as* dissimilar as any of the 5 of complainant's exhibits, stamps, or device for the purposes specified. I therefore select these two for my answer. The Exhibit A has the post office marker, and the postage-stamp canceller connected to the under side of a bar which has a projecting pin on the opposite side of the bar under which the handle is secured. The post office marker seems to be soldered to the under side of the bar. The postage-stamp canceller is connected by a screw, passing through the bar and into it. In Exhibit B, I find the like handle secured on to a plate or bar of circular form, by means of a projecting pin or spindle, and I do not find any difference thus far, other than the circular form of the plate or bar; from the lower side of which, in Exhibit B, there projects downward a rim with a thread on the inner periphery of the same, instead of a plain flat surface as in Exhibit A. Now this cup like circular plate, in Exhibit B, performs the office of the bar in Exhibit A, and the fact of its form and thickness not being identical with the same part in Exhibit A, I regard as purely mechanical, or the fact that the die or the post office marker, and the postage-stamp canceller is
185 not connected thereto in identically the same way as in Exhibit A, I regard as nothing more than a mechanical change or modification. In Exhibit A the marker and canceller seem to adhere to each other, and are certainly in close relation, or juxtaposition. The same is true of the die in Exhibit B in a larger extent, and the face of the die bearing the post office marker and the postage-stamp canceller is made of one piece of metal, whereas in Exhibit A the post office marker is of metal, and the postage-stamp canceller is of rubber, which in view of the facts before stated, that it is common among mechanics, and has been for the past forty years to my knowledge, to substitute one material for another, in practice, where it is found to be better adapted to the use or purposes for which it was intended; and, therefore, substituting a harder material for the india-rubber, for the post office canceller, is certainly nothing more than a mechanical change, and as there is no special configuration of face, other than general circular form, of the postage-stamp canceller in Exhibit A, I cannot conceive of the difference of form and configuration on the face of the postage-stamp canceller, of Exhibit B, being anything more than formal or mechanical, particularly as the postage stamp in Exhibit A is so thoroughly worn that it is impossible to tell what configuration, if any, was originally made on its face, but I presume that there was some definite configuration, adapting it to satisfactory postage stamp cancelling, and which when

employed for the same purpose, and in the same way of bruising and inking, or stamping the post office mark, and the postage cancellation, on a letter, envelope, and postage stamp, printed the same thereon in a satisfactory manner, and the same has been used up in doing that work, so that I regard them as both substantially the same in combination, construction, operation and result. Now there is a difference in depth of material between the acting face or faces of the die (post office marker and postage-stamp canceller) and the under side of the cross-bar or plate, to which they are secured, which I do not regard as anything else than mechanical difference. The
186 dating type in the post office marker, Exhibit A, are set into the cavity there shown, and pressed and held in proper position by the small thumb screw, or screw bolt, running out at the side horizontally of Exhibit A, while the type for the same purpose are set in a cavity or space in the post office marker, of Exhibit B, and are held in place by the short bolt-like section, or part screwed up against the lower face of the bar or plate, the pressure being brought in a vertical direction instead of a horizontal direction, as in Exhibit A. This change I regard as only a change of direction and mechanical modification, of size and form, the type being provided with an overlaying lip or flange, on their inner end, so as to be firmly secured by the action of the screw, pressing the same between the upper face of the short screw bolt on the die and the inner or lower face of the cross-bar or plate. It will be observed that the type bearing the month abbreviation extends inwards towards the centre of the short circular bolt-like projection, on the back of the die, to within about a quarter of an inch of the centre, and the numerals giving the day of the month occupy the balance of the type space. Now it is manifest that were the sides of this section of the screw bolt or bolt-like projection, lying back of and above the acting faces, cut away, or reduced to an elongated diameter with circular ends of a breadth of $\frac{3}{4}$ of an inch, all the functions of this construction would be practically and successfully fulfilled, as well as they are in the entire circular form, and the change from the elongated to the circular form, or from the circular to the elongated form, can be considered as nothing more than formal or mechanical. And again, the employment of a screw as formal in Exhibit B, to press the flange of the type between two surfaces, or a tapered type in the same way for the purpose simply of holding them in position for putting the date in the postage office stamp, is a change can hardly be considered more than a mechanical change. Furthermore, the connecting of the die with the bar or circular plate, by vertical screw and nut, finds
187 its equivalent in the rubber (postage-stamp-canceller) and the screw hole in the cross-bar. So that I would say that the die in Exhibit A and the die in Exhibit B are composed of postage stamp canceller and post office marker (without reference to the date by removable type) of acting faces substantially alike, being part of material which are mechanical equivalents to each other for the purposes desired and of thickness in a vertical direction of mechanical difference, but sufficient in either case, and in both cases, to give the necessary strength for the required resistance, and both in part or wholly secured to the under side of a plate or bar, substantially alike and for the same purpose, though formally and mechanically different, and that as a device, Exhibit A and Exhibit B are mechanical equivalents for each other, having the same parts and elements in combination alike, each being for the same purpose, and in like combination operated in the same manner and producing the same result.

X Q. 105 (104). Look at Exhibit U, and say whether if the post-marker and cros'-bar were to be cast in one solid piece, that would be more than merely mechanical change?

A. That would be all.

X Q. 106 (105). Look at Exhibit U, and suppose that there were no cross-bar, and that the handle were screwed into the post marker and were directly above it, and that the canceller were soldered or bolted or otherwise firmly fixed to one side of the post-marker, would that be anything more than a mere mechanical change of Exhibit U?

A. If I understand your question, the post-marker would have a stem or spindle running up into the handle direct where in Exhibit U the cylindrical part thereof comes in contact with the cross-bar of that exhibit, and the postage stamp canceller would be fixed securely to the immediate side of such cylinder of the post-marker somewhat below where the same comes in contact with the handle. Now if I am correct in my understanding, it seems to me that I am asked whether or not such a connection of the postage stamp canceller and the post
188 office marker can be considered as a mechanical equivalent for the bar connection; to which I should say it certainly is that which firmly holds and secures together, and in combination, the post office marker and the postage stamp canceller, and the handle for operating the same would be the mechanical equivalent for the bar, and such part may be said to include material of strength sufficient to firmly and durably connect together the handle with any material lying back or above or between the acting or printing face or faces of the die and the handle; that is to say the acting face (of post office marker and postage stamp canceller) with material of strength sufficient to bear the printing blow required always being had. 2d. Material of strength sufficient to connect with the handle and to support and bear the strain requisite for carrying the acting or printing face or faces, before stated, and giving the blow, with the connecting material, which would be the bar or its mechanical equivalent running into the other two parts by some mechanical connection.

X Q. 107 (106). I understand you that the change would be merely mechanical; am I correct?

A. Yes.

X Q. 108 (107). You have used the term mechanical equivalent frequently in your testimony; what do you mean by it?

A. The thing or part that is for the same purpose used in the same way and produces the same result.

X Q. 109 (108). Do you mean as a general proposition that a device which is intended to accomplish the same purpose as another device, and which is used in the same way as the other, and when so used produces the same result, is a mechanical equivalent for that other?

A. Yes.

X Q. 110 (109). Don't you draw any distinction between a device well known and common among mechanics, and another which requires thought and skill and invention, though the two may be used for the same purpose, used in the same way, and accomplish the same result?

189 A. Show me the two devices and I will tell you whether I can make any distinction between them. My answer was correct as a general answer; if you have any special case of the character specified in the question, I should like to see it. However, on general principles I will say the substitution of mechanical equivalents does not require invention.

X Q. 111 (110). Looking at the cancellers in Exhibit U and V, to determine whether or not they are mechanically equivalent, do you ask yourself whether they are used merely and only for the same purpose, in the same way, and when used, whether they accomplish the same result?

A. No; I ask myself first for what they are used, next how they are combined in relation to the different elements or parts, how they are used or operated, and the result produced, and I have repeatedly during this cross examination gone through the detail of construction, and looked at the substitution of different material, and spoken of the difference of form or shape, lengths, breadths, thicknesses, &c., so that I might be clearly understood, and think I ought to be.

Adjourned to Thursday, Dec. 20th, 1877, at 1 o'clock p. m.

NEW YORK, *Dec. 20th*, 1877.—1 o'clock p. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 112 (109). Have you in the course of your examination used the term mechanical equivalents in the sense in which you defined it in yesterday's testimony, and only in that sense?

A. I think I have wherever I have spoken of the instrument as a whole, for the purpose of post-marking and cancelling the post-
190 age stamp on an envelope or packet at one operation; probably not when speaking of an isolated part or element.

X Q. 113 (110). Define the term mechanical equivalent as you have used it when speaking of an isolated element.

A. Generally in speaking of one thing in a combination which was there for a given purpose, the substitution of another thing formally or mechanically different, yet which thing was for the identical same purpose, and operated with the other parts or things connected therewith in nearly, though not exactly, yet substantially in the same manner and produced the same result. Such a thing would be a mechanical equivalent for the thing in the place of which it was substituted. For instance, in a machine for reducing and planing a board there should be placed a roller with spring bearings close to the upward cut of the knife, so that when the cylinder bearing the knife should revolve and cut in an upward direction this roller running across the board and revolving as the board was passed to the cutting knife, and being so placed near but in front of the cutting edge by the yielding pressure of its spring bearings, would adjust itself to various thicknesses of the unreduced or rough board, and notwithstanding such yielding pressure would bear sufficiently on the unreduced surface of the board to prevent the same from being lifted with the force of the cut. Now suppose I substitute a bar with spring bearings instead of the roller for the same purpose, in the same relations as to the other parts, the bar performing the same functions except the revolving, sliding instead of revolving, nevertheless this bar I would call a mechanical equivalent for the roller. I give this case because it is well known in the record of mechanical equivalents in the courts, and because it is as wide a distinction as is usually found. It will be found in several decisions in the United States courts—I think in the records of patent suits in which the owners of the Woodward patent planing machines were complainants.

191 X Q. 114 (111). Should you say that a spring is a mechanical equivalent for a weight?

A. Not broadly, yet it may be in some combinations.

X Q. 115 (112). Would you say that it was in all combinations where the sole object of either the spring or weight is to produce pressure?

A. No.

X Q. 116 (113). Mention a case in which it would not be.

A. I don't think of one this minute in which it would not be, though I presume there may be such cases.

X Q. 117 (114). Suppose that the function of a spring were not well known to mechanics, and some one by experiment and reflection should discover that function and substitute a spring for the purpose of producing pressure in a machine in which before that time a weight had been used for the same purpose, would he, in your opinion, be substituting a mechanical equivalent?

A. If you mean to ask if the first production of a spring would be an equivalent for a weight well known before, then I say no, for he certainly would have found out a new way of doing a thing.

X Q. 118 (115). In determining whether one thing which I will call A s a mechanical equivalent for another which I will call B, do you not ask yourself the question whether A is not so well known among average mechanics that such average mechanics can see without any very great reflection that A will do the same work and accomplish the same purpose as B?

A. I don't regard the amount of reflection that may be expended particularly, neither do I look at the average of mechanics as to what they may do or think, but I inquire whether one skilled in the art to which the manufacture and use of the thing or machine belongs, and my inquiry goes as to whether such a person, in view of the state of the art, would not be likely to modify or change the construction in the manner

192 represented by A instead of that represented by B, whether A is for the same purpose, operates in the same manner subtantially, and produces the same result as B. If these conditions can all be answered in the affirmative, then I say A and B are mechanical equivalents.

X Q. 119 (116). Do you mean producing identically the same result, or substantially the same result?

A. I mean producing a result not materially different.

X Q. 120 (117). I understood you to mean that if it would occur to a person skilled in the art that A could be put in the place of B, with substantially the same result, then A and B are mechanical equivalents. Am I correct?

A. Not exactly. I mean if it would be likely to occur to a person skilled in the art that A might be substituted as a mechanical change for B, A and B being for the same purpose, operating in the same way, and producing the same result, without materiality of change in either of these respects, then A and B would be mechanical equivalents.

X Q. 121 (118). If the substitution of A for B would occur to an average mechanic, though he were without any special skill in the art, would you say that the fact that A and B are mechanical equivalents would be likely to occur only to a person having special skill in the art?

A. All the conditions that I have stated in my last answer being the same, it would appear more clear, or certainly not less clear, on account of a common mechanic suggesting or making the substitution.

X Q. 122 (119). Suppose that the canceller in Exhibit V had the bars on its acting face changed, so that they would, by means of sharp edges

cut the postage-stamp a little in addition to inking it, would that be a merely mechanical change of Exhibit V?

A. I think that would make a substantial difference. That cutting a little might become very material, very detrimental, or very dam-
192 aging. Such a result is not contemplated or apparently desired, and I can readily conceive how it might be of so great damage as to make the instrument Exhibit V wholly impracticable and worthless. I would like to see, however, such a construction in its practical working; nevertheless, I give it as my opinion at present that that introduces a new purpose or result largely different from what is contemplated in the construction Exhibit V.

X Q. 123 (120). Suppose that an instrument in all respects like V, except that the edges of the bars on the acting face of the canceller were sharp and capable of cutting the postage-stamp a little, were in use, and suppose it was found that the sharp edges cut the envelope and the contents so that such an instrument could not safely be used, and suppose that the sharp edges on the acting face were filed away, would that be more than a merely mechanical change?

A. That would be a change that would certainly produce a different result; and if the instrument having the sharp edges could not be used because of the pernicious and destructive results of its use, and therefore had to be discarded, the person who changed it into a practical and useful instrument by never so slight a change, and with unequalled facility, and by the flash of a happy thought alone, I would regard such a person, nevertheless, if the first to accomplish by mechanical means or combination a valuable result, as having made a substantial difference.

(Answer objected to as irresponsive.)

X Q. 124 (121). Please answer my last question?

(Last cross-question read.)

A. Yes. In view of the fact that a wholly different result is obtained, and in view of the further fact that the implements, the sharp edges, are changed into flattened bars, or bars with broad faces, that will not cut are substituted in the place of cutting edges. I do not regard the facility with which a change is made, or the difficulty with which
194 a change is made, of very material consequence, so long as that by a change a good and practical result is obtained in the place of a bad and destructive result. The result being wholly different, and the means different, the law of equivalents does not hold in the case.

X Q. 125 (122). Do you call yourself an expert in patent law as well as in mechanics?

A. No, sir; I speak of the law or rule of mechanics as recognized in equivalents.

X Q. 126 (123). What do you mean by the law or rule of mechanics as recognized in equivalents?

A. That which I suppose everybody who is specially informed in regard to mechanical construction and combinations understood well, to wit: the facts that one thing when an equivalent for another thing, must first be for the same purpose, of substantially the same construction, and operate not materially different, and produce the same result.

X Q. 127 (124). Do you mean that the conditions mentioned in your last answer must be satisfied before, according to the law of mechanics, one thing can be a mechanical equivalent for another?

A. Yes.

X Q. 128 (125). I think you have stated that a spring may be a me.

chanical equivalent for a weight. Are the two of substantially the same construction?

A. No, not usually.

X Q. 129 (126). Then you do not mean that the conditions mentioned in your answer to X Q. 123, must be satisfied before one thing can be a mechanical equivalent for another? (Answer to X Q. 123 read.)

A. Yes, I do when I refer to an instrument, or a combination of parts.

X Q. 130 (127). Must all the conditions mentioned in your answer to X Q. 123 be satisfied before, according to the law of mechanics, one thing can be a mechanical equivalent for another?

A. Where the thing is an instrument, or machine having combined parts, I think so.

195 X Q. 131 (128). Confining yourself merely to a cancellation of the postage stamp, is not cancellation by cutting and inking substantially the same thing as by inking alone?

A. No.

X Q. 132 (129). What substantial difference is there, the only object in view being to so mark the stamp that it can't be used again?

A. Supposing that cutting the envelope, or cutting through the postage stamp, *and* &c., to be attended with no harm, still there would be a difference, and that difference would consist in a necessarily different construction to accomplish the cutting instead of an instrument to accomplish the imprinting of ink on the postage stamp by a bruising or printing blow. It seems to me very clear that there is a wide difference between cutting, or printing, or stamping, or impressing, or bruising. No one would think of employing the edge of an instrument made for cutting for the purpose of bruising, printing, or stamping.

X Q. 133 (130). Admitting that there must be a difference in construction, isn't the result substantially the same, the postage stamp in either case being perfectly cancelled?

A. I think in either case the postage stamp would be perfectly cancelled, but the result would not be the same. I am supposing now, that wherever there is an inking-bar in Exhibit V (which exhibit your questions have referred to), or acting surfaces of the canceller in that exhibit, or an instrument substantially like it, having a number of acting or inking surfaces, that such acting or inking surfaces were changed into sharp edges, I mean to say, that in such case the cancelling of the postage stamp would probably be effected by striking the edges on to it, whether there was ink or not on the edges. It has been customary for many years to pierce with point or points, or sharp edges, bills of exchange, notes, checks, *and* &c., on payment of the same, so indicating that they were cancelled. Now, if you in your question mean that the cancelling device supposed should be provided with the sharp edges, and that the same shall at their edges be slightly dipped in ink

196 to the extent of their extreme edges, I am not prepared to say that there would be by the blow a perfect ink cancellation, and yet there is no doubt that the edges referred to might be so dipped in ink as to impart sufficient of the same, in the operation of cutting the stamp, to leave enough ink to make an ink cancellation irrespective of the cutting, and yet there would be a very different means of cancellation, and a very different kind of cancellation, neither the means nor the result being substantially the same.

X Q. 134 (131). Suppose you were to regard the inking-bars in Exhibit V to remain as they are, and that in addition there should be along their edges a thin blade or knife edge projecting, say the fifteenth of an inch,

so that when the instrument was used the postage stamp would be cut and also marked by the broad faces of the inking-bars; would that construction be merely a mechanically different construction from what is seen in the canceller in Exhibit V?

A. No, that would be a materially different construction.

X Q. 135 (132). Would the change of removing the knife edges when it was found that they cut the envelope as well as the postage stamp be one that in your opinion would be likely to occur to an average mechanic?

A. It might or might not be. It would be more than merely a mechanical change in my opinion, because it would remove a pernicious part, and thereby produce a valuable instrument, which in its use would produce a very greatly improved result, materially different from what would be produced in the employment of the instrument with the sharp edges.

(Answer objected to as irresponsive to the question.)

X Q. 136 (133). Is it your opinion that such a change would occur to an average mechanic?

A. I am in doubt whether it would or not. Mechanics are very much like machines generally; they go in ruts and do what they are told to largely.

197 X Q. 137 (134). Do you think it would occur to any intelligent and skilled mechanic?

A. No, not as a mechanic.

X Q 138 (135). Would it in any other capacity?

A. As a genius or an inventor it might; if it had never been done or described before it would require invention.

X Q. 139 (136). What do you mean by if "it had never been done or described before;" what is "it?"

A. Taking away or removing from an instrument its purpose and construction, and capacity for cutting, and substituting therefor a construction that would not cut but bruise, receive and print ink instead on the postage stamp of an envelope.

X Q. 140 (137). I understand you to mean that in your opinion the removing of the knife edges would require invention. Am I correct?

A. No.

X Q. 141 (138). Do you mean that it would not require invention?

A. I understood you to suppose, in one of your previous questions, that knife edges were placed along or by the side of each of the ink printing bars of the postage canceler in Exhibit V, so that they might be readily moved. If I am right about that, it certainly would not require anything more than mechanical skill to remove them; but if I am to understand you now as supposing that they are firmly fixed, and have to be filed off as you suggested before, and so produce a different construction or device, then it would be something more than a mechanical change, and require invention.

X Q. 142 (139). In your opinion, would an instrument in which the knife edges were firmly embedded in the canceller be one substantially different from an instrument in which the knife edges were attached to the inking-bars in such a way that they could be readily removed?

A. It might or might not be. The fact of the blades or knife edges being fixed and not removable, or so connected as to be readily removable, so that any one could understand doing it, I refer to only

198 in a suggestive sense, and only in a view of a construction which was suggestive.

X Q. 133 (140). Confine your attention singly and only to the method

in which the knife edges are attached to the canceller, and state a case in which in your opinion a firm attachment would be materially different from another in which the knife blades are so attached as to be readily removable.

A. Suppose the blades to be cast into the postage cancelling device, standing out an eighth or a sixteenth of an inch more or less above the general face; then suppose another case where they are set in a space like that shown in the postage marker, and like the type are set in Exhibit V; I think that might be regarded as a substantial different way of setting knives or blades.

X Q. 144 (141). Would the difference be any greater than appears in the method of arranging the type in Exhibit B, as distinguished from the method in Exhibit V?

A. Yes.

X Q. 145 (142). Why do you think it would be greater?

A. Because the knives are not removable at all in a case I had supposed.

X Q. 146 (143). Look at Exhibit B, and suppose that the die were not removable at all, and that the post marking type were secured as they are in Exhibit V, would that be more than a mere mechanical change of Exhibit B?

A. No.

X Q. 147 (144). Why do you distinguish by this case of a firm attachment of the die, and a case where knife blades are firmly attached to the canceller, and say that in the one case the part of the removability of a part of an instrument is immaterial, and in another case that it is materia?

A. Because the means for producing the result and the result are changed in one case and not in the other by the removability.

X Q. 148 (145). How does the result differ in a case where the knife blades are firmly imbedded from a case where they are merely attached so as to be readily removed, as they are in the case you supposed,
199 where they are held in a receptacle by means of a screw as the post marking type are in Exhibit B?

A. When you remove the knives by simply turning the little thumb screw or pressure bolt, you have a different instrument from what you have with them cast in, or if you remove them by cutting them away you do it in a different way then by simply turning the thumb screw.

X Q. 149 (146). I understand you to say that these differences are material?

A. Yes.

Adjourned to Dec. 21st, at 11 o'clock.

NEW YORK, *Dec. 21st*, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 150 (147). I understand you have testified substan*stan*tially that an instrument in which the knife edges are firmly embedded in the canceller is not a mechanical equivalent for an instrument in which the knife edges are held in their place by a set screw as the post-marking type are in Exhibit V. Am I right?

A. I think not.

X Q. 151 (148). Do you mean that the two are mechanical equivalents?

A. Both being intended for the same purpose, being substantially alike in construction with only one modification suggested, and operated the same way, and producing the same result, I do not think the fact of the knives or blades being readily removable would make a material difference between the two instruments.

X Q. 152 (149). Well, are they or are they not the mechanical equivalents in your opinion?

A. I think they are as instruments.

200 X Q. 153 (150). I understand you to have testified substantially that when the knife edges are readily removable, as they would be when held in place by a set screw, that the idea of removing them when it was found that their cutting was injurious, and of using the inking-bars alone to cancel the postage-stamp instead of the inking-bars in connection with the knife edges, is an idea that would naturally suggest itself to a person possessing mechanical skill. Am I right?

A. I think not. I would like to have you show me the answer from which you can fairly draw such an understanding.

X Q. 154 (151). Please point out in what respect my understanding is incorrect?

A. In your assuming that I have said what I think I have not said.

X Q. 155 (152). Is it now your opinion that such an idea as I have just suggested is an idea that would naturally occur to a person possessing mechanical skill?

A. It might or might not. Doing the thing suggested would be producing a different instrument for a different purpose, operating in a different way, and producing a different result. That is to say, instead of having a cancelling instrument, the main feature of which would be to cut the postage-stamp by projecting knife blades, if not the envelope and contents, by the removal of the knives, supposing the knife guards or bars to be of uniform height and of breadth sufficient; the instrument would become a stamping die adapted for the purpose of marking or inking the postage.stamp whereby the cancellation would be accomplished, instead of by the knives or their edges.

X Q. 156 (153). Taking people as they go, and supposing the matter presented to their attention, do you think the idea would occur to one in a thousand?

A. That would be very difficult for me to say. It is very much like poising the egg on its end; after it is once done the wonder is that anybody might not have thought how to have done it.

201 X Q. 157 (154). Do you think the idea would occur to one in a million?

A. The same answer as last.

X Q. 158 (155). I understand you to mean that in your opinion this idea might not occur to any one of a million people, taking them as they go, and supposing the matter presented to their attention. Am I right?

A. Yes, or it might occur to the first man who saw the instrument.

X Q. 159 (156). Do you not think that it would be as likely to occur to some one of the million that the probability of its so occurring amounts to a moral as distinguished from a mathematical certainty?

A. I would not like to say that, in view of what probably is a fact, that something of the kind, not altogether dissimilar, was confined to one man out of all the millions on earth apparently, so far as any information that I have.

X Q. 160 (157). I understand you to mean that in your opinion it is not a moral certainty that the idea would so occur. Am I right?

A. Yes.

X Q. 161 (158). Look at the instrument which I now proproduce, and, without disturbing the piece of paper pasted on the cross-bar, state whether it is a mechanical equivalent for Complainant's Exhibits A, B, U, V and W.

(Objected to as not competent on cross-examination.)

A. I think it is.

(Instrument offered in evidence as marked Defendant's Exhibit No. 1—J. A. S., Ex'r., and objected to as inadmissable on cross-examination.)

X Q. 162 (159). Look at the instrument which I now produce, and, without disturbing the paper pasted on the cross-bar, and state whether it is a mechanical equivalent for Complainant's Exhibits A, B, V, U and W.

A. I think it is.

202 X Q. 163 (160). Take the canceller of Exhibit No. 2 apart and see how it is constructed.

(Objected to as above.)

A. I have done so; my opinion is not changed. The canceller is of metal having side grooves below and back of its acting face, which face is composed of circular rims with flat surfaces, and this metal die of cylindrical form fits loosely into a hollow tube, which tube is fastened to the cross-bar by means of a solid head soldered therein, through which a screw works by thread, the screw passing down through a cross-bar and taking its bearing in the same. Within the cylinder loosely sets a coil spring on to which the cancelling die rests, and the die is secured into the cylinder by screws passing through the same, their ends on opposite sides resting loosely in the short grooves in the cancelling die. These grooves not passing out either to the top or bottom of the die, so that it is secured into the cylinders surrounding it, when the stud-like projections inwardly of the screws which are secured into and pass through the cylinder that contains the spiral spring, on to which the cancelling die takes its bearing, which die has a yielding bearing on the spring, and a vertical travel, being held in place and position loosely by the cylinder and the aforesaid screws.

(Instrument offered in evidence, and marked Defendant's Exhibit No. 2.—J. A. S., Ex'r.)

(Objected to as above.)

X Q. 164 (161). Is the canceller considered by itself in Defendant's Exhibit No. 2 a mechanical equivalent for the cancellers in Defendant's Exhibit No. 1, and plaintiff's Exhibits A, B, U, V, and W?

A. As a canceller broadly considered for cancelling postage-stamps with ink it is.

X Q. 165 (162). And one could be substituted for another in the different exhibits without more than merely mechanical change?

203 A. That would depend upon circumstances. Suppose, as I have before stated, some one had produced or made for use, and used and patented a device specifically describing the construction shown and found as cancellers for postage-stamps in complainant's Exhibit A, and Defendant's Exhibit No. 1, confining himself to cork or rubber as a die, bearing the acting face with any configuration adapted to print ink upon the postage-stamp on envelopes, for the pu'pose of cancelling the same. That is to say, suppose the state of the art at the time had never developed any other postage stamp canceller by means of ink than such an instrument as I have described, then I say it would be something more than mechanical change, or modification, of con-

struction to produce a cancelling device like Defendant's Exhibit No. 2, and the difference would be substantial and material.

X Q. 166 (163). But as things stand, with your present understanding of the state of the art, you mean that the cancellers in Defendant's Exhibit No. 2, and in Defendant's Exhibit No. 1, and in Plaintiff's Exhibits A, B, U, V, and W, could be substituted one for another without more than a merely mechanical change, do you?

A. I mean to be understood with the state of the art as developed by complainant's specifications and drawings found in the Patent Exhibit K, the exhibits inquired about are the same instruments substantially in each case, and the modifications and changes of construction found in the different exhibits are formal and mechanical, not substantial or material in view of the end sought, or the purpose of the device, the combination of the parts, or the means employed, and the result sought and obtained by the employment of either of the instruments named in the question, to wit, cancelling the postage stamp with ink and applying at the same time the post-office mark with ink.

X Q. 167 (164). I understand you to mean that Defendant's Exhibit No. 2 is covered by the specification, drawings, and claims of Complainant's Patent Exhibit K. Am I right?

204 A. I did not say that; I spoke of the state of the art as developed by Complainant's Patent Exhibit K. However, the peculiarity of the construction would not make any difference in my view when regarding the combined instrument as set out therein, and found in the exhibit inquired about, the object being the same, the operation and the result the same, accomplished with the combination of parts the same.

X Q. 168 (165). Do you now think that Defendant's Exhibit No. 2 is covered by complainant's patent?

A. Yes.

X Q. 169 (166.) Are you familiar with the state of the art to which the Exhibits No. 1 and 2 of defendant, and Exhibits A, B, U, V, and W of the plaintiff belong, as it existed in 1860, say?

A. I do not think that I can say that I am, farther than I have, because so thorough the information which I have obtained in the study of the same in this case, and in reading the patent on which this suit is brought?

X Q. 170 (167). From what source have you obtained your information as to the state of the art in 1860?

A. I don't mean to say that I am familiar with the state of the art in 1860. I refer you to my last answer.

X Q. 171 (168). Have you any information as to the state of the art at that time?

A. Not of my own knowledge.

X Q. 172 (169). Have you any information that you have derived from printed publications and patents?

A. Not that I now remember of.

X Q. 173 (170). Do you think that you ever had?

A. I do not remember of having derived any information of the state of the art in regard to the instrument inquired about by reading any patent or description of a combined instrument for post-marking and cancelling postage stamps on letters, envelopes, packets, &c., other than the complainant's Exhibit K, it being the patent on which this suit is brought.

X Q. 174 (171). Supposing the art to cover as well separate instruments for post-marking and for cancelling as a combined instrument, what is

the earliest patent that you have ever examined bearing on the art?

205 A. I do not remember now of having read any other patent bearing on the art, excepting complainant's Exhibit K and the patents of which that is a reissue.

X Q. 175 (172). Have you ever examined the original patent or a certified copy thereof, which was granted to Mr. Norton about April 14, 1863, and on which complainant's Patent Exhibit K as a reissue is based?

A. I may have; I do not remember whether I have or not; my impression is I have not.

X Q. 176 (173). Have you ever examined the reissue that *that* was granted to Shavor and Corse in 1864?

A. I may have; I think so.

X Q. 177 (174). Have you ever examined the reissue that was granted to Mr. Norton in 1869?

A. I think not.

X Q. 178 (175). You say that you think you have examined the reissue to Shavor and Corse. When did you make that examination?

A. A number of years ago; 8 or 10, I should think. My recollection is very indistinct in regard to it.

X Q. 179 (176). You made it, I suppose, for your testimony in the case of Shavor and Corse against the United States?

A. If I gave testimony in such a case, I presume I did examine the patent referred to, and for the purpose of preparing myself to give testimony.

X Q. 180 (177). Have you ever testified in any suit except this and the you referred to in the beginning of your testimony in chief in regard to one the method of post-marking letters and cancelling postage-stamps?

A. I think not.

X Q. 181 (178). Do you remember examining any other patent than the reissue to Shavor and Corse in your preparation for your testimony in the former suit?

A. I don't remember.

X Q. 182 (179). Are you familiar with the state of the art to which Exhibits 1 and 2 of defendant and Exhibits A, B, U, V and W of the complainant belong as it now exists?

206 A. No farther than is indicated in my answer to X Q. 170, and the reading of the reissue to Shavor and Corse in 1864.

X Q. 183 (180). What information did you have of the present state of the art while you were giving testimony in this case of Campbell against James?

A. No information farther than indicated in my last answers.

X Q. 184 (181). Had you received any information as to the state of the art from any person prior to your testimony in this case?

A. I had considerable conversation with Mr. Norton and the Hon. Judge Williams, in which the state of the art was more or less referred to and different devices spoken of. I have also been in the department of the New York City post-office, where the post-marking and postage-stamp cancelling was being done—nothing more.

X Q. 185 (182). The Mr. Norton you speak of is the person to whom the original patent of 1863 was granted, and who is solicitor for complainant herein. Do you understand so?

A. Yes.

X Q. 186 (183). What information did you receive from Mr. Norton as to the state of the art?

A. That he was the first to make and introduce into use an instrument whereby the post-office mark and date, and the postage-stamp on the envelope could be printed at the same time and operation, whereby the postage-stamp would be bruised or broken somewhat in the enamel surface and at the same time so impregnated with ink as that it could not be washed out sufficiently and in a manner that it would not be easily detected as a postage-stamp having been used, and the cancelling of a postage stamp on an envelope at the same time and operation, and by one instrument, and by the use and employment of ink was accomplished, putting the post-office on the envelope at the same time and operation of the same instrument, and that he had accomplished this by the instrument and in the manner as set forth, illustrated, and described, and claim in the reissue letters patent, complainant's Exhibit K; and that he had made
207 various experiments and instruments as modifications of that device; and that he had, also, some time between 1850 and 1860 (I cannot remember the year) filed a caveat in the Patent Office of the United States, in which he had quite fully described his invention, and he had some years subsequent thereto applied to the Patent Office for an instrument different from the instrument described in the patent, complainant's Exhibit K, and that in that instrument he had employed knives for the purpose of cutting and cancelling thereby the postage-stamp, instead of postage-stamp cancelling face represented in complainant's patent Exhibit K, and that he had made application to the United Stases Patent Office for another patent on an instrument that he thought somewhat differed in construction from that described in the patent complainant's Exhibit K, but that the Patent Office had rejected that application for want of novelty; that there had been some other patents granted by the United States Patent Office, none of which he had any apprehension that the court would entertain as antedating him or invalidating the equity of his claims, specified in complainant's patent Exhibit K; that he had spent a great deal of valuable time; and money to the amount of at least $50,000, in connection with his efforts, first to produce and introduce into use in the United States Post-Office the post-marker and postage-stamp canceller described in complainant's patent Exhibit K; that he had great difficulty and many obstacles in his way; that he had been (I think before Congress), and had a committee appointed to adjust his claims; and I think that he had been before the Court of Claims with the same. That the Post-Office Department of the United States had for a number of years used his post-office marker and postage-stamp canceller; and that no other was used to any great extent to the present time; that there had been mechanical modifications and changes made in the construction of the instrument, and that the same had been introduced in the post-offices of the United States. He showed me the instruments, Exhibits V, U, and W, and asked me in regard to my
208 opinion of them as to their similarity and difference, and proposed to let me read certain certified copies of other patents as this case progressed or before giving my testimony.

X Q. 187 (185). Did Mr. Norton give you any other information as to the state of the art?

A. I think he said that there had been an instrument for post-marking and cancelling the postage-stamp introduced into the New York post-office from England, which he claimed had been patterned after his construction, and that the English instrument was made subsequent to his, and he thought that some English consul or Englishman or American had taken one of his stamps to England from the United States Post-Office Department; that there had been introduced in the post-

office in New York postage-stamp canceller and post-office marking device of English manufacture like the instrument set out in complainant's patent Exhibit K.

X Q. 188 (185). Did he give you any other information as to the state of the art?

A. It would be difficult for me to remember all that he did say to me, but I now recall that he said that the Post-Office Department in 1863 or 1864 had adopted his invention and instrument for post-marking and cancelling postage stamps, as set out in complainant's patent Exhibit K, and that it had been used almost exclusively by the Post-Office Department since its first adoption, and its adoption was on the recommendation of Postmaster Wakeman, of the New York post-office; and furthermore, that the Post-Office Department at Washington had called the attention of English officials to the value of his instrument, the post-office marker and canceller, as set out in complainant's patent Exhibit K, and that that department had furnished English officials with the instrument, and that they had taken them to England, and that the post office department of Great Britain had adopted it several years ago.

X Q. 189 (186). Do you remember anything else that he told you as to the state of the art?

209 A. I now having my memory refreshed recall that Mr. Norton said that what was true as regards the English Government and its officials as being furnished by the Post-Office Department at Washington with the device (the post office marker and postage-stamp canceller) was also true in regard to France, Germany, and most of the other European nations having postal systems similar to ours. I don't think of anything else only that he suggested to me to read certain patents, which I told him I thought it better not to read until after his prima facie case was made, in view of his great confidence had in the clear description of his invention, as found in complainant's patent Exhibit K, and in view of his very strong faith that there was nothing that could antedate his invention as secured in the patent in suit.

X Q. 190 (187). Have you examined the patents that he referred to?

A. I have not.

X Q. 191 (188). In giving your testimony, have you assumed that the information given you by Mr. Norton was a correct statement of the state of the art?

A. No, not necessarily; I have confined myself to the instrument as described, illustrated, and claimed in the reissue patent, complainant's Exhibit K, and said to him that he must take the responsibility of any good or evil that would come to him by my measuring any similar or dissimilar construction by the construction therein described, as I had given to him my views of what his invention was, and some of the modifications which might be fairly made under my construction and view after having carefully examined the patent on which this suit is brought.

X Q. 192 (189). I understand you to mean that in so far as your testimony has been based on the state of the art, you have confined yourself for a knowledge of the state of the art to complainant's Exhibit K. Am I right?

A. Largely; I would not like to say wholly.

X Q. 193 (190). Well, in what respect am I wrong?

A. The counsel for the defence has put many hypothetical cases assuming a state of the art different from that which would be
210 derived from the patent, and then besides I would not pretend to say that my mind may not have been somewhat influenced by

some other information of my own, such as I have referred to in my answers.

X Q. 194 (191). Do you think that you are competent to state whether a particular device in an art is a mechanical equivalent for another device in the same art unless you are familiar with the state of that art at the time to which your testimony applies?

A. Certainly I am.

X Q. 195 (192). I understand you to mean that a knowledge of the state of the art is not essential to the determination of the question whether the devices referred to in my last question are mechanical equivalents or not. Am I right?

A. I mean as a mechanical expert I am qualified thoroughly, irrespective of any knowledge of a general character pertaining to the state of the art to which any two devices to which they may be properly said to relate, knowing the object of the devices, knowing the combination of the parts, knowing the operation of the two things, and the result produced by the operation and the combination to say whether they are alike or different as devices, irrespective of any state of the art outside of the two things being compared.

X Q. 196 (193). You state that you can tell under the circumstances stated in your last answer whether the two devices are alike or different as devices. Do you mean by that whether you can tell that the two things are mechanical equivalents?

A. Certainly; when I say alike or different I mean substantially alike or different as I have used the term all through; not whether they are slightly alike or formally different.

X Q. 197 (194). Aside from complainant's Exhibit K, and from whatever memory you may have of the reissue to Shavor and Corse, which you state you examined eight or ten years ago, and from what you saw when you visited the stamp department of the New York City post-
211 office, have you any personal knowledge of the state of the art to which defendant's Exhibits Nos. 1 and 2, and complainant's Exhibits A, B, U, V, and W belong, as it exists now, or as it has ever existed?

A. Yes; I remember seeing postage-stamps on envelopes a great many years ago, and seeing them crossed with ink with a pen or something of that description I should say, and of having seen them with the postmark printed partly on the envelope and partly on the stamp.

X Q. 198 (195). Have you any other personal knowledge?

A. I think I remember also, years ago, now that my attention is called to it, of having seen some kind of uniform ink mark on the face of the postage-stamp; I do not pretend to fix the date when I first saw that, however.

X Q. 199 (196). Have you any other personal knowledge?

A. I don't think of any now.

X Q. 200 (197). Do you think you had any when you were giving your preceding testimony?

A. Not in my mind that I specially remember of.

X Q. 201 (198). I think you have stated that you were 52 years old. Enumerate what different employments you have been in since your boyhood.

A. When I was about 17 years old I went as an apprentice into the employment of a blacksmith and carriage-maker, which I only remained a few months engaged in, as my brother who was a builder, or carpenter and joiner, as it is termed, wished me to learn that business with him,

which I was persuaded to do, and was engaged most of my time in working at that business, and in manufacturing sash, blinds, doors, &c., by machinery, and by hand for six or eight years, when I commenced soliciting patents, having sold out my interest in planing mills, the sash and blind business. I solicited patents for one or two years, and then engaged in the manufacture and introduction of a candle moulding machine, which has been almost universally adopted in this country and Europe. In 1859 I commenced the business that I am now in. In 1853 I obtained my first patent for an invention of my own, and have made a number of inventions, and procured a number of patents
212 since that time on inventions of my own; was engaged with my brother in bringing out and perfecting Kittles' patent planing and matching machine, or floor dresser. After that date and during the ensuing five years, and while I was in the lumber planing business, in the manufacture of sash, blinds, doors, &c., I was engaged somewhat in building the floor dressers, the same as I was thereafter in building the candle moulding machines. I commenced to act as a mechanical expert in patent cases in 1854 or 1855; have been frequently called as a mechanical expert, and have acted as such in very many patent cases since.

X Q. 202 (199). Have you had any other opportunities of obtaining a personal practical knowledge of mechanical pursuits?

A. Yes. The preparation of myself to act as a mechanical expert in patent cases has brought me into the practical knowledge of the manufacturing, or the process of making very many different things, and given me a knowledge of the construction and operation of a great variety of different machines, which knowledge or information I hardly could have had without my having become interested sufficiently to be well informed in regard thereto.

X Q. 203 (200). Have you had any other opportunities of obtaining such knowledge?

A. Well, I might say that it has been common during the past 20 years or more, with people more or less acquainted with me, to consult me in regard to the practical construction of machines or devices for different purposes, their similarity or difference, as compared with others constructed for the same purpose. And with regard to the practicability of devices or constructions irrespective of other constructions.

X Q. 204 (201). Have you had any other opportunities to obtain such knowledge?

A. Nothing further specially that I think of, unless it be my general interest in mechanic', and my reading and observations that have been consequent thereon.

213 X Q. 205 (202). How did you prepare yourself to become a mechanical expert?

A. I didn't seek that as an employment and did not prepare myself specially for it, only as I was called into cases. I suppose the turn of my mind, my education, practical knowledge, and my ability to analize constructions, was of a character that was satisfactory to those who employed me, and that by the recommendation of such, others came for my services. I never have set myself up for (and advertised myself as many do) as a professional mechanical expert.

X Q. 206 (203). You have stated that you had some scientific knowledge of mechanics; how did you obtain it?

A. I don't remember stating that. I do not wish to be understood as not having anything more than a practical knowledge as a qualification as a mechanical expert.

X Q. 207 (204). Well, how did you obtain whatever scientific or theoretical knowledge of mechanics you possess?

A. I attended at the Albion Seminary, State of Michigan, two academical years, and spent some time in the Alfred Academy in Alleghany County, this State. I left the school in the State of Michigan on account of ill-health, and for the same reason the academy last referred to, and abandoned a scientific education for that reason only. However I have given a great deal of attention to mechanics and have read on mechanical subjects quite largely.

X Q. 208 (205). At what age did you leave the academies you have referred to?

A. I think I was about 22 years old.

X Q. 209 (206). Were you attending them while you were engaged in the blacksmith, carriage-making, and carpenter business?

A. It was in the year 1847 or 1848, I think, that I put those two years in those schools, after I was 20 years old and prior going into the planing mill or floor dresser business.

X Q. 207 (207). Did you receive any theoretical training between the ages of 10 and 20?

214 A. I went to the common school and studied what was common to be studied in common schools at those times; wholly, however, in the winters.

X Q. 211 (208). What was common to be studied in those days in common schools—anything relating to mechanics?

A. Yes; natural philosophy.

X Q. 212 (209). Did you study natural philosophy; and if so, what branches of mechanics did the book you studied cover?

A. The laws of mechanics, mechanical powers, hydrostatics, &c., which I studied.

X Q. 213 (210). At what age did you study natural philosophy?

A. Before I was 17 years old; I cannot remember the year; I presume when I was 15 or 16 or 17 years old.

X Q. 214 (211). What branches of mechanics did you study in the academies you have referred to?

A. I don't remember now; I took up the studies that were being taught. I do not remember whether I continued in natural philosophy or not.

X Q. (215 (212). Mention some of the books on mechanics which you have at any time studied with care?

A. I don't know that I can mention any specially.

X Q. 216 (213). You have studied some such books with care, have you not?

A. I have read scientific treatises and mechanical works, and as I have been called in the cases where I required information I have gone to an encyclopedia which I have, for such information as I thought requisite to correct my views, or to confirm me in my judgment.

X Q. 217 (214). What is the name of that encyclopedia?

A. I think it is Mechanical Dictionary, or a Mechanical Encyclopedia, and another, Chambers' Encyclopedia, and formerly I had what was known as the American Encyclopedia.

X Q. 218 (215). I understand you to mean that, as far as you now remember, your theoretical knowledge of mechanics has been
215 mostly obtained by consulting the encyclopedias you have mentioned, as from time to time a particular question was brought to your attention. Am I right?

A. No; I don't mean to be understood so; neither do I mean to be

which I was persuaded to do, and was engaged most of my time in working at that business, and in manufacturing sash, blinds, doors, &c., by machin ery, and by hand for six or eight years, when I commenced soliciting patents, having sold out my interest in planing mills, the sash and blind business. I solicited patents for one or two years, and then engaged in the manufacture and introduction of a candle moulding machine, which has been almost universally adopted in this country and Europe. In 1859 I commenced the business that I am now in. In 1853 I obtained my first patent for an invention of my own, and have made a number of inventions, and procured a number of patents
212 since that time on inventions of my own; was engaged with my brother in bringing out and perfecting Kittles' patent planing and matching machine, or floor dresser. After that date and during the ensuing five years, and while I was in the lumber planing business, in the manufacture of sash, blinds, doors, &c., I was engaged somewhat in building the floor dressers, the same as I was thereafter in building the candle moulding machines. I commenced to act as a mechanical expert in patent cases in 1854 or 1855; have been frequently called as a mechanical expert, and have acted as such in very many patent cases since.

X Q. 202 (199). Have you had any other opportunities of obtaining a personal practical knowledge of mechanical pursuits?

A. Yes. The preparation of myself to act as a mechanical expert in patent cases has brought me into the practical knowledge of the manufacturing, or the process of making very many different things, and given me a knowledge of the construction and operation of a great variety of different machines, which knowledge or information I hardly could have had without my having become interested sufficiently to be well informed in regard thereto.

X Q. 203 (200). Have you had any other opportunities of obtaining such knowledge?

A. Well, I might say that it has been common during the past 20 years or more, with people more or less acquainted with me, to consult me in regard to the practical construction of machines or devices for different purposes, their similarity or difference, as compared with others constructed for the same purpose. And with regard to the practicability of devices or constructions irrespective of other constructions.

X Q. 204 (201). Have you had any other opportunities to obtain such knowledge?

A. Nothing further specially that I think of, unless it be my general interest in mechanic', and my reading and observations that have been consequent thereon.

213 X Q. 205 (202). How did you prepare yourself to become a mechanical expert?

A. I didn't seek that as an employment and did not prepare myself specially for it, only as I was called into cases. I suppose the turn of my mind, my education, practical knowledge, and my ability to analize constructions, was of a character that was satisfactory to those who employed me, and that by the recommendation of such, others came for my services. I never have set myself up for (and advertised myself as many do) as a professional mechanical expert.

X Q. 206 (203). You have stated that you had some scientific knowledge of mechanics; how did you obtain it?

A. I don't remember stating that. I do not wish to be understood as not having anything more than a practical knowledge as a qualification as a mechanical expert.

X Q. 207 (204). Well, how did you obtain whatever scientific or theoretical knowledge of mechanics you possess?

A. I attended at the Albion Seminary, State of Michigan, two academical years, and spent some time in the Alfred Academy in Alleghany County, this State. I left the school in the State of Michigan on account of ill-health, and for the same reason the academy last referred to, and abandoned a scientific education for that reason only. However I have given a great deal of attention to mechanics and have read on mechanical subjects quite largely.

X Q. 208 (205). At what age did you leave the academies you have referred to?

A. I think I was about 22 years old.

X Q. 209 (206). Were you attending them while you were engaged in the blacksmith, carriage-making, and carpenter business?

A. It was in the year 1847 or 1848, I think, that I put those two years in those schools, after I was 20 years old and prior going into the planing mill or floor dresser business.

X Q. 207 (207). Did you receive any theoretical training between the ages of 10 and 20?

214 A. I went to the common school and studied what was common to be studied in common schools at those times; wholly, however, in the winters.

X Q. 211 (208). What was common to be studied in those days in common schools—anything relating to mechanics?

A. Yes; natural philosophy.

X Q. 212 (209). Did you study natural philosophy; and if so, what branches of mechanics did the book you studied cover?

A. The laws of mechanics, mechanical powers, hydrostatics, &c., which I studied.

X Q. 213 (210). At what age did you study natural philosophy?

A. Before I was 17 years old; I cannot remember the year; I presume when I was 15 or 16 or 17 years old.

X Q. 214 (211). What branches of mechanics did you study in the academies you have referred to?

A. I don't remember now; I took up the studies that were being taught. I do not remember whether I continued in natural philosophy or not.

X Q. (215 (212). Mention some of the books on mechanics which you have at any time studied with care?

A. I don't know that I can mention any specially.

X Q. 216 (213). You have studied some such books with care, have you not?

A. I have read scientific treatises and mechanical works, and as I have been called in the cases where I required information I have gone to an encyclopedia which I have, for such information as I thought requisite to correct my views, or to confirm me in my judgment.

X Q. 217 (214). What is the name of that encyclopedia?

A. I think it is Mechanical Dictionary, or a Mechanical Encyclopedia, and another, Chambers' Encyclopedia, and formerly I had what was known as the American Encyclopedia.

X Q. 218 (215). I understand you to mean that, as far as you now remember, your theoretical knowledge of mechanics has been
215 mostly obtained by consulting the encyclopedias you have mentioned, as from time to time a particular question was brought to your attention. Am I right?

A. No; I don't mean to be understood so; neither do I mean to be

understood as having devoted a number of years in school exclusively to scientific training. I do mean to be understood as having given a great deal of time to mechanical subjects theoretically and practically, and as having brought to bear a fair and reasonable amount of common sense, without any pretension to special scientific knowledge on subjects of a mechanical character or nature that I have tried to inform myself or others about.

X Q. 219 (216). Since leaving the academies have you studied any work on mechanics systematically?

A. No; if you mean thereby as pursuing a course of study.

X Q. 220 (217). Have you studied any such work except with reference to some particular case or some particular question?

A. Usually when I have taken up a subject I have tried to follow it through, and in doing so my reading has led me on beyond any separate question into a general information.

(Objected to as irresponsive.)

X Q. 221 (218). Are you familiar with the details of the mechanism of the steam engine?

A. I think so.

Adjourned to Saturday, December 22, 1877, at 11 a. m.

216 NEW YORK, *December* 22, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 222 (219). Do you think that you are familiar with the details of the mechanism of the sewing machine?

A. Yes.

X Q. 223 (220). Do you think that you are familiar with the details of the different machines by which cotton cloth is made?

A. Yes; fairly so.

X Q. 224 (221). Do you understand the knitting machine?

A. I have never given any special attention to that.

X Q. 225 (222). Do you understand the details of the manufacture of fire arms?

A. No; though I have been through the Remington works.

X Q. 226 (223). Do you understand so that you can describe the machines by auk of which locomotives are constructed?

A. I wouldn't like to say that I could, thoroughly.

X Q. 227 (224). Can you describe the principles of bridge building?

A. I could in some respects; some not.

X Q. 228 (225). Do you know what the parallelogram of forces is?

A. I don't know that I could explain that.

X Q. 229 (226). Can you explain the function of the different rods and braces and arches which are used in the construction of a heavy roof like that of the Grand Central Depot of this city, so that you can give a reason why the several rods and braces should have the position they do have rather than some slightly different position, and why the arches should have one curavature rather than another?

A. I think I understand pretty well the construction of such a
217 roof, but I think it would trouble me to give a reason why the arches should not answer if slightly different, or that the rods, braces, &c., might not be changed slightly.

X Q. 230 (227). Have you ever studied the application of geometry to the construction of buildings, bridges, and machinery generally?

A. Not as a profession or science. I never studied geometry at all, indeed.

X Q. 231 (228). What is the metecentre of a ship or other body floating in a liquid?

A. I don't know by that term.

X Q. 232 (229). How many sorts of equilibrium are there?

A. I don't pretend to say.

X Q. 233 (230). Can you explain what takes place when a candle burns?

A. Combustion.

X Q. 234 (231). Do you know anything about chemistry?

A. Yes.

X Q. 235 (232). Can you explain how water can be decomposed quantatively and qualitively?

A. I don't think I could successfully.

X Q. 236 (233). Mention the different machines, without giving a detailed description of any of them, which are used for the manufacture of cotton cloth?

A. The preparing machinery of the cotton, the spinning jenny, and the loom.

X Q. 237 (234). What is the spinning jenny?

A. It's the machine that carries the spindles that twist the cotton into threads.

X Q. 238 (235). Name the principal elements of that machine, according to its present development.

A. The carriage, the spindle bearers, the spindle pulleys, and the thread guide and the spindles. I do not pretend to say these are all.

X Q. 239 (236). Are these all you know?

A. These are the acting and material parts.

(Objected to as irresponsive.)

X Q. 240 (237). Are these all you know?

A. Substantially.

218 X Q. 241 (238). How long is it since you had occasion to consult any authority as to the mechanism of the steam-engine?

A. I refreshed myself last night, supposing I should be inquired of this morning in regard to it.

X Q. 242 (239). Is the mechanical effect of a blow different when given by the hand and arm of a man and when given by machinery, as in the case of a trip-hammer?

A. The instrument or the hammer proper being the same that is employed in either case, and the force behind being equal, the effect, I think, would be about the same.

X Q. 243 (240). Suppose that complainant's Exhibit U were operated so asto give the blows by means of a machine constructed according to a well-known pattern instead of by the hand of a man, would the change in the method of operation be more than a merely mechanical change?

A. It would be a change from manual or physical to mechanical as to power or force.

X Q. 244 (241). Do you mean that the working of the arm is not mechanical?

A. I suppose the scientific idea is that it is mechanical, but I choose to say that it is physical or manual. If you desire to regard man as a machine I have no objection if you say he is one of God's machines.

X Q. 245 (242). Please answer my question 240.

(Question read.)

A. The same answer.

X Q. 246 (243). I understand you to mean that it would be more than a mere mechanical change of operation. Am I right?

A. The question assumes a machine that would grasp the handle of the instrument, and use it in the same manner that it would be used in the hand of an individual in producing the result for which it is intended. I say such a substitution of power or force would be simply a substitution of a mechanical power or force in the place of manual or
219 physical force, but if you choose to regard the user or operator of the instrument as a machine or piece of mechanism, then the substitution of another piece of mechanism would be simply a mechanical change in the operating or driving force.

X Q. 247 (244). Do you know what potential energy is in physical science?

A. I suppose the energy of the will in the control of physical force. I may be incorrect as I do not make any pretension to have been schooled specially in the sciences, or the use of scientific terms.

X Q. 248 (245). Do you understand on what principle a given material must be increased in quantity in order to sustain a given increase of strength, the strain coming at the same point of the material in both instances?

A. I think if you will give me the case in some practical form, I would have very little trouble in giving you a satisfactory answer, and will say I probably would. I think it is manifest in the character of the questions being propounded to me by the counsel that he hopes to weaken the force of something that has gone before in my answers by showing me up as unscientific in my education, and I wish to state now that I frankly acknowledge that I have not a scientific or collegiate education, neither have I ever pretended to have, nor do I pretend to be able to fully comprehend or explain the meaning of strictly scientific terms, and I do not know indeed as I would be specially improved in my qualifications as a practical and common sense man, or an expert, had I such ability, for I remember that when I finished the schooling that I had, that I detected in myself what I frequently observed in young men recently from schools or colleges, a peculiar smartness in the use of terms, and ability to show off an apparent profoundness of education in word learning, and I therefore request the counsel, if he please, and can, to let his questions be of a less learned or scientific character, and more of what would be regarded as practical and common sense.

X Q. 249 (246). Suppose that a bar of iron will be fractured by a weight of one hundred pounds and by no less weight, how will you deter-
220 mine the question of how much that bar of iron must be increased in size in order that it may not be fractured by a less weight than two hundred pounds, and may be fractured by just that weight of 200 lbs., all the other conditions of the two cases being identically the same?

A. At the point of fracture my first proposition would be that it should require just double the material to support just double the weight.

X Q. 250 (247). That is, if the part of the bar exposed to the influence of the weight in the first case weighed two pounds, it must be increased to four pounds in weight in order to sustain the increased strain supposed. Do you mean that?

A. No; I mean it must have double the supported power at the point of the fracture, and have the metal requisite for that. It does not follow that the metal may not be placed advantageously so as to save weight

Give me the conditions under which the bar breaks, the length, the form where the support and where the weight is applied if you please.

X Q. 251 (248). Suppose the bar to be round and of uniform diameter, to be in a horizontal position, and to be firmly attached at each end to two firm props, and the weight to be applied midway between the props in each of the cases that I have indicated above, and the iron of the bar in each case to be of the same quality, and suppose the diameter of the bar in the first case, which is fractured by a weight of 100 lbs. to be $\frac{1}{10}$ of an inch: the question is how you will determine how much that bar must be increased in size in order that a weight of 200 lbs. would be necessary to break it?

A. In practice I suppose I should determine it in the same manner that most constructors do, to wit, go to the tables and take the result of actual experiment, and trust to them as being correct, or, if I preferred, I might make my own experiments, and tabulate them and call them practical or scientific tests, or I might repeat if I had that result ready in my mind what had been found out that way; I do not know of any special rule, or I do not think of any at this time that would be a
221 satisfactory guide to secure a positive result, but would say the increase of the body of the metal equal to double the body of the first bar would be sufficient, whether twisted together with the first or rolled into a rod, or drawn into a wire of slightly increased diameter.

(Counsel for defendant applies for an adjournment at this hour, 1.45 p. m., to the 26th of December, at 1 p. m., on the ground that he desires to leave the city for the holidays, and because the examination has continued day by day without interruption for the convenience of plaintiff, with the exceptions of Sundays, and one day last week.

The adjournment objected to by the complainant's counsel until the usual hour of adjournment to-day, for the reason that the witness now on the stand has been under cross-examination for nearly two weeks at great expense to complainant, and because the cross-examination has been unreasonably protracted, and the questions have ceased to be material or of consequence in the case.)

Adjourned by the examiner to Wednesday, December 26th, 1877, at 11 o'clock a. m.

NEW YORK, *Dec.* 26, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel for complainant, and consented to an adjournment until 1 o'clock p. m. to-day, having received from defendant's counsel the following telegram, to wit, "Chicopee, Mass., Dec. 25th, 1877. To Hon. George H. Williams: Missed train. Can't arrive before one o'clock to-morrow. S. B. Clarke." Which is marked and filed Telegram No. 1, J. A. S., exr.

222 1 o'clock p. m.—Pursuant to adjournment last above.

Present, counsel for complainant Marcus P. Norton, esq., and George H. Williams, esq., and S. B. Clarke, esq., of counsel for defendant.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 252 (249). You consider yourself an expert in the interpretation of mechanical drawings. Do you not?

A. I do.

X Q. 253 (250). Look at Figure 3 in Complainant's Exhibit K, and state what you suppose the circle in that figure represented while you were giving your testimony in chief, except the last clause in your last answer, which reads "however, the circular form has reference there to the handle."

A. I had given it no special attention until the time when I was giving that answer, and it occurred to me as the circle caught my eye that it was fairly suggestive of a circular form for cross-bar, the A within the circle not at the moment striking my eye (the A denoting the handle).

X Q. 254 (251). Where in your answer to Q. 9, of your examination-in-chief, you said that with reference to Complainant's Exhibit B that "it strongly resembles the illustration in said patent, Figure 3." What did you mean by that?

A. I meant the combined face of the post-office marker and postage-stamp canceller. I may have taken in the circular line indicating the diameter of the handle; as I have said before, excluding the letter A from that figure, it would be suggestive of a circular plate, lying back or above of the acting face or faces. Even without that circle, the bar is circular at the ends in form as represented in Figures 3 and 6, also 1 and 2, at the ends, the circle of course being of a smaller diameter.

X Q. 255 (252). What is your best recollection of what you supposed the circle in Figure 3, Complainant's Exhibit K, represented when
223 you stated that Complainant's Exhibit B strongly resembles the illustration in said patent, Figure 3?

A. Just what I have stated before, to wit, that it may have been in my mind that a plate lying back or above B proper, or a part of B proper, not having noticed at the glance the letter A, and as I said in my examination-in-chief, that it might be suggestive of a circular form in part or in whole of the bar B, but at the time of giving this answer I noticed the letter A, and stated that that circle meant to represent the diameter of the handle. I don't think that figure ought to have had that circle upon it, and yet it is clearly enough understood what it was meant to indicate. I think that Figure 6 is a better figure for a face view of the instrument, however, either is clear enough, and either is suggestive of any modification of the die or face of the combined instrument.

X Q. 256 (253). I don't ask you for what may have been in your mind. I ask you for what your best recollection is as to your actual understanding of the signification of the circle in Figure 3 at the time referred to. Please answer.

A. I think my mind was running on to the question whether the modification which I have regarded as purely mechanical and formal found in the parts of the Exhibits B and W, corresponding to the bar, or parts marked and described as B, in the Complainant's Patent Exhibit K, as a modification, and I was looking at the different figures in the drawings of that exhibit when comparing B and W, and reflecting whether such modifications were not merely mechanical or formal modifications and whether the same would not be suggested by the construction illustrated in Complainant's Exhibit K, when my eye fell upon the circle of Figure 3, and I thought it suggestive evidently in part of a circular form to the bar, but irrespective of that the fact remains as I answered.

X Q. 257 (254). I understand you to mean that before all your testimony in chief was written down as it stands, you changed your mind as to the signification of the circle in Figure 3. Why did you change your mind?

224 A. I don't want you to understand that any farther than I have

stated, and I do want you to understand that that circle had not entered into my estimate or judgment in regard to the formal change found in Exhibit B and W at all, neither does it now, only so far as at the time was indicated in those answers when special reference is made to it. and that I really had not given any thought at all to that line until I was answering the question, and as it is found in the answer now referred to as according to my recollection. That is to say, that circular line lying back of the bar proper in Figure 3 struck me at the instant when giving that answer that it might fairly be suggestive of a construction not essentially different from that found in Exhibits B or W, and I had evidently, (and this is my recollection,) not given any special thought in regard to that line, or importance to it farther than that; and farther, I had not regarded, nor did not, nor do not regard that line as the outline of the bar B, anything more than possibly suggestive, it not being an elevated or shaded view of the handle.

(Objected to as irresponsive.)

X Q. 258 (255). Did you or did you not change your mind as to what you supposed the circle in Fig. 3 to be intended to represent prior to or at the time of the writing of the last clause of your last answer in chief which is, "however, the circular form has reference there to the handle"?

A. I think I had not given thought enough to that line to have given it any special importance at all until about the moment of giving the last answer in chief referred to; I had glanced at it, and thought it was suggestive in part, but as soon as I thought there was danger of being misunderstood, I put that last clause referred to into that answer.

(Objected to as irresponsive.)

X Q. 259 (256). Did you or did you not change your mind or your view, or your impression, or your understanding, of what the circle in Fig. 3 was intended to represent prior to or at the time of the writing of the
225 last clause of your last answer in chief, which is, "however, the circular form has reference there to the handle"?

A. If there was any change, it was nothing more than an impression; I certainly had no definite mind or idea different during my examination in chief from what I now have or had at any time during that examination, further than fully expressed in previous answers of to-day.

(Objected to as irresponsive.)

X Q. 260 (257). Please answer my last question.

(Question read.)

A. No.

X Q. 261 (258). Do you mean to say that when you said that the illustration in Fig. 3 strongly resembled Exhibit B, your impression at that time was not that the circle suggested a circular plate instead of a bar?

A. No.

X Q. 262 (259). Well, what was your impression?

A. For my answer I refer you to my last three or four or five answers preceding this, which you have indicated were irresponsive, for my answer to the present question.

X Q. 263 (260). At the time that you said that Exhibit B strongly resembles the illustration in Fig. 3, is it not your last recollection that your impression then was that the circle in Fig. 3 was intended to indicate a circular plate instead of a cross-bar?

A. Same answer as my last.

X Q. 264 (261). Please answer my last question.

(Question read.)

A. I have stated several times upon this record that I had nothing more than an impression, and that arising at the time of answering,

that that circle might suggest in part to a construction that a circular form for the bar B, and I still state that as a fact, and have not changed my mind about it. No.

X Q. 265 (262). What does the last word in your answer, that "No," mean?

226 A. It means what "no" always means in the English language, in common parlance.

X Q. 266 (263). Do you mean it, or did you mean it, as a negative answer to my question?

A. Yes; for short, instead of the longer or explainative part going before it.

X Q. 267 (264). At the time of stating that Exhibit B strongly resembles the illustration in Fig. 3, what is your last recollection of what your then impression was as to what the circular Fig. 3 was intended by the patentee or the person who made Fig. 3 to represent. I do not ask you for what the circular might, in your opinion, suggest to a constructor, but for your own actual impression at that time of what the circle was intended to represent.

(Complainant's counsel objects, on the ground that the witness has fully and fairly answered the question several times, and that its frequent repetition is encumbering the record with useless matter.

Defendant's counsel requests plaintiff's counsel to point out where, in his testimony, witness has answered the last question, and says that he is willing to withdraw the question if in fact the witness has answered the question.

Counsel for complainant refers his objection to the court.)

A. As I have stated before, I had not given at that time any special thought as to what the circle represented, nor indeed noticed the letter A on it. In glancing at that figure, it occurred to me, in view of the other figures, 1 and 6, that it was in part suggestive of a modification that might be made in the form of the bar not unlike that found in Exhibit B.

X Q. 268 (265). Do you mean that you at that time had no impression as to what the circle in Fig. 3 was intended to represent?

A. Yes; for I had not noticed the letter A on it until I had
227 substantially given my answer; and if I had previously, when reading and studying the patent, thought anything about it, it had gone out of my mind at that time.

X Q. 269 (266). Why, then, did you say that Exhibit B strongly resembles the illustration in Fig. 3?

A. Waiving the letter A, or indeed the circle, for the same reason that I say now, and have fully explained in my examination-in-chief, as well as in this cross-examination, to wit: It represents the acting face, or faces, or die, having a postmarker and postage canceller combined with a metal portion lying back or above the same, mechanically sustaining them for the purpose of connection, and also affording strength sufficient to firmly secure them to each other in relation thereto, and for the further purpose of connecting or securing a handle whereby to operate them in the printing of the post-mark and cancelling the postage-stamp with ink on an envelope, packet, or other mail matter, the same having removable type to change the date in the post-marker; and the circle found in that figure, while it actually represents the diameter of the handle, may be said (striking out of view the letter A) to be more or less suggestive of a circular form of plate or piece lying above the bar proper for any purpose like the circular piece of india rubber found in Defendant's Exhibit No. 2, nothing more.

X Q. 270 (267). When you said that Exhibit B strongly resembles the illustration in said patent, Fig. 3, did you mean to convey the impression that Exhibit B any more strongly resembled Fig. 3 than Fig. 6?

A. No; no further than the suggestion which I have stated before, of the circular line, irrespective of its indicating the form and diameter of the handle.

X Q. 271 (268). Did you not mean to give the impression that if a model were constructed according to Fig. 3, it would have a cross-bar or plate strongly resembling in respect to form the cross-bar or plate in Exhibit B?

A. Yes; and I mean to give that impression now. The same is true in regard to Fig. 6, and Fig. 1, and Fig. 2, and Fig. 5.

228 X Q. 272 (269). Did you mean to give the impression that if a model were constructed according to Fig. 3, it would have a cross-bar in a circular form, as is the case in Exhibit B?

A. No, not necessarily; it might or might not.

X Q. 273 (270). Did you mean to give the impression that if a model were constructed strictly according to Fig. 3, it would have a cross-bar in a circular form, as is the case in Exhibit B?

A. No.

X Q. 274 (271). What form would the cross-bar have been if a model had been constructed strictly according to your interpretation of Fig. 3 at the time that you said the illustration in Fig. 3 strongly resembles Exhibit B?

A. A bar twice as long as it is broad on its lower face, with curved or circular ends slightly depressed in its longitudinal centre, with or without a plate lying back or above it, which, as I have stated before, irrespective of the purpose of a circle representing the handle A, and the letter A, might in part suggest such a modification of form back or above the bar, or in the bar, instead of the elongated or circular end B.

Adjourned to Thursday, December 27th, 1877, at 11 a. m.

NEW YORK, *December* 27, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued:

X Q. 275 (272). In your last answer in chief you stated that "the face view of Exhibit W will be found fairly illustrated in the Fig. 3 of the drawings Complainant's Exhibit K." Precisely what meaning did you at the time mean to convey by that?

229 A. That the figure did fairly represent Exhibit W. For a more full answer to this question I refer you to my answer of the 266th X Q.

X Q. 276 (273). Did you mean to convey the impression that Fig. 3 any more fairly represented Exhibit W than Fig. 6?

A. I refer you to my last answer, with its reference, for as full an explanation of my meaning as I am able to give, unless it should be found in other answers where I have repeatedly tried to make myself understood as to my meaning and understanding at the time the direct question 13 was asked, as well as the present time; and I now say, as I have frequently said before, waiving the letter A, indicating the object of the circular line, it might indicate a circular plate, as I have before suggested and explained repeatedly, and without any reflection or special thought or deliberation. I presume my mind caught the suggestion from

that line sufficiently to have recurred to that figure, as showing a formal change or modification of the bar B, or some portion back or above it that might be made in a circular form like that in Exhibit W, instead of as in that figure as well as in figures 1 and 6, where the bar is only circular at its opposite ends.

X Q. 277 (274). When was the letter A and its significance in Fig. 3 first brought to your attention?

A. While giving my answer to the 13th direct interrogatory. And I wish to state on the record that I presume that I observed the line and the letter A in Fig. 3 while reading the patent, and have no doubt but I did while reading the patent, complainant's Exhibit K, and comparing the same with the patent as spread on the printed and amended bill in book form, which was and has been understood to correspond in all respects as to drawings and description with the patent, complainant's Exhibit K, and which does, with the exception of the circular line and letter A, and the numbering of the figures, to wit, the figure which is marked 3 in Exhibit K in the printed record is marked 2, and the figure
230 which is marked 2 in Exhibit K is marked 3 in the printed record. I had made in the book that I have corrections to correspond with Exhibit K in regard to the number of these figures. This error in numbering these figures was readily observed in reading the specifications.

X Q. 278 (275). Did you come to a distinct impression that the circle in Fig. 3 refered to the handle during the time in which you were dictating to the examiner any portion of your direct testimony except the last clause of your last direct answer?

(Objected to on the same ground as stated in objection to X Q. 264. Defendant's counsel makes the same request.)

A. I think so; I had not looked at the figures or the drawings in a sense of studying the same in Exhibit K, as I had confined myself in the study of the patent, as contained in the printed book, though I had compared it with the book or the book with it, and in giving my answers I have had the book or amended bill containing the patent continually before me, and in the Fig. 3 which had been so often referred to, there is no circle nor letter A in the book; when my eye fell on it in Exhibit K, it occurred to me that it was suggestive of a circular form instead of an elongated form of the bar B; I did not then, had not before, do not now, think that was the bar.

X Q. 279 (276). At what portion of that time did you first get at distinct impression that the circle referred to the handle?

A. While giving the answer and at the moment my eye caught the etter A.

(Objected to as irresponsive.)

X Q. 280 (277). Read my last two questions to witness and let him answer the last one.

A. I can't tell the time any nearer than I have.

X Q. 281 (278). Did you have such a distinct impression while dictating any portion of your direct testimony preceding the last clause
231 thereof, which is, "however, the circular form has reference there to the handle"?

A. I think so; undoubtedly I had.

X Q. 282 (279). Didn't you get such distinct impression during the interval between the time of dictating the last clause and the time of dictating what preceded it?

A. It may have come to me at that time; I think I had that impression long before, and on first reading and comparing the patent, com-

plainant's Exhibit K, with the printed record, but it was of so little importance in a clear understanding of the construction that I had given no special attention to it, and for a time doubtless it may have made no impression or had any weight on my mind.

X Q. 283 (280). During the interval that I have referred to, did any one in the room suggest in your hearing that the circle indicated the handle?

A. I think there was something said about it before finishing the answer, by some men in the room.

X Q. 284 (281). By whom?

A. I don't know who spoke of it first.

X Q. 285 (281). What is your best recollection as to who suggested that the circle referred to the handle?

A. I think I made the remark that the figures were not alike in that respect when Mr. Norton made the remark that the circle had no business there, or something to that effect; that it referred to the handle; if my recollection serves me, I think I said, "Yes, I see that," which I am sure I had seen and observed before I had been spoken to by anybody.

X Q. 286 (282). Do you mean that you said in the room that you were sure you had seen and observed the fact referred to before you had been spoken to by anybody?

A. Something to that effect, or in substance the same.

X Q. 287 (283). State the words you used as nearly as you can.

A. I am not able to repeat the words.

X Q. 288 (284). Do you remember that you said anything more than substantially this: "Yes, I see that?"

A. Yes, I think there was something more than that said.

232 X Q. 289 (285). Give the words that were said as nearly as you can. Give a sentence.

A. I am not able to give the words. I know I felt a little annoyed at the fact that Mr. Norton had said anything to me while giving that answer.

X Q. 290 (286). How are you paid for your services as an expert witness in this case?

A. By draft on the complainant.

X Q. 291 (287). Wholly by draft on the complainant?

A. Yes; I suppose I shall be; I haven't been wholly paid yet; but I had already two drafts, one of which has been paid.

X Q. 292 (288). When are you to be paid for the balance of your services?

A. As soon as this examination is completed with me.

X Q. 293 (289). Have you any interest in the result of this suit?

A. No.

Redirect:

R. D. 294 (290). Cannot any person who can read tell by reference to the specifications and description in complainant's Exhibit B, that the circle marked A indicates the handle to the instrument?

(Objected to on the ground that the witness is not shown to be competent to testify as to what any person can do.)

A. Yes; any man of intelligence.

R. D. 295 (291). Referring to the subject of mechanical equivalents, I ask this question: Suppose that A makes a machine or construction, which upon trial is found to be worthless or pernicious, and unfit for the purpose intended, and B takes the same machine, and by any change of

construction makes it useful and perfectly adapted to the end intended, does B thereby, in your judgment, make a substantial change in the machine or construction?

(Objected to on the ground that the witness has been shown incompetent to testify to this question.)

233 A. He does.

R. D. 296 (292) Where two machines are made for the same purpose, one of which is worthless and pernicious, and therefore is not used, and the other on account of some change in form or substance is valuable, and therefore goes into general use, can these two machines, in the nature of things, be the mechanical equivalents of each other?

(Objected to on the same ground as above.)

A. They cannot.

R. D. 297 (293). State whether or not, to make a substitue a mechanical equivalent for an element in a machine or combination, it is necessary that such substitute should be something known and used by skilled mechanics, and with which when substituted, the machine or combinabination operates as before, and with the same result.

(Same objection.)

A. Yes; it is.

R. D. 298 (294). Mechanically speaking, is cutting a substance with a knife the same operation as making an impression upon the same, or a similar substance with a stamp, by ink or otherwise, and not cutting?

(Same objection.)

A. It is not.

R. D. 299 (295). Mechanically speaking, is a knife in a machine which is intended to cut, and when used does cut through the substance upon which the machine is employed, an equivalent for a stamp in a similar machine which is intended to impress, and which when used only, does impress, with ink or otherwise, the substance upon which such machine is employed?

(Same objection.)

A. It is not.

R. D. 300 (296). You have stated that you considered yourself a
234 practical expert as to constructions; name over as briefly as you can the different machines and constructions as you now remember, which you have been called upon to examine or testify about as an expert.

(Objected to as irrelevant and immaterial, and as not being a reply to anything brought out on the cross-examination.)

A. I have been called upon to examine and testify about the machinery in construction and operation for making candles; machinery for folding and gumming envelopes; the construction of locomotive head lights; the construction of lamps for burning kerosene; the construction of lanterns; the construction and operation of sewing-machines; the construction and operation of shade-rollers; of bail-binders; of coal breakers; the construction and operation of machines for enameling mouldings, for gilding the same; the construction and operation of heaters and stores; of railroad frogs; of track rails for railroads; spring mattresses, and spring bed; of chairs of different kinds, and doubtless of many other things which I do not now recall.

S. P. KITTLE.

Subscribed and sworn to before me, this December 27, 1877.

JOHN A. SHIELDS, *Examiner*, &c.

Complainant offers in evidence, and files as his Exhibit Y, a certified copy of the record in the circuit court, northern district of New York, in the case of Shavor & Corse vs. Hoole, and referred to in folios 21, 22 and 25, pages 6 and 7 of complainant's printed amended bill, and the same is marked complainant's Exhibit Y., J. A. S., ex'r.

Adjourned to Friday, December 28, 1877, at 11 a. m.

235 CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

EDMUND W. ELY, a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence and occupation?

A. Edmund W. Ely; I am 31 years of age; reside at Chester, Massachusetts, and I am an axe manufacturer.

Q. 2. State if you know Christopher C. Campbell, the complainant in this suit; and, if so, state how long you have known him.

A. I do; I have known him 15 years and more.

Q. 3. Are you acquainted with his mother and relatives?

A. I am acquinted with his mother and some of his relatives.

Q. 4. Do you know from common report where he was born?

A. I do.

Q. 5. State where.

A. In Chester, Massachusetts.

Q. 6. Do you understand him to be citizen of the United States?

A. I do.

Cross-examination:

X Q. 7. Where is his present residence?

A. East Chatham, New York.

X Q. 8. How old a man is he?

A. I couldn't say, but think he must be 42 or 43.

X Q. 9. What is his business?

A. Station agent on the Boston and Albany Railroad.

X Q. 10. Do you know how much property he has?

A. I do not.

236 X Q. 11. For how large a judgment against him should you say he was responsible?

A. I couldn't say.

X Q. 12. What business was he in before he became station master?

A. He was in the mercantile business one or two years before he went there; about that time I should say.

X Q. 13. How long has he been station master?

A. Some six or eight years, or perhaps longer; I couldn't say.

X Q. 14. What mercantile business was he in, and was he in as a principal or a clerk, and where?

A. Principal, in general assortment of goods in a country store in Chester, Massachusetts.

X Q. 15. What business was he in before the mercantile business, and where and how long had he been in such business?

A. Station agent, in Chester, Massachusetts; I couldn't say how long exactly; one year or two.

X Q. 16. What business before that, and where and how long was he in it?

A. I think he was ticket agent at the same place; I couldn't say how long.

X Q. 17. Make an estimate of how long?

A. Well, I should think from one to three years.

X Q. 18. What business was he in before that?

A. I couldn't say.

X Q. 19. Where did he live before that?

A. Chester, I think was his home.

X Q. 20. How much pay does he get as station master in his present place?

A. I couldn't say.

X Q 21. Do you know of his ever having received any property by will or descent, or in any other manner except by earning it himself?

A. I think he has.

X Q. 22. From whom and how much, in general terms?

A. From his mother, I think; I don't know how much.

237 X Q. 23. Do you know of his mother ever having much property?

A. I don't know how much.

X Q. 24. Make a rough estimate?

A. Well, I don't know as I could; I suppose she had a house and place in Chester that complainant had.

EDMUND W. ELY.

Sworn to before me this December 26, 1877.

JOHN A. SHIELDS, *Examiner, &c.*

NEW YORK, *December* 28, 1877—11 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Complainant's counsel here rests on the proofs and testimony in this cause, and gives notice to defendant's counsel that the prima facie case is now complete, and further gives notice to the defendant's counsel that the complainant and his counsel are now and here ready, without notice in writing, to proceed at once with the taking of such evidence as the defendant's counsel may desire to take.

The complainant's counsel now and here requests the defendant's counsel to proceed now with his defence, if any he has, in this cause, and that, too, without requiring any notice in writing by the defendant's counsel with reference thereto.

Complainant's counsel also notifies the counsel for the defendant that they are ready at once to proceed with this case, now in the hands of the defendant, and to continue the same from day to day (Sundays excepted), until the same shall have been completed.

238 United States circuit court, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN TRUST,
vs.
THOMAS L. JAMES, U. S. POSTMASTER, NEW YORK.

SOUTHERN DISTRICT OF NEW YORK, *ss:*

I, John A. Shields, an examiner duly appointed by the circuit court of the United States for the southern district of New York, do hereby certify that the several witnesses named in the foregoing depositions appeared before me on the days therein specified, and each of said wit-

nesses being by me first duly sworn to tell the truth, the whole truth, and nothing but the truth in said entitled cause, gave the testimony which is herein contained. That said testimony was reduced to writing in the presence of said witnesses, and from their statements, by a clerk duly appointed by me for that purpose, and after the same had been carefully read over to said witnesses, they severally subscribed the same.

I further certify that Marcus P. Norton, solicitor for complainant, and Hon. George H. Williams, of counsel for complainant, and Samuel B. Clarke, esq., of counsel for defendant, were present at the examinations.

JOHN A. SHIELDS,
Examiner.

239 At a stated term of the circuit court of the United States of America for the southern district of New York, in the second circuit, held at the United States court rooms, in the city of New York, on the second day of February, in the year of our Lord one thousand eight hundred and seventy-eight.

Present, the Hon. Hoyt H. Wheeler.

CHRISTOPHER C. CAMPBELL,
vs.
THOMAS L. JAMES. } In equity.

On reading and filing the subjoined consent, and on motion of Stewart L. Woodford, U. S. attorney, and of counsel for the defendant, it is ordered that Nelson K. Hopkins, esq., of Buffalo, New York, be, and he is hereby, appointed a special examiner of this court, to take the testimony at Buffalo, New York, under the 67th equity rule, as amended, of John Powers, and of such other competent witnesses as may be brought before him on the part of the defendant. And it is further ordered that A. J. Falls, esq., of Washington, D. C., be, and he is hereby, appointed a special examiner of this court, to take the testimony at Washington, D. C., under the 67th equity rule, as amended, of such competent witnesses as may be brought before him on the part of the defendant herein, or on the part of the complainant herein.

(Signed) HOYT H. WHEELER.

240 Consent is hereby given that an order may be made in the terms of the above draft.

Troy, New York, February 1, 1878.

(Signed) GEO. H. WILLIAMS,
Of Counsel for Compl't.

(Signed) STEWART L. WOODFORD,
U. S. Att'y and Def't's Sol'r.

(Endorsed:) Opened and filed as per stipulation, this first day of July, 1878.

United States circuit court for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES. }

Proofs for final hearing taken for and on behalf of complainant, before

A. J. Falls, esq., a special examiner appointed for the purpose, at
241 his office, in the city of Washington, D. C., on the 25th day of April, 1878.

Present, Geo. H. Williams, esq., of counsel for complainant, and Assistant U. S. Attorney. Samuel B. Clarke, of counsel for the defendant.

HORATIO KING, a witness called on behalf of complainant, being by me first duly sworn, testifies as follows, viz:

Direct examination:

By Mr. WILLIAMS:

Q. 1. State your age, residence, and occupation.

A. I am sixty-seven; residence, 707 H street, Washington, D. C.

Q. 2. State how long you were officially connected with the Post Office Department of the Government in Washington.

A. From March, 1839, to March, 1861.

Q. 3. Were you First Assistant Postmaster-General during any part of that time, and if so, how long?

A. From March, 1854, to the 12th of February, 1868, serving as Postmaster-General the rest of the time.

Q. 4. While you were First Assistant Postmaster-General, was the subject of stamps to be used in the post-offices in the United States under your jurisdiction or supervision?

A. It was.

Q. 5. Please to read what I now present to you, and state if you have any knowledge or recollection of it.

(Objected to by counsel for defendant, because the thing presented to the witness purports to be a printed copy of some original, and it is not proper to refresh the witness' recollection by it without preliminary
242 proof of the existence of the original, and that this copy is a true copy within the knowledge of the witness.)

A. "POST-OFFICE DEPARTMENT, APPOINTMENT OFFICE,
"*Washington, May 4th*, 1859.

"POSTMASTER AT TROY, N. Y.:

"SIR: You are hereby authorized to use for post-marking letters at your office, for the term of three months, 'Norton's Improved Marking Stamp.'

"Respectfully,

"HORATIO KING,
"*First Assistant Postmaster-General.*"

"POST-OFFICE DEPARTMENT,
"*Washington, D. C., March 23*, 1868.

"I hereby certify that the foregoing is a true copy of a letter on file in this department.

"In testimony whereof, I have hereunto set my hand, and caused the seal of the Post-Office Department to be affixed, at the General Post-Office, in the city of Washington, the day and year above written.

"ALEX. W. RANDALL,
"*Postmaster-General.*"

I have a perfect recollection of having written that letter.

(Answer objected to so far as it states the contents of an alleged letter, because it is not the best evidence.)

Q. 6. Was it written at the date which it bears upon its face?
243 (Objected to because it asks for secondary evidence.)

A. I feel sure that it was written on that date; I could not state it positively if I had not this memorandum.

(Answer objected to, because it is not shown that the memorandum to which the witness refers is a proper memorandum to refresh his memory.)

Q. 7. State what the book from which you have read said letter and certificate purports to be.

(Objected to because the book should be submitted to the court for its determination of that point.)

A. Purports to be a true and complete exemplification of the printed record in the cause of Shavor and Corse against the United States, No. 2571 in the Court of Claims, as the same appeared to the judges of the Court of Claims, when the said case came on to trial on the 28th of January, A. D. 1869, with what purports to be the seal of the court is attached, and a certificate signed by John Randolph, assistant clerk of Court of Claims.

Q. 8. Are you acquainted with the handwriting of James H. Marr?

A. I am.

Q. 9. Look upon the paper which I now present to you, and state whose signature is affixed to it.

A. Evidently that of James H. Marr.

Q. 10. What is the official position of Mr. Marr in the Post Office Department?

A. Chief clerk of the appointment office; I think that is his position.

(Complainant's counsel offers in evidence said paper, marked "Complainant's Exhibit, Z, Z—King, date, April 25, 1878."

244 Objected to by defendant's counsel as immaterial or incompetent, and irrelevant.)

Q. 11. Look upon the papers which I now present to you, and state what they purport to be.

A. They purport to be a certificate of the Postmaster-General, D. M. Key, that the annexed copies of letters are true copies of originals now on file in the Post-Office Department; the first letter purports to be from Marcus P. Norton, Troy, New York, April 2d, 1859, to Hon. Horatio King, First Assistant Postmaster-General; the next letter purports to be from the same to the same, dated Troy, New York, April 11, 1859; the third and last letter is also from the same to the same, dated Troy, New York, October 31st, 1859.

Q. 12. State if you have any recollection of having received about the said dates letters of which you now hold certified copies.

(Objected to as irrelevant and immaterial.)

A. I have no doubt that I received such letters, because they are noted on my memorandum previously referred to, but I have no distinct recollection of them, as of that to the postmaster at Troy, previously referred to of May 4, 1859.

(Complainant offers in evidence the papers referred to in the two next preceding answers of the witness, and they are marked "Complainant's Exhibits, X, X—King, April 25, 1878."

Objected to as irrelevant and immaterial, and because the originals of the letters would not be evidence on this testimony, even if their handwriting was properly proven.)

Q. 13. Are you acquainted with Marcus P. Norton?

A. I am.

245 Q. 14. Independent of any writings, can you remember generally that as early as the year 1859 he had conferences or correspondence with you or with the Post-Office Department, relative to a

combined post-marking and stamp-canceling instrument which he claimed to have invented?

(Objected to as leading and as assuming a fact.)

A. I do remember that as First Assistant Postmaster-General I had such correspondence and conferences with him as early as the year 1859.

Q. 15. Prior to the presentation or reference to such a combined post-marking and stamp-canceling instrument by Marcus P. Norton, had you ever known or heard of such a thing?

A. I never had.

Cross examination:

By Mr. CLARK:

X Q. 16. When was that memorandum to which you referred once or twice on your direct examination as your means of refreshing your recollection made?

A. I cannot give the exact date, but it is a rough draft of a synopsis that I made in preparing the case of the Norton combined marking-stamp, to present to Congress many years ago.

X Q. 17. You were the attorney or agent for the owners of a patent for such a combined instrument in their application to Congress for remuneration for the use of such instrument by the Post-Office Department, were you not?

A. I was.

X Q. 18. The alleged owners of such patent for whom you acted were Jacob Shavor and Albert Corse, of Troy, New York, were they not?

A. They were.

246 X Q. 19. You acted as such agent with an understanding that you were to receive a quarter of whatever sum was recovered, did you not?

A. I had a letter from Marcus P. Norton, agreeing, with the approbation, as I understood, of Shavor and Corse, that I should receive one-quarter, after deducting expenses.

X Q. 20. You still consider that you are entitled to receive a portion of whatever is recovered for the use of this combined stamp, do you not?

A. I think, in such event, that I should be at least reasonably compensated for my long and arduous services in the case.

X Q. 21. Why can't you fix the exact date in making the memorandum?

A. I can't fix it because it was so many years ago, and I have no memorandum at hand with which to refresh my memory. I think I could tell by reference to papers at home.

X Q. 22. Is your recollection good as to the dates of things that happened so many years ago?

A. Well, I think it is. Comparatively, it is remarkably good.

X Q. 23. Well, then, why can't you fix the date of making that memorandum?

A. While I know it is many years ago, I could not fix the exact year.

X Q. 24. Well, why can't you, if your memory of dates is remarkably good?

A. While my memory as to dates with respect to many important events is good, I do not profess to be able to give the exact month or year of all the events of my life. I will add that if it is necessary to get this information, I will take measures to do so with pleasure.

X Q. 25. Your memory being such as you have shown, do you swear

positively that you recollect the letters and conversations of Mr. Norton were made and written in regard to the combined stamp as early as 1859, you relying not at all on any written memoranda or other papers?

247 A. Well, I think I could, because I left the department on the 7th of March, 1861, and I know it must have been prior to 1860; also, from the fact that I know I had correspondence, or the department had correspondence with General Dix, who was postmaster of New York, I think, early in 1860, and I know such correspondence with Norton took place some time prior to the appointment of General Dix as postmaster at New York.

X Q. 26. Are you sure that General Dix was not appointed postmaster at New York as late as July or August, 1860?

A. I feel perfectly sure that he was not.

X Q. 27. Do you know in what year the patent was issued on which you acted as agent for Shavor and Corse?

A. No; I do not.

X Q. 28. The memorandum was made after the patent was issued, was it not?

A. I understood he had a patent at the time.

X Q. 29. Do you recollect whether it was before the close of the civil war that you acted as agent, as you have stated?

A. I think it was; I think Norton came to me as early as 1861 or 1862.

X Q. 30. You are sure that your connection with the matter didn't begin before you left the department, are you not?

A. I am perfectly sure, and I am sorry that such a question should be asked me. I not only never thought of any such agency before leaving the department, but it was with no little reluctance that I consented to act in the matter when I did.

X Q. 31. State, according to your best recollection, the year in which you first became such agent.

A. Well, I think in 1861 or '2.

X Q. 32. Now, how long was it after that before you made that memorandum for the application to Congress?

A. I think it must have been between 1861 and 1867.

248 X Q. 33. You are not sure that it was earlier than 1866, are you?

A. I could not state positively, but I know I had charge of the matter some time before I prepared the case for Congress.

X Q. 34. The memorandum was made at the time of such preparation, was it not?

A. Yes, sir.

Redirect examination:

By Mr. WILLIAMS:

R. D. 35. You have stated, in your cross-examination, that the alleged owners of the patent at the time you acted were Shavor and Corse. You may state what your understanding was as to how Norton was interested in the matter.

(Objected to as irrelevant and immaterial, and as improper on redirect examination.)

A. I do not think that I knew of Norton's having any partners in the matter when I first consented to act in the case. I do not remember of hearing of Shavor and Corse as transferees until near the time when the

case went to Congress; and I know that Norton always claimed to be largely interested in the case.

Recross-examination:

By Mr. CLARKE.

R. C. 36. From whom did you hear that Shavor and Corse were transferees?

A. From Norton, I presume, as my correspondence was almost entirely, if not altogether, with him.

HORATIO KING.

Subscribed and sworn to before me this twenty-fifth day of April, 1878.

A. J. FALLS,
Special Examiner.

249 W. S. DAVIS, a witness called on behalf of complainant, being by me first duly sworn, testifies as follows, viz:

Direct examination:

By Mr. WILLIAMS.

Q. 1. State your age, residence, and occupation.

A. Age, fifty-one years; residence, Washington, D. C.; occupation, assistant superintendent of the blank-agency division of the Post-Office Department.

Q. 2. How long have you been officially connected with that agency of the Post-Office Department?

A. Twenty-two years.

Q. 3. Look upon the two papers which I hand you now, and state what they are.

A. They are copies of contracts of E. S. Zevely. They are copies of original papers on file in our office.

Q. 4. Are there any other contracts of E. S. Zevely on file in your office?

A. I think not, sir.

Q. 5. Your office is the one in which contracts for furnishing stamps are kept on file, is it not?

A. Yes, sir.

Q. 6. Do these contracts provide for the furnishing of the combined post marking and stamp-canceling instrument substantially like those now in use?

(Objected to as not the best evidence.)

A. No, sir.

Q. 7. During the existence of these contracts did Mr. E. S. Zevely furnish to your office, in the Post-Office Department at Washington, any combined post-marking and stamp-canceling instrument like, or substantially like, the one now in use?

250 (Objected to because it is not shown what kind is meant, or that the witness is competent to testify on the point.)

A. No, sir.

Q. 8. Were all the stamps which he furnished to the department such as were described in the contract?

(Same objection.)

A. Yes, sir.

Q. 9. Did anybody have a contract to furnish the Post-Office Depart-

ment with the combined post-marking stamp-cance ling instrument from and after the early part of 1863; and, if so, who?

A. Messrs. Fairbanks & Company, from April 1st, 1863.

Q. 10. When did a man known as Deacon Gray become officially connected with the Post-Office Department in Washington?

A. He was appointed superintendent of the blank agency division of the Post-Office Department on the 15th of June, 1869, and took charge of the office on the 1st day of July, the same year.

Q. 11. Was that his first connection with that agency?

A. Yes, sir.

Q. 12. State in what year you first heard or knew of Norton's combined post-marking and stamp-canceling instrument.

A. My impression is that I saw it the latter part of 1858; I think before the patent was granted.

(Complainant offers in evidence copies of the contracts referred to by witness marked, respectively, "Complainant's Exhibit, Y Y—Davis, April 25th, 1878, A. J. Falls, examiner," and "Complainant's Exhibit, W W—Davis, April 25th, 1878, A. J. Falls, examiner."

Objected to as immaterial and irrelevant.)

251 Q. 13. Are you acquainted with A. D. Hazen? And, if so, state what office he holds.

A. Yes, sir; Third Assistant Postmaster-General.

Q. 14. Are you acquainted with his signature?

A. I have seen it very often.

Q. 15. Look upon the paper I now hand you, and state, if you know, whose signature is appended.

A. I take this to be Mr. Hazen's signature.

(Complainant offers the paper referred to by the witness, marked Complainant's Exhibit, V V—Davis, April 25th, 1878, A. J. Falls, examiner.

Objected to as irrelevant and immaterial.)

Cross-examination:

By Mr. CLARKE.

X Q. 16. Do you have a good recollection?

A. Well, I do, tolerably good.

X Q. 17. You referred to a paper when you testified as to when Deacon Gray became connected with the office, did you not?

A. Simply a memorandum.

X Q. 18. In your answer that your impression is that you saw Norton's combined post-marking and stamp-canceling instrument in the latter part of 1858 you state that you think it was before the patent was granted; when was the patent to which you refer granted?

A. I don't know. I think it was in 1859; that is, according to my best knowledge and belief.

X Q. 19. Did Norton have more than one patent, do you know?

A. I think he had.

X Q. 20. The patent to which you refer in that answer was the first one, was it not?

A. The patent of 1859.

252 X Q. 21. Do you swear positively that it was in 1858 that you first saw the instrument referred to?

A. No, sir.

X Q. 22. It may have been in 1859 or 1860?

A. It may have been in 1859 or 1860; yes, sir.

X Q. 23. How can you state positively, on your oath, that during the

period covered by the contracts which have just been offered in evidence' from 1863 to 1871, Mr. Zevely did not furnish to the Post-Office Department any combined instruments?

A. Because after the orders were filled the stamps passed through my hands.

X Q. 24. There were a good many orders and a good many stamps passed through your hands, and it was a long time ago; that is true, is it not?

A. Yes, sir.

X Q. 25. Do you swear that you may not have forgotten the person who furnished some of the stamps that passed through your hands?

A. I think I have not forgotten.

X Q. 26. Without reference to what you think, are you positive?

A. To the best of my knowledge, I swear positively.

X Q. 27. But you may be mistaken, may you not?

A. Hardly possible.

X Q. 28. Were you in that office every day from 1863 to 1871?

A. I would not like to say; I can say this much, however, that I have not lost three months in the twenty-two years that I have been in that department.

Redirect examination:

By Mr. WILLIAMS:

R. D. 29. You stated, in answer to a question of mine, that your
253 impression was that you saw Norton's combined post-marking and stamp-canceling instrument in the latter part of 1858; was the instrument for cutting the stamps or defacing them with ink marks upon them?

A. I cannot say, as I saw both devices; I cannot say which was the first one; I recollect seeing both of them.

R. D. 30. Did you see them both about the same time?

A. I do not know that I can recollect; I think it was, but I am not positive.

R. D. 31. When you saw the device for canceling the stamps by cutting, did you form or express any opinion about its practicability or value? (Objected to as immaterial, and because witness is not shown to be competent.)

A. I did, sir.

R. D. 32. What?

A. The stamp that I saw was not a cutting; it was like a needle point, something like perforators, as far as my recollection goes, to rough up the surface; the objection to that was, that it might injure the contents and become dull after using it a short while, and the perforator is entirely useless.

R. D. 33. The other stamp you saw was a stamp for blotting the postage stamp, was it?

A. Yes, sir.

Recross-examination:

By Mr. CLARK.

R. C. 34. By what material was this blotting done?

A. Do you mean the cancelor? Iron, the first one I saw.

W. S. DAVIS.

Subscribed and sworn to before me this twenty-fifth day of April, 1878.

A. J. FALLS,
Special Examiner.

254 Complainant offers in evidence a certified copy of a letter from John A. Dix to General Skinner, dated post-office, New York, August 28th, 1860, and marked Complainant's Exhibit U U, April 25th, 1878, A. J. Falls, examiner.

(Objected to as irrelevant and immaterial, and because of the unsworn statement of somebody not connected with the case at all.)

Complainant offers in evidence a certified copy of a letter from Abraham Wakeman, postmaster to A. N. Zevely, esq., Third Assistant Postmaster-General, dated January 3, 1863, post-office, New York, and marked Complainant's Exhibit T T, April 25th, 1878, A. J. Falls, examiner.

(Same objection.)

Complainant offers in evidence certified copy of a letter from General Skinner, First Assistant Postmaster-General, to Marcus P. Norton, dated July 25th, 1862, and marked Complainant's Exhibit S S, April 25th, 1878, A. J. Falls, examiner.

(Same objection.)

Complainant offers in evidence certified copy of a letter from A. N. Zevely, Third Assistant Postmaster-General, to Marcus P. Norton, dated October 7th, 1862, and marked Complainant's Exhibit R R, April 25th, 1878, A. J. Falls, examiner.

(Same objection.)

255 Complainant offers in evidence certified copy of the deposition of Edmund Hoole, in the case of Jacob Shavor and Albert C. Corse against the United States, marked Complainant's Exhibit Q Q, April 25th, 1878, A. J. Falls, examiner.

(Objected to as irrelevant and immaterial, and because Mr. Hoole ought to be examined in this case, and an opportunity given to cross-examine him, and because it is not properly certified.)

Complainant offers in evidence a certified copy of a letter from the Post-Office Department, signed D. M. Key, Postmaster-General, and dated April 24th, 1878, and marked Complainant's Exhibit P P, April 25th, 1878, A. J. Falls, examiner.

(Objected to as immaterial and irrelevant, and as an improper way of proving the alleged acts.)

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

UNITED STATES OF AMERICA,
District of Columbia, ss:

I, A. J. Falls, a notary public within and for said District, appointed by special order of the court, a certified copy of which is herewith annexed, to act as special examiner, under the 67th rule in equity, as amended in the cause stated in the caption, do hereby certify
256 that the foregoing examination was held at my office, No. 613 15th street, Washington, D. C., on the 25th day of April, A. D. 1878.

I further certify that, at the said time and place, I was attended by Horatio King and W. S. Davis, witnesses produced on behalf of complainant; that the said witnesses were, previous to the commencement of their respective depositions, by me severally examined, cautioned, and solemnly sworn to testify the truth, the whole truth, and nothing but the truth, and the said depositions hereinbefore appearing were re-

duced to writing by James D. Ryan, a disinterested party, in the presence of counsel for both parties, who assented thereto, and read over to said witnesses respectively, and were thereupon by them respectively subscribed, and were at the same time severally authenticated by my signature. I further certify that I am not of counsel, nor attorney, nor relative of either of the parties to this cause, nor in any manner interested in the result of the same.

In testimony whereof I have hereunto set my hand and affixed my notarial seal this 25th day of April, 1878.

[SEAL.] A. J. FALLS,
Special Examiner.

257 Circuit court of the United States for the southern district of New York.

CHRISTOPHER C. CAMPBELL, COMPLAINANT, and assignee in trust,
agst.
THOMAS L. JAMES, DEFENDANT. AND POSTMASTER of New York.

UNITED STATES OF AMERICA,
Northern District of New York, ss:

Be it remembered that on the 17th and 18th days of May, 1878, personally appeared Cyrus A. Sherwood and Marcus P. Norton, witnesses on the part of the complainant, before me, a special examiner, appointed by the circuit court of the United States for the southern district of New York, to testify and the truth to say in a certain matter now depending and undetermined in the circuit court of the United States for the southern district of New York, on the equity side, wherein Christopher C. Campbell, assignee in trust, is complainant, and Thomas L. James, U. S. postmaster at New York, is defendant.

IRVING BROWNE,
Special Examiner.

258 Circuit court of the United States for the southern district o New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT, and assignee in trust,
agst.
THOMAS L. JAMES, DEFENDANT, AND U. S. postmaster at New York.

Proofs for final hearing taken on the part of the plaintiff in the above cause, before Irving Browne, special examiner, under the 67th rule in equity.

TROY, N. Y., *May 15th*, 1878—9 a. m.

Present, Marcus P. Norton, esq., solicitor, and George H. Williams, esq., counsel for complainant.

By consent of complainant's solicitor, hearing was adjourned to May 17th, 1878, 10 a. m., on account of absence of defendant's solicitor.

MAY 17th, 1878—10 a m.

Complainant appeared by Marcus P. Norton, esq., and George H.

Williams, esq.; and Samuel B. Clarke, esq., assistant U. S. district attorney, appeared for the defendant.

259 Complainant's counsel offers in evidence a certified copy of a letter dated May 4th, 1869, from Horatio King, First Assistant Postmaster General, to the postmaster in Troy; received and marked King, A B C—I. B., Ex., May 17, 1878.

(Objected to by defendant's counsel as irrelevant and immaterial.)

Complainant offers in evidence a certified copy of a letter from C. E. Wheeler to Hon. A. M. Zevely, dated November 28, 1863; received and marked Wheeler, D E F—I. B., Ex., May 17, 1878.

(Same objection made.)

Complainant offers in evidence certified copy of an assignment by Charles Eddy, Jacob Shavor, and Albert C. Corse to W. W. Secombe, dated October 7, 1871; received and marked Secombe, G H I—I. B., Ex., May 17, 1878.

(Same objection, and also that the instrument contradicts the certificate, it being clear that it is not an assignment.)

CYRUS A. SHERWOOD, called as a witness for the complainant, and being duly sworn, testified as follows:

By Mr. WILLIAMS:

Q. 1. State your name, age, residence, and occupation.

A. Cyrus A. Sherwood; age 62 years; residence Troy, N. Y.; am a machinest and model maker.

260 Q. 2. Look on the paper I now present to you, and state what it is.

A. (Witness looking at paper). A bill for work that was done for Mr. Norton, in the years 1857, 1859, and 1860, 1862, 1863, 1864, and 1865.

Q. 3. Is this paper a copy of anything; and, if so, what?

A. It is a copy from my books.

Q. 4. Were the entries as they appear in this paper made in your books at the dates therein specified?

A. They were.

Q. 5. Was the work done at the times as stated in this paper?

A. It was.

Q. 6. This paper shows that work was done at various times upon stamps; was that work done upon stamps of one kind or form, or various kinds and forms?

A. There were various kinds and forms made at that time.

Q. 7. When did you first make a stamp for Marcus P. Norton which when used would post mark a letter and cancel a stamp thereon at the same time?

(Objected to by defendant's counsel as assuming a fact, and as leading.)

A. As near as I can remember, it was in 1857.

Complainant offers in evidence the paper referred to by witness, as a part of his deposition; received and marked Sherwood, J K L—I. B., Ex., May 17, 1878.

(Objected to by defendant's counsel: First, because witness states that it is a copy, and it is therefore not the best evidence; second,
261 because it is not shown by whom the original entries were made or that they were made under the witness' supervision, and because it is not shown that the paper offered is made up from any book of original entries.)

Cross-examination:

By Mr. CLARKE:

X Q. 8. What book is this bill of work—Ex. J K L—copied from?

A. From books that I have in my possession.

X Q. 9. How many?

A. Well, I think there are four, taking the whole of the account.

X Q. 10. Where are they?

A. Part of them are at my house, and a part in Green Island, at my sister's.

X Q. 11. Where is Green Island?

A. Just across the river, opposite Troy, in Albany County.

X Q. 12. Will you get those books and bring them here?

A. I can.

X Q. 13. Who made this copy?

A. I made it myself.

X Q. 14. Was your testimony on the direct examination based upon your having had your memory refreshed by the entries in your books, or by this copy thereof?

A. By the entries in my books—it was refreshed by the entries in my books.

X Q. 15. I think you have stated that this paper —Ex. J K L—was made up from four books; have you, or did you have at the several years mentioned in this exhibit, any other books in which entries of work done for other parties were made?

A. The entries were made in the same books for other parties; I never kept but one book at a time.

262 X Q. 16. Can you swear positively as to what sort of stamp was made, or worked on, by you on May 8th, 1857, the entry corresponding to which date in this exhibit is "to three hours' finish stamps"?

A. Well, by the word "finish" is meant labor on the stamp, as near as I can remember. It was the first stamp Mr. Norton got up—dating wheels stamp.

X Q. 17. Can you state positively about it?

A. There is no question in my mind as to it, but I wouldn't swear positively.

X Q. 18. Can you swear positively as to what sort or kind of stamp was worked on by you on any of the other dates mentioned in this exhibit?

A. I can.

X Q. 19. Can you so swear with reference to any of the other dates in 1857 or 1859?

A. I couldn't swear positively as to the style of stamp, with the exception of the first one; th——

X Q. 20. The first one appears to be on May 8th, 1857. I think you have stated that you could not swear positively as to that?

A. My answer before was that I could not swear positively as to the particular date; that being the date of its commencement; my impression is that it was.

X Q. 21. Did you not swear positively on your direct examination that the work was done for Mr. Norton at the times stated in this paper?

(Question 5 and answer read to witness.)

A. It was—that's correct.

X Q. 22. How, then, can you be uncertain as to the dates on which the work was done on the first stamp to which you have referred?

A. Mr. Norton had other work done at the same time, and different stamps. I think I am positive that the first charge was made on the first stamp. I couldn't swear positively that that was so.

X Q. 23. So that I understand you to mean that you cannot
263 swear positively as to the sort or kind of stamp that was worked on by you on any of the dates in 1857 and 1859 which are shown in this exhibit?

A. With the exception of one—the first one. That I can swear positively as to.

X Q. 24. What was the first one?

A. It was a dating wheel stamp, the wheels giving the dates, with a die for the office and year in the top of the frame that held it, blotting or canceling at one end, the impression given by a blow on the lever by the hand.

X Q. 25. This lever was hung in a frame, was it not?

A. It was not.

X Q. 26. How was the lever affixed?

A. It was hung to a stud on the bed-piece.

X Q. 27. Was the whole instrument a hand stamp?

A. It was.

X Q. 28. Explain what you mean by the bed-piece.

A. The foundation on which the stamp was fastened.

X Q. 29. I understand you to mean that there was a foundation, which was not moved when the stamp was used, from which projected a stud, and through this stud worked a lever, which moved with an action or blow of the hand, and which was brought back to its place by a spring, or some similar means; is that correct?

A. That's what I mean by the foundation; that's correct.

X Q. 30. The stamp had wheels with letters and figures on them, which could be rotated so as to make any particular date?

A. It had.

X Q. 31. Did it have any other wheels, so that if necessary a wheel could be put in proper position, and such words as "free," "paid," "advertised," or similar words used in post-offices, could be printed?

264 A. It had.

X Q. 32. Did it have any other such wheels for any other purpose?

A. None but the dating wheels.

X Q. 33. Was there any other attachment to the frame of the stamp except these wheels that you have spoken of?

A. There was a tight plate giving the office or printed matter that wanted to be printed.

X Q. 34. Is that all?

A. As near as I can remember.

X Q. 35. What means were there for canceling?

A. In the rotating wheel—in previous question—that lies level with the tight plate, at the end of the tight plate.

X Q. 36. Do I understand you to mean that in addition to the rotating wheels you have spoken of, by which the words "free," "paid," etc., could be printed, there was also a wheel by which a cancellation mark could be made?

A. The cancellation could be on one section of the wheel that had "prepaid" on it, or a duplicate put in at the same place.

X Q. 37. I am not asking what it could be, but what it was.

A. The canceling was on the wheel that was marked "prepaid." There were several of those wheels that fitted the same place, with different designs and marks on them.

X Q. 38. What configuration was there on the canceling face?

A. I think there were straight marks merely.

X Q. 39. Which of the books from which Ex. J K L is made up in your office—covering what years?

A. Those of the years 1859, 1860, 1862, and 1864 are at my house. The others are across the river.

X Q. 40. Is your recollection accurate as to the dates of things that happened so long ago, unless it is refreshed from books?

A. It is not.

265 Redirect examination:

R. D. 41. You speak of the dating wheel stamp as the first one got up by Mr. Norton; you mean by that, I suppose, the first one that you got up for him?

A. That is what I meant.

CYRUS A. SHERWOOD.

Subscribed and sworn to before me this 17th day of May, 1878.

IRVING BROWNE,
Special Examiner.

MARCUS P. NORTON, called as a witness on the part of the complainant, and being duly sworn, testified as follows:

Direct examination:

By Mr. WILLIAMS.

Q. 42. State your name, age, residence, and occupation.

A. My name is Marcus P. Norton; residence, Troy, N. Y.; 48 years of age; occupation, lawyer.

Q. 43. There has been filed in this case a certified copy of a letter which reads substantially as follows:

TINMOUTH, VERMONT, *Aug. 7th*, 1854.

COMMISSIONER OF PATENTS:

SIR: I send to day an additional description of my machine for mailing and folding letters, etc. When will my caveat expire? The copy you sent me has no date. I wish to petition for a patent before
266 the caveat shall expire. Please communicate the answer to Mr. Hodges, if I trespass your rules, etc.

Respectfully, your obedient servant,

MARCUS P. NORTON.

Did you write that letter; if so, when and where?

A. I wrote that letter on the 7th day of August, 1854, at my father's house in the town of Timmouth, Rutland County, State of Vermont.

Q. 44. What was the additional description referred to in that letter?

A. The additional description referred to in that letter is contained in the caveat filed as an exhibit by the complainant in this suit, and is, if I am not mistaken, the first paper introduced and filed as evidence by the complainant; it was and is denominated an additional description to that caveat, and was dated Timmouth, Vt., Aug. 7th, 1854.

Q. 45. Prior to 1861 was there a combined and post marking and stamp-canceling instrument or device in use anywhere, with your knowl-

edge, except for the purpose of experimenting as to its utility and value?

A. None whatever.

Q. 46. When did you first present to the Post-Office Department at Washington your combined post-marking and stamp-canceling instrument?

A. The one described by the witness Sherwood in this examination I exhibited in the Post Office Department in Washington for examination and consideration in the fall of the year 1854; subsequent to that time, and in the winter of 1857 and 1858, I presented to the Post-Office Department a device post-marking the letter envelope with the name of the post-office and the date, and at the same time, and by the same blow of the instrument canceling the postage stamp on the letter, and at that time and at other times thereafter endeavored to get
267 that instrument used by the Post-Office Department for that purpose.

Q. 47. Explain your delay until January, 1863, in applying for a patent.

A. In the fall of the year 1860, the Post-Office Department expressed a willingness or desire to use the invention above referred to and contained in the bill in this suit, and had some correspondence with the postmaster at New York with reference to the same. I consented that that invention might be used by the government or Post-Office Department simply and only for trial tests or experimenting. Those tests or experiments were commenced in the post-office in the city of New York some time in the fall of 1860, or the early winter of that time Those experiments were continued during the year 1861, and for some time in the year 1862, at which time I called at the Post-Office Department and made inquiries as to whether the tests that had been made were satisfactory to that department. I was told that no satisfactory answer could be given me at that time, because no application of reference in writing had been made to the postmaster in New York; within a few days after that time I wrote a letter to the Postmaster-General requesting him to refer that invention to the post-office at New York for experimental tests; a few days afterwards I received a letter from the Post-Office Department saying, among other things, that my invention had been so referred, and in due time would be reported upon; on the 3d day of January, 1863, a report was made by the postmaster in New York to the Post-Office Department, saying, among other things, that the tests or experiments had proven entirely satisfactory to the post-office in New York, and recommended the general adoption by the Post-Office Department of that invention. On the 5th day of January, two days after that report was made, I filed my application for a patent on this invention in the Patent Office of the United States. Had
268 the postmaster at New York made that report at an earlier time after December, 1860, I should have filed the application for a patent as soon as it could have been done, having my model and drawings prepared for that purpose some time in the early winter of the year 1861.

(Such parts of answer as relate to the contents of written instruments objected to, on the ground that it is not the best evidence.)

Q. 48. Give as near as you can the time when you first caused a combined post-marking and stamp-canceling instrument to be made substantially like the one now in use.

A. I had such an instrument made shortly after the filing of my caveat in the United States Patent Office, on or about October 20th,

1853, under the title of "machine for mailing and folding letters;" two or three of such were made between that time and the preparation of my additional description in that caveat, dated Tinmouth, Vt., Aug. 7th, 1854; the post-marking device, the postage canceling device, and the cross-bar were each constructed and used in that machine as and for the same purpose as they are now used.

Q. 49. Was there any bag tied or attached to the model which was filed in the Patent Office when you obtained your patent in April, 1863?

A. None whatever; the drawings on page 31 of the printed pleadings and papers in this cause correctly and fairly represent the model used on that occasion and all of it; I mean page 31 of the amended bill, also page 29 of the original bill and pleading.

Q. 50. Did you know W. W. Secombe, and if so, is he alive or dead?

A. I knew him very well for many years; his home and business were in the city of New York; he is now dead.

269 Q. 51. State as near as you can about the time of his death.

A. He died in September or October, 1877, or about that time.

Q. 52. Do you know whether or not subsequent to the 10th of July, 1873, the date of his reassignment to Miss Helen M. Ingalls, he claimed any right or interest in or under the patent to her of October 4th, 1870, division A, in this suit?

A. He never did to me, nor have I ever known that he made or pretended to make any claim of the kind stated in the question; in 1872, or fore part of 1873, I brought a suit against Mr. Secombe, in the State courts, which he afterwards settled, and in that settlement he was to reassign, and did reassign, all the right, title, and interest which the Secombe Manufacturing Company, or he himself, had in any letters patent that had been granted to me.

Q. 53. Did that include the patent or patents that had been assigned to him by Miss Ingalls?

A. It not only included the patent of April 14, 1863, and all of its reissues, but also several patents upon improvements for canceling internal revenue stamps, and each and every patent that had been assigned to that company or to him by myself or by Miss Helen M. Ingalls, my assignee. I mean by this answer to include the invention and patent on which this suit is founded.

Q. 54. Have you had any conversations with him on the subject since the commencement of this suit?

A. On one or two occasions I have had conversations with him on this subject since the commencement of this suit.

Q. 55. State for what purpose you called on him.

A. I called upon him for the purpose of obtaining several original papers that I believed to be in his possession relating to the subject matter involved in this suit.

Q. 56. What took place at the time?

270 (Objected to as immaterial.)

A. I made inquiries of him as to whether he had certain original papers relating to this matter, stating to him at the same time the papers that I desired; he said he thought he had them, and having changed his office—place of business—not long before that time, he said he would look them up and hand them to me the next time I might be in New York; I told him that any time would answer before we began to take the proofs in this case.

Q. 57. Did you subsequently call for the papers?

A. When next in New York—after that conversation—I went to his place of business, saw his partner in business, inquired of him for Mr.

Secombe; he told me that Mr. Secombe had suddenly died of heart disease, and had been dead about ten days at that time; I went to that place at that time for the purpose of obtaining the papers that Mr. Secombe had promised that I should have.

Cross-examination:

X Q. 58. Have you any interest, direct or indirect, in the result of this suit?

A. I can't answer that question until the suit is determined; if the parties holding the title to the patent in this suit shall recover anything against the defendant and shall then choose to give me something I certainly shall not refuse it; I have no promise or agreement from the parties holding the title to this patent, either written or verbal, by which they agree to pay me a single dollar, or any other sum out of this patent and invention.

X Q. 59. Whom do you mean by parties holding title to this patent?

A. I mean the complainant, Christopher C. Campbell, assignee in trust upon the terms and conditions in the assignment to him mentioned in the bill in this cause, and there set forth at large.

271 X Q. 60. Have you any interest, direct or indirect, in the patent granted to you in April, 1863, or in any reissue thereof?

A. The records of the Patent Office, the bill in this cause, and the evidence so far taken show that I have not; if the complainant in this cause shall recover upon that patent or its reissues, and shall keep faith with Miss Helen M. Ingalls, who assigned to him the patent in question, then she and my wife and children will be benefited; if that be called an indirect interest, then I am in that wise interested; otherwise I am not. As I have before stated, I have no agreement, in writing or otherwise, by which, in law or otherwise, I can compel anybody to pay me a dollar; the title to the patent named in the question, and all rights under it, and its reissues have, in my opinion, been fully and entirely vested in Mr. Campbell by means of the deed of assignment set out in detail and at large in the bill in this cause, and upon the terms and conditions specified in that deed of assignment.

X Q. 61. Have you any pecuniary or proprietary interest, direct or indirect, in the patent of April 14, 1863, or in any reissue thereof?

A. My answer to this question is the same as my last two previous answers.

X Q. 62. Can you give a categorical answer to the last question?

A. I don't think I can or ought to in view of the last two questions and the answers thereto.

X Q. 63. Explain why you cannot answer the question before the last categorically.

A. Because, in my opinion, your last two questions cover the entire ground of the inquiry, and the answers to those questions being of a somewhat itemized statement, a categorical answer, "Yes" or "No," would be improper in view of those statements, and the whole subject matter of the inquiry as to my interest having been fully inquired about by those questions, and my answers to the questions
272 being full and in detail, the court will understand from those answers precisely how I stand with reference to the subject matter of the inquiry.

X Q. 64. You mean, then, as I understand, that you have got some pecuniary or proprietary interest in the patent or its reissues inquired about—is that correct?

A. I have said nothing during my cross-examination that would lead you to suppose or to suspect any understanding of the kind you have named in your question; you must, therefore, judge for yourself whether you are correct or not in your allegation made in the question.

X Q. 65. Do you expect to get any money out of this suit?

A. I have no doubt that if exact justice be done in this cause the complainant will recover all he has named in the bill besides his costs, and I have no doubt that he will distribute such recovery according to the terms and conditions of the assignment set out at large in the bill; I shall be quite satisfied if my wife and children shall receive in this or any other recovery on this patent the money agreed to be paid by Mr. Campbell under that agreement; I can't say what Mr. Campbell may do, but if when he is through with this litigation he shall deem it proper to pay me any money I shall not refuse to accept it; but I have no claim, in writing or otherwise, that requires him to pay me any money whatever out of this suit, or out of any recovery on this patent; under such circumstances it is difficult for me to see or to know how I can expect any money from Mr. Campbell.

X Q. 66. Do you expect to get any money out of this suit?

A. My answer to that question is the same as last above given.

X Q. 67. Can you give no better answer than that?

A. I think that answer is sufficient; it is plain and meets the
273 whole subject matter of the inquiry in my opinion; were that question put to the complainant I have no doubt he could tell you what he expects; I would further say that the assignment of this patent and all its reissues, made by myself to Miss Helen M. Ingalls, and by her to the complainant, Campbell, are each actual bona fide assignments, made and recorded in good faith, and the title being thus vested in the complainant it strikes me that the examining counsel ought to know that I cannot receive or obtain in any manner whatever any money in this suit, other than that paid to me for professional services, the same as in any other suit.

X Q. 68. I am not after what you can legally get by process of court, but I do want to know what you expect, and I ask the question the third time whether as a result of this litigation you expect to obtain any money from any source?

A. And for the third time I answer as I have before answered; and I further answer that I have no legal or equitable title or claim whatever in or to the patent on which this suit is founded, and to sustain this statement I refer the court to the several certified copies of deeds of assignment put in evidence by the complainant's counsel; a careful reading of each of those papers ought to convince examining counsel that there was no necessity of putting this question, as he says, for the third time; and I have no further or other answer to make to the subject matter of this inquiry, having fully and fairly stated every matter of fact touching the subject matter of the inquiry within my knowledge.

X Q. 69. You are determined not to let me know whether or not you expect to make any money out of this litigation, are you?

A. I am determined on nothing but the truth and the whole truth concerning this matter of your inquiry, and that I have already given you, and can make no other statement; you already know just as much
274 about it as I know, no more and no less; I have withheld nothing concerning the subject matter of the inquiry; I have neither motive nor desire to keep from you the exact facts, not only about the subject matter of the inquiry, but any other matter of fact involved under the pleadings in this cause; and I certainly do hope that the time will

come, if it has not already, when you shall have some information in this cause that shall satisfy you that the complainant withholds nothing and desires nothing but truth and justice as between himself and the defendant.

X Q. 70. Is your expectation a fact?

A. I don't know what the counsel means by the question.

X Q. 71. What word don't you understand there? You have stated that you have given me all the facts. I think that the expectation of your mind with which you gave your direct testimony is a fact, and I want to find out what that fact is.

A. To the first part of the question I answer—each and every word in the connection in which they are arranged; my answer to the second branch of the question is, that where I said I had given you the facts I referred to my answers to your last previous questions; as to the third branch of your last question, I disagree with you, and have therefore no answer to make.

X Q. 72. Have you told me anywhere whether you expect to make any money out of this litigation or not?

A. I have endeavored in the best way I know how to show to you where the legal and equitable right and title to the patent in suit now is, and I have tried to show you from that fact that it would be impossible for me in any manner whatever, by law, or by any other means of a coercive nature, to receive a single dollar out of this suit or out of this patent; if you cannot understand that, it is certainly not my fault; and I have also told you that I do expect some time to be paid for
275 professional sevices; I have also fully explained to you as to what Helen M. Ingalls expects, and has a right to expect, and that I have nothing to expect from her, having, as before stated, no agreement in writing or otherwise with her or anybody else on the subject matter of expectation; it is, therefore, difficult for me to see how I can expect.

X Q. 73. Does the amount of compensation which you expect to obtain for professional services depend at all upon the result of the suit?

A. It does not.

X Q. 74. Aside from what you expect to obtain for professional services, have you told me anywhere whether or not you expect to get any money out of this litigation?

A. I have told you all I know concerning the subject matter of the inquiry.

X Q. 75. Do you know whether or not you have any expectation of getting anything out of this litigation except for professional services?

A. In my previous answers I have told you all I know concerning the subject matter of this inquiry; I have no personal knowledge or information of any kind whatever different from that I have so often stated to you on this record concerning the subject matter of the inquiry; the certified copies of the several deeds of assignment filed by the complainant's counsel, and together with the one set out at large in the bill, will give you all the information there is to be had on this matter.

X Q. 76. Do you understand the last question, in which you were asked, "Do you know," etc.?

(Last question read.)

A. I understand the last question, and have, in my opinion, made a full answer to it.

X Q. 77. Since you understand the question, I ask it again: "Do you

know whether or not you have any expectation of getting any money out of this litigation, except for professional services?"

276 A. Since you have asked the question again, I make the same answer to it; and I further say that I have no knowledge or information from any source whatever as to what the future may have in store for me.

X Q. 78. You have resolved that on this cross-examination you will not make categorical answers or suffer yourself to be pinned down to precise and definite positions, have you not?

A. I have made no resolve of that kind, but I have resolved, come what may, to observe the obligations of my oath, viz, to tell the truth, the whole truth, and nothing but the truth, not only on my direct examination but also on your cross examination.

X Q. 79. Did Jacob Shavor and Albert C. Corse execute any instrument about the month of February, 1864, purporting to reassign to you the patent which was granted to you in April, 1863?

(Complainant objects to this question as not pertinent to the direct examination, and states that if defendant proceeds with the inquiry into this or other matters foreign to the direct examination, he must make Mr. Norton his own witness for those purposes.

Defendant's counsel calls plaintiff's counsel's attention to the fact that witness, in answering questions in regard to his interests, has called the court's attention to the assignments, copies of which have been put in evidence; it is with reference to the witness' interests in the case that this question is now put.)

A. On the evening of the 23d day of February, 1864, in my office in this city, and before John T. Lamport, a United States commissioner, Jacob Shavor and Albert C. Corse signed and sealed an instru-

277 ment in writing of the character contemplated in the question, a certified copy of which has been filed in evidence by complainant's counsel; that instrument was in my handwriting, read by me to them, and they stated to the commissioner that it had been read to them, and that they understood it, and thereupon Mr. Lamport subscribed his name as a U. S. commissioner, having previously sworn those persons to that part of the instrument that was in the nature of an affidavit; and that instrument was left by them with me on that evening.

X Q. 80. Was the instrument produced by the witness Campbell as the original of that reassignment, signed, sealed, and delivered on the 23d February, 1864?

A. I have not a single doubt but that it was, for if it had not been, Mr. Lamport would not have signed his name in the official character he did, and the instrument bears that date.

X Q. 81. Did the instrument which you have stated was signed and sealed by Shavor and Corse on the evening of February 23, 1864, have the same written matter and the whole of the same written matter which precedes the signatures of Shavor and Corse in the instrument produced by Mr. Campbell?

A. Every word and every figure were the same down to and including the jurat; the affidavit and certificate that now appear on that original paper, and made by Mr. Lamport with reference to the authenticity of the paper, were subsequently put there, I think, some time in 1870.

X Q. 82. Had the half sheet preceding the signatures of Shavor and Corse been folded before it was written on?

A. If it had been folded before I had no knowledge of it, either then or since.

X Q. 83. You would have noticed it if it had been, wouldn't you?

A. If it had been, and I had knowledge of it at the time, I
278 should not have written on it; and in writing on it I did not discover anything in the way of the writing.

X Q. 84. Did you cancel the 50-cent. stamp—I think it was—using the initials of Shavor and Corse?

A. I am not certain about that; if they left my office without canceling the stamp that evening, it is very likely I canceled it for them.

X Q. 85. What is your best recollection as to whether or not you canceled the stamp?

A. I have stated it in my last answer.

X Q. 86. If you did cancel the stamp, did you use your own initials or those of Shavor and Corse?

A. I don't think I would have used mine.

X Q. 87. Why?

A. Because I did not execute the instrument. If I canceled that stamp I think I must have used their initials; and yet it is not material how the stamp was canceled if it was canceled to prevent its second use. Were that instrument here I could state positively whether I canceled the stamp or not.

X Q. 88. Did Shavor and Corse give you any authority to put their initials on that stamp?

A. If they did not, it was not necessary they should.

X Q. 89. Please answer my last question.

A. I answer the same as in my last answer.

X Q. 90. You were present, were you not, when Dr. Ward, the microscopist, stated that the handwriting on the stamp was made by the same person who wrote the body of the instrument, or substantially that?

A. I don't think I was present when any such statement was made; and if he made such statement I don't think he would know any more about it than I myself would know if you would show me the instrument to which you refer. I know my own handwriting quite as well, and, I think, better than anybody else, with or without an instrument of any kind.

279 X Q. 91. You were present, were you not, during the whole of the examination of Dr. Ward?

A. I was not. His examination was entirely in the hands of Mr. Williams, complainant's counsel. I heard part of it.

X Q. 92. You read over his testimony, did you not, on the day it was given?

A. I have no recollection of reading his testimony on that day or any other day. I frequently read the testimony of witnesses on the part of defendant, but never those which I regarded as so utterly immaterial as I supposed that of Dr. Ward would be after seeing him in the front room of this office looking with a microscope after fly-specks, or something else on that instrument. The instrument was plainly written; in my judgment needed no inspection of that kind, and I couldn't to-day tell all that he testified to, but I do remember of his saying something with reference to the seals and signatures to that paper being genuine.

X Q. 93. Do you recollect of Dr. Ward's stating anything with regard to the handwriting on the 50-cent, revenue stamp?

A. If he said anything in my presence about that I don't recall it now,

nor do I deny but that I may have canceled that stamp. If I did so, I did it because I believed I had a right to do it.

X Q. 94. Have you not frequently canceled revenue stamps on instruments not executed by you, using your own initials?

A. I don't remember about that. If I ever did do so, it was because I believed I had the legal right. I know it to be a frequent occurrence for banks to cancel revenue stamps on checks that were not canceled.

X Q. 95. When was that alleged original reassignment from Shavor and Corse attached together at the top in the form in which it appeared when it was put in evidence?

280 A. The reassignment from Jacob Shavor and Albert C. Corse to me, and of the date of February 23, 1864, was, some time during the year 1869, refastened or resecured at the top by myself. I did that because the top was worn away, and the fastening had become loose, and I bound it with an extra thickness of paper and put in, I think, four extra metallic fastenings, two at each side of the middle one. The middle fastening, I am inclined to think, was also new. At that time I found it necessary so to secure it, and to put it upon record in the Patent Office about the time the extra fastenings were put into the paper.

X Q. 96. You also gummed the sheets together then, didn't you?

A. The sheets had been previously secured by an adhesive substance known as gum-arabic; that paper had been used before the Senate Committee on Post Offices and Post-Roads, and, if I am not mistaken, had been to the Government Printing House, and printed, with other papers that were used before that committee. It being an original paper, on my application to the chairman of that committee he returned it to me, and it, on receiving it, I thought it best to refasten it by a better adhesive substance, I did so before recording it in the Patent Office, which was, I think, some time in the summer of 1869. My purpose in doing that was to make each and every of those sheets firmly secured together, as I had found a necessity existing for that course. Previous to its going to the Senate committee it had been used before the Committee on Post-Offices and Post Roads in the House of Representatives; that House returned that paper to me, together with other papers, by a resolution of that House, and that resolution was passed some time, I think, during the session of 1865.

X Q. 97. When were the sheets, on which Lamport's affidavits now appear, attached to that instrument?

281 A. I can't say about that, but I presume at the time the instrument was made; it was a sheet intended to protect the sheet on which the signatures were. The custom in my office always was to put an additional or extra sheet against the last sheet of any important instrument that had writing upon it, for the protection of that sheet, and then to put over that a wrapper of buff or yellowish color. I have no doubt that sheet was put there at that time.

X Q. 98. Were any metallic fastenings used when the instrument was first made, or was gum-arabic alone used?

A. Both were used. The middle one, of the one in the centre of the paper, was the same as the one now in that instrument.

X Q. 99. Was any other than that one?

A. No.

X Q. 100. Is the cover or wrapper now on the instrument the same that was originally put there when the instrument was made?

A. It is the same identical one.

X Q. 101. How did it happen that the rough usage which made it

necessary to refasten the instrument did not also so injure the wrapper as to lead you to put a new wrapper on?

A. The end of that wrapper was entirely worn away, if I mistake not; hence the necessity of putting on the extra binding that now appears on that paper. Then, again, there was some writing on that wrapper in the handwriting of Horatio King, formerly Postmaster-General, and it was marked in his handwriting No. 21, that being one of the number of the several papers that were used before the House Committee on Post-Offices and Post-Roads in 1864, and in 1865 withdrawn by me under resolution of the House and transferred by me to the Senate committee of the same character.

Adjourned by consent to May 18, 1878, at 9 a. m.

282 MAY 18TH, 1878—9 a. m.

Counsel for respective parties appeared as before.

Cross-examination of Mr. NORTON resumed:

X Q. 102. Yesterday you stated, in answer to question 95, "the middle fastening, I am inclined to think, was also new;" in answer to question 98 you stated, "the middle one or the one in the centre of the paper was the same as the one now in that instrument." Which of those answers do you wish to abide by?

A. Each of them, because I see no inconsistency as to those answers, or either of them, when properly understood.

X Q. 103. How do you wish them understood?

A. The first fastening of the kind that now appears on the middle of that instrument had to be removed at the time I put on the binding strip at the top, and it is very likely that the points that are turned down on the outside binding were one or more broken off, rendering it unfit for use; if that were so, a new one of the same kind was used in its place; I am not entirely clear on this point, but think it more than likely that the first one was broken in the respect stated in reference to the points at the same time it was removed so as to allow me to put on the heavy binding strip at that end of the paper; if they were not so broken, then the same binding strips were used that were first put in the paper.

X Q. 104. Do the sheets of which that reassignment is composed have two pages or four—that is, are they folded at the top where they are fastened?

A. They are not folded at the top; they are separate sheets, such as I always used in my office, and I had those sheets and all the paper of that kind that I used manufactured for me here in the city.

283 X Q. 105. Do you wish to make any explanation in regard to your oath as to interest in the case of Shavor and Corse against the United States in the Court of Claims?

A. I should be very glad to do so, for the reason that I know that a misconstruction has been put on that deposition in reference to the subject-matter contained in the question.

X Q. 106. Give it.

A. My assignment to Jacob Shavor and Albert C. Corse of my patent dated April 14, 1863, and number 38175, and dated on or about April 20th, 1863, was made to those persons in order that I might be a witness in a suit on that patent or any of its reissues for the purpose of testing the validity of the patent, it having at that time been assailed and denied by the then Postmaster-General, Montgomery Blair, in two or three letters now in my possession, and addressed by him to the Committee on Post-Offices and Post-Roads of the U. S. House of Representatives, where

I had a bill or joint resolution pending contemplating compensation for this patent. Upon the receipt of those letters by that committee I was notified by its chairman, John B. Alley, that it would be necessary to test my claim in the courts before that committee would take further action. Jesse O. Norton, a member of that committee, was the subcommittee to whom was referred the pending matter of compensation then before that committee. I consulted with him as to the course I should pursue with reference to a suit, as there were matters concerning the history of this invention which I considered would be important testimony in a suit of that kind, and inasmuch as I could not be complainant, or plaintiff, and at the same time a witness in the same suit, he advised me to make an assignment of the patent to some friends or clients of mine in whom I could trust. Being the attorney and counsel for the firm of Charles Eddy & Co., of this city, in which Jacob Shavor
284 and Albert C. Corse were partners, I consulted that firm about taking an assignment of that patent; Mr. Charles Eddy refused to have anything to do with it, but I subsequently made an arrangement with Jacob Shavor and Albert C. Corse to take the assignment and become plaintiffs in a suit at law against a subcontractor by the name of Edmund Hoole, then making the device containing the invention covered by this patent. A suit of that kind was brought in the United States circuit court for the northern district of New York; it was duly and regularly called in open court, and a trial was had before Judges Nelson and Hall, Judge Hall conducting the proceedings of the court. The jury returned a verdict in favor of the plaintiffs, and under the instructions of Judge Hall rendered special findings in the making up of their verdict; nominal damages only were asked, together with some costs, as it was stated to the court that the object of the suit was to test the validity of the patent. The assignment of April 20th, 1863, was read as evidence by myself in that cause; I also read as evidence in that suit a certified copy of my caveat filed in the U. S. Patent Office the 20th of October, 1853, including the additional description added to the subjoined description in that caveat, signed by me on the 7th of August, 1854, and so dated at the town of Tinmouth, Vermont. This assignment of April 20th, 1863, was never delivered to Shavor or Corse, and I have no knowledge of their ever having seen it; they did not pay me a single dollar, nor did they agree to pay me any sum whatever for that patent, but merely acted as my assignees under an arrangement which I had with those men. Being aware that the legal title to that patent was vested in those persons, without any compensation or consideration whatever, and having in view the uncertainties of life, I, on the 23d day of February, 1864, received from those persons a reassignment and retransfer of the patent in suit, which deed of
285 assigment is mentioned at folio 19, page 5, of the amended bill. At the time I made the deposition referred to I held in my possession, or under my control, the deed of assignment last referred to. Being myself a lawyer, I regarded the legal title as being vested in those persons, while I held that deed of assignment unrecorded in the Patent Office, and the suit in the Court of Claims having been brought in February or March, 1867, to recover against the United States whatever might be found due, for the use of this invention by the United States between April 14, 1863, and the time of the filing of the petition in the Court of Claims, I was quite willing that the title should continue to be vested in those persons. Under those circumstances, and with my view as to the title being in them, while the assignment I have mensioned remained unrecorded in the United States Patent Office, I testified in

that case in these words: "I have no interest in the claim, which is the subject matter of inquiry," but did not testify that I had no interest in the patent on which that claim was founded. When I said on that examination, "I have no interest in the claim, etc.," then pending in that suit, I meant that I had no legal claim to anything they might recover, in that suit, between the 14th of April, 1863, and the time of the filing of the petition in that court. Had I been cross questioned by the U. S. attorney on that occasion, with reference to the matter of which I am now inquired of, I should then have explained that part of my deposition substantially in the manner I have explained it here, and if requested by said attorney, I should have produced the reassignment dated February 23, 1864; but as I was not cross examined with reference to that matter, my deposition was left containing the words stated in quotation in this answer. I regarded myself as having no interest in the claim pending in that suit, for the reasons I have above stated. If I were mistaken in that deposition and had an interest at that time, it
286 was in consequence of my view of the law with reference to the matter inquired about.

X Q. 107. Have you ever made any different explanation of your oath in that case?

A. Never having been called on before for an explanation, I have never made any explanation with reference to that oath in any proceedings in any court.

X Q. 108. Have you anywhere else?

A. Yes.

X Q. 109. What was that other explanation?

A. It was made to Judge Williams, counsel in this case, and upon his inquiry with reference to it, and was substantially the same as I have made here to-day; I may have made it more in detail to him.

X Q. 110. Have you ever made any other explanation of that oath?

A. Yes.

X Q. 111. To whom, and when, and what was it?

A. It was made to General Benjamin F. Butler a few years ago, while he was out of Congress and engaged in his profession, with whom I consulted with reference to this patent, and as to the best mode of getting the compensation to which Miss Helen M. Ingalls was entitled by law to receive from the United States; I think that consultation was about three or four years ago; he made substantially the same inquiry of me about this matter that Judge Williams made after he became counsel in the case, and I gave him substantially the same explanation that I have given here to day; I have no recollection of any other consultation with anybody in reference to the matter inquired about.

X Q. 112. Did you not, shortly after issue was joined in this case, in one of the corridors of the post-office building, in the city of New York, state to me that you had sworn that you had no interest in the claim under investigation in the case of Shavor and Corse against the United States, because the claim in that case covered a period of
287 only about nine months, being the interval between the date of the original assignment to Shavor and Corse and the date of the reassignment by them to you, or substantially that?

A. I recollect of no such conversation; if I made any such statement to you the records of the Court of Claims show that I was mistaken about it; I think I did, however, at one time say to you that had the reassignment of February 23, 1864, been recorded at about the date of it in the U. S. Patent Office, their claim would then have been for a period of nine or ten months.

X Q. 113. Did you not prepare, or partially prepare, a printed book, which was submitted to the Post-Office Department, or some officer thereof, about the year 1871, and in which an explanation of your oath was given?

A. In the winter of 1870–'1 an investigation was had in the Post-Office D partment, before Mr. Terrell, Third Assistant Postmaster-General, who was detailed for that purpose by the Postmaster General. At the close of that investigation a book was prepared, containing the main evidence submitted to him, including some ex parte depositions. I do not remember and do not believe that I was examined as a witness on that occasion. If I made an ex-parte affidavit during that investigation, it must be on file in the Post-Office Department, and that will best show what I there stated in reference to the matter inquired about. Should you show me any book to which your question refers, I could then inform you as to whether I prepared, or took any part in the preparation of, a book such as the question inquires about. If I there made any explanation about this matter, that explanation could not be inconsistent with the one I have made to-day, unless it be with reference to the length of time their claim continued under my assignment to them of April 20, 1863. Since then I have examined the records of the
288 Court of Claims and find that their claim under that assignment began April 20, 1863, and continued up to the filing of the petition in the Court of Claims. If I have ever made any statement inconsistent with that record, I was simply mistaken about it.

X Q. 114. That does not answer my question; please state, according to the best of your recollection, without any "ifs," whether you prepared or partially prepared that book which you say was presented to Third Assistant Postmaster-General Terrell.

A. I cannot tell you until you first produce here, and exhibit to me, the book you had in view at the time you proposed the last two questions.

X Q. 115. I have in mind the book which you state, in your answer to question number 113, "was prepared containing the main evidence," etc.; please answer my last question with reference to that book.

A. Show me the book contemplated in your last question, and give me an opportunity to examine it, and I will then tell you whether I prepared or took any part in the preparation of such a book; until then I cannot.

X Q. 116. In saying you cannot, are you telling the truth, the whole truth, and nothing but the truth?

A. That is my oath on this examination, and I have as high regard for it as you any other man would have for your oath. I have not the slightest doubt that I am telling the truth on this occasion, and I believe that the counsel knows I am, from the fact that nearly all the original records in the Post-Office Department with reference to this matter have disappeared from that department, and are now in possession, as I have been informed, of defendant's counsel.

X Q. 117. Why cannot you tell me whether you had any part in the preparation of the book to which you refer in your answer to question 113?

289 A. Because some three or four different books containing evidence have been printed and filed in the Post-Office Department within the last ten years, and I do not know to which you refer, and cannot tell until you show me the book you have reference to.

X Q. 118. I refer to the book that you refer to in your answer to question 113.

A. If you refer to that book, no statement of the kind you inquire about was contained in it; if any such statement as that you inquire about is contained in any other book, I would be glad to see it, in order that I might explain it if it is necessary; the book I refer to was printed by William H. Young, a bookdealer and printer in Troy, in 1870.

X Q. 119. Was a printed book or pamphlet prepared in the interest or Miss Ingalls, to which your name was subscribed as attorney, and that of a Mr. Mason, as counsel, and presented to Third Assistant Postmaster-General Terrell at about the time of the investigation you have spoken of?

A. The arguments of Mr. Mason, opening and closing argument, were printed in pamphlet form and submitted to Mr. Terrell, before whom the investigation was had; if any other book was printed at that time, it is very likely on file in the Post-Office Department; if examining counsel will be kind enough to produce here the book which he has in his mind when he puts the question, it would enable me to save him the labor of putting this kind of questions about some book which I may or may not know about.

X Q. 120. Was there anything else in that book besides Mr. Mason's arguments?

A. The argument of Mr. Mason was printed in two separate pamphlets; I have copies of them, and they show no other matter except his arguments in opening and closing the case.

X Q. 121. Was a book prepared in the interest of Miss Ingalls,
290 to which your name was attached as attorney, and that of Mr. Mason as counsel, containing a number of affidavits and some matter in the nature of comments by you or Mr. Mason upon the case, and bearing upon the title page something to the following effect: In the matter of the application of Marcus P. Norton for compensation for the use of the combined postmarking and postage stamp canceling device, patented April 14, 1863, and reissued at several subsequent dates, which are stated on said title page, and bearing also at the foot of said title page the usual printer's mark, indicating that the book was printed in Washington in 1870 or 1871?

A. Since the taking of the testimony began in this case on the part of the defendant, and at several times and in different places, I have seen in your possession a book of that description; where you got it I know not; whether it is bogus or fraudulent or a forgery, I know not; having several times asked you to let me examine it, and been by you each time refused; if you will produce that book, and let me examine it, I should be very glad, and will then try and give you such answers as I may be enabled to after such examination.

X Q. 122. That does not answer my qu stion. Please try again.

A. I have no other answer to give until the alleged book is produced before this examiner,

X Q. 123. Who has alleged that such a book exists or has ever existed? I ask you whether there was such a book?

A. Examining counsel makes that allegation by his questions already upon this record. In my last answer I stated that I had seen in the possesion of the examining counsel a book purporting to be of the kind covered by his several questions; I have also stated that I can tell nothing about that book being genuine or fraudulent until it is produced
here before this examiner, and I request examining counsel now
291 to produce it, and then I will try to give him correct answers about it, if on examining it I find I have any knowledge of it.

X Q. 124. I ask you to state whether any book like that which is described in question 121 was prepared to your knowledge?

(Question 121 read to witness.)

A. I cannot state any such thing, for reasons which I have repeatedly given during my examination this morning.

X Q. 125. You cannot state whether you know of such a book being made?

A. I have already stated that I have frequently seen in your possession during the progress of the defense a book of the description you give; whether you made that book or not, I don't know; whether it is fraudulent or genuine I don't know, because you never would allow me to examine it. You have on several occasions shown me such a book, so that I could read the title page and no more. You indicated to me that there was something in that book that was very terrible; what, you did not state.

X Q. 126. Was the preparation of such a book as question 121 indicates made with your knowledge?

A. If you will let me see the book which you have so frequently exhibited to me in the manner stated in my last answer, I can then answer you, and not until then, for I am induced to think the book you have is fraudulent and forged. Could I see it I could better tell.

X Q. 127. I will now test you with a distinction; if I produce the book which you say that you have seen in my possession, you will be able to state whether you knew of the making of that particular book. That is not what I am after. I wish you to tell me whether you know of the making of any book which answers the general description contained in my question No. 121.

292 A. I have already fully answered the question, and answered it several times, as this record will show, and I have no other or further answer to give on the subject at this time.

X Q. 128. Do you decline to state whether you took part in the preparation of any book which answered to the general description contained in my question No. 121?

A. I have made no such refusal, but have frequently said that if the examining counsel would produce the book about which he is making so many questions I could tell upon examination of it whether heretofore I had any knowledge of it or took any part in its preparation.

X Q. 129. Well, tell me whether, to your knowledge, you took part in the preparation of any book answering to the general description contained in my question No. 121.

A. I cannot answer that question until I have seen the book described in that question No. 121; more than that I have already said that there were several printed pamphlets filed in the Post-Office Department at the time of the investigation referred to.

X Q. 130. Is that all the answer you wish to make?

A. It is, and I have so expressed myself several different times during the examination this morning, and given reasons therefor, and if any book of that description shall here be produced by examining counsel, I shall endeavor to give him full and fair answers to any question he may put concerning the same; and I further answer by saying that I have endeavored to answer each and every question put by examining counsel this morning to the best of my knowledge, as I understood those questions, and as to the book described by counsel I cannot say that I took any part in the preparation of any such book. Mr. Mason had full charge of that investigation; if any such book was prepared at that time, and

293 the book be a genuine one, and Mr. Mason signed it, I must have

aided him in the preparation. Whether the evidence taken before Mr. Terrell was all printed or not I cannot say, but I am inclined to think it was not, having recently seen some of the manuscript evidence taken on that occasion; possibly a book in the form of argument, containing some of the evidence, was printed and used on that occasion; if so, I took part in its preparation, and I also took part in the preparation of Mr. Mason's argument in the case, seeing that he had certain dates correctly, etc.

X Q. 131. Did you know at the time thereof of the preparation of any book answering the general description contained in my question No. 121?

A. If any book was prepared of that kind on the part of Miss Helen M. Ingalls and submitted to the department I must have known of it at the time; I mean at the time the investigation was going on.

X Q. 132. Was any book of that kind prepared to your knowledge—answering, I mean, to the description contained in question 121?

A. I have already answered that there was a book substantially of that kind prepared, and it was printed here in Troy, and that I took part in the preparation of that book; it may be that that book was reprinted in Washington, and some additions made to it; if it was, it was printed by McIntosh & Cunningham, or Cunningham & McIntosh, as they did printing for me at the time in printing briefs and other matters I needed in Washington, and they had done printing for me for several years in that way, but whether it was in 1871 I can't say, and if such reprint was had I took part in the preparation of that book. I am inclined to think that the book printed in Troy was reprinted in Washington, and used before the Committee on Post Offices and Post Roads in the Senate, just before Mr. Gilbert, of that committee, made his report
294 upon the bill then pending concerning this invention, which was, I think, in 1872, in the month of May. I don't now remember that a book of that kind was used at the time of that investigation in the Post-Office Department, and yet it may have been. I intend this answer to be an affirmative answer to the question.

X Q. 133. State generally what matter was in that book which you say you did know was prepared.

A. There were several certified copies of letters from the Post-Office Department; the affidavit of John A. Dix, of New York; one or more affidavits by Cyrus A. Sherwood, of this city; an affidavit by Edmund Hoole, and I think one or two letters written by him; an affidavit made by Pomeroy; an affidavit made by Frederick G. Ransford; one or two affidavits made by myself. I think there were one or two reports by committees of Congress printed in it, one made by Mr. Thomas W. Ferry, who was then in the House, and one made by Mr. Van Winkle, a Senator; some statements from the Post Office Department with reference to the amount of labor saved by the use of this invention; and the rest, I think, was made up of arguments or statements of counsel founded upon those papers; and I think those papers were printed at different places in the argument; and my impression is, the book was designed to be a book of argument as to the matter of this invention and the patent thereon, and this book now referred to was the last one printed of which I have any knowledge. There were at least two or three books previously printed, of one of which I had knowledge.

X Q. 134. Was your name attached as attorney?

A. I am not certain whether the book was signed by anybody as attorney; if it was, my name would be there.

X Q. 135. As attorney for whom?

A. It would be either for Miss Helen M. Ingalls or Mr. Secombe; which, I cannot say at this time.

295 X Q. 136. What was the date of the reprint in Washington?

A. I can't say as to that. I think it was 1872; if in 1872, I was attorney for Mr. Secombe.

Adjourned till 2 o'clock p. m.

2 O'CLOCK P. M.

Cross-examination resumed:

Mr. Norton desires to explain the testimony given this morning with reference to a book.

During the recess for dinner I have examined several papers concerning this matter of inquiry, and from that examination I am satisfied that the book of the description named in question 121 was first printed at Troy, N. Y., and then reprinted at Washington by Cunningham & McIntosh, and that I now have no doubt but that I understand the book referred to in question 121, and that that book so reprinted was entirely under my supervision; in the morning I could not understand what book counsel referred to.

X Q. 137. Please produce the papers which you have examined, and also a copy of that book.

A. I have no copy of that book; the papers that I have looked at are bound with a large number of other papers in a book, and I have no separate copy of it.

X Q. 138. Will you produce the papers?

A. The book that I consulted I produce, consisting of ninety pages.

X Q. 139. Explain how this book assisted you to make that statement.

A. By examining the title-page and the matter contained in it; and also by examining another pamphlet next to it, entitled "Opening Argument by Mr. Mason," recalled to me the fact in reference to the other book.

296 X Q. 140. Are either of these pamphlets which you show the one which you say was reprinted in Washington?

A. The one that has 90 pages in it was reprinted in Washington; the other two adjoining it were never reprinted, but were originally printed in Washington.

X Q. 141. Is the one with 90 pages the one that, in your examination this morning, you said was reprinted in Washington?

A. It is, together with some additional papers.

X Q. 142. Did you examine any other paper during the recess?

A. None but those three.

X Q. 143. The third is the closing argument of Mr. Mason, is it?

A. It is.

X Q. 144. Do you know of the preparation of any pamphlet or book bearing a printer's mark indicating that it was printed in Washington in 1870, and having on the title-page "Marcus P. Norton's postmarking and postage-stamp canceling device; application for compensation for the use of said device," or some words of similar effect, and purporting to be subscribed by you as attorney for Miss Ingalls, and by Mr. Mason as counsel, and containing affidavits and comments and arguments?

A. Not in the year 1870.

X Q. 145. You know of no such book having a printer's mark on the title-page of 1870?

A. I don't recall any within that year, but there was such a book either in 1871 or 1872, but whether I signed it or not I don't remember now. I prepared the book for the printer.

X Q. 146. Was it different from the one you have already referred to?

A. It was the same one; I am not positive about the years.

X Q. 147. Was such a book prepared, to your knowledge, bearing the printer's mark of 1869?

297 A. There was a small book wholly prepared by myself, either the last of 1869 or the forepart of 1870, I am not certain which.

X Q. 148. Is there a copy of that book under your control?

A. I am sorry to say there is not.

X Q. 149. Where did you last know of a copy being?

A. On file in the Post-Office Department; there was also a copy filed with the Committee of Post-Offices and Post-Roads in the Senate of the United States.

X Q. 150. When did you last have a copy under your control?

A. I think it was 1870 or 1871.

X Q. 151. What did it contain generally?

A. It contained some of the matter contained in all these pamphlets; it also contained a refutation or denial of a printed pamphlet that parties adverse to my rights personally, or those of parties holding this patent, had filed with the Postmaster-General.

X Q. 152. Who were the parties that had filed that statement to which you replied?

A. If my memory serves me, that pamphlet purported to be signed by Charles Eddy, Jacob Shavor, Albert C. Corse, Frederick G. Ransford, Peter Low, William B. Hatch, Weed & Clark, and Jeremiah D. Green. I now remember that my answer to that pamphlet was in August or September, 1869.

X Q. 153. Was it after the recording of the Shavor and Corse reassignment?

A. It was, and before my settlement with Mr. Eddy in October of that year.

X Q. 154. In whose interest was it made?

A. I don't remember now.

X Q. 155. To whom was it presented?

A. To Postmaster-General Creswell.

X Q. 156. Did it make any reference to the matter of title to the patent?

298 A. I think it did.

X Q. 157. Did it make any explanation of your oath in the Court of Claims?

A. I don't remember about that.

X Q. 158. Do you not remember that you insisted in that pamphlet that your oath in the Court of Claims was true, because the claim in the case of Shavor and Corse *vs.* The United States covered only about nine months, being the interval between the date of the original assignment and of the reassignment of Shavor and Corse to you, or something to that effect?

A. If such statement was made, which I do not now remember, I am now satisfied that I was mistaken about that.

X Q. 159. Was any other pamphlet or book presented, to your knowledge, to the Post-Office Department, or any officer thereof, containing statements and affidavits and arguments in opposition to that which

had been submitted by Shavor and Corse and the others you have mentioned?

A. None to my knowledge.

X Q. 160. Or to any committee of Congress?

A. The pamphlet that was signed by the persons I have named never, to my knowledge, went to any committee of Congress, but the pamphlet containing ninety pages, printed at Troy, and afterwards a copy, reprinted with additional papers, were each presented by me to the Senate committee.

X Q. 161. To your knowledge, was any pamphlet presented to any officer of the Post-Office Department, or to any committee of Congress, which discussed the title to the patent, with reference to the arguments made against the validity of the reassignment contained in that statement of Shavor, Corse, and others, besides the one already stated by you to have been submitted to Postmaster Cresswell, between the date of the recording of the reassignment and October, 1869?

A. I have no knowledge of any such.

299 X Q. 162. Have you any means of refreshing your recollection about that?

A. I have not, for I have never seen or heard of any such pamphlet.

X Q. 163. You now explain your oath in the Court of Claims, as I understand you, by stating that you believed that the title to the patent would not become vested in you until the Shavor and Corse reassignment of 1864 should be recorded. Is that correct?

A. My legal opinion then was, and now is, that an assignment must be of record in the Patent Office before a person can become vested with the legal title; I may then and now be mistaken on that point; no questions were asked me during that deposition concerning the title, excepting as I have before stated, so far as I now remember about it.

X Q. 164. Did you believe that the assignment to Mr. Eddy, as trustee, of one-third interest, in October, 1869, took precedence over the assignment to Miss Ingalls, which purports also to have been made in October, 1869?

A. That is a question that I think belongs more properly to the court to determine; it involves a question of law.

X Q. 165. On what day was the assignment to Miss Ingalls made?

A. The assignment to Miss Ingalls was prepared about October, 18th; it might have been a day or two before that time; it was actually dated on the 20th day of October, 1869, and by me signed and sealed on that day.

X Q. 166. Was it fully executed on the 20th?

A. It was.

X Q. 167. Were you then contemplating the arrangement which was made with Mr. Eddy on the 23d?

A. I was not.

X Q. 168. Did you believe that the assignment to Eddy of a
300 one-third interest, which was dated the 23d and recorded the 25th of October, would take precedence over the assignment to Miss Ingalls, which you say was made on the 20th, and which was not recorded until some time in 1870?

A. The circumstances attending the making of both those assignments raises, in my judgment, a question of law more properly for the court than for me to determine.

X Q. 169. Do you decline to answer my question?

A. No, I hesitate about testifying to conclusions of law, as I think the

court can determine those questions without any legal opinion of my own; if, however, you insist on such an opinion, I will give it.

X Q. 170. Please give it. (Question 168 read to witness.)

A. Under the circumstances attending the making of those assignments, and those immediately following, I regarded Miss Ingalls as having at least the equitable right to that one-third interest in addition to the two-thirds of which she held both the legal and equitable right and title; but Mr. Eddy, having recorded his assignment in trust of the one-third, he had the legal title to that one-third, so long, at least, as he kept his agreement with me in reference to it.

X Q. 171. Did Miss Ingalls know of the assignment to Eddy?

A. Some time afterwards she knew that Mr. Eddy, for himself, and as agent or attorney for Jacob Shavor and Albert C. Corse, had made a settlement with me, about the 23d of October, 1869, of all our matters of differences of every name and nature, and on that occasion I informed her of that assignment to him, in trust for himself and Shavor and Corse, if I am not mistaken.

X Q. 172. Did you inform her of the assignment to Eddy at or before the time it was made?

A. Not until afterwards.

301 X Q. 173. What explanation have you to offer of your conveying property to Eddy which you had previously conveyed to Miss Ingalls, without informing Miss Ingalls, when you believed that Eddy, by putting his assignment on record, could deprive Miss Ingalls of a third of what had been conveyed to her?

A. At the time I made the assignment to her the arrangement was that I should act for her, and exercise my own judgment in any matter concerning that patent; an application was then pending before Mr. Cresswell, having reference to the past use of this invention, and with reference to its future use by the government; that application was defeated by the attorneys, Weed and Clark, claiming to act for Shavor and Corse, by the filing of some affidavits, and the printed pamphlets signed by them. Mr. Eddy came to Washington to see me, about the 22d of October, 1869, the next day or two after that application was defeated; we entered into an agreement or arrangement by which all past differences between us were to be settled, and he was to do certain things with reference to the patent, and inasmuch as Miss Ingalls' assignment had not been recorded at that time, I thought it wiser to yield to the force of circumstances and assign to him, on the 25th day of October, 1869, the one third interest, and dated the assignment on the 23d day of that month, the day on which the agreement was consummated. Afterwards, upon informing her with reference to that settlement, and stating to her the circumstances under which it was made, as well as the obligations on the part of Mr. Eddy, she did not object to the course I had pursued with reference to this matter.

X Q. 174. Have you any explanation to offer in regard to the letters in your handwriting which were put in evidence, in this city, on the defendant's behalf?

A. Were those letters here, there are some things about them

302 that I would like to say something about; if counsel will indicate the particular parts or points which he thinks need explanation, I will answer him as best I may.

X Q. 175. You read the letters in your handwriting which you put in evidence, didn't you?

A. I did.

X Q. 176. Did you notice the statement in one of the letters to Mr. Shavor, "you hold two-thirds by agreement and three-thirds by assignment"?

A. Something of that kind I observed in one of those letters.

X Q. 177. Explain that.

A. Under my agreement with Shavor and Corse with reference to this invention and patent, they were to furnish all the necessary means to obtain compensation from the government for the past and future use of this invention; I was to do the professional part for that purpose. I was to have and retain a two-thirds interest in the invention and patent; they were to have one-third for furnishing the money required for the purposes I have stated; the title was to remain in them so long as they kept their agreement with me, and the suit in the northern district of New York, which was in contemplation of being brought at that time, was to be in their name. My statement in that letter having reference to their holding three-thirds had reference to my assignment to them bearing date 20th day of April, 1863, but not actually made until some time in January, 1864, or fore part of February, 1864; it was dated back to the 20th of April, 1863, and recorded in the Patent Office on or about the 8th day of March, 1864, and not having recorded their reassignment to me of the 23d of February, 1864, I regarded the legal title as being in them; the two-third and one-third interest referred to in your question was that interest which I held under their agreement with me. In the spring of 1869 they utterly failed to keep their agreement with me, and served on me a notice to that effect. Being re-
303 lieved from my agreement with them, I thereupon reinvested the whole right and title in myself to that patent by the putting on record of the reassignment dated the 23d day of February, 1864, of which recording I gave them due notice personally.

X Q. 178. If they were to have one-third and you two-thirds, why did you say "you hold two-thirds by agreement"?

A. That was simply a mistake in the writing of the letter; it did not mean or contemplate any such thing, but right the reverse.

X Q. 179. Why didn't you record the reassignment before 1869?

A. Because they had not broken their agreement with me until I was compelled to borrow four thousand dollars of Samuel O. Gleason, of this city, in order to prosecute for compensation for the use of this invention by the government; and even after that I urged these persons to keep their contract with me, and finally they gave me the notice of which I have spoken; and I further learned, in the summer of 1869, that either Mr. Shavor or Corse, or both of them, had filed a paper in the Post-Office Department claiming the entire invention and patent, and notifying the department to have nothing more to do with me. As soon as I learned of these matters I was under no moral or legal obligation to further withhold the recording of that reassignment. These are the reasons why I did not record it at an earlier period.

X Q. 180. Why did not you record that reassignment before 1869?

A. Because those persons had not fully broken their agreement with me until the winter of 1868–'9, and the filing of that paper in the Post-Office Department, of which I had no notice until June, 1869.

X Q. 181. In one of the letters that were put in evidence you recollect the proposition that Shavor and Corse should reassign the patent, do you not?

A. I remember something of that kind.

304 X Q. 182. Explain it.

A. That referred to whatever interest they might have by reason

of the money that they had advanced to me, and previous to the date of the re-assignment, which was about ten months or eleven months after the granting of the patent. I thought they should give up whatever claim they might have on that account, inasmuch as they had failed to keep their agreement with me. Those letters show, I think, that I was constantly annoyed with reference to the money they were to pay for that one-third interest, the agreement being an oral one.

X Q. 183. In one of the letters you proposed that they should re-assign, so that you might get the legal title to the patent, did you not?

A. I don't remember any such thing in any of those letters; if I used the word "legal," it was a mistake.

X Q. 184. You stated that you wished to make an explanation about these letters; why were you not examined in New York, where the letters are?

A. I don't know anything about that.

X Q. 185. You don't know why you were not examined in New York—do I understand you correctly?

A. I don't, unless it is because you didn't subpœna me as a witness there. I have always supposed that a witness has a right to be examined somewhere near his home.

X Q. 186. Do you wish this examination adjourned so that the letters can be obtained, and you can make a full explanation of all the points in them which you wish to explain?

A. I wish for no such adjournment; I am being examined before the same examiner who took the defendant's evidence about four months ago; I think you could have had the letters here if you had wished them for any purpose. All I care to say about the letters generally is that Mr. Shavor required me to write a letter every day, and sometimes got mad because I did not write two on the same day; of course if I had the letters I might be able to give a more full explanation, but I will try and answer all your questions without the aid of those letters, for I do not regard them as having anything to do with this case or anything at issue in it.

305

X Q. 187. When, on your direct examination, you stated that the additional paper which accompanied your letter dated Tinmouth, Vermont, August 7, 1854, was contained in the caveat which has been offered in evidence, did you mean to be understood that the additional paper which now appears in that caveat file was contained in, and that the whole of it was contained in, the additional paper which accompanied your letter.?

A. Do you mean the identical paper now contained in that file with an endorsement on it by M. D. Leggett?

X Q. 188. No, I mean the words and the matter in the body of the "additional paper."

A. I say yes, every matter and everything that is contained in that additional paper of that date, now on file as evidence in this case on the part of the complainant, was prepared by me, and in the same handwriting of the letter of that date referred to in my direct examination, and that I sent that letter and that additional description in the same letter, addressed to the Commissioner of Patents, at Washington, D. C.; and that such additional paper was so prepared by me a few days before the date of it, and was submitted by me to Mr. Silas H. Hodges, then residing and practicing law at Rutland, Vermont, and who was my attorney with reference to that caveat, under my power of attorney to him, dated Rutland, Vermont, March 11, 1854. The letter and additional description was sent by mail to the Commissioner of Patents.

X Q. 189. You stated that an instrument made after the terms
306 of that caveat was used before the additional paper was filed—where, when, and by whom?

A. The use was an experimental use by myself and by Mr. James Richardson, of Poultney, Vermont, who constructed that machine for me, in the winter of 1853–'4, and such experimental use was at Poultney, Vermont, in Mr. Richardson's shop.

X Q. 190. Was that machine constructed according to the terms of the additional paper or according to the terms of the caveat?

A. According to both.

X Q. 191. Was it a hand instrument?

A. The first was a machine that went by crank or foot power; the second was a hand instrument like that described in the additional description, dated August 7, 1854; and the several constructions were according to e ch plan named in that paper.

X Q. 192. When was the second made and used, and where, and by whom?

A. The second one that I refer to was made by Mr. Richardson, at Poultney, Vermont, some time in the winter or spring of 1854, and the use was only experimental at and in his shop, and at the same time.

X Q. 193. Mr. Richardson did not keep a post-office, did he?

A. He did not at that time.

X Q. 194. Where is Mr. Richardson now?

A. Mr. Richardson has been dead several years.

X Q. 195. Where, when, and by whom was the third made, if there was a third?

A. Mr. Richardson, at the time I have stated, made one of each of the various descriptions in the additional paper of August 7, 1854, and also of the subjoined description dated October 13, 1853.

X Q. 196. When was the next one made?

A. There was one made by Cyrus A. Sherwood, some time in the fore part of the year 1857, containing among other things the invention for postmarking the letter envelope and canceling the postage-
307 stamp thereon at the same operation, by one blow of the instrument.

X Q. 197. Describe the construction of that.

A. There was a frame fastened to a table underneath it, in which frame there were two cylinders, containing type to print the month and the day of the month; around the upper surface of those dating wheels there was a plate so arranged as to be movable, so that one plate would give the name of the post-office where the letter was postmarked; in the end of that plate there was a horizontal wheel whose type were on a line with the face of the dating plate or type; on the upper surface of that wheel there was a metallic canceling device, which, when brought in conjunction with the dating wheels and the postmarking plate of which I have spoken, a letter would be postmarked and the postage-stamp canceled by means of a hammer plate upon which the blow for the printing and canceling operation was given; the type were inked by means of a roller passing over them, and located in the end of an arm extending outward from a stud or post for that purpose; when the inking device had passed over the type, another arm, containing the hammer of which I have spoken, came directly over the postmarking and canceling device, and by means of a stem extending upward from that hammer, with a smooth head, the blow was given by the hand upon that upper projecting stem, and by that means the postmarking of letters and the cancellation of postage-stamps was done at the same

time and by the same blow; those dating wheels had arms or pointers upon the outside to enable the operator to adjust the wheels for the proper date to be given; the two arms spoken of were each attached to the stud or post of which I have spoken, so that they could be moved backwards or forwards in a horizontal direction; on the surface of this horizontal wheel containing the canceling device there were other
308 type secured to that surface for the purpose of printing the word "paid," "unpaid," "paid in stamps," "paid in money," "missent," "forwarded," "advertised," and such like.

X Q. 198. When and where was that instrument used?

A. It never was used, only experimentally; that was at Sherwood's shop, at the hotel where I then boarded, and at my office in this city.

X Q. 199. The Secombe reassignment, to which you referred in your direct examination, was the one of which a certified copy has been filed in this case, was it not?

A. It was; and it is also referred to on page fourteen of the amended bill, folios 52, 53, 54, and 55 of that page.

X Q. 200. Do you not know that the patent Division A, 4143, is not conveyed by that reassignment?

A. I don't know any such thing, but, on the contrary, I know that it is; I absolutely and personally know that fact, and that that was the intention of that instrument, which I drew myself on the day it was executed.

X Q. 201. Did you not, subsequent to the date of that Secombe assignment, which has been put in evidence, request Mr. Secombe to reassign the patent, the last reissue of which is Division A, 4143?

A. I have no recollection of any such thing; he claimed to have purchased an interest in the patent dated August 9, 1859, and I asked him to assign to Miss Ingalls all the interest in that patent he might have, which he promised me he would do.

X Q. 202. Are you sure that you did not ask him to reassign Division A, No. 4143?

A. I am sure that I have no recollection of any such thing. At the time the original bill was prepared I gathered up all the original papers bearing on the title to this patent; that assignment not being
309 among those papers, I had forgotten about it, and supposed that I had not any assignment of that kind on record in the Patent Office; but after I had filed the bill the 1st of June, 1877, I went to Washington on business, and examining the Patent Office records of assignments I found from that examination that that assignment had been recorded in the Patent Office, in Liber B[17], page 430, and that it—the assignment—bore date July 10th, 1873. I went and examined the Digest of Assignments in that office, and there found that that assignment, after its record, had been delivered by the Patent Office clerk to one Jeremiah D. Green, of Troy, N. Y., since which time I have never seen it. If any request ever was made of Mr. Secombe in the manner inquired about, it was because I had reason to believe that the assignment had been lost or in some manner put beyond my reach. On discovering the record spoken of, I called Judge Williams' attention to that assignment of record, and he examined it and stated that the bill must be amended so as to allow that assignment to come into the case. The bill was so amended, and I took a printed copy of the amended bill to Mr. Secombe, and he examined it and stated that he remembered the assignment referred to in the bill, page 14, folios 54 and 55, and did not at that time make any claim, or pretend to make any, to any part of the patent contained in the amended bill. It may be that while I supposed

that there was no record of this assignment, and that it had been lost or destroyed by some person, and in order that there should be no possible dispute with reference to the final settlement of the suit which I brought against Mr. Secombe, I think some time in the year 1872, or the terms and conditions of that settlement, and to make the matter doubly sure for Miss Ingalls, I may have asked him to make a new reassignment. Division B, No. 4144, of that patent, was never in the world assigned to Mr. Secombe individually, but was assigned by Miss Ingalls to the Secombe Manufacturing Company.

310 X Q. 203. I understand you to say that the reason the Secombe reassignment was not inserted in the original bill was because you couldn't find the document itself, and because you had forgotten that it had ever been recorded. Is that correct?

A. No; I don't wish you to have any such impression as that; what I wish you to understand is this, that when I prepared the bill I supposed I had received from Miss Ingalls all the papers that had reference to the title to this patent, that assignment, not appearing among any of those, had been lost or destroyed, and that I did not think of having a digest prepared by the Patent Office with reference to these various assignments, as I ought to have done before I prepared the bill. I knew of such a paper, and knew that I let Jeremiah D. Green have it, and that I had several times asked him for it, and that he did not let me have it, and I had never seen the original assignment since that time, and I was fearful that I never would see it, and I didn't know it was recorded until I called Judge Williams' attention to that record and examined the book, and found that after record it had been delivered to J. D. Green. Under these circumstances I think it quite likely that I asked Mr. Secombe to make a new assignment.

X Q. 204. You now recollect of so asking him, do you not?

A. I think likely I did; I don't know as I have any doubt about it; if I did, it was some time ago.

X Q. 205. You have changed your mind, have you not, since you saw me draw this letter, which I hold in my hand, from my pocket just after you had said, in answer to question 202, "I am sure that I have no recollection of any such thing?"

A. No, I have not seen any letter in your hand, don't know that you have one, nor do I care whether you have one or not. After that answer was made I recalled to my mind the circumstances attending

311 the amendment of the original bill, and while for the moment I may have stated my recollections at that moment, yet when I came to reflect and refresh my recollections by associating the name of Jeremiah D. Green, I then recollected about that assignment, and that we had already put a certified copy of it in evidence, and that it was one of the amendments made to the original bill.

X Q. 206. Had you not been informed by somebody, in some way, that the Secombe reassignment had been recorded prior to the time you showed the record to Judge Williams?

A. I have no recollection of receiving such information from anybody, but, on the contrary, I have stated that the first knowledge I had that that assignment had been recorded was during the examination I made of the Patent Office records with reference to all the assignments on record touching this patent, and it was on that occasion that I first discovered the record of an assignment recorded in liber T^{14}, page 434; had I known it was recorded, I should have set it up in the original bill, as I did other assignments.

X Q. 207. I understand you to mean that the reason why you asked

Mr. Secombe to reassign was because you couldn't get possession of the document which had been executed originally. Is that correct?

A. That is one of the reasons.

X Q. 208. State all the other reasons.

A. I supposed that that paper had been lost or destroyed, and that I would never see it again, and have never seen it, to my knowledge, and have never had it in my possession since the time I allowed Jeremiah D. Green to take it. Since I found it recorded in the Patent Office I found that I had no occasion to ask Mr. Secombe at the time I did for a new assignment.

X Q. 209. When was it that you asked Mr. Secombe for a new assignment?

312. A. I don't remember the time; I think it was some time before the commencement of this suit.

X Q. 210. How much before?

A. I can't say, but my impression is that it was within eight or ten months of the commencement of this suit, and perhaps less time than that.

X Q. 211. You drew the assignment from Ingalls to Campbell, didn't you?

A. I did, and I think the original is in my handwriting.

X Q. 212. Why wasn't the Secombe reassignment recited in that instrument like all the others which you rely on?

A. For the same reasons that I have stated about that paper.

X Q. 213. Look at the paper I now produce, and which purports to be a letter dated Canaan Four Corners, N. Y., November 27, 1876, from Marcus P. Norton to Jacob Shavor, and state whether the signature, which alone I show you, is in your handwriting?

A. I cannot look at the letter under any such condition, unless advised to do so by Judge Williams, now present; but if allowed to examine the entire letter, I will answer as to the handwriting of the letter and the signature thereto; the paper proposed to be shown to me seems to be in several sheets. Under the advice of Mr. Williams I look at the paper under cover, except the signature, and that signature looks like my handwriting.

X Q. 214. Have you any doubt about it?

A. The only doubt I have is the mysterious manner in which the paper is shown me; my signature is not at all times the same; could I examine the letter, all doubts I have would be removed; if it were made by anybody else, it shows a close resemblance to my signature as sometimes made by me. I don't want to be positive as to my signature to a paper that I am not permitted to examine.

313 (Paper offered in evidence, and is marked Def't's Ex. Marcus P. Norton, A & B—I. B., Ex., May 18, 1878.)

X Q. 215. All your testimony on this examination has been as true, and no more true, than your testimony in regard to the Shavor and Corse reassignment, and to the Secombe reassignment; such is the fact, is it not?

A. My testimony with reference to the Shavor and Corse reassignment, as well as to the Secombe reassignment, is, so far as given, correct and true; my other testimony is also correct and true, but upon reading it over I may desire to make some correction in the language used; can't tell about that till I hear it read.

Redirect examination:

By Mr. WILLIAMS:

R. D. 216. You refer to a letter written to Mr. Secombe in the Exhibit

A & B; was that letter written under the same impression which you have heretofore given in your testimony as to the reassignment of July 10, 1873?

A. It was.

R. D. 217. Are the statements made in this letter, Exhibit A & B, as to the nature of the conveyance to Mr. Secombe and his failure to execute and carry out the terms of that agreement correct?

(Objected to because complainant, having introduced no evidence in support of the allegations in the bill as to his failure to perform certain alleged trusts before he rested his prima facie case, it is now too late for him to take that position; and, second, because the alleged trusts are not in evidence, and it isn't proper to ask a witness about them
314 until they are put in evidence; and, third, because Mr. Norton is not the proper person to testify as to whether or not Mr. Secombe fulfilled an agreement with Miss Ingalls.)

A. They are; and for those and other reasons, and his entire inability to perform according to his agreement, he made that reconveyance of July 10th, 1873, about which I have testified.

R. D. 218. You have referred to a suit against Mr. Secombe; what was that suit for?

(Objected to as not proper on this redirect examination, as it goes into new matter.)

A. It was because of his inability to pay royalties upon internal revenue canceling stamps, which he had made, under some of the patents granted to me, on such kind of stamps; there were some other matters that I don't now remember. I claimed in that suit that he was owing me $30,000——

(Defendant's counsel interrupts, and objects to this as not the best evidence.)

(Witness continues)—and that led to a settlement between us, by which he made the reconveyance, dated July 10, 1873, about which I have testified; that included and was intended to include all patents upon postmarking, postage canceling, and internal revenue cancelling stamps that had been granted to me on my inventions, and assigned to him or the Secombe Manufacturing Company, either by myself or Miss Ingalls.

R. D. 219. When you wrote to Mr. Secombe for a reassignment, as referred to in Exhibit A B, did you propose any consideration for the reassignment, or did you expect him to make it on your request?

(Objected to, as asking for secondary evidence.)

315 A. I expected him to make good the one that I supposed had been lost or destroyed, and without any further consideration.

R. D. 220. Have you heard of known of Mr. Secombe making a claim against the government, or any person, for or on account of the patent in this suit, since the reassignment of July 10th, 1873?

(Objected to as immaterial and not proper on this redirect examination.)

A. I never have.

R. D. 221. Your letter, Exhibit A B, appears to be in answer to a letter from Mr. Shavor, and refers to papers that you have prepared, and states that you will be in Troy in one week from the writing of the letter; explain what the correspondence was about?

A. Mr. Shavor's letter, referred to in this exhibit, was a letter requesting me——

(Defendant's counsel objects, that it is not the best evidence.)

(Witness continues)—to enter into an arrangement with him, Mr. Corse, and Mr. Eddy, similar to the one that was made between Miss Ingalls

and Mr. Campbell in her assignment to him, and he stated in that letter that Mr. Eddy would join in and furnish the necessary means to obtain compensation for the use of the invention and patent in this suit; subsequently, and while in Troy, I saw Mr. Eddy and he told me that he would not put another dollar into this stamp business, and the arrangement proposed by Mr. Shavor was never consummated. His letter to me I burned after the failure to consummate the arrangement.

(The deposition being read over to the witness, he states that
316 he disires to correct the answer to question 46 by saying that the machine there referred to was not the one first made by Sherwood, but was the one made by Mr. Richardson, and being substantially like the one described by the witness Sherwood, with reference to the devices for postmarking and postage-stamp cancelling letters.

MARCUS P. NORTON.

Subscribed and sworn to before me this 18th day of May, 1878.

IRVING BROWNE,
Special Examiner.

And I further certify that each of the witnesses above named was, at the time of his examination, of full lawful age and of sound mind, and was carefully examined and cautioned, and sworn to testify the whole truth, and that his deposition was by me reduced to writing in the presence of said witness, who subscribed his name thereto in my presence.

And I further certify that I am not of counsel or attorney for either of the parties in the said deposition and caption hereto named, or in any way interested in the event of said cause.

In witness whereof I have hereunto subscribed my name this 22d day of June, 1878.

IRVING BROWNE,
Special Examiner.

317 In the circuit court of the United States for the southern district of New York. In equity.

C. C. CAMPBELL, COMPLAINANT,
vs.
THOMAS L. JAMES, DEFENDANT.

Ordered, by agreement of parties, that Irving Browne, of Troy, N. Y., and J. G. Pomerene, of Cleveland, Ohio, be, and they are hereby, appointed special examiners of this court, to take testimony in the above-entitled case on behalf of or for complainant, under the 67th rule and its amendments of the rules of practice in equity.

SAMUEL BLATCHFORD.

APRIL 26, 1878.

It is agreed that the above order may be entered.

GEO. H. WILLIAMS,
Of Counsel for Complainant.
STEWART L. WOODFORD,
U. S. District Attorney, for Defendant,
By S. B. C.

A copy.
[SEAL.] JOHN I. DAVENPORT, *Clerk.*

318 (Endorsed:) U. S. circuit court, S. D. of N. Y. Campbell vs. James. Certified copy. Order appointing special examiner. Original marked U. S. circuit court. Filed April 27, 1878. John I. Davenport, clerk.

(Original.)

In the circuit court of the United States, second circuit, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT, AND assignee in trust,
versus
THOMAS L. JAMES, DEFENDANT, AND U. S. POSTmaster at the city of New York.

To STEWART L. WOODFORD,
United States Attorney, and
Defendant's Solicitor, New York:

SIR: You will please take due notice, and notice is hereby given to you, that in pursuance of an order made in this cause by the
319 honorable Samuel Blatchford, one of the judges of this court, dated the 26th day of April, A. D. 1878, and filed in the office of the clerk thereof April 27th, 1878, I shall commence to take proofs on the part and behalf of complainant in this cause, as rebuttal evidence, before Hon. J. G. Pomerene, at his office, No. 19½ Public Square, in the city of Cleveland, State of Ohio, on Wednesday, the 29th day of May, A. D. 1878, at 9 o'clock in the forenoon of that day; and shall continue the same from day to day until completed.

You are further notified that the said J. G. Pomerene, special examiner, duly appointed by this court by the order aforesaid, has fixed on the said 29th day instant as the time, and his office as the place, for the taking of proofs on the part and behalf of complainant, so as aforesaid.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

Dated this 24th day of May, A. D. 1878.

(Endorsed:) In the circuit court of the United States, southern district of New York. In equity. Christopher C. Campbell, complainant, etc., vs. Thomas L. James, defendant, etc., etc. Original notice of proofs, etc., to be taken at Cleveland, Ohio. Marcus P. Norton, complainant's solicitor, Troy, N. Y.

Due and personal notice by copy hereof is, on this 25th day of May, 1878, admitted.

STEWART L. WOODFORD,
U. S. Attorney and Defendant's Solicitor,
C.

320 In the circuit court of the United States, in and for the southern district of New York.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust,
vs.
THOMAS L. JAMES, POSTMASTER AT THE city of New York.

Proofs for and on behalf of the complainant taken at the office of J. G.

Pomerene, special examiner, in the city of Cleveland, Ohio, on the 29th day of May, and the following days, pursuant to notice by complainant's counsel and an order by the court hereto annexed.

Present, Marcus P. Norton, of Troy, N. Y., counsel for complainant; Samuel B. Clarke, assistant U. S. district attorney for the southern district of New York, counsel for defendant.

The respective counsel above named met at the time and place stated in the notice served on defendant's counsel, and hereto annexed, and hereupon called

A. L. BASSETT, a witness on the part of and on behalf of the complainant, who, being first duly sworn by me, testified as follows:

Q. 1. State your name, age, residence, and occupation.

321 A. Asen Lewis Bassett; age, forty-seven; residence, Cleveland, Ohio; occupation, a merchant.

Q. 2. Do you know personally Charles E. Wheeler, of the city of Cleveland, Ohio? and, if you do, about how long have you known him, and state whether he has ever been employed in the United States post-office in this city.

A. I do know him; I have known him since 1853; and I know of his being employed in the post-office.

Q. 3. At what time did you first know of his being employed in the post-office in this city? At about what time?

A. I knew of it in 1853.

Q. 4. State whether you yourself have ever been employed as a clerk in the post-office in this city? and, if you answer yea, state the time you were first so employed.

A. I have, and during the greater part of 1855.

Q. 5. About how long were you so employed at the time mentioned in your last answer?

A. I was employed there about one year; a part of that year ran into 1856.

Q. 6. During that time did you know Mr. Wheeler as a clerk in that post-office? I mean Mr. Charles E. Wheeler, of Cleveland.

A. I can't say that I did.

Q. 7. During that time state how the letters were postmarked and the postage-stamps canceled, if you know?

A. The postage stamps were canceled with what we called a dating stamp.

Q. 8. What do you mean to be understood by dating stamp? Describe it as near as you can.

A. A circular stamp with the name "Cleveland, O.," in the circle, the month, day of the month, and year in the centre.

Q. 9. You mean to be understood that postage-stamps at that time used upon letters for payment of postage were canceled by the

322 device or substantially such device as you have described in your last answer, do you not?

A. I do.

Q. 10. During the time you were in that post-office in 1855 and 1856, did you see or know of a double-stamping device, consisting of a post-marking instrument and a postage-stamp canceling device, so combined as to be operated by one handle, to give the impression of the post-marking upon the letter and the impression of cancellation upon the postage-stamp on the upper surface thereof by one blow of such combined devices, being used in that post office?

(Objected to as leading.)

ing letters was a separate room from those named in the last answer.

A. No, sir; it was not.

Q. 37. In which of the two rooms you have named was the stamping table?

A. In the D. P. O. room.

Q. 38. Where Wheeler was at work?

A. Yes, sir.

Q. 39. During that time, I mean the time between the first combined device which you constructed after the issuing of the Post Office Department order, as you have stated, and the time when you left the post-office, about February, 1863, and while the second combined instrument you have described was in use in that office, did Mr. Wheeler claim, or pretend to claim, to you that that combined instrument was his invention?

A. No, sir.

Q. 40. To your personal knowledge was there any necessity in the Cleveland post-office for the use of such combined instrument as you have testified about, prior to the issuing of the order by the Post Office Department, of which you have spoken?

A. No, sir.

Q. 41. Previous to your combining the two devices, namely, the post marking and canceling devices, by means of the twine, of which you have spoken, had you ever seen or known of an instrument containing such devices, and so arranged that by one blow a letter would be postmarked on the envelope and at the same time cancel the postage stamp thereon?

A. No, sir.

Q. 42. How many devices of the combined instruments were constructed and used in the Cleveland post-office during that time, if you know?

A. I don't know how many there were.

327 Q. 43. The postmarking stamp and the postage canceling stamp, which you say were brazed or soldered together by Jacob Schwartzenberg, do you know where they came from, or who made them?

A. It was said that they came from the Post Office Department.

Q. 44. Where did you get them for the purpose of having them so combined?

A. They were stamps we had formerly used in the Cleveland post-office.

Cross-examination:

By Mr. CLARKE.

X Q. 45. When you tied the canceler and postmarker together, as you have described, both handles were retained, were they not?

A. They were.

X Q. 46. What were your duties when you were in the post-office in 1855 and 1856?

A. Assisting in making up mails in the D. P. O. room?

X Q. 47. What did you do?

A. Distribute letters; the duties there were quite numerous; I being a pretty rapid writer they used to put me on what they called "entering on the sheets." It was not an uncommon thing for me to go into the front office and pick up the letters, stamp them, and distribute them in the route case.

X Q. 48. What were you principally occupied with?
A. Writing, and distributing letters.
X Q. 49. Did you do your writing in the D. P. O. room?
A. Yes, sir.
X Q. 50. The post-office was then on Water street, was it not?
A. It was.
X Q. 51. Was the stamping done in the D. P. O. room?
A. It was.
X Q. 52. That was a back room, was it not?
328 A. It was.
X Q. 53. Do you swear that a combined instrument for post-marking and canceling was not used in the Cleveland post-office while you were employed there, in 1855 and 1856?
A. Not to my knowledge was there any used there at that time.
X Q. 54. Who was stamper then?
A. Mr. Wright.
X Q. 55. Any one else?
A. It was not an uncommon thing for any of the boys to run out and gather up the letters in the front office, and stamp them previous to closing the mail.
X Q. 56. Where is Mr. Wright now, if you know?
A. I do not know.
X Q. 57. Is he living or dead?
A. I heard he was dead.
X Q. 58. Was there a man by the name of Hodges then employed there?
A. No, sir; not to my knowledge.
X Q. 59. A man by the name of Beardsley?
A. There was.
X Q. 60. A man by the name of Albinger?
A. I can't tell.
X Q. 61. Why can't you tell?
A. He was in the post-office a long time; all the time I was in the new post-office, and he might have been there when I was in the post-office on Water street. He did not work in the D. P. O. room in either office to my knowledge.
X Q. 62. Do you swear that the combined instrument was not used in the Cleveland post-office while you were in the office, in 1855 and 1856, by any of the persons whom I have just named?
A. I swear they were not used to my knowledge.
X Q. 63. Might you not have forgotten it?
A. It is hardly possible.
X Q. 64. Why is it hardly possible?
329 A. I should have had something to assist me to comply with the order from Washington without resorting to wrapping twine and the rude material I had there to make the combined instrument.
X Q. 65. Might you not have forgotten it before you returned to the office in January, 1859?
A. If I had, there were those who had been in the office during my absence who I should think would have reminded me of it. It is hardly possible that I should have forgotten it.
X Q. 66. Why hardly possible that you should have forgotten it before you returned to the office in 1859?
A. Because I considered it of too much importance.
X Q. 67. Please describe the lock which was used on mailbags in 1855 and 1856.

(Objected to as immaterial, incompetent and improper.)

A. It would lock without a key.

X Q. 68. Is that all the description you can give?

(Same objection.)

A. No, sir.

X Q. 69. Give some more description.

(Same objection.)

A. It was flat, about a half an inch thick.

X Q. 70. What were you doing between 1856 and 1859?

A. I was keeping books a part of the time for a wool merchant; a part of the time I was farming, and a part of the time I was teaching school.

X Q. 71. Do you swear Mr. Wheeler was not employed in the post-office in 1855 and 1856 while you were there?

A. To the best of my knowledge, he was not.

330 X Q. 72. Who had charge of the distribution department at that time?

A. If there was any information wanted we went to the deputy post-master, Mr. Gray.

X Q. 73. Was there no one under the deputy who was in charge of that department?

A. No, sir.

X Q. 74. Where were you between 1856 and 1859?

A. A part of the time here in Cleveland, a part of the time in Iowa, a part of the time in New York State.

X Q. 75. Why did you leave the post-office in 1856?

A. Because I would not vote the Democratic ticket.

X Q. 76. What election?

A. One of our city elections.

X Q. 77. When was that election?

A. In the spring of 1856, I think.

X Q. 78. Are you positive?

A. No, I am not.

X Q. 79. Why not?

A. Because I made no memorandum of it.

X Q. 80. Can't you remember things without making a memorandum of them?

A. Some things.

X Q. 81 You are very positive, however, that it was in 1856 you left the office, are you not?

A. Yes.

X Q. 82. Did you make any memorandum of the clerks who were employed there in 1855 and 1856?

A. I did not.

X Q. 83. You are very positive, however, that Mr. Wheeler was not so employed, are you not?

A. I am quite positive.

X Q. 84. How well did you know Mr. Wheeler in 1853?

A. Well enough to visit at his house.

331 X Q. 85. In 1855 and 1856 was there a man by the name of G. B. Lester employed in the Cleveland post-office?

A. I think he came in the post-office soon after I left.

X Q. 86. Was James McGaugh?

A. He comes under the same category as John Albinger; he was out in the bagging room if he was there.

X Q. 89. Did you vote for Fremont in 1856?

A. Yes, sir; I did.

X Q. 88. Where were you then?

A. Cleveland.

X Q. 89. Were you a clerk in the post-office then?

A. No, sir.

X Q. 90. Fix the date when you went into the post-office the first time, and when you left it, as precisely as you can.

A. About April, 1855, when I went in, and about April, 1856, when I went out.

X Q. 91. Have you any way of fixing these dates precisely?

A. I don't know that I have.

X Q. 92. Have you any means of refreshing your recollection as to whether Mr. Wheeler was then a clerk in the post-office?

A. To the best of my remembrance he was not there.

X Q. 93. Have you any means of refreshing your recollection on that point?

A. Well, sir, I would not know how to go to work to refresh myself on that point. I am satisfied in my own mind that he was not there.

Adjourned by consent to May 30th, 9.30 a. m.

332 Met pursuant to adjournment.
Same counsel present as before.

Cross-examination by Mr. CLARKE resumed as follows:

X Q. 94. You have heard that Mr. Wheeler claimed to have invented this combination, have you not?

(Objected to on the ground of it being immaterial what the witness may have heard about the witness Wheeler.)

A. I have.

X Q. 95. When did you first hear that?

A. Some time after I left the post-office in 1863.

X Q. 96. Was L. L. Deming employed in the post-office in 1855 and 1856 when you were there?

A. Not to my knowledge.

X Q. 97. Do you know of his ever having been employed in the post-office?

A. Only from hearsay.

X Q. 98. Was Percy Rice employed there at that time?

A. I think not.

X Q. 99. Who was employed, if anybody, to assist you in doing the writing—"entering on the sheets?"

A. There was a young fellow by the name of Everett, Mr. Osborne, Mr. Curry, Mr. Wilson.

X Q. 100. Where are these gentlemen now?

A. I don't know.

X Q. 101. While you were in the post-office at that time, did it often happen that there were a sort of social suppers given at the office late in the evening?

A. No, sir.

333 X Q. 102. Do you remember a poem written by Deacon Gray, the deputy, taking off the characteristics of the clerks in the office?

(Objected to as irrelevant, irreverent as to Deacon Gray, and incompetent and improper.)

A. I never saw the poem. I remember hearing it spoken of.

X Q. 103. Spoken of as written while you were in the office at that time?

A. No, sir.

X Q. 104. When did you understand it to have been written—before or after you were in the office at that time?

A. My impressions are it was written before I was in the office.

X Q. 105. Do you know what Mr. Wheeler was doing at that time?

A. He was at work for a lottery firm.

X Q. 106. What was the firm-name, and where did they do business?

A. I don't remember the name of the firm. I know the name of the principal party connected with it. Their office was over the post office.

X Q. 107. What was the name of that principal party?

A. S. B. Kendig.

X Q. 108. Did Postmaster Gray have anything to do with the business in which Wheeler was engaged?

A. Not that I know of.

X Q. 109. What did Wheeler do in that business?

A. I never was in their office to see what he did do.

X Q. 110. What did you understand that he did?

A. I understood his duties were writing.

X Q. 111. What sort of writing?

A. Answering letters and directing circulars in the interest of the lottery.

334 X Q. 112. When did Wheeler go into that business, and when did he leave it?

A. I don't know.

X Q. 113. State as nearly as you can.

A. My impressions are he was employed there about two years, beginning about January, '55.

X Q. 114. Was the concern in the same building of the post office all those two years?

A. I think not.

X Q. 115. State where it was and the dates, as near as you can?

A. For a time it was on Bank street, near the Herald buildings, I think.

X Q. 116. Then did it go to Water street, into the post-office building?

A. It did.

X Q. 117. Was there any printing establishment in the post-office building on Water street?

A. I never saw any there.

X Q. 118. Did you understand there was any?

A. No, sir.

X Q. 119. Did you ever know of Wheeler's being employed in a printing establishment?

A. I have heard he was a printer by trade, but do not know where he worked.

X Q. 120. Did Postmaster Gray run any printing establishment while you were in the office at that time?

A. He was editor of the Plain Dealer.

X Q. 121. Where was the printing done for that paper?

A. In the Plain Dealer building, near the foot of Superior street.

X Q. 122. It was not done in Postmaster Gray's building on Water street?

A. No, sir.

X Q. 123. Where were the stamps kept in the post-office at that time—in what part of the office?

A. In the D. P. O. room.

X Q. 124. Whereabouts in the D. P. O. room?

335 A. Near the northwest corner.

X Q. 125. On the stamping-table?

A. Some of them were on the stamping-table and some were on shelves in the corner of the room.

X Q. 126. These shelves over the stamping-table?

A. The shelves were against the wall.

X Q. 127. How near the stamping-table?

A. About three feet from it.

X Q. 128. About how many stamps for all purposes—for postmarking, for canceling, for imprinting such words as "free," "paid," "advertised," "due 3," "due 6," "forwarded," etc., etc., were there at that time on the shelves and stamping-table?

A. I should think there was a couple of dozen. I never had occasion to count them. I believe there was a place in the delivery where they stamped the advertised letters.

X Q. 129. Do you recollect of ever examining each of those twenty-four stamps?

A. I recollect of looking them over. I might not have examined every one of them.

X Q. 130. Can you now say that among them there was not a stamp consisting of an ordinary dating stamp and a canceling stamp, from which the handle had been removed, the two being attached together by cord and wire?

A. I saw nothing of the kind there.

X Q. 131. Might there not have been such a stamp there, known to the regular stamper, without your knowledge?

A. There might have been such a stamp there known to the stamper, and I not know of it.

X Q. 132. Where were newspapers and circulars stamped?

A. In the D. P. O. room.

X Q. 133. On the same table?

A. Yes.

X Q. 134. How much time each day, on an average, were you occupied in writing?

336 A. I should think five or six hours a day.

X Q. 135. How much time on an average in distributing?

A. A couple of hours.

X Q. 136. What part of the day were you employed; day time or night?

A. Day time.

X Q. 137. What were your hours?

A. I used to go to the office about seven o'clock in the morning, and assist in making up the morning mails, and then I would go home to breakfast. It usually took about an hour. Then I would go back to the office, and work until about noon, and then went home to dinner. In the afternoon I assisted in making up mails. Sometimes went after supper, and sometimes did not.

X Q. 138. Did you usually go in the evening?

A. No, sir. It was not necessary.

X Q. 139. What time in the afternoon did your duties cease?

A. I sometimes quit at four o'clock, and sometimes staid later to assist others do their work.

X Q. 140. What was the usual hour?

A. In the summer time I would usually do my work before going to

supper. When the days were shorter, I used to go around after supper and do a little work.

X Q. 141. What was the usual hour for knocking off work in the afternoon?

A. I think our Eastern mail used to close about seven o'clock p. m., and that was the last mail, I think; that mail did not require the whole force of the D. P. O. room.

X Q. 142. That doesn't quite answer my question; I want to know at what hour you usually knocked off your work in the afternoon?

A. There was no definite time set to quit work.

X Q. 143. What hour on the average, was it four o'clock or seven?

337 A. If I staid to help make up the New York or Eastern mail, I usually staid until seven o'clock. If it was understood that other parties were to make it up, I quit about four o'clock. It was understood among ourselves there at the office that the mail should be made up on time by those connected with the D. P. O. room.

X Q. 144. About how often, on the average, did you help to make up that last Eastern mail?

A. Two or three times a week.

X Q. 145. How much time did you take for dinner?

A. About an hour and a half; we were not limited.

X Q. 146. About how many hours did you usually spend in the office?

A. From eight to ten hours.

X Q. 147. You have stated you usually spent eight to ten hours a day in the office; that you were occupied with writing five or six hours, in distributing about two hours; how much time did you usually give to stamping?

A. It was not customary for me to do the stamping; I used to do it, though, occasionally, to accommodate the stamper.

X Q. 148. About how often did those occasions come around?

A. Two or three times a week.

X Q. 149. About how long were you occupied at each of those times?

A. From five to ten minutes. The mail was usually held open until a certain time; then the letters were picked up from the front office, and all letters going in that mail were stamped and distributed. This was done sometimes by others than the stamping clerk.

X Q. 150. I understand you to mean that the regular stamper, Mr. Wright, usually did most of the stamping for each mail, but that if he wished to be away for half an hour or an hour before the mail closed, some one of the young men in the D. P. O. room would gather

338 up the letters deposited during that time and stamp and distribute them, taking for that purpose five or ten or fifteen minutes; is that correct?

A. Yes; that is as I wish to be understood.

Redirect examination:

By Mr. NORTON:

R. D. 151. You were asked in cross-question 94 whether you had heard that Mr. Charles E. Wheeler claimed to have invented the combined post-marking and postage-canceling instrument as his invention; under objections you answered "I have." From whom did you hear that?

A. I don't remember who I heard it from first.

R. D. 152. Did you ever hear Mr. Wheeler say anything about it, and, if so, when and where was it?

A. He never claimed to me it was his invention.

R. D. 153. He has had some conversation with you within the last six months about it, has he not?

A. He has.

R. D. 154. Did he have a conversation with you about it previous to the time stated in the last question?

A. Yes, sir.

R. D. 155. About how many times, if you remember, since 1863 to the present time?

A. Oh, three or four times.

R. D. 156. Since the commencement of this suit, about one year ago, has Mr. Wheeler had conversation with you about your being a witness in this case or any other case?

(Objected to as immaterial and not proper on redirect examination.)

A. He has talked with me about a suit pending, but said nothing about my being a witness.

339 R. D. 157. During that conversation did he claim to you, or pretend to claim, that he was the real inventor of this combined instrument about which you have testified?

(Same objection.)

A. He told me he had made application for a patent on this combined instrument.

R. D. 158. What reply did you make to him upon receiving that information?

A. I told him the first I ever knew of it I tied the two stamps together myself, when I was stamping clerk, soon after the issuing of an order from the Post Office Department that the postage-stamp on the letter must be canceled by a separate instrument from the dating stamp; this is the substance of what I said.

R. D. 159. While you was stamping clerk where?

A. In the present post-office building in this city.

R. D. 160. Can you name the several persons employed in the D. P. O. room while you were there as stamping clerk, between January, 1859, and about February, 1863, when you left the service in the Cleveland post-office?

A. I can, the most of them.

R. D. 161. Please state them as near as you remember them.

A. C. E. Wheeler, J. N. Hoyt, S. L. Everett, James McGaugh, Charles Aiken, Ithiel Stone, Henry C. Cooke, Mr. Stevens; these were not all there all the while I was there; there were changes made while I was there, as I was there under Democratic and Republican administrations.

R. D. 162. In cross question No. 128 you were inquired as to the number of the various kinds of stamps used in the Cleveland post-office, and you answered substantially that you should think there were two 340 dozen; did you see or know of a combined post-marking and postage-canceling instrument among those two dozen stamps during the first time you were employed in that post office, namely, 1855 and 1856?

(Objected to as improper on his redirect examination.)

A. I did not see any.

R. D. 163. Had there been one there of that kind at that time, and in use in that post office, would you not have been likely to see it or to know of its use?

(Same objection.)

A. I would.

R D. 164. In cross question 131 you were asked "Might there not have been such a stamp there, known to the regular stamper, without

your knowledge?" and you answered "There might have been such a stamp there, known to the stamper, and I not know of it." Where could such a stamp have been in that office and you not have known of it?

A. It might have been in the deputy postmaster's private office, or in some of the private drawers of some of the post-office officials where I did not have access.

R. D. 165. Do you think it possible for Mr. Charles E. Wheeler to have had one of those combined instruments in a pocket in his shirt, coat, vest, pantaloons, or boot legs, or in his hat during that time while he was in the post-office, during these years, in 1855 and 1856, or at any other time previous to the time when you say you combined the postmarking and canceling-stamp soon after the issuing of the order by the Postmaster-General prohibiting the use of the dating stamp for canceling purposes?

341 A. I think it possible, but not at all probable. He was not there in 1855 and 1856.

Adjourned to 2.30 p. m.

Met pursuant to adjournment.

Same counsel present as before.

Redirect examination by Mr. NORTON resumed, as follows:

R. D. 166. In answer to cross-question 147 you state "It was not customary for me to do this stamping." To what time do you refer in that answer?

A. In 1855 and 1856, during my first term in the post office.

R. D. 167. At that time how many men were required to postmark letters and to cancel the postage stamps on the same?

A. It was expected one man could do that work.

R. D. 168. You mean in your last answer that that work at that time was the work of one man continuous'y, and without the aid of any other person?

(Objected to as leading.)

A. One man could do it easily; that includes all kinds of postmarking and canceling done at that time.

R. D. 169. Was there enough of such kind of labor as your last answer contemplates, in the Cleveland post office at that time, to require the continued labor of one man for the day or night service to enable mails to be started regularly in transportation?

A. No, sir; there was not, with the exception of one or two days in a month.

R. D. 170. At the time that the order was made by the Postmaster-General prohibiting the use of the postmarking stamp for canceling postage-stamps, and you had notice of that order during your second term in the Cleveland post office as you have stated, could one man do the work of postmarking and canceling all kinds of mail matter, and follow the instructions of that order?

342

A. Yes, sir; I did it and a great deal of other work besides.

R. D. 171. Explain how and by what means you did it.

(Objected to as not proper on this redirect examination.)

A. By the ordinary method and being supple in my labors, and combining the two stamps as I have already stated, facilitated the work; I mean the combination of the postmarking and canceling stamp.

R. D. 172. Had you not at that time combined the postmarking and

postage canceling devices, as you have already stated you did, could you have complied with that order, and at the same time made ready the letters for the regular outgoing mails by first postmarking the letters with the postmarking stamp, and then going over the same letters again for the purpose of canceling the postage-stamp on the letters?

(Same objection.)

A. I could not and perform other labors I was expected to do.

R. D. 173. For about what length of time were you the stamping clerk in that office?

(Same objection.)

A. For about three years.

R. D. 174. During that three years was Wheeler employed in that same office?

343 (Same objection.)

A. Yes, sir.

R. D. 175. Was Wheeler frequently in and out or about the room where the letters and other matter were postmarked and the postage-stamps on the same were canceled by you during that time?

(Same objection.)

A. He was.

R. D. 176. Suppose thirty thousand circulars were in one day to be sent from the Cleveland post-office (at any time), how many mail bags of the ordinary size would be required to receive those circulars for transportation in the cars, in a wagon, or on horseback?

(Same objection.)

A. That would depend upon size of the circulars.

R. D. 177. I mean circulars enveloped by the ordinary letter envelope, with a single or double sheet.

A. Not having bagged any mail, I could not tell you; it was not my business.

R. D. 188. What became of the stamp combined with the postage canceling device by means of twine, which you have described?

(Same objection.)

A. The handle was taken off, and it was soldered on to the dating stamp by Jacob Swartzenberg.

R. D. 179. Do you know where the combined stamp now is to which you refer in your last answer?

(Same objection.)

344 A. I do not.

R. D. 180. When did you last see it?

(Same objection.)

A. About 1863.

R. D. 181. Where was that?

(Same objection.)

A. In the Cleveland post-office; in the D. P. O. room.

R. D. 182. Did you ever apply for a patent on either of the two combined devices described by you on this examination, and as having been gotten up by you soon after the issuing of the order by the Postmaster-General, that has been spoken of during this examination?

A. I never did.

Recross-examination:

By Mr. CLARKE:

R. C. 183. How do you fix the years 1855 and 1856 as being the years you first went into the post-office?

A. It was the year 1855, it being the year I was married.

R. C. 184. Are you sure that Mr. Wheeler was connected with the lottery business while it was carried on in the post-office building on Water street?

A. I am quite positive he was.

R. C. 185. When did this lottery business move down to Water street?

A. I think it was in the year 1855.

R. C. 186. When did it begin?

A. I don't know; the office was running when I came to Cleveland, in the spring of 1853.

R. C. 187. Who was the postmaster?

345 A. I think Mr. Dan Haskell.

R. C. 188. When was the post-office moved to Water street?

A. I can't tell exactly; I think it was in 1854; it might have been in 1853, though.

R. C. 189. When was Gray made postmaster?

A. After Pierce was elected President.

R. C. 190. About when?

A. I can't tell you when Mr. Gray was appointed postmaster.

R. C. 191. How do you know Wheeler was connected with the lottery business while it was carried on in the post-office building on Water street?

A. His employer, S. B. Kendig, was my brother-in-law.

R. C. 192. Do you know of your own knowledge?

A. I never saw him in the office.

R. C. 193. You don't know of your own knowledge of his being in the lottery business at all, do you?

A. Only from Wheeler's saying that he was, and also heard it from others.

R. C. 194. When did Wheeler tell you that?

A. When he was at work with me in the post-office he used to refer to the time when he was in this lottery business.

R. C. 195. You mean the second time you were employed in the post-office?

A. I do.

R. C. 196. Do you recollect his telling the year?

A. I do not; during his work for the lottery concern his family and mine used to visit back and forth quite often.

Redirect examination resumed as follows:

R. D. 197. Counsel for the defendant having inquired of you concerning Mr. Charles E. Wheeler's connection with the lottery establishment in this city, I desire to inquire of you to state, if you
346 know, the character of the business carried on by that establishment?

(Objected to as immaterial.)

A. I don't know the character of the business, never having been in their office.

R. D. 198. Did you ever see one of their circulars?

(Same objection.)

A. I have.

R. D. 199. State what those circulars contained, if you remember.

(Same objection, and also as asking for secondary evidence.)

A. The principal part of them were lottery schemes.

R. D. 200. Inviting people in the country to invest money in some scheme in that concern, is that it?

(Same objections, and also as being leading.)

A. Yes, sir.

R. D. 201. Did that lottery send away large quantities of such circulars during the time they carried on business?

(Same objection.)

A. They did.

R. D. 202. Do you know whether or not Wheeler was at that time a member of the Baptist Church in this city?

A. His wife said he was.

347 R. D. 203. Did you ever hear or know of the Baptist Church censuring Wheeler or calling him to account for his connection with this lottery business?

(Same objection.)

Under the objection of the defendant's counsel the question is withdrawn.

The deposition having been read over to the witness, he states he desires to correct his answer to cross-question 86 by saying that James McGaugh did work in the D. P. O. room during my first term in the post-office, and occasionally helped in the bagging room.

By Mr. NORTON:

Q. What were the duties of Mr. McGaugh in the D. P. O. room during the time you have referred to in your correction?

A. It was his work to assist in making up the mail.

Q. Did he have anything to do with the stamping of the letters?

A. Only occasionally; it was not his regular duty.

Q. Where is Mr. McGaugh at this time, if you know?

A. I don't know where he is.

A. L. BASSETT.

Sworn to and subscribed before me, this 30th day of May, 1878.

J. G. POMERENE,
Special Examiner.

Adjourned by consent to May 31, at 10 o'clock a. m.

348 MAY 31*st*—10 a. m.

Met and adjourned to 9 a. m., June 1, 1878.

Met pursuant to adjournment above.

Same counsel present as before.

Complainant's counsel here proceeds to offer in evidence several records from the Post Office Department, purporting to be certified by the then Postmaster-General in one certificate, and containing six different papers, and the same being severally numbered from 1 to 6 inclusive.

No. 1 being dated post-office, New York, 8th August, 1860, addressed to Hon. Horatio King, First Assistant Postmaster-General, and signed John A. Dix.

No. 2 being dated Post-Office Department, Washington, D. C., Aug. 10th, 1860, addressed to the postmaster in New York, and signed St. John B. L. Skinner, Acting First Assistant Postmaster General.

No. 3 being dated post-office, New York, January 3, 1863, addressed to A. N. Zevely, esq., Third Assistant Postmaster-General, Washington, D. C., and signed Abram Wakeman.

No. 4 being dated Post Office Department, Washington, March 1, 1865, addressed Hon. J. Collamer, chairman Committee on Post-Offices and Post Roads, U. S. Senate, signed W. Dennison, P. M. G.

No. 5 being dated Post-Office Department, January 15, 1867, addressed to Hon. T. W. Ferry, of Committee of Post Offices and Post Roads, and signed Alex. W. Randall, P. M. General.

349 No. 6 being dated Post Office Department, March 13th, 1867, addressed Hon. Alex. Ramsey, chairman of Committee on Post-Offices and Post Roads, and signed Alex. W. Randall, P. M. General.

The certificate attached to the above-named papers, being dated Post-Office Department, city of Washington, 29th day of October, 1867, and signed Alex. W. Randall, Postmaster General.

(Objected to—

1st. Because there is nothing to show that the papers numbered 1 to 6 inclusive, now attached to the certificate, are the papers that were originally so attached.

2d. Because the written declarations of the parties who wrote the several letters being ex parte and not under oath, are not evidence.

3d. As to No. 2, because it is not relevant or material.

4th. Same as to No. 3.

5th. As to No. 4, same as to No. 2 and No. 3.

6th. As to No. 5, same objection as to Nos. 2, 3, and 4.

7th. As to No. 6, the same objection as to Nos. 2, 3, 4, and 5.)

Papers received in evidence and marked Exhibits Nos. 1, 2, 3, 4, 5, and 6, Post-Office Department, June 1, 1878. J. G. Pomereme, special examiner.

Complainant's counsel here offers in evidence a certified copy of a letter dated Post-Office Department, Appointment Office, Wash-
350 ington, May 4, 1859, addressed postmaster, Troy, N. Y., signed Horatio King, First Assistant Postmaster-General, and certified to March 23, 1868, Alex. W. Randall, Postmaster-General, and the same is marked Complainant's Exhibit No. 7. Post Office Department, J. G. Pomerene, special examiner, June 1, 1878.

(Objected to on the same grounds as stated above, except the first.)

Complainant's counsel here offers in evidence a certified copy of a letter dated Post-Office Department, Finance Office, October 7, 1862, addressed Marcus P. Norton, attorney-at-law, Troy, N. Y., and signed A. N. Zevely, Third Assistant P. M. General; marked, certified March 31st, 1868, and signed Alex. W. Randall, Postmaster-General, and the same is marked Complainant's Exhibit No. 8, Post Office Department, J. G. Pomerene, special examiner, June 1, 1878.

(Same objections.)

Complainant's counsel here offers in evidence a certified copy of letter dated Post-Office Appointment Office, Washington, July 25, 1862, addressed Marcus P. Norton, Troy, N. Y., and signed John A. Kasson, First Assistant P. M. General, and certified to March 12, 1868, and signed Alex. W. Randall, Postmaster-General, and the same is here marked Complainant's Exhibit No. 7, Post Office Department, J. G. Pomerene, special examiner, June 1, 1878.

(Same objections.)

Complainant's counsel here offers in evidence a certified copy
351 of a letter dated Post-Office Department, Appointment Office, Washington, April 29th, 1862, addressed Marcus P. Norton, Troy, N. Y., signed John A. Kasson, First Assistant P. M. General, and certified to March 23, 1868, and signed Alex. W. Randall, Postmaster-General, and the same is here marked Complainant's Exhibit No. 10, Post-Office Department, J. G. Pomerene, special examiner, June 1, 1878.

(Same objections.)

Adjourned by consent until June 3, at 9.30 a. m.

JUNE 3, 1878.

Met pursuant to adjournment of June 1, 1878.

Present, same counsel as before.

Complainant's counsel calls as a witness on the part and behalf of the complainant—

JAMES MCGOUGH, who, being duly sworn by me, doth depose and testify as follows:

Q. 1. State your name, age, residence, and occupation.

A. My name is James McGough; my age is thirty-eight years; residence, No. 380 Detroit street, Cleveland, Ohio; occupation, grocery store.

Q. 2. Were you employed in the post office in Cleveland while it was located in the Herald building, on Bank street?

A. Yes, sir.

Q. 3. While the post-office was in the Herald building, on Bank street, where was the D. P. O. room, if you remember?

A. Upstairs.

Q. 4. Where was the stamping or the postmarking of letters done while the post-office was in the Herald building, on Bank street, if you can remember?

352 A. Upstairs, in the D. P. O. room.

Q. 5. While the post-office was on Water street were you employed in that post-office?

A. Yes, sir.

Q. 6. While the post-office was in the Herald building, on Bank street, and while the same post-office was located on Water street, in this city, did you see or know of any combined postmarking and canceling instrument in use in either of those places by anybody?

A. No, sir.

Q. 7. Were you ever employed in the post-office in the new building where it is now located; and, if so, for about how long?

A. About sixteen years.

Q. 8. What do you mean by the sixteen years' time stated in the last answer; do you mean to be understood that you were sixteen years in the new building, or that sixteen years covered the time—Bank street, Water street, and the new building?

(Objected to as leading.)

A. I was a year and a half in Bank street, five years on Water street; I mean that.

Q. 9. You mean that the sixteen years covered the year and a half you were in Bank street, the five years you were in Water street, and that the balance of the time you were in the new building?

(Objected to as leading.)

A. Yes, sir.

Q. 10. When did you, if at all, for the first time see or know of a combined postmarking and postage canceling instrument in use in the Cleveland post-office, this city?

A. When we got to the new post-office. I could not give you the date. It was after we got in that new office.

353 Q. 11. Do you know Mr. Charles E. Wheeler, of this city?

A. Yes, sir.

Q. 12. Was he employed in the Cleveland post-office during the time you were there?

A. Yes, sir.

Q. 13. Has he been to see you within three or four months?

A. Yes.

Q. 14. State, if you remember, what he came to you about at that time.

(Objected to as immaterial.)

A. He came the first time, and the only time, to talk about that stamp.

Q. 15. What stamp?

(Objected to as immaterial.)

A. The combined stamp.

Cross-examination:

By Mr. CLARKE:

X Q. 16. What did Mr. Norton just say to you about me?

A. He didn't mention your name to me.

X Q. 17. Did he say anything, without mentioning my name, about me?

A. No, sir.

X Q. 18. Did he say anything about my swelling up like a toad, in your hearing just now, before I began to ask you questions?

A. I have nothing to do with what you or he say here.

X Q. 19. Did you hear him say anything of the kind mentioned in the last question?

A. No, sir; not a word.

354 X Q. 20. In what year were you born, Mr. McGough?

A. Well, I was a young man when I came here. Well, I was only fourteen when I came here.

X Q. 21. In what year were you born, Mr. McGough?

A. I couldn't tell, because I was only a small boy.

X Q. 22. In what year were you born, Mr. McGough?

A. I don't know.

X Q. 23. How old are you?

A. Thirty-six.

X Q. 24. State who were clerks in the post-office when it was in the Herald building on Bank street.

A. Well, the postmaster was Dan. W. Haskell—was postmaster, and he had a brother deputy, James Haskell, and a George Haskell, another brother, a clerk; and that's all that I remember of.

X Q. 25. What did George Haskell do?

A. He was a clerk there.

X Q. 26. What did he do?

A. I didn't know what he done, because I wasn't in the same room with him.

X Q. 27. What room was he in?

A. He was inside, where I had no access to him at all.

X Q. 28. Were you ever in the same room where he was?

A. No, sir; not in that building.

X Q. 29. Where was that room?

A. I didn't know where it was; I had no access to it at all.

X Q. 30. What rooms did you have access to?

A. One room, where the mail was taken in and out.

X Q. 31. Where was that room?

A. It was on the alley beside the building.

X Q. 32. Did you have access to any other room?

A. No, sir.

355 X Q. 33. Is anything the matter with your health Mr. McGough?

A. Yes; I was sick about a year last year.
X Q. 34. Who delivered letters to the public in that office?
A. I had no chance to know.
X Q. 35. What was the matter with you when you was sick?
A. That is my business.
X Q. 36. What was the matter with you when you was sick?
A. Well, I won't answer no such question.
X Q. 37. Didn't you have access to the room from which letters were delivered to the public in the Bank street office?
A. No, sir.
X Q. 38. Are you sure of that?
A. Why, of course I am.
X Q 39. Do you swear to it positively?
A. Yes, sir.
X Q. 40. Why won't you tell me what the matter was with you when you was sick?
A. Well, I won't because that's private business.
X Q. 41. How long were you sick?
A. I was sick a year.
X Q. 42. When did you first begin to be sick?
A. A year ago last fall.
X Q. 43. Who is your doctor?
A. Well, that you won't know.
X Q. 44. Why won't you tell me?
A. Well, that's my business.
X Q. 45. Why won't you tell me who your doctor was?
A. Well, that's my own private business.
X Q. 46. Who distributed letters in the Bank street office?
A. The clerk that tended the general delivery; and I don't know who he was; I don't remember his name.
356 X Q 47. What was the matter with you when you was sick?
A. Well, I told you that's my own private business.
X Q. 48. Did Mr. Norton just say that's a very proper answer?
A. I won't answer such a question.
(Counsel for complainant here interrupts and says that he did make that statement.)
X Q. 49. You had the rheumatism, didn't you?
A. No.
X Q. 50. You're perfectly well now, are you not?
A. No, sir.
X Q. 51. Did you say that the letters were delivered by the man who had charge of the general delivery in the Bank street office?
A. I told you that two or three times.
X Q. 52. In what room did he do it?
A. In the front room, I suppose.
X Q. 53. In the same room where he delivered the letters to the public?
A. Yes.
X Q. 54. Are you sure of that?
A. Certainly I am.
X Q. 55. Do you swear to it positively?
A. Yes, sir.
X Q. 56. You say you're not perfectly well now?
A. No.
X Q. 57. Is your sight good?
A. No.

X Q. 58. Is your hearing good?

A. Yes.

X Q. 59. Did the man who delivered letters to the public also distribute them in any other place than in the room where he delivered letters to the public?

A. No, sir; that's all.

357 X Q. 60. When you were sick, did you have paralysis?

(Objected to on the ground that it is not the counsel's business to inquire into the illness of the witness any further than he has done, which the record will show he has done over and over again, something less than a thousand times.)

A. No, sir.

X Q. 61. What did you have, if you didn't have paralysis?

(Objected to as being none of counsel's business at this point of cross-examination, and the answers of the witness showing the nature of his illness was of that character which he prefers not to make known, as he has repeatedly stated.)

A. Well, I won't tell you.

X Q. 62. Did any other person distribute the letters besides the one who delivered them to the public in the Bank street office?

A. No, sir.

X Q. 63. Are you sure of that?

A. Why, of course I am.

X Q. 64. Do you swear to it positively?

A. Yes, sir.

X Q. 65. You say that you're not perfectly well now; what's the matter with you now?

A. None of your business.

X Q. 66. Why won't you tell me, are you ashamed of it?

(Objected to as an insult to the witness, and intended to be such, as has been the greater part of the cross-examination, the evidence of
358 which is found in the questions themselves, not one of which touches, directly or indirectly, the examination in chief of the witness.)

A. I am not ashamed of it.

X Q. 67. Who did the stamping in the Bank street office?

A. I don't know; it was done up stairs.

X Q. 68. Who told you it was done up stairs.

A. I didn't say it was done up stairs.

X Q. 69. Where did you say it was done?

A. Up stairs.

X Q. 70. Who told you the stamping was done up stairs?

A. I seen the letters go up and saw them come down.

X Q. 71. Is that all you know about it?

A. They wrapped them up in bags.

X Q. 72. Is that all you know about the letters being stamped upstairs?

A. Well, that's enough; that's all I have to say about it.

X Q. 73. How do you know that these letters were stamped upstairs?

A. I won't answer; you got an answer a half a dozen times.

X Q. 74 Tell me how you know that the letters were stamped upstairs?

A. I won't do it; I have told you often enough so that you ought to understand.

X Q. 75. Do you know anything more about it except what you have told me?

A. No.
X Q. 76. Are you sure of that?
A. Why certainly.
X Q. 77. You swear to it positively, do you not?
A, Yes, sir.
X Q. 78. Who carried the letters up stairs?
A. They were pulled up by a rope; I don't know who pulled them.
X Q. 79. What business do you carry on now?
359 A. That's the man that carries on the business, and I live with him (pointing to his brother).
X Q. 80. You don't carry on the business now, then?
A. No.
X Q. 81. Why don't you carry on the business?
A. Well, that I won't answer.
X Q. 82. Because you've been sick, isn't it?
A. That was the cause of it.
X Q. 83. You recollect things that happened twenty to thirty years ago first rate, don't you?
A. Yes.
X Q. 84. Your memory's perfect, isn't it?
A. Well, its good enough.
X Q. 85. Is the reason why you won't tell me what your sickness was because you don't know?
A. I won't answer that question. It's nothing to do about this affair.
X Q. 86. Did any one tell you you needn't answer such questions before you came here?
A. No, sir.
X Q. 87. Do you know Mr. Norton, complainant's counsel here?
A. No, sir.
X Q. 88. You never saw him before to-day, did you?
A. Yes; once before.
X Q. 89. When was that?
A. Well, 't was Saturday.
X Q. 90. Last Saturday?
A. Yes.
X Q. 91. What did Mr. Norton say to you then?
A. Well, he didn't say much of anything.
X Q. 92. Tell all you remember.
A. Well, he told me to come over here this morning; that's all.
X Q. 93. Was anybody else present when he told you that?
A. No, sir.
X Q. 94. Do you know the nature of an oath?
360 A. Yes, sir.
X Q. 95. What is an oath?
A. Well, it 's an instrument that the citizens swear to when they take any responsible position in State or government.
X Q. 96. Have you taken any oath to-day?
(Objected to on the ground that the special examiner is at his home attending a sick wife, and the agreement was that the witness might be sworn after his testimony was taken; and the question is a violation of that agreement and of professional honor.)
A. No.
X Q. 97. Are you going to?
A. If it's necessary.
X Q. 98. Do you know what will happen to you if you swear falsely?
A. I know the effect.

X Q. 99. What is that?

A. Well, write what you want, the form of an oath.

X Q. 100. Do you know what will happen to you if you swear falsely?

A. Yes, sir.

X Q. 101. What is it?

A. Well, I'd have to suffer for it.

Redirect examination:

R. D. 102. You have been asked on your cross-examination a great many questions about your illness during the last two or three years; to all those questions you made an answer substantially that you did not desire to answer such questions, or to give any information concerning the nature of your illness; your answers were so made, were they not, because you believed the questions put to you to annoy you,
361 while you are still suffering to some degree from that illness, and because you deemed such things your own personal matters, and as having no reference to the matters you have testified to on your direct examination—is or is that not the fact?

(Objected to as leading.)

A. Yes; it is the fact.

R. D. 103. On your cross-examination you were asked a great many questions about whether you understood the nature of an oath or not; what kind of an oath did you understand the counsel to have reference to—was it or was it not such an oath as persons take entering upon an official position when you first answered it.

(Objected to as leading.)

A. Yes, sir; it was.

R. D. 104. The nature of an oath applied to a witness testifying, was it or was it not the oath you had reference to when you answered that, if you did not tell the truth you'd have to suffer for it?

(Objected to as leading.)

A. Yes, sir; it was that oath.

R. D. 105. Cross-question 75 is, "Do you know anything more about it, except what you told me?" You answered, "No." Did you mean by that answer all that you had stated on your cross-examination, or that on your direct examination, when you testified about the combined stamp, or both the cross and direct examination?

A. I meant that I didn't ever see that stamp 'till we got into the new post-office; well, that's the fact.

R. D. 106. Do you wish to correct or alter any statement you have made on your direct examination?

A. No, sir.

362 R. D. 107. On your cross-examination you were asked about distributing and delivering letters in the room below; was or was not that distribution of letters the putting of the same into boxes and pigeon holes for persons to whom they belonged?

(Objected to as leading.)

A. Yes, sir; it was.

R. D. 108. With that part of the post-office business you had nothing to do, did you?

A. No, sir.

R. D. 109. To what part of that office were your duties or labors generally confined?

A. To loading the wagons and carrying the mails away from there.

R. D. 110. Did you have anything to do with the locking of the mail bags?

A. No, sir.

R. D. 111. The mail bags, when they came into the post-office, were taken where?

(Objected to as not proper or important on redirect examination. Question waived by complainant's counsel.)

R. D. 112. In answer to cross question 78, you say that letters were pulled upstairs with a rope; what was attached to the end of that rope, if anything;

A. A basket.

R. D. 113. What were those letters taken upstairs for—I mean, for what purpose?

(Objected to as not proper on redirect examination.)

A. For distribution outside of Cleveland post-office—for the country.

363 R. D. 114. In your answer to cross-question 68, you say: "I didn't say it was done upstairs." Did you mean by that that the stamping of letters was not done up there?

(Objected to as leading.)

A. Upstairs, yes.

R. D. 115. Yes, what.

A. They were stamped upstairs.

R. D. 116. You meant in that answer, then, that you had not stated on this examination that you had testified that you had been told so. Is that correct?

(Objected to as leading.)

A. Yes.

R. D. 117. Have you any written record of the date when you were born?

A. No, sir.

R. D. 118. Your parents dead?

A. Yes, sir; they died soon after we left Ireland.

R. D. 119. Was Ireland your native land and the place where you were born?

A. Yes, sir.

R. D. 120. You were asked, in your cross-examination, what George Haskell did on Bank street. You answered: "I didn't know what he done." Do you mean by that that you did not know at the time, or that you do not now remember.

A. I didn't know at any time what his business was.

R. D. 121. Did the postmaster, Haskell, have a separate room in that building?

(Objected to as not proper on redirect examination.)

A. Yes, sir.

364 R. D. 122. James Haskell and George Haskell were brothers to the postmaster, were they?

(Objected to as not proper on redirect examination.)

A. Yes, sir.

R. D. 123. The principal duties of James and George were in the room with the postmaster, were they not?

A. No; James was upstairs; I didn't know where George was.

R. D. 124. How many rooms, if you remember, had the post-office on Bank street?

(Objected to as not a proper redirect question. Question withdrawn by complainant's counsel.)

R. D. 125. Do you remember what other clerks were employed at

that time, besides yourself and Wheeler and the official force which you have named, the Haskells?

A. That's all.

R. D. 126. You were also inquired of, on your cross-examination, as to the present condition of your health, and you answered that you had been sick about a year within the last two years. Do you consider that that has had anything whatever to do with the recollection of things stated on your direct examination this morning?

(Objected to on the ground that it is immaterial what the witness considers.)

A. Well, it had no effect on my evidence at all.

R. D. 127. In cross-question 37, you were asked: "Didn't you have access to the room from which letters were delivered to the public
365 in the Bank street office?" and you answered "No, sir." Do you mean to be understood that you never was in that room?

(Objected to as leading.)

A. Yes; I never was in that room.

R. D. 128. Where was that room?

(Objected to as improper redirect question.)

A. In front of the office.

R. D. 129. Was that a large or small room?

A. It was a good-sized room; it was the largest they had. They were all small.

R. D. 130. Do you remember what Mr. Wheeler's duties were in the Bank street post-office?

A. No, sir.

R. D. 131. Do you, or do you not, regard your cross-examination by Mr. Clark, defendant's counsel, now present, as an attempt to mislead you, and as an attempt to take advantage of you, on account of your recent illness, and on account of your not having yet fully recovered from it?

(Objected to as immaterial.)

A. I do.

R. D. 132. And that is the reason, is it not, why you gave him the answers you did on your cross-examination?

(Objected to as immaterial.)

A. Yes, sir; it is.

JAMES McGOUGH.

On account of the absence of the special examiner, attending a sick wife, this witness has not yet been sworn, nor has the deposition
366 been read over to him by any one. This examination, therefore, is adjourned until June 4th, at 9½ o'clock a m., for the purpose of having this deposition read to the witness by the special examiner, and that he may administer the usual oath to the witness at that time.

JUNE 4TH, 1878—9.30 a. m.

The deposition having been read over to the witness by the special examiner, the witness states that he desires to make no corrections; whereupon I, J. G. Pomerene, the special examiner, inquired of the witness as to the signature to the deposition, and he acknowledged that it was his signature; whereupon I duly administered to the witness the usual oath as to each and every part of his testimony appearing over said signature, to which proceeding both counsel assent.

J. G. POMERENE,
Special Examiner.

Defendant's counsel here gives notice that he shall move to suppress the deposition of the witness McGough, on the ground of his persistent refusal to answer questions, a course in which he was aided and abetted by complainant's counsel, as appears by the note on the record after the answer to cross-question 48.

JUNE 4TH—9 a. m.

Same counsel present as before.

Complainant's counsel calls as a witness, for and on behalf of complainant—

367 HENRY C. COOK, who, being by me first duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation.

A. My name is H. C. Cook; my age is about thirty-seven years and nine months; residence, Cleveland; occupation, merchant.

Q. 2. Were you ever employed in Cleveland post-office, this city?

A. Yes, sir.

Q. 3. About when?

A. Well, I was employed several times—will have to explain that. I was conversant with work in the D. P. O. room, and at various times on what they call the team; the force of men on the team would often be short, and I would get a temporary job of two or three months at a time.

Q. 4. Were you employed in the Cleveland post-office previous to the year 1860?

A. Yes; the winter before.

Q. 5. Do you know Mr. A. L. Bassett of this city; and, if you do, about how long have you known him?

A. Since 1856.

Q. 6. Were you in the Cleveland post-office during the summer or fall of the year 1860?

A. I was not employed there; yes, I was in the office.

Q. 7. About how frequently?

A. Oh, two or three times a week.

Q. 8. During the summer and fall of that year?

A. Yes.

Q. 9. If you know, state who was the stamping clerk in that office at that time, in the post-marking of letters and the cancellation of postage-stamps upon them.

A. A. L. Bassett.

Q. 10. Of Cleveland?

A. Of Cleveland.

368 Q. 11. State what you then and there saw, if anything, in use by him for stamping letters with a post-mark, and the cancellation of postage-stamps, and state all you remember about it, generally, if anything.

A. My attention was first drawn to the fact that Bassett was stamping the letters with a very clumsy contrivance, in my opinion, consisting of two stamps bound together with common wrapping twine; well, that's the end of it, unless there's something more—that's what I observed.

Q. 12. About what time of the year was that?

A. It was in August, 1860.

Q. 13. The stamps referred to in your answer to question 11 were of what use without the tying of twine; I mean for what purpose was each stamp separately used before the tying together by twine?

A. One was the Cleveland dating stamp, and one was the canceling or defacing stamp.

Q. 14. After you saw those two stamps combined and tied together by twine, as you have stated in your answer to question 11 and preceding questions, did you see any other combined stamp in use in that office that did not have twine tied around the dating and post-marking instruments to hold them together?

A. No, I did not, until later.

Q. 15. Describe the other kind you saw at a later date, as near as you can remember, stating the manner or means by which they were fastened together, as near as you can recollect.

A. They were put together in the same shape as at first, with the exception that they were soldered together instead of being tied with a string.

Q. 16. Did you personally ever stamp any letters in the Cleveland post-office, and if you did, about what year was it?

A. In the winter of 1859.

Q. 17. What sort of an instrument did you use for that purpose, at that time, if any?

369 A. The Cleveland dating-stamp.

Q. 18. How was the postage-stamp on letters canceled by you, at that time, if at all?

A. By striking the Cleveland post-office stamp on the postage-stamp in the corner of the letter.

Q. 19. You mean, then, to be understood that the dating-stamp, having the word "Cleveland" in a circle surrounding the date, was used for the purpose of canceling postage-stamps, do you; and that the word "Cleveland," and the month, and the day of the month were impressed, in part or whole, on the postage-stamp upon the letter?

(Objected to as leading.)

A. I do.

Cross-examination:

By Mr. CLARKE:

X Q. 20. You are a partner of Mr. Bassett's in the hat business, are you not?

A. I am.

X Q. 21. Mr. Bassett was a stamper in the post-office before 1860, wasn't he?

A. Well, that I don't remember, as I would only come up to town here on a visit; I didn't live here.

X Q. 22. What was Mr. Bassett doing, if you know, in 1859, at the time you say you did some stamping in the post-office?

A. I think he was working in the D. P. O. room; whether stamping clerk or not, I don't know.

X Q. 23. How long did you do stamping at that time?

A. For a few days only, as I mashed my hand up so in the work?

X Q. 24. Where was the post-office at that time?

A. On the public square, in the government building.

370 X Q. 25. Were you employed in the post-office at all, while it was on Water street, before it moved to the government building?

A. I was.

X Q. 26. Was Mr. Bassett?

A. I do not remember; I think he was.

X Q. 27. Was he there just before the removal to the government building?

A. I was not in town at the time—I was in Iowa; but think he was.

X Q. 28. How long had you been in Iowa at the time of the removal, saying that the removal was about Christmas, 1858?

A. About fifteen months.

X Q. 29. Was Mr. Bassett employed in the Cleveland post-office at the time you left for Iowa, in the fall of 1857?

A. I think he was.

X Q. 30. That is your best recollection?

A. Best recollection.

X Q. 31. How long did he continue to be so employed, if you know?

A. I think he came out West the next year; whether he was in employment in the post-office or not, I don't know, immediately before he left; I don't know whether he was in employment in the post-office when he left Cleveland or not; but naturally suppose so.

X Q. 32. How long did Mr. Bassett stay out West, if you know?

A. I think about a year.

X Q. 33. How do you fix the date August, 1860, as the time when you saw Mr. Bassett use the stamp combined with twine?

A. Because I came out of the Confederacy in the fore part of July, and not being in very good health, did not get around town much for two or three weeks, and that would place the time in August that I was in such health as to be around.

X Q. 34. What Confederacy do you mean?

371 A. The Southern Confederacy, so called.

X Q. 35. Was there a Southern Confederacy in 1860?

A. They talked that thing some time before that date down there; I use the expression as I heard it there.

X Q. 36. What State were you in?

A. Arkansas.

X Q. 37. Had that State seceded before you left?

A. To the best of my belief, no.

X Q. 38. Had any of the Southen States?

(Question is objected to on the ground that there is higher and better evidence on that subject, and that if counsel is anxious with reference thereto it is suggested by complainant's counsel that he call Jefferson Davis, esq. The higher evidence referred to are the records of the collapsed Confederacy, so called.).

A. I paid no attention to such things, being more concerned about my personal safety.

X Q. 39. State your best recollection.

A. I paid no attention to such things, my only object being to leave the State.

X Q. 40. Had the war then begun?

A. It had not.

X Q. 41. Had Lincoln been inaugurated or elected?

A. That I don't remember.

X Q. 42. How long had you been in Arkansas before you came up?

A. About two years.

X Q. 43. Continuously?

A. Not continuously; I came up here once a year every year.

X Q. 44. How long did you stop here?

A. Generally three or four months at a time.

X Q. 45. What part of the year?

372 A. Generally in the summer time, on account of low water in the Arkansas River.

X Q. 46. Did you have any vacation in the winter during those two years?

A. Sometimes, when the boats would come up to Cincinnati for repairs.

X Q. 47. Was the time that you did stamping in the post-office for two or three days, and then left off because your hand was mashed, before or after you went to Arkansas?

A. Oh, I had been up from there two or three times during my stay down there.

X Q. 48. You recollect that your employment at that time was during one of the vacations, during which you had come up here from Arkansas; do you recollect that?

A. Yes, it was after I had been working down there.

X Q. 49. How long were you here at that time, and how long in the post-office?

A. Two or three months.

X Q. 50. Who was postmaster then?

A. When I stamped those letters Mr. Cowles was postmaster, to the best of my recollection.

X Q. 51. And also, when you saw the combined stamp used by Bassett, in 1860?

A. That I don't recollect, as I had no interest, being merely a visitor.

X Q. 52. You do recollect that he was postmaster before 1860, in the winter of 1859, when you did stamping?

(Objected to, as the witness has stated no such thing, and has stated that he recollected nothing about that.)

A. I simply state that the last time I worked there Mr. Cowles was postmaster—the last time I received wages there.

373 X Q. 53. Was the last time the time when you did stamping for two or three days in the winter of 1859?

A. I think it was, but am not certain, as I was in there two or three times in all—for wages.

X Q. 54. Do you recollect any later employment than that?

A. I do not; think that was the last time.

X Q. 55. Were you employed after you saw Mr. Bassett use the combination stamp, in August, 1860?

A. I believe not.

X Q. 56. Wasn't Mr. Cowles a Republican postmaster, appointed by President Lincoln?

A. He was a Republican postmaster, so called; he edited the Leader here. I don't know of my own knowledge who he was appointed by.

X Q. 57. Harrington, who preceded Cowles, was a Democrat, wasn't he?

A. You can't prove it by me.

Redirect examination:

By Mr. NORTON.

R. D. 58. Previous to August, 1860, did you ever see or know of a doubled or combined postmarking and postage-canceling instrument being in use in the Cleveland post-office, for the purpose of postmarking letters on the envelope, and canceling postage-stamps thereon, with one blow of the instrument?

(Objected to as immaterial, and as not proper on this redirect examination.)

A. I did not.

R. D. 59. How much time have you spent in ascertaining who were the various and different postmasters in Cleveland during the last twenty years?

374 A. No time.

R. D. 60. Do you know, or pretend to know positively, whether Mr. Cowles was postmaster during the Democratic administration of James Buchanan, which ended the 4th day of March, 1861?

A. I do not; I had been in the post-office several times; was in once after the war began, to the best of my belief, but paid no attention to the political complexion of the postmasters; I would also state that the last time that I was employed in the post office that I wrote up cases; I think at that time Mr. Cowles was postmaster, as I had had some angry words with him the last time I worked in the office.

R. D. 61. Do you know, or pretend to know positively, when or by whom Mr. Cowles was appointed postmaster at the Cleveland post-office?

A. I do not.

The deposition being read to the witness by the examiner, the witness states that he desires to correct his answer to cross-question 52, and, as a correction, he now states: That I had employment with Mr. Cowles, postmaster, after the war had broken out; that was the time I last worked there; Cowles was postmaster there after the war started.

HENRY C. COOK.

Sworn to before me and subscribed in my presence this 5th day of June, 1878.

J. G. POMERENE,
Special Examiner.

Adjourned by consent until June 5th, 1878, at 9½ o'clock a. m.

375 Met in pursuance of the adjournment of June 4th.
Same counsel present as before.

Adjourned by consent until 2 o'clock p. m. same day.

Met pursuant to the adjournment last above.
Same counsel present as before.
Complainant's counsel calls—

HENRY A. MASTICK, as a witness on the part and behalf of complainant in this cause, who, being by me first duly sworn, testifies as follows:

Q. 1. State your name, age, occupation, and place of residence.

A. My name is Henry A. Mastick; my age forty-nine years; occupation a farmer; and residence Rockport, Ohio.

Q. 2. State whether you ever have been employed in the Cleveland post-office in this city.

A. I have.

Q. 3. State the time when you were first employed as clerk in the Cleveland post-office.

A. In 1849 or 1850; it was in the winter; whether it was before New Year's or not, I cannot tell.

Q. 4. How long did you continue to be employed as a clerk in that post-office? State the years, as near as you remember them.

A. I staid until 1851; then I left for a little over a year—a year and a half, perhaps; then I was there until July of 1854; then I commenced

again in 1861, until the spring of 1863; then I was there two years with Mr. Benedict; also, later.

Q. 5. When you were first employed in the Cleveland post-office, where was the post-office located?

A. On Superior street, in what is now known as the Johnson House.

376 Q. 6. If at all, when was the post-office changed from that place, and where was it changed to?

A. I can't tell the date it was changed, but it was changed to Bank street.

Q. 7. Was it changed from Bank street, and if so, where to?

A. It was changed to Water street.

Q. 8. From Water street, where did it go, if anywhere?

A. To the public square, to the post-office building, where it now is.

Q. 9. And while the post-office was located on Bank street, were you employed as a clerk in that office?

A. I was.

Q. 10. Were you in that office as a clerk until it was moved to Water street?

A. I was.

Q. 11. Do you know C. Clifford Nott, the witness who has been examined here for the defendant?

A. I do.

Q. 12. Were you in the post-office, on Bank street, during the time and all the time he was there as a clerk, namely, between October, 1852, and March, 1853?

A. No, I think not; I came there in the fall of 1852 and was there when he left; I think he may have come in the fall of 1852, a few days before I came.

Q. 13. What were his duties there, if you know, during that time?

A. He was delivery clerk.

Q. 14. Delivery clerk at what part of the office?

A. Box delivery.

Q. 15. What were the duties there, at that time, in that office?

A. In the general delivery in the day-time, and the D. P. O. room at night.

Q. 16. You were also a delivery clerk, then, in that office at that time?

377 A. Yes, sir.

Q. 17. About how far apart were you and Mr. Nott when on duty delivering letters to the public?

A. Well, I hardly know how to get at that; about ten feet, I should think; he at the box delivery and I at the general delivery windows.

Q. 18. And those windows were about ten or twelve feet apart, were they?

A. I think they were.

Q. 19. How far from either of those windows was the distributing and stamping table that was used in that room, if any such table was used there during that time, and in what part of the room?

A. There was a table called a stamping table, but not used as a distributing table, that I was aware of, about ten or twelve feet from the back of the boxes, and against or near the wall on the opposite side of the room, and near the back end.

Q. 20. Was that stamping-table so situated that you frequently saw it during the day while on duty?

A. Yes, sir; it was.

Q. 21. Did you ever perform any service or work on that table of any kind?

A. Yes, sir; often.

Q. 22. What?

A. Stamping letters and papers when the other clerk, the regular stamping clerk, was absent.

Q. 23. State whether during that time you saw or knew of a combined stamp of any description whatever for the postmarking of letters, and for the canceling of the postage-stamp at the same impression or blow of the instrument, and separate from the postmark, being used in that post-office by anybody?

A. No, sir; I never did; not to my knowledge.

Q. 24. Did you during that time see or know of combined instruments for the purpose indicated in the last question on that stamping-table, or in any other part of that post-office?

378 A. No, sir.

Q. 25. Had there been any such combined instrument on that stamping-table during that time, were you so situated as to your duties that you would have been apt to have known of it?

A. I think I should.

Q. 26. Did you ever hear anybody during that time, and in that office, say anything about such kind of a combined stamp as being there, or as being used for any purpose whatever?

A. No, sir.

Q. 27. Whenever you postmarked letters during that time and in that office, what kind of an instrument, if any, did you use for that purpose?

A. I used what is called the date stamp.

Q. 28. Did that date stamp have engraved within a circle around the date the word "Cleveland" and the letter "O,"?

A. Yes, sir.

Q. 29. How did you operate that postmarking device for postmarking letters?

A. By hand—took the handle in my hand and struck it down on the letter.

Q. 30. On what part of the letter did you leave the impression from that dating and postmarking stamp?

A. On the postage-stamp, so as to cancel it by the dating stamp.

Q. 31. Was that postmarking done in or with ink?

A. Printers' ink.

Q. 32. Do you remember whether James McGough was employed in that office during that time and place?

A. I don't remember that he was; he might have come in the last part of it, but I don't recollect it.

Q. 33. Where was the D. P. O. room for the distribution of letters situated at that time?

A. Over what is called the round-table room, and upstairs.

379 Q. 34. How were letters and other mail matter transmitted to that room upstairs from the rooms below, if you know?

A. By basket, pulled up with a rope.

Q. 35. The letters were first placed in the basket, and then the basket was drawn up by a rope; is that correct?

A. Yes, sir.

Q. 36. Where was the newspaper distributing room situated in that building at that time, if you know?

A. Immediately back of what is called the general delivery, at the back part of the building.

Q. 37. What sort of a table was used in that room, if any?

A. A circular table, with boxes built on the back side for receiving papers.

Q. 38. Do you remember whether the openings for the delivery of mail matter to the public had any covering, either hung by hinges or sliding in grooves?

A. The top was glass, the bottom was wood, with a catch in it, and this slid in a groove to open it; and in the bottom of the wood there was a little circular slit cut for shoving out letters and papers to the public; this was the general delivery window.

Q. 39. What was the difference, if any, in the covering to the box delivery window, as compared with that of the general delivery window, which you have described?

A. I think in the box delivery window there were doors hung on hinges, and they were fastened by a sliding catch inside.

Q. 40. Could either of those doors covering those delivery openings be opened from the outside?

A. No, sir; could not.

Q. 41. From your experience in that office from delivering letters to the public, about how much time would usually be required to
380 deliver a letter to a person calling for one, through the general delivery window?

A. Just long enough to examine the alphabets, and the box in which the letter called for might be found; there were two alphabets, one vertical and the other horizontal, to designate the pigeon holes, one for the first name, and one for the last name of the person calling for the letter.

Q. 42. Apply the same question to a person calling for letters at the box delivery widow, and then answer as to that delivery, whether it would take more time or less than at the general delivery window.

A. Less—because you would not have to stop to read the alphabets, as you would go by the number of the box, and you would not have to stop to look at the name on the letter.

Q. 43. During that time and place, was it the custom of that post-office to so neglect the duty of delivering letters promptly as to detain a person outside for any considerable length of time, or to allow a person to stick his head into or through a box delivery window, and to peek about and examine the affairs of that establishment, before his letter or letters should be delivered to him?

(Objected to as immaterial.)

A. I have seen persons come up and stick their heads through the window, whether for the purpose of talking with the clerk, or for what purpose, I don't know. I made a mistake in my answer, as I did not understand the question; my answer now is, that it was not the custom; the opening was not large enough for a man to get his head through far, and the postmaster would not allow it.

Q. 44. About how high from the floor were those delivery openings?

A. Between four and five feet—a little over four feet any way:

381 Q. 45. Were the delivery clerks generally on duty so as promptly to deliver letters, and not detain persons calling for them at that time and place?

(Same objection.)

A. Well, most always; there were times when they were in the back room for a few moments after mail, or something of that kind.

Q. 46. Any person calling there during that time for "love letters," would there be any greater delay in his case than in anybody else's in delivering his letters?

A. Well, I think not; as we had no lady clerks in the office, he would have no occasion for any unusual delay.

Q. 47. Suppose a man by the name of Cottrell residing in the city of Cleveland during the time the post office was on Bank street, and while you were in that post-office, should come there crawling and smiling about, and asking for love letters, would there be any occasion or necessity for his tarrying there for any length of time?

A. Not for me; I shouldn't hinder him.

Q. 48. During the time you were in the post-office, on Bank street, was Charles E. Wheeler there?

A. He was, I think.

Q. 49. About how much time would be required to do the entire postmarking and the canceling of postage stamps during each day while you were in that office on Bank street?

A. Taking letters and papers, too, I should think it might be done in two hours during each day.

Q. 50. Was there ever any necessity for a double or combined postmarking and postage-canceling instrument for use in the post-office while it was on Bank street, and while you were there; I ask for
382 your opinion on that subject founded upon your experience in that kind of business, in that office, while you were there?

A. Not that I know of.

Q. 51. You never knew of any, did you?

A. No, sir.

Adjourned by consent to June 6, at 9 o'clock a. m.

JUNE 6—9 a. m.

Met pursuant to adjournment.

Same counsel present as before.

The direct examination of the witness resumed by the complainant's counsel:

Q. 52. We will now go from the post-office on Bank street to the post office on Water street, in this city, and I desire you to state whether your employment in the post-office there was continuous or from time to time, while the post-office was located there?

A. It was continuous while I was there, until I left that office.

Q. 53. About what time was that?

A. July, 1854.

Q. 54. About how long after the post-office was moved on Water street?

A. About a year after it was moved on Water street.

Q. 55. After you left the post-office on Water street, as an employee there, were you after that employed in that office on Water street?

A. I was not.

Q. 56. While you were in the post-office there, what were your duties in the office?

A. I was in what is called the D. P. O. room, distributing room.

383 Q. 57. In what part of that post-office, if you know, was the postmarking of letters done?

A. It was in the distributing room.

Q. 58. Which distributing room do you mean?

A. It was what was called the D. P. O. room—the room that I was employed in.

Q. 59. Who was the stamping clerk there at that time, if you remember?

A. Mr. Wright.

Q. 60. During the time you were there, did you stamp any letters in that room; and, if you did, about how frequently?

A. Sometimes when the stamping clerk was gone I did, and that might happen sometimes every day for a few minutes, sometimes once a week.

Q. 61. While you were in that department did you see or know of a postmarking and a postage-stamp canceling device combined into one instrument, with one operating handle, so as to postmark the letter on the envelope and at the same operation or blow of the instrument cancel the postage-stamp near by the postmark, and yet independent of that postmark, being used in that office, by anybody for the purposes indicated in this question?

A. To my knowledge I never did.

Q. 62. Had there been an instrument of that kind in use in that office at that time, for the purposes indicated in my last question, would or would you not have been apt to see it?

A. I think I should.

Q. 63. Have you any doubt about it?

A. No.

Q. 64. Well, did you see one there of that description during that time?

A. I can't remember as I ever did.

Q. 65. The stamping table was in the D. P. O. room where your duties were during that time, was it not?

A. It was.

384 Q. 66. About how large was that room, if you remember; I mean about how many feet in length or width, or square, as the case may be?

A. About twenty-four by thirty, I should think. I can't give the exact size.

Q. 67. About how far was the stamping table from the table or place where you did your work?

A. Nearly opposite, back of me, on the side of the room, about eighteen or twenty feet distant. There was a table for doing up mails between us running lengthwise along the centre of the room.

Q. 68. Was Mr. C. E. Wheeler employed in that post-office at that time, if you know?

A. I don't think he was. I think he went into a lottery business with a man by the name of Kendig.

Q. 69. Was that lottery business carried on in this city, if you know, or was it an agency for an outside concern?

(Objected to as irrelevant and immaterial.)

A. I think an agency for a general office in Cincinnati.

Q. 70. I now show you a letter envelope, being addressed to a lady at Newark, Ohio, with a postmark "Cleveland, O., March 8—3 paid;" take it, examine it, and state if you have ever seen that envelope before to-day.

A. I have.

Q. 71. Look at it, and state if you know the person to whom that envelope was addressed?

A. I do.

Q. 72. Read from that envelope that person's name and the place where that envelope was directed?

A. Miss Angie C. Moull, Newark, Licking Co., Ohio.

Q. 73. The address you have just given, is that written in ink on that envelope?

A. Yes, sir.

Q. 74. In whose handwriting is that address, if you know?

385 A. My own.

Q. 75. When did you write that, if you remember?

A. March 4, 1854, the letter inside of the envelope was dated. I wrote the letter in Rockport, and brought it to Cleveland and mailed it March 8, 1854.

Q. 76. State whether subsequent to the date of that letter you married the lady to whom that letter was addressed?

A. I did.

Q. 77. State whether she is now living, and where, if you know?

A. At Rockport, as my wife.

Q. 78. State, if you know, where this letter envelope has been since March, 1854, till the present time?

A. In a package of letters we had in our house, which she had laid away. She handed it to me last evening at my house in Rockport.

Complainant's counsel now offers the envelope in evidence, and asks to have it marked as Complainant's Exhibit H. A. Mastick, June 6, 1878, J. G. P., special examiner; and it is so marked by me.

J. G. POMERENE,
Special Examiner.

(Objected to as not properly proved, and as irrelevant and immaterial.)

Q. 79. I observe on this envelope some marks in pencil; who put those there, and for what purpose, if you know?

A. I put "1854" there, a date I took from the letter which was inside, last night, to show that this envelope was the one that letter was enclosed in. The balance of writing in pencil is in my wife's handwriting.

386 Q. 80. State whether you know your wife's handwriting.

A. I do.

Q. 81. State, if you know, whether, while you were in the post-office on Water street, postage was required to be prepaid by postage-stamps or whether it was optional with the sender.

A. I think optional with the sender. I know it was.

Q. 82. What size stamps were used at that time in the payment of postage on letters—I mean the value of the postage-stamp—on domestic letters, excluding letters sent west of the Rocky Mountains?

A. Three cents.

Q. 83. State, if you know, whether it was a frequent occurrence at the time you were in the post-office on Water street to postmark letters like, or substantially like, Complainant's Exhibit H. A. Mastick, June 6, 1878, J. G. P., special examiner, which I now show you.

A. I think it was; I have no doubt of it; nearly all country letters coming into the Cleveland post-office came without a stamp and marked paid.

Q. 84. Look at exhibit referred to in the last question and state whether you paid the postage on that letter; and if you did, was it paid by postage-stamp or in money?

A. I suppose it was paid in money; if it had not been there would have been five cents to pay at the other end of the route, and that would have appeared on the envelope in connection with the postmark.

Q. 85. State whether the postmark on the exhibit last above referred

to corresponds in letters and figures and size with the postmark that was used in the Cleveland post-office at that time.

A. It does; it is the same.

Q. 86. How did that postmark differ, if at all, from the post-
387 mark which was used when the post-office was on Bank street while you was there as clerk?

A. This is the same stamp that was used there.

Q. 87. We will now go from the Water street post-office to the post-office on Bank street, and I ask you to state, if, you remember, where the stamping clerk stood or sat while postmarking letters with reference to the delivery-boxes and the stamping-table.

A. He sat on a stool, with his back to the delivery windows, and facing the wall.

Q. 88. If I understand you correctly, in your last answer, he was between the box delivery window and the table on which the stamping was done?

A. Yes; he was.

Q. 89. State whether you have ever been employed in any other post-office than the Cleveland post-office, and, if so, when, where, and in what capacity.

A. I was in the office at Wellington, O., from the winter of 1858 until the fall of 1860; then in the office at Newark, O., in the fall of 1862, and was there about one year, and was assistant postmaster in both places.

Q. 90. While in the post-office at Newark, what kind of a device was used there, if you know, for postmarking letters and canceling postage-stamps?

A. They had what is called a dating stamp, and a canceling stamp with a cork fixed into the lower end of it; these were separate when I first went there; having seen the combined stamp used in the Cleveland post-office, I tied them together there as I had the stamping to do, and a good deal of it.

Q. 91. About what time was it that you first saw the combined stamp referred to in your last answer, in use in the Cleveland post-office, and where was that post-office situated at the time?

388 A. When I came into the office in 1861, with Mr. Cowles, the postmaster, the office was situated on the public square, where it now is.

Cross-examination:

By Mr. CLARKE:

X Q. 92. During the year that you were in the Water street office your employment was that of distributing clerk in the D. P. O. room, I understand?

A. Yes, sir.

X Q. 93. When did you begin to be distributing clerk?

A. I stated yesterday, when I was in the office on Bank street; I was in the delivery in the daytime, and in the D. P. O. room at night; that was with Haskell; when postmaster Gray took the office I went to the D. P. O. room, and only went to the general delivery to spell other clerks while they were away at dinner, or at some such time as that.

X Q. 94. Who succeeded you as delivery clerk?

A. That I can't tell; he brought in a good many new clerks with him, and I can't tell who that was.

X Q. 95. Do you recollect when Mr. Nott left the office—before or after Mr. Gray was appointed?

A. I am not positive; I think it was while Mr. Haskell was postmaster.

X Q. 96. Had you left the delivery room for the D. P. O. room before Mr. Nott went away?

A. No, sir.

X Q. 97. State about how frequently you did any stamping in the Bank street office.

A. I hardly could tell that, for sometimes I would do it every day, sometimes not for a week.

X Q. 98. Mr. Wheeler was stamping clerk then, wasn't he?

389 A. Yes, I think he was; he stamped, and attended box delivery too, a part of the time.

X Q. 99. I think you refer to a regular stamping clerk on your direct examination. Who was that?

A. At that time there was not business enough in the office to keep a man busy stamping all the time; at other times, when not stamping, he worked in the delivery; I think he run one part of the delivery—a certain number of boxes.

X Q. 100. Well, whose regular duty was it to attend to what stamping there was?

A. Mr. Wheeler's.

X Q. 101. When you stamped you did it when Mr. Wheeler happened to be away?

A. Yes, or was busy at something else.

X Q. 102. For how long at a time, on an average, did you do stamping?

A. Only for a short time, when a mail had to be closed—when we had to get the stamps to close it.

X Q. 103. A few minutes at a time?

A. Yes, sir; that's all.

Redirect examination:

By Mr. NORTON.

R. D. 104. When letters came into the Cleveland post-office, on Water street, while you were there in the year 1854, to be sent away in the mails with postage paid by a postage-stamp (three cents or of other value), how or by what means was that postage-stamp canceled?

(Objected to as not a proper redirect question.)

A. By striking the date stamp on to the postage-stamp, which gave the name of the office and canceled the stamp at the same time.

390 R. D. 105. State whether the postmark would or would not, in whole or in part, be upon the printed or exposed surface of the postage-stamp?

(Same objection.)

A. Yes, it would.

H. A. MASTICK.

Sworn to before me, and subscribed in my presence, this 6th day of June, A. D. 1878.

J. G. POMERENE,
Special Examiner.

Recess until 3 o'clock p. m.

The complainant's counsel produces—

Mr. ASEM L. BASSETT, as a witness on the part and behalf of complainant, who, being by me first duly sworn, testifies as follows, to wit:

Q. 1. State your name, age, occupation, and residence.

A. My name is Asem L. Bassett; my age, forty-seven years; occupation, merchant; and residence, Cleveland, Ohio.

Q. 2. State whether you were employed in the post-office at Cleveland during the years 1857 and 1858.

(Objected to on the ground that the witness has already been examined on the same point.)

A. I was not in 1857. I was in December, 1858.

391 Q. 3. State the time you left that post-office and the time you went into business on Water street.

(Same objection.)

A. February, 1863, I left the post-office, and immediately went into the hat business the same month.

Q. 4. State whether you were employed in the post-office at Cleveland at any time while Mr. Edwin Cowles was postmaster.

A. I was.

Q. 5. State, if you remember, who was his assistant or deputy postmaster.

A. Mr. E. B. Chamberlain.

Q. 6. State, if you remember, who was postmaster here during President Buchanan's administration.

A. Benjamin Harrington.

Q. 7. State, if you know, who his assistant or deputy postmaster was during that time.

A. Mr. L. A. Kelsey.

Q. 8. State whether you were stamping-clerk during any part of that time; and, if so, what part—I mean while Mr. Harrington was postmaster here.

(Same objection.)

A. From December, 1858, until he was succeeded by Mr. Cowles.

Q. 9. State, if you remember, whether during the time named in your last answer Mr. L. A. Kelsey handed to you any order or orders purporting to be from the Postmaster-General, or from the Post-Office Department at Washington.

A. He did.

Q. 10. State, if you remember, the nature of that order, and what it was about.

(Objected to as asking for secondary evidence.)

392 A. It was to the effect that all postage-stamps should be canceled with a canceler other than the dating stamp.

Q. 11. State whether the order prohibited the use of the post-dating stamp for canceling postage-stamps and requiring the postmark to be on the letter envelope away from the postage-stamp, if you know.

(Objected to as leading.)

A. That was the intention of the order, I understood.

Q. 12. On receiving that order from Mr. L. A. Kelsey, what did you do, if anything, with reference to postmarking letters, and canceling postage-stamps upon them?

A. To economize in time I tied the dating and canceling stamps together, that one blow might comply with the order from the department.

Q. 13. And after that was done, what, if anything, did you next do with reference to the same matter?

(Objected to on the ground that the witness has once been examined on the point.)

A. Those same stamps that were tied together with a string were taken to a locksmith, and brazed or soldered together, and I used them in that manner as long as I did the stamping in that office.

Q. 14. State whether the wooden handle was taken off previous to the soldering together of the two.

(Same objection.)

A. It was taken off from the canceling stamp, and then they were soldered together and used with one handle, belonging to the dating-stamp.

393 Q. 15. When did you last see the order from the Post-Office Department which, you say, was handed to you by Mr. L. A. Kelsey while you were stamping clerk in the new post-office building?

A. I never saw it but the one time, and that was when he first showed it to me.

Q. 16. Do you know where that order is at this time?

A. I do not.

Q. 17. Do you remember the exact wording of that order?

A. I do not.

Q. 18. What you have stated about it are your recollections as to what it required, and what you did after receiving it in order to comply with it. Is that correct?

A. It is.

Cross-examination:

By Mr. CLARKE:

X Q. 19. You are the same A. L. Bassett who was examined as a witness for the complainant in this case a few days ago, are you not?

A. I am.

A. L. BASSETT.

Sworn to and subscribed before me this 6th day of June, A. D. 1878.

J. G. POMERENE,
Special Examiner.

Complainant's counsel here offers in evidence an extract from a letter dated "Post-office, Cleveland, O., Nov. 28, 1863," addressed "Hon. A. N. Zevely," and signed "C. E. Wheeler," and which has heretofore been marked for identification "Complainant's Exhibit B B (C. E.
394 Wheeler), Feb. 23, 1878, J. G. Pomerene, special examiner," and the same is here marked Complainant's Exhibit B B (C. E. Wheeler), June 6, 1878.

J. G. POMERENE,
Special Examiner.

Defendant's counsel takes the objection that the paper is not properly proved; and also to several objections that were taken at the time this paper was before offered in evidence, to wit, after cross-examination 286 was put to defendant's witness, Charles E. Wheeler.

Adjourned to June 7, at 9 o'clock a. m.

JUNE 7TH—9 a. m.

Met pursuant to adjournment.

Same counsel present as before.

Complainant's counsel offers in evidence a certified package of papers from the Patent Office of the United States, consisting, first, of a paper addressed to the Commissioner of Patents, dated Tinmouth, Vt., August 7th, 1854, signed Marcus P. Norton, and known as an additional paper to a "subjoined description for mailing and folding letters" to a "caveat," dated Oct. 20th, 1853; and consisting, second, of a paper addressed to the Commissioner of Patents, dated Troy Conference Academy, West Poultney, Vt., Oct. 13th, 1853, signed Marcus P. Norton, and

the same being a petition to the Commissioner of Patents; and also consisting. third, of a paper entitled "Subjoined description," the
395 same being the original caveat paper filed October 20th, 1853; and, further, of a paper purporting to be a certified copy of the "file wrapper" of the above named original caveat—the same being certified to by Samuel A. Duncan, Acting Commissioner of Patents, on the 18th day of January, A. D. 1871, and under the seal of the United States Patent Office; and the same is here marked and filed Complainant's Exhibit U. S. Patent Office, June 7, 1878, J. G. Pomerene, special examiner.

Defendant's counsel takes the same objections to the admission in evidence of each of the papers contained in this package as have already been taken to the same when heretofore offered in evidence.

Complainant's counsel also offers in evidence an original affidavit, signed J. D. Green, and dated the 11th day of September, A. D. 1871, and purporting to have been subscribed and sworn to by him on that day before Chas. Cons. Callan, a notary public in and for the District of Columbia, having the seal of said notary, and the same being attached to the package of papers last above named by red tape, under the notary seal of said notary public; and the same is here marked Complainant's Exhibit J. D. Green, Norton's Caveat, June 7, 1878, J. G. Pomerene, special examiner.

(Objected to, first, that it is not properly proved; second, as irrelevant and immaterial; third, because, if the facts contained in the alleged affidavit are of any materiality, they should be proved by a witness sworn in this case and subjected to a cross-examination.)

396 Complainant's counsel recalls—

HENRY A. MASTICK, a witness heretofore called and examined for and on behalf of complainant in this cause, who, having been heretofore duly sworn by me, further testifies as follows:

Q. 1. Look at an envelope which I now hand you, and state if you have ever seen that before to-day; and, if so, state all you remember about it as to the time when it was postmarked, and what postmark it bears.

A. It is addressed to Miss Angie C. Moull, Newark, Ohio, and postmarked Marion, Ind. The letter inside, which came in this envelope, is dated March 29th, 1854, and the postmark is dated March 31st, 1854.

(Complainant's counsel offers the same in evidence, and the same is marked Complainant's Exhibit Letter Envelope Number 1, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 2. I hand you another envelope, and to it I apply question No. 1, and request you to answer.

A. It is addressed to Angie C. Moull, Newark, Ohio, postmarked Columbia City, Ind., August 30th; and the letter inside is dated the 23d of August, 1854.

(Complainant's counsel offers the same in evidence, and is marked Complainant's Exhibit Letter Envelope Number 2, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 3. I now hand you another letter-envelope, and to it I apply the same question as to the last two exhibits, and ask you to answer.

397 A. It is addressed to Col. B. Mastick, Rockport, Ohio, postmarked San Francisco, Cal., May 21st. The letter contained in it is dated May 12th, 1856.

(Complainant's counsel offers the same in evidence, and the same is marked Complainant's Exhibit Letter Envelope Number 3, June 7, 1878, J. G. Pomerene, special examiner.

Q. 4. I hand you also another letter-envelope, and apply the same question to it as I have to all others about which you have been examined today, and request you to answer.

A. Yes, sir. It is addressed to Col. Benjamin Mastick, Rockport, Cuyahoga County, Ohio, postmarked Girard, Pa., dated August 25th. The letter enclosed in the envelope is dated August 24th, 1856.

(And complainant's counsel offers the same in evidence, and the same is marked Complainant's Exhibit Letter Envelope Number 4, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 3. I hand you another letter-envelope, and to it I apply the same question as last above, and ask you to answer.

A. Yes, sir. One addressed to Henry A. Mastick, Newark, Licking Co., Ohio, postmarked St. Charles, Mo.; I can't tell the date. The letter inside is dated December 4th, 1856.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit Letter Envelope Number 5, June 7, 1878, J. G. Pomerene, special examiner.)

398 Q. 6. I hand you another envelope and apply the same question as to the above numbered envelopes, and ask you to make answer to it.

A. Yes, sir; one addressed to Col. Benj. Mastick, Rockport, Cuyahoga Co., Ohio, postmarked San Francisco, Cal., dated January 5th; the letter enclosed in the envelope is dated January 4th, 1857.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit Letter Envelope Number 6, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 7. I now hand you another envelope, and to it apply the same question as last above, and desire you to answer it.

A. Yes, sir; one addressed to Mrs. H. A. Mastick, Newark, Licking County, Ohio, postmarked Chicago, Ill., February 19th, 1857.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit Letter Envelope Number 7, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 8. I now hand you another letter-envelope and apply to it the same question as last above, and request your answer.

A. Yes, sir; one addressed Miss Angie C. Moull, Newark, Ohio, postmarked Muncie Town, Ind., dated April 26th; the letter enclosed is dated April 25th, 1855.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit Letter Envelope Number 8, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 9. I now hand you another letter-envelope, and to it I apply the same question as the last one, and ask you to answer it.

399 A. Yes, sir; one addressed Mrs. H. A. Mastick, Rockport, Cuyahoga County, Ohio, postmarked Chicago, Ill., Aug. 11th; the letter enclosed is dated Aug. 10th, 1855.

(Complainant's counsel offers the same in evidence, and it is marked Complainant's Exhibit Letter Envelope Number 9, June 7, 1878, J. G. Pomerene, special examiner.)

Q. 10. I now hand you another letter-envelope, and to it apply the same question, and ask you to answer with reference to it.

A. Yes, sir; one addressed to Benjamin Mastick, Rockport, Cuyahoga County, Ohio, postmarked New York, June 9, 1858; the letter enclosed is dated June 8, 1858.

(Complainant's counsel offers the same in evidence, and it is marked

Complainant's Exhibit Letter Envelope Number 10, June 7, 1878, J. G. Pomerene, special examiner.

Defendant's counsel objects to each of complainant's exhibits, the letter-envelopes above offered, as being irrelevant and immaterial.)

Q. 11. The several letter-envelopes heretofore introduced as exhibits, from No. 1 to No. 10 inclusive, have been where, since the dates you have stated until the present time, if you know?

A. All of them have been in the house where I now reside; a part of them did not come into my possession until about five years ago, when I became executor of my father's estate.

Q. 12. You may state, if you know, whether you have other letter-envelopes having postmarks of various places and of various dates between 1851 and the present time.

400 A. I have.

(Same objection to both question and answer.)

Q. 13. About how many have you, if you remember? I do not mean to inquire of you the exact number, but ask you to approximate as to quantity.

A. I have quite a number.

Q. 14. State whether it has been your habit and the habit of your family to retain letters for a number of years.

A. Yes, sir.

Q. 15. You may state, if you remember, about how much stamping Charles E. Wheeler did while the post-office was on Bank street in this city.

A. I think he did the most of it until Capt. David L. Wood came in the office, then I think he did the largest share of it; I mean David L. Wood.

Q. 16. Did you, on any occasion in that office, or in any other post office in this city, ever see C. E. Wheeler use, in the postmarking of letters, an instrument to postmark the letter envelope near the postage-stamp, and at the same time cancel the postage-stamp by a separate device constructed for that purpose, and so combined with the postmarking device as to be operated by one handle, and to give both impressions by the same downward blow of such combined instrument?

(Objected to, because it should have been asked on Mr. Mastick's former direct examination.)

A. Never, to my remembrance.

Q. 17. Had you seen him doing such business would you be apt to remember it?

(Same objection.)

A. I think I should.

401 Q. 18. When, if at all, did you first learn that Mr. Charles E. Wheeler claimed to be the inventor of the invention mentioned in question 16 of this examination?

(Same objection.)

A. I can't fix the exact date, but think it was about two months ago, while he was riding with me from the west side of the Cuyahoga River to the east side; he rode with me a short distance at that time.

Q. 19. You have known Mr. Wheeler for a good many years, have you not?

A. Yes, sir; I have known him since about 1852.

Q. 20. When, for the first time, if at all, did you see in use in the Cleveland post-office an instrument of the kind mentioned in question 16 of this examination?

A. When I was employed under Mr. Cowles, in 1861, in the Cleveland post-office.

Q. 21. State whether Mr. Wheeler was employed in that post-office at that time.

(Same objection.)

A. I can't remember positively about that.

H. A. MASTICK.

Sworn to and subscribed before me this 7th day of June, 1878.

J. G. POMERENE,
Special Examiner.

Complainant's counsel here offers in evidence three envelopes postmarked Cincinnati, June 5th, each having the postage-stamp thereon canceled, one containing figure 2, one containing figure 7, and
402 the other figure 8, with other devices upon the postage-stamp, for the purpose of illustrating to the court the manner in which postmarking and postage-stamp canceling is done by the device or invention described in the bill in this suit, and the same are here marked Complainant's Exhibit Letter Envelope No. 11, No. 12, No. 13, July 7, 1878, J. G. Pomerene, special examiner.

The special examiner states that the three envelopes above were received the 6th or 7th day of June, A. D. 1878.

On motion of complainant's counsel, these proceedings are adjourned sine die.

J. G. POMERENE,
Special Examiner.

I, J. G. Pomerene, special examiner, do hereby certify that the above-named A. L. Bassett, James McGough, Henry C. Cooke, and H. A. Mastick were by me first severally sworn to testify the truth, the whole truth, and nothing but the truth, and that the depositions by them respectively subscribed, as above set forth, were reduced to writing by myself in part, and in part by H. W. Bill, who is not interested in the suit, in the presence of the witnesses, respectively, and were subscribed by said witnesses in my presence, and were taken at my office, at Cleveland, O., on the 29th day of May, 1878, and following days; that I am not counsel, attorney, or relative of either party, or otherwise interested in the event of this suit.

J. G. POMERENE,
Special Examiner.

403 United States circuit court, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust,
vs.
THOMAS L. JAMES, UNITED STATES POSTmaster, New York.

Testimony taken on the part of the complainant, in rebuttal, under and pursuant to the 67th rule of the Supreme Court of the United States, as amended, before John A. Shields, esq., standing examiner of said court.

NEW YORK, *June 17th*, 1878—10 o'clock a. m.

Present, Marcus P. Norton, esq., of counsel for complainant, and Samuel B. Clarke, esq., of counsel for defendant.

JAMES R. HASKELL, a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

404 A. James R. Haskell; I am 52 years of age; I reside at Passaic, New Jersey, and I am in the army cannon business, and an inventor also.

Q. 2. Were you ever employed at the post-office in Cleveland, Ohio, and if you were, state the time as near as you remember it?

A. I was employed there; I went into the office in the spring of 1849—I forget the exact date—and I remained there until April, 1853.

Q. 3. State who was postmaster at the time you were employed at the Cleveland, Ohio, post-office; state what your official position was, if any, and also your duties while you were employed in that post-office.

A. Daniel M. Haskell was postmaster, my brother; I was assistant postmaster at that place; I had general charge of the post-office, the usual duties of an assistant postmaster; in the absence of the postmaster I was acting postmaster; I had charge of the money and giving receipts and taking receipts, paying government drafts when he wasn't there. When I first went into the post-office—it was not a distributing post-office—I worked in all departments and learned the duties of the office and worked in all the other departments until I understood it all; and after the office was made a distributing office I took particular charge of the distribution in making up the mails, with five or six assistants; at the same time I had general charge of the office, and was in the delivery and various departments to see that things were properly done. In regard to the time I staid there, I think it was in April when I turned over the office to Mr. Gray, my brother's successor, whatever date that might be.

Q. 4. State whether, during the time you were in the post-office at Cleveland, Ohio, you postmarked any letters or canceled any postage-stamps for transmission in the United States mails.

A. Yes; I did myself.

405 Q. 5. Where was the post-office in Cleveland located when your brother was postmaster there; I mean what street or streets?

A. It was in Johnson building, in Superior street, and afterwards was removed to the Herald building, on Bank street.

Q. 6. Do you recollect the construction of the post-office on Bank street; I mean the room or rooms where the business of that office was conducted?

A. I do.

Q. 7. Have you recently prepared a ground or floor plan of that office?

A. I have.

Q. 8. Have you it with you; and if you have, will you produce it, to be used in evidence here?

A. I have it with me, and will and do produce it as a part of my answer.

(Witness here produces the plan, which is marked Complainant's Exhibit No. 1, Haskell—J. A. S., ex'r, June 17th, 1878.)

Q. 9. I now show you the exhibit referred to in the last question and answer, and ask you to state the different rooms, the purposes for which they were used, the construction of the partitions for delivery of mail matter to the public, the location of the stamping table where letters were postmarked, and also to state whether there were one or more D. P. O. rooms, their location, and the use of the same.

A. As you come into the post-office from Bank street you come into

the vestibule or corridor for the general public for mailing and receiving letters; the general alphabet delivery is immediately in front of the main entrance, with a semicircular railing in front; to the left of this is the ladies' window, separated from the general delivery by a short partition; and the left-hand front corner in entering the building was a news depot; the boxes fronted northerly, at right angles to the
406 street, with drawers underneath the boxes; the boxes had two delivery windows; passing down by the boxes, the office was entered by a door near the left-hand corner of the corridor; this door entered into a small office, where my desk stood; passing through a railing into the room in rear of the boxes in general delivery, in the south side of this room was a long, narrow table where the letters and papers were stamped; the alphabet or general delivery case was V-shaped, and faced westward toward the front of the building; the boxes and drawers were on the north side of this room, opposite the stamping table; there was an iron column standing, for supporting the floor overhead, between the boxes and the stamping table; a door from the east end of this room led into the distributing room, where the mails were opened and the matter distributed, and mail bags put up for going out; on the east side of this room were stairs leading to the letter distribution room on the second floor, where all the letters were distributed and made up preparatory to sending out in the mail bags.

Q. 10. Please state the size of the openings through which mail matter was delivered to the public, and the number of such openings, and the height of each from the floor. I mean the delivery windows when I call your attention to openings for delivery of mail matter.

A. They were about a foot wide, and I suppose about eighteen or twenty inches high; they may have been two feet high; they were closed by double doors, wooden frame with glass; there were four such openings; I should judge they were about three and a half feet from the floor; they may have been four feet; I can't tell exactly.

Q. 11. Please state, if you know, the custom in that office at that time with reference to those windows while the mails were being distributed for delivery to the public in that city.

407 A. I do; the windows were closed; there was a paper curtain on the back of them to prevent people looking through; we had a card or paper printed on, "closed," "distributing mail," and stating what mail we were distributing, so that the public would know what mail we were distributing.

Q. 12. State, if you know, the general custom of the people of that city at that time with reference to the getting of their mails during the day or evening—I mean as to the time, whether it was immediately upon the final distribution of the letters, or some time after.

(Objected to as immaterial.)

A. Business men wanted to get their letters as soon as they were distributed, consequently, when a large mail was being opened, a great many people accumulated there, waiting for their letters.

Q. 13. State from your knowledge of the business transactions at that office at that time, as to whether those windows were shut during the opening and distributing of the local mail matter, and as to whether they were kept closed at all times excepting during the actual delivery of mail matter to the public.

A. They were closed during the opening of the mails and the distribution of letters, and were opened the balance of the time during the office hours.

Q. 14. From your knowledge and experience in that office at that time, was it ever necessary, or did you ever know of an instance, of a man, woman, or child coming to that office for mail matter being obliged to wait standing around in the lobby for any considerable length of time, and then to put his or her head into either of those box delivery windows and still wait for letters or other mail matter to be found for them, or delivered to them?

(The same objection.)

408 A. After a mail had opened, and the office had been closed for some time, and the crowd had accumulated, parties had to wait to get their turn at the box windows; when they got there all they had to do was to give the number of the box and get its contents, and pass on for the next.

Q. 15. How would it be in the single case of one person calling for the contents of the box by giving its number?

(The same objection.)

A. The delivery clerk would have nothing to do but hear the number of the box and give out the letters or papers in that box.

Q. 16. About how much time would be required by a delivery clerk to perform the service alluded to in the last answer—I mean in an individual case—in a single person calling for a mail with no other persons present?

(The same objection.)

A. A few seconds; the windows were about five feet apart, long enough to step from the window to the box and hand the delivery out.

Q. 17. You have stated substantially that the box-delivery windows were about one foot wide each, and about two feet high; will you please state, if you remember, the thickness of that wall or partition through which these box windows were made?

A. That partition was made by the nest of boxes themselves, in front of which was a sash containing glass; that was the partition; the boxes were, I suppose, about 8 or 9 inches deep and the sash about an inch thick; in all, that would be 9 or 10 inches.

409 Q. 18. State, if you remember, the size and height and location of the table where letters were postmarked.

A. It was the usual height of a table set down as this is, which is about 30 inches high; I think it was about 3 feet wide and about 8 feet long, as near as I can recollect; it stood on the south side of the room, against the wall.

Q. 19. In your opinion, could a person standing in the lobby outside, and looking through either of those box-delivery windows, see and know the kind of postmarking of letters or of the cancellation of postage stamps thereon, if there were any such stamps at that time?

(The same objection.)

A. No; I don't think he could.

Q. 20. If you remember, will you state whether letters were postmarked in that office at that time during the distribution and delivery of mail matter to the public, or just before the preparation of mail matter to go out in mail bags.

A. Letters were not postmarked during the distribution of mail matter for delivery, as the force was busily engaged at that time in distributing the mail for delivery; neither were they postmarked when there was a crowd waiting for their mail, but during the slack times of the day, when few parties called for mail matter, the delivery clerks would take the letters out of the letter-boxes and postmark them.

Q. 21. How many such delivery clerks were then employed in that post-office, if you remember?

A. Well, sometimes there were two; one in the general delivery and one in the boxes; sometimes there were two in the boxes; and sometimes, when we were very busy, the postmaster and myself also assisted.

410 Q. 22. Did that office during that time have any particular person designated whose duty it was to postmark letters?

A. The box delivery clerks did the principal part of it; sometimes I did some of it and sometimes the porter did and the general box delivery clerks.

Q. 23. Was the stamping table so situated in that office that you frequently saw it during the time you were assistant postmaster there?

A. It was; I saw it frequently every day.

Q. 24. And did you so see it as to enable you to know what sort of instruments were being used there during your term as assistant postmaster for the postmarking of letters and other mail matter?

A. I did.

Q. 25. Look at the thirteen instruments (Defendant's Exhibits) now on the table before you and which I show you, and from that number, if you can, show to the examiner and designate by the card attached thereto an instrument for the postmarking of letters in that office during the time you were there as assistant postmaster.

A. The witness produces Defendant's Exhibit No. 4, and states that this is similar to the stamp that we used at that time; that the "Cleveland, Ohio," was embraced within a circle, the date being in the centre in movable type, secured by a set screw; the stamp was larger than this.

Q. 26. I now hand you three several letter-envelopes postmarked at Cleveland, Ohio; I ask you to look at them and then state whether the postmarks on those envelopes correspond with the acting face of the postmarking instrument referred to in the last question and answer.

A. Yes, they do; it is the same stamp we used there.

(Complainant's counsel asks the examiner to mark, for identification only, the several letter-envelopes referred to in the last question
411 and answer "Complainant's Exhibits Nos. 2, 3, and 4, Haskell—J. A. S., ex'r," and they are so marked and put in, June 17, 1878.)

Q. 27. I now show you Defendant's Exhibit No. 137, Wheeler—J. J. P., ex'r, February 19, 1878;" take it, examine it, and then state whether while you were assistant postmaster at Cleveland, Ohio, any instrument of that kind or substantially like that was ever to your knowledge used in the Cleveland post-office while your brother, D. M. Haskell, was postmaster there, and while the post-office was located on Bank street?

A. I never saw anything of this kind used there; we had a date stamp and a canceling stamp furnished us separately, which we used; we never had them attached in this way to my knowledge.

Q. 28. Did you ever hear, or in any way or manner know, of any instrument of this kind as represented by said exhibit, ever having been used in the Cleveland post-office by anybody during the term you were assistant postmaster at that office?

A. I never knew of any such being used; I never heard of any.

Q. 29. Had there been any such instrument used there during that time, would you have been likely to have known of it?

A. I would, as I frequently used the stamps myself.

(Question and answer objected to on the ground that the opinion of the witness is immaterial.)

Q. 30. I now show you Defendant's Exhibit No. 138, Wheeler—J. J. P., ex'r, February 19, 1878;" take it and examine it, and then state whether while your brother, D. M. Haskell, was postmaster and while you were assistant postmaster at the Cleveland post-office in the
412 State of Ohio, any instrument like or substantially like that was ever used by anybody in that post-office, and during that time and within your knowledge?

A. No; there never was any instrument with this double attachment used in that office; I never saw such a stamp until Saturday last.

Q. 31. Had there been an instrument of the character represented by the said exhibit used in that post-office during the time stated in the last question, would or would you not have been apt to have known of it?

(The same objection.)

A. I should certainly have known it had such a stamp been used there, unless it should have been brought in privately, secretly, when I was not there, and taken away again.

Q. 32. Had there been an instrument or instruments like, or substantially like, those represented by Defendant's Exhibits Nos. 137 and 138 (Wheeler), mentioned in the last previous questions, lying upon the stamping table in that post-office for the purpose of use, while you were assistant postmaster there, would or would you not have seen them. or either of them?

(The same objection.)

A. I should certainly have seen them, for I have a great curiosity for new contrivances or inventions.

Q. 33. You have stated something about a separate instrument for canceling postage-stamps in the Cleveland post-office while you were assistant postmaster there; describe, as near as you can, the construction of that instrument and its use either on letters or newspapers?

A. The stamps that we used were furnished by the Post-Office
413 Department; the one for canceling postage-stamps was a round stamp having a ring on the face and cross bars for its acting surface; this was used on newspapers and letters to a certain extent until we changed the practice.

Q. 34. State the change of practice referred to in your last answer, if you remember it?

A. When the business increased, we canceled the postage-stamps by stamping the Cleveland, Ohio, and date stamp over the postage-stamp.

Q. 35. And in doing that what kind of an instrument did you use for that purpose?

A. One like Defendant's Exhibit No. 4, only larger in diameter, as I previously stated, and contained the words "Cleveland, O," and the date on its acting surface.

Q. 36. What became of the separate canceling device after you began to postmark and cancel postage-stamps in the manner described in your last answer?

A. Oh, it remained on the table, and was used for newspapers and periodicals; the clerks were at liberty to use it for letters if they chose, but it saved work to use the post-dating stamp for canceling postage-stamps; the canceler was there, and they could use it if they chose.

Q. 37. When you used the postmarking or postdating stamp for canceling the postage-stamp, how was the impression with reference to the envelope and the postage-stamp?

A. In position, it was part on the postage-stamp and part on the envelope.

Q. 38. If you remember, you may state whether during the time you were assistant postmaster at Cleveland, Ohio, it was customary to prepay postage on letters by postage-stamps or in money, at the option of the person sending a letter or other mail matter?

A. The last part of the time that I was there the postage was reduced; if it was prepaid, either by stamps or money, it was three cents a
414 single rate for domestic letters, and five cents a single rate if not prepaid by stamp or money; the Canada and foreign rates were different—higher rates.

Q. 39. If you know, you may state the manner of preparing letters, after they were postmarked, for transportation in the mails, during the time you were assistant postmaster in Cleveland, Ohio.

(Objected to as immaterial.)

A. They were distributed in pigeon-holes for the different places of destination, and a post-bill made out for which the Post-Office Department furnished blanks; on this post-bill the number of letters, the rates of postage, whether unpaid or paid, distributed or paid in Cleveland, by stamps or in money, with the amounts added up and the number of free letters; the package of letters with this post-bill were then wrapped up in wrapping paper, and directed to the place of destination; if the packet was large it was tied up with twine. I have in my hand a printed form of post-bill, such as we used, and I give it as a part of my answer, and ask the examiner to mark it "Complainant's Exhibit No. 5, Haskell."

(The examiner, at the request of the witness, marks and files the same as requested in the answer. J. A. S., examiner.)

Q. 40. You may state whether, during your administration as assistant postmaster at Cleveland, Ohio, and while that office was situated on Bank street in that city, there was employed in that post-office a person by the name of Beardsley?

A. Not to my recollection. I don't think there was; to the best of my recollection there was no such person there; I am quite positive there was no such person there.

415 Q. 41. State whether, during the time you were assistant postmaster at Cleveland, Ohio, and while the post-office was situated on Bank street in that city, there was employed in that post-office a person by the name of Nott?

A. There was not.

Q. 42. Did you ever have any personal acquaintance with a person named Eri S. Beardsley, or Chancey Clifford Nott, said to reside at Cleveland, Ohio?

A. No; I never knew or heard of any such men, as I remember.

Q. 43. Who, if anybody, was cashier at the Cleveland post-office, during the time your brother was postmaster, while the post-office was situated on Bank street in that city?

A. The postmaster, or myself, either one of us, was the only cashier.

Q. 44. Whenever bills were presented against the post-office at Cleveland, were any bills presented to the cashier and by him referred to the head of the department to which the work was done, for any purpose whatever?

A. There was nobody at the head of the department there except myself and the postmaster; we had no separate departments with heads.

Q. 45. You may state whether you ever paid any bill to Jacob Schwartzenberg, for work done upon a post-office stamp of any kind or

description whatever, while you were assistant postmaster at Cleveland, Ohio?

A. No; none that I can recollect; I am positive that I never did anything of the kind; the only thing that I recollect was, that we sometimes got a wood engraver to cut "rate" stamp on wood, but he was not Schwartzenberg.

Q. 46. You may state if you recollect the various kinds of post stamps used in the Cleveland post-office while you were assistant postmaster there?

416 A. Yes; the post and date stamp containing the name of the post-office and the date, the several rating stamps 3, 5, 10, 15, 20, and 24 and 48, and such others as were necessary, and then a stamp with the word "paid" on it, and a canceling stamp for canceling postage-stamps, and a stamp for free letters.

Q. 47. While you were assistant postmaster at Cleveland, Ohio, was there a person employed in that office by the name of Henry S. Bishop?

A. Not to my recollection.

Q. 48. Had there been such a person upon pay-rolls of that office would you not have been apt to have seen it while you were assistant postmaster there?

A. I would; because I made up all the quarterly returns while I was in the office; and all receipts from employees for their salaries, and all money expended for repairs, or anything purchased for the office, was put into those accounts, such as repairs of mail-bags, etc.; all these receipts were sent on to the Post-Office Department; these receipts were for clerk hire, etc.

Q. 49. Who succeeded your brother as postmaster, if you remember, at Cleveland, Ohio?

A. J. W. Gray.

Q. 50. About what time was that?

A. That was, I think, in the month of April, 1853.

Q. 51. Who, if anybody, if you know, turned over to Mr. Gray, as postmaster, the books, papers, and the property of that post-office?

A. I did it; my brother was away at New York at that time; he left me to close up the business and turn it over.

Cross-examined:

By SAMUEL B. CLARKE, Esq., of counsel for defendant:

X Q. 52. What was done with the receipts which the clerks gave for their salary?

417 A. They were sent to the Post-Office Department in quarterly returns.

X Q. 53. Can you give the names now of all persons who were employed in the Cleveland post-office while your brother was postmaster?

A. I think I can.

X Q. 54. Who were delivery clerks from the month of April, 1851, to the month of April, 1852?

A. There was Mr. Charles E. Wheeler and Duncan B. Beeby for the regular delivery clerks at the boxes; there were several in the general delivery; Mr. Hepburn was there, but he didn't answer the purpose; he was discharged; he was afterwards mail-agent; Mr. T. G. Turner, Myles L. Rose; I used to go in there myself sometimes, and my brother while he was postmaster; sometimes Mr. Beeby would go in the general delivery.

X Q. 55. Who were delivery clerks from April, 1852, to April, 1853?

A. The same, except Mr. Hepburn and Mr. Rose; I don't remember

whether Mr. Turner remained there at that time or not, but I think he did; but I won't be positive about that; Mr. Beeby was a part of the time in the delivery box and part of the time in the distributing department during that year.

X Q. 56. Give the names, and a distinct answer, of all the delivery clerks during April, 1852, to April, 1853, or any part of that year.

A. Mr. Wheeler and Mr. Beeby, which names I have given before; the others I don't recollect for a particular period of time.

X Q. 57. Give the names of the delivery clerks from April, 1849, to April, 1851.

A. Charles E. Wheeler and W. F. Reeve; Mr. Reeve was in the general delivery, and Mr. Wheeler was in the boxes; I was there a part of the time also.

X Q. 58. Have you now given the names of all the persons who were delivery clerks while your brother was postmaster?

418 No; not all of them.

X Q. 59. Give all the rest, and the dates.

A. Well, I can't give the dates—not exactly; there was Mastick—two brothers; one was Henry, I think, and the other, I have forgotten his initials; they both were in the delivery part of the time.

X Q. 60. Was either of them in the delivery from April, 1852, to April, 1853?

A. I don't think they were; I think they left before that time; the younger may have been; I forget—I haven't thought of it in twenty-five years.

X Q. 61. You are sure you have not forgotten the name of any of the delivery clerks, are you?

A. I am not positively sure that I have stated all of them; I don't recollect at this moment.

X Q. 62. How many clerks were there from April, 1852, to April, 1853, whose regular post of duty was in the delivery room?

A. We had one in the box delivery, and one in the general delivery, with assistance when required.

X Q. 63. Did nobody have his regular post of duty in that room, except those two delivery clerks?

A. No, not all the time.

X Q. 64. While your brother was postmaster, were you away from the office at all?

A. Yes, a short time.

X Q. 65. How long?

A. Well, I came to New York on a trip, I think it was in 1851, for two weeks, the first time I had seen the city; I was away for a couple of days at a time on two or three occasions; I went out in the country; and I was sick once for two or three weeks; I believe that comprises all; any other time that I was away didn't run over two or three days; it was pretty hard work when I was there; it was pretty steady.

X Q. 66. Mr. Harry or Henry Mastick has been examined by
419 Mr. Norton for the complainant in this case, and, if I recollect aright, he stated that one C. Clifford Nott was a box delivery clerk in the Cleveland post office during the last part of the year 1852, while he, Mastick, was the general delivery clerk; have you any reason to suppose that Mr. Mastick didn't state the truth about that?

A. I have no recollection of such a person as C. Clifford Nott; I never saw the man in my life; Mr. Mastick was a clerk there, as I stated before; Henry Mastick remained there longer than his brother did.

X Q. 67. Did you have any other brother employed in the post-office besides the postmaster?

A. Yes, sir; my brother G. H. Haskell, was employed in the distributing department during the latter part of the term.

X Q. 68. Where is G. H. Haskell now?

A. He is in Cleveland, Ohio.

X Q. 69. What was the shape of the rating stamps which you have mentioned?

A. It was the same shape as Defendant's Exhibit No. 4, only it was smaller, with a figure on, whatever figure was used, without a border.

X Q. 70. What material were they?

A. Wood, generally.

X Q. 71. Was there any metal about them?

A. I think some of them that were sent on by the Post-Office Department had metal on at the lower end.

X Q. 72. You mean a metal cylinder, such as appears in Defendant's Exhibit No. 4?

A. I don't necessarily mean a cylinder, but a metal end with a figure engraved; it may have been a cylinder, a square, or any other shape.

X Q. 73. Did those stamps which had the letters engraved in wood have any metal about them?

A. No; not unless they might have had a ferrule put on.

X Q. 74. What was the ferrule for?

A. I didn't positively say that the ferrule was put on; I say
420 they might have had one put on; if so, it was to make a border, or to prevent it splitting.

X Q. 75. Do you recollect whether any of the various sorts of stamps used in the Bank street post-office, or in the Superior street post-office, had such a metal ferrule?

A. I don't.

X Q. 76. What is your best recollection about that?

A. I have no recollection about that.

X Q. 77. Give the size, shape, and material of the several cancelers that you have spoken of.

A. They were round, about five-eighths of an inch, I should think, in diameter, the face being a ring, with parallel bars crossed; they were like Defendant's Exhibit 4, but not so large in diameter; the same general shape, I mean by that; they were made with a wooden handle and a metal face, similar to Exhibit 4, only smaller in diameter, as I said before; and I think we had some made of wood; I am not so positive of that, but I think so.

X Q. 78. Were these cancelers, and those wooden rating stamps, which you have described, used when your brother first became postmaster?

A. They were; the rate of postage was sometimes changed by law, and then the rating stamps were changed to correspond.

Redirect:

By Mr. NORTON:

R. D. 79. Was there any rule prevailing during the time you were assistant postmaster at Cleveland requiring the postage stamp to be canceled by any other instrument than the postmarker?

(Objected to as not a proper redirect question.)

421 A. Not that I am aware of; there may have been some rule given out when the stamps were first sent out; it was the general custom in the post-office to cancel the stamp with the postmarking

stamp; I mean by that, not only in our office, but at other post-offices.

R. D. 80. During the time you were assistant postmaster at Cleveland, about what proportion of postage on letters was prepaid by postage stamps, if you recollect?

(The same objection.)

A. Up to the time that the law was changed reducing the postage to three cents on prepaid matter, I think the great proportion of letters were mailed without prepayment; after that time the great majority of the letters were prepaid, some in money, some by postage stamps; I think more by stamps than in money; the proportion I couldn't tell.

R. D. 81. On letters having no postage paid, how many times was it necessary to handle over letters to get them ready for the post-bills?

A. We had to put the post and date stamp on, and then the rate stamp, and that requires two separate operations of stamping; one to postmark and the other to give the rate of postage.

R. D. 82. In giving the names of certain employees in the Cleveland post-office at Cleveland, as stated in your cross-examination, did you give them in the order of their employment, or merely as you remembered them at the present time?

A. I gave them as their names occurred to me at this time.

R. D. 83. If it should appear that Mr. Nott was employed in that post-office while you were assistant postmaster there, would it be for a long or a short period?

A. It would be for a short period, and that would be the reason that I would not recollect it.

422 R. D. 84. If a man were employed in that office while you were there, and it appeared from his labor that he was unsuitable for the business, what did you do with him in reference to that employment?

(The same objection; also as being irrelevant.)

A. We discharged him; that was the case with Mr. Hepburn, and Mr. Rose, and several others.

Adjourned to Tuesday, June 18th, 1878, at 10 o'clock a. m.

NEW YORK, *Tuesday, June* 18, 1878—10 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Redirect examination of the witness JAMES R. HASKELL resumed by MARCUS P. NORTON, Esq., counsel for complainant:

R. D. 85. State, if you remember, whether Mr. Henry Mastick was in the post-office at Cleveland, as a clerk, when you turned the post-office and its property over to Mr. Gray, as immediate successor to your brother, as postmaster?

A. Yes; he was.

R. D. 86. You have stated that you do not think that C. Clifford Nott was employed in the post-office while you were deputy postmaster there; if you have any reasons or circumstances why you think he was not, you may state them.

A. I don't remember any person by the name of C. Clifford Nott; I remember parties by the name of Nott were block and spar makers;

423 I don't remember their ever being connected with the post-office while I was there; a person would be of no use in the box department for a short time; my impression is he was a Democrat, and for that reason we would not employ him.

R. D. 87. Counsel for the defendant, in cross-question 66, among other things, asked you the following: "Have you any reason to suppose that Mr. Mastick did not state the truth about that," and in your answer you made no reply to that part of his question; you may state whether you were at that time sufficiently well acquainted with Mr. Mastick as to enable you now to answer that part of the question I have before stated.

A. Yes; I was very well acquainted with Mr. Henry Mastick; he was in the post-office at Cleveland two or three years while I was there, and his brother Seabury was also in the post-office; he was a man of excellent character, truthful and honorable, and of good family; I knew them all well.

(The latter part of the answer objected to as not responsive.)

R. D. 88. Defendant's counsel in cross-question 68 inquires of you as to the present residence of your brother G. H. Haskell; you stated his residence to be Cleveland, Ohio; for the express benefit of defendant's counsel I ask you to state the street and the number thereof, if you know that residence.

A. I have it at home; he did live at 161 Prospect street; he had a house in another part of the city, which I forget, but I have it in a letter at home.

R. D. 89. When you correspond with him, how do you address your letters to him?

A. Sometimes I addressed them simply to G. H. Haskell, Cleveland, Ohio; if I was at home I could get the street address from my wife.

424 R. D. 90. In giving the names to the defendant's counsel, on your cross-examination, of clerks employed in the Cleveland post-office while you were assistant postmaster, did you pretend to give the names of each and every person employed there as a clerk during that time?

A. No; the question asked was who were the delivery clerks, simply.

R. D. 91. You may state, if you remember, whether, during the time you were assistant postmaster at Cleveland, there was any order issued by the Postmaster-General, or any other officer of the Post-Office Department, and received at the post-office at Cleveland, in substance requiring the postmark to be upon the letter envelope by the postmarking device, and that the postage stamp should thereafter be canceled by a separate and distinct instrument.

(Objected to as not a proper redirect question, and as having been asked on this redirect.)

A. There was no such order received there during that time.

R. D. 92. Was there a person employed in or about that post-office during that time by the name of James McGough?

(Objected to as not a proper redirect question.)

A. There was.

R. D. 93. If you remember, state whether he was in that post-office at the close of your brother's term as postmaster.

(The same objection.)

A. I think he was.

R. D. 94. The examiner having just read to you your entire evidence, you stated when he read you the answer to cross-question 60, that

425 you desired to correct that answer; you now have the opportunity to make such corrections you please with reference to that question.

A. Henry Mastick, the younger brother, remained in the office during

that time; Seabury Mastick, the older brother, I think, left the office before that time.

JAMES R. HASKELL.

Subscribed and sworn to before me this June 18, 1878.

JOHN A. SHIELDS,
Examiner, etc.

DAVID L. WOOD, a witness produced on the part of the complainant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. David L. Wood; I am sixty years of age; I reside at East New York, Long Island, and I have no special occupation just now.

Q. 2. State whether you ever resided in the city of Cleveland, Ohio; and, if you answer yea, give the time as near as you remember it.

A. I have resided in Cleveland, Ohio; my first residence commenced there the 16th day of September, 1839; I resided there from that time until about two years ago, except a temporary absence in an official ca-capacty.

Q. 3. Please state whether, while you resided at the city of Cleveland, Ohio, you held official place in civil or military positions; and if you did, name those, and give the time as near as you remember the same.

A. I held both civil and military positions during that time; the first civil position that I held was in 1846, and was a member of the common council of the city of Cleveland, as councilman for the sec-
426 ond ward; the next civil position that I held was that of city marshal, which was for two years, in the years 1855 and 1856; the next civil position that I held was that of justice of the peace, which was for three years, which was from the 8th day of April, 1870; the next civil position that I held was that of deputy United States marshal for the northern district of Ohio, which I held from the 22d day of August, 1873, until three years ago; the first military position I held was that of a captain of a volunteer artillery company, which was from about 1840 to 1855, and during which time I held several staff offices; in 1857 I was appointed engineer-in-chief on the staff of S. P. Chase, governor of Ohio; on the 17th day of January, 1859, I was appointed quartermaster-general of the State of Ohio, which office I held until the 16th day of November, 1861; on the 12th day of May, 1861, I was appointed a captain in the eighteenth regiment infantry, United States Army, which office I held until I was retired about two years thereafter; and in addition thereto, I held the office of local mail agent at Cleveland, Ohio, from the early part of the year 1853 until the latter part of the year 1854.

Q. 4. State whether you were ever employed in the Cleveland post-office, Ohio, or performed any service in or about that post-office; and, if you answer yea, please state the time and the nature of such service as near as you recollect it.

A. I never was regularly employed in the post-office, that is, to receive any pay; but, while I was local mail agent a large proportion of my time was spent in the post-office, when I used to assist in doing any of the work that was to be done about the office, such as stamping letters, attending the general delivery and box delivery.

Q. 5. You may state the location of the post-office at Cleveland during the time referred to in your last answer, giving the street and the name of the building in which it was located.

427 A. The first part of the time it was in the Herald building, on

Bank street; during the latter part of the time it was in Gray's building, on Water street.

Q. 6. In what year was that post-office in the Herald building, on Bank street?

A. In 1853, up to some time in the early part of July.

Q. 7. Where next was it located, and in what year or years did it remain so located?

A. It was next located in Gray's building, on Water street, and remained there until I left the department.

Q. 8. If you remember, when was it removed, if at all, from Water street, and to what place? I do not care for the exact time.

A. I have no recollection of the time when it was removed from Water street, but was removed from there to the government building, on Monumental square, generally known as public square.

Q. 9. Do you know Charles E. Wheeler, of Cleveland, Ohio; and, if you do, for about what length of time have you known him?

A. I do; about thirty years.

Q. 10. About how well have you known him during that time?

A. I have known him as well as men generally know people who associate with them in an office.

Q. 11. Was Wheeler employed in the Cleveland post-office, at Cleveland, Ohio, during the year 1853.

A. He was, during that portion of the time that I was there.

Q. 12. When did you first commence to assist in doing any of the work that was to be done about the post-office, as stated in your answer to question 4?

A. I think it was in January, 1853?

Q. 13. Was Wheeler employed at the post-office in Cleveland while it was on Water street?

A. I think he was.

428 Q. 14. Do you know for what portion of that time?

A. I think it was for all the time that I was there.

Q. 15. What year, if you remember, was it that you left the service at the Cleveland post office?

A. 1854.

Q. 16. Do you remember what part of the year it was?

A. I think it was in November or December of that year.

Q. 17. Were you familiar with the internal construction of the post-office while it was situated on Bank street?

A. I was.

Q. 18. Look at a drawing which I now show you, marked "Complainant's Exhibit, No. 1, Haskell, June 17, 1878—J. A. S., Ex'r," examine it, and then state whether that drawing, in your judgment, correctly represents the internal construction of the post-office while on Bank street?

A. I have examined the drawing; it represents a ground floor of the post-office on Bank street, as near as my recollection goes.

Q. 19. You may state the names of persons employed in that post-office while you were there, and so far as you remember them.

A. There was D. N. Haskell, postmaster, and James R. Haskell, assistant postmaster; D. V. Beeby, Henry Mastick, and Charles E. Wheeler, and George Haskell, and James Walsh, and several others that I don't recollect the names; there was a man there by the name of D. L. Stevenson.

Q. 20. State whether your opportunities were such as to enable you to know how, and by what means, letters were postmarked in that post-

office while it was situated on Water street, and also on Bank street, while you were there?

A. I used to assist in doing the stamping both on Bank street
429 and on Water street, and had the opportunity of knowing the manner and the means of doing it.

Q. 21. Had you the same opportunity to know the manner and means in which postage stamps were canceled, if at all, during the time stated in the last question and answer?

A. I had.

Q. 22. You may state whether postage stamps were used in whole or in part, so far as you know, for the payment of postage on letters, or whether the postage was prepaid, during the time you were in the post-office at Cleveland, Ohio, in part or in whole.

A. There was four ways, I think, of letters passing through the mails; one was by postage stamps, one was by being paid with money, and one was by being unpaid, and another was by being free.

Q. 23. I now present to you thirteen instruments, marked as defendant's exhibits in this case; I desire you to look at each and all of them, and select from that number, if you can, any instrument that resembles in form or construction the instrument used in the Cleveland post-office while you were there, both while it was on Bank and Water streets, for the postmarking of letters and other mail matter in that post office.

A. I have examined the exhibits presented to me, only one of which has any resemblance to those that we used to use in the Cleveland post-office; this is marked "Defendant's Exhibit No. 4—J. A. S., Ex'r., January 7, 1878"; this is similar, with the exception that it is not so large in diameter and the lettering on it; the one in use in the Cleveland post-office had the work Cleveland, O., in a circle on the outer rim, with the date in the centre, which was put in by movable type and fastened with a set screw, the same as this exhibit, having New York engraved in place of Cleveland.

Q. 24. When a letter came into that post office having its post-
430 age prepaid by a stamp, how, if you know, and by what means was that postage stamp canceled?

A. It was canceled by the post-dating stamp being stamped on the face of the postage stamp; I did lots of them myself at that time, in that way and in that office.

Q. 25. When a letter came into that post-office during that time, having no postage stamp upon it, how, and by what means, was the matter of payment or non-payment of postage determined on the face of the letter envelope, if at all?

A. In determining the question of postage upon a letter, it was to be determined, in the first place, whether the letter was subject to postage or not; if it was one that was subject to postage, then the rate was determined upon and a figure stamped upon the letter corresponding with the amount of rate; if the letter was free, it was stamped free accordingly.

Q. 26. And was that letter also post-marked with the post-dating stamp?

A. It was.

Q. 27. I now hand you "Defendant's Exhibit No. 137 (Wheeler), J. J. P., Examiner, Feb. 19th, 1878"; take it and examine it, and state whether you ever saw an instrument like that, or substantially represented by that, in use by anybody in the Cleveland post-office during the time you have stated you were there in that office while it was situated both on Bank and Water streets.

A. I have examined the "Defendant's Exhibit No. 137 (Wheeler), J. J. P., Examiner, Feb. 19th, 1878," and I am quite confident that I never saw anything like this in or about the post-office in Cleveland, Ohio, or in use there by anybody.

Q. 28. Did you ever hear or know from any source whatsoever of any instrument like that, or as substantially represented by that exhibit, being used in the post-office at Cleveland, Ohio, during the time you were there, either while the post-office was on Bank street or on Water street?

431 A. I did not; while I was in the office on Water street, a portion of the time I had the exclusive stamping of the letters, and keeping a book in which was registered all money letters and packages; my recollection is that I did this about two months at one time; this was when the office was first moved on Water street.

Q. 29. I now show you "Defendant's Exhibit No. 138 (Wheeler), J. J. P., Examiner, Feb. 19th, 1878"; take it and examine it, and then state whether you ever saw an instrument of that kind, or represented by that, in use in the Cleveland post-office by anybody while that post-office was on Bank or Water street.

A. I have examined the exhibit, and I never saw anything of this kind in either of the post-offices of Cleveland, whether located on Bank or Water street.

Q. 30. Did you ever hear or know from anybody, or from any source whatever, of an instrument like, or substantially like, that exhibit in form and in construction being used in that post office, either when it was situated on Bank or Water street, Cleveland, Ohio?

A. I never did.

Q. 31. Had there been such an instrument in form or in shape, and for the purposes designed by that exhibit, that is, to post-mark the envelope with the post-dating device, and to cancel the postage-stamp by the canceling device, separate and distinct from the post-mark, by one downward blow of the instrument so combined, in use in the Cleveland post office, either when it was on Bank or Water street, would you not have been apt to have heard or to have otherwise known about it?

(Objected to as leading.)

A. I think I should; I don't see how it could be otherwise, inasmuch as I had the exclusive stamping of the letters for two months of that time.

432 Q. 32. Aside from the two months referred to in your last answer, did you frequently stamp or postmark letters during the time you were in that post office?

(The same objection.)

A. I did it frequently, both before and after the two months mentioned.

Q. 33. Look at three letter-envelopes which I now show you, and which are marked respectively, Complainant's Exhibits Nos. 2, 3, and 4, Haskell—J. A. S., ex'r, June 17, 1878, and after having examined them, state, if you know, where those exhibits came from to this examination.

A. I brought them here.

Q. 34. State where you obtained those, or how they came into your possession.

A. Two of them came to me through the mail to Detroit, Michigan; the other I received from my wife, at Detroit.

Q. 35. State, if you know, where those letters were postmarked, and how you do.

A. They were postmarked at Cleveland, Ohio, in red ink, and I only know it by the postmark itself.

Q. 36. You may state whether these several exhibit letter-envelopes each contained a letter written to you upon business matters.

A. Two of them did; the other was a letter to my wife.

Q. 37. I observe written upon the back of one of these envelopes the following words, "David—I want the house bad, if it is to be had—telegraph me to-morrow, Wheeler"; take this envelope and look at that writing, and state if you know the handwriting that I have just quoted from it.

A. This is the writing of Charles E. Wheeler; I at that time knew his handwriting, and know it now.

433 Q. 38. About what length of time had you had these envelopes in your possession before producing them here?

A. About twenty-five years.

(Complainant's counsel offers in evidence the three several letter-envelopes above referred to, and asks that they shall stand marked, as they are now marked, Complainant's Exhibits, on June 17, 1878.

The said three several letter-envelopes are received in evidence, and stand marked as they were marked by the examiner on yesterday.

Defendant's counsel objects, on the ground that they are not shown to be material.)

Q. 39. You may state whether Mr. Wheeler ever had any conversation with you on the subject of postmarking stamps, and if you answer yea, state when, where, and what it was, as near as you recollect it.

(Objected to as immaterial and asking for hearsay.)

A. Some time since 1864 I met Mr. Charles E. Wheeler on the streets of Cleveland, which time he told me something in reference to a patent right for a canceling stamp which he had got or was going to get, which was a good thing, and he was going to make some money out of it; the exact date and particulars of the conversation I cannot now recollect, for I deemed it then entirely visionary on his part.

Q. 40. Previous to the time stated in your last answer, did Charles E. Wheeler claim, or pretend to claim to you, that in 1853, or any other time previous to the time of your meeting him on the streets of

434 Cleveland, as stated in your last answer, he had made an invention for postmarking letters and canceling the postage-stamps thereon, by an instrument like, or substantially like, those represented by "Defendant's Exhibits 137, 138—Wheeler, J. J. P., ex'r, February 19, 1878," or any device or instrument substantially the same as these, or either of them, which I now hand to you for your examination?

(The same objection.)

A. I have no recollection of Mr. Wheeler ever making any such claim.

Q. 41. You may state whether you know C. Clifford Nott, a person said to reside in Cleveland, Ohio, and who claims in his testimony in this case to have been employed in the Cleveland post-office while it was on Bank street; and, if you do, state whether you remember of his being employed in that post office at that time, and generally anything you may know about him in connection with that post-office.

(The last part of the question objected to as too broad.)

A. I know such a person as C. Clifford Nott; he was not connected with the Bank street post-office while I was there, while Haskell was postmaster, but was connected with the post-office for a short time after J. W. Gray became postmaster.

Cross examination:

By Mr. CLARKE.

X Q. 42. When were you in Detroit to receive the letters contained in the envelopes that you have testified about?

435 A. I was there in 1850 and 1851, about a year, and I was there at another time, in 1853, for a short time on a visit; I was there at another time, in 1858, for ninety days.

X Q. 43. Can you tell at which of those times you received the letters?

A. Only one of them.

X Q. 44. Which one?

A. The one containing the memorandum on the back of it "Complainant's Exhibit No. 4, Haskell."

X Q. 45. When did you receive that, and how can you tell?

A. I received that in the spring; I think in April, 1851; I tell it from my recollection of having a house to rent at that time, which Mr. Wheeler wanted to rent of me.

X Q. 46. Do you recollect distinctly that it was in the spring of 1851?

A. I am not positive about it.

X Q. 47. You can't tell when you did receive it?

A. I can't tell the date; all I know about it, I was up there at that time, and I had a house to rent there at that time.

X Q. 48. It is your best recollection, is it, that you received the letter in the spring of 1851?

A. That is my best present recollection.

X Q. 49. Is your recollection good of things that happened so long ago?

A. Much better than they are of things that happened ten years ago.

X Q. 50. Well, do you call it good of things that happened in 1851 and 1854?

A. I call it good.

X Q. 51. This envelope, "Complainant's Exhibit No. 4, Haskell," has a postmark on it, containing the words "Cleveland, O., Oct. 10"; please explain how you reconcile that date with the time when you say you received the letter, according to your best recollection, to wit, in the spring of 1851?

436 A. I cannot reconcile it; if I testified positively that I received this letter in the spring, I must have been mistaken; I did not intend so to testify.

X Q. 52. The various dates that you have given in your direct examination you took from papers you have in your pocket, on this examination, and not from a distinct, independent recollection; did you not?

A. I did.

X Q. 53. Look at the faint red mark on the right hand upper corner of the envelope "Complainant's Exhibit No. 4," and state what it is, and what it means?

A. I understand it to be a figure 5 in red; it signifies that there were 5 cents due on the delivery of the letter.

X Q. 54. Wheeler didn't write the letter that went in that envelope, did he?

A. No, sir; he did not write the letter.

Adjourned to Wednesday, June 19, 1878, at 10 a. m.

NEW YORK, *June 19th*, 1878—10 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Cross-examination of the witness DAVID L. WOOD continued by SAMUEL B. CLARKE, Esq., of counsel for defendant:

X Q. 43. How long were you in Detroit in 1853?

A. I was there only one day.

X Q. 44. What part of the year?

A. I think it was in the fall of the year.

X Q. 45. Then "Complainant's Exhibits Nos. 2 and 3, Haskell,"
437 couldn't have been received by you in 1853, could they, they being postmarked in July of same year?

A. I don't think they were received in 1853.

X Q. 46. What were your duties as mail agent?

A. To be at the railroad depot when the trains arrived with the mails on, and attend to the dispatch of them to the post office at Cleveland, and the trains going out carrying mails.

X Q. 47. By whom were you employed?

A. The Post-Office Department; the appointment was by the Postmaster-General; the pay was through the Cleveland postmaster.

X Q. 48. Were you subject to the orders of the postmaster?

A. I was.

X Q. 49. About how many mail trains came into Cleveland a day while you were mail agent?

A. Seven.

X Q. 50. How many mail trains left Cleveland a day?

A. The same number.

X Q. 51. When were you mail agent in Cleveland, without reference to any papers?

A. Part of 1854, and part of 1853.

X Q. 52. How much time each day, on an average, did you spend in the post-office?

A. About six hours.

X Q. 53. What did you do during these six hours?

A. Some portion of the time I attended the box delivery, and also the general delivery, to relieve the regular clerks; the greater portion of the time I spent there was in stamping letters, during two months, or about two months of the time particularly.

X Q. 54. When were those two months; where was the post-office; and who was postmaster?

A. The early part of 1854; J. W. Gray was postmaster; the post-office was in Water street, in Cleveland, Ohio.

438 Redirect:

By Mr. NORTON:

R. D. 55. Defendant's counsel, in cross-question 52, inquired of you whether you had not in your direct examination taken certain dates which you there stated from papers in your pocket; you answered "I did"; state what those papers are from which you took those dates, as stated in that answer.

(Objected to as not a proper redirect question, and as asking for secondary evidence.)

A. They were letters of appointment and commission in the civil and military service.

R. D. 56. In cross-question 44 you were asked what part of the year

1853 you were in Detroit, Michigan; you answered that you thought it was in the fall of that year; do you know what month—whether September, October, or November of that fall?

(The same objection as first above.)

A. I have no positive recollection of the month.

R. D. 57. It might have been October of the fall of that year, might it not?

(Objected to as leading, and because the witness has stated he has no positive knowledge of it.)

A. It might.

R. D. 58. The prepayment of postage was optional during the year 1853, was it not, so far as you remember?

(Objected to as leading.)

A. Yes, sir.

439 R. D. 59. In cross question 49 you were asked as to the number of mail trains that came into Cleveland daily while you were mail agent there; you answered seven; state whether those were by railway trains, or coaches moved by horse power, and whether that number includes mails from all directions then coming to Cleveland.

A. My answer only had reference to trains arriving on the railroad; other mails did arrive in Cleveland by stages and steamboat.

R. D. 60. Do you know how many mails by railway trains now come to Cleveland and depart therefrom daily?

(Objected to as immaterial and as not proper redirect examination.)

A. I do not, only that there are a good many of them.

R. D. 61. In cross-question 54, you were asked who was postmaster at Cleveland at the time you spent two months at one time in the business of stamping letters, or substantially so; you answered that J. W. Gray was postmaster at that time, and that that time was in the early part of 1854, and that the post-office was then on Water street; state whether you had, previous to going into employment by the Post-Office Department, any personal or business relations with Mr. J. W. Gray.

(Objected to as not a proper redirect question.)

A. A short time previous to my going into the Post-Office Department employ I was a business partner of J. W. Gray in the job and book printing business.

R. D. 62. While Gray was postmaster there, or at any other time subsequent, did you ever hear him say anything concerning an alleged invention claimed by Charles E. Wheeler, for postmarking letters

440 on envelopes at one side of the postage-stamp, and at the same time and blow of the instrument to cancel the postage-stamp by the application of ink to the exposed surface of the postage-stamp?

(Objected to as immaterial, hearsay, etc.)

A. No, sir.

R. D. 63. If you know, state about how much larger the business at the Cleveland post-office was during the years 1863 and 1873 than it was while you were mail agent there and connected with the post-office in that place.

(Objected to as immaterial and not proper redirect examination.)

A. I have no means of knowing the exact amount, but I should think that it had increased over one hundred per cent.

D. L. WOOD.

Subscribed and sworn to before me, this June 19th, 1878.

JOHN A. SHIELDS,
Examiner, etc.

Complainant's counsel here produces two envelopes postmarked New York, one on February 26 and the other May 11, for the purpose of showing the court the manner of postmarking and of canceling postage stamps in the New York City post-office at the present time, and asks the examiner to mark them "Complainant's Exhibit No. 1, New York; J. A. S., examiner, June 19, 1878," and "Complainant's Exhibit No. 2, New York, J. A. S., examiner, June 19, 1878"; and also another envelope, postmarked Cincinnati, March 15th, and marked "Com-
441 plainant's Exhibit, Cincinnati, No. 3; J. A. S., examiner, June 19, 1878."

(Objected to because no proof is given concerning them.)

Adjourned to Thursday, June 20th, 1878, at 10 o'clock a. m.

NEW YORK, *Thursday, June 20th*, 1878—10 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

SAMUEL P. KITTLE, a witness recalled and examined by MARCUS P. NORTON, esq., of counsel for complainant, deposes and says:

Q. 1. Have you been examined as an expert witness in this case on the part and behalf of the complainant, and, if you answer yea, were you sworn on that occasion?

A. Yes; I have been examined and was sworn.

Q. 2. Look at "Defendant's Exhibit No. 147, April 1st, 1878—J. A. S., ex'r," which I now hand you; examine it, and then state whether you have read that paper or not, and if you have, do you understand it?

A. I have read the paper, which is a certified copy of a patent issued to Marcus P. Norton from the United States Patent Office, bearing date the 16th day of December, 1862, and I understand it.

Q. 3 Look at "Defendant's Exhibit No. 148, April 1, 1848—J. A. S., ex'r," which I now hand you, and state what it is, if you know,
442 and whether it has any relation to defendant's exhibit named in the last question.

A. It is a certified Patent Office model purporting to represent the model that accompanied the original of the Exhibit 147, referred to in the last question and answer.

Q. 4. How many canceling devices are now attached to that exhibit—the last above referred to?

A. Two.

Q. 5. Upon the face of each of those you will observe grooves cut in various directions across the surface; state what those grooves are for if you know.

(Objected to as being a matter to be determined by the court from the specifications.)

A. Evidently the intention of the grooves is to prevent the postage stamp from being cut entirely away in such a manner that the part being cut might separate from the part not cut; that is to say the circular edges, if applied with force sufficient to drive them through the paper or other stamp, were they continuous in circles and without the grooves running crossed might cut the postage stamp through and into separate rings of different sizes, and carry away that portion so cut; these grooves, however, running out from the centre across the same and cutting edges, would leave portions that would not be cut, and therefore would be held together by these bar-like strips running out from the centre.

Q. 6. You observe on the acting face of each of these cancelers a series of circular sharp edges; please state, if you know, what those are for, and the purposes to which they are applied when in use.

(The same objection.)

443 A. From the description of the patent, Exhibit 147, and the illustrations accompanying and making part of the specification of that patent, and from the evidence of the certified model, it is clear that they are for the purpose of cutting the postage stamp, and that would be their effect and operation when applied with force on to a postage stamp.

Q. 7. Please examine those canceling devices and state how you find the acting surface in form of construction; I mean the surface only.

A. The cutting edges stand up from the main surface or face of the postage canceling device about the thirty-second part of an inch, the inner and smaller circular edges rising above the outer or adjacent edges in the form of a flattened cone.

Q. 8. You will observe surrounding the cutting edges referred to in your last previous answers, a band divided into segments by means of grooves running from the centre of the canceling device to its periphery; please state, if you know, what those are and for what purposes they are used when the canceling device is in active operation.

(The same objection.)

A. They are described in the patent, Defendant's Exhibit 147, as guides or a gauge to prevent the cutting edges from passing through the envelope or other wrapper, to an extent that would be injurious to the contents; if practical, I should say they would be an effectual stop to deep or damaging cutting; that is evidently why the circular zone or belt is formed on the acting face of this device; the cross-grooves sink below this band or face.

Q. 9. I desire you to carefully examine the drawings attached to Exhibit 147, as well as the model, Exhibit 148, about which you have just testified, and then state whatever you may observe with reference to the guide or guides referred to in your last answer as compared with the acting surface of the postmarking device.

444 A. The drawings, fig. 1 (showing a side elevation), illustrates proportionately a broader band or guide or guage surface running around the cutting edges on the outside of same; fig. 2 of the drawings shows no guide or guage face rim running around or outside of the circular cutting edges to speak of (fig. 2 is a transverse central vertical section); fig. 3 of the drawings, being a face view, shows a much broader guage or belt running around the circular cutting edges than is indicated in the model, Defendant's Exhibit 148; I think the inner belt or guage rim in the model which stands below the cutting edges is fairly represented in the drawings of the patent, Defendant's Exhibit 147; I would further state that the grooves represented in the model as running across the centre and through the ring and circular edges, and which extend out to the periphery of the canceler, cutting also the band or guage in the certified model, does not appear to correspond with the drawings illustrating the invention described in Defendant's Exhibit 147; such grooves stop at the inner periphery of the band or guage represented in the drawings of the patent (see face view, fig. 3, of the same).

Q. 10. Compare the acting surface of the post-marking device with knife or cutting part of the canceling device, and also with the face surface of the segmental guards, and state how they compare as to an air-line surface or a right angle to the vertical centre of the operating

handle; I call your attention to this matter both in the drawings of Defendant's Exhibit 147, and also in the Defendant's Exhibit, Model 148, about which you have testified to-day.

A. In the drawings of Exhibit 147, the circular knife or cutting edges are represented on a line at right angles with the vertical centre of the operating handle, or level with the post-marker, so that when struck on a plane surface the edges would penetrate about the same as the
445 type would be impressed or indented; in the model, Exhibit 148, I find that feature the same; in the drawings referred to, I find the guage or guard running around the cutting edges short or standing back of such line by about the thirty-second part of an inch, so that the whole metal face of the post-marker, when struck in a vertical direction on a level surface, would have to be imbedded about a thirty-second part of an inch before the guage or guard face would bear or rest upon such level surface; now I wish to state further, that with the construction illustrated in the drawings of Exhibit 147, or the Model Exhibit 148, in my opinion, the cancellation could not be perfectly done when the postmarking was perfectly done; in other words, that the instrument described is not a practical instrument without some modifications of construction.

(Defendant's counsel objects to the last part of the answer as irresponsive.)

Q. 11. From your examination of the patent Defendant's Exhibit 147, and from your observation of the model Defendant's Exhibit 148, what is your opinion, as an expert, as to the several canceling devices connected with those two exhibits, and about which you have testified? I now have reference to the success or non-success of those devices for use in the postal service.

(Objected to on the ground that the witness is not competent to speak about the active service, and is immaterial.)

A. I don't believe, as I have said before, that the instrument or device would postmark and cancel a postage-stamp at the same operation, successfully, when constructed as described and illustrated in the exhibits referred to.

446 Q. 12. I now show you Complainant's Exhibits U and V; take them and examine them, and state the similarity or dissimilarity of the canceling devices shown in those exhibits, and the canceling devices in Defendant's Exhibit No. 148, now shown to you.

A. The canceling devices in Complainant's Exhibits U and V are printing or blotting instruments, U having an acting face of cork, and V of metal, the flattened bars or plane bar surfaces running across crossed at the ends and on to a *by* circular projecting ring which enclose P. O. in the centre, while there are four rectangular bars, the angles pointing towards the centre of the cork face in U; there is no cutting surface in Complainant's Exhibit U or V, in the canceling device, but a printing or stamping face or surface; whereas, in Defendant's Exhibit 148, the canceling device consists of circular sharp edges, for the purpose of cutting, in contradistinction to printing or stamping; and the broad face surfaces are above or back of the cutting surfaces, and are intended to prevent too deep cutting by the edges of circular form as before described; that is to say, Defendant's Exhibit 148 represents an instrument for canceling the postage stamp by cutting the same by a series of sharp edges at the same operation that imparts or puts the post-office and date on the envelope, while the Complainant's Exhibit U and V represents a construction for printing a postmark and canceling the postage stamp with ink at one and the same operation.

Q. 13. Apply the last question to Complainant's Exhibit B, now shown to you, and Defendant's Exhibit 148, and make answer thereto.

A. Complainant's Exhibit B, as regards the acting face, is the same as Complainant's Exhibit V and U, with this distinction: it is not of the same material nor of the same configuration, and is not identical in mechanical form or combination with the other part or parts of the instrument; but these differences, in view of the state of the art—
447 as I understand it—are only mechanical or colorable variations or modifications of the instrument; Complainant's Exhibit B, as an instrument, is for imprinting with ink a postage mark, and canceling the post-office stamp with ink at one and the same operation or blow, the post office mark being at the side of the postage-stamp canceler, the same as in Complainant's Exhibits U, V, and B; whereas the post office marker and the postage stamp canceler in Defendant's Exhibit 148 stand in like relation to each other, and are to be operated by the handle in a similar manner as the three other exhibits just above spoken of; nevertheless, the cancellation is of a different kind, to wit, a cutting cancellation in distinction from a printing or ink cancellation; and the construction found in the Defendant's Exhibit 148, as regards the acting face of the postage-stamp canceler, is a construction consistent with its purpose and operation, as well as the description found in Defendant's Exhibit 147, to wit, knife edges with cross grooves, and a guard or gauge to prevent too deep cutting.

(All testimony in this answer relative to Defendant's Exhibits 147 and 148 objected to as not being responsive to this question.)

Q. 14. Suppose that the segmental guards surrounding the cutters or sharp knives in the canceling device of Defendant's Exhibit 148, about which you testified, should fail to prevent those sharp edges or knives from going through the postage stamp and the envelope and the matter therein enclosed, what would be the effect, in your opinion, upon the contents of any such envelope or letter?

(Objected to as not a question for expert testimony.)

448 A. It would be damaging, destructive, and pernicious, and I think sufficiently so to condemn the employment of such a contrivance or construction, and prevent and condemn its use.

Adjourned to Friday, June 21st, 1878, at 10 o'clock a. m.

NOTE BY EXAMINER, AT THE REQUEST OF MR. CLARKE, DEFENDANT'S COUNSEL.—It is noticed that the drawing on Defendant's Exhibit 147 has become separated from the ribbon and the seal. The drawing is therefore here reattached by mucilage, with the consent of both counsel. It is also noticed that the certificate has become entirely separated from the model Defendant's Exhibit 149; therefore, at the request of Mr. Clarke, defendant's counsel, the same is reattached by the examiner by means of a ribbon running under the commissioner's seal of said examiner, this being with the consent of both counsel.

NEW YORK, *Friday, June 21st*, 1878—10 o'clock a. m.

Pursuant to adjournment.

Present, counsel as before.

Examination of SAMUEL P. KITTLE continued by MARCUS P. NORTON, esq., of counsel for complainant:

Q. 15. Look at Defendant's Exhibit 145, April 1st, 1878, J. A. S., examiner, which I now hand you, and state whether you have read

and examined that exhibit, and, if you have, state whether you understand it.

A. I have read and examined the exhibit, and understand it.

449 Q. 16. I now show you Defendant's Exhibit No. 14, April 1, 1878, J. A. S., examiner. Please examine it, and state whether you understand the construction and operation when in use; state also the purposes of the several parts thereof.

A. I understand the construction and operation of the exhibit and the combination of the different parts. There is a metal frame, having a stem extending out and above, on to which the wooden handle is secured; a brass ferrule surrounds the end of the handle, which bears upon the metal frame or case to which the handle is secured; the metal frame or case, being of hollow or cup and circular form, has its opposite sides cut away, so as to admit several rings (having letters or figures on their peripheries); to the right and left of these openings, and extending downward, are the solid parts of the frame or case, through which there is a hole to receive a bolt or shaft, the centre of which is distant from the lower edge of the frame or case equal to half the diameter of the letter and figure rings that take their bearing upon the shaft or bolt resting in these holes; at the lower extremity of the frame is an enlargement of the diameter of space in such a manner as to form a ledge or shoulder about an eighth of an inch from the lower extremity of the case; into this enlarged diameter, and resting on to the shoulder last described, is fitted a plate or ring with open centre, through which the faces, or lettered, or figured peripheries of the rings on the shaft pass, so that the letters upon the last described open ring, or plate, are on a plane with the letters and figures of the several rings on the cross-shaft, which is secured in the case and frame, back and above the open plate or ring, which plate or ring rests in the lower end of the case on a plane which is at right angles with the axis of the handle and stem of the frame or case; the shaft on which the lettered rings rest, and around which they revolve, has an elongated head at one end of

450 larger diameter than it is in its main extent, it being turned off or reduced to form a shoulder at one end, which shoulder bears against the side of one of the rings, a hole being drilled through each of the rings to correspond to the reduced size of the bolt or shaft, and at the other end of the bolt or shaft is a screw-thread cut thereon, nearly up to the frame or case through which it extends. Now, these lettered rings (which combine with the face plate or ring to complete the post-office mark) are provided with letters or figures on their peripheries, so that, by turning them on the shaft, the month in abbreviation, the day of the month, and the year in abbreviation may be given, or printed at the same time and operation that the face plate, or ring, prints the location or place, indicated by the letters thereon; there are four rings that revolve on the shaft; the first carries two letters abreast, or in line of the shaft, and twelve on the circumference; the second two rings are thinner and are provided with numerals on their periphery; the first only carrying the numerals represented in the number of tens of days in any month, the balance of the periphery being cut away or blank. The next ring is provided with the figures from 1 to 9 and 0, giving the units of days, and, when in combination with the ten rings, giving the units and tens of days in any month. The fourth ring is provided in this case with twelve segment faces, on each of which are two figures, commencing with 58 and running on to 59, 60, and so on. These two figures, with an abbreviation mark, can and are to be set in line with the letters indicating the month in the first ring, and the fig-

ures indicating the day of the month in the second and third rings, and the said two figures and abbreviations represent the year exclusive of the hundreds of years, all being in line and immediately under the shaft, and having been adjusted to the month and date desired. By turning the same upon the shaft they are fixed and compressed
451 together against one side of the case, the face of the lettered ring bearing on and against the case, while the shoulder at the head of the bolt bears upon the face or side of the year ring, and by means of the screw, and a nut thereon, they are compressed and held together firmly by the friction of the faces of the several rings resting against each other, and the shoulder of the bolt at its head, and the opposite side of the case or frames; the horizontal or open plate, having its axis at right angles with the lettered and figured rings just described, is secured into the frame or case (resting up against the ledge or flange before described) by means of little pins which are screwed into the same, passing through the case from opposite sides. On the right-hand side of the case is a rectangular piece of metal, having a pin-hole at its lower extremity, resting over one of the screws, which secures the plate as last described above. The circular form of the plate is slightly reduced on this right-hand side, to form a seat for this rectangular piece of metal, and at this point the ring-shaft or bolt extends out from the frame or case with its threaded end, and this angular piece of metal having a hole drilled through it so that it may be placed over the threaded end of the shaft, while a little below rests over the little screw head which holds the face plate or ring of the instrument on as before described, is the pin-hole for the screw head. Now, this angular piece of metal is provided on its lower face with a series of sharp edges formed thereon, and running out from the centre of the face plate, and at right angles with the axis of the instrument as a whole, which, when the angular piece is in place, as before described, are found to extend downward, or below the frame or case, and below the face of the plate or ring which bears the letters indicating the location or post-office, and below the type and figures on the rings that revolve on the shaft as before described, so that, when the instrument is set on a plane or level surface, with
452 the handle at a perpendicular line, the instrument rests on these sharp edges, and on to the opposite side of the frame or case, or the face-ring thereon. This angular piece, having sharp edges, is held and secured on the outside of the frame or case and in proper position by a milled nut being turned down upon the screw of the bolt or shaft before described; and on the angular piece, I would state that, in resting the instrument on a plane surface, as last described, the outer ends of the knives are not in the horizontal plane with the inner ends; this is owing doubtless to the fact of imperfect construction or of subsequent strain, changing the right-angular shape of this part of the instrument. I find attached to and forming a part of this exhibit a separate ring with centre opening like the one securely attached to the frame or case and already described, but provided with a groove somewhat dovetailed, or broader at the base than at the open top, opening with a side gate or gain cut through for inserting or taking out removable type and leads or spaces found therein. I do not find, however, in this ring any screw holes for securing the same into the frame or case, as the ring described in and secured to the frame has. The open plate or ring, with location of post-office, for instance, being in place and provided with letters indicating such location, the ring with the letters indicating the month being placed on a plane with the location, type, or letters, and the figures indicating the day of the month being turned to a line on the shaft

with the letters indicating the month and the two figures indicating the year, as stated, being on the same line on the shaft and in the same plane as the other letters and figures; and the angular piece of metal being secured on the threaded end of the bolt or shaft and over the head of the little screw-pin, and being held in position by the milled nut, which should be turned down firmly thereon, the cutting edges
453 will extend below the letters and figures, and the general face of the instrument, and the instrument will be in order and ready for use.

Q 17. State, if you know, the purpose of the knives upon the lower surface of the rectangular metallic piece of which you have spoken.

A. They are for cutting the postage-stamp while at the same time and operation of imprinting the post-office mark, so that the postage-stamp will be canceled effectually, to prevent its second use. This information I give as obtained by reading the description of the instrument and its use and operation in Defendant's Exhibit 145, April 1, 1878, J. A. S., examiner.

Q. 18. What, if anything, do you find upon the lower surface of this rectangular metallic piece to prevent those sharp-edged knives passing through both the stamp, letter-envelope, and into and through the enclosures therein?

A. I doubt whether these knife-edges, as set here, would extend through more than two or three thicknesses of paper when used in the ordinary way of imprinting the post-office mark; still they might. There is nothing to prevent their being imbedded into or through the postage-stamp, the envelope, and even into the contents of the envelope, if the edges are allowed to cut to their full extent, which is down to the plane surface surrounding them, of the horizontal part of the angular piece.

Q. 19. Having reference to the Defendant's Exhibit 145, referred to in your examination this morning, state the requirements as to the construction of the rectangular metallic step or piece, both as to the form itself as well as to the knives upon its lower surface.

(Objected to as leading—as being for the court.)

A. The knife edges shown in the drawings, particularly in Fig. 2, extend down a little below other acting parts of the face of the in-
454 strument, and by the description must be so constructed as to cut through the postage-stamp. They are described as being made of the best cast steel, and sharp and capable of being sharpened, if they get dull, by the use of a file. The inventor describes their office as that of cutting; and their value lies, according to the inventor's description, in their capacity for cutting the postage-stamp. Though he calls this part of the instrument a blotter, and describes it as carrying ink, yet he clearly depends upon the capacity for cutting and the construction for cutting the postage stamp and the actual cutting in use, as the invention. I will quote from the specification referred to in the question, to show what the thing is, and what it must do (irrespective of what you may call it, or what he may call it) to constitute the contrivance invented by him: "It also consists in attaching a blotter, hereinafter described, to the hand-stamp aforesaid upon one or two sides thereof, for the purpose of cutting, blotting, canceling, or 'effacing' 'the frank' or 'postage-stamp,' so as to prevent a second use of the same." Further on I quote: "It cuts the frank or postage-stamp in as many places as there are sharp edges projecting from the face of the said blotter, while at the same operation. The places thus cut through the said frank or postage-stamp and inked by the same means whereby

the cutting was done, thus preventing a second use of such frank or postage-stamp; for, although the ink thus put on be washed therefrom by any process, the places thus cut will show the first use, and detect and expose the second or fraudulent use of such frank or postage-stamp." In describing the construction of this part of the instrument further on, the inventor states: "This stamp may have another blotter like J, which shall be on the opposite side thereof, by the use of which the frank or postage-stamp would be cut, inked, blotted, effaced, and
455 canceled upon any part of the letter or envelope where it may be placed. One blotter like J, however, is believed to answer the required purposes. This blotter, J, may be made of any size or shape and of any material to answer the end or purpose sought to be attained. The face, which receives the ink and which comes directly on the frank or postage-stamp, is grooved or cut, thereby leaving various projections which have a sharp or knife-edge sufficient for each to cut entirely through the frank or postage-stamp." Further on I quote: "The said blotter J should be made of the best kind of cast steel, and in such shape as not to break any part thereof. The projections upon the face of said blotter may be kept sharp and in cutting order by filing and sharpening them when dull." So I can but regard the thing invented as a cutting device; and the fact that it may carry ink is wholly secondary and of little or no value, according to the description found in Defendant's Exhibit 145.

Q. 20. You have stated, concerning the rectangular metallic device with sharp-edged knives upon its lower surface, and in your last answer you used the term "blotter" to designate that device from the several other devices contained in Defendant's Exhibit 146, April 1, 1878, J. A. S., ex'r, now before you. Please state whether, in your opinion, that name in anywise affects or changes the character or the true intent of the inventor when, in his specifications in a patent for that device, he uses the term of designation, to wit, "the blotter J."

(The same objection.)

A. No; I don't regard the name as at all important. In looking for the invention, it is the thing—it is its construction and operation and the result it produces. Names are nothing. It would be folly to suppose that calling a goat a sheep would make it a sheep or any other thing by a wrong name, or any name would change its actual
456 nature. Indeed, it is very common to call things by wrong names.

Q. 21. Suppose that the sharp knives upon the lower surface of the rectangular piece referred to in your several answers, and found in Defendant's Exhibit 146, about which you have testified to-day, were entirely removed from that surface by a file or a grindstone, or any other means, what, in your opinion, would be the effect produced, if any, by such removal?

A. The nature of the construction, and the combination, and the operation, and the result would be changed; the exhibit would not represent with such change the instrument described or illustrated or claimed in Defendant's Exhibit 145.

Q. 22. Compare this rectangular step contained in Defendant's Exhibit 146 with the canceling device found in Complainant's Exhibit B, each of which are now shown you, and state the similarity or the dissimilarity between those two devices.

A. The devices, in each case, are for canceling postage stamps; the canceler in Complainant's Exhibit B is for printing ink broadly and largely over the postage stamp, for which purpose there are broad bars, a central circular line or type enclosing a figure 2, the whole face of an

elliptical form; in Defendant's Exhibit 146 there is a succession of straight projecting edges, covering a space of about one-fifth or one-sixth of that in Complainant's Exhibit B; the edges are removed farther from the post-office marker than in the case of Complainant's Exhibit B, and are not intended as ink printers or types, but as cutting edges; the edges are located upon an angular piece, which is held on the side of the postmarker by a milled nut, screwed down on the bolt, and prevented from turning around by the head of a little screw projecting into a hole for that purpose, at the lower extremity of the angular piece or canceler; whereas the canceling and marking device
457 are one and the same piece of metal, cut away so as the faces are close on a transverse line through the centre in Complainant's Exhibit B.

Q. 23. I now hand you Complainant's Exhibits U and V, and also Defendant's Exhibit No. 146, and to those exhibits I apply the last question, and desire you to state the difference, if any, between the postage-stamp canceling devices, and whether the same be substantially and materially similar or dissimilar?

A. Complainant's Exhibits U and V, as regards the canceling device, are substantially the same one with the other, though with modified construction as to form and material; they are both, however, ink-canceling devices, provided with broad faces to carry abundance of ink, and to imprint the same on to postage-stamps, canceling them by inking; whereas the corresponding device for canceling, in Defendant's Exhibit 146, is a succession of sharp or knife edges, as I have before stated, made for cutting the postage-stamp and to cancel the same by cutting it; and notwithstanding ink may adhere to such edges by their coming into contact with the ink-pad when the post-marker is inked, yet the canceling device in Exhibit 146 is clearly distinguished and distinguishable as a cutting or knife edge canceler; the fact that ink may get on to it or be borne on the edges which are to cut the postage-stamp, does not essentially change the clearly-marked design and purpose of the construction, its operation, or result at all, as it is made for a different purpose, and operates in a different manner, and produces a different result when used; it is a cutting cancellation as distinguished from a printing or stamping cancellation; it has cutting edges instead of printing surfaces, as in the case of Complainant's Exhibits U and V, whereas in U and V there are no cutting edges, and if any sharp substance should be found in the ink to adhere to those surfaces and
458 produce cutting in the postage-stamp, or through the postage stamp and the envelope, in the use of Complainant's Exhibits U and V, it would be foreign to the purpose, it not pernicious and damaging in the result.

Q. 24. Were you present during the whole or part of the examination of the learned and distinguished expert, produced on the part and behalf of the defendant in this cause—a person by the name of T. J. W. Robertson, if I am not mistaken; and if you were, did you hear him testify anything concerning the green turtle, turtle-dove, or printer's turtle?

A. I was; I don't remember his saying anything about green turtles or turtle-doves; however, I do remember hearing him say something about a "printer's turtle."

Q. 25. Do you know anything about a printer's turtle?

A. Yes.

Q. 26. You may go on and state, if you please, what you know about

a printer's turtles, what they are, and to what purposes they are applied, if to any, and generally all you know as to instruments of that kind.

(Objected to as immaterial.)

A. The thing designated as a turtle in the printer's craft, I think, was first introduced by Mr. Hoe, in the great Hoe cylinder press; the first time I ever saw it, I think, was in 1850 or 1851, in this city, in the Sun office, in the vaults under the walk, at the corner of Fulton and Nassau streets. It is a frame or jacket which carries and constitutes the form with the type, and is secured to an immense cylinder; there was a large number of those jackets secured to a very large cylinder for printing the daily edition of the Sun; I should think one of these turtles, with the type it contained, would weigh three or four hundred pounds as I first saw it; I have frequently seen the same since
459 then in different printing offices; the New York World, which I now hold in my hand, is printed on such a press, and each page represents an impression of what is termed a turtle by the printers; I hand the World as an exhibit and an illustration of my answer; each page is an impression of the type contained in the outer periphery of a printer's turtle.

(The paper is marked Complainant's Exhibit No. 1, New York World, J. A. S., Examiner.)

Q. 27. From your knowledge concerning the printer's turtle described by you in your last answer, state your opinion as to the application or adaptability of the printer's turtle for the purpose of postmarking letters and canceling the postage stamp thereon at one blow or operation of the instrument, and leaving the postmark on the letter envelope at one side of the postage-stamp at the same time as the cancellation of the postage-stamp in ink.

A. It is simply preposterous; you might as well ask a man to handle the largest-size trip-hammer to make horse nails.

Q. 28. I now produce and hand to you another wonderful device produced by the ingenious expert for the defendant in this cause, one T. J. W. Robertson, of the city of Washington; take it and examine it, and describe each and every part of it; the exhibit I hand you is marked Defendant's Exhibit 169, J. A. S., Examiner, April 2, 1878, (Robertson).

A. I recognize in this a little clothes-marker, used for marking linen, which I have seen sold by hawkers on the streets in different parts of the country during the last twenty or thirty years; it has a bulb handle with a socket at its smaller or lower end, into which a stem extends, from a lead or pewter cross-bar, the bar having an elongated cavity on its opposite side for leads or spaces and letters to place the type
460 requisite to compose the name of the person to whom the linen belongs, and a screw with thumb-piece at the end to pass through the end of the little pewter or lead box, having an inner thread to correspond with the screw, so that it can be turned and screwed up against the type and spaces or leads to hold them firmly in, pressing them against the opposite end of the little box or holder, and against each other.

Q. 29. State whether you discover any postmarking device upon the exhibit referred to in the last question and answer, or upon any of those that you have mentioned in your last answer, and so arranged as to give the postmark on the letter envelope one side of and separate from the postage stamp; and also state whether you find in that exhibit, or saw in any of those you have mentioned in your last answer, a postage-stamp

canceling device so arranged as to cancel in ink such postage stamp at the same time of the imprinting of the postmark on the letter, and by one and the same downward blow.

A. No, to all parts of the question.

Q. 30. From your familiarity with such a device as represented by Defendant's Exhibit 169, now before you, state your opinion as to the adaptability and practicability of that device to the postmarking of letters and the cancellation of the postage-stamp in ink, separate and distinct from the postmark, by one blow or operation of the instrument.

A. It was never intended for any such purpose, and could not be used successfully for the purpose of postmarking and postage-stamp canceling without very material alterations of construction and combination. You might as well think of driving railroad spikes with an ordinary tack hammer.

Q. 31. Compare that exhibit with Complainant's Exhibit B, and Complainant's Exhibit U, and Complainant's Exhibit V, and state whether you find in it any of the several devices or elements that enter
461 into the construction of the complainant's said Exhibits B, U, and V; and, if you do, state what they are and the purposes to which they are applied.

A. All of the exhibits, including the little clothes-marker, have turned handles with bulb tops, with holes in their lower ends to receive a spindle or shank extending upwards from the bar or main metal portion of the instruments. As regards the handles, I should say that they are similar. Here the similarity ends. The little clothes-marker, Defendant's Exhibit 169, is operated by this handle, in carefully placing it upon the article to be marked or printed, by pressing the type with care upon the linen or article to be marked; whereas the Complainant's Exhibits B, U, and V are to be operated by their handles in the hand of the operator by a quick, sudden, and forcible blow, with no special care, as in the case of the little clothes-marker, and not by being pressed down, as I have stated in regard to that exhibit. In that exhibit there is no provision for great solidity and strength to resist a sudden concussion or blow, such as is given and required in the constant use of the post-office marker and postage-stamp canceler in a post-office where they are used; and if it should be attempted in its present construction to use it in such manner, it would be found, in my opinion, impracticable. In the second place, the little clothes-marker has no configuration or type for the purpose of postage-stamp canceling, and it has no post-office marking type, neither did any of them ever have that I have ever seen; whereas the Complainant's Exhibits B, U, and V have distinct provisions for the post-office mark combined with distinct provisions for postage-stamp canceling, which, firmly attached to a cross-bar, upward from which extends a strong and firmly fixed spindle in the handle, all the parts arranged with a definite design in each exhibit to impart a clear and distinct post-office mark and postage-stamp cancellation, with definite and fixed relations to each other, and for strength and dura-
462 bility sufficient to withstand strain and wear in the employment of the instruments with force and rapidity, as required in continuous use.

Cross examined:

By Mr. CLARKE:

X Q. 32. How long ago did you see clothes-markers like Defendant's Exhibit 169 on sale in the streets of different cities of this country, and what cities were they?

A. I remember of having bought one and used it, I think, in 1850 or thereabouts, and I remember of having seen them used and owned by others, and having seen them sold, I think, in the city of Buffalo at first; also, I think, in the city of Rochester; I think, also, in the city of New York, and at various other places. My impression strongly is that I have seen them sold at the State fairs, and other places that I have been in, twenty-five years ago. They were generally and commonly known.

X Q. 33. Suppose that the type receptacle in Defendant's Exhibit 169 were enlarged so that it should be two or three times as large as it is now, would that be a mere formal or mechanical change, or a substantial change, in your opinion, the shape remaining the same?

A. Only formal or mechanical.

X Q. 34. Suppose that the material of the type receptacle so enlarged were to be changed to iron or steel, would that be a formal or mechanical change merely, or a substantial change, in your opinion?

A. I think only a formal or mechanical change in a general view.

X Q. 35. Suppose the enlarged steel receptacle for type were to be divided into two by a fixed partition running through the receptacle and across the longer axis, and another set screw should be added
463 at the opposite end to hold the type, would that be a formal and mechanical change merely, or a substantial change, in your opinion?

A. That looks like a substantial change to me. If it was never done before, it would indicate some new purpose, and probably would be a substantially different construction, I think.

X Q. 36. Suppose that, in the case stated in the last question, instead of a fixed partition, a printed space more than usually wide and thick, so as take the place of such partition, were used, would that be a formal or substantial change?

A. I am in a little doubt about that, whether it would or not. If there was some additional good end served by the second screw, it might or might not be.

X Q. 37. Suppose that, in the enlarged type receptacle made of steel, felt or rubber type were used at one end and steel type at the other, would that be a formal or a substantial change, in your opinion?

A. That would depend on the state of the art. If felt or rubber type had never been used before, it would constitute a substantial change.

X Q. 38. Do you know whether, at about the year 1850, when you purchased one of those clothes-markers, felt or rubber type or wooden type had been used by printers?

A. Yes, I know they had; but I do not know they had been used in combination in a clothes marker, like Exhibit 109. My impression is that they had not.

X Q. 39. Those wood, rubber, and felt type, whose use you say you knew of as early as 1850, were enclosed in a turtle or frame to prevent them from spreading apart when used, were they not?

A. I don't see how you could have understood me to have said that I knew of felt type being used as early as 1850. You asked me if I knew of felt, rubber, or wood type; I said I did. I do not wish to be made to say that I ever knew of felt type. I have known of wood type as long as I can remember. I can't remember when I first saw hard
464 rubber type or type of rubber. All the type or engraving on any substance when used, as a rule, has been held together by some device for that purpose.

X Q. 40. How far back do you refer by saying as long as I can remember—what year?

A. I am fifty-three years old, nearly; I suppose I can remember since I was five or six years old, or seven or eight; I wouldn't pretend to fix the exact date when I first saw wood type; I suppose there is no question about the use of wood type long before I was born.

X Q. 41. This wood type was used how, in reference to the grain?

A. Generally endwise, I believe, but not always, however.

X Q. 42. Suppose that in the enlarged type receptacle spoken of, and made of steel, instead of pewter or lead, wood type had been used at one end of the receptacle and steel type at the other, in place of using all steel type, in the year 1850; in your opinion, and with your knowledge of the state of the art, would that have been a mere formal or substantial change?

A. My opinion is, in view of my knowledge of the state of the art, that would be a substantial change, particularly if there was any good, new, and valuable end gained by such new combination.

X Q. 43. Suppose that wood type had been substituted wholly for steel type in that year, in the case put in last question, would that have been a formal or a substantial change?

A. I do not think that would have been a substantial change, steel type and wood type being known at that time; the use of either would be nothing more than a mechanical change, but the ground of substantiality given in my last answer was based on another consideration therein stated.

X Q. 44. Look at Defendant's Exhibit 147, and state what makes you think that Fig. 3 of the drawings shows on the acting face of the
465 canceler a much broader exterior segmental guard or gauge than is represented in the model, Defendant's Exhibit 148?

A. I offered to correct, and requested to correct, an error in my answer in regard to Fig. 3, in my direct examination, and the counsel for the defendant picked me up short, and would not allow me to do it, but said that he wished to question me and would do so when he would come to cross examine me on the error that I at the time saw, and expressed outside of the record; I remember of a quite long questioning on a similar error made in my first direct examination in this case, and I wish now to make the correction clearly and distinctly, and at the time (it seems to be) craved for my correction, that I may save the record from being encumbered at this time, as it was at the previous time, and in a manner, I hope, entirely satisfactory to the counsel and all concerned; if Fig. 1 of the drawings is observed, it will be seen that the canceling edges or rings appear to stand in a considerable distance from the extreme diameter, and the guard is represented by the letter *e* in Fig. 3, *e* being on the white or broad band like space represented in the drawing of the canceler; I took that broad space or belt running around the knife edges, instead of the narrower and dark or ink belt, to represent the guard, which was an error, and which error I desired to correct as quick as discovered, and I now make that correction to govern the answers given in which the error occurs; nevertheless, taking the size of the drawing and the size of the model, the segmental guard or gauge *e* is proportionately broader without and within the circular knife edges in the drawing, Fig. 3, than in the model, Defendant's Exhibit 148; and the same is true in regard to the outer gauge as shown in Fig. 1; in Fig. 2 the inner gauge is larger than in the model; with this statement, which I believe to be correct, I believe my direct testimony is entirely true and correct.

466 X Q. 45. When, in your direct examination, did you offer to make the correction with reference to questions and answers subquent to the answer in which the error was made? I refer to your answer to question 9 of your direct examination, where you say Fig. 3 of the drawings being a face view shows a much broader gauge * * * than is indicated in the model, Defendant's Exhibit 148.

A. Before giving my answer to the next question, and before it was read to me; that is my recollection.

X Q. 46. Did you discover your error before any suggestion about it was made to you by anybody?

A. No.

X Q. 47. Who made such suggestion, if anybody?

A. Mr. Norton, I think; and the error was in taking the broad space outside of the dark line surrounding the knife edges in Fig. 3, on which the letter *e* will be seen, which letter represents the gauge or guide.

X Q. 48 and 49. In the specifications of the patent, Defendant's Exhibit 147, Mr. Norton says that the nature of his improvements "also consists in the employment and combination of a canceling stamp *with a cutting and inking device thereon*, with a postmarking or rating stamp, etc."; look at the model of that patent, Defendant's Exhibit 148, and state what part of the canceler is the inking device; the italics in the quotation are mine.

(Complainant's counsel objects to the question on the ground that the quotations made in the question are neither correct nor truthful quotations. And second, defendant's counsel has no right to put a construction on any part of the patent by interlining or underscoring any part of it.)

467 A. Will you please to let me take the patent and read a little and look at the drawings before giving that answer; my impression is that the ink would be likely to be carried with the cutting edges; possibly it might be on the gauge or guards.

X Q. 50. I wish you to answer for the present with reference to the model alone.

A. I gave my last answer, and repeat the request.

X Q. 51. Will you tell me whether in the model, Defendant's Exhibit 148, you find any inking device in the canceler?

A. No; nevertheless if there was an ink pad on which the canceler was struck with the post-office marker, the circular knife edges would be inked, indeed the whole face of the canceler would be likely to be inked, and if it were, when struck on to the postage-stamp sufficiently to cut the same through, I think the stamp would be impregnated with ink, and in that sense it would become an inking device, though that I regard as a secondary or accidental part of the operation; my recollection of the specifications is, as I read the same, that the cancellation is a cutting cancellation.

X Q. 52. Are not the inside and outside segmental bands in that model inking devices?

A. In the sense and with the explanation given in my last answer they are, and so are the knife edges.

X Q. 53. Have you given your testimony with reference to this patent on the construction thereof, that from the specifications, drawings, and model, the inside and outside segmental bands were inking devices designed to make corresponding circular segmental ink marks on the postage-stamp?

A. The testimony will speak for itself; my recollection is that I have not, but have always spoken of these segmental guides, gauges, or bars as a protection against deep cutting.

X Q. 54. The specification also has the following words: "The nature of my improvements consists in so constructing canceling stamps that the same shall cut the postage-stamp or any stamp similar
468 thereto, without injury to the contents of the envelope or packet enclosed therein, and *at the same time cause a heavy circular mark upon the inside and one upon the outside* of that part of the stamp or letter frank canceled by the cutting device, *so that postage-stamp or letter frank shall readily show cancellation in ink.*" The italics in the quotation are mine. Please state whether that part of the specification affects the testimony you have given at all.

(Objected to, first, because the quotations said to be made in question are nowhere to be found in the patent to which counsel refers, because of the changes which counsel himself admits to have made in those quotations; second, counsel for defendant has no right in any manner to change the specifications, or any part of them; and third, were the quotations correct and truthful, they neither agree with the drawings or model, which clearly and distinctly show, as the court can see, and as the witness has testified, fall back from and above the acting surface of the post-dating device, and were therefore never intended for the purpose indicated in the question.)

A. I think not. I don't pretend to recollect all that I have said, but I know that I have regarded the instrument having the knife edges as a cutting canceler in contradistinction to an inking canceler in view of the words of the specification and the illustrations in the drawings, and that while, as I have said before (I think repeatedly), there would be ink carried with the cutting edges and with the surfaces of the gauges or guides, to a greater or less degree, probably according to the character of the ink used and the softness of the pad on which the post office marker and canceler might be pressed or struck, the whole face
469 of the instrument would be more or less inked, and, as your quotation indicates, there would doubtless be ink marks plain and distinct on the postage-stamp which was canceled by the knife edges cutting through the same; the unreliable and unsatisfactory cancellation by ink under the most favorable circumstances seem to have been fully appreciated, and I think clearly indicated by the inventor in the words of the specification from which you have quoted in your question; and I think it is evident that the inventor has put himself clearly on record that at the time when he drew that specification, that the cancellation of postage-stamps by ink was a defective cancellation, and the stamps could be fraudulently used again the second time, by simply washing off the ink or removing it by some chemical preparation, and that he proposed to give the public a post-office marker and postage stamp canceler, that would effectually stop the fraud on the Post Office Department by a second use of postage-stamps; and to accomplish that very desirable end, he proposes to make incisions into and through the postage-stamps, but not through the envelope or into the contents of the envelope, but in doing that he knew that there would be ink put on to the stamp, as a consequence of the manner of using the same in combination with the post-office marker, and that if there was any advantage in an ink cancellation he would have that to some extent as a consequence to the manner of using his combined instrument; but as I understand the invention to be set out, explained, and illustrated, these broad lines of ink, if they occur, do so wholly as a result of the manner of use of the combined instrument, and not as an essential part of the invention, which is an instrument so far as the cancellation is concerned

for cutting the postage-stamp and canceling thereby, so that it would not wash out or wash off.

Adjourned to Saturday, June 22, 1878, at 10 a. m.

470 NEW YORK, *Saturday, June 22d*, 1878—10 o'clock a. m.

Met pursuant to adjournment.

Present, counsel as before.

Cross-examination of SAMUEL P. KITTLE continued by SAMUEL B. CLARKE, esq., of counsel for defendant.

X Q. 55. The specifications of the patent, Defendant's Exhibit 147, also has the following words: "I construct the canceling stamp of steel of any size required in diameter, *and in length to correspond to and with the post-marking or rating stamp (D)*; and on the face of this canceling stamp I construct circular knives or cutters (*i, i, i,*) Figs. 2 and 3, which project somewhat below the face of the marking or rating stamp (D), Fig. 2, so as to give a somewhat harder impression, and in advance of that given by the said stamp (D), whereby the postage-stamp or frank upon which the same is used *is cut* through, *and at the same time make the bread dark lines* (*o, o,*) *on the inside, and the broad dark circular lines* (*e, e,*) *on the outside thereof, and which said circular lines are seen at Fig.* 3"; the italics in the quotation, except in the case of the words "is cut," are mine. State whether that part of the specification affects your testimony at all.

(Complainant's counsel objects to the question, and interposes the same grounds of objection to it as have been interposed by him to several questions of a similar character during the cross-examination of this witness.)

A. No; and I continue the quotation, taking it up where you leave off, as a reason for the answers given: "That part of the cancel-
471 ing stamp which makes the circular lines (*o* and *e*), Figs. 2 and 3, is made *somewhat below* the surface or the immediate edge of the said knives or cutters (*i*), and *serve as guides to prevent the said knives or cutters from cutting through* the postage stamp or frank, and the envelope containing the same, whereby *injury to the letter or contents within the envelope* or packet is prevented"; the italics are my own; so that I think the view I have taken is correct, to wit, these broad faces, as they are termed, that produce the dark lines, are gauges or guides that are absolutely necessary to prevent the most pernicious and destructive consequences, and the fact that they take up and impart ink type-like is a consequence or result of secondary or minor importance, if they do it at all practically, which, in my opinion, they do not with the construction described; that is to say, I do not believe that the invention described can be worked practically according to that description, for were those cutters to be driven through to the extent that the dark lines would be clearly and positively imprinted from contact with the guides or gauges heavily impressed or struck thereon, then the sharp edges or knife-cutters, in my opinion, would be driven through the postage-stamp, the envelope, and into or through its contents; furthermore, were the instrument made in pursuance to the specifications and drawings, Defendant's Exhibit 147, or like the model, Defendant's Exhibit 148, and the knife edges were driven through the postage-stamp, envelope, etc., to the extent that would with certainty imprint the dark lines referred to from the face of the guides or gauges, the operation would be pernicious and the instrument be worthless; without measuring to a mathematical certainty, if the eye is passed across the face

of the model, Defendant's Exhibit 148, and a sheet of paper is held up near by, it will be readily seen that a blow of sufficient force to
472 drive the knife edges through paper sufficient, which would be at least three or four layers of the thickness of ordinary paper, so as to bear with sufficient force on the canceling stamp to impart the distinct broad lines referred to, great damage would be liable to the contents of the envelope; besides, by applying a straight edge to the face of the postage marker of Defendant's Exhibit 148, it will be seen that it is impracticable to imprint the post-office mark and the broad line in the entire circumference of the postage-stamp canceler, as that part of the canceler stands materially below the corresponding part of the post-marker; and the same would be true if the other canceler (which hangs at the side in the exhibit) were in place, as by actual measurement they are the same height; and furthermore, by observing Fig 1 or Fig 2 of the drawings, the same peculiarity of construction will be found to exist; therefore, I again say that the description in regard to the dark bands or cancellation by ink is erroneous, notwithstanding I find it in the specification, as before stated; or in other words, it is a defective descripti n or specification, and the operation of the instrument would produce what I have described it, a cutting cancellation in distinction from an ink cancellation; and notwithstanding there might be ink carried by the knife edges to some extent, and possibly the broad lines spoken of in the specification might be found in some cases, chiefly, I think, however, on the extreme outside of the canceler, opposite the post-office marker; now, that my view may be fully understood, I will suppose the sharp edges to extend below the face line of the post-office marker, and the gauge or guide faces to be on a plane with the post-office marker, and that the edges are of the breadth or depth represented in the model, Defendant's Exhibit 148, and illustrated in the drawings, Defendant's Exhibit 147, and that the instrun ent so constructed were used in the ordinary way that post-marking and postage-stamp canceling instruments are now used, in my opinion, the knife edges
473 would not be imbedded sufficiently to cut through the postage-stamp, unless extraordinary force was given to the blow, or these knives were sharper and thinner than is contemplated or illustrated by the Patent Office Exhibits; therefore, I conclude again that the broad marks spoken of would not appear in such a construction and use.

Redirect-examination:

By Mr. NORTON:

R. D. 56. On your cross examination you have stated that, as far back as you can remember, you saw devices like Defendant's Exhibit 169 in several places, and on sale, and that they were generally well known, or substantially so. I desire you now to state whether, during that period, you saw any shirts or other clothing with postage-stamps on canceled by the use of an instrument like this one that was produced by the defendant's expert?

A. No.

R. D. 57. Did you ever see during that time any postage stamps that had been canceled by the use of a turtle, or a turtle used for that purpose?

A. No.

R. D. 58. Did you ever hear for that purpose of any such previous to the testimony of the defendant's expert?

A. No.

R. D. 59. In case the sharp edges in the cutting canceling device found

in Defendant's Exhibit 148 should retain ink after being struck upon the inking pad spoken of by you, would or would not that ink slide upward on the vertical-like surfaces of those knives at the time of their piercing the postage-stamp, if they pierce at all, at the time of giving a postmark on the envelope?

(Objected to as immaterial, and as not a proper redirect question.)

474 A. The ink probably would be pressed up as the knife entered the postage stamp, at the same time there doubtless would be some ink left on the canceled stamp.

R. D. 60. At the point where the piercing takes place?

A. On the margins of the cut.

R. D. 61. In using ink for the cancellation of postage-stamps by means of a instrument such as is represented by Complainant's Exhibit B, and Defendant's Exhibit 149, which are now shown you, would or would not the enameled or ink surface of the postage-stamp be somewhat disturbed or marred by means of the flat acting face of such canceling devices coming in forcible contact with such enameled or ink surface, and such postage-stamp be somewhat impregnated with the canceling ink carried upon such acting face by the blow given to the whole instrument at the time of giving the post-mark on the letter envelope?

(The same objection.)

A. Yes; the blow unquestionably would break the enamel to some extent, and the body of ink carried by the broad surfaces of the canceler would percolate or be absorbed more freely on that account.

R. D. 62. You may state, in view of your last answer, whether such cancellation as that spoken of in your last answer would or would not, in your opinion, be a perfect cancellation of the postage-stamp, and that, too, without injury to the letter envelope or its contents.

(The same objection.)

A. It would probably be as perfect a cancellation of the postage-stamp as could be had with any given ink.

475 R. D. 63. In answer to cross-questions 48 and 49 you stated to counsel for defendant that before giving your answer to that question you desired him to allow you to "take the patent and read a little and look at the drawings;" state whether he acceded to your requst on that and subsequent occasions in his cross-examination.

A. He did not. I had not the patent to refer to or refresh my recollection from, until answering the last cross-question No. 55, by the defendant's counsel.

R. D. 64. Where was the patent at the time you were answering?

A. The defendant's counsel had it.

R. D. 65. If I understand correctly your evidence on your cross-examination, I understand you to say, in substance, and to give as your opinion as an expert, that the canceling device found in Defendant's Exhibit No. 148, consisting of sharp edges, cutting knives with segmental guards in combination with those knives, to be useless, pernicious, mischievous, and worthless in practice or in practical use; am I correct in this understanding; and, if not, state wherein, and why not?

(Objected to as leading.)

A. I think the instrument is an impractical one for the purpose intended, to wit, postmarking and postage-stamp canceling. I doubt whether any modification that was not substantial could make it a practical instrument; it cannot be operated practically and according to the description of the patent, Defendant's Exhibit 147, in my opinion. I think if the canceler should be lengthened so as to accomplish all that is claimed for it, or set out in the specification, it would be sure to

cut through the envelope or packet into the contents, and being
476 made as represented it fails utterly to do what is claimed for it, in my opinion; furthermore, I do not believe, with the information I now have, that cancellation by knife edges of any form on a postage-stamp is possible without carrying with it fatal objections.

SAMUEL P. KITTLE.

Subscribed and sworn to before me this June 22, 1878.

JOHN A. SHIELDS,
Examiner, etc.

Adjourned to Tuesday, June 25, 1878, at 9.30 a. m., on motion of defendant's counsel.

NEW YORK, *Tuesday, June 25th*, 1878—9.30 o'clock a. m.

Met pursuant to adjournment.

Present, counsel as before.

EUGENE G. DOANE, a witness produced on the part of the complainant, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Eugene G. Doane; I am forty-four years of age; I reside in Jersey City, and I am a clerk in the New York City post-office.

Q. 2. State how long you have been a clerk in the New York City post-office.

A. Between twelve and fourteen years.

Q. 3. State what your duties are at the present time in the New York City post-office.

A. Changing the stamps, and stamping myself once in a while, when I get the chance.

477 Q. 4. What kind of stamps do you change, and what is the stamping referred to in the last answer?

A. The stamps I change are the new fashion stamps we have, with the screws like Defendant's Exhibit B, changing the dates and the time of day; the time of day we change every half hour; the month every month, and the day every day, once a day.

Q. 5. I now show you three exhibits, two already marked—the first, "Complainant's Exhibit, New York," and the second "Complainant's Exhibit, New York," and each "J. A. S., examiner, June 19, 1878;" take them and examine them, and state, if you know, where those envelopes were postmarked, and when, if you know?

A. This, No. 1, was postmarked in the domestic part of the general post-office, New York City, on the 26th of February, at five o'clock p. m.; this one, No. 2, was postmarked in the domestic part of the general post-office, New York City, on the 11th of May, at 11.30 p. m.; the third one was postmarked in the domestic part of the general post-office, New York City, on the 4th of February, at 11.30 a. m.

(Complainant's counsel offers the one designated as the third one in the witness's answer as "Complainant's Exhibit No. 3, New York, J. A. S., examiner, June 25th, 1878.")

Q. 6. Look at these exhibits again, if you please, and state for about what length of time, if you know, has that mode or manner of post-marking letter envelopes, and the cancellation of postage-stamps thereon, been carried on in the New York City post-office?

(Objected to on the ground that complainant should have put in his evidence of infringement before he rested his prima facie case,
478 and that this is not a proper question for this rebuttal.)

A. I should say between two and three years, as near as I can come at it.

Q. 7. Do you know who is the chief or head stamping clerk in the domestic division of the New York City post-office, for postmarking and postage canceling of letters?

A. Myself, Eugene G. Doane.

(Complainant's counsel offers these three exhibits above referred to in evidence, as they are at present marked, for the purpose of illustrating to the court the manner of postmarking on the envelope, and at the same time cancel the postage stamp in the New York City post-office.)

EUGENE G. DOANE.

Subscribed and sworn to before me this June 25, 1878.

JOHN A. SHIELDS,
Examiner, etc.

Adjourned to Wednesday, June 26th, 1878, at 10 a. m., by consent.

NEW YORK, *Wednesday, June 26th*, 1878—10 o'clock a. m.

Met pursuant to adjournment.

Present, counsel as before.

Adjourned, by consent, to Thursday, June 27th, 1878, at 10 o'clock a. m.

479 NEW YORK, *Thursday, June 27th*, 1878—10 o'clock a. m.

Met pursuant to adjournment.

Present, Hon. George H. Williams, of counsel for complainant; Samuel B. Clarke, esq., of counsel for defendant.

MARCUS P. NORTON, Esq., a witness produced on the part of the complainant, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Marcus P. Norton; I am 48 years of age; I reside at the city of Troy, N. Y., and am a lawyer by profession and practice.

Q. 2. Reference is made in the bill in this case to a declaration of trust, signed by William W. Secombe, bearing date on the 4th day of March, 1871, and delivered by him to Helen M. Ingalls; do you know what has become of that declaration of trust?

(Objected to on the ground that no evidence having been given on that matter in complainant's prime facie case, and none in the defense, it is now too late in this rebuttal to take it up.)

A. I do.

Q. 3. State what you know about it.

(The same objection.)

A. At the time of the making of the settlement with Mr. Secombe, spoken of in my testimony delivered in Troy, before Mr. Brown, as special examiner in this case, Mr. Secombe required that the
480 original declaration of trust made by him to Miss Ingalls should be surrendered to him. It was so surrendered to him. I personally delivered it to him and he accepted it.

Q. 4. Have you seen it since, or do you know where it is?

A. I do not know where it is, and I have seen it but once since the time of that settlement, and that was soon after its delivery to him.

Q. 5. Look upon the paper which I now show to you, marked Norton, A, E, O, and state what it is, and where and when you obtained it, if you obtained it at all.

A. I have examined that paper. It is a copy of the deed or declara-

tion of trust from Mr. Secombe to Miss Ingalls, and referred to by me in my testimony this morning; I obtained this copy from Mr. William W. Secombe; the time I do not now remember, but believe it to have been not long after the settlement spoken of.

(Paper offered in evidence and marked Complainant's Exhibit, Norton, A, E, O, June 27th, 1878, J. A. S., Ex'r.

Objected to: First, on the ground above stated; second, because a sufficient foundation for secondary evidence has not been laid; third, because it is not proved to be a copy by the person who made it, or by any one who has compared it with the original.)

Cross-examination:

By Mr. CLARKE, of counsel for defendant:

X Q. 6. Whose handwriting is that copy in?

A. I do not know; I have never seen it anywhere, excepting in this paper.

481 X Q. 7. How do you know the paper is a true copy?

A. By comparing it with the original with Mr. Secombe, the original then being in Mr. Secombe's possession.

X Q. 8. Who is Charles P. Barnard, and where is he?

A. Charles P. Barnard is a retired merchant, I think, and resides in the city of New York, on some street opposite Gramercy Park; the street I do not now remember, and he is the same person who witnessed the assignment in trust by Miss Ingalls to Mr. Secombe, of which the original of this paper was and is a part.

X Q. 9. What did his business use to be, and where was it carried on?

A. I only know about that from Mr. Barnard; I never was personally acquainted with him until after, as I understood from him, he had retired from business. Since that time I have understood that he had been in business again on Broadway, in this city, and that was the glove and corset business; whether he is in that business now, or not, I do not know.

X Q. 10. On what side of Gramercy Park did Mr. Barnard live, and how near the park, and when?

A. I think he told me that he was boarding on the west side of Gramercy Park, and that was about a year ago.

X Q. 11. Did you ever know of his ever living near Gramercy Park?

A. Only what he told me.

X Q. 12. When did you see him last?

A. I saw him last in this city within a month after M. William W. Secombe died, which was, if I am not mistaken, in September last. Mr. Secombe died at the Westminster Hotel.

X Q. 13. Where did you then see him, Mr. Barnard?

482 A. I met him on the horse cars on the Broadway and Seventh Avenue railway cars, passing University Place, in this city; he was then on his way to his residence, as he told me.

X Q. 14. Whereabouts on Broadway did he carry on the glove and corset business, if you know?

A. I don't know the number; it was on the east side, not far from the St. Nicholas Hotel, and in a new store built there within three or four years, and I only know that from what Mr. Barnard himself told me. Mr. Barnard was a personal friend, and, if I am not mistaken, a relative of Mr. Secombe's.

X Q. 15 .In whose handwriting is the endorsement "Norton," A. E. O, on the back of that paper?

A. I don't know for certain; but can give my opinion about it.

X Q. 16. I want your opinion as to whose handwriting it is, if you know the handwriting of the person who you think made it.

A. My opinion is that it was written by Judge Williams, counsel in this case.

X Q. 17. When, and for what purpose, if you know?

A. I don't know when, and if he wrote it, I suppose it must have been for the purpose of making it an exhibit in this case.

X Q. 18. When did you last see the file of your caveat of 1853 in the Patent Office?

(Objected to this question on the ground that it does not relate to the subject of the direct examination, and is new matter, and if the counsel proceeds in the examination, he must consider Mr. Norton as his own witness as to such new matter.

Defendant's counsel states that Mr. Norton having been called as a witness for complainant at Troy, and having testified about that
483 caveat, he now intends to cross-examine witness further in regard to it, he having been recalled by the complainant.)

A. The last time that I was in the city of Washington Judge Williams and myself went to the Patent Office and saw the Commissioner of Patents; Mr. Williams enquired for that file, and the Commissioner of Patents sent for it, and we saw it in the Commissioner's room, and in his presence; I have not seen it since then, and that was during the time that the defendant was taking testimony in Washington last spring; I don't remember the exact time; I think it was in the month of March or April.

X Q. 19. Did the file then contain the "additional paper" of August 7, 1854?

A. It contained a paper of that description.

X Q. 20. In your handwriting?

A. In my handwriting.

X Q. 21. When was that paper made by you?

A. During the pendency of the application by Shavor and Corse for the reissue of the original patent mentioned in the bill in this case, on the reissue of which this suit is founded; that was in the summer of 1864, and it was used in that application for that reissue, and it belongs in that reissue file, and that copy is a true and correct copy of the original paper made and signed by me on the 7th day of August, 1854, at Tinmouth, Vermont, and by me sent to the Patent Office by mail from that place, at that time.

X Q. 22. I understand you to mean "that the additional paper" which was in your caveat file last spring was not made by you in the year 1854, and was not made until about ten years later; is that correct?

A. My last answer explains that.

X Q. 23. That paper is not in your handwriting, as you wrote in the years 1853 and 1854, is it?

484 A. It is not.

X Q. 24. But is in your handwriting, as you wrote in the year 1864, is it?

A. I can't say about that; I think it is, however; I was sick at the time I wrote it; I drew it from a certified copy of the Patent Office of the original papers then in my possession; I don't think it will vary much from my handwriting at that time.

X Q. 25. Are your present answers on this point substantially the same as your sworn answers to the charges made against you by Commissioner Leggett?

A. So far as the matters mentioned in that paper, I have no doubt that they are substantially the same.

Redirect examination:

By Hon. GEORGE M. WILLIAMS, of counsel for complainant:

R. D. 26. When, to your knowledge, was the question first raised in the Patent Office as to the time when that "additional paper" in the caveat of 1853 was filed?

A. I never heard or knew anything about it until on the morning that M. D. Leggett, then Commissioner of Patents, handed to me a paper signed by him attempting to disbar me from practising before him as Commissioner of Patents, and that paper I now have in my possession, and that was either in August or September, 1871.

R. D. 27. Were you notified by Leggett that you were disbarred from the Patent Office before any charges against you were made or filed, or any proceedings were had in reference to such charges?

(Objected to as immaterial.)

A. Yes, sir; and that was in writing, and not otherwise.

485 R. D. 28. Prior to that time, were not the files of that caveat referred to in legal proceedings, and certified copies made by the Patent Office, without any question as to the correctness of those files?

(The same objection.)

A. Yes, sir; on several occasions, in the Patent Office, in applications for patents and reissue of patents by myself, they were so used and referred to; and in the courts of the United States they were twice so used and referred to, and I never heard or knew in any manner whatever about there being any trouble whatever about this or another caveat of mine, until Mr. Leggett handed me his written order of disbarment from practising.

R. D. 29. Was there a certified copy of "that additional paper" used in the case of Shavor and Corse vs. The United States, in the Court of Claims?

(The same objection.)

A. Yes, sir; the same identical certified copy caveat filed in this case by the complainant was used in that court and in that case.

R. D. 30. Do you know who abstracted the original "additional paper" referred to from the files of your caveat of 1853 and substituted therefor the copy to which you have referred?

A. I do not.

R. D. 31. Did you do it, or cause it to be done?

(Objected to as assuming it was done.)

A. I did not; and for aught I know that paper may still be somewhere in the Patent Office, and as to that I know nothing.

R. D. 32. When this question was raised as to a change in the files of your caveat of 1853, was there pending between you and other
486 parties controversies in the Patent Office as to your rights under your patent of 1863 and other patents?

(Objected to as immaterial.)

A. There was no controversy in the Patent Office at that time with reference to the patent of 1863; but there had been outside of the Patent Office with reference to that patent; there was a controversy in the Patent Office at that time, and for several months previous thereto, with reference to my patent of January 14, 1862, upon revolving date wheels; that controversy was with a person by the name of Thomas J. W. Robertson, who has been examined as an expert in this case on the part of the defendant.

R. D. 33. Who were the principal parties in the contest outside of the Patent Office with you about the patent of 1863?

(The same objection.)

A. Jeremiah D. Green, Charles Eddy, Jacob Shavor, Albert C. Co se, and Frederick G. Ransford, all of the city of Troy, N. Y.; Peter Low, then of Cleveland, Ohio, and William B. Hatch, of the city of New York, were the principal parties.

R. D. 34. Did Jeremiah D. Green claim to be at that time a patent agent or lawyer, and was he in the habit of frequenting the Patent Office?

(The same objection.)

A. He claimed to be a patent agent, and he was frequently in the Patent Office, and signed and filed in the Patent Office several papers adverse to myself, and claimed to be the agent or attorney of the parties I have above named, both in the Patent Office and out of it. I would like to add one more name to my last answer; that name is Silas
487 H. Sweetland, who then resided at the city of Washington, and who acted in concert with Jeremiah D. Green as agent or attorney for the parties above named.

R. D. 35. Certain papers have been filed in this case by the defendant, showing that some sort of an investigation was made in the Patent Office on charges made against you; was the evidence in that case by witnesses who were examined and cross-examined, or did it consist of ex parte affidavits?

(The same objection.)

A. Almost all of the so-called evidence produced before the Commissioner at the time mentioned in the question was by ex parte affidavits, which I never saw or knew anything about until they were turned out of a basket on to the table before the three persons appointed by the Commissioner to conduct those proceedings, and those persons I did not know who they were to be until I saw them seated at one side of a long table to commence those proceedings; the evidence I have reference to in this answer is that furnished by the Commissioner of Patents at that time to sustain his so-called charges.

R. D. 36. Did you have any opportunity to cross-examine those witnesses?

A. I did not.

R. D. 37. Did you ask to have the witnesses brought before those examiners, so that you might examine or cross-examine them, and what was their ruling on the subject?

(The same objection.)

A. I not only asked that as my right, but I asked permission to go to the residences of those parties and take their testimony before a
488 commissioner; both of these applications were refused by the then Commissioner of Patents, and I was told they would spend no time in any such manner.

R. D. 38. Were any of those affidavits made by any of the persons whom you have named in this deposition?

(The same objection.)

A. There were.

R. D. 39. State all you know about it.

(The same objection.)

A. Peter Low made one; Jacob Shavor made one; Frederick G. Ransford made one; the last two were in the handwriting of Jeremiah D. Green, and some paper, either a statement or an affidavit, was made by Mr. Green and read on that occasion; whether that was filed in the

case or not I don't know, because I applied for a certified copy of it and it could not be found, but I have certified copies of the other affidavits.

R. D. 40. Had you reason, then, to believe, and do you believe that M. D. Leggett, then Commissioner of Patents, was your personal enemy at that time?

(The same objection.)

A. I then had reasons to believe that he was a personal enemy of the most malignant kind, and I have never seen the time since that I have not believed him to be such.

R. D. 41. Was a certified copy of that "additional paper" in your caveat of 1853 used in the case of Shavor and Corse against Hoole?

(The same objection.)

489–499 A. I was a witness in that case and read from the witness stand a duly certified copy of that caveat, including the "additional paper," dated August 7, 1854.

R. D. 42. Did you, on that examination of charges before referred to, make any application as to calling witnesses for yourself; and, if so, what was said and done about it?

(The same objection.)

A. I made such an application and personally made a long argument showing the reasons why my application should be granted; that application was refused; I thereupon asked the Commissioner of Patents to call a Mr. Cranch as a witness; that he refused; Mr. Cranch was a keeper of the secret archives of the Patent Office in which my caveats were filed, and at that time was in the Patent Office building.

MARCUS P. NORTON.

Subscribed and sworn to before me this June 28, 1878.

JOHN A. SHIELDS,
Examiner, etc.

Adjourned to Saturday, June 29th, 1878, at 10 o'clock a. m.

NEW YORK, *June 29th*, 1878—10 o'clock a. m.

Met pursuant to adjournment.

Present, Marcus P. Norton, esq., of counsel for complainant, and Samuel B. Clarke, esq., of counsel for defendant.

500 MARCUS P. NORTON, Esq., recalled by the complainant, testifies as follows:

Q. 43. Have you heretofore been examined in this case as a witness before this examiner; and, if so, were you sworn?

(Defendant's counsel objects to this witness being examined for the third time in this case; also objects to his acting as counsel and witness at the same time.)

A. I have been examined as a witness, and was sworn.

Q. 44. State, if you know, the reason why Judge Williams, complainant's counsel, is not here to day.

(The same objection, also as immaterial.)

A. Judge Williams stated to me night before last, at the Metropolitan Hotel, in this city, that professional engagements in Washington, D. C., imperatively required his presence in Washington on Friday morning, and he left that evening for that purpose, and requested that I should conduct the proceedings to the close of the examination before this examiner.

Q. 45. Look at two papers attached together in one package, and

marked Complainant's Exhibits Norton, Nos. 10 and 12, and state what they are, if you know, and for what purpose they were prepared.

(The same objection.)

A. The exhibit Complainant's Exhibit Norton, No. 12, is an original affidavit made by myself on the 22d day of August, 1871, at the city of Washington, District of Columbia, before Chas. Cons.
501 Callan, a notary public, then residing in that city; it was made by me for the express purpose of explaining to the Patent Office the nature and character of a paper which on that day I was to offer for record in that office. On that day I went to the Patent Office with the paper which I desired to be entered on the records, and also with this affidavit, showing that the paper I offered for record was but a copy of an original paper that had been used in the files of my application for a patent on wheel dating stamps, and dated January 14, 1862, which, I found on inspection of those files, the said original paper had disappeared therefrom. My purpose in recording that paper was to preserve it by record, so that if the copy I then had should afterwards disappear from the then pending application for a reissue of the patent above named, I would then have a record in the Patent Office for any purpose that might be required under that patent. This affidavit to which I now refer as Complainant's Exhibit Norton, No. 12, I also desire to have recorded, together with the paper I then on that day offered for record; the application to have this affidavit recorded, as I have stated, was refused; the other paper was received for record and the fees paid upon it, and the record of it was promised me; a day or two after the record of that paper was refused, and the paper was retained by the Commissioner of Patents. The Complainant's Exhibit Norton, No. 10, is an affidavit made by the notary public before named by me, for the purpose of showing that on the 22d of August, 1871, I made the affidavit (Complainant's Exhibit, No. 12) before him and under his official seal, and also to show that I explained to him the purposes to which I intended to use the affidavit, Complainant's Exhibit Norton, No. 12. This affidavit Exhibit, Norton, No. 10, was made by Chas. Cons. Callan, the notary public above referred to, on the 14th day of September, 1871, under the seal of and before H. Clay Johnson, a notary public
502 then residing at the city of Washington. These two affidavits I offered to use before the Commissioner of Patents, or the commissioners appointed by him to hear and determine certain charges which that Commissioner had preferred against me, in writing, some time in September, 1871; that offer was refused, and I was denied the privilege of reading and filing these affidavits on that occasion, which, had I been permitted to have done, would have fully and entirely explained my conduct in offering to have the paper above referred to entered of record in the United States Patent Office. That paper which I then and there offered to record on the 22d August, 1871, was wholly and entirely in my own handwriting, on clean new paper, and the ink had not set in its color at the time when I offered it for record; the folding of that paper in the usual way was of such very recent date, at that time, that when it was put down on a table without any band on it, it would partially open or spring apart. Every part of that paper, including the paper itself, the writing, and the folding of it, would show to any man then living on God's green earth—unless he were a fool, knave, or a scoundrel—that it was a copy, and only a copy, of some paper.

(The last part of answer objected to as irresponsive.)

Q. 46. Look at a paper marked Complainant's Exhibit Norton, No. 14,

and state, if you know, what it is, and for what purpose it was prepared.

A. This paper, Complainant's Exhibit Norton, No. 14, was prepared by me before 9 o'clock on the 23d of August, 1871, in the city of Washington, D. C.; it is a communication addressed to the then Commissioner of Patents; it relates to an application then pending for a reissue of my letters patent on revolving dates, dated January 14, 1862; it also refers to and relates to the paper that I have above
503 referred to as having been offered by me for record in the Patent Office on the 22d of August, 1871, and explains the reasons and the purposes I had in view in offering that paper for record; it also relates to and refers to my affidavit of explanation dated the 22d of August, 1871, and now Complainant's Exhibit Norton, No. 12; it also asks for and demands of the Commissioner of Patents an interference case between the pending application for a reissue of my patent dated January 14, 1862, and the letters patent granted to T. J. W. Robertson dated September 22, 1857, and also with "a certain patent granted upon Marcus P. Norton's application for a patent, which is dated August 9, 1859," each containing the same identical invention. On the morning of the 23d of August, 1871, I took this paper to the United States Patent Office, expecting to obtain the paper that I had offered for record the day before, and together with my affidavit, Complainant's Exhibit Norton, No. 12, to place each of these papers on file in the United States Patent Office in my application then pending for a reissue of the patent of January 14, 1862. On making application for that paper which I had offered for record the day before, for the purposes above stated, I was told by the clerk to whom I applied that the Commissioner of Patents had refused to allow it to be recorded, and that the Commissioner desired to see me at his room. I immediately went to the Commissioner's room, and after having said to him "Good morning, Mr. Commissioner," he handed to me, without returning my morning salutation, a paper, which I now hold in my hand and will read:

"DEPARTMENT OF THE INTERIOR, PATENT OFFICE,
"*Washington, D. C., Aug. 23d*, 1871.

504 "Until further orders, Marcus P. Norton will not be permitted to examine any papers, look into any file, or transact any business in the Patent Office except by and through some respectable and accredited attorney.

"M. D. LEGGETT,
"*Commissioner of Patents.*"

And I ask to have this paper marked Complainant's Exhibit Norton, No. 16, J. A. S., ex'r, June 29, 1878. On the back of Complainant's Exhibit Norton, No. 14, there is an affidavit made by myself on the 14th of September, A. D. 1871, under the seal of and before Chas. Cons. Callan, notary public, the person above referred to as having made the affidavit Complainant's Exhibit Norton, No. 10, and before whom I made the affidavit Complainant's Exhibit Norton, No. 12. This affidavit explains itself, and I desire to have it marked Complainant's Exhibit Norton, No. 18, J. A. S., ex'r, June 29, 1878.

Q. 47. State, if you know, where the papers marked Complainant's Exhibit Norton, No. 10, No. 12, No. 14, No. 16, and No. 18 have been since the respective dates thereof.

(The same objection.)

A. They have been in my possession since that time and until this present time.

Q. 48. Look at a paper dated United States Patent Office, Washington, D. C., October 22, 1872, and state what it is, if you know.

A. It is a letter addressed to W. W. Secombe, No. 7 Park Place, New York City, signed M. D. Leggett, Commissioner, which I will read:

"U. S. PATENT OFFICE,
"*Washington, D. C., Oct.* 22, 1872.

505 "SIR: In your letter of the 5th inst., calling for copies, you request among others 'duplicates of M. P. Norton's affidavits filed in explanation and defense of charges preferred against him by the Commissioner of Patents, etc.' In reply I have to say that no such papers were filed by him, his defense being verbal. The other copies called for have been sent.

"Respectfully,

"M. D. LEGGETT,
"*Commissioner.*

"W. W. SECOMBE, Esq.,
"*No. 7 Park Place, New York City, N. Y.*"

And I desire to have this marked Complainant's Exhibit Norton, No. 20. J. A. S., ex'r, June 29, 1878.

Q. 49. State where you obtained the paper marked Complainant's Exhibit Norton, No. 20.

(The same objection.)

A. It was delivered to me by W. W. Secombe some time in the fore part of Nov., 1872, and has been in my possession ever since that time until the present time.

Complainant's counsel now offers in evidence, and for the purposes of evidence, the following several papers, to wit, Complainant's Exhibit Norton, No. 10; Complainant's Exhibit Norton, No. 12; Complainant's Exhibit Norton, No. 14; Complainant's Exhibit Norton, No. 16; Complainant's Exhibit Norton, No. 18, and Complainant's Exhibit Norton, No. 20, each of which have been referred to and testified about by the
506 witness now on the stand, and complainant's counsel requests that the marking and filing by the examiner stand upon each paper as made by the examiner during the progress of the examination of this witness.

Complainant's counsel here, and at all times, reserves the right to withdraw from the files of this court these several original papers, when this court shall have determined the issues involved in this cause.

Defendant's counsel objects to each of the papers. First, that it is immaterial; second, that it is not properly proved.

Complainant's counsel here produces in evidence a certified package of several papers with drawings thereto attached, from the files of the United States Patent Office, in the matter of the application of Marcus P. Norton and C. A. Haskins, filed Oct. 15, 1857, for hand printing stamps, which several papers were certified to by J. M. Thatcher, Acting Commissioner of Patents, under the date of Oct. 19, 1872, and are under one certificate and seal of the United States Patent Office, which package is here marked Complainant's Exhibit Norton, No. 22, J. A. S., Examiner, June 29, 1878.

Complainant's counsel here states that he here offers this package of several papers and drawings for the purpose of showing to the court

that the same identical invention and improvement described in the "additional paper," dated August 21, 1855, filed in Marcus P. Norton's caveat of June 21, 1855, and referred to by the Commissioner of Patents in the written charges preferred by the Commissioner
507 of Patents against the said Norton in the Patent Office, on or about the 29th August, 1871, is contained in the drawings and description of this application filed in the United States Patent Office about two years subsequent to the date of the caveat of, on, or about the 21st June, 1855, and extending into the year 1856, and about fourteen years previous to the so-called charges made by M. D. Leggett, in 1871, as Commissioner of Patents.

And also to show to the court that the same invention that was patented to T. J. W. Robertson, the defendant's expert witness in this case, is also contained in this certified package of papers and drawings filed in the United States Patent Office about twenty days subsequent to the date of Robertson's said patent.

And also to show to this court that, had the defense in the case of T. J. W. Robertson against the Secombe Manufacturing Company been properly and truthfully presented, not only in the evidence but in the argument in that cause before Judge Blatchford, that that able and upright judge might have, and in all probability would have, been saved the casting of reflections upon the said Marcus P. Norton, in his written decision in that case.

And also to show that that judge was imposed upon in that case both by the complainant and defendant with reference to that caveat, and the "additional paper" therein contained, then and there examined and passed upon by him in his said decision. That for some cause
508 the real facts and the truth concerning that caveat and said "additional paper" were withheld from the consideration and examination of that judge.

Complainant's counsel states that he offers this for no other purpose than substantially as above stated, because it has nothing whatever to do with the letters patent upon which this suit is founded, or with the caveat of October, 1853, or the "additional paper" in that caveat, dated August 7th, 1854.

Complainant's counsel here offers in evidence, and for the purposes of evidence, the above-named package of several papers and drawings, certified to under the seal of the Patent Office, and by the Acting Commissioner of Patents, on the 19th of October, 1872, as before stated, and which has been marked by the examiner "Complainant's Exhibit No. 22, J. A. S., Ex'r, June 29, 1878," and requests that the marks above quoted may stand as they appear on the exhibit to designate it as the exhibit contained in this offer.

(Objected to as immaterial.)

Q. 50. State where, and of whom, if from anybody, you obtained that package of certified papers just marked by the examiner as "Complainplainant's Exhibit Norton, 22, J. A. S., Ex'r, June 29, 1878," and the circumstances, if any, under which you obtained it.

(The same objection.)

A. I obtained this package of papers at the city of New York, from William W. Secombe, about the time that he settled the matter of
508*a* differences between himself and myself, and with Miss Helen M. Ingalls, and reassigned and reconveyed to her each and every patent that had been assigned by her in trust, either to him or to the "Secombe Manufacturing Company," which was some time in the year 1873, if I am not mistaken.

MARCUS P. NORTON.

Subscribed and sworn to before me, this June 29th, 1878.

JOHN A. SHIELDS,
Examiner, etc.

Complainant's counsel here offers in evidence a certified copy of an assignment recorded in Liber O, 22, page 12, signed Jacob Shavor and Albert C. Corse, to Charles Eddy, of the city of Troy, N. Y., and dated the 18th of December, A. D. 1876, and certified to under the seal of the United States Patent Office by W. H. Doolittle, on the 17th of May, 1878, consisting of four sheets of paper, besides the Patent Office certificate, and asks it to be marked Complainant's Exhibit Shavor, Corse, and Eddy, J. A. S., Ex'r, June 29, 1878.

(Objected to as immaterial.)

Complainant's counsel offers in evidence a package of several papers from the records of the Patent Office, under one seal and certificate of the United States Patent Office, dated 22d of August, 1871, which certificate is in the following words and figures, to wit:

The United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files
508*b* of this office of the caveat of M. P. Norton, filed June 21st, 1855, for railroad ticket printing press. In testimony whereof, I, M. D. Leggett, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed, this 22d day of August, in the year of our Lord one thousand eight hundred and seventy one, and of the Independence of the United States the ninety-sixth.

[L. S.] M. D. LEGGETT,
Commissioner.

The first paper under the above-named certificate is a petition to the Commissioner of Patents, by Marcus P. Norton, and is dated Tinmouth, Vt., June 4th, 1855.

The second paper is a specification signed Marcus P. Norton, and entitled "Subjoined Description of Railroad Ticket Printing Press."

The third paper is an oath made by Marcus P. Norton, on the 11th day of June, 1855, at Tinmouth, Vt., and before George Capron, jr., a justice of the peace.

The fourth paper is a letter from Marcus P. Norton to the Commissioner of Patents, dated August 10, 1870.

The fifth paper is entitled as follows, to wit: "Additional paper to Railroad Printing Press." It is dated Tinmouth, Vt., August 21st, 1855, and is addressed to the Commissioner of Patents, and signed Marcus P. Norton.

The sixth paper is a letter addressed by Marcus P. Norton to the Commissioner of Patents, and is dated Tinmouth, Vt., August 21st, 1855.

509 The seventh paper is a paper signed T. J. W. Robertson, asking the Commissioner of Patents to furnish him with a copy of the caveat of Marcus P. Norton, for railway ticket printing press, dated June 21st, 1855, and also Marcus P. Norton's consent thereto, dated August 5th, 1871.

The eighth paper is a paper representing what is known as the file wrapper of the above-named caveat.

Complainant's counsel asks to have the above described package of

papers marked Complainant's Exhibit Norton's Caveat, dated June 21st, 1855, and it is so marked, J. A. S., Examiner, June 29, 1878.

(Defendant's counsel objects to the above-described papers as being immaterial.)

Complainant's counsel reserves the right to withdraw the above-named paper from the files of this court, after this court shall have heard and determined the issues involved in this suit.

Complainant's counsel also offers in evidence a package of several papers, namely, of sixteen separate and distinct papers in writing, under one seal and certificate of the U. S. Patent Office, and of J. M. Thatcher, Acting Commissioner of Patents, under the date of the 19th day of October, A. D. 1872. The certificate to said package of papers reads as follows:

"To all persons to whom these presents shall come, greeting:

"This is to certify that the annexed is a true copy from the files of this office of the file wrapper and contents in the matter of letters pat-
510 ent granted Marcus P. Norton, assignor to himself and Charles Eddy & Company, dated January 14th, 1862, No. 34184, for hand stamps for post-office. In testimony whereof, I, J. M. Thacher, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed, this 19th day of October, in the year of our Lord one thousand eight hundred and seventy-two, and of the independence of the United States the ninety-seventh.

[L. S.] "J. M. THACHER,
"*Acting Commissioner.*"

Complainant's counsel asks to have the above-described package of several papers marked Complainant's Exhibit, file wrapper and contents of Norton's letters patent of January 14th, 1862, and the same is so marked, J. A. S., Examiner, June 29, 1878.

Defendant's counsel objects to the above-described papers being received in evidence on the ground that they, and each of them, are immaterial.

Complainant's counsel here states that the rebuttal proofs on the part and behalf of the complainant, in answer to any testimony that has been already taken by the defendant, is now closed.

Complainant's counsel, however, reserves the right to call as a witness D. D. Beeby, of Hudson, Ohio, Jacob Schwartzenburg, formerly of Cleveland, Ohio, and George H. Haskell, now residing at Cleve-
511 land, Ohio; and also the right to recall James R. Haskell, a witness in this case for the complainant; and also the right to call as a witness James Welsh, now residing in the State of Ohio, in case complainant's counsel shall deem it best so to do.

Adjourned sine die.

512 United States circuit court for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust,
vs.
THOMAS L. JAMES, U. S. POSTMASTER, NEW York.

SOUTHERN DISRTICT OF NEW YORK, *ss:*

I, John A. Shields, an examiner duly appointed by the circuit court

of the United States for the southern district of New York, do hereby certify that the several witnesses named in the foregoing depositions appeared before me on the days therein specified, and each of said witnesses being by me first duly sworn to tell the truth, the whole truth, and nothing but the truth in said entitled cause, gave the testimony which is herein contained. That said testimony was reduced to writing in the presence of said witnesses, and from their statements, by a clerk duly appointed by me for that purpose, and after the same had been carefully read over to said witness, they severally subscribed the same.

I further certify that Marcus P. Norton, esq., of counsel for complainant, and Samuel B. Clarke, esq., of counsel for defendant, were present at the examinations.

JOHN A. SHIELDS,
Examiner.

513 CHRISTOPHER C. CAMPBELL, COMPLAINANT,
versus
THOMAS L. JAMES, DEFENDANT.

IMPEACHMENT.

Complainant's sustaining testimony.

Complainant's testimony in support of and sustaining the character of Marcus A. Norton, for truth and veracity, he being a witness called and examined on the part and behalf of the complainant.

Infringement of Marcus P. Norton's letters patent, dated April 14th, 1863, No. 38175, and last reissued in two divisions, A and B, October 4th, A. D. 1870, for improvements in post marking letters or other mail matter, and in cancellation of postage-stamps thereon.

514 Circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMP'T AND ASSIGNEE IN TRUST,
vs.
THOMAS L. JAMES, DEF'T AND U. S. P. M. AT the city of New York.

To STEWART L. WOODFORD,
United States attorney and solicitor for defendant, New York:

SIR: You will please to take due notice, and notice is now and hereby given to you, that on the 31st day of July, A. D., 1878, at 10 o'clock in the forenoon of that day, and before Irving Browne, esq., a special examiner of this court, duly and regularly appointed by the order of this court, upon the written stipulation of counsel for both complainant and defendant in this cause, I shall proceed to take testimony at the office of said Irving Browne, on First street, in the city of Troy, county of Rensselaer, and State of New York, in support of the character of Marcus P. Norton for truth and veracity, a witness for complainant in this cause, whose character for truth and veracity you have attacked. You are requested to be present on that occasion, and to cross-examine

such witnesses as I shall then and there produce, as well as to
515 attend to the examination of any other matter in rebuttal proof in this cause of any proof produced by you, etc. You are also hereby notified that I shall continue examination from time to time, until I shall have examined such number as I may deem best to call and examine on this question of your attempted impeachment of Norton.

Respectfully, etc.,

MARCUS P. NORTON,
Complainant's Solicitor, Troy, N. Y.

Dated July 27, 1878.

(Endorsed:) In the circuit court of the United States, southern district of New York. In equity. Christopher C. Campbell vs. Thomas L. James. Notice of time and place for taking of proof on the part of complainant. Marcus P. Norton, complainant's solicitor, Troy, N. Y.

Due personal service of the written named notice is hereby admitted this 27th day of July, A. D. 1878.

STEWART L. WOODFORD,
U. S. Att'y and Def't's Sol.

516 I hereby certify that the foregoing is a correct copy of the notice of examination and admission of service thereof filed with me in the above-entitled cause.

IRVING BROWNE,
Special Examiner.

(Title.)

Proof final hearing for pl'ffs at Troy, July 31, before Irving Browne.

Present, Norton & Clark.

LUTHER GREENMAN, a witness called on behalf of the claimant, being duly sworn, testifies:

Q. 1. What is your name, age, residence, and business?

A. Luther Greenman is my name; I was born in 1821, fifty-seven years old; my residence is 69 North Second street, Troy, N. Y.; and my business is the furniture business, at 345 River street.

Q. 2. How long have you resided in the city of Troy?

A. Well, it is about thirty-two years; I can't tell within a few years; it is about that.

Q. 3. About how long have you been in the furniture business in this city?

A. About twenty-five years.

Q. 4. Have you, or have you not, been extensively engaged in that business in this city?

A. I have.

Q. 5. Do you know Marcus P. Norton, of the city of Troy?

A. I do.

Q. 6. About how long have you known him?

A. Well, I have known him from twenty to twenty-two years.

Q. 7. What has been his business in this city, so far as you have known it?

A. Well, he was a lawyer by profession.

Q. 8. Have you ever had any business dealings with him?

A. I have.

517 Q. 9. About how frequent or extensive, as near as you can now remember?

A. Well, I have had business transactions with him to large amounts from my first acquaintance with him; for, say the past six years, I have not had much business with him; my business transactions extended through a period of about sixteen years.

Q. 10. Have you the means of knowing his character in this city for truth and veracity?

A. Yes; perhaps I might qualify that a little by saying that I have as good an opportunity, perhaps, of knowing as anybody.

Q. 11. From your knowledge of his character and from your business transactions with him, would you believe him under oath?

(Objected to on the ground that it is not competent to ask the witness a question on the basis of his personal dealings with Mr. Norton, and also because it asks the witness' opinion on the basis of his personal knowledge of Mr. Norton.)

A. I would.

Q. 12. Do you consider his character for truth and veracity good or bad?

A. Good.

Cross-examination:

By Mr. CLARKE:

X Q. 13. What do you understand by the term "character"?

A. Well, now, a man's reputation is what I call character.

X Q. 14. What is a man's reputation?

518 A. The question is, what is a man's reputation, is it? Well, I should call a man's reputation his character.

X Q. 15. How do you determine what a man's reputation is?

A. Well, I form my conclusion of a man's reputation and character by dealings and business transactions with him, and if I find them all well, honorable, upright, square, and manly, I call that man an honorable, upright man.

X Q. 16. Do you, for that reason, say his reputation is good?

A. I do.

X Q. 17. Do you let anything else influence you in making up your mind whether a man's reputation is good or bad, besides your personal dealings with him?

A. No; I should not let anything else influence me with a man that I know to be an honorable and upright man.

X Q. 18. When on your direct examination you said that Mr. Norton's character was good, did you base that conclusion on your knowledge of him personally?

A. Yes.

X Q. 19. Did you base it on anything else?

A. No, sir.

X Q. 20. You relied entirely on your personal acquaintance and dealings with him; is that it?

A. I relied entirely on my personal acquaintance and dealings with him and his good character.

X Q. 21. Do you know what has been currently said about Mr. Norton in this community for the last ten years or so?

A. No, I don't.

X Q. 22. You have never heard anything said about Mr. Norton for the last ten years?

(Objected to unless the question is confined to the matter of truth and varacity.)

519 A. I have not.

(In view of the answer the objection is withdrawn.)

X Q. 23. Are you sure of that?

A. Not to my knowledge.

X Q. 24. Did you ever hear his character for truth and veracity discussed or talked about?

A. I don't know that I ever did.

X Q. 25. Would you remember it if you had?

A. I think I would.

X Q. 26. Mention the name of any person whom you know to be acquainted with Mr. Norton.

A. Mr. Browne, the examiner.

X Q. 27. Any other, not in this room?

A. Esek Cowen, his old law partner.

X Q. 28. Did you ever hear Mr. Cowen say anything about Mr. Norton's truthfulness?

A. I never did.

X Q. 29. Did you ever hear him speak of Mr. Norton?

A. I don't know that I ever did in the world; I don't know that I ever spoke to Mr. Cowen, and I don't know but I have.

X Q. 30 Suppose that it was generally said of a man in the community that he was untruthful; and suppose that you had had extensive personal dealings with that man, and he had always treated you fairly and honorably, would you say that his reputation was good or bad as regards truth?

A. Well, a man that I have dealt with for years for large amounts, and his transactions were all honorable, upright and manly with me, and I never had found an untruthful thing in him; I should call him a man of truth and veracity, notwithstanding what others might say about him.

X Q. 31. You would say his reputation was good?

A. I should.

520 X Q. 32. And you would believe him on oath as readily as you would another man against whom nothing has been said, would you?

A. I would.

X Q. 33. Even though his testimony were in direct conflict with what that other man said?

A. Yes; I would believe him as quick as the other man.

X Q. 34 What was the nature of your business dealings with Mr. Norton, which were so extensive for twelve or fifteen years?

A. Selling him furniture for his house and offices, and doing work for him appertaining to my business.

X Q. 35. Anything else?

A. No, I never did any other business outside my business; nor he for me.

Redirect:

By Mr. Norton:

R. D. 36. Did Marcus P. Norton, during the years you have named, and so far as you know, do a successful and lucrative business in his profession in this city?

(Objected to as immaterial, because the witness is not shown to have any basis of personal knowledge about it.)

A. Well, judging from the office room that he had, and the desks, and the splendid furnished offices that he had, I should say that he did.

L. GREENMAN.

Subscribed and sworn to before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

521 JAMES A. LAWSON, a witness called on the part of the complainant, being duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation?

A. J. A. Lawson; age, 52; stove manufacturer; residence, Troy, N. Y.

Q. 2. About how long have you resided in Troy?

A. About twenty-two years.

Q. 3. About how long have you been engaged in the business stated by you in answer to question one?

A. Nearly twenty years.

Q. 4. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 5. About how long have you known him?

A. About eighteen years.

Q. 6. Have you had any business transactions with him within that time?

A. I have.

Q. 7. Have you the means for knowing his character for truth and veracity?

A. From my knowledge of business affairs with him, I have.

Q. 8. Do you consider his character for truth and veracity good or bad?

(Objected to as immaterial, and because a proper basis is not laid for the question, and because it is designedly ambiguous.)

A. Good.

Q. 9. From your knowledge of his character, would you believe him under oath?

(Same objection, and as immaterial and irrelevant.)

A. I would.

522 Cross-examination:

By Mr. CLARKE:

X Q. 10. What firm in this city are you connected with?

A. Fuller, Warren & Co.

X Q. 11. What business dealings have you had with Mr. Norton within the last eighteen years?

A. Employing him for the purpose of getting out patents.

X Q. 12. Have you had any other business with him?

A. Nothing that might be considered of any account.

X Q. 13. Did you employ him to get out many patents?

A. I did; through Fuller, Warren & Co.

X Q. 14. Is he now your patent solicitor, or is he of that firm?

A. He is not.

X Q. 15. When did he last get out a patent for you?

A. I think it was in 1867 or '68.

X Q. 16. Have you employed him since?

A. I have not, to my recollection.

X Q. 17. Why did you cease to employ him?

A. Having do occasion for his services.

X Q. 18. Has anybody else done the business for you which Mr. Norton did for you previous to 1867 or '68?

A. No.

X Q. 19. Or like business?

A. No.

X Q. 20. In answer to question 7, you say you have the means of knowing what Mr. Norton's character for truth and veracity is; what are those means?

A. The answer to question 7 would answer that, "as far as my knowledge of business with him went."

523 X Q. 21. I understand you to mean that your means for knowing his character for truth and veracity are your own business dealings with him?

A. That is what I wish to convey.

X Q. 22. In making up your mind as to what his character for truth is, do you allow anything to influence you except your personal dealings with him?

A. I do not.

X Q. 23. Are you sure of that?

A. I shouldn't expressed it if I hadn't been.

X Q. 24. Those business dealings ceased ten or twelve years ago.

A. I think it was ten years.

X Q. 25. You do not allow what is currently said in the community as to Mr. Norton's character for truth and veracity to influence you at all in determining whether his character is good?

A. I was not aware that there was such a report current in the community, and of course, it would have no influence on my decision.

X Q. 26. Does what is currently said in your mind influence you at all in determining whether a man's character is good?

A. I was not aware that there were such current reports, and would not allow them to influence me if there were.

X Q. 27. Have you ever heard anybody say anything about Mr. Norton within the last ten years or so?

A. Yes.

X Q. 28. Did what was said relate to his truthfulness at all?

A. It did not.

X Q. 29. Have you ever heard his character for truth discussed at all?

A. I have no remembrance of any such discussion.

X Q. 30. About how frequently have you heard him spoken of within the last ten years or so?

524 A. But very little.

X Q. 31. State, in a general way, what you have heard within that time relating to him.

A. My knowledge of his truth and veracity has been received through other parties without any knowledge of my own.

(Answer objected to as irresponsive.)

X Q. 32. Please answer my last question.

A. I have heard remarked in conversation or report that they would not believe him under oath. It is so long since I heard anything about it that I don't remember the times or persons, and that was in relation to some suit in which Mr. Norton was interested, and I could not give the particulars of that.

X Q. 33. You have heard people say that they would not believe Mr. Norton on oath?

A. I have heard such reports in the manner before spoken of.

X Q. 34. Do you recollect whether those statements were made by people whom you regarded as respectable and trustworthy?

A. I don't now remember the persons who made these statements.

Redirect examination:

By Mr. NORTON:

R. D. 35. On your cross-examination you have spoken of the firm of Fuller, Warren & Co.; is not that house one of the most extensive houses in that business in this city or this part of the country?

A. It is so considered.

JAMES A. LAWSON.

Subscribed and sworn to before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

525 CALVIN S. SILL, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation.

A. My name is Calvin S. Sill; my age, 55; my residence, Troy, N. Y.; my occupation, a merchant.

Q. 2. About how long have you resided at the city of Troy?

A. Thirty-five years.

Q. 3. About how long have you been a merchant in the city of Troy?

A. Twenty-eight years.

Q. 4. Your place of business is on Broadway in this city; is it not?

A. It is.

Q. 5. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 6. About how long have you known him?

A. Personally about twelve years.

Q. 7. What has been the occupation of Marcus P. Norton during that time, so far as you know about it?

A. A lawyer.

Q. 8. Have you had business transactions with him in the line of your business?

A. I have.

Q. 9. Covering about what length of time have you had such business transactions with him?

A. Twelve years.

Q. 10. Have you the means of knowing his character for truth and veracity?

A. I have.

Q. 11. Do you consider his character for truth and veracity good or bad?

A. Good.

Q. 12. From your knowledge of his character, would you believe him under oath?

526 (Objected to on the ground that an improper basis is put, and that it is decidedly ambiguous.)

A. I would.

Q. 13. Would you believe him under oath?

(Objected to as immaterial and irrelevant.)

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 14. What kind of merchandise have you dealt in for the past twelve years?

A. Drygoods.

X Q. 15. What business relations have subsisted between you and Mr. Norton during that time?

A. I have sold him goods.

X Q. 16. Is that all?

A. That's all.

X Q. 17. How large bills of goods have you sold him, on the average?

A. Well, from fifty to one hundred and fifty dollars.

X Q. 18. In answer to question 10, you say you have the means of knowing what Mr. Norton's character for truth and veracity is; what are those means?

A. Judging from business relations.

X Q. 19. Do you mean the business dealings you have had with him?

A. Yes, sir.

X Q. 20. Have you any other means of knowing what his character for truth and veracity is?

A. Nothing more than his social relations and his character as a gentleman.

X Q. 21. How do you know what his social relations and his character as a gentleman are?

527 A. Well, I have met him socially, himself and family, in my own family.

X Q. 22. I understand you to mean that you judge his character for truth and veracity to be good from your own business and social relations with him; is that it?

A. It is.

X Q. 23. Do you allow anything else to influence your judgment upon that point?

A. I do not.

X Q. 24. You do not allow what people say about Mr. Norton to influence you at all, in determining whether his character for truth and veracity is good; is that it?

A. I do not allow scandal or anything of that kind to influence me.

X Q. 25. Are things said in this community derogatory to Mr. Norton's character for truth and veracity?

A. I presume there is.

X Q. 26. Have you any doubt about it?

A. No, sir; no more than I have about any other man's character.

X Q. 27. You have no doubt that things are said against Mr. Norton's character for truth and veracity?

A. I have no doubt of it.

X Q. 28. Now, judging from what is said on that point, and not at all from your business and social connection with Mr. Norton, state whether you would believe him on oath in a case in which he was interested, and in which his testimony was in direct conflict with that of a man against whom nothing derogatory to his truthfulness is said.

A. I should believe him, for I never allowed gossip to influence me at all.

X Q. 29. You don't believe that where there is smoke there is fire?

A. That is not the question as I understood it; I do believe that;

528 I do not believe that calumniation injures a man's character directly when he is well known.

X Q. 30. Would you say that a man's character for truth was good if you had had extensive personal dealings with him, and social relations of long continuance, in which he always acted squarely and honorably, and if it was currently and very generally said in the community that he was untruthful?

A. I should believe a man to be truthful until he told me a lie.

X Q. 31. Should you say his character was good under the conditions put in the last question?

A. Current reports have no effect with me in judging of a man's character.

X Q. 32. Well, should you say his character was good under those circumstances?

A. I should; for I place no confidence in calumniation or gossip, as I said before.

X Q. 33. Should you say that his reputation as to truth was good under those circumstances?

A. I cannot judge for others; but common report has no effect upon me as regards a man's character.

X Q. 34. Well, should you say a man's reputation was good under those circumstances?

A. It would be good with me, notwithstanding; I do not judge for others.

X Q. 35. You would swear that it was good, would you?

A. I would for myself, but not for others.

CALVIN S. SILL.

Subscribed and sworn before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

529 ALBE C. DANIELS, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is A. C. Daniels; age, 67; residence, Troy, N. Y.; and occupation, furniture dealer.

Q. 2. About how long have you resided in the city of Troy?

A. Forty-five years.

Q. 3. About how long have you been engaged in the business mentioned in your first answer?

A. Forty-five years.

Q. 4. Do you know Marcus P. Norton, of this city?

A. Yes, sir.

Q. 5. About how long have you known him?

A. Fifteen years, and perhaps longer, I should judge. I don't recollect.

Q. 6. During that time have you had dealings and business transactions with him in the line of your business?

A. Yes, sir.

Q. 7. Have those transactions been frequent and in considerable amounts?

A. Yes, sir.

Q. 8. Have you the means of knowing the character of Marcus P. Norton for truth and veracity?

A. Well, I have had a good deal of business with him, and I have

never seen anything but what was square, so far as I had any dealing with him.

Q. 9. What has been his business in this city, so far as you know?

A. He has been engaged in Patent Office business—a lawyer.

Q. 10. From your knowledge of his character, would you believe him under oath?

(Objected to because a proper basis is not laid, and as immaterial.)

530 A. I should.

Q. 11. You have personally well known him during the time you have stated, have you not, both socially and in business transactions with him?

A. I have.

Cross-examination:

By Mr. CLARKE:

X Q. 12. What has been the nature of your business transactions with Mr. Norton?

A. Well, we have sold him a number of bills of goods. The most were sold him by the firm of Daniels & Hitchins. Some have been sold him by me since that firm dissolved.

X Q. 13. What means of knowing Mr. Norton's character for truth and veracity have you except your personal dealings with him?

A. Well, sir, he was a man, so far as I know, who always bore a good reputation until he got into trouble financially. I always heard him spoken of highly.

X Q. 14. When was it he got into trouble financially?

A. About five or six years ago.

X Q. 15. Did you ever hear it said that he was untruthful, or anything like that?

A. I never did until the last two years.

X Q. 16. Within the last two years, however, you have heard it said that he was untruthful, have you?

A. A man told me so.

X Q. 17. Have you heard it from more than one person?

A. I have no recollection of more than one man.

X Q. 18. Have you ever heard his character for truth discussed, besides that one case?

A. I have no recollection of any except that one instance.

531 X Q. 19. About how frequently have you heard anything said about Mr. Norton within the past six years?

A. I could not tell you, sir.

X Q. 20. Has what you have heard been favorable or otherwise, during that time, to his character?

A. In one case that I have spoken of the man spoke quite unfavorably of him.

X Q. 21 (22). Does Mr. Norton owe you anything?

A. Yes, sir.

X Q. 22 (23). How much does he owe you?

A. I think in the neighborhood of nineteen hundred dollars at the time of his financial troubles.

X Q. 23 (24). How long has that been drawing interest?

A. Well, I couldn't tell you. It became due some time after he failed; I could not tell you how long.

X Q. 24 (25). About how long has it been drawing interest?

A. Six, seven, or eight years.

X Q. 25 (26). Do you expect to be paid by Mr. Norton what he owes you?

A. I do, if he ever gets able to pay. I had so much confidence in him that I trusted him for over one hundred dollars after the note was protested for non-payment.

X Q. 26 (27). Has the note ever been renewed?

A. Yes, and been kept alive.

X Q. 27 (28). When was it last renewed?

A. I can't tell you.

X Q. 28 (29). Was it within a year?

A. No, sir.

X Q. 29 (30). Within two years?

A. No, sir.

X Q. 30 (31). When do you expect that Mr. Norton will be able to pay?

A. I hope that he will pay it this afternoon, but I don't expect that he will.

532 X Q. 31 (32). About when do you expect that he will pay?

A. I could not tell.

X Q. 32 (33). Has Mr. Norton made any representations to you as to whether he ever expected to be able to pay it?

A. He has told me once or twice that if he ever got able to pay it he should. I haven't spoken to him about it in five years, as I remember.

X Q. 33 (34). Has he spoken or written to you about it within that time?

A. No, sir; I don't think that he has.

X Q. 34 (35). Has he ever stated to you that he would be able to pay as soon as the post-office stamp matter was settled with the government, or substantially that?

A. I have no recollection of his ever saying that. If he did say so, he must have said it several years ago.

X Q. 35 (36). Have you any reason to suppose that he expects to make anything out of this case in which he is engaged?

A. Well, I have heard other people talk about it, and they all supposed that he was going to make some money out of it if the case was settled.

X Q. 36 (37). Is that what you suppose?

A. I have no reason to suppose anything about it. All that I know about it is what other people have said about it. About four or five years ago Mr. Norton gave me a pamphlet containing General Dix's statement as to the value of the stamp, and that is all I have read about it, except what I have read in the newspapers.

X Q. 37 (38). According to what you have read, the stamp is one of great value, is it not?

A. I should judge so, sir.

X Q. 38 (39). And you understand that Mr. Norton is the inventor and patentee of it?

A. I do.

533 Redirect examination:

By Mr. NORTON:

R. D. 39 (40). On your cross-examination you have in substance stated that in all this city you have heard but one man speak of the character of Marcus P. Norton, for truth and veracity, in terms unfavorable to him. Will you please state the name of that person?

A. His name is Ransford. I don't know his given name.

R. D. 40 (41). Were you present when a man by the name of Ransford was being examined as a witness for the defendant in this case, and before Mr. Browne, the present special examiner?

A. I was for a few moments.

R. D. 41 (42). Was that the person who spoke to you in terms defamatory to Norton's character for truth and veracity?

A. It was.

R. D. 42 (43). You have been interrogated by defendant's counsel as to Norton's indebtedness to you some years ago; have you that confidence in him so that you unqualifiedly believe that he will pay you every dollar of that indebtedness as soon as he is financially able to do so?

A. I do.

R. D. 43 (44). Has Norton ever asked you in any manner to compromise that indebtedness?

(Objected to as immaterial.)

A. Never has.

R. D. 44 (45). State, if you remember, what Ransford said to you; if you cannot give the language, give the substance of it.

A. He said that he could not believe a word he said. I said that I heard Norton had the inside of the track in the stamp matter,
534 and he replied, "he is such a liar that you cannot believe a word he says," or words to that effect.

R. D. 45 (46). Who, if anybody, was present on that occasion?

A. Captain Tupper—Captain L. H. Tupper.

Recross-examination:

By Mr. CLARKE:

R. C. 46 (47). When Ransford said Norton was a liar, did Captain Tupper say anything on that point?

A. I don't recollect that he said anything about, or anything derogatory to, the character of Norton.

R. C. 47 (48). Would you be likely to remember it if he had?

A. I think I should. We didn't talk anyway more than two or three minutes. This was on River street, opposite to the American Hotel, in this city.

A. C. DANIELS.

Subscribed and sworn before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

ALEXANDER M. KNOWLSON, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation?

A. Alexander M. Knowlson; age, thirty-six; residence, Troy, New York; occupation, apothecary and druggist.

Q. 2. About how long have you resided in the city of Troy?

A. About nineteen years.

535 Q. 3. About how long have you been engaged in the business stated by you in your first answer?

A. I have been in the business about nineteen years; for myself about fourteen years.

Q. 4. On what street is your store located in Troy?

A. No. 350 Broadway.

Q. 5. Do you know Marcus P. Norton, of this city?

A. Yes, sir.

Q. 6. About how long have you known him?

A. About eighteen years.

Q. 7. Have you had any business dealings or transactions with him within that time?

A. Yes, sir.

Q. 8. Have they or have they not been of frequent occurrence?

A. Of former years very frequent; of latter years not so frequent.

Q. 9. Have you the means of knowing his character for truth and veracity?

A. I think I have.

Q. 10. Do you consider his character for truth and veracity good or bad?

(Objected to on the ground that the proper basis for the question has not been laid, and as immaterial.)

A. That is, in my personal dealings with him, good. I consider it good.

Q. 11. From your knowledge of his character, would you believe him under oath?

(Same objection.)

A. Yes, sir; I would.

Cross examination:

By Mr. CLARKE:

X Q. 12. By what means do you determine what a man's character is?

536 A. By my dealings with him, or his dealings with me.

X Q. 13. Is it on the basis of those personal dealings that you say Mr. Norton's character is good, and on nothing else?

A. Yes, sir.

X Q. 14. What has been the general nature of your business with Mr. Norton?

A. I engaged him in general legal business, and to get out a patent, and his family purchased drugs of me.

X Q. 15. How long since he did any business for you, or you for him?

A. Well, he did business for me about ten or twelve years ago; I have sold him drugs within the last week.

X Q. 16. Have you ever heard anything said in regard to his being a truthful man, or an untruthful man?

A. Yes; I have heard said that he was untruthful.

X Q. 17. Have you heard that pretty often?

A. Not of late years; when I was a boy and a clerk in William E. Hagan's store, I heard much from Mr. Hagan against Mr. Norton, but about a year afterward Mr. Hagan turned around and spoke favorably of Mr. Norton, having changed his mind.

X Q. 18. About how long ago was it that you were a clerk in Mr. Hagan's store?

A. About eighteen years ago.

X Q. 19. Have you ever heard anybody else speak unfavorably of Mr. Norton in the same manner?

A. Yes, sir.

X Q. 20. About how many persons have you heard speak that way?

A. Oh, I don't know.

X Q. 21. Under what circumstances did you hear this?

A. Mr. Hagan used often to speak to his friends against Mr.
537 Norton, and they would just say "yes, yes," and "good bye"; Mr. Hagan at that time, for some cause, was very bitter against Mr

Norton; this was in Mr. Hagan's store, No. 10 State street, when I was a clerk; I have heard some lawyers, and others, also, speak against Mr. Norton, but it is so long ago I can't recall their names.

X Q. 22. From what you heard in Mr. Hagan's store, and otherwise, did you then gather that Mr. Norton's reputation for truth was then good or bad?

A. That you mean when Mr. Hagan had his trouble with Mr. Norton? From what I gained from Mr. Hagan, his reputation was bad; from what I gathered from outside it was good; and from what I gained from Mr. Hagan afterwards it was good for truth and veracity.

X Q. 23. The time I refer to is the time when you say that Mr. Hagan spoke against Mr. Norton often to his friends, and they coincided with him; state whether then you gathered it that his reputation was good or bad; did you then consider him to be a truthful man, from what you had heard?

A. I answered that question.

X Q. 24. Did you consider him to be a truthful man, then, from what you heard?

A. Yes.

X Q. 25. Why did you not then believe what you heard; did you know Mr. Norton personally?

A. I knew him personally, not at first, but at the ending up of the Groom case with Hagan.

X Q. 26. You said that you heard others speak against Mr. Norton's truthfulness; about how frequently was that, and what classes of men so spoke?

A. I don't think I have heard anything said against him more than once a year for the past five years; the class of men was those to whom Norton owed money.

X Q. 27. How often have you heard Mr. Norton spoken of in any way for the last five years?

538 A. Well, I can't tell; I have heard him spoken of every time there was an article in the paper stating that Norton's stamp case was coming up before a referee.

X Q. 28. About how frequently have those articles appeared for the last five years?

A. I can't tell, sir.

X Q. 29. Have there been any articles till within the past six months?

A. I should say yes.

X Q. 30. Have there been any articles till within ten months?

A. I can't tell, but I think there has.

X Q. 31. Did those persons who spoke about the stamp on the occasion of the articles in the paper, say anything about Mr. Norton's character?

A. No, sir.

X Q. 32. Have you, within the last five years, heard Norton spoken of on any other occasion than when articles appeared in the papers?

A. Not that I remember of.

X Q. 33. Do you not consider that what is currently said of a man affects his reputation?

A. I do.

X Q. 34. Do you know what is currently said of Mr. Norton as to truth?

A. No, sir; I don't know what they say about him, but I know what I believe about him.

Redirect:

By Mr. NORTON:

R. D. 35. At the time you speak of William E. Hagan's hostility to Mr. Norton, when his store was located on State street, in this city, was he not involved in some kind of litigation about a water stove for the application of superheated steam to assist combustion, with a person by the name of Groom, and his assignees, Jacob Shavor and Louis Potter?

A. Yes, sir; I believe he was.

539 R. D. 36. Did you not, by purchase, succeed William E. Hagan in the business in which you are now engaged in this city?

A. Yes, sir.

R. D. 37. About when was that?

A. About 1864; I am not sure.

A. M. KNOWLSON.

Subscribed and sworn to before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

GEORGE H. PHILLIPS, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation.

A. G. H. Phillips, Troy, N. Y.; occupation, a foundryman; my age, about 60.

Q. 2. About how long have you resided in the city of Troy?

A. About forty years.

Q. 3. About how long have you been engaged in the business stated by you in your last answer?

A. About twenty-five years.

Q. 4. Is that business carried on under a firm name?

A. It is.

Q. 5. What is that firm name?

A. For the first sixteen years it was Ingraham, Phillips & Co., the remainder of the time G. H. Phillips & Co., and this is the name now.

Q. 6. State whether the present firm is, or is not, extensively engaged in the business stated in your first answer?

540 A. It does a fair and moderate business, about one hundred and fifty thousand a year; there are some that do more, and some that do less.

Q. 7. Do you know Marcus P. Norton, of Troy?

A. I do.

Q. 8. About how long have you known him?

A. I think it is upwards of twenty years since I first made his acquaintance.

Q. 9. Have you during that time had business or business transactions with him?

A. I have had.

Q. 10. Have you the means of knowing his character for truth and veracity?

A. I have.

Q. 11. Do you consider his character for truth and veracity good or bad?

(Objected to because the proper foundation is not laid, and as immaterial.)

A. So far as my own dealing and acquaintance with him goes, it is good.

Q. 12. From your knowledge of his character, would you believe him under oath?

(Same objection.)

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 13. How do you determine what a man's character for truth is?

A. I judge from the deal that I have had with him.

X Q. 14. When you state that Mr. Norton's character for truth is good as regards truth, are you influenced at all by what is currently said about him?

A. Not at all.

541 X Q. 15. Do you think that a man's reputation is affected at all by what people say about him?

A. I should think that it would affect him in a measure.

X Q. 16. What is the speech of people, so far as you know it, as to whether Mr. Norton is a truthful man or not?

A. I have heard men speak unfavorably about him.

X Q. 17. In respect to truthfulness?

A. In respect to his fidelity to them; in respect to doing what he agreed.

X Q. 18. Did they say that he was untruthful, or substantially that?

A. No, sir; that they wouldn't trust him, that he was treacherous to them in a suit; I only heard one person say that.

X Q. 19. Have you heard anything else derogatory to his character for truth?

A. I have no knowledge of anything else.

X Q. 20. What has been the nature of your personal dealings with Mr. Norton?

A. He has been engaged in patent suits for me, and I have loaned him money frequently.

X Q. 21. When was the last time you had any transactions with him, about how long ago?

A. About a year ago; it may be a little longer.

X Q. 22. About how frequently have you heard Mr. Norton spoken of in any way, in the last five or six years?

A. A hundred times or more; I can't tell exactly.

X Q. 23. Was Mr. Norton's character discussed at all at those times?

A. Only in the matter of exorbitant charges.

X Q. 24. Does Mr. Norton owe you anything now?

A. He owes the firm with which I am connected.

X Q. 25. How much does he owe your firm?

A. I think it is less than one hundred and fifty dollars.

542 X Q. 26. Do you expect to be paid?

A. I certainly do.

X Q. 27. When?

A. Before the millenium.

X Q. 28. Has Mr. Norton made any representations to you or your firm as to when he would pay?

A. He has.

X Q. 29. What was that representation?

A. That he would pay me at a certain time.

X Q. 30. When did he make that representation to you?

A. When he got the money he failed to meet that representation.

X Q. 31. When did he get the money?

A. I think over a year ago.

X Q. 32. Has he made any representations since as to when he would pay?

A. He has, but not at any fixed time.

X Q. 33. What was that representation?

A. It is a sort of a general thing, the same as other customers, promising to pay when he was in funds.

Redirect examination:

By Mr. NORTON:

R. D. 34. On your cross-examination you have substantially said that you heard but one person say anything against the truthfulness of Norton, and that was "that he was treacherous to them in a suit." Please give the name of that person and what the suit was about.

A. I don't know what the suit was; it was a patent suit, and the man's name was Hermance.

R. D. 35. Who was or is this man Hermance, if you know, and what is his business?

(Objected to as immaterial.)

543 A. I don't know what his business is aside from selling dampers; he has been in to sell them to me. I don't know what business he is in other than selling these dampers.

R. D. 36. About how responsible is this man Hermance, so far as you know, in business or anything else?

(Same objection.)

A. I think his responsibility is very light and very "thin."

R. D. 37. You have said something about "exorbitant charges"; did you ever hear anybody complain that Norton didn't charge enough for his professional services?

A. I never heard anyone.

R. D. 38. In Norton's professional dealings with you in obtaining patents and reissue of patents, and as counsel or solicitor in suits, where you have been a party, was he ever treacherous to you or your interest in those matters?

(Same objection.)

A. Not to my knowledge.

R. D. 39. In such professional services, did you ever find him other than truthful, diligent, and trustworthy?

(Same objection.)

A. I don't recollect of any point. I don't remember any case where I would not trust him.

R. D. 40. In any case in which he was professionally engaged for you, did he ever fail of success on your part?

(Same objection.)

544 A. Well, I was thinking that there was one case, but I don't recollect.

G. H. PHILLIPS.

Subscribed and sworn to before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

R. HALSTED WARD, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation.

A. My name is R. Halsted Ward; my age is 41; residence, Troy; occupation a physician.

Q. 2. About how long have you resided in the city of Troy?

A. About sixteen years.

Q. 3. About what length of time have you been engaged in your profession in this city, and with whom have you been associated, if with any one.

A. Sixteen years, with Dr. Blatchford.

Q. 4. Dr. T. W. Blatchford was an eminent physician in this city, when you went into business with him, was he not?

A. He was.

Q. 5. Do you know Marcus P. Norton, of Troy?

A. I do.

Q. 6. About how long have you known him?

A. Fifteen or sixteen years.

Q. 7. Have you, since the decease of Dr. T. W. Blatchford, been the family physician of Marcus P. Norton?

A. Yes.

Q. 8. You have had business transactions with him during that time in the line of your profession, have you not?

545 A. Yes.

Q. 9. Have you the means of knowing his character for truth and veracity?

A. So far as I am able to judge from the above transactions.

Q. 10. Do you consider his character for truth and veracity good or bad?

(Objected to on the ground that the proper basis is not shown and as immaterial.)

A. In his dealings with me, it was always good until the closing up of his law business in this city by sheriff's sale.

Q. 11. From your knowledge of his character, state whether you would believe him on oath?

(Same objection.)

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 12. Did you base your answers on the direct examination in regard to Mr. Norton's character entirely on your personal dealings with him?

A. So far as I know, yes.

X Q. 13. How frequent have been your personal dealings with him within the last five or six years?

A. They were occasional; not as frequent as before.

X Q. 14. You have been a witness in this case for the defense, have you not?

A. Yes.

R. HALSTED WARD.

Subscribed and sworn to before me this 31st day of July, 1878.

IRVING BROWNE,
Special Examiner.

546 TROY, N. Y., *August 1st*, 1878.

Met pursuant to adjournment of yesterday.

Present, same counsel as before.

COLE H. DENIS, being called as a witness by the plaintiff and duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. I am 64 years of age last November; Cole H. Denis is my name; my occupation a lawyer; my residence in the village of Lansingburgh, N. Y.

Q. 2. Where is your place of business, and about how long have you been there?

A. My place of business is in the city of Troy, Raul's Hall; I have been there over sixteen years; the exact time I can't tell.

Q. 3. Are you now engaged in the practice of your profession in this city?

A. I am.

Q. 4. About how long have you been engaged in that profession in practice in the city of Troy?

A. Thirty years.

Q. 5. Do you know Marcus P. Norton of this city?

A. Yes, sir.

Q. 6. About how long have you known him?

A. I think it is over twenty years.

Q. 7. Do you remember a suit in the supreme court of this State, of Fleming against Beach, in which you were appointed referee by the court, and which was tried before you?

A. Yes; I remember it.

Q. 8. Do you remember the attorneys for the respective parties in that case?

A. Giles B. Kellogg was one of the attorneys for the defendant and John Moran was for the plaintiff.

547 Q. 9. Was Marcus P. Norton examined as a witness in that case?

A. He was.

Q. 10. If you know, state what his character is for truth and veracity in this city.

(Objected to as immaterial.)

A. Good, as far as I know.

Q. 11. Do you consider it good or bad?

(Same objection.)

A. I consider it good.

Q. 12. From what you know concerning his character for truth and veracity, and from all you ever heard said concerning him, would you believe him under oath?

(Objected to because the question includes, as a part of the basis for it, the witness' personal knowledge of Mr. Norton's character.)

A. I would.

Q. 13. In the case above referred to, when Norton was examined as a witness before you as a referee, did you then believe what he stated to you under oath?

(Objected to as immaterial.)

A. I did.

Q. 14. State, if you remember, the year in which that case was tried before you as referee, or about that time.

A. I think it's between three and four years ago.

Cross-examination:

By Mr. CLARKE:

X Q. 15. When were you you admitted to the bar?

A. In 1844; in the fall, I think.

548 X Q. 16. On your direct examination you stated that Mr. Norton's character was good, so far as you knew; what do you mean by character?

A. I mean, what people say of him, and what I know of him in the affairs of life, and sometimes what they don't say.

X Q. 17. Do you use the term character in the same sense as reputation?

A. In a certain sense it is the same, and in another sense not, perhaps; I may know that a man has a character for charity, while his neighbors may not know of him as having such a character; therefore he would have no reputation among his neighbors for charity; I know of a case where a man had the reputation of being mean, close, and parsimonious in money matters, and yet who is said to have assisted thirty young men to an education; here his character and reputation were two different things.

X Q. 18. Using the term reputation in the sense you have indicated in your last answer, state yes or no, whether you know Mr. Norton's reputation for truth in this community

A. Well, I can't say as I know, for I never heard anybody say anything against it particularly; that explains what I meant in my last answer by saying, "What they don't say about a man"; that is sometimes, I think, evidence of a good reputation.

X Q. 19. How many times, during the last ten years or so, do you think you have heard Mr. Norton spoken of in any way?

A. Oh, I can't say; it is impossible.

X Q. 20. Make a rough estimate, please.

A. I don't think I have heard his name mentioned frequently; I think occasionally.

X Q. 21. During the last five or six years?

A. Not quite so frequently as formerly, but occasionally I have heard his name mentioned in conversation; it was within that time that he was sworn before me in that case mentioned.

549 X Q. 22. How many people whom you had reason to think had had personal dealings with Mr. Norton have you heard speak of him within the last five or six years?

A. I can't say; I don't recollect distinctly but one whom I had supposed to have had personal dealings with him.

X Q. 23. How many the last ten years?

A. I can't tell.

X Q. 24. Can you swear that you have heard more than one speak of him within the last ten years?

A. Oh, yes; perhaps a dozen; I recollect William A. Beach spoke of him, and his ability in getting up affidavits, and also Mr. Beach, the plaintiff in this suit; and then I also heard him occasionally spoken of as being in Washington, or as engaged in carrying on some suit; and now I recollect another young man by the name of Scott, who used to be a draughtsman for him; I think he was here the other day from Bennington; and I think Charles Eddy, I had a conversation with him, what, I can't remember; I can't say how long ago it was; it was in relation to some patents he was getting or trying to get.

X Q. 25. Did any of the parties you have named say anything upon the point whether Mr. Norton was a trustworthy man?

A. I don't know as that came up; I think they spoke about his ability and luck in getting patents.

X Q. 26. On any of the occasions when you have heard Mr. Norton

spoken of, were the circumstances such that if Mr. Norton was esteemed by those persons to be untruthful, they would have been likely to have spoken to you on that point?

A. There is a difference of men on that point; some would be likely to speak of a man whom they found untrustworthy; I know I should; they employed him, and if they found he wasn't a truthful man,
550 I shouldn't suppose they would have employed him; I know I shouldn't expect to be employed if it was found that I wasn't truthful.

X Q. 27. If anything had been said against Mr. Norton being a man of truth, would you have been likely to have remembered it, do you think?

A. I think I should; yes.

X Q. 28. Do you know William E. Hagan?

A. Yes, sir.

X Q. 29. Did you ever hear anything about a case in which he and a man by the name of Groom were parties, and in which an attempt was made to impeach Mr. Norton's reputation for truth?

A. I don't now remember any such case; I remember a man by the name of Groom here, but I don't remember any such case; I don't call any such case to mind now.

X Q. 30. You were in Troy in 1863 and 1864, were you?

A. Oh, yes; for I was burnt out then.

X Q. 31. Did you ever hear of Mr. Norton being a witness in one of the trials following the assassination of President Lincoln, and of being impeached?

A. Never.

X Q. 32. Did you ever hear of Mr. Norton being debarred from practicing in the Patent Office, seven or eight years ago?

A. I heard something about his being debarred from the privileges of the Patent Office in examining papers; this I heard from the newspapers, but I know nothing of the grounds for this.

X Q. 33. Did you ever hear that Mr. Norton was indicted for crime in the District of Columbia?

A. No.

X Q. 34. If the several matters I have referred to had ever taken place, do you think that your association with Mr. Norton, and with others who know Mr. Norton, has been such since 1863 that you would have been likely to have heard those things?

551 A. Well, I can't tell about that.

X Q. 35. You are not sure that your association has been such that you would have been likely to have heard them?

A. They would have been likely to, if they felt disposed to tell me; they had opportunities sufficient, but I have never slept with any of them.

X Q. 36. Does Mr. Norton owe you any money?

A. No; I wish he did; for he would pay it if he could; the money burns in his pocket.

X Q. 37. Did you ever hear that Mr. Norton did not meet his engagements as to money matters?

A. Yes, I have heard of his not meeting some engagements.

X Q. 38. Is the complaint general or otherwise?

A. I don't know; I have heard of some engagements that he did not meet; I have heard of others that he did; I mean that he did not meet when they were due; whether he finally paid them or not, I do not know.

X Q. 39. Did you ever hear that he did not keep the promises made when he obtained money, by borrowing or otherwise?

A. I don't remember any instance of it, nor I don't remember but that the case I speak of was one of those, but I don't know anything about it.

X Q. 40. Do you know what Mr. Norton's reputation is for keeping his business engagements?

A. No, only as I have stated.

X Q. 41. State in a general way how much you do know about Mr. Norton.

A. I have known him as a lawyer practicing in the court; I have known him as a witness before me in the trial of a suit; I have known him by his reputation as a solicitor of patents; known him as a citizen who was flush with his money when he had it. Some years I have seen him every week probably; I never heard his character for truth and veracity called in question by anybody; I have known him by
552 his reputation as a man who spent his money without much judgment, and who, when he had money, was over liberal with it to a fault; that in consequence he was sometimes short.

X Q. 42. When were those years when you saw him every week?

A. I can't tell you now, but it was along in my first acquaintance, and when he was in Beach's house, I think; I used to see him on the street frequently, as I would anybody else who was not in the same building with me.

X Q. 43. How many times have you met him within the last ten years, on an average?

A. I couldn't give you any idea about it; I don't think I met him as frequently as I did before that.

X Q. 44. Was any attempt made to impeach Mr. Norton in the case of Beach and Fleming?

A. No, sir.

X Q. 45. When did Mr. Norton last settle up any debt which he owed you, if any?

A. When he was in Wotkin's block; I don't know how long ago it was; it wasn't a very heavy amount, any way; I think it was ten or twenty dollars.

C. H. DENIS.

Subscribed and sworn to before me this 1st day of August, 1878.

IRVING BROWNE,
Special Examiner.

JOHN HITCHINS, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Direct examination:

By Mr. NORTON:

Q. 1. What is your name, age, residence, and occupation?
553 A. John Hitchins; No. 96 First street, Troy; I am not in any business at present; I am now in my 65th year.

Q. 2. About how long have you resided in the city of Troy?

A. Well, it is forty-five years.

Q. 3. Were you formerly a member of the firm of Daniels & Hitchins, in this city, in the furniture and upholstery business?

A. Yes.

Q. 4. About how long since that firm was dissolved?

A. Nine years last March.

Q. 5. And thereupon you retired from active business, did you not?

A. Yes, sir.

Q. 6. Are you at the present time one of the board of directors of the National State Bank of this city?

A. Yes, sir.

Q. 7. About how long have you been a director in that bank?

A. Since its organization, twenty-six years next September; it started in September, 1852, I think.

Q. 8. It was first organized under the laws of the State of New York, was it not?

A. Yes, it was.

Q. 9. It afterwards became a national bank under the laws of the United States, did it not?

A. Yes.

Q. 10. And you have continued one of the directors under both organizations, have you not?

A. Yes, and am one of the discount committee at the present time.

Q. 11. You have been one of the discount committee for how long?

A. I don't recollect distinctly, but for about fifteen years.

Q. 12. Do you know Marcus P. Norton, of this city?

A. Yes.

Q. 13. About how long have you known him?

554 A. Well, I guess in the neighborhood of twenty years.

Q. 14. What has been his business, so far as you know?

A. He belonged to the legal profession, was a lawyer and counselor in the city of Troy.

Q. 15. Within the time you have stated, has he had an account in the bank of which you are one of its directors and one of its discounting committee?

A. I think he has; I am not conversant with the details of the books, but I think he has, and he was a customer at our bank.

Q. 16. Do you know of a single instance when he has asked a favor of your bank that it has been refused him?

(Objected to as immaterial.)

A. I have no recollection of it.

Q. 17. Have you the means of knowing his character for truth and veracity?

A. I think I have, to some extent.

Q. 18. Do you consider his character for truth and veracity good or bad?

(Objected to as immaterial, and as designedly ambiguous.)

A. Well, I consider it good.

Q. 19. From your knowledge of his character, would you believe him under oath?

(Same objection, and because the proper foundation is not laid for the question, and because the proper basis is not stated.)

A. Yes, sir; I have no reason to doubt but that I would believe him under oath.

Q. 20. While you were a member of the firm of Daniels & Hitchins, did or did not that firm have several business transactions with him in the line of their business?

555 A. Yes.

Q. 21. Covering a period of about how many years?

A. Well, I do not now recollect, but I should think a period of about ten or twelve years.

Cross-examination:

By Mr. CLARKE:

X Q. 22. What is the population of Troy?

A. I should think between fifty and sixty thousand.

X Q. 23. How do you know Mr. Norton's character for truth?

A. From the acquaintance I have with him, and from what I hear around among my friends.

X Q. 24. What do you hear around among your friends about him?

A. Well, I have never heard his character illy spoken of; I don't know that I can give in detail what my friends have said about him; I speak more from my own acquaintance with him and his business transactions with me and my firm.

X Q. 25. Who have you ever heard say anything about Mr. Norton, who would be likely to question his truthfulness, if it could be questioned?

A. Well, I do not recollect of the matter being called into question; I have heard Mr. Ford speak highly of the character and integrity of Mr. Norton, and also my former partner, Mr. Daniels.

X Q. 26. How much have you heard about Mr. Norton in the last ten years or so?

A. I never heard anything derogatory to his character or standing.

X Q. 27. Well, how much have you heard of him in any way?

A. Well, I have not heard much of anything about Mr. Norton, particularly against his character or standing.

X Q. 28. Well, how much have you heard about him?

556 A. I have not heard much of anything; since I retired from business I have not had a tendency to hear much of anything.

X Q. 29. Did you ever hear of Mr. Norton being impeached in any case?

A. No, sir; I don't know as I ever have.

X Q. 30. Did you ever hear of his being indicted for any crime?

A. No, sir; I never heard of any such occurrence.

X Q. 31. Did you ever hear of Mr. Norton being debarred from practicing in the Patent Office?

A. I don't remember of any such occurrence.

X Q. 32. Did you ever hear of Mr. Norton being sold out on sheriff's sale?

A. I did not.

X Q. 33. Did you ever hear of Mr. Norton being pushed for the governorship of the Territory of Wyoming?

A. I heard once something to that effect of that transaction. I don't understand what you mean by the word "push."

X Q. 34. Did you ever hear of Mr. Norton as a candidate in the Republican caucus for United States Senator against Roscoe Conkling?

A. I rather look upon it as a singular question—no.

X Q. 35. Did you ever hear that Mr. Norton was very sick in the year 1864?

A. Yes; I did not only know that he was, but I visited him, and saw that he was a very sick man.

X Q. 36. Do you know what Mr. Norton's financial standing is now?

A. I do not.

X Q. 37. Do you know what it has been in the last ten years?

A. Not particularly; I do not.

X Q. 38. Does Mr. Norton owe you anything?

A. Not a cent.

X Q. 39. How long since you had any dealings with Mr. Norton?
557 A. Well, it is some ten years.

X Q. 40. How frequent were your dealings with Mr. Norton the first ten years you knew him?

A. I had no dealings with Mr. Norton for the first five or six years, I think; and afterwards it was occasionally, as he wanted goods in our line.

X Q. 41. You say that you have the means of knowing what his character for truth is; what are those means?

A Well, nothing more than our business relations.

X Q. 42. Do you think that you know what is currently said about him in this community?

A. I may not know what is currently said; I only judge from my knowledge and acquaintance with him.

X Q. 43. Do you think that you know what his reputation is, except in relation to your personal dealings with him?

A. No; I judge more from my own personal dealings and acquaintance with him.

Redirect examination:

By Mr. NORTON:

R. D. 44. On your cross-examination you have spoken about having heard Mr. Ford speak in terms highly of the character and integrity of Marcus P. Norton; who is this Mr. Ford?

(Objected to as immaterial.)

A. D. W. Ford, paying teller of the National State Bank of Troy, N. Y.

R. D. 45. How long has he been paying teller in that bank?

(Same objection.)

A. Ten or fifteen years, I guess.

558 R. D. 46. Counsel for the defendant has deemed it proper to put to you several questions touching a matter of "governorship," "senatorship," and various other hightoned "fandangoes"; do you understand the reason or the purpose of his putting those questions on this examination to you?

A. No, I can not see the object.

JOHN HITCHINS.

Subscribed and sworn to before me this 1st day of August, 1878.

IRVING BROWNE,
Special Examiner.

EDWARD S. RANDALL, a witness called by the plaintiff, being duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation.

A. My name is Edward S. Randall; my age is fifty-four; clothing dealer, Troy, N. Y.

Q. 2. About how long have you resided in the city of Troy?

A. 30 years last December.

Q. 3. For about what length of time have you been engaged in the business stated by you in your last answer?

A. Ever since I have been here.

Q. 4. Do you know Marcus P. Norton, of Troy?

A. I do.

Q. 5. About how long have you known him?

A. Fifteen years or so.

Q. 6. So far as you know, what is his character for truth and veracity; is it good or bad?

A. I don't know anything about it one way or the other. So far as my acquaintance has been with him, it has been all right.

Q. 7. Do you consider it good or bad?

(Objected to, as the proper foundation is not laid.)

559 A. So far as my acquaintance with him is concerned, I consider it good.

Q. 8. From what you know of his character for truth and veracity, would you believe him under oath?

(Same objection, and because the proper basis for the question is not stated, and because it is designedly ambiguous.)

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 9. What has been the nature of your acquaintance with Mr. Norton?

A. Simply neighborly; no dealings with him whatever.

X Q. 10. What do you mean by neighborly?

A. Why, our families call backwards and forwards.

X Q. 11. How recently is that?

A. I could not tell you; until within a year or two; until his family moved down to Canaan.

X Q. 12. About how frequent was your intercourse with him?

A. The same as any business man would be; perhaps I might meet him once a week, or once in two weeks. The man might live in the same block with you, and you might not see him oftener than once a week, or once in a month.

X Q. 13. Did you call upon him oftener?

A. No, sir.

X Q. 14. Did he call upon you often?

A. No.

560 Redirect examination:

By Mr. NORTON:

R. D. 15. Did your family and Norton's family hold social intercourse?

A. Yes.

E. S. RANDALL.

Subscribed and sworn to before me this 1st day of August, 1878.

IRVING BROWNE,
Special Examiner.

TROY, N. Y., *August* 2, 1878.

Met pursuant to adjournment from yesterday at the hour of 9.30 a. m.

JAMES KNIBBS, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Direct examination:

By Mr. NORTON:

Q. 1. What is your name, age, residence, and occupation?

A. My name is James Knibbs; residence, Troy; occupation, engineer on the steamer Arba Reed; age, 51.

Q. 2. About how long have you resided in the city of Troy?

A. About thirty years.

Q. 3. About how long have you been engineer of the steam fire engine Arba Reed?

A. A little over eighteen years.

Q. 4. Do you know Marcus P. Norton, of this city?

561 A. I do.

Q. 5. You have known him for about what length of time?

A. I think my first acquaintance with him was in 1854 or 1855. I can't tell exactly when.

Q. 6. Have you the means of knowing his character for truth and veracity?

A. I have a general acquaintance only. I have always heard his character spoken of as good.

Q. 7. Do you consider his character for truth and veracity in this city good or bad?

(Objected to as ambiguous.)

A. I consider it good.

Q. 8. From your knowledge of his character for truth and veracity in this community, whould you believe him under oath?

(Objected to, as the proper basis is not laid.)

A. I would; I have always found his word to be true, so far as I have had dealings with him.

Cross-examination:

By Mr. CLARKE:

X Q. 9. What are your duties as engineer?

A. I have charge of the steam fire engine Arba Reed. My duties are to take charge of it, to run it at fires, and to take care of it in the house.

X Q. 10. About what is the population of Troy?

A. I think it is estimated between forty-five and fifty thousand. I have no means for knowing the exact population. It is generally estimated at that.

X Q. 11. How often have you met Mr. Norton within the last ten years or so?

A. Well, I have met him very frequently within the last four-
562 teen years. I could not tell how often. I have been interested with him in a patent, and for that reason my acquaintance has been very general with him since 1864. I have probably met him hundreds of times between that time and this.

X Q. 12. Have you any connection with a patent suit relating to a steam fire engine, now pending in New York, in which Christopher C. Campbell, assignee, is complainant, and the mayor and commonalty, of the city of New York are defendants?

A. I sold my interest in the patent to Mr. Campbell about a year ago.

X Q. 13. Had the suit referred to then been begun?

A. I could not tell you, sir. I don't keep track of Mr. Campbell's affairs.

X Q. 14. Have you any interest in that suit?

A. I don't know what you may mean. I should like to have the thing explained.

X Q. 15. Do you think you have any interest in that suit?

A. I decline to answer what I think.

X Q. 16. Why do you decline?

A. Because I am not going to tell any man my own private affairs,

what I own, or what I don't own. Whether my pocket book contains a silver dollar or paper dollar.

(Complainant's counsel here interposes objections to all questions and answers with reference to his supposed interest by defendant's counsel of the witness in the suit referred to on the grounds: 1st, that there is higher and better evidence on that point, to wit, the records of the Patent Office, containing deeds of assignments and transfers. 2nd, inasmuch as defendant's counsel has refused to answer witness' interrogatory answer, he is not at liberty to further inquire of the witness, until the witness understands the nature of counsel's question. 3d,
563 as having been already answered when the witness stated that he had sold his interest in the patent on which that suit is brought to Mr. Campbell about a year ago.)

X Q. 17. In what patent have you been interested with Mr. Norton?

A. A relief valve for steam fire engines and other pumps.

X Q. 18. Is that the patent on which that suit against New York City is based?

A. I could not tell you. Mr. Campbell's counsel could probably tell you all the minutiæ on that point, if there has been a suit commenced.

X Q. 19. Do you know whether there is a suit pending against the Mayor, &c., of New York City, based on a patent for a relief valve in steam fire engines, or substantially that, in which Mr. Campbell is complainant?

A. I could not say. I heard that there was to be a suit started, but as to further questions I must refer you to Mr. Campbell and his counsel, for I shall decline to answer all further questions in relation to that relief valve, for reasons already stated. I assigned the patent to Mr. Campbell, and know nothing about his business affairs.

X Q. 20. Have you ever seen the bill of complaint in that suit or a copy?

A. On what? I decline to answer. It is entirely outside of this matter. I have sold out my interest in that patent to Mr. Campbell, and the assignment is on file in the Patent Office, and will state all about the sale of my interest.

X Q. 21. Have you ever seen the bill of complaint, or a copy thereof, in the suit of Christopher C. Campbell against the Mayor, &c., of New York City, on a patent for a relief valve?

A. I have already stated that I declined to answer any more questions in relation to Mr. Campbell's matters on that relief valve. I know nothing about Mr. Campbell's matters.

564 X Q. 22. That is not Mr. Campbell's affair; it is your affair. I ask you for what you have seen?

A. For what I have seen? I have seen a good many things.

X Q. 23. Please answer question 21, which the examiner will read to you. (Question is read.)

A. I can't say whether I have or not.

X Q. 24. Do you expect to see it and the answer?

A. I can't expect anything of the kind. If I am served with a copy I shall probably see it.

X Q. 25. Don't you expect that Mr. Norton will keep his word?

A. He has always done so with me.

X Q. 26. Has he not said that he would send you a copy of the bill and the answer?

A. I believe that he has, and I expect to have it through him on the strength of this promise.

X Q. 27. Has he not already given you a copy of the bill, or shown it to you?

A. He has not.

X Q. 28. Is Mr. Norton solicitor in that case?

A. Don't know.

X Q. 29. Is he counsel?

A. Don't know.

X Q. 30. Did you just hear him say that he was?

A. I did not.

X Q. 31. Did you ever hear him say that *that* he was?

A. No, sir; I have no recollection of it.

X Q. 32. Did you ever understand from him, or Mr. Campbell, that he was counsel or solicitor in that case?

A. No, sir; never inquired of him or Mr. Campbell who was going to be counsel, or anything whatever; and they never gave me any information in regard to it.

X Q. 33. Who was the patentee of the patent for the relief valve, in which you say you and Mr. Norton have been interested?

A. James Knibbs.

X Q. 34. Yourself?

A. I suppose so; yes.

565 X Q. 35. In what way was Mr. Norton interested with you in that patent?

A. By assignment from me to him.

X Q. 36. Has there ever been a reissue of that patent?

A. No, sir; the patent was issued for seventeen years, and the time has not expired yet.

X Q. 37. What interest did you assign to Mr. Campbell about a year ago?

A. About one-half.

X Q. 38. Did you assign to him absolutely, or in trust?

A. I don't understand the terms exactly.

X Q. 39. What don't you understand about it?

A. I don't understand it sufficiently to answer the question, what he means by in part or in trust. I stated I sold my interest to Mr. Campbell, and was satisfied with the terms of the sale.

X Q. 40. What was the consideration for that assignment?

A. Cash.

X Q. 41. Anything else?

(Objected to on the ground that the witness has already stated that the assignment to Campbell of the patent in question was in writing, and on record in the Patent Office, or substantially that, and that that assignment would explain the terms and conditions of that sale to Campbell. Such being the fact, there is higher and better evidence, if the matter is at all material to any of the issues in this case; and complainant's counsel further states as an objection that, if the Government of the United States, here represented by defendant's examining counsel, is too poor to pay for a certified copy of that assignment, or if counsel now present and representing the defendant, and said United States in this matter, feels himself unable to pay for said certi-
566 fied copy, the complainant in this case will furnish the same at his expense, and deliver the same to the United States, or to their counsel now present.)

A. No, sir.

X Q. 42. Was the consideration cash down, or cash to be paid in the future, or both?

A. Cash right down. I had the cash before signing the assignment.

X Q. 43. Did Mr. Campbell agree to pay you anything at any future time?

A. He did not; that is, there was no agreement except what the assignment says; no outside agreement at all.

X Q. 44. What is your recollection of what the assignment says on that point?

(Objected to in view of the last answer, because it appears that there is higher and better evidence on the point inquired about.)

A. I decline to answer from the fact that I can't go into the details of it.

X Q. 45. State generally.

(Same objection as last above.)

A. I decline to answer. My answer is same as the last.

X Q. 46. Are you to receive anything in addition to what you have received, in case the suit against the city of New York succeeds, or in case the city or any other city pays royalty on your invention?

(Same objection, and further, that the question has been already fully and fairly answered by the witness.)

A. I refer counsel to the assignment.

X Q. 47. Why will you not answer?

567 A. Because I might not be able to do so correctly.

X Q. 48. Give your best present recollections.

A. I decline to recollect anything about it.

X Q. 49. Why do you so decline?

A. Because it is in black and white, and that is better than my recollection.

X Q. 50. Are you interested in the result of that suit in any way?

A. I don't know of any suit. If there is one instituted against New York City, and I am subpœnaed as a witness, I shall probably have to attend.

X Q. 51. Are you interested in any manner, direct or indirect, in the patent for the relief valve?

(Objected to as having been several times answered, the witness having already stated that he had sold his interest to Mr. Campbell, about a year ago, giving him an assignment of a deed in writing for cash, and that such assignment is on record in the Patent Office, and will show for itself better than his present recollections of it, and that there is no other agreement outside of that written instrument; and further, that complainant's counsel has offered to furnish a certified copy of that assignment, if asked for. There being such written evidence on the matter inquired about, it must be produced if the matter inquired about be deemed material to the case, and especially so, as that instrument is under the seal and signature of the witness, and of record in the Patent Office.)

A. I sold my whole interest which I had to Mr. Campbell, without any reserve, and what he is going to do with it, or what he has done with it, I know nothing about it.

X Q. 52. Have you any interest, direct or indirect, in the patent for the relief valve?

568 A. I have sold my whole interest, without any reserve.

X Q. 53. Will you answer my question?

A. I supposed that I was answering your questions in the broadest manner possible. I don't want the court to understand that I intended the slightest disrespect in any of my answers.

X Q. 54. Please answer my question, yes or no, whether you have any

interest, direct or indirect, in the patent for the relief valve, or in any money realized from the use of it?

A. Yes.

X Q. 55. What means have you for knowing Mr. Norton's reputation for truth and veracity?

A. My dealings with him as a man.

X Q. 56. Have you any other means?

A. I never lived with him.

X Q. 57. Have you any other means besides your personal dealings, for knowing Mr. Norton's reputation for truth and veracity?

A. None.

X Q. 58. You based your answers on the direct examination entirely on your personal dealings and knowledge of Mr. Norton, did you?

A. I based my answers on the dealings which I have had with him for fourteen years past. During that time I have found every word that he has told me to be true, and would believe every word that he said just as quick without an oath as with it.

X Q. 59. Do you think you know what is currently said about Mr. Norton in this community?

A. No, sir; I don't know anything about what is currently said. I pay very little attention to reports any way. I judge of a man by my dealings with him.

X Q. 60. Leaving out of view your personal knowledge and dealings with Mr. Norton, state whether you think you know what Mr. Norton's general reputation for truth and veracity is in this community.

569 A. Good.

X Q. 61. You do think you know?

A. I do.

X Q. 62. How do you know? You have stated that you paid very little attention to reports, and I have requested you to answer without reference to personal dealings?

A. I have never heard anything against the man.

X Q. 63. Do you know what Mr. Norton's financial standing is in this community?

A. I couldn't tell you; you could probably ascertain that fact at the bank where he does his business.

X Q. 64. Do you know William E. Hagan?

A. I am somewhat acquainted with him; not much.

X Q. 65. Did you ever hear of a case in which he was interested, in which an attempt was made to impeach Mr. Norton's reputation for truth and veracity?

A. No, sir.

X Q. 66. Did you ever hear that Mr. Norton was debarred from practicing as a solicitor in the Patent Office, six or seven years ago?

A. I heard it so rumored, but I know nothing of the truth or falsity of the matter.

X Q. 67. Did you ever hear that Mr. Norton was indicted for crime in the District of Columbia, six or seven years ago?

A. No, sir; and it would take good strong evidence to make me believe it, even if I did hear it.

X Q. 68. Did you ever hear of Mr. Norton being sold out on sheriff's sale?

A. Never anything about the sheriff. I heard about his books being sold at auction.

X Q. 69. Did you ever hear of an attempt being made to impeach

Mr. Norton's veracity, in one of the actions following the assassination of President Lincoln, in which Mr. Norton was a witness?

A. No, sir.

570 X Q. 70. Did you ever hear of an attempt to impeach his veracity?

A. No, sir.

X Q. 71. Did you ever hear from any one that Mr. Norton was not to be depended upon, or substantially that?

A. No, sir.

X Q. 72. Did you ever hear from any one that Mr. Norton did not meet his financial engagements, or substantially that?

A. No, sir.

X Q. 73. Did you ever hear from any one that Mr. Norton was untruthful, or substantially that?

A. No, sir.

X Q. 74. How frequently have you heard Mr. Norton mentioned in any way by the people of Troy, within the past six or seven years?

A. I don't know as I ever heard his name mentioned; I never heard it spoken of derogatory of any way.

X Q. 75. What people of Troy who are acquainted with Mr. Norton do you know?

A. I can't tell without comparing notes with Mr. Norton.

X Q. 76. What is your salary as engineer?

A. One hundred dollars a month.

X Q. 77. What was your business before you became engineer of the Arba Reed?

A. Machinist. I worked for N. B. Starbuck & Son four or five years; for the Troy & Boston Railroad about three or four years; and for the Saratoga Railroad a couple of years.

X Q. 78. How much pay did you get when you were machinist, on an average?

A. When I commenced at Starbuck's I got five dollars a week; when I left off I got fourteen shillings a day. At the Troy and Boston shop I engaged for twelve shillings a day, and when I left off I got my fourteen shillings, the same as the best man in the shop.

571 Redirect examination:

By Mr. NORTON:

R. D. 79. Of how many men is the steam fire-engine Arba Reed composed?

A. It is entitled to forty members; we have now between thirty-two and forty.

R. D. 80. Will you explain how those men become members of that organization, briefly?

A. They are first proposed to the company by a written application for membership, the application stating name, age, residence, and occupation. They are referred to a committee, consisting of three members of the company. When that committee report, the name is then balloted for with ball ballots, requiring a two-third vote to elect; if elected, it is then referred to the board of fire commissioners; referred by them to a committee. If they report favorable, it is confirmed; then referred from the fire commissioners to the common council of the city, and a certificate is granted under the seal of the city, if the common council approve.

R. D. 81. None but the best of the citizens can become members of that organization, can they?

A. No, sir; not knowingly.

R. D. 82. And if you should be unfortunate and get in a bad man, there are means for ridding the company of such a man, are there?

A. There are.

R. D. 83. When that company desire to meet for company or other purposes, where does it convene?

A. In the parlors of the engine-house, monthly.

R. D. 84. And where in the city is the engine-house of the steam fire-engine Arba Reed situated?

A. Corner of State and Third streets.

R. D. 85. State whether that engine-house is near the City Hall,
572 St. Paul's Church, Troy City Savings Bank building, as well as several other banks doing business in this city?

A. It is.

JAMES KNIBBS.

Subscribed and sworn to before me this 2d day of August, A. D. 1878.

IRVING BROWNE,
Special Examiner.

SAMUEL D. FRENCH, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Direct examination:

By Mr. NORTON:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Samuel D. French; age, 47; residence, 41 Second street, Troy, N. Y.; and my occupation, dentist.

Q. 2. About how long have you resided in Troy?

A. About twenty-three years and a half.

Q. 3. And about how long have you been engaged in the practice of your profession?

A. About twenty-six years.

Q. 4. About how long have you been engaged in the practice of your profession in this city?

A. About twenty-three years and a half.

Q. 5. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 6. About how long have you known him personally?

A. Since 1863, certainly; I cannot tell how much before that time.

Q. 7. Have you, in the line of your profession or otherwise, had business within that time with him?

573 A. I have.

Q. 8. Have you the means of knowing his character for truth and veracity in this city?

A. As far as I am concerned myself, I have.

Q. 9. Do you consider it good or bad for truth and veracity?

(Objected to because the proper foundation has not been laid.)

A. I consider it good.

Q. 10. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

(Same objection, and because the proper foundation for the question is not stated therein.)

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 11. What means have you for knowing Mr. Norton's character for truth and veracity in this city?

A. Having done business with him for at least fifteen years, he having always made his settlements promptly.

X Q. 12. Any other means?

A. No, sir; no other means except in a business way.

X Q. 13. When you say that you consider his character for truth good, do you allow anything to influence you in making up your mind upon the point except your knowledge of and dealings with him?

A. No, sir.

574 X Q. 14. Do you allow rumors and reports concerning him to influence you at all?

A. No, sir.

X Q. 15. What has been the nature of your business with him?

A. Operations in dentistry for himself and family.

X Q. 16. About how frequent have been those operations within the last fifteen years?

A. A few years ago they were quite frequent, but within the past two years I think but once.

Redirect examination:

By Mr. NORTON:

R. D. 17. Question fourteen asks to you to state whether you "allow rumors and reports concerning him to influence you"; during your acquaintance with Norton in this city, have you ever heard anybody say that he was an untruthful man, and that they would not believe him under oath, or anything against his standing for truth and veracity?

(Objected to as not a proper redirect question.)

A. I never did.

Recross:

By Mr. CLARKE:

R. C. 18. Do you know William E. Hagan?

A. I do.

R. C. 19. Did you ever hear anything about a suit in which he was engaged, and in which the character of Mr. Norton for truth was impeached or attempted to be impeached?

A. I did not.

R. C. 20. Did you ever hear that Mr. Norton was debarred from practicing in the Patent-Office six or seven years ago?

575 A. I did not.

R. C. 21. Did you ever hear that Mr. Norton was indicted for crime in the District of Columbia six or seven years ago?

A. I did not.

R. C. 22. Did you ever hear that Mr. Norton was sold out at sheriff's sale?

A. I did.

R. C. 23. Do you know what Mr. Norton's financial standing is?

A. I do not.

R. C. 24. Did you ever hear anybody say anything about it?

A. Years ago, when he was sold out?

R. C. 25. Did you ever hear that Mr. Norton did not keep his financial engagements?

A. I did not.

R. C. 26. How frequently have you heard Mr. Nortan mentioned in any way by anybody?

A. I have heard him mentioned within the last two years.

R. C. 27. How frequently for the last five or six years?

A. I have heard him spoken of within the last three years about some suit out in the country before a board of arbitration, in which he was counsel.

R. C. 28. How frequently within the last ten years?

A. I couldn't say.

R. C. 29. Was it very frequently or occasionally?

A. Occasionally.

Redirect examination:

By Mr. NORTON:

R. D. 30. If you have no objection, you may state whether you hold an official place in a dental association in this country?

A. I do.

576 R. D. 31. If you have no objection, you may state the name of that association and the official place you hold?

A. The New York State Dental Society. I am State censor from the third district.

R. D. 32. When that association meet for business or other purposes under its organization, where does it usually convene?

A. In the city of Albany.

R. D. 33. The third district represented by you as State censor is situated where?

A. The counties Albany, Rensselaer, Columbia, Greene, and, I think, Ulster and Sullivan.

R. D. 34. Do you hold any office in any other society; and, if so, what?

A. I am president of the Hudson Valley Dental Society.

Recross:

By Mr. CLARKE:

R. C. 35. In what other ways, if any, have you heard Mr. Norton mentioned in any manner, by anybody, within the last three years, except in the matter before the board of arbitrators?

A. I don't know that I have heard his name mentioned.

R. C. 36. How many times did you hear his name spoken of in connection with that matter of the arbitration?

A. I myself asked one of the members of the board of arbitrators who was in town, and whom I knew personally, how the case was getting along.

S. D. FRENCH.

Subscribed and sworn to before me this 2d day of August, 1878.

IRVING BROWNE,
Special Examiner.

577 ALONZO ALDEN, a witness called on the part of the plaintiff being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Alonzo Alden; Troy; real estate and insurance agent; my age is 44.

Q. 2. About how long have you resided in the city of Troy?

A. Troy has been my home since 1855, although I have not resided here, not been here, all that time.

Q. 3. About how long have you been engaged in the business stated in your first answer, in the city of Troy?

A. About four years.

Q. 4. Were you, during the recent civil war in this country, in the army of the United States volunteers?

A. I was.

Q. 5. For about what length of time did you serve in that army?

A. Four years and a half.

Q. 6. During that war, in what division of the army did you serve?

A. In the Army of the Potomac, in the Department of the South, the Army of the James, and the Department of North Carolina; also the Department of Washington.

Q. 7. During the latter portion of that war, and at its close, what official place or position, if any, did you have?

A. Colonel and brigadier-general by brevet.

Q. 8. After the war, were you postmaster of the United States at the city of Troy?

A. About a year after the war I was made postmaster of this city.

Q. 9. Who made that appointment?

578 A. General Grant, then President of the United States; my first appointment, however, was by Andrew Johnson, in 1866. I have held the post-office here for two terms—one under Johnson, and one under Grant.

Q. 10. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 11. About how long have you known him?

A. I think I first made his acquaintance soon after I entered the post-office; I can't tell exactly when, in 1866 or 1867.

Q. 12. Have you the means for knowing his character for truth and veracity in this city?

A. My acquaintance with Mr. Norton has been general and limited; I know nothing adverse to his character and reputation in this city.

Q. 13. From your knowledge of his character for truth and veracity, would you believe him under oath?

(Objected to, because the proper foundation is not stated.)

A. I would.

Q. 14. Do you consider his character good or bad in this city?

A. So far as I have any knowledge of his character, I consider it good.

Q. 15. Did you ever hear any person in this city say that Norton was an untruthful man, and could not be believed on his oath?

A. I have heard remarks made by different ones unfavorable to Mr. Norton's reputation, but nothing especial as to his being believed under oath.

Q. 16. Or that he was untruthful?

A. Nothing of that kind, that I remember.

Cross-examination:

By Mr. CLARKE:

X Q. 17. Please state fully your means of knowing what Mr. Norton's character is.

579 A. As I have stated, I have never had any business intercourse with Mr. Norton, and only a passing acquaintance, and have no special means of knowing anything about Mr. Norton's character or reputation, favorably or adversely. My attention was first directed to a Marcus P. Norton while I was in the post-office, before I had seen the gentleman, by his association with the stamp used for the cancellation of letters, and had frequently thereafter conversed with him on the subject.

X Q. 18. Do you think you know enough about Mr. Norton to state that you know what his reputation for truth is, laying aside now your personal knowledge and acquaintance with him?

A. I can say simply that, from my personal knowledge, I have no knowledge adverse to his character and reputation; I have heard incidentally, in conversation with others, words unfavorable to Mr. Norton; what those words were, or what was said, I do not now remember; hearsay I pay no attention to, and to which I pay no regard about anybody.

X Q. 19. How many times have you heard Mr. Norton spoken of by anybody within the last eight or ten years; frequently, or seldom?

A. Well, seldom, on the whole, with reference to his reputation or character, but frequently with reference to his invention.

X Q. 20. When did you cease to be postmaster?

A. On April 1, '74.

X Q. 21. Since then have you heard Mr. Norton spoken of by anybody in any way, and if so, how frequently?

A. I don't think I have heard anything since then; I have seen in the newspapers that he was prosecuting this suit, and that is all.

X Q. 22. Were the remarks which you heard while you were postmaster, in regard to Mr. Norton as the inventor of the stamp, made chiefly by citizens of Troy, or by government employees?

580 A. Principally by my employees in the post-office.

X Q. 23. Did what they said relate principally to Mr. Norton personally, or to the stamp?

A. To the stamp.

Redirect examination:

By Mr. NORTON:

R. D. 24. Do you recollect that soon after the election of President Grant to the Presidency, for his first Presidential term, of having written a letter to him recommending the appointment of Marcus P. Norton to the office of the governorship of the Territory of Wyoming?

A. I recollect writing such a letter, but I can't say at what time.

ALONZO ALDEN.

Subscribed and sworn to before me this 2d day of August, 1878.

IRVING BROWNE,
Special Examiner.

On motion of defendant's counsel, the plaintiff's counsel consenting, the hearing is adjourned until the 20th day of August, Tuesday, at 10 a. m.

IRVING BROWNE,
Special Examiner.

581 TROY, *Tuesday, August* 20.

Case called and adjourned until Thursday, August 22, on application of complainant's counsel.

TROY, *August* 22, 1878.

Met pursuant to adjournment as above.

Present, Marcus P. Norton, of counsel for complainant, and Samuel B. Clarke, assistant U. S. district attorney, of counsel for defendant.

Whereupon complainant's counsel offers in evidence a certified copy from the United States Patent Office of the decision of the examiners-in-chief in the matter of the application for the reissue of letters patent granted Marcus P. Norton, dated April 14, 1863, and reissued August 23, 1864, upon improvements in postmarking letters and cancellation of

postage stamps thereon, signed R. L. B. Clarke, Samuel C. Fessenden, examiners in chief, dated July 29, 1869, number 3952, and under the seal of the Patent Office, and signed Elias Spear, Commissioner, and marked Complainant's Exhibit, decision of the board of appeals, U. S. Patent Office, I. B., ex'r, August 22, 1878.

(Objected to as immaterial.)

Complainant's counsel also offers in evidence a certified copy of letters patent granted Helen M. Ingalls for improvement in hand-stamp, dated August 23, 1870, number 106716, under the seal of the United States Patent Office and the signature of Elias Spear, Commis-
582 sioner, and the same is marked Complainant's Exhibit, hand-stamp, patented August 23, 1870, I. B., ex'r, August 22, 1878.

(Same objection.)

Complainant's counsel calls as a witness LEWIS C. LILLIE, who, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Lewis C. Lillie; age, 41; residence, Elizabeth, N. J.; my occupation is manufacturer of time bank-locks.

Q. 2. State where your present place of business is.

A. Well, my manufacturing is done in Newark, N. J., and my office in New York is 24 John street.

Q. 3. You have a partner in business, have you not?

A. Yes, sir; a special partner.

Q. 4. Have you ever resided in the city of Troy, New York?

A. I have.

Q. 5. About what time did you cease to reside there, if at all?

A. From the first of May, 1867.

Q. 6. Previous to May, 1867, how long had you resided at the city of Troy?

A. Twenty-one years.

Q. 7. While residing at Troy were you engaged in any kind of business; and, if you were, state that business, and who were associated with you in it, if any one?

A. I was engaged in a business of manufacturing mercantile and bank safes, locks, etc. My father, Lewis Lillie, was associated with me under the firm name of Lewis Lillie & Son.

Q. 8. About how extensive was the business carried on by that firm in the manufacture of bank safes, vaults, etc., while they were located and doing business in the city of Troy?

583 A. It was extensive, extending all over the United States and some foreign countries.

Q. 9. When you removed your works from the city of Troy, where did you go with them, if anywhere?

A. Bucks County, Penn., near Riegelsville.

Q. 10. What kind of business did you carry on there?

A. The manufacture of pig iron, in addition to what I manufactured here in Troy.

Q. 11. While you resided at the city of Troy did you know Marcus P. Norton, of that city; and, if you did, state how long you did, and also state his business?

(Objected to as immaterial.)

A. I did know him, and for ten years, while I lived here in Troy; his business was patent lawyer.

Q. 12. State whether he was employed by your firm in Troy; and, if so, for what business, as well as about the length of time it was continued, if you remember.

A. He was employed by our firm all the length of time I was a member of it for the purpose of securing patents for us, and all our business relating to patents; and that continued until about January, 1867.

Q. 13. You employed him by the year, at a fixed salary, whether you had business in his profession for him or not, did you or did you not?

A. We did.

Q. 14. State, if you remember, what that salary was; and, if you do, state the same, exclusive of expenses.

A. Fifteen hundred dollars, exclusive of expenses.

Q. 15. While you were in Troy, engaged in the business stated by you, had you the means of knowing Marcus P. Norton's character for truth and veracity?

(Objected to as immaterial.)

584 A. I had.

Q. 16. Did you consider it good or bad.

(Same objection.)

A. Good.

Q. 17. From your knowledge of his character for truth and veracity, would you believe him under oath?

(Same objection, and also because the proper basis for the question is not stated, and also because the question is designedly ambiguous.)

A. I would.

Q. 18. State whether Norton, while employed by your firm, did a large or small business for you in the line of his profession.

A. He did a large business.

Q. 19. State whether that business was or was not successfully done, or done to your satisfaction, at all times and in all places?

A. Wholly successful; entirely satisfactory.

Cross-examination:

By Mr. CLARKE:

X Q. 20. Does Mr. Norton owe you anything?

A. Not at present.

X Q. 21. In answer to question fifteen you state substantially that before you left Troy, in the year 1867, you had the means of knowing Mr. Norton's character for truth and veracity; what were those means?

A. Well, my personal acquaintance with the man, his employment by several of the prominent iron or stove houses, and the personal recommendation of Dr. Alfred Wotkyns, formerly president of the
585 National State Bank, with whom I conferred as to Mr. Norton's reliability; Mr. Norton keeping his accounts at that bank.

X Q. 22. What made you confer with Mr. Wotkyns as to Mr. Norton's reliability?

A. My father's absence threw the business generally upon my shoulders, and at the time mentioned we were making a general revision of patents, getting reissues, &c., and I was in the habit of consulting with Dr. Wotkyns in relation to them, and we kept our account at the same bank.

X Q. 23. Well, how came Mr. Norton's reliability to become a subject of discussion between you?

A. We were holding a conversation on general matters, among which the subject of patents came up, and very likely he may have asked me who was getting out my patents, and I remember his saying these words: 'I have had considerable knowledge of and intercourse with Mr. Norton, and consider him an able and reliable man."

X Q. 24. Was that all that was said about Mr. Norton's reliability?

A. That was all.

X Q. 25. Did Mr. Wotkyns say that of his own accord, or did you ask him in regard to Mr. Norton?

A. He said that of his own accord; I did not ask him his opinion of Mr. Norton.

X Q. 26. What year was it?

A. I should say that was in '65, or the fore part of '66.

X Q. 27. Do you know William E. Hagan, or did you when you lived in Troy?

A. I did.

X Q. 28. Did you ever hear of an attempt to impeach Mr. Norton's reputation for truth and veracity, in a case in which Mr. Hagan was plaintiff and Groom, Shavor, and Potter were defendants, in 1863?

A. Not that I remember of.

X Q. 29. Did you ever hear of any attempt to impeach Mr. Norton's reputation for truth?

586 A. Well, I never heard anything, unless I qualify it by saying that I heard some testimony given in the New York court house, from which I inferred that there was something of that kind going on; and that was in this case, and it was not more than two months ago.

X Q. 30. How do you determine what a man's reputation for truth is?

A. I determine by uprightness in his business relations, or the social relations, where I am personally cognizant of them.

X Q. 31. Do you allow rumor or report to influence you at all in determining whether a man's character for truth is good or bad?

A. I never intend to.

X Q. 32. When you stated on your direct examination that Mr. Norton's character for truth was good, I understand that the basis for your statement was your personal knowledge of Mr. Norton, derived from your business dealings and social relations with him; is that correct?

A. My answer on the direct examination was based not only on my personal knowledge and social relations, but also the fact that he had the confidence of my father previous to my entering the firm, and was employed professionally by various prominent houses in the city.

X Q. 33. When did Mr. Norton begin to do business for your firm?

A. I went into the firm in the year '64, I think it was, and he then commenced his business first for the firm of Lewis Lillie & Son; he previously had done business for Lewis Lillie before I entered the firm.

X Q. 34. What have you known of Mr. Norton since 1867?

A. I have not met Mr. Norton to speak with him since '67 until within the past two months, with one exception.

X Q. 35. Have you heard anything about him within that time?

587 A. Well, I don't know that I have.

X Q. 36. How long since Mr. Norton has owed you anything?

A. I don't know that he has ever owed me anything.

X Q. 37. Do you think that you know what was currently said about Mr. Norton, as to truthfulness, in this community, between the years 1864 and 1867?

A. I could only know what happened in my business relations, and in the sphere of my business acquaintance or intercourse with business men.

X Q. 38. Did you know the town talk?

A. I did not.

Redirect:

By Mr. NORTON:

R. D. 39. If you know, you may state whether Dr. Wotkyns is dead or living?

A. I have understood that he is dead.

R. D. 40. Dr. Wotkyns was president of the National State Bank for many years previous to his last sickness and death, was he not?

A. He was.

R. D. 41. Dr. Wotkyns was at one time mayor of this city, was he not?

A. He was.

R. D. 42. Dr. Wotkyns was a prominent physician in this city for many years, was he not?

A. He was.

(Objected to.)

R. D. 43. You may state whether your father, Lewis Lillie, is living or dead.

A. He is dead.

588 R. D. 44. Previous to your partnership with him, under the firm name of Lewis Lillie & Son, state whether your father was engaged in a large and extensive manufacturing business in this city for many years previous thereto.

A. He was.

R. D. 45. Did you ever hear anybody in this city speak of Marcus P. Norton in terms derogatory or defamatory to his reputation for truth and veracity?

A. I never did.

R. D. 46. On your cross-examination you have spoken of your business relations while you were engaged in business in this city, and also of your acquaintance with business men during those times; state whether your business relations were large or small, and whether you had or had not a general acquaintance with the prominent business men of this city.

(Objected to as not a proper redirect question.)

A. My acquaintance extended to all the prominent business men. My business relations were confined wholly, or almost wholly, to the iron interests.

R. D. 47. In how many banks did the firm of Lewis Lillie & Son keep an account or do business in this city?

(Same objection.)

A. Three.

R. D. 48. Name them.

(Same objection.)

A. Troy City National, Manufacturers' National, National State Bank.

R. D. 49. If you had any important suit to be prosecuted or defended, and you wanted Norton's professional services in such suit, would you hesitate to employ him professionally?

A. I should not.

589 R. D. 50. Do you know of anybody in New Jersey who has recently employed Norton of some importance?

(Same objection.)

A. I do.

R. D. 51. State the name, if you remember.

A. Amwell National Bank of Lambertville.

R. D. 52. State, if you know, whether Mr. Norton has been recently employed by anybody in the State of Pennsylvania in an important patent case.

A. I do.

R. D. 53. State the name of such person or persons.

A. The First National Bank of Easton.

LEWIS C. LILLIE.

Subscribed and sworn to before me this 22d day of August, 1878.

IRVING BROWNE,
Special Examiner.

Complainant's counsel calls THEODORE A. MALLARY, who, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Theodore A. Mallary; age, 42 years; residence, Watervliet, Albany County; occupation, coal dealer, Troy, N. Y.

Q. 2. Your place of business is in the city of Troy, is it not?

A. Yes, sir.

Q. 3. Have you previously resided with your family in the city of Troy?

A. Yes, sir.

590 Q. 4. About how long have you been engaged in business as a dealer in coal?

A. Fourteen years as a proprietor.

Q. 5. With whom have you been associated, if with any one, during that time?

A. With E. S. Mallary, my father; afterwards with Bolton & Anthony.

Q. 6. Your father was a dealer in coal, was he not, for many years in this city previous to your copartnership with him?

A. Yes, sir; from 1846 to 1864.

Q. 7. Is your father dead, or is he living?

A. He is dead.

Q. 8. State, if you know, whether the business carried on by him, and afterwards by Mallory and Son, in which you were a partner, was or was not an extensive business in this city?

A. It was extensive.

Q. 9. State, if you know, whether the business that has been carried on by you, in which you were a partner, was or was not also an extensive business in this city.

A. It was.

Q. 10. State whether the business now carried on by you is not also an extensive business.

A. It is.

Q. 11. During the time you have carried on the business stated by you in this examination, you have had the opportunity to know and form the acquaintance of business people in this city, have you not?

A. I have.

Q. 12. And you know a large number of business people in Troy, do you not?

A. A large number.

Q. 13. State, if you remember, where your father's office or place of business was located in this city, when you were his partner, and previous.

A. On Mechanic street, and in the rear of 361 River, and also at the foot of Grand Division street.

591 Q. 14. State whether your present place of business is in or near that part of the city at this time.

A. Number 377 River street, and within one block.

Q. 15. Do you know Marcus P. Norton, of this city; and, if so, how long have you known him, and what have you understood his business to be during that time?

A. I do, and have for about twenty years; his business was solicitor of patents and patent lawyer.

Q. 16. Have you ever had any business transactions with him during that twenty years?

A. I have.

Q. 17. Were those business transactions yearly ones?

A. Yes; and up to the time he discontinued housekeeping; and after that, when he was boarding at the Mansion House in this city.

Q. 18. Does Mr. Norton owe you anything at this time?

A. Yes.

Q. 19. About how much, in round numbers?

A. Between a thousand and fifteen hundred or two thousand. I don't remember the exact amount.

Q. 20. State if you remember having a note covering that amount, exclusive of interest.

A. I had such a note.

Q. 21. State whether, after that note had become void or non-collectable, by reason of the statute of limitations, you called upon Mr. Norton and stated that fact to him; and, if you did, what he said, and what was done in reference to it.

A. I called upon Mr. Norton, presented him the note, stated the case to him as it was, and asked if he wished to renew it. He emphatically said yes; said that it was for a just bill, and that he only wished that he could pay the cash for it at that time, and renewed the note immediately, and thereby removed the bar of the statute of limitations.

592 Q. 22. About how long ago was that, if you remember?

A. About three years ago, as near as I remember.

Q. 23. Do you consider a man that will do as stated by you in your last two answers an honest man, and entitled to be believed under oath in this or any other court?

(Objected to as irrelevant, immaterial, incompetent.)

A. I do.

Q. 24. Have you and have you had the means of knowing the character or reputation of Marcus P. Norton in this city for truth and veracity?

A. I have.

Q. 25. Do you consider his character for truth and veracity in this city good or bad?

A. Good.

Q. 26. Would you believe him under oath?

A. I would.

Q. 27. Did you ever hear anybody, in this city or elsewhere, say anything against his character for truth and veracity?

A. Not that I can remember.

Q. 28. Would you have been likely to have remembered it, if you had?

A. Yes, sir.

Cross-examination:

By Mr. CLARKE:

X Q. 29. What are your means for knowing Mr. Norton's character for truth in this city?

A. In my business relations with other people.

X Q. 30. Please explain how your business relations with other people are a means of knowing Mr. Norton's reputation for truth and veracity.

593 A. Having met him on the street and other places of business, and not hearing anything derogatory to his character.

X Q. 31. How long have you known Mr. Norton?

A. About twenty years.

X Q. 32. Whom have you ever heard speak about him?

A. I don't know as I can mention any names.

X Q. 33. How often have you heard him spoken of by anybody within the past five or six years?

A. I don't know as I can mention any names there, either.

X Q. 34. Well, about how often have you heard him spoken of in any way by anybody, within that time?

A. I don't know that I have heard him spoken of within that time; at least I don't remember.

X Q. 35. Did you ever hear of any attempt to impeach Mr. Norton in any suit?

A. I think I have; in this same suit.

X Q. 36. In any other suit or case than this?

A. I don't remember any other suit.

X Q. 37. Do you know William E. Hagan?

A. I do.

X Q. 38. Did you ever hear of an attempt to impeach Mr. Norton's testimony, made by Mr. Hagan, in a suit in which he was plaintiff and Shavor, Groom and Potter were defendants, and in the year 1863?

A. I don't remember.

X Q. 39. Did you ever hear of an attempt to impeach the testimony of Mr. Norton in one of the trials following the assassination of President Lincoln?

A. I did.

X Q. 40. When did you hear that?

A. I read it in the newspapers.

X Q. 41. Did you ever hear of Mr. Norton being debarred from practicing in the Patent Office?

A. I don't remember that I did.

594 X Q. 42. Did you ever hear of Mr. Norton being indicted for forgery, in the District of Columbia, five or six years ago?

A. I don't remember that I did.

X Q. 43. Did you ever hear of Mr. Norton being pushed by his friends for the governorship of Wyoming in the year 1869?

A. I think I did.

X Q. 44. How frequently have you had dealings with Mr. Norton, on an average, and to what extent?

A. Well, from month to month, and from two to three hundred dollars a year up to seven hundred.

X Q. 45. What was the nature of this business?

A. For coal sold to him and ordered by him.

X Q. 46. Do you remember to have ever heard Mr. Norton's character discussed in any way by anybody?

A. I don't remember that I have.

X Q. 47. Do you remember to have ever heard him spoken of in any way by anybody.

A. I have heard Mr. Charles Eddy speak of him.

X Q. 48. Any one else?

A. Not that I remember now.

X Q. 49. When did Mr. Eddy speak of him?

A. Since Mr. Norton left housekeeping.

X Q. 50. What was Mr. Eddy's conversation about?

A. Well, in regard to this case.

X Q. 51. Well, what did Mr. Eddy say?

A. Well, he said he thought that he would be successful in this case, and would come out all right, and that I should be able to get my pay.

X Q. 52. Anything else?

A. Nothing that I remember of.

X Q. 53. When was that debt Mr. Norton owes you contracted; how long ago?

A. I should judge it was eight or nine years ago.

X Q. 54. When do you expect to be paid?

A. I cannot say.

X Q. 55. If Mr. Norton succeeds in this stamp matter, you expect to be paid then, don't you?

595 A. I do.

Redirect examination:

By Mr. NORTON:

R. D. 56. You say in your answer to question 55 that you have such confidence in Mr. Norton that when he comes in possession of funds sufficient he will pay every cent of principal and interest he owes you?

A. Most assuredly I do.

R. D. 57. Counsel for the defendant has been pleased to ask you several questions relating to an attempted impeachment of Norton, of his debarment from the Patent Office, and of an indictment for forgery; did you ever hear that the counsel for the defendant had murdered a man in Massachusetts some years ago?

A. No, sir.

R. D. 58. Did you ever know or hear of his having fought a battle with anybody?

A. I never did.

R. D. 59. Did you ever hear while he was in Massachusetts, and before six years of age, of his ever having urinated in anybody's bed?

A. I never did.

R. D. 60. Well, did you ever hear anybody say that President Hayes had been to State's prison for a term of years?

A. I don't remember.

THEODORE A. MALLARY.

Subscribed and sworn before me this 22d day of August, 1878.

IRVING BROWNE,
Special Examiner.

596 WILLIAM TOUGH, being called as a witness by the complainant, first being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is William Tough; age, thirty-nine; residence, Tro, New York; occupation, salesman.

Q. 2. About how long have you resided in the city of Troy?

A. Between fourteen and fifteen years.

Q. 3. You say in your first answer that you are a salesman; for whom, if for anybody, are you so employed?

A. Wolfe Stove Company.

Q. 4. About how long have you been so employed for that company?

A. Since the beginning of the year; it has only been organized for that length of time.

Q. 5. Previous to the organization of that company, for whom and for how long a time were you employed?

A. I was employed by Hicks & Wolfe, the predecessors of that company, and for seven years as a bookkeeper.

Q. 6. What business was carried on by Hicks & Wolfe during the time you were their bookkeeper?

A. Stove manufacturers.

Q. 7. State whether or not they did a somewhat extensive business as manufacturers and venders of stoves.

A. They did a large business in the manufacturing and selling of stoves of various descriptions.

Q. 8. If you know, state the street and number in the street in which Hicks and Wolfe carried on their business in this city.

A. 263 River street.

Q. 9. Where was their foundry located?

A. On Green Island.

Q. 10. Where is Green Island?

597 A. Near Troy, and separated by the Hudson River.

Q. 11. If you know, you may state where the business of the Wolfe Stove Company is now carried on.

A. 263 River street, Troy.

Q. 12. Do you know Marcus P. Norton of this city?

A. I do.

Q. 13. About how long have you known him?

A. About eight years.

Q. 14. Do you know his character for truth and veracity in this city?

A. Well, as far as I know, it has been good.

Q. 15. Have you ever known his character for truth and veracity called in question?

A. No; I don't know anything of the kind.

Q. 16. From your knowledge of his character for truth and veracity, would you believe him under oath?

A. I would.

Q. 17. Do you know a person in this city by the name of Nelson Pramer?

A. I do.

Q. 18 To your knowledge, was Nelson Pramer ever employed by the firm of Hicks & Wolf in this city?

A. He was.

Q. 19. If you know, you may state the nature of the employment and about how long it continued.

(Objected to as immaterial.)

A. He was employed as salesman most of the time for some fourteen or fifteen years.

Q. 20. If you know, you may state when he left that employment.

(Same objection.)

A. About the first of March, 1878.

598 Q. 21. You may state if you remember of an interview between

A. I don't remember that I have.

X Q. 47. Do you remember to have ever heard him spoken of in any way by anybody.

A. I have heard Mr. Charles Eddy speak of him.

X Q. 48. Any one else?

A. Not that I remember now.

X Q. 49. When did Mr. Eddy speak of him?

A. Since Mr. Norton left housekeeping.

X Q. 50. What was Mr. Eddy's conversation about?

A. Well, in regard to this case.

X Q. 51. Well, what did Mr. Eddy say?

A. Well, he said he thought that he would be successful in this case, and would come out all right, and that I should be able to get my pay.

X Q. 52. Anything else?

A. Nothing that I remember of.

X Q. 53. When was that debt Mr. Norton owes you contracted; how long ago?

A. I should judge it was eight or nine years ago.

X Q. 54. When do you expect to be paid?

A. I cannot say.

X Q. 55. If Mr. Norton succeeds in this stamp matter, you expect to be paid then, don't you?

595 A. I do.

Redirect examination:

Q. 16. From your knowledge of his character for truth and veracity, would you believe him under oath?

A. I would.

Q. 17. Do you know a person in this city by the name of Nelson Pramer?

A. I do.

Q. 18 To your knowledge, was Nelson Pramer ever employed by the firm of Hicks & Wolf in this city?

A. He was.

Q. 19. If you know, you may state the nature of the employment and about how long it continued.

(Objected to as immaterial.)

A. He was employed as salesman most of the time for some fourteen or fifteen years.

Q. 20. If you know, you may state when he left that employment.

(Same objection.)

A. About the first of March, 1878.

598 Q. 21. You may state if you remember of an interview between

him and Marcus P. Norton, in your presence, and in the office or counting-room of Hicks & Wolfe, in this city, with reference to Patent Office fees upon some application for a patent for Mr. Pramer.

(Objected to as immaterial, irrelevant, and incompetent.)

A. I remember such an interview.

Q. 22. About how long ago was that, as near as you remember?

A. I think it was in the fall of 1870 or spring of 1871.

Q. 23. I desire you to state all that you remember to have heard Mr. Pramer or Norton say about that matter on that occasion, and state further whether Mr. Pramer, at any time, showed you a letter from the Patent Office having reference to the same matter.

(Same objection.)

A. Pramer asked Mr. Norton what he had done with the fifty dollars he got for that patent application, and why he had not returned it; Mr. Norton told him that he had paid the money into the Patent Office and that he could prove that he had done so, and advised Pramer to write to the Commissioner of Patents and ascertain if what he said was not correct in relation to the payment of this money, and that he would look the matter up among his own papers. Pramer shortly afterwards, as advised by Mr. Norton, wrote to the Commissioner of Patents and received a reply from, as well as I can recollect, the chief clerk or some other Patent Office official, stating that the money had been received at the time specified by Norton. As well as I can recollect, Pramer
599 requested the money to be returned if the patent had been disallowed. The Patent Office official replied that there was no provision of law authorizing them to return fees on a disallowed claim. Afterward Mr. Norton came into Hicks & Wolfe's office while I was present and showed Pramer his letter-book, showing him a copy of the letter in which he had inclosed the money to the Patent Office, and some other papers relating to that correspondence.

Q. 24. Did or did not Mr. Pramer on that occasion express his entire satisfaction to Norton for his whole course and conduct in that matter to which you have referred in your last answer?

(Same objection.)

A. He said that that transaction was perfectly straight between Norton and himself, and said that he objected very strongly to the law not allowing the money to be returned on disallowed claims.

Cross examination:

By Mr. CLARKE:

X Q. 25. How do you know what Mr. Norton's character for truth is in this city?

A. Well, all I know is in business relations with Hicks & Wolfe.

X Q. 26. Whose relations with Hicks & Wolfe?

A. His, since I have been with them.

X Q. 27. That is about eight years?

A. Yes.

X Q. 28. During those eight years about how many times have you heard Mr. Norton spoken of?

A. When he was in the city he usually came into Hicks & Wolfe's office, and of course that gave rise to all the conversation that I have ever heard about him.

600 X. Q. 29. What have you heard about him?

A. Well, I never heard anything about his not being a straightforward, honest man.

X Q. 30. Well, what did you hear about him?

A. In what respect do you mean; as a lawyer, citizen, business man, or what?

X Q. 31. In any respect?

A. I heard that he was unfortunate in his business financially.

X Q. 32. Anything else?

A. No; I don't remember of his being spoken of otherwise, except that he was a pretty good patent lawyer.

X Q. 33. Did you ever hear that he did not keep his business engagements?

A. No; I don't recollect having heard that spoken of.

X Q. 34. Does Mr. Norton owe you anything?

A. No.

X Q. 35. Has he ever owed you anything?

A. No.

X Q. 36. Did you ever have any business dealings with him?

A. None whatever.

WILLIAM TOUGH.

Subscribed and sworn to before me this 22d day of August, 1878.

IRVING BROWNE,
Special Examiner.

WILLIAM H. YOUNG, a witness called on the part of the plaintiff, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is William H. Young; aged, 60; residence, Troy; occupation, bookseller and stationer.

601 Q. 2. About how long have you resided in the city of Troy?

A. I was born here, and have resided here ever since.

Q. 3. About how long have you been engaged in the business stated by you in your first answer?

A. Between thirty-six and thirty-seven years.

Q. 4. State the locality of your place of business during those thirty-six or thirty-seven years.

A. From 1842 to 1864 I was at 216 River street, in my business; in 1864 I built the store 8 and 9 First street, and extended it through to this street (First street), occupying stores running through from First to River street.

Q. 5. During the time you have been in business, and if you have no objections, you may state whether that business has not been and is not now quite an extensive business conducted by you?

A. It has been an increasing business until the past few years, and has extended to the city, county, and vicinity.

Q. 6. State whether at the present time you are one of the board of directors of the Mutual National Bank of this city.

A. I am.

Q. 7. State whether you at the present time hold any official place in or connected with the Polytechnic Institute of this city.

A. I am one of the trustees, and also its treasurer; which position of treasurer I have held for the past twenty-seven years, and have been trustee for about seventeen years.

Q. 8. Have you ever been a member of the board of education of the city of Troy; and, if you answer yea, when and what ward did you then represent, if any?

A. I answer, yea; the second ward. I first was elected in 1849 to

represent that ward. In 1866 I represented the eighth ward.
602 Twice I was elected by the common council to fill vacancies, and was in the board for about eleven years.

Q. 9. Have you ever been president of the young men's association of this city?

A. I have.

Q. 10. During the time you have been engaged in business, as well as during the time you held the various official positions named by you in answer to questions, you had the opportunity of becoming well acquainted with business men and men holding official positions in this city, had you not?

A. A general acquaintance.

Q. 11. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 12. About how long have you known him?

A. In the neighborhood of twenty years.

Q. 13. Have you had business transactions with him in the line of your business during that time?

A. Yes, sir.

Q. 14. About how many years, during that time, have you had such business transactions with him?

A. The greater part of that time.

Q. 15. During a portion of that time those transactions have been somewhat extensive, have they not?

A. Yes; for an individual account.

Q. 16. While his office was located in Wotkyns' block for a space of ten years, you supplied his office with stationery and other matter wanted, did you not?

A. Yes.

Q. 17. Does he owe you anything at this time?

A. He does.

Q. 18. State the amount, if you remember.

A. About eighteen hundred dollars. I am also interested in a note for about $400, held by Young & Blake.

Q. 19. You may state in what form the indebtedness named in
603 the last answer exists at the present time; I mean whether it is in book account or in notes.

A. In notes.

Q. 20. State, if you remember, when the book accounts now represented by those notes were first settled and receipted by a note or notes.

A. About December, 1872.

Q. 21. State, if you remember, whether the notes mentioned in your last answer were held by you and by Young & Blake, without being paid in whole or in part until the statute of limitations had barred their collection, and thereby rendered the same entirely worthless.

A. Yes; it had.

Q. 22. Did you at any time call Norton's attention to that fact?

A. Not until after they were due, and past due, and uncollectable in law.

Q. 23. Upon his attention being called by you to that fact, what did he do about it, if anything?

A. He proposed to give me new notes, adding the interest to the date of the new notes.

Q. 24. Was that done?

A. Yes.

Q. 25. You gave up the old and worthless notes and received the new ones in lieu thereof, did you?

(Objected to as immaterial.)

A. I did.

Q. 26. Was that done upon the unasked for proposition by Norton, other than your presenting the notes to him, and stating the facts of their having been outlawed?

(Same objection.)

A. It was.

604 Q. 27. In view of the testimony already given by you in this matter, have you the means of knowing the character of Marcus P. Norton for truth and veracity in this city?

A. So far as I know from my own knowledge, I have no reason to doubt his character for truth and veracity.

Q. 28. Do you consider it good or bad?

(Objected to as designedly ambiguous.)

A. I consider it good.

Q. 29. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

(Objected to because the proper foundation for the question is not laid.)

A. I would.

Q. 30. Have you at this time an open account with Marcus P. Norton?

(Objected to as immaterial.)

A. I have.

Cross-examination:

By Mr. CLARKE:

X Q. 31. How do you determine that Mr. Norton's character for truth in this city is good?

A. Well, from my own general knowledge and business transactions.

X Q. 32. Do you mean your personal knowledge of him and dealings with him?

A. Yes.

X Q. 33. Do you allow anything else to influence you in determining this point other than your own personal knowledge of and dealings with him?

A. I don't know that I do.

X Q. 34. Do you allow rumor and report to influence you at all?

605 A. No; I do not, and have not.

X Q. 35. Suppose that you had had extensive dealings with a man, in which he had always treated you squarely and uprightly, and suppose it was currently reported in the community that that man was a liar, would you say that that man's character for truth was good or bad?

A. Well, current report, without any direct knowledge, I should say that it was good.

X Q. 36. I understand you to mean that you would consider a man's character good unless you had personal knowledge of his untruthfulness. Is that correct?

A. Having had transactions with a supposed party for a number of years, and found him truthful to me, if I heard in the street that that man was a liar, I would not believe it unless I had proof of it.

Redirect examination:

By Mr. NORTON:

R. D. 37. Have you ever heard any man, woman, or child, within the past twenty years, in this city, say Marcus P. Norton was a liar?

A. I have not, that I recollect of.

R. D. 38. Did you ever hear anybody question his character for truth and veracity, in this city?

A. No; I can't recall a single instance of that kind.

Recross-examination:

By Mr. CLARKE:

R. C. 39. How often have you heard Mr. Norton spoken of in any way within the last seven or eight years?

A. I don't know that I can answer that question.

R. C. 40. Has it been frequently or seldom?

A. Seldom.

606 R. C. 41. When do you expect to be paid the debt Mr. Norton owes you?

A. The notes which he has given me will be due in July next, and I expect that they will be paid when they become due.

R. C. 42. Who did you ever hear say anything about Mr. Norton?

A. Well, I don't know that I can recall any names.

WM. H. YOUNG.

Subscribed and sworn to before me this 22d day of August, 1878.

IRVING BROWNE,
Special Examiner.

JOHN T. LAMPORT, a witness called on the part of the plaintiff, first being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is John T. Lamport. My age is 68. My profession is that of attorney at law. I reside in the city of Troy.

Q. 2. About how long have you resided in the city of Troy?

A. Fifty-six years on the first day of May last.

Q. 3. About how long have you been a member of the bar of Rensselaer County, and practiced your profession in this city?

A. I was admitted to practice law in the supreme court at the May term, 1831, and have continued to practice that profession ever since, except while I was city chamberlain for eight or ten years, during which time my practice was very limited, necessarily.

Q. 4. You speak in your last answer of having been chamber-
607 lain of the city of Troy, and of having held that office for about ten years. Was that an official place of honor and of trust?

A. It is so generally regarded. I so regard it.

Q. 5. What official place, if any, do you now hold under the law or by the authority of the circuit court of the United States for the northern district of New York?

A. I am a commissioner of the United States circuit court for the northern district of New York, and also an examiner in equity in the same court.

Q. 6. About how long have you held those positions, and by whom were you appointed?

A. The positions to which I refer were conferred upon me by the circuit court of the United States for the northern district of New York, Judge Samuel Nelson presiding, Judge N. K. Hall, district judge, I

think. I was appointed in 1861, and have held the office ever since, and hold it now.

Q. 7. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 8. About how long have you known him?

A. Since 1854 or 1855, I think.

Q. 9. State whether he ever appeared before you in taking of testimony in patent or other causes, in your official capacity as United States commissioner or examiner in equity.

A. He has, in many cases. This occurred during the years extending from 1862 down to the present time.

Q. 10. Do you know the character of Marcus P. Norton for truth and veracity, in this city?

A. I think I do.

Q. 11. Do you consider it good or bad, as to truth and veracity?

A. I regard it as good.

Q. 12. From your knowledge of him and of his character for truth and veracity, would you believe him under oath?

(Objected to as improperly worded.)

608 A. I should.

Q. 13. Have you previously been examined as a witness in this cause?

A. I was.

Q. 14. By whom and for whom were you subpœnaed to appear as a witness?

A. I was subpœnaed by one of the parties, but I am at a loss now to say which one.

Q. 15. When was that?

A. I think it was within the past year; I can't say exactly when.

Q. 16. Who, if you remember, conducted your examination in chief?

A. My examination was conducted by Mr. Clarke, now present.

Cross-examination:

By Mr. CLARKE:

X Q. 17. What are your means of knowing what Mr. Norton's reputation is for truth and veracity?

A. A somewhat intimate acquaintance with him, different remarks of people of the city, the extent of his business before me, and within my knowledge.

X Q. 18. What are those remarks which you have heard?

A. In regard to the conduct of causes in which he was engaged, I have heard him spoken of as an impulsive man.

X Q. 19. Did you ever hear anything else said about him?

A. Yes, sir; I have heard it said that he did not value money very highly—an inclination to indulge in a somewhat expensive taste in fitting up his office and library.

X Q. 20. Anything else?

A. I don't know that I think of anything else now.

X Q. 21. Did you ever hear his reputation for truth and veracity discussed at all?

609 A. I have no recollection at the present time of hearing it discussed, but I cannot say that it has not been discussed.

X Q. 22. Do you know what his reputation is as regards truth?

A. Nothing further than I have stated.

X Q. 23. Did you ever hear of Mr. Norton being impeached in 1863, in a case between William E. Hagan and a man called Groom?

know a firm by the name of H. Burden & Sons, in this city, by reputation or otherwise?

613 A. I did.

Q. 13. If you know, you may state what kind of business was carried on by that firm.

A. Manufacturing iron, railroad spikes, and horseshoes.

Q. 14. Did you hear or know of a controversy or litigation between the two firms, or some persons thereof, with reference to patented machinery, said to have been used in their works, while you were employed by Corning, Winslow & Company?

(Objected to as immaterial.)

A. Yes; the great spike suit.

Q. 15. Do you remember any other suit or litigation?

A. Yes; the horseshoe machine suit.

Q. 16. About how far apart are the works formerly belonging to Corning, Winslow & Company, and those of H. Burden & Sons, and in what part of this city are each of those works situated?

(Same objection.)

A. Both are in South Troy; one is on one side of the Wynantskill Creek and the other on the other side, not very far apart.

Q. 17. Do you know Marcus P. Norton of this city?

A. I do.

Q. 18. And about how long have you known him?

A. About twenty years.

Q. 19. While you were in the employment of Corning, Winslow & Company, do you know whether he was one of their counsel in the patent business and in litigated cases, involving one or more patents?

A. He was.

Q. 20. Did you frequently see him in conference with Mr. John F. Winslow?

614 A. I did.

Q. 21. State, if you know, whether that firm paid Marcus P. Norton for services in sums large or small.

(Same objection.)

A. They paid him in checks, generally of about one thousand dollars apiece; sometimes larger, sometimes smaller.

Q. 22. Do you know his character for truth and veracity in this city?

A. I never heard it doubted.

Q. 23. Do you consider it good or bad in this city?

A. I have never heard anything against it, and I consider it good.

Q. 24. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 25. Have you ever had any personal dealings with Mr. Norton?

A. Only on business.

X Q. 26. What business?

A. When I was in the employ of the Albany Iron Works.

X Q. 27. How long ago was that?

A. Ten years ago.

X Q. 28. Have you had anything to do with Mr. Norton within the past ten years?

A. No.

X Q. 29. How often have you heard him spoken of in any way by anybody within that time?

A. I haven't heard him spoken of since he was doing business for the Albany Iron Works.

615 X Q. 30. What business did he do for the Albany Iron Works ten years ago?

A. He was one of the counsel in the spike and other suits.

X Q. 31. Whom did you hear speak of him at that time?

A. I heard David L. Seymour, Mr. Peterson, his partner, and John F. Winslow.

X Q. 32. Winslow had what connection with the Albany Iron Works?

A. A partner; or one of the partners.

X Q. 33. How often did you use to hear Mr. Norton spoken of in those days?

A. Frequently.

X Q. 34. Principally by people connected with the Albany Iron Works, or those suits?

A. Yes.

X Q. 35. Did you ever hear of an attempt being made to impeach Mr. Norton's character for truth about the year 1863, in a case in which William E. Hagan was plaintiff and Shavor, Potter and Groom were defendants?

A. Not that I remember.

Redirect examination:

By Mr. NORTON:

R. D. 36. In answer to question 31, you substantially state that you had heard David L. Seymour, John F. Winslow, and Mr. Peterson, then a partner of Mr. Seymour's, speak concerning Marcus P. Norton; what was the business, if you know, of Seymour and Peterson?

(Objected to as immaterial.)

A. They were other council in the same suits, and they were lawyers in this city.

616 R. D. 37. Was not David L. Seymour at that time known in this community as a very able lawyer?

A. He was.

R. D. 38. You may state, if you remember, the substance of what you heard those three gentlemen state with reference to Norton, and in as brief a manner as you may deem best.

A. Only in regard to the suits pending at that time.

R. D. 39. It was only in reference to those suits pending?

A. That is all.

THOS. EDGLEY.

Subscribed and sworn to before me this 23d day of August, 1878.

IRVING BROWNE,
Special Examiner.

Complainant's counsel here offers in evidence a certified copy of an opinion and decision signed J. J. Coombs, S. H. Hodges, and S. C. Sheker, examiners-in-chief in the United States Patent Office, in the interference case between the application of William E. Hagan for a method of burning fuel for generating heat, and the patent granted to Smith Gould June 10, 1862, for improvement in stoves, and on appeal to the examiners-in-chief, United States Patent Office, under date of October 30, 1863, and under the certificate and seal of the United States

Patent Office, dated the 27th day of November, 1863, and signed D. P. Holloway.

Complainant's counsel states that the pencil marks in blue on the several pages of the document were placed there by himself in
617 the year 1863, after having received the paper from the Patent Office.

The paper is here marked "Complainant's Exhibit William E. Hagan and Smith Groom, October 30, 1863, I. B., Ex'r, August 23, 1878."

(Objected to as immaterial, incompetent, and irrelevant, and not properly proved.)

ELISHA WATERS, a witness called on the part of the plaintiff, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Elisha Waters; age 63; Lansingburgh, N. Y.; occupation, paper boat manufacturer. I formerly was in the drug business in the city of Troy.

Q. 2. You have formerly resided in the city of Troy and done business there, have you not?

A. Yes, sir; and for forty years.

Q. 3. About how long have you resided at Lansingburgh?

A. Six years this month.

Q. 4. Lansingburgh is an incorporated village immediately adjoining the city of Troy on the north, is it not?

A. Yes, sir.

Q. 5. You may state whether the business you are now engaged in is or is not an extensive business?

A. It is; our customers are scattered through the United States and other countries. There is nobody in the world making paper boats except ourselves, Elisha Waters & Sons.

Q. 6. Do you know Marcus P. Norton of this city?

A. I do.

Q. 7. You have known him for about what length of time?

618 A. Well, for about twenty years.

Q. 8. So far as you know, what has been his business in the city?

A. I have recognized him as a patent attorney.

Q. 9. Have you, during the time you have known him, employed him as solicitor or counsel in any litigated case, or other cases in the United States Patent Office, or elsewhere?

A. Yes.

Q. 10. You may name, if you remember, one or more cases in the United States circuit court where Norton acted as your attorney or counselor.

A. In the case of Percy and King, interference with a patent, or rather an infringement of a patent.

Q. 11. State, if you remember, what the result of that litigation was; I mean whether you were successful or unsuccessful?

(Objected to as immaterial.)

A. There was a judgment in my favor, and the opposition was broken up.

Q. 12. Do you know the character of Marcus P. Norton for truth and veracity in this city?

(Objected to as ambiguous.)

A. I have never known anything derogatory to it.

Q. 13. Do you consider it good or bad?

(Objected to as immaterial.)

A. Good.

Q. 14. From your knowledge of his character in this city, would you believe him under oath?

(Same objection.)

A. I would.

619 Q. 15. Did you employ Norton to do a considerable patent business for you, say from the year 1858 to 1870?

A. He was my principal counsel, and did most of my patent business.

Q. 16. Was that business conducted by him acceptably to you or not in all respects?

(Same objection.)

A. It was in every particular.

Cross-examination:

By Mr. CLARKE:

X Q. 17. Does Mr. Norton owe you anything?

A. No, sir.

X Q. 18. When did Mr. Norton last do any business for you?

A. It was about '69; that was done for Waters, Balch & Co. Since this case all our patent business has been done in the name of the present firm, E. Waters & Sons; my son George has charge of that department, so that I don't know much about it.

X Q. 19. How frequently have you heard Mr. Norton spoken of by any one in any way since the year 1869?

A. I seldom hear his name mentioned in any way, except in the line of business and with myself.

X Q. 20. And of such business you have not had much since 1869?

A. No, sir; not much.

X Q. 21. Prior to 1869, how frequently did you hear Mr. Norton spoken of by anyone in any way?

A. I could not tell you, but not very frequently.

X Q. 22. Did you ever hear of an attempt to impeach Mr. Norton's reputation for truth?

A. Yes, sir; I was witness in such a case, which was not successful.

X Q. 23. Was testimony given against his reputation in that case?

620 A. I did not hear any testimony, except what I gave myself.

X Q. 24. What was the case and when?

A. I couldn't tell you.

X Q. 25. Was it the case of Hagan against Groom, and about the year 1863?

A. I don't recollect; it seems as though Hagan had something to do with it.

X Q. 26. You say that that impeachment was not successful; how do you know that?

A. Common report.

X Q. 27. From whom did you hear that?

A. I couldn't tell.

X Q. 28. Did you ever hear of Mr. Norton being impeached in any other case?

A. No, sir.

X Q. 29. Did you ever hear of Mr. Norton being indicted for crime in the district of Columbia, about six years ago?

A. No, sir.

X Q. 30. Did you ever hear of Mr. Norton being debarred from practicing in the Patent-Office, about six years ago?

A. I heard that he was denied the privilege of search among the patents; that was all I heard.

ELISHA WATERS.

Subscribed and sworn to before me this 23 d day of August, 1878.

IRVING BROWNE,
Special Examiner.

GEORGE A. WATERS, a witness called on the part and behalf of the plaintiff, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

621 A. George A. Waters; age, 34; residence, Lansingburgh; occupation, manufacturer.

Q. 2. About how long have you been engaged in the business stated by you in your last answer?

A. Well, as a partner for thirteen years, but previously as a bookkeeper and manager for a number of years, ever since I left school.

Q. 3. About how long have you resided at Lansingburgh?

A. Six years.

Q. 4. Lansingburgh is an incorporated villa ge, immediately adjoining Troy on the north, is it not?

A. It is.

Q. 5. Previous to your going to Lansingburgh to reside, where was your place of business, and where did you reside with your family?

A. My place of business was Troy, and residence at Troy.

Q. 6. About how long had you resided in the city of Troy, and there carried on your manufacturing business, previous to your going to Lansingburgh to reside?

A. I have always resided in the city of Troy, previous to that; about twelve years engaged in business.

Q. 7. State whether the business in which you have been, and are now, engaged, is or is not a business of considerable extent?

A. Yes, sir, I think it is.

Q. 8. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 9. And you have known him for about what length of time?

A. For as long as I can remember.

Q. 10. State, if you know, what has been his business, professionally or otherwise, since you have known him?

A. I have known him as a lawyer, patent attorney.

522 Q. 11. Have you ever had any business with him in the line of his profession?

A. I have.

Q. 12. Frequently or otherwise?

A. Frequently.

Q. 13. Do you know his character for truth and veracity in this city?

A. I have never doubted his truth or veracity.

Q. 14. Do you consider it good or bad, in this city?

(Objected to because the proper foundation has not been laid.)

A. Good.

Q. 15. From your knowledge of his character for truth and veracity would you believe him under oath?

(Objected to as immaterial.)

A. I would, most assuredly.

Q. 16. In answer to question 13, you say, "I have never doubted his truth or veracity"; did you ever hear anybody in this city doubt Norton's character for truth and veracity?

A. No, sir.

Q. 17. Whenever you have occasion in your business matters to consult a lawyer, with reference to your patents, or matters connected with them, or any of them, with whom do you usually confer or consult?

A. With Marcus P. Norton.

Cross-examination:

By Mr. CLARKE:

X Q. 18. What is your business?

A. Manufacturer.

X Q. 19. Of what?

623 A. Paper boats.

X Q. 20. Are you any relative of Elisha Waters, the last witness?

A. I am the son of Elisha Waters.

X Q. 21. What dealings have you had with Mr. Norton since 1869?

A. We have consulted him with reference to a reissue of our patent on paper boats.

X Q. 22. When was that?

A. Well, I don't recollect the date; I think it was about 1869.

X Q. 23. What business have you had with Mr. Norton since 1869, and when?

A. I have had several consultations with him in regard to our patent matters, nothing definite; I think the matter of our patents has been talked about every time I have seen him.

X Q. 24. Well, how often have you seen him since 1869?

A. Well, I should think once or twice a year; we met, not by appointment, but by accident.

X Q. 25. How often have you heard Mr. Norton spoken about in any way, by anybody, since 1869?

A. It would be impossible for me to say.

X Q. 26. Why?

A. Because I can't recollect.

X Q. 27. Well, has it been very frequent?

A. No, sir.

X Q. 28. Comparatively seldom?

A. Yes; I should think so.

X Q. 29. Did you ever hear of Mr. Norton's reputation for truth being impeached, or attempted to be impeached, in any case?

A. No, sir.

X Q. 30. Did you ever hear of Mr. Norton being indicted for forgery, in the District of Columbia, some six or seven years ago?

A. No, sir.

624 X Q. 31. Did you ever hear of Mr. Norton being prohibited from practicing in the Patent Office, or as a patent agent?

A. No, sir.

Redirect examination:

By Mr. NORTON:

R. D. 32. Did you ever board, with your family, at the Mansion House, in this city?

A. Yes, sir.

R. D. 33. Did Norton and his family board there at the same time?

A. Yes, sir.

R. D. 34. What year was that, if you remember?

A. Part of '71 and part of '72.

R. D. 35. State whether you remember, during the year 1875, while Norton was boarding with his family at the Mansion House, in this city, of meeting Norton there for conference and consultation about your patent matters?

(Objected to as immaterial.)

A. I can't tell as to the year, only that it was since '72, when I left there.

R. D. 36. Do you remember by whom the appointment was made, if by anybody?

(Same objection.)

A. I think I wrote requesting the appointment, and that the meeting was the result of that letter.

R. D. 37. Do you remember the particular invention about which that conference was?

A. I think it was in relation to paper oil cans.

R. D. 38. During the last few years have you had as much business requiring the employment of a lawyer as in former years?

625 A. Not of a patent lawyer.

GEO. A. WATERS.

Subscribed and sworn to before me this 23d day of August, 1878.

IRVING BROWNE,
Special Examiner.

CHARLES L. FULLER, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. C. L. Fuller; 48 years old in September; occupation, civil engineer and surveyor; my residence is the city of Troy.

Q. 2. State about how long you have resided at the city of Troy?

A. A little over twenty-five years.

Q. 3. About how long have you been engaged in the business stated in your first answer?

A. Twenty-seven or twenty-eight years.

Q. 4. What official place, if any, have you held since you have resided in the city of Troy?

A. I have been city engineer and surveyor for a little over nineteen years.

Q. 5. State by whom you received the appointment to the official place stated in your last answer?

A. From the common council of the city.

Q. 6. You may state whether you, at this time, have any official place outside of the city of Troy; and, if you answer yea, state the same and where.

A. I had the appointment of village surveyor of Lansingburgh and of Green Island, adjoining the city of Troy.

Q. 7. Do you at this time hold any official place in any other village than those you have named?

A. I do not.

626 Q. 8. Have you at any time? and, if so, state the same.

A. I have, in the village of West Troy, for about fifteen years.

Q. 9. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 10. About how many years have you known him?

A. Somewhere from fifteen to twenty years.

Q. 11. Did he formerly, and for several years reside in this city, in the same part in which you reside?

A. He did.

Q. 12. Do you know his character for truth and veracity in this city?

A. Yes, sir.

Q. 13. Do you consider it good or bad?

A. I consider his character good—never having heard anything to the contrary.

Q. 14. From your knowledge of his character for truth and veracity, would you believe him under oath?

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 15. How do you know Mr. Norton's character for truth in this city?

A. Only as I know the character of other citizens with whom I have been acquainted for twenty years.

X Q. 16. How often have you heard Mr. Norton spoken of by anybody in any way within the last ten years?

A. Well, not very often for the past ten years, for he has been away from here more or less; I have hardly heard his name mentioned for the past six years.

X Q. 17. What part of the city was it you lived in when you lived near Mr. Norton?

627 A. In the vicinity of Fifth, Broadway, and State streets; I lived near the corner of Fifth and Broadway, and he lived near Broadway.

X. Q. 18. How long ago was that?

A. About 1866.

X Q. 19. How long did you live in Mr. Norton's neighborhood?

A. In his immediate neighborhood for about five or six years.

X Q. 20. How often did you hear Mr. Norton spoken of by anybody prior to ten years ago?

A. While he was in business in the Patent Office and our business brought us together somewhat, making drawings, then I heard his name spoken of more frequent.

X Q. 21. Did you ever hear of an attempt being made to impeach Mr. Norton's reputation for truth in any case?

A. I don't recollect of any.

X Q. 22. Did you ever hear of such an attempt made in a case in 1863, in a case in which William E. Hagan was plaintiff, and Groom, Shaver, and Potter were defendants?

A. I heard that there was some trouble between them, but I never knew that they undertook to impeach him.

X Q. 23. Did you ever hear of Mr. Norton being debarred from acting as a solicitor, or as an agent in the Patent Office some six or seven years ago?

A. I think that there was something in the paper about it, but I don't recollect what is was.

X Q. 24. Did you ever hear of Mr. Norton being indicted for forgery in the District of Columbia, some six or seven years ago?

A. I did not, that I now recollect of.

X Q. 25. Did you ever hear anything unfavorable said of Mr. Norton?

A. I may have heard something said in court when the lawyers got to quarreling, but no other time that I recollect of.

628 X Q. 26. Give the name of a person whom you ever heard say anything about Mr. Norton.

A. The draughtsman who was working for Mr. Norton, Mr. Scott, was at the same time working for me, and I have heard him speak of him very often.

X Q. 27. Do you think of anybody else?

A. I presume that I have heard five hundred men speak of him, but I could not give their names now; almost every business man in the city at one time or another.

X Q. 28. And you have never heard anything unfavorable about him except in the court-room?

A. I don't recollect that I have.

X Q. 29. Nothing in regard to financial matters?

A. I think Mr. Norton failed in some way; I know the property was sold, desks and one thing and another.

X Q. 30. Have you had any business dealings with Mr. Norton?

A. I think that I have done work for him, or it was done in my office and I assisted.

X Q. 31. What sort of work?

A. Drawing—making patent drawings.

X Q. 32. Does Mr. Norton owe you anything?

A. No, sir.

X Q. 33. What other relations did you have, if any, with Mr. Norton, aside from those incident to making patent drawings for him?

A. I may have made surveys for him in some cases.

X Q. 34. Were you on intimate social relations with Mr. Norton?

A. No, not particularly.

X Q. 35. Did you and your family call socially on him and his family?

A. No, sir.

C. L. FULLER.

Subscribed and sworn to before me the 23d day of August, 1878.

IRVING BROWNE,
Special Examiner.

629 STEPHEN F. HOYT, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Stephen F. Hoyt; age, 56; residence, Troy; and occupation, newspaper business.

Q. 2. About how many years have you resided in the city of Troy?

A. About twenty seven years.

Q. 3. About how long have you been engaged in the business stated in your first answer?

A. About twenty-seven years; I commenced that business when I first came here.

Q. 4. You supply persons residing in different parts of the city with daily and other newspapers; with magazines and other news matter, do you not?

A. Yes, sir.

Q. 5. State whether, connected with your business, you have a stationery department.

A. Yes, sir; and books.

Q. 6. State whether you supply agents and other persons residing beyond the limits of the city of Troy with various articles in which you deal, and referred to by you in answer to previous questions.

A. Yes, sir.

Q. 7. Your business is quite an extensive business, is it not?

A. Yes, sir.

Q. 8. Do you know Marcus P. Norton, of this city?

A. Yes, sir.

Q. 9. About how long have you known him?

A. Well, I should think twenty years; perhaps longer; I don't know.

Q. 10. During those years, or a greater part of them, have you in the line of your business had more or less dealings with him?

630 A. Yes, sir.

Q. 11. Do you know his character for truth and veracity in this city?

A. I never heard it questioned at all.

Q. 12. Do you consider it good or bad?

A. Good, sir.

Q. 13. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

A. Yes, certainly.

Cross-examination:

By Mr. CLARKE:

X Q. 14. Do you distribute papers and periodicals yourself?

A. No, sir; not for the past three years; we now supply agents and they distribute the papers throughout the city.

X Q. 15. Prior to three years ago, did you personally distribute the newspapers yourself throughout the city?

A. No, sir, not personally; it was done by my employees.

X Q. 16. Did you ever hear of an attempt being made to impeach Mr. Norton's reputation for truth in a case in which William E. Hagan was plaintiff and Groom, Shavor, and Potter were defendants, about fifteen years ago?

A. I do not remember of any such attempt.

X Q. 17. Did you ever hear of Mr. Norton being prohibited from practicing as a solicitor or patent agent in the United States Patent Office?

A. No, sir.

X Q. 18. Did you ever hear of Mr. Norton being indicted for forgery in the District of Columbia about six years ago?

A. No, sir.

631 X Q. 19. Did you ever hear of Mr. Norton's reputation being impeached, or attempted to be impeached, in one of the trials following the assination of President Lincoln?

A. No, sir.

X Q. 20. Did you ever hear anything unfavorably said of Mr. Norton?

A. No, sir.

X Q. 21. Did you ever hear his financial condition discussed at all?

A. I have heard people say that he was slow sometimes in payments.

X Q. 22. Does he owe you anything?

A. No, sir.

X Q. 23. How many times have you heard him spoken of in any way by anybody within the past ten years?

A. Well, perhaps half a dozen times; perhaps more; a person's name may be brought up in conversation once a week or once a month, and perhaps not more than once in five years to be remembered.

X Q. 24. Well, should you say that during the last ten years you had heard Mr. Norton spoken of seldom or frequently?

A. Very seldom, sir.

X Q. 25. In what way have you had business dealings with Mr. Norton?

A. I have sold him goods in my line; newspapers, books, etc.

X Q. 26. Is that all?

A. Yes, that is all; my business dealings have been only in a mercantile way; of course I have known him.

X Q. 27. How well or how intimately have you known Mr. Norton?

A. I have known him the same as I would any one whom I have been doing business with; I know nothing of his private business or affairs.

632 Redirect examination:

By Mr. NORTON:

R. D. 28. Counsel for the defendant, in your cross-examination, by a series of copyrighted questions about attempted impeachment, about disbarment at the Patent Office, and about indictment for forgery, has attempted to throw mud; will you state whether, if any of his statements be correct, and from your twenty years' acquaintance and dealings with Norton, it would not require evidence of the strongest character to convince you that Norton had been guilty of any such stuff?

A. Well, from my acquaintance with Mr. Norton, and all I have ever heard of him, it would require strong evidence for me to believe it.

R. D. 29. During your twenty years' acquaintance with Norton, have you known or heard of his having committed any kind of offense or crime against the laws of the State or country?

(Objected to as immaterial.)

A. I have not heard of any.

R. D. 30. Counsel for the defendant, in his cross-examination, still desiring to keep his mud-machine in operation, asked you about Norton's financial standing, as though a man overtaken by reverses of fortune, or belonging to the poorer classes, could not for those reasons speak the truth; have you ever hesitated to give Norton credit, when he desired it, in the line of your business?

(Same objection.)

A. I have not.

R. D. 31. Has he not, at all times, during your dealings with him, acted honorably and honestly with you?

(Same objection.)

633 A. Yes, sir.

R. D. 32. Counsel for defendant, still continuing to operate his mud-machine, and to slander and vilify this community as being a place of slander and of gossip, similar, perhaps, to the one in which he was born and educated, asked you a question as though you were busy making memorandums every time you heard a man spoken of, substantially asked you how many times you had heard Norton spoken of within the last twenty years; can you or do you pretend to recollect the number of times you have heard anybody spoken of within that length of time?

(Objected to for its false assumptions.)

A. No, I cannot recollect; I have no note of any such fact as that; people's names are mentioned every day, of course, in conversation.

R. D. 33. You have a large number of business and other acquaintances in this city, have you not?

A. Yes, sir.

R. D. 34. And in various and different parts of the city.

A. Yes, sir.

R. D. 35. Is there any correction in your testimony you wish to make?

A. Only this, that during this twenty years of my acquaintance with Mr. Norton, I was South two years, and I was in business in Albany two years, and my acquaintance with him was renewed on my return. I sold him goods while I was in Albany. I left Troy in '67 for the South, and I returned, I think, in '71 to Troy from Albany. I was in the South only a couple of years.

S. F. HOYT.

Subscribed and sworn before me this 24th day of August, '78.

IRVING BROWNE,
Special Examiner.

634 JAMES W. CUSACK, a witness called on behalf of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is James W. Cusack; my age is 46; my occupation is a jeweler; my residence, 58 Second street, Troy, N. Y.

Q. 2. State about how long you have resided in the city of Troy.

A. Well, I was born here and have never resided anywhere else; it is my native place.

Q. 3. For about what length of time have you been engaged in the business stated by you in your first answer?

A. I have been in the jewelry business about thirty-three years; I commenced when I was thirteen.

Q. 4. And has it been in the city of Troy during all that time?

A. Yes, sir.

Q. 5. Your business, continued for the length of time you speak of, has brought you into an acquaintance with or knowledge of a large portion of the business men in the city of Troy, as well as an acquaintance with families of high social standing in this city, has it not?

A. Yes, sir.

Q. 6. You are doing a somewhat extensive business in this city, are you not?

A. Yes, sir; in the jewelry business.

Q. 7. State where your store or business place in the city is located.

A. No. 3 Times building, Troy Daily Times building.

Q. 8. On Broadway?

A. On Broadway; yes, sir.

Q. 9. About how long have you been located there?

635 A. I think it is going on six years; ever since that building was put up.

Q. 10. Previous to your going there with your business, where did you carry on business in the line stated by you in your answers to questions put to you in this examination?

A. 248 River street.

Q. 11. Do you know Marcus P. Norton, of this city?

A. I do, sir.

Q. 12. You have known him for about what length of time?

A. I think my acquaintance with him commenced in 1861.

Q. 13. Do you remember the company during the war known as the Home Guard?

A. Yes.

Q. 14. Of whom was that company of Home Guards composed; I do not ask you to state the names?

A. It was composed of the best men in the city, among them the mayor of the city, and John A. Griswold, and of the best citizens who were too old to enlist, but were banded together to put down any disturbance here at home.

Q. 15. Were you a member of that organization?

A. I was.

Q. 16. Do you remember whether Marcus P. Norton was a member of that company?

A. I am pretty certain that he was. It was pretty long ago to individualize men, but all the prominent men in the city belonged to the company.

Q. 17. Did you, during your acquaintance with Marcus P. Norton, have any business dealings with him?

A. I did.

Q. 18. To any considerable extent?

A. Yes, sir; a good many hundreds of dollars.

Q. 19. Do you know his character for truth and veracity in this city?

636 A. I don't know anything contrary to that; it is as good as anyone else's.

Q. 20. Then do you consider it good or bad?

A. I consider it good.

Q. 21. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

A. Certainly I would.

Q. 22. To save counsel for the defendant pain and trouble to inquire of you on cross-examination, I ask you whether Mr. Norton owes you anything at this time?

A. No, sir; he does not.

Q. 23. To save counsel on the other side the performance of any other painful duty on his cross-examination of you, let me ask you if you have heard that Mr. Norton was a great or small criminal of any kind?

A. No, sir; I never did.

Q. 24. To save defendant's counsel yet another painful duty on your cross-examination, let me ask you if it is your habit to recollect how many times you have ever heard any man spoken of, or whether you keep a book in your store in which you record anything and everything which you may have heard about anybody?

A. No, sir; that is too silly a question to ask a man.

Cross examination:

By Mr. CLARKE:

X Q. 25. Have you been absent for any length of time since 1861 from the city?

A. No, sir; not at any one time, except during vacations, and those are for a short time.

X Q. 26. Has Mr. Norton ever owed you anything?

A. Yes, sir.

637 X Q. 27. When last?

A. I couldn't tell you; that was a good while ago. The account has been been balanced for a great many years; that is, a number of years.

X Q. 28. Did you ever hear of an attempt being made to impeach Mr. Norton's reputation for truth, about fifteen years ago, in a case in

which William E. Hagan was plaintiff, and Groom, Shavor, and Potter were defendants?

A. It seems to me that I do recollect of something of that kind in the papers, but it had no effect upon me. I thought it was some squabble among themselves.

X Q. 29. What means have you for knowing Mr. Norton's character for truth in this city?

A. I had a great deal of dealings with him myself, and I have never found him to be untruthful when it was possible for him to fulfill his promises; he sometimes promised me money, and when the time came was unable to pay it, but paid it when he had it to pay.

X Q. 30. Do you allow rumor or report to influence you at all in determining whether his character is good or bad?

A. Not much; no, sir.

X Q. 31. When, on your direct examination, you stated that Mr. Norton's character for truth in this city was good, you based that statement upon your personal knowledge of and dealings with him, as I understand; is that correct?

A. Yes, sir.

X Q. 32. Do you allow anything else to influence you?

A. No, there was nothing else to influence me that I know of.

X Q. 33. Did you ever hear anything unfavorable said of Mr. Norton?

A. Yes, in politics; Mr. Norton was a strong partisan, and opposed to my party. I always gave him the credit of trying to do what
638 he thought was right. I gave him credit for being honest in what he said.

X Q. 34. How many times, in the last ten years, have you heard Mr. Norton spoken of in any way by anybody?

A. Very seldom.

Redirect examination:

By Mr. NORTON.

R. D. 35. To what political party does Norton belong, if you know?

A. He was a Republican, but I don't know what his party is now.

R. D. 36. Did you ever hear him make any speech in behalf of the Republican party?

A. I did, and rabid ones, too, and a good many of them.

R. D. 37. To what political party did you belong?

A. Democratic.

JAS. W. CUSACK.

Subscribed and sworn to before me this 24th day of August, 1878.

IRVING BROWNE,
Special Examiner.

ROBERT M. HASBROUCK, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Robert M. Hasbrouck; my age is 55; my residence is Troy; and occupation civil engineer.

639 Q. 2. About how long have you been engaged in the business stated by you in your last answer?

A. Since the spring of 1839—nearly forty years.

Q. 3. About how long have you resided in the city of Troy?

A. About four years.

Q. 4. About how long have you had an office there for the conducting of your business as civil engineer?

A. Since the year 1865 or 1866.

Q. 5. State whether, at the present time, you hold any official position in the city of Troy.

A. Well, I am city engineer, which is the title to that office named in the city charter.

Q. 6. About how long have you been city engineer for this city?

A. About three years and a half.

Q. 7. By whom was that appointment made?

A. By the mayor of the city, and confirmed by the common council. I have been twice appointed and twice confirmed within that time to that office by the mayor and common council.

Q. 8. Have you ever been a member of the legislature of the State of New York?

A. Yes, sir.

Q. 9. From what district, and during what time?

A. From the upper district in this county. I think it is the second district. I was elected in the fall of 1864 for the year 1865, and held the office during that year.

Q. 10. The city of Troy is in Rensselaer County, is it not?

A. Yes, sir.

Q. 11. State whether you were or were not a delegate in the Chicago convention nominating President Grant for his first Presidential term?

A. I was.

Q. 12. State what Congressional or other district you represented in that convention.

640 A. It was the district composed of the counties of Rensselaer and Washington; the number of the district at that time I don't remember.

Q. 13. State whether it is the same Congressional district now represented by Martin I. Townsend in Congress.

A. It is, and was then represented by John A. Griswold, I think.

Q. 14. Do you know Marcus P. Norton, of this city?

A. Yes, sir.

Q. 15. You have known him for about what length of time?

A. Twelve or thirteen years.

Q. 16. What have you known or understood to have been his business within that time?

A. What might be called a patent lawyer—a lawyer whose specialty was patents or patent business.

Q. 17. Do you know his character for truth and veracity in this city?

A. I never heard his character attacked. I believe it to be good.

Q. 18. Do you consider his character for truth and veracity in this city good or bad?

A. Good.

Q. 19. From your knowledge of his character for truth and veracity, would you believe him under oath?

A. Certainly.

Q. 20. Do you remember that during the latter part of 1868, or fore part of 1869, of having written a letter addressed to General Grant, President-elect, recommending him to appoint Marcus P. Norton to the office of governor of the Territory of Wyoming?

A. Yes, I recollect of writing a letter to the President-elect, recommending the appointment of Marcus P. Norton to the governorship of a Territory, and I think the Territory was Wyoming. I remember distinctly having written the letter.

641 Cross examination:

By Mr. CLARKE:

X Q. 21. Have you had any business dealings with Mr. Norton?

A. No, sir; not that I remember of.

X Q. 22. You have known him how long?

A. Thirteen years, I think.

X Q. 23. How did you become acquainted with him—under what circumstances?

A. I think I had an inquiry to make of him about that time—thirteen years ago—and I called upon him at his office, and I think that was the first acquaintance I had with him.

X Q. 24. How often have you seen him since?

A. A hundred times, I guess.

X Q. 25. In what way—by appointment, or casual meeting?

A. Sometimes by appointment—several times by appointment; that is as definite as I can be.

X Q. 26. What was the nature of the business of those appointments?

A. I don't recollect, except that some of those appointments were in relation to this appointment as governor of Wyoming.

X Q. 27. Whereabouts is your residence?

A. 271 River street, Troy.

X Q. 28. Have you been in the habit of calling upon Mr. Norton or his family, or they upon you?

A. Sometimes when he was in the city he would call at my office; how many times, I can't say; he and my family have never met, so far as I know.

X Q. 29. Have you ever heard of Mr. Norton being indicted for forgery, in the District of Columbia, some six or seven years ago?

A. No, sir; I have not.

X Q. 30. Have you ever heard of Mr. Norton being debarred from practicing as a solicitor or patent agent in the Patent Office some fifteen years ago?

642 A. No, sir; I never did.

X Q. 31. Have you ever heard of an attempt being made, in any case, to impeach Mr. Norton's reputation for truth?

A. No, sir.

X Q. 32. During the last ten years, how often have you heard Mr. Norton spoken of in any way by anybody; has it been frequently or seldom?

A. Seldom.

X Q. 33. Do you consider yourself an intimate acquaintance of Mr. Norton?

A. Not very intimate.

X Q. 34. Do you know what Mr. Norton's financial position is?

A. No, sir.

X Q. 35. Heard anything about it?

A. I think I have heard something about his financial standing.

X Q. 36. What means have you for knowing what his character for truth in this city is?

A. I don't remember, in all the time that I have known Mr. Norton, to have heard anything against him to which I attached any importance; therefore, I consider his character for truth as I have stated.

X Q. 37. Who first spoke to you about being a witness in this case, and when?

A. Mr. Kellogg, an hour ago.

X Q. 38. Were you subpœnaed?

A. No, sir.

X Q. 39. Why did you come?

A. Well, it was about 12 o'clock, and I was through the pressing business of the morning, and I could well take the time, and this gentleman told me he wanted me to come and testify as to what I knew about Mr. Marcus P. Norton.

X Q. 40. Did you have any conversation with Mr. Norton about what you have testified to in this examination?

643 A. No; not as I understand that question. I did not have any conversation with him as to what I was to testify to. I would like to explain, however, that he told me what he wanted to establish here.

X Q. 41. State what he said, as correctly as you can.

A. He said he had a suit pending in regard to a patented invention; that suit had progressed to a point where his character and standing had been attacked, and he wanted to ask me some questions; he said those questions would be as to the length of time I had known him, and as to his business standing in the community. Without any understanding as to what my answers were to be to those questions, I consented, and this is all.

X Q. 42. Did he say anything else?

A. That is the purport of what he said.

X Q. 43. Well, do you recollect anything else that he said?

A. Yes, sir.

X Q. 44. Let us have it all.

A. He said that this patented invention had been in use by the government—by the Post-Office Department—a number of years; that the question involved a large amount of money; that the suit had been continued for some time—had been commenced some time ago; that is all I recollect now.

Redirect examination:

By Mr. NORTON:

R. D. 45. Counsel for the defendant has been pleased to inquire about Norton's financial standing in this community, evidently for the purpose of operating one of his mud-machines; may I ask you if it is not possible for a man without means to be a truthful and honest man?

A. In my opinion it is.

R. D. 46. Do you remember of an instance recorded where it

644 was said, substantially, "the foxes have holes, and the birds of the air have nests, but the Son of Man hath not where to lay his head'?

A. I think I remember of having read that in the Bible.

R. D. 47. Do you remember of an instance where it was also recorded that "it is easier for a camel to pass through the eye of a needle than for a rich man to enter into the kingdom of heaven"?

A. Yes.

R. H. HASBROUCK.

Subscribed and sworn to before me this 24th day of August, 1878.

IRVING BROWNE,
Special Examiner.

JEROME B. PARMENTER, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Jerome B. Parmenter; age, 41; residence, Troy; occupation, newspaper publisher and editor.

Q. 2. About how long have you resided in the city of Troy?

A. Twenty years and upwards.

Q. 3. About how long have you been engaged in the business stated in your first answer?

A. Eleven years.

Q. 4. Previous to your commencing the business of newspaper publisher and editor, what business were you engaged in, if any?

A. I practiced law for seven years; before that I was at school.

Q. 5. State whether you are, at this time, engaged in the conducting of a daily and weekly newspaper in this city?

645 A. I am.

Q. 6. What is the name of those papers?

A. The Troy Daily Press and the Troy Weekly Press.

Q 7. Have they not a considerable circulation in the city and county?

A. They have a large circulation, and also throughout the State, and the Weekly throughout the United States.

Q. 8. You are not only the editor, but the proprietor of those newspapers?

A. I am.

Q. 9. What are the politics of those papers?

A. Democratic.

Q. 10. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 11. About how long have you known him?

A. Since 1852.

Q. 12. Have you ever been a student with him, and where, if you remember?

A. I have, at the Troy Conference Academy at Poultney, in Vermont, in 1852, and from 1854 for several years at Union College, Schenectady, New York; I have known him ever since in Troy intimately.

Q. 13. Do you know his character for truth and veracity in this city?

A. Why, yes, I think I do.

Q. 14. Do you consider it good or bad?

A. I consider it good.

Q. 15. From your knowledge of his character for truth and veracity in this city, and also from your long and continued acquaintance as stated by you, would you believe him under oath?

(Objected to because the basis stated for the question is improper.)

A. I would unhesitatingly.

646 Cross-examination:

By Mr. CLARKE:

X Q. 16. What are your means for knowing Mr. Norton's character for truth and veracity in this city?

A. I have known him for a long time; I have often heard him talked about, and never to my recollection have I heard his character for truth and veracity questioned.

X Q 17. Did you ever hear of Mr. Norton being indicted for forgery in the District of Columbia, some five or six years ago?

A. I never have, to my recollection.

X Q. 18. Did you ever hear of an attempt to impeach Mr. Norton's character for truth in any case except this?

A. Never to my recollection.

X Q. 19. Did you ever hear of Mr. Norton being debarred or prohibited from practicing in the Patent Office, some six or seven years ago?

A. My recollection is that, some six or seven years ago, I heard some such statement as that, but I had no knowledge of the fact then, and have none now.

X Q. 20. Can you reconcile your intimacy with Mr. Norton, with the existence of the several facts stated in my last questions, supposing them to exist?

A. I can, sir; I don't follow up all the rumors I hear about my acquaintances. and learn whether they are true or false; I had no possible interest in them.

X Q. 21. Well, if you had been as intimate as you say with Mr. Norton, would you not have been likely to have heard of these things?

A. Well, I don't know what is meant by the words "these things," whether it refers to the last alleged charges, which I state that I
647 think I heard a rumor of, or to the former alleged charges, which I state I have no recollection of having heard of.

X Q. 22. Well, the indictment and the impeachment.

A. I have no recollection of having heard of the indictment and the impeachment; I may have heard of the indictment and the impeachment, but I have no recollection of them; it is not remarkable if I should not know of the indictment of Mr. Norton in the District of Columbia, even though I may have known him intimately.

X Q. 23. Well, if there has been an indictment which you have not heard of, and an attempted impeachment which you have not heard of, may there not also exist in this community reports against the reputation of Mr. Norton for truth and veracity, which you know nothing of?

A. For aught I know, there may be people in the city of Troy who would not believe him under oath, but I have often heard his character discussed, and I have heard him offensively spoken of, but to the best of my recollection I never heard his character for truth and veracity questioned. I have heard him spoken of as extravagant in fitting up his offices, and in his gifts to churches, among other things, and of not paying his debts; this is what I mean by saying that I have heard him offensively spoken of.

Redirect examination:

By Mr. NORTON:

R. D. 24. Did you ever hear or know of Norton refusing to pay a just and honest debt?

A. I am unable to answer the question, because I did not know whether the debts were honest or not, and I did not know whether he refused to pay or not. I only know that that was one of the charges brought against him.

648 R. D. 25. Should it appear in evidence in this case that Norton kept an account with the National State Bank in this city, and that between the years 1860 and 1871 he had deposited there to his credit between three hundred and twenty-five thousand and three hundred and sixty thousand dollars, would it not be quite likely in your judgment that he would be apt to pay some debts, if not all given away to churches, and for other charitable purposes?

A. I should think it highly probable.

JEROME B. PARMENTER.

Subscribed and sworn to before me this 24th day of August, 1878.

IRVING BROWNE,
Special Examiner.

PELATIAH J. MARSH, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Pelatiah J. Marsh; age is 48; residence is Lansingburgh, Rensselaer County, New York; my occupation at present is general brokerage; formerly I was engaged in commercial business.

Q. 2. About how long have you resided in Lansingburgh?

A. Ten years last April.

Q. 3. About how far from the north line of the city of Troy?

A. Within 1,200 feet.

Q. 4. Previous to your going to Lansingburgh to live, where did you reside and carry on business?

A. Troy, New York.

649 Q. 5. Is your present business carried on in the city of Troy?

A. My office and place of business has been in the city of Troy since I lived in Lansingburgh.

Q. 6. Have you been subpœnaed to-day to attend as a witness in this case?

A. I have.

Q. 7. Were your per diem and mileage fees paid you?

A. They were.

Q. 8. Do you know Marcus P. Norton, of the city of Troy?

A. I do.

Q. 9. And you have known him for about how many years?

A. For about twenty-five years.

Q. 10. Where did you first become acquainted with Norton?

A. I was introduced to him in Union College in 1854, but my acquaintance did not amount to anything until I came to Troy.

Q. 11. You are a Union College graduate?

A. Yes, sir.

Q. 12. Of what class?

A. Class of 1853.

Q. 13. And a few years after that you became acquainted with Norton in Troy?

A. I did.

Q. 14. Do you know a person in this city by the name of Frederick G. Ransford?

A. I do.

Q. 15. Do you know a person in this city by the name of Jeremiah D. Green?

A. I do.

Q. 16. Did Frederick G. Ransford and Jeremiah D. Green ever call upon you and ask you to be a witness in this case and against Marcus P. Norton?

A. Mr. Ransford called at my office, and Mr. Green met me on the street, and each asked me to be a witness in the case against Norton.

650 Q. 17. What did each of them ask you to testify to against Norton?

A. If I would testify that I would not believe him under oath, or words in substance to that effect.

Q. 18. Did they urge you to come and so testify?

A. They did.

Q. 19. What reply, if any, did you make?

A. I told them that I did not want to do that, and that I could not do that, and that they must let me off, or words in substance to that effect. They talked about old friendship, etc., but I told them they must let me off.

Q. 20. State, if you remember, whether anybody was with them, or either of them, on those occasions?

A. There was a gentleman with Mr. Green, and to the best of my recollection it was the defendant's counsel now present; but I am not sure of it. The gentleman made a motion to either put down my name on a paper from his pocket, or else to take a subpœna from his pocket, but I said that I declined to serve as a witness; that I had in previous years been called as a witness to sustain Mr. Norton's reputation, and would not now testify against him.

Q. 21. Did Mr. Ransford make an appeal to you to be a witness in this case and against Norton?

A. He did.

Q. 22. You may state as near as you remember the substance of that appeal?

A. He wanted to know if I would swear that I wouldn't believe Norton under oath; I stated to him that I would not swear to anything of that kind; that only a few years ago I swore that I would believe him under oath, and that I could not comply with that request. He appealed to me as his an old friend to help him in the emergency; I told him that I could not do it. That is the substance of the conversation between us.

Q. 23. You have had some business dealings with Norton since your acquaintance with him, have you not?

651 A. I have.

Q. 24. Did you find him in those dealings honest and trustworthy, or not?

(Objected to as immaterial.)

A. Between us it was.

Q. 25. He was attorney or counsel for you in some patent case a few years ago, was he not, and other patent matters, that you were interested in?

A. Yes, a number of them.

Q. 26. Do you remember what the suit was about in which Norton was counsel for you?

A. It was against the Wheeler & Wilson Sewing Machine Company. He also obtained a patent on a machine for cutting locks and barrel hoops, which machine was invented by a Mr. Sanford Littlefield, in my employ. And Norton also obtained a patent on an improvement in sewing machines invented by the same man, and that is the same patent on which the suit was afterwards brought against the Wheeler & Wilson Sewing Machine Company.

Q. 27. Did you also consult with Norton about other patent matters? And, if so, state what.

A. I did. I consulted with him in regard to my purchase of a portion of Densmore's patent on feathering steamboat paddle-wheels; I also frequently consulted with him on other patent inventions. And I occasionally loaned him money, and he always paid it.

Q. 28. What advice, if any, did he give you about the paddle-wheel patent?

A. He told me to keep out of it, that there were so many patents on the same thing, he did not believe the thing would be a success.

Q. 29. Did you afterwards take an interest in that patent?

A. did.

Q. 30. Did you make or lose on the investment?

A. I lost five thousand dollars on the investment before I got through.

652 Q. 31. If you know anything about the business carried on by Mr. Norton in the line of his profession in this city, you my state such as you remember about it.

A. Only in a general way, that for a number of years he apparently had all the patent right business that he and a number of clerks could attend to, and apparently he was in very flourishing circumstances, and stood high in the estimation of the community as a patent right lawyer.

Cross-examination:

By MR. CLARKE:

X Q. 32. What emergency did Ransford say he was in when he came to see you?

A. In substance, I understood him to say that taking evidence in a stamp suit, Norton was trying to swear his interest away from him. This I understood to be his emergency.

TROY, N. Y., *Monday, August* 26.

Met at 9 a. m., pursuant to adjournment of Saturday last.

Same counsel as before.

Cross-examination resumed:

By MR. CLARKE:

X Q. 33. Did Ransford use the term "emergency"?

A. Well, I would not swear positively, but he used expressions equivalent to it, if he did not use that word.

X Q. 34. Did he use the term "help me"?

A. Or the words "assist me"; he used one word or the other; he appealed to me for assistance.

653 X Q. 35. Did he clasp his hands and get down on his knees, and appeal to you for assistance?

A. He did not.

X Q. 36. What did he do when he appealed to you?

A. After talking with me a few moments he left me; merely a matter of words or conversation in which he made his petition. He came into the store and made this request of me.

X Q. 37. He shed some tears, didn't he?

A. His ordinary way of talking is a whining way of talking, especially when asking a favor; I don't say that he expressed any more grief at that time than at any other time in conversation.

X Q. 38. When was this?

A. Well, it is, according to my recollection, in July, 1878, within two months at any rate.

X Q. 39. What day of the week was it?

A. I could not say what day of the week.

X Q. 40. Where was it?

A. It was in the premises of No. 273 River street, Troy, N. Y., in the store where I have my desk.

X Q. 41. Did Ransford have any other business there that day?

A. He did not, with me.

X Q. 42. Who spoke first in the interview?

A. Mr. Ransford.

X Q. 43. What did he say?

A. Well, I can't say what he did say, the first word, but the conversation "from the word go" commenced on the subject that Norton was endeav'ing to swear him out of his interest in this patent. A general conversation ensued on this subject as I stated above; we were together but a few moments when he left.

X Q. 44. In that interview which you said you had with Mr. Green, was any appeal made to you on the score of old friendship or of anything else?

A. No, sir; there was not from Green.

X Q. 45. Was there from anybody?

654 A. Not at that time.

X Q. 46. How many interviews have you had with Green on this subject?

A. Only at that time.

X Q. 47. In answer to question 18, you say they urged you to come and testify; what urging was done by Mr. Green at the time of your interviewing with him?

A. He asked me to become a witness, and repeated the request several times.

X Q. 48. State what your business is in detail?

A. Four years ago I retired from regular commercial business, from the then firm of Danchy, Travis & Co., wholesale dealers in oils, paints, etc.; since that time by business has been in leasing and collecting rents from my real estate; building on my real estate; buying and selling real estate for myself; buying bonds and mortgages for myself, and selling the same; discounting commercial paper.

X Q. 49. Did Mr. Ransford say that he had any interest in the pending suit at the time that you talked with him?

A. He did.

X Q. 50. What interest?

A. He didn't describe to me how much or what extent of interest he had in this suit, but said that Norton was either trying to cheat or swear him out of his interest in this stamp patent that he had. He didn't explain as to what interest he had in this patent. And I think he appealed to me and said that "you know that I have had an interest in this patent for some time, and Norton is trying to swear me out of my interest in it."

X Q. 51. Are you sure that Ransford said that he had an interest in this suit; didn't he say that he had an interest in the post-office stamp?

A. Well, I won't be certain as to how he used the expression; whether he used one of the phrases, "the stamp" or "suit," or both of them;

655 but I inferred from his remarks made at that time that the results of this suit would determine whether he would ever receive anything from the stamp or not; that if this suit went in favor of Norton he would never get anything from it, but that if he was unsuccessful he would get something; that was what I inferred from the conversation.

Redirect examination:

By Mr. NORTON:

R. D. 52. On your cross-examination you speak of having had conversation with Mr. Ransford about this suit or the patent on which the suit is founded, that Ransford claimed to have some kind of an interest in it, and that he wanted you to come in before this referee and testify against Norton; what, if anything, did he tell you that he wanted you to do against Norton?

A. He wanted me to swear that I would not believe him under oath.

R. D. 53. Did he indicate to you in any way the necessity of destroying Norton's character in this case?

A. The general character of our conversation was to that effect, he led me to infer.

R. D. 54. How many interviews has Mr. Ransford had with you on this subject within the past three or four months?

A. Only that one.

R. D. 55. What, if anything, did he ever say to you on that or any other occasion about putting Norton through?

(Objected to as not within the scope of the direct examination.)

A. At that conversation I don't recollect of his having made use of any expression of that nature, of putting Norton through; yet it
656 is quite possible that he may have, as he has made use of that expression, or words to that effect, a number of times within the last eight or ten years.

R. D. 56. State generally what you may now remember of having heard Ransford say about or against Norton during the last eight or ten years.

(Same objection.)

A. I cannot state anything only in a general way, and that to the effect a part of the time he would make statements highly in favor of Norton, that parties were trying to cheat him, and trying to rob Norton, and get his patents away from him; then subsequently he was very venomous on him—the biggest cheat or fraud there was in the country; he was at the two extremes; I don't claim to use his words, only the substance of them; always claiming that he, Ransford himself, had a wonderful "bonanza" locked up in this matter in some shape; that he had got Jerry D. Green in his employ, and that he would pull him through all right; that is the substance of it.

R. D. 57. What, if anything, did he say about Jeremiah D. Green's ability to pull him through and help him to this big bonanza, of which you speak in your last answer.

(Same objection and as immaterial.)

A. That green was "hell" like a dog by the root, and would never give it up until he had pulled him through, and received the large sum which he claimed, from a million to a million and a half dollars.

R. D. 58. If you remember, state whether Ransford said anything about having employed Jeremiah D. Green to act for him in the city of Washington, District of Columbia, in connection with the patent.

(Same objection.)

657 A. He said he had; I laughed at him for employing a man with a limited experience that Green must necessarily have, in regard to patent-right laws, and the general United States law governing such matters, and to which he made the reply stated above.

R. D. 59. Did Ransford say to you anything about having sent Jerry D. Green to the United States Patent Office, to there attend to business concerning this patent or stamping device?

(Same objections.)

A. Yes, he did, and this conversation was about matters at the Patent Office; I refer to the conversation above stated.

R. D. 60. About how long ago do you think this was?

A. Within the last seven or eight years.

R. D. 61. If I understand you correctly on your cross-examination, when Mr. Ransford applied to you for your friendly assistance to him, to help break down Norton, in an effort to impeach him for truth and

veracity, you told him you would not do that; am I correct in this understanding of your testimony?

A. You are.

R. D. 62. Did you assign to him at that time any reason for that refusal?

(Same objection.)

A. I did.

R. D. 63. State the reason you then assigned.

(Same objection.)

A. That only a few years ago I swore that I would believe Norton under oath.

R. D. 64. In what case was it that you so swore?

(Same objection.)

658 A. In a case before the United States commissioner, in interference of William E. Hagan against Jacob Shavor, Lewis Potter and Smith Groom; I was examined in that case on the 8th day of April, 1863, as appears from a printed record now shown me.

R. D. 65. Have you, since your examination in that suit, notwithstanding all you may have heard against Norton, from any source whatever, changed your opinion of Norton's character for truth and veracity, as you then and there expressed it?

(Objected to as immaterial and not within the scope of the direct examination.)

A. No, I have not.

R. D. 66. Without any hesitation to-day, are you willing here to testify that you would believe him under oath?

(Same objections.)

A. I am.

R. D. 67. And you do so testify, do you not?

(Same objections.)

A. I do.

R. D. 68. If I understood you on your cross-examination, you have stated in substance that Mr. Ransford had at one time, years ago, been a partner of yours in some business transactions; if I am correct in that, in what year was it?

(Same objections.)

A. Year 1864 or '65, or both years; my partnership was only temporary with him.

659 R. D. 69. Is Ransford at this time engaged in any business in this city, that you are aware of?

(Same objections.)

A. Not that I am aware of.

PELATIAH J. MARSH.

Subscribed and sworn to before me this 26th day of August, 1878.

IRVING BROWNE,
Special Examiner.

WILLIAM H. LAWTON, a witness called on the part of the plaintiff, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is W. H. Lawton; age, 47; residence, Troy, N. Y.; occupation, clothing merchant.

Q. 2. About how long have you resided in the city of Troy?

A. Since about 1850, twenty-eight years.

Q. 3. State the street and number on street of your store in this city.
A. 292 River street.
Q. 4. And you have been located there about how many years?
A. About twenty-five years.
Q. 5. In what part of the city is your residence?
A. 31 Seventh street.
Q. 6. Have you formerly held an official place in the militia of this State?
A. I have.
Q. 7. What was it?
A. Well, I held several.
Q. 8. Name, as near as you remember.
A. I have been paymaster of the Tenth Brigade, with the rank of captain; lieutenant-colonel commanding the Twenty-fourth Regiment; I was inspector of the Tenth Brigade, with the rank of major;
660 now I hold the position of inspector of the Third Division, with the rank of colonel.
Q. 9. State whether you are at this time one of Major-General Joseph B. Carr's staff officers.
A. I am.
Q. 10. Do you know Marcus P. Norton of this city?
A. Yes, sir; I do.
Q. 11. About how long have you known him?
A. I should say fifteen years or more, I can't say positively.
Q. 12. State whether your family and his resided in the neighborhood of each other at one time in this city.
A. They did.
Q. 13. Do you know his character for truth and veracity in this city?
A. Well, I never heard anything against it.
Q. 14. Do you consider it good or bad?
A. I consider it good.
Q. 15. From what you know of his character for truth and veracity in this city, would you believe him under oath?
A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 16. How did you become acquainted with Mr. Norton?
A. I couldn't positively say.
X Q. 17. Give your best recollection.
A. Well, my impression is I met him in my uncle's store.
X Q. 18. What was he doing in your uncle's store?
A. Well, my impression is that he was making a friendly call or business call, I couldn't tell which.
X Q. 19. What year was that?
A. I could not say.
661 X Q. 20. Give your best recollection.
A. I should say it was fifteen years or more ago.
X Q. 21. When did you next meet him?
A. Well, I couldn't say positively.
X Q. 22. Did you meet him frequently after you met him on that occasion?
A. Yes, sir; I met him frequently on the street and other places.
X Q. 23. Did you have any business with him?
A. No, sir.
X Q. 24. Never had?

A. I think not.

X Q. 25. When you met him, it was a casual, a chance meeting?

A. Yes, sir.

X Q. 26. You would bow to him and say "Good day," and that was about all, was it?

A. I met him as I met other of my acquaintances.

X Q. 27. How often have you met him, should you say, within the last ten years?

A. Well, I could not say, sir.

X Q. 28. Frequently or seldom?

A. Well, not very often of late.

X Q. 29. Did you ever hear of an attempt being made in this city, about fifteen years ago, to impeach Mr. Norton's reputation for truth, in a case in which William E. Hagan was plaintiff, and Groom, Shavor and Potter were defendants?

A. I remember of testifying in a case about ten or fifteen years ago; I don't recollect what the case was.

X Q. 30. Well, did you hear that Mr. Norton's reputation for veracity was then attacked?

A. No, sir; I did not know what the case was, at least I don't remember.

X Q. 31. Did you ever hear of Mr. Norton being debarred or prohibited from practicing as a solicitor or patent agent in the United States Patent Office about six or seven years ago?

A. No, sir.

662 X Q. 32. Did you ever hear of an attempt being made to impeach Mr. Norton's reputation for truth in any suit?

A. If I did, I don't remember.

X Q. 33. Did you ever hear of Mr. Norton being indicted for forgery in the District of Columbia, some six or seven years ago?

A. No, sir.

X Q. 34. Do you know what Mr. Norton's financial standing is now?

A. No, sir.

X Q. 35. Or what it has been within the past five or six years?

A. No, sir; I do not.

X Q. 36. Have you ever heard anybody say anything about Mr. Norton?

A. Well, I don't know that I have heard any one in particular, any more than I would hear about other parties.

X Q. 37. How many times have you heard Mr. Norton spoken of by anybody in any manner?

A. I could not say, sir.

X Q. 38. Has it been frequently or seldom?

A. Seldom, I should think.

X Q. 39. Do you think that you know what his reputation for truth is?

A. Well, I have no reason to doubt his truthfulness.

X Q. 40. When was it that you lived in the same neighborhood with Mr. Norton?

A. At one time it was twelve or fifteen years ago; at another time, I should think, it was just about eight years ago.

X Q. 41. What sort of clothing do you deal in?

A. We manufacture and sell ready-made clothing.

W. H. LAWTON.

Subscribed and sworn to before me this 26th day of August, 1878.

IRVING BROWNE,
Special Examiner.

663 CHARLES L. MACARTHUR, a witness produced on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Charles L. MacArthur; age, 54; residence, Troy, N. Y.; occupation, editor and deputy collector of customs.

Q. 2. You are editor and proprietor of what newspaper in this city?

A. Troy Northern Budget (the firm is C. L. MacArthur & Son).

Q. 3. That is a newspaper having a considerable circulation in the city, county, State, and elsewhere?

A. Yes, sir.

Q. 4. About what length of time have you been conducting that newspaper as stated by you in previous answers?

A. Since 1847, with the exception of a few years, mainly during the war.

Q. 5. About how many years has that newspaper been published in this city by you and by others?

A. Some eighty-odd years.

Q. 6. You are at the present time United States chief officer for the collection of customs for the port of Troy, are you not?

A. Yes.

Q. 7. Have you heretofore held any official position in the city of Troy?

A. I have.

Q. 8. You have resided in the city of Troy for about how many years?

A. Since 1847.

Q. 9. Your position as chief officer of the port of entry of Troy, and the management of your newspaper business in Troy, has brought you into contact with many of the business and official men of the city, has it not, for many years past?

A. It has.

664 Q. 10. You have frequently represented the political party, to which you belong, in conventions and such like, in this city and elsewhere in the State, have you not?

A. I have.

Q. 11. Do you know Marcus P. Norton, of the city of Troy?

A. Yes, sir.

Q. 12. About how long have you known him?

A. Some twenty years; perhaps more.

Q. 13. To save defendant's counsel any painful anxiety, or trouble to inquire of you, may I ask you if you recollect several years ago of an attempt, in the case of William E. Hagan against Jacob Shavor, Lewis Potter, and Smith Groom, an interference case in the United States Patent Office, to impeach the character of Norton for truth and veracity?

A. I remember such an attempt; I don't remember the case.

Q. 14. Do you remember about how many years ago it was?

A. The only way that I can recall the case is that it was during Judge Gould's lifetime, and that he was either a party witness or counsel in the case.

Q. 15. Were you present during any part or portion of that trial?

A. No, I think not.

Q. 16. Do you know Marcus P. Norton's character for truth and veracity in this city?

A. Yes, sir.

Q. 17. Do you consider it good or bad?

A. I consider it good.

Q. 18. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

A. Yes, sir.

665 Cross-examination:

By Mr. CLARKE:

X Q. 19. What means have you of knowing Mr. Norton's character for truth and veracity in this city?

A. Nothing, only general report, and some personal acquaintance with him.

X Q. 20. What do you understand by a man's character for veracity?

A. One whose word would be believed under oath.

X Q. 21. When on your direct examination you said Mr. Norton's character for truth in this city was good; did you mean anything more by that than that his reputation for speaking the truth when under oath was good?

A. No, that was what I understood by it; I did not understand that the question embodied any more than that.

X Q. 22. Now, assuming that a man's character for truth is not solely derived from what he states under oath, but from statements in business and every day association with his neighbors as well, please state what Mr. Norton's reputation for truth is in this community?

A. Outside of promises to pay, I think that his character for veracity stands good.

X Q. 23. Well, as a whole, is it good or bad, so far as you know it?

A. As a whole, I think it is good.

X Q. 24. Have you heard it impugned?

A. Never, outside of those having business difficulties with him.

X Q. 25. I understand that you mean from men having associations with him in business, you have heard things derogatory to his reputation for truth; is that correct?

666 A. I have heard some parties who have had business difficulties with him impugn his character for truth.

X Q. 26. Did you ever hear of Mr. Norton being debarred or prohibited from practicing as a patent agent or solicitor in the Patent Office?

A. I heard of his having difficulties in the Patent Office, but the details I don't know anything about.

X Q. 27. Did you hear of Mr. Norton being indicted for forgery in the District of Columbia, some six or seven years ago?

A. No, sir, I never did; if I did I have forgotten it.

X Q. 28. Did you ever hear of Mr. Norton being pushed by his friends for the governorship of the Territory of Wyoming, during the first part of President Grant's administration?

A. I heard of his being pushed either for the governorship or judgeship of some western territory.

X Q. 29. Did you ever hear of Mr. Norton being pushed for the nomination of United States Senator, at the time Senator Conkling was nominated?

A. Yes, sir; but it was before the assembly was elected or the caucus held which nominated Conkling.

X Q. 30. In answer to question twenty-five, you say you have heard persons who have had business difficulties with Mr. Norton impugn his character for truth.

A. Yes, sir.

X Q. 31. Those statements were made running over how many years back?

A. Perhaps half a dozen years.

Redirect:

By Mr. NORTON:

667 R. D. 32. Name all the persons referred to in your cross-examination who, having had business difficulties with Norton, impugned his character for truth?

A. Frederick G. Ransford; J. D. Green is another, I think; I think Mr. Henry Burden has complained to me at one time during his lifetime of business difficulties with Mr. Norton; and I have heard others in cases where Mr. Norton had not paid them, and they claimed his word was not good in that sense.

R. D. 33. Of the truth of any statement made by those persons to you, had you any knowledge of your own?

(Objected to as immaterial.)

A. No, sir; no personal knowledge.

R. D. 34. Has Norton ever, in any way, falsified his word to you in any manner or nature whatever?

(Same objection.)

A. No, sir.

C. L. MACARTHUR.

Subscribed and sworn to before me this 26th day of August, 1878.

IRVING BROWNE,
Special Examiner.

Adjourned until Tuesday, August 27th, 1878, at 9 o'clock a. m.

668 TROY, N. Y., *August 27th*, 1878.

Met pursuant to adjournment.

Same counsel present as before.

WILLIAM KEMP, a witness produced on behalf of the plaintiff, and duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. William Kemp; nearest birthday is fifty; my occupation is a variety of things, manufacturer; residence, Troy, N. Y.

Q. 2. About how long have you resided in the city of Troy?

A. I was born here, and have been here ever since, with the exception of about two years during my boyhood.

Q. 3. In your answer to the first question you say you are a manufacturer; in what kind of business are you engaged as a manufacturer?

A. I manufacture chain cables, called the American Chain Cable Works; I am proprietor of the Troy Brass Foundry.

Q. 4. About how far apart are your chain cable works and your brass foundry situated?

A. About a mile and a quarter.

Q. 5. And these two works are situated in the city of Troy, are they not?

A. They are.

Q. 6. And about how long have you been engaged in the business stated by you?

A. Since 1851, in the Troy Brass Foundry, and about twelve years in the chain business.

Q. 7. Do you know General Joseph B. Carr, of this city?

A. I do, and he is a partner of mine in the chain works.

669 Q. 8. Are you at this time president of the Mutual National Bank of this city?

A. I am.

Q. 9. Are you also one of the board of directors of that bank?

A. Yes, the law requires that.

Q. 10. Were you ever president of the board of education of this city, and if you answer yea, state the year or years.

A. Yes. I should think from 1858 to 1871.

Q. 11. Have you ever been mayor of the city of Troy?

A. I have, from 1872 to '74.

Q. 12. Are you president of the Troy and Lansinburgh Railroad Company?

A. I am.

Q. 13. In what part of the city is your residence?

A. 62 North Third street, near Christ Church.

Q. 14. In what part of the city is the bank located of which you are president?

A. Corner of State and First streets.

Q. 15. Do you know Marcus P. Norton, of the city of Troy?

A. I do.

Q. 16. About how long have you known him?

A. Since 1860.

Q. 17. Do you remember in the year 1868, or in the fore part of 1869, of having written a letter to General Grant, then President elect of the United States, recommending Norton to the position of governor of the Territory of Wyoming?

A. I have a recollection of something of the kind.

Q. 18. Do you know Marcus P. Norton's reputation for truth and veracity in this city?

A. I think I do.

Q. 19. Do you consider it good or bad?

A. I have no reason to believe it anything but good.

670 Q. 20. From your knowledge of his character for truth and veracity here, would you believe him under oath?

A. Yes.

Cross-examination:

By Mr. CLARKE:

X Q. 21. What did you understand by the phrase "reputation for truth and veracity in this city," when you answered the question 18?

A. What I know about him personally, and not from what others said about him.

X Q. 22. I understand you to mean that you allow nothing else but your personal acquaintance with Mr. Norton to influence you in determining whether his reputation for truth is good or bad; is that correct?

A. Yes.

X Q. 23. Do you not allow yourself to be influenced at all by report or rumor?

A. Not in his case, for many were prejudiced against him on account of eccentricities of his.

X Q. 24. Have you ever had any personal dealings with Mr. Norton?

A. I never have had any financial transactions with him.

X Q. 25. How close has been your association with him?

A. Not very close. I knew him as I knew hundreds of others, socially

and pleasantly; we were connected in or attended the same church in the early part of our acquaintance.

Redirect examination:

By Mr. NORTON:

R. D. 26. Considering anything and everything which you may
671 have heard of Norton, which you have termed "eccentricities," yet would you hesitate to believe Norton under oath, having personally known him for the many years spoken of by you in your direct examination?

(Objected to because it is not proper to make witness' personal knowledge of Mr. Norton a basis of the question, and also because it is not a proper redirect question.)

A. I would not hesitate to believe him under oath.

R. D. 27. Do you remember, while you were mayor of the city, of Norton arguing a case before you as mayor, involving an alleged claim againt the city of Troy?

A. I do.

R. D. 28. In what year was that; do you remember?

A. I think that it was in '73.

R. D. 29. In your cross-examination you have spoken of Christ Church in this city; what official place, if any, have you held in that church?

A. I am one of the wardens of that church.

Recross-examination:

By Mr. CLARKE:

R. C. 30. Suppose Mr. Norton were largely interested in a case, and suppose his testimony in his own favor were in flat conflict with that of another man who, in every respect, stands perfectly fair in the community, against whom nothing is said on account of any "eccentricities;" state which of the two men you would believe.

672 A. I can't answer that question without knowing the circumstances definitely.

WILLIAM KEMP.

Subscribed and sworn to before me this 27th day of August, 1878.

IRVING BROWNE,
Special Examiner.

LEMUEL H. TUPPER, a witness produced on behalf of the plaintiff, being first duly sworn, testifies:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Lemuel H. Tupper; 75 years old; I reside in the city of Troy, county of Rensselaer, and State of New York; my business used to be that of steamboat operator, now it is nothing.

Q. 2. Have you heretofore been superintendent of the Rensselaer and Saratoga Railroad Company?

A. I was for twelve years.

Q. 3. Where was your office as superintendent located?

A. After 1854 it was in the new union railroad depot; previous to that it was in River street, in the city of Troy.

Q. 4. Previous to your being superintendent of the railroad company, were you captain on one of the boats of a steamboat line between the cities of Troy and New York?

A. No, sir; I was general manager and agent of that line from 1833 to 1853.

Q. 5. You have resided in the city of Troy, then, for about how long?

A. Since 1808, with the exception of about one year.

Q. 6. In what part of the city of Troy is your residence located?

673 A. 10 Washington Place.

Q. 7. And it has been there about how many years?

A. Fourteen years.

Q. 8. Do you know Marcus P. Norton, of the city of Troy?

A. I do.

Q. 9. For about how many years?

A. Well, in the neighborhood of twenty.

Q. 10. Do you know Levi Smith of this city, who was a member of the firm of Beach & Smith, of this city, some years ago?

A. I do.

Q. 11. While Beach & Smith were in business together, was that firm one of the attorneys and counselors for the Rensselaer and Saratoga Railroad Company, while you were a superintendent of the same?

A. They were; Beach & Smith were the attorneys of the road.

Q. 12. Did you ever hear Levi Smith speak of Marcus P. Norton in a defaming or derogatory manner as to his character for truth or anything else?

(Objected to as immaterial.)

A. I don't recollect of Smith saying much about Norton; he may have talked about him, but I have forgotten it, it is so long ago.

Q. 13. Anybody of that firm?

A. William Augustus Beach, Mr. Smith's former partner, I have heard speak of him.

Q. 14. What did you hear Mr. Beach say about Mr. Norton, and what was the occasion?

(Same objection.)

A. Mr. Beach wanted me to come forward as a witness to im-

674 peach Marcus P. Norton; I did not want to do it, and he pressed me to do it, and said that such men as I ought to come forward and impeach such men as Norton, or words to that effect. I told him I did not want to do it, as I had not much acquaintance with Mr. Norton; therefore, I told him my testimony would not be of much use to him. He afterwards sent an officer, who came to my house with a subpœna, and said I must come; I went to his office and told him I was going to New York that day, and could not well attend. He asked me when I would be back from New York; I told him not before Saturday; he said, then we will take your testimony on Saturday. Well, I told him I would come then.

Q. 15. In what case was this?

(Same objection.)

A. I do not recollect the title of the case.

Q. 16. Did not William E. Hagan have anything to do with the case?

A. I think so; I understood so at the time.

Q. 17. Did you not also understand then that Beach & Smith were the attorneys for William E. Hagan in that matter?

(Same objection.)

A. I don't know; I couldn't say; I was called for a specific purpose, and I got away as soon as I could.

Q. 18. Were you sworn and examined as a witness against Norton in that case?

(Same objection.)

A. I was.

Q. 19. Where, or in whose office was that examination conducted?

A. In the office corner of State and First; I think it was Beach & Smith's office.

675 Q. 20. What attorney conducted your examination for William E. Hagan, on that occasion?

(Same objection.)

A. Levi Smith on one side, and I think Judge Ingalls on the other, or he and Mr. Norton together; Norton cross-examined me.

Q. 21. Previous to that examination, had any one else called upon you to be a witness in that case, other than the office of Beach & Smith?

(Same objection.)

A. Henry Burden spoke to me on that subject.

Q. 22. Do you remember in substance what you testified to on that occasion?

(Same objection.)

A. I remember I testified that, upon information and belief, I would not believe Marcus P. Norton under oath.

Q. 23. Do you remember to have testified from whom you received the information which led you to testify on that occasion that you would not believe Norton under oath?

(Same objection.)

A. I do.

Q. 24. Name the persons from whom you received such information.

A. Henry Burden was the principal and main one, and also from William A. Beach.

Q. 25. Had you at that time heard anything from anybody, other than those two persons, against Norton's reputation for truth and veracity?

(Same objection.)

676 A. I don't recollect of anything else from anybody else.

Q. 26. You distinctly remember that Henry Burden and William A. Beach spoke to you in terms derogatory to the character of Norton?

(Same objection.)

A. I do.

Q. 27. Was not the firm of Beach & Smith attorneys or counsel for the firm of Henry Burden & Sons.

A. I understood they were.

Q. 28. Did you not also understand at the same time that Mr. Norton was one of the counsel for Corning, Winslow & Company against Mr. Norton?

(Same objection.)

A. I think I did.

Q. 29. In what year was this, and, if you cannot recollect, state about how long ago it was?

(Same objection.)

A. About fifteen years ago.

Q. 30. Since that occasion you have become much better acquainted with Norton than at the time you testified against him?

A. Yes.

Q. 31. You have had since then, and at different times since, some business transactions with him, have you not?

A. I have.

Q. 32. You have occasionally loaned him money, have you not?

A. I have.

Q. 33. At one time you loaned him two thousand dollars in cash, did you not.

A. I did.

677 Q. 34. Exclusive of interest, how much of that sum remains unpaid to you?

A. Between four and five hundred dollars.

Q. 35. Do you remember the occasion in 1870, or 1871, when an effort was made to put Norton in to bankruptcy in the United States court in this district?

A. I do.

Q. 36. Were you one of the assignees elected by the creditors in that matter?

A. I was elected an assignee.

Q. 37. Who was the other assignee, if you remember?

A. William H. Young, I think.

Q. 38. Have you ever heard Frederick G. Ransford of this city speak of Norton in terms derogatory to his character?

A. I have.

Q. 39. About how long since?

A. Well, I guess within the past year.

Q. 40. Do you remember the substance of anything you may have heard him say concerning him within that time?

A. He said that he would not believe him under oath, and the substance of what he said amounted to that he was a rascal in a business point of view.

Q. 41. About how frequently have you heard him make such or similar remarks within the past few years?

A. Perhaps half a dozen times.

Q. 42. Did he use any profane language on those occasions

A. I do not recollect.

Q. 43. How did he seem to appear to you?

A. He seemed to think that you had interfered with the stamp patent to his injury, and prevented his getting a large sum of money on it.

Q. 44. Judging from appearance, did you think that he was happy or unhappy over that matter?

(Objected to as leading and as immaterial.)

678 A. Well, he seemed unhappy.

Q. 45. Do you know Jeremiah D. Green of this city, and if so, how long have you known him?

A. Yes, for fifteen or twenty years.

Q. 46. Did you ever hear him say anything concerning Norton or his character?

A. I have heard him speak derogatory of his character.

Q. 47. About how long ago?

A. Well, within the past year.

Q. 48. State, if you remember, what you heard him say.

(Objected to as immaterial.)

A. Well, the substance of it was that Norton stood in the way of their settlement of the stamp matter with the government, and prevented their getting large sums of money for the stamp patent.

Q. 49. Well, from appearance, did Green seem about as unhappy as Ransford about it?

A. Well, he didn't seem particularly happy about it; he was not pleased with it.

Q. 50. Do you know whether the attempt made in the Hagan matter, when you were examined as an impeaching witness, was a successful, or unsuccessful undertaking?

(Objected to as immaterial.)

A. I don't recollect what the decision was, but I think it was unsuccessful.

Q. 51. Do you know of any reason to-day why you should not believe Norton under oath?

(Objected to as an improper question.)

A. No, I don't know of any; I don't speak from hearsay, but personal knowledge.

679 Q. 52. I have asked you about a balance still due you from Norton; you say it is between three and four hundred, with interest from 1870 to the present time; has there been any payment made on that within the last eight years?

A. Not any; no, I think not within the last seven years.

Q. 53. Do you remember, during last winter, of Norton calling upon you in this city, and stating to you in substance that the statute of limitations had run upon that claim, and of his expressing a desire that you should embody it in the form of a note, and take it out of the statute of limitations?

A. I do; he told me to compute the interest and make a new note, and he would sign it.

Q. 54. Have you that faith, trust, or confidence in Norton that should he become possessed of means sufficient, he will pay you the principal and interest your due on that matter?

A. I think if he becomes possessed of a surplus of money he will pay his debts, and mine among them.

Q. 55. You were frequently in the law offices of Norton in this city while located in Wotkyns' block, and also of Norton & Cowen; state what you observed, if anything, with reference to the business being carried on there.

A. I thought he was doing quite a large business, and had the largest patent business in the city of Troy at that time.

Q. 56. Norton continued there until the bankruptcy proceedings, did he not?

A. Yes, until he was slaughtered by his creditors.

(Complainant's counsel stating that he is through with the examination of the witness, defendant's counsel states that he does not desire to cross-examine the witness.)

Q. 57. Complainant's counsel, further desiring to examine the
680 witness, asks him if he was to-day subpœnaed by the complainant to come here and testify, and also whether his fees per diem and mileage were duly paid him.

A. I was; and my fees were duly paid me.

L. H. TUPPER.

Subscribed and sworn to before me this 27th day of August, 1878.

IRVING BROWNE,
Special Examiner.

WILLIAM E. HAGAN, a witness called on the part of the plaintiff, being first duly sworn, testifies as follows:

Q. 1. State your name, age, residence, and occupation.

A. My name is William E. Hagan; I reside at Troy, New York; age is 51; my business is that of a mechanical and chemical expert.

Q. 2. About how long have you resided in the city of Troy?

A. I was born here, and have resided here ever since.

Q. 3. About how long have you been engaged in the business stated in your first answer?

A. Since 1863.

Q. 4. Previous to that time, and for a number of years before, what had been your business?

A. I had previously been engaged as an apothecary and chemist for about twenty years in this city.

Q. 5. Do you know Marcus P. Norton, of this city?

A. I do.

Q. 6. You have known him for about how many years?

681 A. I have known him since 1860.

Q. 7. Do you remember an interference case before the Commissioner of Patents of William E. Hagan versus Jacob Shavor and Louis Potter, assignees, and Smith Groom, patentee, happening in this city, some years ago?

A. I do remember it.

Q. 8. Were you the party plaintiff in that proceeding?

A. I was.

Q. 9. State, if you remember, what that case was about—I mean the subject-matter of the invention.

A. It was an interfering application for a patent for the use of steam to aid in the combustion of fuel.

Q. 10. You succeeded in that application in obtaining a patent on your invention, did you not?

A. I did.

Q. 11. Was that patent subsequently reissued in two divisions by you?

A. It was.

Q. 12. Did you confer with Norton, and did he ossist you about the reissuing of that patent in two divisions?

A. I think I did; and further think that he drew up one of the claims which appear in it at the present time; and, further, I would state that he had charge of the application at Washington subsequently, and up to its issue.

Q. 13. Was the validity of that patent reissue sustained by Judge Blatchford in his suit in the United States circuit court for the southern district of New York?

A. It was.

Q. 14. Did you personally know Smith Groom, who had previously obtained the patent, and which had been put into interference with your application for a patent in 1862, or the forepart of 1863?

A. I was acquainted with him partially prior to the interfer-
682 ence, and became better acquainted with him after the decision of the point at issue after that interference.

Q. 15. Is Smith Groom now dead, or is he living?

A. He is dead. I think he died in the year 1866 or 1867.

Q. 16. In the progress of that interference case, was Marcus P. Norton examined as a witness for the defendants in that issue?

A. He was.

Q. 17. After his examination, did you undertake to impeach his character for truth and veracity?

A. I did.

Q. 18. On that issue were you successful?

(Objected to on the ground that it is a matter of record.)

A. So far as the matter of impeachment was concerned, I was not. My best recollection of it is that Mr. Norton's evidence was not affected

by the testimony presented on that point, the general features of the case being decided upon other evidence than his, so that his became immaterial.

Q. 19. State whether, subsequent to your obtaining a patent in that case against the outstanding patent of Smith Groom of June 10, 1862, you had any conversation with Smith Groom, the patentee, with reference to any of the issues which were involved in that case?

(Objected to as immaterial.)

A. I did have a conversation with him a few days before his death, at which time he sent for me to come and see him.

Q. 20. Was Groom, at the time of the interview with him, in answer to his request, then in his last sickness?

A. He was.

683 Q. 21. You may state, as near as you remember, the conversation between you and Mr. Groom on the occasion of which you speak.

(Objected to as immaterial, irrelevant, and incompetent.)

A. Mr. Groom said that he had sent for me to correct an impression existing in my mind in regard to Mr. Norton's evidence given in the interference case; that, while his evidence was untrue, it was not intentionally false, for he, Groom, had deceived Mr. Norton in regard to the model and its internal condition at the time Mr. Norton testified that he saw it. He said that he wished to do justice to him, Mr. Norton, as between Mr. Norton and myself, before he died. I have stated the substance of the conversation. I do not remember its exact language.

Q. 22. And Groom died a few days after that, did he not?

A. My best recollection is that he did die at least within a week of that time.

Q. 23. State whether you, soon after the death of Groom, communicated to Norton the substance of the matter stated in your last answer but one?

A. I believe that I did.

Q. 24. Who were your counsel in that interference suit?

A. Gale & Alden and Beach & Smith, of the city of Troy, and Charles M. Keller, of the city of New York.

Q. 25. In the attempted impeachment matter, who conducted the examination for you?

A. Beach & Smith.

Q. 26. After the decision in that case, giving you a patent as against Groom's patent, and sustaining Norton on the question of his truth and veracity, did you become better acquainted with Norton than you were at the beginning of those proceedings?

684 (Objected to as assuming the fact that the decision sustained Mr. Norton's character for truth, the examiner-in-chief having explicitly stated that they did not wade through the testimony.)

A. I did.

Q. 27. What have been your relations with Norton from that time to the present?

A. They have been friendly, and I have acted as an expert in six or more cases in which he was counsel.

Q. 28. Since the time referred to in the last question, have you personally known anything against Norton or his character for truth and veracity, or anything else, that would justify you in testifying under oath that you would not believe him on his oath?

(Same objections.)

A. I have not.

Q. 29. Were you subpœnaed to appear here to-day, and were your per diem and mileage fees paid you.

A. I was subpœnaed and paid the usual fees for attendance and mileage.

Cross-examination:

By Mr. CLARKE:

X Q. 30. State, if you know, what Mr. Norton's reputation is in this community in respect to truth and veracity.

A. I do not know at the present time what it is, any further than my own knowledge makes up a part of public opinion. Mr. Norton has been away from his home in Troy for a good deal of the time, and
685 until last year most of my time was spent in New York City, where there was no opportunity of hearing his character discussed.

X Q. 31. If you ever knew, state what Mr. Norton's reputation was at the time you knew, and when you knew, and how you knew.

A. At the time I introduced witnesses to impeach his reputation for truth and veracity, Mr. Norton was involved in financial trouble. I knew his evidence was untrue, and I availed myself of the sentiment against him in the community, and amongst those with whom he had had difficulty, to obtain such testimony. With the fact of obtaining witnesses for that impeachment I had very little to do personally; some of them I was not personally acquainted with, and did not know them until they came on to the witness stand and I heard them testify. Since that time I have had no opportunity for hearing his character publicly discussed as regards his truth and veracity, or to a sufficient extent to testify as to what it now is, further than my own personal acquaintance and knowledge.

X Q. 32. Were you a witness against Mr. Norton yourself?

A. I was not as to his public character for truth and veracity, to the best of my recollection.

Redirect examination:

By Mr. NORTON:

R. D. 33. You state on your cross-examination substantially that you took a very little part, if any, in procuring witnesses against Norton at the time of the attempted impeachment spoken of. Who did that business for you, if you remember?

A. I think George T. Blair did the most of it; at least, I paid him for his time as a lawyer in the case for doing it.

R. D. 34. Was Marcus Ball examined as a witness in that case?

A. He was.

686 R. D. 35. Was Henry G. Giles examined as a witness in that case?

A. He was.

R. D. 36. Was Levi Smith examined as a witness in that case?

A. I do not remember whether he was or not.

R. D. 37. Give your best recollections of it.

A. I have no recollection that he was, Mr. Norton, as I tax my memory in regard to it.

R. D. 38. Was Mr. William A. Beach examined as a witness in that case?

(Same answer in regard to Mr. Beach.)

R. D. 39. Was Lemuel H. Tupper examined as a witness in that case?

A. He was.

R. D. 40. All of the witnesses that I have named in my last several questions, that were examined as witnesses, were for the purpose of impeaching Norton for truth and veracity, were they not?

A. They were so examined.

R. D. 41. State, if you remember, the number that was called for that purpose in the city of Troy.

A. Think the whole number was some eight or ten. I will not be positive about it. I don't think that I can recall more than ten, if as many.

R. D. 42. Your counsel deemed it prudent to go to some other places for testimony in that case, did they not, and on that question?

A. I think they did.

R. D. 43. Do you remember how many witnesses were called in the city of Troy by Norton to sustain his reputation for truth in the city of Troy?

A. I don't know. My impression is that there were over thirty, but I am not certain. There may have been fifty.

R. D. 44. The testimony taken by you was printed, was it not?

A. Yes, sir.

687 R. D. 45. You had several copies in your possession after the decision in the interference suit, did you not?

A. I did not.

R. D. 46. What has become of those copies, if you know?

A. I destroyed them.

R. D. 47. About how long after the determination of those proceedings?

A. I think within a year, or a year and a half at the outside.

R. D. 48. Have you, within a year past, been applied to by anybody for that evidence?

A. I think I have. I think Mr. Norton asked me for a copy of it, and a gentleman whom I did not know—a stranger—called upon me, and told me Mr. Groom had sent him for a copy of it.

R. D. 49. Do you remember whether the first seven witnesses called were cross-examined?

A. I do not.

R. D. 50. Do you remember whether William F. Burden was called as a witness against Norton on the question of impeachment?

A. He was.

R. D. 51. State whether Corning, Winslow & Co. and the Burdens were not involved in litigation between themselves over spike and horseshoe machinery at that time.

A. They were.

R. D. 52. State whether Norton was not one of the counsel for Corning, Winslow & Co. in those matters and at that time.

A. He was.

R. D. 53. Was not Beach & Smith counsel for the Burdens in those and other matters?

A. They were.

W. E. HAGAN.

Subscribed and sworn to before me this 27th day of August, 1878.

IRVING BROWNE,
Special Examiner.

688 REUBEN COMINS, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Reuben Comins; of the city of Troy; bridge builder by profession; age is 60; I mean my sixtieth year.

Q. 2. About how long have you been engaged in the business of bridge building?

A. Forty years.

Q. 3. What kind of bridges?

A. For railroads principally; for railroads and highways of towns; sometimes in iron, but principally of the Howe style in wood.

Q. 4. About how long since you have resided in the city of Troy?

A. Since July 4th, 1850.

Q. 5. In what part of the city is your office?

A. At the present time 271 River street.

Q. 6. Whereabouts in this city do you reside?

A. At the American House, in this city.

Q. 7. Do you know Marcus P. Norton of this city?

A. I know Marcus P. Norton, but I don't know whether he is of this city or not.

Q. 8. What do you mean to be understood by the latter part of your last answer?

A. That is, I don't know whether you still reside in the city of Troy; I knew that you resided in the city of Troy formerly.

Q. 9. Well, how long ago, about?

A. Well, eighteen years.

Q. 10. What was his business in the city, so far as you know of it?

A. Lawyer; so far as I had any knowledge or understood it.

Q. 11. Did you ever have any business transactions with him in the line of his profession?

689 A. I did.

Q. 12. State whether they were suits on patents, extension of patents, or reissue of patents.

A. Reissue and a suit, or a defense in a suit.

Q. 13. So far as Norton has ever transacted any business for you in his profession, state whether it was done to your entire satisfaction or not.

(Objected to as immaterial.)

A. I never made any complaint nor found any fault.

Q. 14. Did you know his character for truth and veracity here while you knew him here, as a lawyer practicing?

A. I knew nothing to the contrary.

Q. 15. Did you know anything against it at that time?

A. I knew nothing against it then.

Q. 16. Do you of your own knowledge know anything against it now?

A. I do not.

Q. 17. So far as you yourself know, do you consider it good or bad for truth and veracity?

(Objected to on the ground that it is immaterial, since the witness should be inquired of as to the general reputation of Mr. Norton, and not as to what the witness knows himself.)

A. It is good, so far as I know.

Q. 18. From your knowledge of Norton's character for truth and veracity, would you believe him under oath?

(Objected to because the proper foundation has not been laid.)

A. I have no reason to disbelieve him except by report.

690 Cross-examination:

By Mr. CLARKE:

X Q. 19. How much have you known of Mr. Norton for the last ten years?

A. Very little for the last ten years.

X Q. 20. Have you heard him spoken of seldom or frequently in any way, by anybody, within that time?

A. Seldom.

X Q. 21. In answer to question 18 you say you have no reason to disbelieve him except by report. Explain what you mean by that.

A. I have heard it questioned in regard to truth and veracity in some court or trial or other—I don't remember what—from newspaper reports, or something of the kind.

X Q. 22. When, in answer to question 17, you say Mr. Norton's character for truth is good, so far as you know, I understand you to be speaking then only from your personal knowledge and experience, and not from any hearsay report or rumor?

A. That is so.

X Q. 23. When did you last have any business connection with Mr. Norton?

A. About eighteen years ago.

X Q. 24. Does the knowledge that you then gained of Mr. Norton embrace all that you know of your own knowledge as distinguished from hearsay concerning him?

A. It does.

X Q. 25. Over what period of time did your business connection with him extend?

A. Perhaps two or three years.

Redirect examination:

By Mr. NORTON:

691 R. D. 26. Have you had any patent suits, or suits about patents, since the time specified in your last answer?

A. I have not.

R. D. 27. How do you judge of any man's character for truth and veracity in this community or any other community?

(Objected to as immaterial.)

A. Both from personal knowledge and reputation.

R. D. 28. Name any person that you ever heard say anything against Norton in this community.

A. I can specify none.

R. D. 29. Whatever you did hear was a mere idle rumor running around, about the truth of which you had no personal knowledge, was it not, so far as you know?

(Objected to on the ground that it improperly characterizes the report.)

A. It was, so far as I know.

R. D. 30. State anything that you have ever heard against Norton s character for truth and veracity.

A. I have nothing to state; I have no recollection of details, or of general statements.

R. D. 31. How many years ago was it that you caught a faint glimpse of these idle rumors, of which you have been interrogated?

A. I do not recollect.

R. D. 32. Was it as many as fifteen years ago?

A. I cannot say.

R. D. 33. Did you believe any of them at the time to be true?

A. That I don't know.

R. D. 34. They do not have any influence over you on this occasion?

A. No; they do not.

692 R. D. 35. Were you sitting as a juror in a case, what would be the rule you would adopt as to accepting or believing the testimony of any man given before you?

(Objected to as immaterial.)

A. I suppose I should have to take it, unless it was impeached.

R. D. 36. Now, suppose you were called upon to testify as to whether you would believe any man, under oath or not, in any case or suit, what would be the rule you would adopt in giving testimony as to whether you would or would not believe that person under oath?

(Objected to as immaterial.)

A. Circumstances.

R. D. 37. What circumstances do you refer to in your last answer?

A. A man's reputation, standing, or character.

R. COMINS.

Subscribed and sworn to before me this 27th day of August, 1878.

IRVING BROWNE,
Special Examiner.

TROY, N. Y., *August* 28, 1878.

Met at 9 a. m., pursuant to adjournment of August 27.

Present, same counsel as above.

ASAHEL D. LYON, called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

693 A. My name is Asahel D. Lyon; I am 50 years of age; my residence is Troy; I am a lawyer by occupation.

Q. 2. About how long have you resided in the city of Troy?

A. About twenty-seven or eight years.

Q. 3. You are a member of the bar of the courts of this State, are you not?

A. I am.

Q. 4. And have been for about how many years?

A. Since December, '59.

Q. 5. How long have you been engaged in the practice of your profession in this city?

A. Since I was admitted, and I am engaged in it now.

Q. 6. You are holding an official position in the North Second Street Methodist Episcopal Church of this city, are you not?

A. I am.

Q. 7. State what it is, and about the length of time you have held it.

A. I am steward in that church, and prior to that time I was class-leader for a number of years.

Q. 8. Your official position in that church, as well as the practice of your profession, has brought and brings you into an acquaintanceship with many of the prominent business men of this city, has it not, and does it not?

A. It has and does.

Q. 9. Where in this city is your office located?

A. Number 53 Congress street, nearly opposite the court-house.

Q. 10. In what part of the city is your residence located?
A. Number 48 North Fourth street.
Q. 11. Do you know Marcus P. Norton of this city?
A. Yes, sir.
Q. 12. About how long have you known him?
694 A. Well, I have known him for twelve, fifteen, or eighteen years; I can't state the exact number.
Q. 13. What has been his business in this city, so far as you know, in your acquaintance with him?
A. A lawyer.
Q. 14. Do you know his character for truth and veracity in this city?
A. I think I do.
Q. 15. Do you consider it good or bad?
A. I consider it good.
Q. 16. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?
A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 17. Have you had any personal dealings with Mr. Norton?
A. I don't remember that I ever have; I don't know but that some years ago a small claim of fourteen dollars was given me for collection against Mr. Norton; I presented it to him and he paid me, and I don't remember of any other personal dealings that I have had with him, unless he stepped in and made an affidavit before me as notary or commissioner of deeds.
X Q. 18. How intimate has been your acquaintance with Mr. Norton?
A. I have met him frequently in the street, and have been in his office from time to time, and he has been in my office.
X Q. 19. How long ago was it that you were thus intimate with Mr. Norton?
A. Since I was admitted to the bar, and, I think, while he was occupying an office in Wotkyns' block in the city of Troy, and I have met him since and shook hands with him.
695 X Q. 20. That was twelve or fifteen years ago, was it not?
A. I don't remember the exact time; he was then in that building for a number of years; and I have seen him frequently since he had an office in that building.
X Q. 21. Your meetings have been casual meetings, I take it, nothing else?
A. Yes, sir: I think he has been at my office several times since he left that building to have me take an affidavit.
X Q. 22. Give your best recollection as to how long ago that was.
A. It is not anything that I charged my memory with; I should say from four to six years; I don't undertake to give the exact time, and perhaps it is longer than that time.
X Q. 23. You say that you think you know Mr. Norton's character for truth and veracity in this city; what do you understand by the phrase "character for truth and veracity in this city"?
A. I understand that he is to be believed by the majority of the people; that they believe him a truthful man; that his word is to be relied on; that he is to believed by the most of the people with whom he is acquainted.
X Q. 24. What are your means of knowing that a majority or most of the people with whom he is acquainted believe him to be truthful?

A. Well, I have no special means of knowing, but I have heard of his doing a large business here as a patent lawyer, and having been employed by large firms and dealers in the city, and perhaps my opinion, in a measure, has been based upon that.

X Q. 25. Have you not also heard that he has ceased to do that large patent business here?

A. I haven't heard of his doing so much business here for the last three or four years as I had heard that he formerly did; I don't
696 know that I have heard that he ceased to do a large patent business here.

X Q. 26. Where is his office in this city?

A. I don't know that he has an office in this city, personally.

X Q. 27. Will you swear that you have heard of Mr. Norton being employed by any large firm or dealer in this city within six years?

A. I won't swear positively; he may have done so; I may have heard that he was employed, but won't swear positively.

X Q. 28. Did you ever hear that about six years ago Mr. Norton was debarred from practicing as an attorney or solicitor in the Patent Office at Washington?

A. I won't swear that I ever did; and I don't know that it was the fact that he ever was.

X Q. 29. Did you ever hear of any such thing, or anything of that kind?

A. Well, I won't swear positively that I ever did; I think I heard that in some case in which Mr. Norton was engaged, or had something to do, that he had some trouble or difficulty at Washington; but I don't now remember what it was exactly.

X Q. 30. Did you ever hear that Mr. Norton was indicted for forgery in the District of Columbia some six years ago?

A. I don't now remember that I ever did.

X Q. 31. Did you ever hear of an attempt being made in any case but this to impeach Mr. Norton's reputation for truth?

A. I have.

X Q. 32. When was it, and what was the case?

A. I don't recollect the time exactly; it was some years ago, and I don't recollect the case; it occurred here in Troy, as I understood; and at the time I might have heard the title of the cause; but it has now gone from me.

X Q. 33. Give your best recollection as to how long ago that was.

697 A. Well, it must have been as many as eleven, or twelve, or more years since.

X Q. 34. Do you recollect whether it was a case in which Mr. William E. Hagan was plaintiff?

A. I can't say that he was plaintiff; but I think I heard that he was connected with it in some way.

X Q. 35. Have you ever heard anybody say anything against Mr. Norton being a truthful man?

A. I don't remember that I ever have, except something in connection with that case; something pertaining to it.

X Q. 36. Did you hear such things at that time?

A. In relation to this Hagan suit, I heard conversation about this attempt to impeach Mr. Norton, either at the time, or subsequently.

X Q. 37. Well, aside from the Hagan suit, have you ever heard Mr. Norton's reputation for truth and veracity in this city discussed?

A. I don't remember that I ever have; I don't think I ever heard his veracity called in question in any way except in relation to that;

at the time I heard his veracity called in question in relation to the Hagan suit, I deemed it very singular that any gentleman could get on the stand and undertake to impeach him that was acquainted with him; and if he had called upon me, or either party had, to testify in that suit, as to his character for truth and veracity, I should have testified the same as I have to-day, that it was good.

X Q. 38. Have you ever heard any one say anything in favor of Mr. Norton being a truthful man?

A. I don't know that I can add anything to what I have already testied to; I don't know that I ever heard his character for truth and veracity called in question in any way, or at any time, except in relation to the suit in which Mr. Hagan was interested.

X Q. 39. You say that, in your opinion, the most of the people with whom Mr. Norton is acquainted with believe that he is truth-
698 ful, and the only reason that you give for that is that you have heard of Mr. Norton being employed by large firms and dealers, and of his doing a large patent business; you have not heard any one say anything in favor of his character; you have heard it impugned; and you cannot swear that your main reason for supposing his character good, his employment by large firms, etc., has existed for six years; do I state your position correctly?

(Objected to as not being a truthful statement of the record of this witness' evidence already rendered, and therefore improper.)

A. I didn't intend to state in my testimony that I never heard any one speak in favor of his character. When it was spoken of in relation to the Hagan suit, I, perhaps, heard as much in favor of his character being good as I did against it, and the fact that I have never heard it questioned in any way outside of that one case, is another reason that I give why I deem it good.

(In view of the answer, the objection to the last question is withdrawn.)

X Q. 40. What occasions, if any, have there been since the Hagan suit, in which the people who have spoken with you about Mr. Norton would naturally have referred to his character for truth, if, in their opinion, it had been tainted?

A. I don't know as there has been any special occasion; but from what I have heard in relation to his business from time to time, I think that people must have had confidence in him, and having seen him in my office from time to time, making affidavits and swearing to papers.

X Q. 41. Have you heard him spoken of in late years as frequently as formerly?

699 A. Well, perhaps not as frequently as formerly; I should say not.

X Q. 42. Do you know what the reason of that is?

A. I am not positive what the reason is.

X Q. 43. What do you understand to be the reason?

A. I have no special understanding about the reason or reasons.

X Q. 44. Will you swear that you have heard him spoken of by anybody, in any way, ten times within the last five years.

A. I won't swear positively; but my recollection is that I have heard him spoken of more than ten times within less than five years.

X Q. 45. Have you heard any of these large dealers speak of or say anything about Mr. Norton?

A. I now don't recollect.

X Q. 46. Have you ever heard anybody speak about him, who had had any important business transactions with him?

A. They may have done so; but I don't now recollect who or when.

X Q. 47. Do you recollect that you have, though you may not recollect the name?

A. I don't say positive that I have; though I may have.

X Q. 48. Do you recollect of having so heard?

A. I don't, this minute, positively recollect.

Redirect examination:

By Mr. NORTON:

R. D. 49. The counsel for the defendant has put to you several questions prepared in his New York mud-machine, with reference to disbarments, indictments, and some other things in that line, in reference to Norton. We will suppose, for the benefit of the counsel on the
700 other side, that you had heard of the tremendous things of which he speaks in some of his questions to you; from your long and continued acquaintance with Norton, in the same profession, and as a citizen, would it not have required positive and unimpeachable evidence to convince you of the truth of those statements?

(Objected to as assuming that the matter of the disbarments, indictments, and impeachments originated with defendant; whereas the record in evidence in this case shows that they were occasioned by no other mud-machine than Mr. Norton's own.)

A. I don't think that any rumor of that nature would change my opinion of Mr. Norton's character for truth and veracity, nor any newspaper publication on the same subject.

R. D. 50. Do you remember to have ever heard the result of the attempted impeachment of which you have spoken on your cross-examination; I mean the success or unsuccess of that attempt?

A. I may have heard what it was, but I am unable now to state.

A. D. LYON.

Subscribed and sworn to before me this 28th day of August, 1878.

IRVING BROWNE,
Special Examiner.

701 JOHN MILLER, a witness called on the part and behalf of the plaintiff, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is John Miller; age is 49; residence, Green Island, New York; my occupation, molder or foundryman.

Q. 2. How far is Green Island from the city of Troy?

A. They are about a quarter of a mile apart, and are connected by a bridge.

Q. 3. About how long have you resided on Green Island?

A. About twenty-seven years.

Q. 4. Green Island is a village of a large number of inhabitants, is it not?

A. Yes, sir; about five thousand inhabitants; I think that is the number of it now.

Q. 5. About how long have you been engaged in the business of molder or foundryman?

A. About thirty-two years.

Q. 6. Nelson Pramer has been called and examined as a witness for defendant in this case, and, among other things, he testified substantially that he was in the foundry business on Green Island, and had a

partner by the name of John Miller; do you know any person by the name of Nelson Pramer?

A. Yes, sir; I do.

Q. 7. Is that Nelson Pramer, whom you say you know, at the present time a member of the common council of this city, from one of the outer wards?

A. Yes, sir, I believe he is; from the fifth ward.

Q. 8. Were you ever a partner of his in the foundry business on Green Island?

A. I was.

702 Q. 9. When did that partnership commence, and when did it terminate, if at all?

(Objected to as immaterial and irrelevant.)

A. It commenced in March of this year; it terminated in the last of last July.

Q. 10. How much capital did Mr. Pramer undertake to put in this firm —I mean in the partnership business of Pramer & Miller?

(Same objection.)

A. He did not really put in any money of his own; Mr. Morrison put in a thousand dollars for him, and his wife gave security for that thousand dollars on her property.

Q. 11. While you were a partner with Pramer, did he deal with you in a fair, square, and honorable manner?

(Same objection.)

A. No, sir; he did not.

Q. 12. From your acquaintance with Pramer, and from all you know of him personally, and from what you may have heard concerning him, you may state what kind of a man you regard him to be.

(Same objection.)

A. As far as I have had dealings with Pramer, he has misrepresented everything with which he had to do; he has shown them in a false light, and I don't think there is really anything honest or honorable about the man.

Q. 13. While you were a partner of his at that foundry on Green Island, state whether women of doubtful character did not frequently call upon him in that foundry.

(Same objection.)

703 A. There was. The first I saw of it was that there was a woman introduced to me as his friend, and there were two or three men hanging about her, and he was showing her about the shop, and afterward I saw the men in the foundry watching her and looking at her movements. I went up to one of the men and asked him what was the matter of this woman, that they were looking so sharp after her, and he asked me if I didn't know the woman; I told him that I did not; that I had not seen her before, to my knowledge; he said she was a bad character. After she went away, I spoke to Mr. Pramer, and I told him I did not like to have such characters come around the foundry; that I did not want him to bring any more.

Q. 14. State whether there was any other similar occurrence at that foundry while you were there as a partner of Pramer?

(Same objection.)

A. There was one other woman came over there.

Q. 15. Did you call Mr. Pramer's attention to the appearance in your foundry of the disreputable women, while you were his partner, any other than as already stated by you?

(Same objection, and also for its assumption.)

A. No; but Mr. Morrison came over another day, and in the office he saw a lady, and he told me that he thought Mr. Pramer had a good many lady friends.

Q. 16. What reply did you make to Mr. Morrison at the time about that?

(Same objection.)

A. I don't exactly remember what I did say.

704 Q. 17. How soon after the partnership commenced was it that these women first came there?

A. I don't think that it was before the first of May that they came there.

Q. 18. When you called Mr. Pramer's attention to the first woman that came there, and in substance requested him not to allow any more women of that character to come there, what reply, if anything, did Pramer make to it?

(Same objection.)

A. He laughed at me and said it did not amount to much.

Q. 19. Was it not generally understood or suspected among your workmen that there were a good many women of doubtful character as to virtue, calling on Pramer, or of his having something to do with them, other than those you have stated?

(Same objection.)

A. No; the workmen that I had, they knew very little about Pramer. Wolfe & Company's men were the ones that watched the most on that subject.

Q. 20. Wolfe & Company's men were laborers in that same foundry, were they not?

A. Yes, they used to do their shipping from that foundry.

Q. 21. They knew more of Pramer's "ways that were dark and his tricks that were vain" than your men, did they not?

(Same objection.)

A. Yes, sir.

Q. 22. Have you recently heard anything with reference to the vote of this man Pramer, in the common council of this city, on the
705 question known as the "water supply" question, or for furnishing an additional supply of water to this city, from either the Hudson or Poestenkill Rivers?

(Same objections and as asking for hearsay.)

A. Yes, sir.

Q. 23. State what that was, as near as you can remember it.

(Same objections.)

A. I was in an office or store in this city a little over a week ago; the question was asked me if I had left Pramer. I stated that I had. They said that Pramer would have a little money now, that I ought to have stayed with him a little longer. I asked how he came by the money. They said the Holly Water Company was buying up the common council, and that Pramer was one of them.

Q. 24. Was it stated there that it was rumored that Pramer had sold his vote on the water question?

(Same objections.)

A. Yes, sir; and I heard this in one other place.

Q. 25. Do you regard Pramer as a man of any money or property responsibility at all?

A. No, sir; not at all.

Q. 26. Is the foundry that you speak of the property of Mr. James Morrison?

A. Yes, sir; that is Mr. Morrison's property.

Q. 27. Do you think that a man can do a very large business in a foundry on a borrowed capital of a thousand dollars?

(Same objections.)

A. No, sir; that thousand dollars was used up long ago.

706 Q. 28. You were subpœnaed and your fees paid you, such as per diem and mileage, to come here to-day and give evidence, were you not?

A. Yes, sir.

(No cross-examination.)

Q. 29. What led to the dissolution of your firm? I mean the firm of Pramer & Miller.

(Same objections.)

A. I was advised by friends of mine to leave him, as he was not an honest man; I had made up my mind to do so anyway.

Q. 30. You found, from association with him, that he was not an honest man, but a dishonest one, did you not?

(Same objections, and as leading.)

A. Yes, sir.

Q. 31. On association with Pramer in business, what did you find him to be; honest or dishonest?

A. Dishonest—tricky.

JOHN MILLER.

Subscribed and sworn to before me this 28th day of August, 1878.

IRVING BROWNE,
Special Examiner.

707 RUFUS M. TOWNSEND, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Rufus M. Townsend; age is seventy-one; I reside in the city of Troy, Rensselaer County, and State of New York; I am a farmer, and have practiced law for over forty years.

Q. 2. About how long have you resided in the city of Troy?

A. Between forty and fifty years.

Q. 3. About how long have you been engaged in the practice of your profession in this city?

A. Over forty years.

Q. 4. What is the law firm by name with which you are connected in this city since you have been in the city of Troy?

A. I first practiced by my own name alone for a series of years, R. M. Townsend; then I practiced under the name of R. M. & M. J. Townsend for a number of years; then I practiced under the name of Townsends & Kellogg, until about the year 1857, and then I practiced under the firm name of Townsends & Browne until a very recent period.

Q. 5. Is Martin I. Townsend, the present member of Congress from this district, your brother?

A. He is.

Q. 6. Is Mr. Irving Browne, the special examiner before whom you are examined, the gentleman who was a partner of yours for twenty years?

A. Mr. Irving Browne, the person referred to in the last question, is the Mr. Brown of said firm of Townsends & Browne.

Q. 7. The professional business of the several firms stated by you in answer to questions, has brought you into an acquaintance w th many

of the leading business and professional men of this city, has it not, and does it not?

708 A. Yes, sir.

Q. 8. Do you know Marcus P. Norton, of this city?

A. Yes, sir.

Q. 9. You have known him for about how many years?

A. I can't tell you the number of years, but I have known him from the time he first came to Troy to live, which is many years ago.

Q. 10. Have you, or any of the firms named by you, had any suits or other professional business with Norton during the time you have stated?

A. The said firm of Townsends & Browne were employed some years ago to defend a patent suit brought in the United States court against Mr. Schoonmaker, of Troy, a photographer, by a man by the name, I think, of Alden, for an alleged infringement by the defendant of a patent granted to a man by the name of Southworth, in or near Boston, for a patent securing to Southworth the right to make more than one picture on the same plate during one continuous operation. Said patent was granted to Southworth, I think, about 1853, and it was alleged that said Alden, if that was his name, owned the territory in which Troy was under said patent. This suit was brought to test the right of the plaintiff to said machine under said patent, and said firm of Townsends & Browne defended said suit for defendant through a number of years, and took testimony coming from France, Germany, and England, and many portions of the United States, and we were connected with the defense until the decision of the Supreme Court of the United States at Washington, in the District of Columbia. We may have had other suits of lesser importance, but I don't recollect them. In the said suit of Alden and Schoonmaker, I had the sole charge of the case, and took the testimony. Mr. Norton brought said patent suit for said complainant, and took most of the testimony. Sometimes Mr. Cowen took the testimony. Mr. Cowen was his partner at the time.

709 Q. 11. Do you remember the suit on a paper box invention patented to Elisha Waters, of this city, on which patent Norton brought suit against Percy & King, of this city, and defended by Townsends & Browne, of this city, some years ago?

A. I remember hearing much of it at the time the suit was pending.

Q. 12. In the line of your profession, have you not recently had a suit against Norton in person in the justice's court of this city, for a client of yours?

A. Yes, sir.

Q. 13. What was that suit about, if you remember?

A. For the pay for newspapers and periodicals furnished by the plaintiff to and for Mr. Norton, at one of the hotels in the city of Troy, where Mr. Norton sometimes boarded. They were said by the plaintiff to have been delivered at the hotel while Mr. Norton was out of town at some country residence.

Q. 14. Norton defended that suit on the ground that he had not received those articles, and ought not to pay for them, did he not?

A. Yes, mainly, I believe, and also on the ground that he had given notice to the hotel that the papers must not be delivered, and that he had requested the hotel to notify the plaintiff.

Q. 15. About how long is it since that suit was disposed of in that court?

A. Only a few weeks.

Q. 16. Was Norton examined as a witness in that case in his own behalf?

A. He was.

Q. 17. Did you principally conduct the cross-examination of Norton in that case?

A. I think I did; and I think that my son conducted a very small part of it.

Q. 18. Was the defendant's counsel now present, Mr. Clarke, then present at that time, and during the examination?

710 A. I think he was; at least a portion of the time.

Q. 19. Look at him, and state whether you have any doubt about it.

A. He was present a considerable part of the time.

Q. 20. Did you undertake on that occasion to impeach the character of Norton in that suit?

A. I did not.

Q. 21. Did you at any time contemplate or intend to go into such an undertaking in the trial of that suit?

A. I did not.

Q. 22. You have known Norton for a great many years pretty well, have you not?

A. I have known Mr. Norton very intimately until the present time, from the time that Mr. Norton first came to Troy, which was a great many years ago.

Q. 23. Do you know his character for truth and veracity in this city?

A. That is a difficult question for me to answer, because during all my acquaintance with him I never heard, either in or out of the profession, a word said by any person in reference to his character for truth and veracity. I have heard a great deal said of him as a business man, and as a patent lawyer, and as a skilled man in the mechanical arts.

Q. 24. Do you consider his character for truth and veracity good or bad?

A. I consider it good, because I have never heard anything said against him in all my acquaintance with him on that subject.

Q. 25. From your knowledge of his character for truth and veracity here, would you believe him under oath?

A. I would.

Q. 26. Prior to Norton's financial embarrassments in '70 or '71, were you frequently in his law office in this city?

A. While he kept an office in the city of Troy I was very fre-
711 quently in his office, and I was frequently in his office up to the time he was said to be embarrassed financially.

Q. 27. From what you saw on those occasions in his office, how did it appear to you as to the character or extent of the business conducted there, or otherwise learned?

A. I knew that his business embraced various questions of procuring patents and of prosecuting and defending suits. From what I saw and learned from his clients in this city that his business was very great, indeed, and very lucrative. That he had that kind of business in the employment of many firms in this city and other places, who had great wealth and carried on the largest manufacturing business. He had pretty much the sweep of the patent business in this part of the State of New York.

Q. 28. Where is your brother Martin I. Townsend at this time?

A. I suppose that he is in the State of Iowa, near the town of Mar-

shalltown. I had a letter from him last Saturday evening, saying that he would be home within a few days, almost certainly before the first day of September.

Q. 29. Your several law firms have done quite an extensive law business in this city in the line of your profession, have they not?

A. Yes, sir.

Q. 30. Were you subpœnaed to appear here and be examined as a witness to-day?

A. I was.

Q. 31. Were your fees tendered you as a witness?

A. They were.

Cross-examination:

By Mr. CLARKE:

X Q. 32. You say that you have not heard Mr. Norton's character for truth spoken of. By that I suppose you mean by anybody generally as character; state whether in any particular matter or case you have ever heard it said that Mr. Norton was untruthful or swore falsely, or substantially that.

712

A. I never heard, that I recollect, any question raised as to the truth of his statements, either in any case or anywhere; I do not recollect that I ever heard that he was sworn in any case other than the little justice's court case of which I have spoken in my testimony.

X Q. 33. How often have you heard Mr. Norton spoken of in any way, by anybody, within the last ten years, frequently or seldom?

A. I have heard him spoken of within ten years much less frequently than previously, but I have heard him spoken of frequently within the last ten years by a great variety of people.

X Q. 34. In what way was reference made to him on those occasions principally?

A. Reference was made to the character of his business in procuring patents, and in patent suits, and as to his ability as a scientific mechanic, and as to his ability in prosecuting and defending patent suits. Our manufacturing men that owned patents, and who employed him, spoke of his superior skill to the generality of lawyers, and insisted that he was superior to most of the legal profession in this part of the State.

X Q. 35. Explain briefly the testimony that was given in that justice's court suit?

A. In reference to the plaintiff's claim in said justice's court suit, which has been hereinbefore substantially stated by me, I testified on behalf of the plaintiff in said justice's court suit that I had two interviews or more with Mr. Norton in reference to said claim; one or more at or near the Troy House, and one other conversation, which was the last, in front of my office in First street, in the city of Troy, and that in the first conversation or conversations at or near the Troy House Mr. Norton raised the question as to whether the word be left at the hotel not to have the papers and periodicals left there any more after he went into the country, had ever reached the plaintiff before he delivered said articles; that if he should come to the conclusion that he was liable to pay, he would send his check at some early day, from his house in the country; and I testified that in the last conversation which I had with him in front of my office, that after a more full statement of the facts, that he promised absolutely to send his check the Tuesday following; I stated that that was my best recollection of our conversation; but Norton on his part testified that he did not promise absolutely to send his check, but that he coupled his promise with the condition of

713

his finally determining that he ought to pay it; but he agreed with me in substance as to what was said at or near the Troy House; that I think is the substance of the difference between my testimony and Mr. Norton's. The defense in the testimony failed to show any knowledge of the order that Mr. Norton left at the hotel bar, communicating to the plaintiff for discontinuing the papers, which I deemed to have been the controlling thing in the case.

X Q. 36. You swore that the promise to send the check was absolute, and Mr. Norton swore that it was conditional?

A. Yes, sir.

X Q. 37. Did your son swear on that point also?

A. I think he did; I think he swore without being able to state positively, substantially, the same as I did.

X Q. 38. Have you any doubt that Mr. Norton made an absolute promise on that occasion?

A. I have no doubt he did make an absolute promise.

X Q. 39. He swore at the trial that the promise was conditional and not absolute, did he not?

A. He did.

X Q. 40. Did he, to your knowledge, swear falsely in that?

714 A. This is a difficult question for me to answer. I have stated on that point all that I know, and as to whether Mr. Norton swore falsely, any further than I have stated, I cannot state. I cannot say of my own knowledge that Mr. Norton intended to misrepresent.

X Q. 41. He did misrepresent, he did misstate, did he not?

A. I cannot state that; I testified according to the best of my memory, and I cannot state but that Mr. Norton answered according to the best of his memory. I might have made a mistake, and he might have made a mistake. I intended, in my testimony in the justice's court, to state truly.

X Q. 42. Did he, according to the best of your knowledge, misstate and misrepresent?

A. Mr. Norton, in his testimony on the subject I have referred to, did not state the facts in accordance with my memory. I said that he made an absolute promise to send his check, and he said he promised on a condition stated in his testimony. I know that in one or two previous conversations he had promised subject to a condition stated in my testimony and his, and in this last conversation referred to, my memory is that he did not put any condition. Mr. Norton did not make any misrepresentations, but he differed from me only in the fact of promising with a condition. Now, whether that was false or a misrepresentation, I leave for the court to decide.

X Q. 43. On that day, when Mr. Norton promised to send his check absolutely as you say, was that promise clear, precise, and so definite that Mr. Norton could not have reasonably meant anything but an absolute promise? Answer this question as you would one in any practical matter between man and man, without speculating too deeply as to the hidden processes of the mind.

A. As I understood his promise, and that it was absolute, I believed fully that he intended to send his check.

715 X Q. 44. How long a time intervened between the day of the promise and the day of the trial?

A. I can't tell positively from memory, but it must have been three or four weeks, perhaps.

X Q. 45. Does Mr. Norton now have the large practice in Troy which you spoke of on your direct examination?

A. I think not.

X Q. 46. Do you know whether he has any office at all in Troy?

A. I do not.

X Q. 47. When was it that the falling off in the business began?

A. I can't tell you just the time when, but it was when he was engaged in extensive practice in the city of Washington.

X Q. 48. What do you know about his extensive practice in the city of Washington?

A. I know nothing except hearsay; I may have seen him there a few times, but can't say positively.

X Q. 49. About how long ago was it?

A. I can't fix the length of time, but perhaps from eight to twelve years ago; that is as near as I can get to it now.

X Q. 50. What was the reason of the falling off of Mr. Norton's patent business in the city of Troy?

A. I can't give the reason other than pecuniary embarrassments, which were very heavy upon him, and then, becoming interested in some very valuable patents, he turned his attention to taking care of those patents, and that called him very much away from the city.

X Q. 51. Do you know what the occasion of the pecuniary embarrassment was?

A. I don't know.

X Q. 52. Have you ever heard that Norton does not keep his business engagements?

716 A. I have never heard of anything of that kind, other than that he did not pay his debts for the want of money.

Redirect examination:

By Mr. NORTON:

R. D. 53. Did you, in the justice's court case referred to in your cross-examination, recover judgment against Norton?

A. Yes, sir.

R. D. 54. For how much, including costs?

A. Well, I can't say, sir; but it seems to me that the damages were for some sixteen dollars, including interest, and the costs were enough to make it mount up to the sum of twenty-five dollars.

R. D. 55. How much was the original claim in that suit?

A. About thirteen dollars.

R. D. 56. Did Norton employ counsel in that case for him?

A. I think he did.

R. D. 57. Has Norton paid that judgment?

A. Yes; he gave his check promptly, and the check was paid.

R. D. 58. Counsel for the defendant here has inquired of you about a promise absolute and one conditional, testified about both by yourself and Norton in that trial; do you believe that Norton intended there to testify to anything but the truth, or that he stated anything differently from what he honestly believed the facts to be, although you believed them to be otherwise?

A. From the facts that I know in the case I have no reason to believe, nor have I any right to believe, that Mr. Norton intended to misrepresent or state what was untrue; the truth of his intent is beyond my reach.

R. D. 59. Notwithstanding Norton's testimony in that suit, al-
717 though you and he disagreed as to a certain point, you swear that you will believe him under oath, do you not?

A. I do so swear, and I say that all his acts in reference to that little claim show him to have been prompt and honorable.

R. M. TOWNSEND.

Subscribed and sworn to before me this 28th day of August, 1878.

IRVING BROWNE,
Special Examiner.

Adjourned to August 29, 9 a. m.

I. B., *Ex'r.*

TROY, *Aug.* 29.

Same counsel, &c.

WILLARD GAY, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Willard Gay; age, 58 or 60; residence, Troy; occupation, cashier National State Bank of Troy.

Q. 2. About how long have you resided in the city of Troy?

A. Fifty years.

Q. 3. About how long have you been cashier of the State Bank?

A. Twenty eight years.

Q. 4. That bank started as State Bank in what year?

A. '52.

Q. 5. And it afterwards became a National Bank under the United States laws, did it not?

A. Yes.

Q. 6. Your position as cashier of that bank has brought you into an acquaintance with most of the prominent and business men of the city, has it not?

718 A. Yes, sir.

Q. 7. Do you know Marcus P. Norton, of the city of Troy?

A. Yes, sir.

Q. 8. About how long have you known him?

A. Well, from fifteen to eighteen years, certainly.

Q. 9. During your acquaintance with him, has he frequently transacted business at the bank of which you are cashier, in this city?

A. Yes, sir.

Q. 10. Do you know his character for truth and veracity in this city?

A. Yes.

Q. 11. Do you consider it good or bad?

A. I consider it good.

Q. 12. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

A. Yes.

Q. 13. Did you ever hear anything said in this city against his character for truth and veracity?

A. I may have heard persons speak against him, but have never heard a sufficient reason why they did.

Q. 14. In his dealings with you and the bank of which you are cashier, what, if anything, can you say about that?

(Objected to as immaterial.)

A. Well, I can say that he has always lived up to what he has promised, and has always been honorable in his dealings with us, both with me and the bank, in all his representations to us.

Q. 15. Do you remember of a single instance in his dealings with

your bank when Norton has asked a favor of you or of your bank, of his ever having been refused?

(Same objection.)

A. No, I don't remember of any now.

719 Cross-examination:

By Mr. CLARKE:

X Q. 16. Have you any doubt that you have heard things said against his being a truthful man?

A. No; I do not remember now of hearing any one express a doubt of his veracity.

X Q. 17. What are your means for knowing Mr. Norton's character for truth?

A. His business at the bank and some private business he has done with me; it was always done satisfactorily to me and to the bank.

X Q. 18. You say that Mr. Norton's character for truth is good because in his personal dealings with you he has been always square; is that it?

A. Yes.

X Q. 19. You do not allow yourself to be influenced at all by report or rumor?

A. No, sir; not to what I am swearing now.

X Q. 20. You say you do not recollect of any person who has impugned Mr. Norton's veracity in your hearing?

A. I do not.

X Q. 21. Did you ever hear of Mr. Norton being prohibited or debarred from practicing in the Patent Office, about six years ago?

A. I may have heard of it, but I could not swear when, and I could not swear that I have heard it.

X Q. 22. Did you ever hear of Mr. Norton being indicted for forgery in the District of Columbia, about six years ago?

A. That I think I never heard; no, I know I did not.

X Q. 23. Did you ever hear of Mr. Norton's reputation being impeached, or attempted to be impeached, in any case?

A. No, sir; except in this case here in Troy—this pending case.

720 X Q. 24. Have you heard Mr. Norton spoken of in any way by anybody, frequently or seldom, within the last eight or ten years?

A. Yes.

X Q. 25. Which; frequently or seldom?

A. Some years frequently and some years seldom; of late years not so frequently.

X Q. 26. Have you heard anything unfavorable said of Mr. Norton?

A. I may have.

X Q. 27. Have you any doubt as to that?

A. No; my impression is that I have. I don't remember of any reasons given that convinced me of what they said.

X Q. 28. In what respect were the remarks that you heard unfavorable to Mr. Norton?

A. I don't remember.

X Q. 29. You pay very little respect to rumor and reports about people, do you not?

A. Very little.

X Q. 30. When, on your direct examination, you stated that you didn't remember ever refusing a favor asked of you, or your bank, by Mr. Norton, did you mean by that to convey the idea that you always, invariably, accommodate him in any way he may ask?

A. In that answer I did not mean to imply that he never asked a favor which was refused, but that I did not remember of any such instance.

Redirect examination:

By Mr. NORTON:

R. D. 31. Notwithstanding anything that you may have heard said against Norton about the business matters of which defendant's counsel has inquired on cross-examination, you still continue to have that
721 trust and confidence in Norton that has enabled you here to-day to swear that you would believe him under oath, have you not?

A. Yes.

R. D. 32. Of the truth of anything that you may have heard against Norton, if you ever did hear anything, did you have any personal knowledge?

(Objected to as immaterial.)

A. I never did. I did not, to my remembrance.

W. GAY.

Subscribed and sworn to before me this 29th day of August, 1878.

IRVING BROWNE,
Special Examiner.

DANIEL W. FORD, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Daniel W. Ford; age, 40; residence, Troy; teller in National State Bank.

Q. 2. About how long have you resided in the city of Troy?

A. I have resided in the city proper for about thirty years.

Q. 3. For about what length of time have you been teller in the National State Bank of this city?

A. For about seventeen years.

Q. 4. That bank has a large number of depositors, or persons doing business with it, has it not?

A. Yes, sir.

Q. 5. Your position in that bank as teller has brought you into
722 an acquaintanceship with and a knowledge of a large number of business and leading men in this city, has it not?

A. Yes.

Q. 6. Do you know Marcus P. Norton, of the city of Troy?

A. I do.

Q. 7. About how many years have you known him?

A. About fourteen years.

Q. 8. Since you have known him you have had some business transactions with him, have you not?

A. I have.

Q. 9. Since you have been teller of the National State Bank, has Norton had money dealings with that bank?

A. Yes, sir.

Q. 10. Covering the whole time, can you approximate the general amount of those transactions?

A. My best recollections now are that they were in the neighborhood of three hundred thousand dollars.

Q. 11. You have had the opportunity to become pretty well acquainted with and to know Marcus P. Norton, have you not?

A. I have.

Q. 12. Do you know his character for truth and veracity in this city?

A. So far as my knowledge goes, I know it to be good.

Q. 13. Do you consider it good or bad?

A. I consider it good.

Q. 14. From your knowledge of his character for truth and veracity, would you believe him under oath?

(Objected to because the proper basis for the question is not laid.)

A. I would.

723 Cross-examination:

By Mr. CLARKE:

X Q. 15. What do you understand by the phrase "character for truth and veracity in this city?"

A. Well, if I have business dealings with a man, and he lives up to his business engagements, I consider that truth and veracity enough.

X Q. 16. You said that Mr. Norton's reputation for truth was good, because in his business dealings with you he had always been square; is that it?

A. Yes, sir.

X Q. 17. You don't allow anything else to influence you except your personal knowledge and dealings with him, do you?

A. No, sir.

X Q. 18. You are not influenced at all by common report and rumor in regard to him?

A. No, sir.

X Q. 19. And it was purely on the basis of your personal dealings with him that you said you would believe him under oath?

A. Yes, sir.

X Q. 20. Have you had dealings with Mr. Norton to any great extent within the past eight or ten years?

A. Yes, sir.

X Q. 21. To how great extent within that time?

A. Probably one hundred and fifty thousand dollars.

X Q. 22. Did you ever hear of Mr. Norton being indicted for forgery in the District of Columbia some five or six years ago?

A. I believe I saw it in the papers, but I don't remember the particulars about it.

X Q. 23. Have you ever heard of Mr. Norton being debarred from practicing as a solicitor in the United States Patent Office some five or six years ago?

724 A. I heard something to that effect; yes, sir.

X Q. 24. Did you ever hear of an attempt to impeach Mr. Norton's reputation for truth and veracity some fifteen years ago, in a suit in which William E. Hagan, Shavor, Groome and Potter were parties?

A. I don't remember of it.

Redirect examination:

By Mr. NORTON:

R. D. 25. The defendant's counsel now present, while operating his celebrated mud machine, was pleased to inquire of you if you had ever heard about a Patent-Office disbarment or about indictments, attempted impeachments, and various other things; if you ever did hear of any of those things, did you know of the truth of them, or believe anything in regard to the truth of them?

A. No, sir.

R. D. 26. You judge of men by your knowledge of them, or of business dealings with them, do you not?

(Objected to as immaterial.)

A. Yes, sir.

R. D. 27. And upon that foundation so constructed by you, you are enabled to tell whether a man is a scoundrel, a liar, or an honest and truthful man, are you not?

(Objected to as irrelevant and immaterial.)

A. Yes, sir.

DANIEL W. FORD.

Subscribed and sworn to before me, this 29d day of August, 1878.

IRVING BROWNE,
Special Examiner.

725 PHILETUS W. BISHOP, a witness heretofore produced and examined on behalf of the defendant, now being recalled by the plaintiff for further cross-examination, testifies as follows:

Complainant's counsel objects to any further cross-examination of this witness, on the ground that he was cross-examined by complainant at the time that the witness was first called; that complainant's counsel having then finished with the witness suffered him to sign his deposition and depart, and that said deposition has already been sealed up and forwarded to the clerk of this court; and requests the examiner over his signature to make a note of these facts.

Noted accordingly.

I. B., *Special Examiner.*

Defendant's counsel insists that if complainant further examines Mr. Bishop, he must make him his own witness.

Q. 1. Have you been subpœnaed by the complainant to appear here and be further cross-examined in this case?

A. I have.

Q. 2. The subpœna was served upon you when?

A. Yesterday.

Q. 3. Defendant called you some days ago to testify in this case against the character of Marcus P. Norton, did he not, for truth and veracity?

A. I was called for that purpose.

Q. 4. Did you testify on that occasion that you would not believe Norton under oath?

A. I think I did.

Q. 5. Have you any doubt about that?

A. No, sir, I have not.

726 Q. 6. You did then testify that you would not believe Norton under oath, did you not?

A. I do not remember the language I made use of, but that was the idea I intended to convey, and did convey, I have no doubt.

Q. 7. You testified on that occasion, in your direct examination, that you were a lawyer in practice in this city, did you not?

A. I am a lawyer and in practice in this city, and presume I so testified on that occasion.

Q. 8. How extensive is your practice in the law in this city?

(Objected to as irrelevant and immaterial.)

A. Do you mean as to the number of clients I have, the courts I practice in, or the amounts I receive for business?

Q. 9. I mean each and every one of the matters about which you have inquired in your last answer.

(Same objection.)

A. I have practiced in the United States courts, both civil and criminal; I have practiced in the district and circuit courts of the United States for the northern district of New York; also in the supreme court of the State; have causes in Albany County, Columbia County, and Rensselaer County; I have also practised and have causes in the county courts of Albany, Columbia, and Rensselaer counties, and also practice in the Troy justice's court, Troy police court, and other justice's courts in the county, and also in Columbia and Albany counties. I had at the February circuit of the supreme court eleven causes on the calendar; four of these causes were transferred to me by Baerman; the remainder I had myself. As to the amount received, my impression is that
727 last year my practice was worth to me about eighteen hundred dollars, and since the first day of January last I have received eight hundred dollars.

Q. 10. Of the eleven causes how many were tried at the last term of the court?

(Same objection.)

A. There were two tried, and one was settled.

Q. 11. How many were sent to a referee, if any?

A. None, that I remember of.

Q. 12. How many went over the term?

A. The balance of them went over the term.

Q. 13. For how many years have these causes been on the calendar?

(Same objection.)

A. Well, none of the causes that I had had been over two years, to my best recollection.

Q. 14. How many causes have you on the calendar of the supreme court for the County of Columbia, or to go on on the next calendar?

(Same objection.)

A. I have one.

Q. 15. How many causes have you in the United States courts for this district?

A. Only one.

Q. 16. Do you know a person in this city by the name of Browning?

A. I do.

Q. 17. Do you know in what part of the city he resides?

A. I think it is 112 or 114 Fifth street, in this city.

Q. 18. Did you ever do any business in your profession for the Mr. Browning referred to in the last two questions and answers?

728 A. Yes, sir; I have within the last month.

Q. 19. What is his first or Christian name?

A. James S. Browning.

Q. 20. Are you personally acquainted with his wife?

A. I am.

Q. 21. Did you ever transact any professional business for her?

A. I have.

Q. 22. In what year was it?

A. I do not remember.

Q. 23. Was it a suit or an action in any of the State courts, in which she was the plaintiff, or one of the plaintiffs?

(Same objection.)

A. I think that I had three, if not four, suits in the supreme court for her.

Q. 24. Did you have a suit for her against parties in West Troy?
(Same objection.)
A. I think all the suits were against parties in West Troy, although one of the parties had removed from West Troy at the time the suit was commenced.
Q. 25. Name the defendant in each of the suits which you brought for Mrs. Browning?
(Same objection.)
A. Andrew Alexander was defendant in one suit, William McClellan was defendant in another, and I do not remember the names of the others.
Q. 26. Were any of those suits sent to a referee for trial?
(Same objection.)
729 A. The suit against Andrew Alexander was referred to Giles B. Kellogg, a lawyer of the city of Troy.
Q. 27. Was that the last suit that you tried for Mrs. Browning?
(Same objection.)
A. No; I think I brought the suit against McClellan afterwards, and judgment obtained for five hundred dollars.
Q. 28. Which of the Browning suits was commenced last?
(Same objection.)
A. I think the McClellan suit was commenced last?
Q. 29. How long after the Alexander suit was commenced was this commenced?
(Same objection.)
A. I haven't said that the McClellan suit was commenced after the Alexander suit; I said I thought it was, but was not sure.
Q. 30. Are you still doing business for Mrs. Browning in this city?
(Same objection.)
A. Not any legal business; I have traded with her this summer.
Q. 31. You stated the other day, if I remember correctly, that you had resided in this city for about twenty years; is that correct?
(Same objection.)
A. I came here in 1856, and I think a part of the time I made it
730 my home on the old place at Canaan, and resided there and voted there; I think that most of the time I have resided here; a part of the time since '56, I had my office with Judge Cadman, at Chatham Village; he was not a judge at that time.
Q. 32. During your residence in Troy, you have been a hotel, a restaurant, saloon, and billiard table keeper, in this city, have you not?
(Same objection, and as leading.)
A. I have, a portion of the time.
Q. 33. About what proportion of the time?
(Same objection.)
A. I should think about one-quarter, but not to the exclusion of my law business.
Q. 34. Did I ask you to state anything about your law business in the last question?
(Same objection.)
A. If you did, I did not hear it.
Q. 35. Then why did you answer anything about it, so long as you swear that you were not interrogated about it?
(Same objection.)
A. To prevent the inference that during that time I abandoned my profession.
Q. 36. During the twenty years or more that you have resided in Troy, although voting in an adjacent county, as you have stated, did you ever

have a place where you have engaged in the use of cards, when money was at issue, being played for.

(Objected to as irrelevant, immaterial, and incompetent generally.)

731 A. I presume that on a very few occasions money was played for in the lobbies of the saloon, but I don't recollect of over half a dozen times while I was in the saloon; I kept no place or room for gambling in the saloon while I had charge of it nor anywhere else.

Q. 37. Have you, since you resided in this city, engaged in the use of cards with anybody, or in any place where money has been at stake and played for by yourself as one of the parties?

(Same objection.)

A. I have played cards in this city a great many times for money, and if I lost I have always paid, and if I gained I always took it if I could get it; a part of such playing has been with the best, the most reputable men of this city.

Q. 38. You consider a man who is a gambler and known as such, a reputable, trustworthy citizen in this city or anywhere else?

(Same objection.)

A. I do not, and I think that a gambler should be kicked out, and shut out, and ostracized from all decent society.

Q. 39. Do you think a man of that character is a proper person to sit in judgment on the character of his fellow-man, either for truth and veracity, or anything else?

(Same objection.)

A. I do not, although I know gamblers whose dealings and truth were as good as the dealings and truth of Mr. Norton, testified to by Mr. D. W. Ford; whose word was as good as their bond.

732 Q. 40. Previous to your coming to Troy to reside, did you travel upon any boats of the Mississippi River, between St. Louis and New Orleans?

(Same objection.)

A. I never did, and I do not believe that he thinks that I ever did; it was only intended as a mud-fling at me.

Q. 41. Have you ever been engaged in playing cards for money in any other place than the city of Troy?

(Same objection.)

A. I have played cards at Hudson, when I was attending court; I have played cards when I was at Albany, attending as a member of the legislature; and I have played cards at State conventions; I have played cards at Chatham Village, but never as a business.

Q. 42. How much money have you won at the playing of cards for that purpose?

(Same objection.)

A. I could not tell.

Q. 43. How much have you lost at the playing of cards during the last thirty years?

(Same objection.)

A. I don't know.

Q. 44. You have both won and lost at the playing of cards, have you not?

(Same objection.)

A. Yes.

Q. 45. Since your examination to-day, while you were being examined as a witness, have you not told Norton that he was a liar?

(Same objection.)

733 A. I have, and am willing to repeat it.

Q. 46. Your willingness to repeat it not being doubted at all, you are requested to state whether you do repeat it or not.

(Same objection.)

A. I do not care to repeat it, but I think that when he stated certain things about my being on a Mississippi steamboat, he knew he lied when he stated it.

Q. 47. Whereabouts in this city is your office located?

(Same objection.)

A. You can ascertain by looking at the directory.

Q. 48. The directory not being convenient at this time, the question is again repeated to you.

(Same objection.)

A. It is at 37 Congress street.

Q. 49. How long has your family resided at the city of Troy?

(Same objection.)

A. For about a year.

Q. 50. Do you know Marcus Ball of this city?

(Same objection.)

A. I do.

Q. 51. About how long have you known him?

(Same objection.)

A. I think I have known him since 1856.

734 Q. 52. He is a lawyer by profession, is he not?

(Same objection.)

A. He is.

Q. 53. From your knowledge of him, would you believe him under oath?

(Same objection.)

A. I would.

Q. 54. Do you know a person by the name of Richard M. Hermance?

(Same objection.)

A. I do not.

Q. 55. Do you know a person in this city by the name of Henry G. Giles?

(Same objection.)

A. Not personally.

Q. 56. Do you know anything about him; and, if so, what?

(Same objection.)

A. I don't know anything about him.

Q. 57. Do you know a man in this city by the name of Joseph C. Henderson?

(Same objection.)

A. I don't remember any such man.

Q. 58. Do you know a person in this city by the name of Nelson Pramer?

(Same objection.)

A. I do not.

735 Cross-examination:

By Mr. CLARKE:

X Q. 59. Complainant's last witness, Mr. Ford, was one of the reputable persons in this city with whom you have played cards for money, was he not?

A. He was.

Redirect examination:

By Mr. NORTON:

R. D. 60. Do you know Levi Smith, of this city?

A. I do.

R. D. 61. Is he a lawyer, and of the firm of Smith, Fursman & Cowen, in this city?

A. He is.

R. D. 62. Did you ever play cards with him for money?

A. I have; but not within the last fifteen years, to my recollection.

R. D. 63. Did you ever play cards for money with Marcus Ball?

A. I never did.

R. D. 64. How frequently have you, in former years, played cards with Smith for money?

A. I cannot say, but not very often.

P. W. BISHOP.

Subscribed and sworn to before me this 29th day of August, 1878.

IRVING BROWNE,
Special Examiner.

736 GEORGE A. WELLS, a witness called on the part of the complainant, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. George A. Wells; age, 48; residence, Troy; and occupation, stove manufacturer.

Q. 2. About how many years have you resided in the city of Troy?

A. About ten years, and my residence is 171 Second street.

Q. 3. About how long have you been engaged in the business stated by you in your first answer, and in the city of Troy?

A. About twenty-one years.

Q. 4. You are a member of the firm of Fuller, Warren & Co., of this city, are you not?

A. I am.

Q. 5. Your firm is engaged in a large and extensive manufacturing business of stoves, ranges, heaters, and such like, is it not?

A. It is.

Q. 6. Where is the foundry or manufactory located?

A. In the south part of Troy.

Q. 7. Your business as a manufacturer and vender in the articles named has brought and brings you into an acquaintanceship with and a knowledge of a large number of business men and citizens in this city, has it not and does it not?

A. It has and does.

Q. 8. Do you know Marcus P. Norton, of Troy?

A. I do.

Q. 9. About how many years have you known him?

A. About ten years.

Q. 10. So far as you know, what has been his business since you knew him?

A. A patent lawyer.

737 Q. 11. Has he ever been employed by your firm in that line of business?

A. He has had matters of ours to attend to.

Q. 12. Do you know his character for truth and veracity here?

A. So far a I have had dealings with him.

Q. 13. Do you consider it good or bad?

(Objected to as irrelevant and immaterial.)

A. So far as I have had dealings with him, I consider it good.

Q. 14. From your knowledge of his character for truth and veracity, would you believe him under oath?

(Same objection, and also because the proper basis for the question is not stated.)

A. I would.

Q. 15. If you did not consider his character good for truth and veracity, you would not believe him under oath, would you?

(Same objection.)

A. No, I would not.

Cross-examination:

By Mr. CLARKE:

X Q. 16. From what you say on your direct examination, I infer that you do not allow anything to influence you in determining that Mr. Norton's character for truth is good, except your personal dealings with him; is that so?

A. I base it upon my own knowledge of the man.

X Q. 17. You were not influenced at all by report or rumor concerning him?

A. I was not.

738 X Q. 18. When did Mr. Norton last do any business for you?

A. Some eight or nine years ago.

X Q. 19. Why have you not employed him since?

A. My partners are employed in that department of patents.

X Q. 20. Do you mean that you don't know?

A. I don't know the reason, except that he was out of town or absent from the city.

GEO. A. WELLS.

Subscribed and sworn to before me this 29th day of August, 1878.

IRVING BROWNE,
Special Examiner.

HEZEKIAH S. BENEDICT, a witness called on the part of the plaintiff, being first duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is H. S. Benedict; age is 64; residence, Troy; occupation, agent for the express companies, National and American.

Q. 2. About how long have you resided in the city of Troy?

A. I have resided here since the fall of 1836.

Q. 3. About how long have you been agent of the express companies spoken of by you in your first answer?

A. I have been since 1850 agent for the American Express Company, and since 1867 for the National Express Company.

Q. 4. Your place of business is located where in the city of Troy?

739 A. At the corner of Fulton and Union streets, opposite the railroad depot.

Q. 5. Your business has led you into an acquaintance with a large number of business men of the city of Troy, has it not?

A. Yes, sir; I guess all of them pretty much.

Q. 6. Do you know Marcus P. Norton, of the city of Troy?

A. Yes, sir.

Q. 7. About how long have you known him?

A. Well, from fifteen to twenty years.

Q. 8. Has he had frequent dealings with your companies during or within that time?

A. Yes, sir.

Q. 9. Do you know his character for truth and veracity in this city?

A. I know nothing to the contrary; I regarded him always as a man of truth and veracity.

Q. 10. Do you consider it good or bad?

A. I consider it good, sir.

Q. 11. From your knowledge of his character for truth and veracity, would you believe him under oath?

(Objected to as irrelevant, immaterial, and incompetent, and altogether improper.)

A. I would.

Cross-examination:

By Mr. CLARKE:

X Q. 12. What do you understand by the phrase "character for truth and veracity in this city"?

A. Well, I understand it as being a general opinion, as far as I have heard or know, gained much from my own intercourse, and also
740 from business transactions and knowledge of him; my conclusions were drawn chiefly from my own personal business intercourse, and supported by the absence of anything derogatory to him from others affecting his truth and veracity.

X Q. 13. What has been the nature of your business with Mr. Norton?

A. It has been the transmission of papers, packages, from receiving packages for him, and many of them requiring payment on delivery of same; of what is known as C. O. D. bills, and also drafts for collection.

X Q. 14. When did you have the most of that business with him?

A. I should think it was between five and fifteen years ago, but less within the last five years, though there has been a continuance of business, but not as great as before.

X Q. 15. Do people talk much about Mr. Norton, and have they?

A. Not at our office. I am most of the time there; what I have heard mostly spoken of concerning him has been his skillful management in the obtaining of patents.

X Q. 16. How long ago was that?

A. I should say that the most was said about it five or ten years ago.

X Q. 17. Within the last five or six years, have you heard Mr. Norton spoken of in any way, frequently or seldom?

A. Well, I think quite frequently within a single year, about '74, when he had a claim on a patent for a large amount, against the city of Troy.

X Q. 18. Well, how about the other years since, say 1870?

A. I had heard less concerning this claim, but have heard it occasionally spoken of, and the impressions which I gained were that the matter was to be compromised. For the last year or two I have
741 heard very little about this patent, and very little about him in any way, since he has been most of the time out of the city.

X Q. 19. Did you ever hear of Mr. Norton's reputation being impeached, or attempted to be impeached, in any case or suit in which William E. Hagan, Shavor, Groom, and Potter were parties, about fifteen years ago?

A. I recollect that several years ago, when I went down to his office, I found quite a large number of people there, and when I inquired what

was going on, I found that they were trying to impeach him. I do not recollect who the parties were who made the attempt.

X Q. 20. Did you ever hear of Mr. Norton being debarred or prohibited from practicing in the Patent Office some five or six years ago?

A. No, sir. I have never heard any such thing.

X Q. 21. Did you ever hear of Mr. Norton being indicted for forgery some five or six years ago, in the District of Columbia?

A. I heard that he was having some trouble of that kind, but I don't recollect of ever having heard what the result was; at least I don't know that such was the fact.

X Q. 22. Do you know anything about Mr. Norton's financial condition?

A. No, sir; I do not.

X Q. 23. Haven't heard anything about it?

A. I think I heard that he had failed, and been sold out.

X Q. 24. Have you had any conversation with anybody about Mr. Norton, who has had personal dealings with him?

A. I don't think I have.

X Q. 25. From what class of people have you generally heard what you have heard about Mr. Norton?

A. It has been with persons with whom I have done business at my office. I should say that it has been with tax-payers.

742 X Q. 26. Well, about how extensive were the conversations at any one time?

A. Not extensive at all, merely casual.

X Q. 27. Norton's claim against the city was in the newspapers, was it not?

A. I think it was, am not positive.

H. S. BENEDICT.

Subscribed and sworn to before me this 29th day of August, 1878.

IRVING BROWNE,
Special Examiner.

MARY L. BROWNING, a witness called on the part of the plaintiff, being duly sworn, testifies as follows:

Q. 1. What is your name and residence?

A. Mrs. Mary L. Browning; 112 Fifth street, in the city of Troy.

Q. 2. About how long have you resided in the city of Troy?

A. About ten years off and on.

Q. 3. Do you know a person in this city by the name of Philetus W. Bishop, a lawyer?

A. I do.

Q. 4. You have known him for about how long?

A. For about five years; through letters and correspondence about six.

Q. 5. Did you ever employ him to transact any business for you?

A. I did.

Q. 6. About what year was that?

A. Six years ago last May.

Q. 7. State, if you have no objections, what it was you employed him to do?

(Objected to as irrelevant, incompetent, and immaterial.)

743 A. Well, previous to this six years I invested twenty-six hundred dollars with Mr. Alexander, of West Troy, through an agent,

and a short time after the deposit the agent drew one thousand dollars without my knowledge or consent; so my husband he consulted Mr. Bishop, and he advised him to sue for the whole, the twenty-six hundred dollars; so we left Mr. Bishop here in Troy to manage the business, while my husband and myself went West to Columbus, Ohio; and in June following Mr. Bishop drew the sixteen hundred dollars in Mr. Alexander's hands, representing to the court that I was very needy and needed the money, and left the remaining thousand dollars to be decided by law; two years after that I came to Troy and learned from Mr. Kellogg, the referee, that Mr. Bishop had drawn this money; this was the first I knew about it, Mr. Bishop all the time corresponding with me in regard to the matter.

Q. 8. Mr. Bishop brought a suit for you against Mr. Alexander to recover the twenty-six hundred dollars, as well as interest, spoken of in your last answer, did he not?

(Same objection.)

A. Yes, he did.

Q. 9. State whether this twenty-six hundred dollars and interest, of which you speak, was or was not the last of a fortune which had become yours?

(Same objection.)

A. It was.

Q. 10. Do you remember when that suit was commenced?

(Same objection.)

A. Six years ago last May.

744 Q. 11. After the suit was commenced in 1872, did you frequently write to Mr. Bishop, asking him as to the progress of your suit or the probability of getting money from Alexander?

(Same objection.)

A. Yes, sir.

Q. 12. And about how long did that correspondence continue?

(Same objection.)

A. During two years, and until I came to Troy and learned what he had done.

Q. 13. From whom in Troy did you first learn that Mr. Bishop had obtained an order from court by which he had drawn seventeen hundred and forty-one dollars of your money from Alexander?

(Same objection.)

A. From Mr. Kellogg, the referee.

Q. 14. During the two years that Bishop was corresponding with you about your suit with Alexander, was Mr. Bishop in communication with you by letters through the post-office?

(Same objection.)

A. He was.

Q. 15. In that time how many letters did you receive from him?

(Same objection.)

A. Sixty or seventy.

Q. 16. About how many letters have you brought here in court for complainant's counsel to examine?

(Same objection.)

A. About fifty-eight.

745 Q. 17. Do you remember where the rest are?

(Same objection.)

A. Either lost or destroyed; we saved most of the important ones.

Q. 18. In any of the sixty or seventy letters which you say he wrote you after the commencement of the Alexander suit, in the spring of

1872, and during the time you were in Columbus, Ohio, and until you came to Troy, N. Y., to see the referee, Mr. Giles B. Kellogg, did he write you that on the 7th day of June, 1872, and within about one month after the commencement of that suit, he had obtained an order from the court by which he had received seventeen hundred and forty-one dollars of your money which that suit had been commenced to recover, including also another thousand dollars, making in all twenty-six hundred dollars and interest?

(Same objection; also, as leading; also, as asking for secondary evidence.)

A. No; he did not, but he wrote that he was daily expecting to receive it.

Q. 19. And he kept up a correspondence of that kind with you for about two years, did he not?

(Same objection.)

A. Yes.

Q. 20. By the correspondence you were led to believe, from the representations made to you in those letters, that you soon would receive your money, did you not?

(Same objection.)

A. Yes.

Q. 21. How came you to come to Troy at the time you did to see the referee, Mr. Kellogg, about the matter?

(Objected to as incompetent, irrelevant, and immaterial.)

746 A. We suspected that Mr. Bishop was not honorable in his dealings with us, and that is why we came.

Q. 22. On your interview with the referee about the matter did you learn that Mr. Bishop had been honorable or dishonorable with reference to the matter that you had previously intrusted to him as your lawyer to collect that claim?

(Same objection.)

A. Dishonorable.

Q. 23. You may explain as briefly as you can the way in which he had been dishonorable with you in that matter.

(Same objection.)

A. By drawing the money by order of the court and appropriating it to his own use. He also gave me a note from Mr. Stetson, with his endorsement, that was illegal and not worth anything at all, and it was never paid. He advised us not to have it protested when it came due, but we did.

Q. 24. Who was the endorser on the note that Mr. Bishop gave you?

(Same objection.)

A. Mr. Bishop himself.

Q. 25. Who was the maker of that note, and for how much was it? and you may state anything you desire to in reference to this note.

(Same objection.)

A. E. T. Stetson was the maker; it was for fifteen hundred dollars, with ten per cent. interest; it was dated and made payable in this city, I think; this was within one year after the suit was ended—

747 about the year 1874 or 1875. Mr. Bishop wrote me that this Mr. Stetson wished to borrow fifteen hundred dollars, and Mr. Bishop says: "I have the money myself, and will give it to him, providing that I take yours when I get it, which will be very soon," and Mr. Stetson would give me his note at ten per cent., and he (Mr. Bishop) would endorse it, and a life insurance policy of ten thousand dollars for one year, and providing anything happened to Mr. Stetson I would get the

insurance of ten thousand dollars. I saw Mr. Stetson several times myself, and he told me he would pay me something on the note—after it was protested, this was—but he never did. I think there was a put-up job between them, for they put me off with a sham note, and all this time Bishop had the money from the court in his possession.

Q. 26. For what length of time was this note made to run from its date?

(Same objection.)

A. One year.

Q. 27. Did Stetson ever pay you anything upon the note?

(Same objection.)

A. No.

Q. 28. Did Bishop pay you, as an endorser of that note?

(Same objection.)

A. No.

Q. 29. Did you ever receive anything from or by reason of the insurance policy?

(Same objection.)

A. No.

748 Q. 30. After you had seen Mr. Kellogg and learned that Bishop had had several hundred dollars of your money for two years or more, which he had withheld from you, and had deceived and lied to you about in his letters, did you call upon Mr. Bishop in reference to the matter while in Troy?

(Same objection.)

A. I did.

Q. 31. What did he say to you about it, if you remember?

(Same objection.)

A. I remember very well what he said about it; he said that he did not intend that I should know that he had the money. During this time he wanted Mr. Browning to take some hotels and some patent rights which he owned, but Mr. Browning wanted the money.

Q. 32. State how much, if any, Mr. Bishop has paid you out of the money amounting to seventeen hundred and forty-one dollars, paid to him by Alexander in June, 1872, and when it was.

(Same objection.)

A. While West he sent me small sums several times, amounting to about three hundred dollars, as near as I can remember; then this fifteen-hundred-dollar note I settled for three hundred and fifty dollars and a billiard table, but the billiard table I never got.

Q. 33. State why you never got the billiard table.

(Same objection.)

A. He said that the sheriff had seized the table for court charges.

749 Q. 34. Did he tell you where the table was?

A. Chatham Four Corners.

Adjourned to Aug. 30, 9 a. m.

I. B., *Sp. Ex'r.*

Met Aug. 30, 9 a. m., pursuant to adjournment of Aug. 29.

Complainant's counsel offers in evidence several letters dated as follows, each being signed P. W. Bishop, and all dated at Troy, New York, and all addressed to the lady witness now on the stand, under examination, with the exception of a few that are addressed to the lady's husband, James S. Browning: First is dated April 1st, 1872; 2d, May

1st, 1872; 3d, May 16th, 1872; 4th, May 21st, 1872; 5th, June 8th, 1872; 6th, June 13th, 1872; 7th, July 2d, 1872; 8th, August 3d, 1872; 9th, August 10th, 1872; 11th, August 20th, 1872; 12th, August 20th, 1872; 13th, August 24th, 1872; 14th, September 18th, 1872; 15th, September 28th, 1872; 16th, October 7th, 1872; 17th, November 6th, 1872; 18th, November 16th, 1872; 19th, November 27th, 1872; 20th, December 5th, 1872; 21st, December 26th, 1872; 22d, January 21st, 1873; 23d, January 27th, 1873; 24th, January 29th, 1873; 25th, February 13th, 1873; 26th, March 11th, 1873; 27th, April 1st, 1873; 28th, April 2d, 1873; 29th, April 21st, 1873; 30th, April 29th, 1873; 31st, May 5th, 1873; 32d, May 14th, 1873; 33d, June 7th, 1873; 34th, June 11th, 1873; 35th, June 19th, 1873; 36th, June 24th, 1873; 37th, June 16th, 1873; 38th, June 14th, 1873; 39th, July 4th, 1873; 40th, July 11th, 1873;
750 41st, July 17th, 1873; 42d, July 24th, 1873; 43d, July 26th, 1873; 44th, July 30th, 1873; 45th, a protest of a promissory note for fifteen hundred dollars, made by E. T. Stetson, which protest is dated July 12th, 1873; 46th, a letter dated August 24th, 1873; 47th, also a letter dated June 3d, 1873; 48th, January 13th, 1874; 49th, October 15th, 1874; 50th, October 20th, 1874; 51st, October 29th, 1874; 52d, also October 29th, 1874; 53d, November 11th, 1874; 54th, November 11th, 1874, on two sheets of paper; 55th, November 11th, 1874; 56th, March 25th, 1875; 57th, a letter dated Columbus, Ohio, November 1st, 1874, addressed to Mr. Giles B. Kellogg, and signed M. L. Browning, with the réply of Mr. Kellogg thereto, dated Troy, November 4th, 1874, which is in the following words and figures: "It was admitted on the trial that Alexander, under the order of the court, paid to your attorney, on the 7th day of June, 1872, $1,741.00. Yours, &c., G. B. K., Troy, Nov. 4, '74." Which several letters complainant's counsel will not formally offer in evidence until the witness shall have been examined further concerning them, and not until defendant's counsel shall have read them; and when offered will be marked "Bishop letters," from number one to number fifty-seven inclusive, as above indicated.

Direct examination of the witness MARY L. BROWNING resumed:

Q. 35. I now show you a package of letters, consisting of fifty-six letters, and a notice of protest, which have been heretofore marked as exhibits in this case by the examiner, and state if you have ever seen these letters before to-day; and, if you answer yea, state where you were when you first saw them.

751 A. Yes; I was at Columbus, Ohio, when I first saw them.

Q. 36. You brought these letters into court yesterday, under a subpœna, and by the request of complainant's counsel, did you not?

A. Yes.

Q. 37. Some of these letters are addressed to your husband, are they not, and the remainder to yourself, with the exception of a letter dated November 1st, 1874, addressed by your husband to Mr. Kellogg, and having Mr. Kellogg's reply written on the same sheet of paper, and numbered 57?

A. Yes, they are.

Q. 38. How did you and your husband receive those several letters?

A. Through the mail at Columbus, Ohio.

Q. 39. From whom did you and your husband receive these several letters?

A. P. W. Bishop.

Q. 40. Were the letters in reply to letters addressed by you or your husband to Mr. P. W. Bishop, of this city?

A. Yes.

Q. 41. And were they received by you while Bishop was pretending to act as your attorney against Mr. Alexander, of West Troy, in a claim for twenty-six hundred dollars and the interest thereon, and pending before Mr. Giles B. Kellogg, of this city, as referee?

A. Yes.

Q. 42. Was the twenty-six hundred dollars exclusive of the interest for money that you had loaned or deposited with Mr. Alexander, of West Troy?

(Objected to as irrelevant and immaterial.)

A. Yes.

Q. 43. Did you, during 1872 and 1873, need this money in business, or for other purposes?

(Same objection.)

752 A. Yes.

Q. 44. Did you expect that this money, when paid by Alexander, would be immediately paid to you?

(Same objection.)

A. Yes.

Q. 45. During the time covered by these several letters of 1872 and 1873 and 1874, and until the fall of 1874, did you know that Mr. Bishop had received seventeen hundred and forty-one dollars from Mr. Alexander?

(Same objection.)

A. No.

Q. 46. From whom did you first receive the information that in June, 1872, Mr. Bishop had received from Mr. Alexander this seventeen hundred and forty-one dollars?

(Same objection.)

A. From Mr. Giles B. Kellogg, the referee.

Q. 47. In what year and time of year was this, if you remember, that you received this information?

(Same objection.)

A. In the fall of 1874; it was in the mouth of October, I think, while my husband and myself were on here on business. I was then in business in Columbus, Ohio. After I returned Mr. Kellogg wrote me, giving me the exact date.

Q. 48. Did you employ a lawyer in this city to inquire into Mr. Bishop's conduct toward you as an attorney, and with reference to trying to obtain from him the seventeen hundred and forty-one dollars spoken of in several preceding questions?

(Same objection.)

753 A. Yes.

Q. 49. What did that lawyer say to you about it, if anything, and how was the matter finally disposed of?

(Same objection.)

A. He said he was not worth anything, and advised me to take whatever sum I could get. The offer was three hundred and fifty dollars and a billiard table, in settlement. I got three hundred and fifty dollars in notes from Bishop, endorsed by A. D. Lyon, and they were paid, but the billiard table I never received, as I before stated.

Q. 50. Have you produced here in court all the letters from Bishop to you and your husband that you had preserved?

(Same objection.)

A. Yes.

Q. 51. How many envelopes in which those letters came to you and your husband did you preserve, and now have here with you?

A. Twenty-six, as I count them.

Q. 52. If you have no objection, I ask you to produce those envelopes to accompany the letters you have produced.

A. I will, and do produce them.

Complainant's counsel here offers in evidence the several letters and notice of protest referred to by this witness on her examination, and heretofore marked Complainant's Exhibit Bishop Letters, numbered one to number fifty-seven, inclusive, and asks that the file and marking stand as already made by the examiner.

Complainant's counsel asks the defendant's counsel to consent on the record that each and every of these letters be withdrawn from the case after the same have been printed, and the case submitted to the
754 court on argument. Complainant's counsel agrees that copies of the said several letters shall be certified to, and filed at the time of the withdrawal of the same from the records of this court, and he also agrees to file with the clerk of this court printed copies of the same.

Complainant's counsel states the reason why he makes this request, as follows, to wit: for the purpose of enabling complainant's counsel at an early day to make a motion to the court to disbar Mr. Philetus W. Bishop, and to prohibit him from any further or future practice in the several courts of this State.

To the admission of said letters and papers, and every of them, defendant's counsel objects, on the ground that they are immaterial and irrelevant, but he states that he has no objection to their withdrawal from the record on the terms above indicated, and therefore consents to the same.

Complainant's counsel states that the envelopes produced by the witness, and offered, may be marked by the examiner in any way he may deem sufficient.

Complainant's counsel stating that he is through with the witness, defendant's counsel states that he does not wish to cross-examine, but that he objects to each and every part of the deposition, on the ground that it is immaterial and irrelevant.

MRS. M. L. BROWNING.

Subscribed and sworn to before me this 30th day of August, 1878.

IRVING BROWNE,
Special Examiner.

755 ROBERT H. MCCLELLAN, a witness called on the part and in behalf of the complainant, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. My name is Robert H. McClellan, of Troy, New York; a counselor-at-law; my age is fifty and upwards.

Q. 2. About how long have you resided in the city of Troy?

A. Twenty-two years and upwards.

Q. 3. About how long have you practised your profession in this State?

A. Upwards of twenty-nine years, and for twenty-two years and upwards in the city of Troy.

Q. 4. Have you been surrogate of the county of Rensselaer, in which is situated the city of Troy?

A. I have, for four years succeeding January 1, 1856.

Q. 5. Have you at any time been chief officer or collector of customs for the United States at the port of Troy?

A. I was deputy collector of customs at the port of Troy, being under the collector of New York, and during a part of the administration of President Grant.

Q. 6. Do you know Marcus P. Norton, of the city of Troy?

A. I do.

Q. 7. For about how many years have you known him?

A. From about the time that he came to the city of Troy.

Q. 8. Did you at one time reside in the city of Troy near where Norton resided?

A. Yes; for, I think, about two years.

Q. 9. Whereabouts in the city is your law office situated?

A. In a building corner Third and Congress streets.

756 Q. 10. Have you a partner in your law business?

A. Yes.

Q. 11. Have you ever been counsel in any case with Norton, or he counsel with you, in any case involving patented inventions?

A. Yes.

Q. 12. How many do you remember now?

A. Two cases is what I remember now.

Q. 13. Those cases were in the circuit court for the northern district of New York, were they not?

A. Yes.

Q. 14. State whether some time in 1872, or the fore part of 1873, you brought suit for Marcus P. Norton against William W. Secombe, of the city of New York.

A. My firm brought such a suit, and about that time.

Q. 15. Do you know what was the result of that suit?

(Objected to as irrelevant and immaterial.)

A. As I was informed by Norton only, that he had settled.

(Answer objected to as hearsay.)

Q. 16. Was there an answer put in that case?

(Objected to as irrelevant and immaterial.)

A. No, I think not.

Q. 17. Did you enter a judgment in that case?

(Same objection.)

A. We did not.

Q. 18. Do you remember the time when an attempt was made to put Norton into bankruptcy, in this city, some six or seven years ago?

757 A. I remember the time when proceedings were commenced against, or by him, in bankruptcy.

Q. 19. Do you know his character for truth and veracity in this city?

A. I can only answer by saying that I have no recollection of ever having heard it spoken against by anybody; I will except Henry Burden.

Q. 20. Do you consider it good or bad?

A. I consider it good.

Q. 21. From your knowledge of his character for truth and veracity would you believe him under oath?

A. I would, as any other witness.

Q. 22. You may state, if you have no objection, what you heard Henry Burden say, and when it was, and what it was about.

(Same objection.)

A. I cannot remember what he said, nor definitely when it was. The subject was some patent, or patent controversy.

Cross-examination:

By Mr. CLARKE:

X Q. 23. How much have you heard Mr. Norton talked about in any way, by anybody, within the last ten years, much or little?

A. Since the time of Mr. Norton's proceedings in bankruptcy I have not heard him spoken of much; before those proceedings I heard him spoken of much among members of the profession.

X Q. 24. When were those proceedings—about?

A. I should think those proceedings were eight or nine years ago; perhaps not more than seven.

X Q. 25. Did you ever hear of Mr. Norton's reputation for truth being impeached, or attempted to be impeached, in any case but this?

758 A. Yes; I think that I heard it from Henry Burden, and that he gave me printed copies of the record.

X Q. 26. Did you examine any of the testimony?

A. I think that I did.

X Q. 27. Did you ever hea r anybody speak favorably of Mr. Norton's character as regards truth?

A. Not as I remember.

X Q. 28. Then all the positive information which you have received on the subject of Mr. Norton's character for truth has been unfavorable to him, has it not?

A. Yes; so far as I remember.

X Q. 29. Did you ever hear of Mr. Norton being debarred or prohibited from practicing in the Patent Office, some six or seven years ago?

A. Yes.

X Q. 30. Did you ever hear of an attempt being made to impeach Mr. Norton in one of the trials following the assassination of President Lincoln, in which he was a witness?

A. I think I saw something of it in the public press, but my recollection of it is very indistinct.

X Q. 31. Did you ever hear of a similar attempt in a case in this city, some fifteen years ago, in which William E. Hagan, Shavor, Groome, and Potter were parties?

A. Yes.

X Q. 32. Do you know anything about Mr. Norton's financial reputation for the last ten years?

A. I did hear something about it about the time of his bankruptcy proceedings.

X Q. 33. Well, what has been since those proceedings?

A. I don't think that I have heard anything about it since those proceedings.

X Q. 34. Because you have not heard anything about it do you consider it good at present; would you trust him as readily as you would have prior to the bankruptcy proceedings?

759 A. I have trusted him since; I never trusted him before. I consider it the highest evidence of good character that it is not discussed.

X Q. 35. Well, is his financial reputation good or bad at present?

A. So far as I know, he has no financial reputation in this city.

X Q. 36. Has he any reputation for truth?

A. Not that I am aware of.

X Q. 37. You would not say, then, that his reputation for truth and veracity is good in this city, would you?

A. No; only that it is not questioned, that I am aware of.

X Q. 38. You say that you have trusted Mr. Norton since his bankruptcy; is he indebted to you now in any way?

A. No, sir.

X Q. 39. How long since he paid up?

A. Within the last year, I think.

X Q. 40. Very little is said about Mr. Norton now in any way; is that so?

A. It is.

X Q. 41. Considering what you have heard against Mr. Norton's veracity, would you believe his testimony as readily as you would that of another man against whom you had heard absolutely nothing, supposing their testimony in flat contradiction to each other?

A. I think I would, also considering my own knowledge of the man Norton.

X Q. 42. Your personal knowledge of Mr. Norton is what would make the balance even between the two men?

A. My personal knowledge of him, or any other witness, will add to or detract from the weight of their testimony.

X Q. 43. Suppose you knew the other witness as well and as favorably as you knew Mr. Norton, how then?

760 A. I think then that I would be obliged to work on the inherent probabilities of the case, by which I mean that what I have heard in relation to Mr. Norton would not influence my judgment unfavorably to him, I think.

Redirect examination:

By Mr. NORTON:

R. D. 44. At the time when you heard Henry Burden speaking of Norton, did you learn from him in any way that Norton was professionally engaged against him in some kind of litigation about patents?

A. I think he spoke as if Norton were against him as implied in the question.

R. D. 45. Counsel for the defendant in operating his celebrated mud machine during your cross-examination was pleased to inquire of you about attempted impeachments, Patent Office disbarments, and such like; have you any personal knowledge of the truth of such allegations?

(Objected to as immaterial.)

A. No.

R. D. 46. Has whatever you may have heard changed your opinion with reference to Norton's character in this city?

A. No.

R. D. 47. Your opinion of him and his character is substantially as you have stated on your direct examination, is it not?

A. It is as I stated.

R. D. 48. Counsel for defendant, still operating his mud machine, was pleased to inquire of you as to Norton's financial standing in this city, as though a man could not be a truthful man without having a large

761 bank account; I desire to know if you know whether defendant's counsel pays his debts or not, or has any financial standing anywhere?

(Same objection.)

A. I have no knowledge on the subject.

R. D. 49. You know of many persons in this city who are perfectly truthful and honorable and honest, now in debt, and unable at the present time to pay those debts, do you not?

(Same objection.)

A. I think that I could, upon reflection, name many.

R. D. 50. Do you measure any man for truth and veracity by his financial ability?

(Same objection.)

A. No.

ROBERT H. McCLELLAN.

Subscribed and sworn to before me this 30th day of August, 1878.

IRVING BROWNE,
Special Examiner.

WAIT J. STILLMAN, a witness called on part and behalf of the complainant, being duly sworn, testifies as follows:

Q. 1. What is your name, age, residence, and occupation?

A. Wait J. Stillman; residence, Troy, Rensselaer County, New York; age, 61 and a little over; my occupation is real estate and insurance, and negotiating mortgages.

762 Q. 2. About how long have you resided in this city?

A. I have done business regularly here for seven years.

Q. 3. Previously to your coming to Troy permanently to reside, did you own and operate a farm near the city of Troy?

A. Yes; within three miles and a half.

Q. 4. Whereabouts in this city is your office?

A. 72 Second street, corner of Congress.

Q. 5. You have a partner in business, have you not?

A. I have, and the firm is Stillman & Son.

Q. 6. Your business brings you into relation with and a knowledge of many people in this city, does it not?

A. Yes.

Q. 7. Do you know Marcus P. Norton, of the city of Troy?

A. Yes, sir.

Q. 8. About how long have you personally known him?

A. Well, eleven years or more.

Q. 9. You knew him from reputation before that time, did you not?

A. Yes; although I did not know him.

Q. 10. State whether you ever had any business dealings with Mr. Norton.

A. Yes; I have.

Q. 11. Did you ever have any dealings with him professionally?

A. I frequently consulted him professionally, but never had a bill presented to me for services.

Q. 12. Do you know his character for truth and veracity in this city?

A. No; I never heard anything about it; I don't know anything about it; I never heard anything against it.

Q. 13. Do you consider it good or bad?

(Objected to as immaterial.)

763 A. I consider it good—never had any reason to consider it otherwise.

Q. 14. From your knowledge of his character for truth and veracity in this city, would you believe him under oath?

(Same objection.)

A. Of course I would.

Cross-examination:

By Mr. CLARKE:

X Q. 15. Do you know anything about Mr. Norton's financial reputation in this city?

A. No, sir.

X Q. 16. Do you know anything directly or by report about Mr. Norton having been indicted in the District of Columbia for forgery some six or seven years ago?

A. Well, I can't say that I have; I heard there was some trouble then about some stamp.

X Q. 17. Did you ever hear anything about an attempt to impeach Mr. Norton's character for truth in any case except this?

A. No, sir; I don't think I ever have.

X Q. 18. Did you ever hear about an attempt made some eight or nine years ago to put Mr. Norton into bankruptcy?

A. I never have.

X Q. 19. When did you last have any dealings with Mr. Norton?

A. I think it was about seven years ago.

X Q. 20. You say that, having your memory first refreshed by Mr. Norton?

A. He did somewhat.

X Q. 21. How much business did you ever have with Mr. Norton?

764 A. Perhaps, in the whole time, two or three hundred dollars, and it may be five hundred for aught I know.

X Q. 22. What was the nature of that business?

A. It was the sale of milk for his family, and I think some things off the farm.

X Q. 23. You used to hear him talked about a great deal in those days; is that so?

A. No; not a great deal.

X Q. 24. In the last seven or eight years, how much have you heard him talked about?

A. Very little.

Redirect examination:

By Mr. NORTON:

R. D. 25. Counsel for the defendant, seeming anxious to know about Norton's financial standing here, has put some questions about that matter; did you ever have a bill or claim against Norton that was not promptly and honorably paid by him?

(Objected to as immaterial.)

A. They were always satisfactorily paid.

W. J. STILLMAN.

Subscribed and sworn to before me this 30th day of August, 1878.

IRVING BROWNE,
Special Examiner.

765 MARCUS P. NORTON, a witness called on the part of the complainant, having been previously duly sworn in the case, testifies as follows:

Q. 1. Have you been previously sworn and examined as a witness in this case; and, if so, when and where?

A. I have been, at Troy some time during the winter last past or

spring, and also in the city of New York before Mr. John A. Shields during the past summer; my examination at Troy was before the present special examiner.

Q. 2. Defendant's counsel, in attempting to impeach your character for truth and veracity, in Troy, has, during his cross-examination of witnesses in this case, inquired of them if they had ever heard that you had been disbarred from practice in the United States Patent Office; state what you now remember concerning that matter.

(Objected to as immaterial and irrelevant.)

A. What I am about to state about that matter will be the exact facts concerning the allegation, and will be stated in as few words as I can state the same. In the year 1862, January 14th of that year, a patent was issued to me upon revolving dating wheels, to be used in banks and railroad ticket offices; the invention contained in that patent was precisely the same invention as that contained in a patent dated August 9th, 1859, and issued to Frederick G. Ransford and Peter Low of this city, as my assignees under an agreement with those persons; the invention applied for in 1859, as to these revolving dating wheels, was not granted by the Commissioner of Patents, because of a prior patent for substantially the same invention, issued to Thomas J. W. Robertson, under date of September 22d, 1857. I desired my as-
signees, Frederick G. Ransford and Peter Low, to consent to put
766 my application, on which the patent of August 9, 1859, was
granted, into interference with the patent of Thomas J. W. Robertson, of September 22, 1857. This they refused to do, but went to New York, saw Robertson, bought his patent of September 22, 1857, and took an assignment of it to themselves, and I think a person by the name of William B. Hatch, of New York City. This I regarded as a violation of their agreement with me, and substantially the matter was arranged so that I might make an application and have an interference with Robertson, if I desired, at my own expense. After that I filed in the Patent Office, in my own name, an application for the patent that was subsequently granted under date of January 14, 1862. In that application I filed the original agreement between Ransford, Low, and myself, showing that I had the right in my own name to apply for that patent. A broad claim to the invention there described was rejected upon the September patent of 1857. An interference case was refused by the Commissioner of Patents upon that claim, upon the ground that more than two years had elapsed between the patent of August 9, 1857, and the then pending application for a patent upon substantially the same invention. Upon the refusal of the Commissioner of Patents to grant an interference, I wrote the Commissioner of Patents and referred him to a caveat, which I then had in the United States Patent Office, under date of June 21, 1855, or very near that date, covering precisely the same invention contained in the Robertson patent. Commissioner of Patents replied to me, stated that a caveat filed in 1855 would not be consulted in an application for a patent in 1861 or 1862. In reply to that letter I wrote the Commissioner of Patents in substance, that in less than two years after the date of that caveat and before its expiration, I had, in the year 1857, in the name of Norton and Haskins,
filed an application for a patent upon substantially and materi-
767 ally the same invention, which application had been rejected and
withdrawn, and a fee of twenty dollars returned to the applicants. That in the year 1859, and in less than two years after the application and rejection and withdrawal of that application in 1857, I had made another application in May or June, 1859, upon one claim of

which a patent had been granted, dated August 9, 1859, and that in that application I had specially and particularly reserved my right to make a new application upon all that part rejected and stricken out by order of the Commissioner, under an amendment submitted for his consideration. Accordingly, during the fall of the year 1861, or early winter of that year, I made another application for a patent upon the same identical invention, and that the last application, was but a continuation in law of my caveat of June 21, 1855, and of the application for a patent in the year 1857, and also in the year 1859. The examiner having the case in charge examined that caveat in my presence in the Patent Office, and admitted that it contained all the invention that was contained in the patent granted to Robertson, September 22, 1857, but disagreed with me in the principle of law which I had laid down with reference to the last application being a renewal or successive continuation of my caveat of 1855, and the first regular application for a patent in the year 1857, which was within one or two months of the Robertson patent. For this reason, he would not entertain favorably my motion for an interference case with Robertson; but upon an amendment being submitted to him by me, he finally allowed a patent to issue on an invention embraced in the claim of the patent of January 14, 1862. Not being able, after many efforts, both in written and oral applications made by me to the Commissioner of Patents, and the examiner having charge of the several applications, I have stated, to get an interference case with the patent of Robertson of September 22, 1857, I, for the time, relinquished my effort, and
768 took the patent of January 14, 1862, containing a disclaimer substantially forced upon me by the Commissioner of Patents. This patent could not have been granted to me, had it not appeared to the Commissioner of Patents that I was clearly entitled to it, because the records there contained the record of an assignment made by me to Ransford and Low in May, 1859, under the which the patent of August 9, 1859, issued to them. The original paper which I had giving me the right to make that application, was filed in the application for the patent of January 14, 1862, a copy of which I preserved. In the year 1871, under an act of Congress, I renewed the application made in 1857, 1859, 1861, and each founded upon the caveat of 1855, and at the same time made an application for a reissue of the patent of January 14, 1862; one or more of these applications, and I think all of them, were rejected by the examiner then in charge; one of the reasons assigned for the rejection was the assignment of May, 1859, to Ransford and Low, in which the examiner claimed that those men were the owners of that invention; I told him that they were not, and referred him to the files of the patent of January 14, 1862, to show the grounds upon which that patent was granted; upon examining the application for the paper which I stated to be contained in that application, no such paper was there to be found; I knew that that paper had either been mislaid or by some person abstracted from that file for some purpose in the interest of those adverse to my rights and interests in that invention; having in my possession a copy of that paper, I made a copy of it in the month of August, 1871, on clean new paper, which I finished on the morning of the 22d day of August, 1871; and with my sworn statement that it was a copy and nothing but a copy, I went to the Patent Office on that day to get that paper and the affidavit recorded upon the record
769 books of the Patent Office; I paid the fee upon it for record, and was promised that I should have it recorded that day, as I wanted to use it on the next day following in the then pending applica-

tions of which I have spoken; I offered this copy for record because I knew that copies of assignments and other papers had previously been recorded upon the record books of the Patent Office; I then believed that rule for recording copies was still in force in the Patent Office; the foldings in the paper which I then offered for record were so new that when I laid it down upon the table, when I paid the record fees, it partially opened, like as new paper partially folded will do; at that time the color of the ink of the writing of that paper was not fully set; the paper was new, so that anybody who then saw it could but know that it was a paper that had just been made, or that it was a copy of some paper; that paper was accepted for record, but the accompanying affidavit, being a separate paper, was refused for record. On the morning of the 23d day of August, 1871, I went to the Patent Office to receive that paper for the purpose of filing it in the then pending application, together with my affidavit that it was a copy paper, and also with my letter of that date addressed to the Commissioner of Patents, wherein I stated these facts, and asked for an interference case with the Robertson patent of September, 1857, and also with the Low and Ransford patent (as assignees) of August 9, 1859; the original affidavit and the original letter to which I now refer, have been filed as evidence in this case, and before John A. Shields, a standing examiner of this court, and to each of which I now refer.

On the morning of August 23, 1871, upon going to the Patent Office to attend to the business I have just spoken of, I was told by the assignment clerk in the Patent Office, that M. D. Leggett, then Commissioner of Patents, would not allow the paper to which I have referred to be recorded, and that he desired to see me in his official room; I im-
770 mediately went to see him—saw him in his room, and, without exchanging with me the common civilities that should exist between man and man, he handed to me a paper of that date, saying in substance that I would not be allowed to examine any of the records of the Patent Office, or transact any further business there until his further orders; the original of that paper is now on file in this case; it was filed before Mr. Shields as examiner in New York; I asked Mr. Leggett what he meant by such kind of conduct, and he replied that the paper he just handed me would answer my question. After going to the National Hotel, where I was then stopping, I wrote him a letter demanding an investigation into every matter or thing upon which he had founded the order dated the 23d day of August, 1871; while I was in his room at the time he handed me that paper, he stated to me that I had forged the paper which I had offered for record; I told him that he must know better if he examined the paper at all, for every word of it was in my handwriting; that it was a fresh, new paper, with the ink scarcely set or dry upon it; he became abusive in his language to me, whereupon I left him.

On the 29th of August, 1871, the Commissioner of Patents addressed to me a paper in writing of that date, signed M. D. Leggett, Commissioner. On pages one, two, and three of it, which is in print, containing eight infamous, libellous, and untruthful charges against me. There is not nor ever has been one word of truth in either of these charges. The paper I now refer to is a certified printed copy, and certified under the seal of the Patent Office, under date of the 15th day of November, 187—, which I desire the examiner to mark "M. D. Leggett, Fraud No. 1, August 30, 1878." Soon after receiving this paper, I filed in reply thereto, in the United States Patent Office, an answer signed and verified by me; the Commissioner appointed three persons, then in his em-

ploy in the Patent Office, as a commission; this was without my
771 consent, and I did not know who the persons were on that commission until I appeared before it for the pretended hearing. Ex parte affidavits of Frederick G. Ransford, Peter Low, and other persons, were produced upon the table before that commission; these affidavits I had not seen nor had any knowledge of until that time; I asked the privilege of cross-examining those persons about the matters concerning which they had made their ex parte affidavits, and my request was refused; my sworn answer was rejected and refused to be received in evidence in my behalf; one or two persons were examined in the Patent Office orally; the time consumed by the Patent Office Commissioner in his investigations occupied a part of two days.

Feeling and knowing that during those two days great wrong and gross injustice had been done to me in the Patent Office, I moved that commission as well as the Commissioner of Patents to allow me at least two or three weeks' time to procure me the testimony of witnesses, and to produce such papers as I knew would disprove each and every charge which the Commissioner of Patents had preferred against me; the hearing of that motion was argued by myself personally before the so-called commission; Mr. Leggett and a large number of persons were present during that argument, which was based upon stated facts; and the commission took that motion into consideration, and without making any decision upon it that I ever heard or knew of, on the next day, September 18, 1871, signed a report, that may be found on page three of the printed exhibit that I have before referred to, which I now hold in my hand. There is not one word of truth in the several findings in that report, of which the Commissioner said I was guilty; had I been permitted to have made the defense that I proposed to make to those charges, it is very likely that no such report would ever have been made.

172 These several charges were preferred by Mr. D. Leggett, Commissioner of Patents, in his own proper name and person. He exercised an arbitrary power without authority of law in the appointment of the so-called commission. He made an ex parte affidavit himself, and used it on the occasion before the commission against me, and refused to allow me to cross examine him in relation to it, although he was present during the so-called trial, it being held in his official room. He selected two persons in his employ in the Patent Office, to act as counsel in the prosecution before a commission of his own appointing, of the written charges made and filed by him August 29, 1871. Upon the 18th day of September, 1871, he sat in judgment, either as dictator, umpire, or judge, upon the charges he had preferred against me, and upon the ex parte affidavits of his own making, and upon the findings by his commission, dated on the same day, to wit, the 18th day of September, 1871, as will appear by a certified copy of his decision, which I now hold in my hand, under that date, signed M. D. Leggett, Commissioner of Patents, and countersigned C. Delano, Secretary of the Interior; which approval by the Secretary of the Interior, I had been informed, was procured by M. D. Leggett, Commissioner of Patents, on that day. I made no defense in those proceedings, because I was not allowed to do so by the Commissioner of Patents, other than by filing a sworn answer, which was refused admission in evidence, and the argument of counsel for me of the case as it had been presented by Mr. Leggett.

I was never debarred from practicing in the Patent Office. While Leggett was Commissioner of Patents, he pretended to, refused to recognize me as a patent agent. For some years previous to that time I had not

practiced as a patent agent in the Patent Office, because of the pressure and extent of my law business in the several courts of the country, and I was not at the time of the date of that paper, and had not, since
773 July, 8, 1870, practiced as an attorney in the Patent Office, for reasons which I have stated, except in my own personal matters. Since Leggett resigned the office of Commissioner of Patents, I have frequently had business in the Patent Office before the present Commissioner of Patents, in the examination of models and papers, and in the trial of one interference case. While Mr. Duell was Commissioner of Patents, who was the immediate successor of Mr. Leggett, I had frequently business to transact in the Patent Office, in the examination of records, models, and papers in litigated cases, as I since have had while Ellis Spear, the present Commissioner, has been Commissioner of Patents. During that time I have not been refused anything I have asked for in the Patent Office. And under both the last-named Commissioners of Patents, I have always been fairly and kindly treated and dealt with by both those gentlemen. There is no disagreement whatever, to my knowledge, between myself and any official or other person whatever in the Patent Office, and has not been since the resignation of M. D. Leggett, Commissioner of Patents. I do not ask for or expect any better or more kind treatment at the Patent Office than I received under Mr. Commissioner Duell's administration, and also under that of Mr. Ellis Spear, the present Commissioner of Patents, who was one of the so-called commission of September 18th, 1871.

The inventions or improvements referred to by me in this answer as being contained in a caveat of June 21, 1855; in the Robertson patent of September 22, 1857; in the patent of August 9, 1859; in the patent of January 14, 1862, and in the several applications for patents and reissue of patents, have no relation to, or connection with, the invention and improvements contained in my patent of April 14, 1863, or of the reissue of that patent in divisions A and B, October 4, 1870, and especially that division named in the bill of complaint in this
774 suit, which is alleged to have been infringed by the defendant. They are separate and distinct inventions.

(Answer objected to as partly hearsay, partly irresponsive, and as intended to contradict a Patent Office record collaterally.)

Met, August 31st, pursuant to adjournment of the day previous. Present, same counsel as before.

Examination of MARCUS P. NORTON resumed:

Counsel for complainant offers, for the purpose of reference, and as a part of the last answer, the paper referred to in the last answer of witness, and requests the examiner to mark it as stated in said answer.

The paper is received and marked as requested.

Q. 3. State what you may know with reference to Exhibits B and C, referred to in the third and fourth charges of "Complainant's Exhibit M. D. Leggett, Fraud No. 1," and also referred to in other parts of the exhibit.

(Objected to as irrelevant and immaterial, and also because the evidence, if admissible at all, should have been put in while complainant was making his rebuttal to the defense, and before the defendant began his impeaching testimony.)

A. I hold in my hand certified copies of the two exhibits referred to in the last question; the certificate is dated the 13th day of August,

1878, signed Elias Spear, Commissioner, and under the seal of the
775 Patent Office of the United States. The body of this certificate is incorrect, in that it states that the papers are from the caveat file (of mine) dated October 20, 1853, whereas it should be June 21, 1855; and also in that the title of the invention is misstated. It reads, "Machine for Mailing and Folding Letters," whereas it should "Railroad Printing Press." The additional paper dated Tinmouth, Vermont, August 21, 1855, which I now hold in my hand, under such certificate, is a correct copy of the original paper of the same date prepared by me at the time and place stated, and by me properly placed upon the files of the Patent Office, through S. T. Shugert, then chief clerk of the Patent Office, on the 25th day of August, 1855, within four days after the date of the additional description, designated in these papers as Exhibit D. The original of this paper was in my handwriting, was prepared by me, and completed on the 21st day of August, 1855, and it was accompanied by a letter of the same date and from the same place, addressed to the Commissioner of Patents. The letter to which I now refer is represented in these certified papers as Exhibit C. It never was a part of, and did not properly belong in, my caveat of October 20th, 1853, for machine for mailing and folding letters, a certified copy of which caveat of October 20th, 1853, has been filed in this cause by the complainant, and if I am not mistaken it is Complainant's Exhibit D. The original letter under date of August 21st, 1855, and represented in these certified papers as Exhibit C, was written by me on the same day that I completed the additional paper to Railroad Printing Press, on the 21st day of August, 1855, and represented in these certified papers as Exhibit D.

On the back of this letter of August 21st, 1855, is the following: "Received and filed August 25th, 1855, S. T. Shugert, Exhibit C."

This paper marked Exhibit C, and to which the paper marked
776 Exhibit D is attached, does not pertain to the caveat file of Marcus P. Norton for a railroad ticket printing press, filed June 21, 1855, but does pertain to the caveat file of Marcus P. Norton for a machine for mailing and folding letters, filed October 20th and 27th, 1853. See the endorsement upon the back of Exhibit D, hereto attached, "M. D. Leggett, Commissioner of Patents."

This endorsement was made upon this paper by M. D. Leggett, Commissioner of Patents, without my knowledge or consent. It is false and fraudulent in every statement therein made, as will readily appear by comparing it with Exhibit D attached to it. On the back of Exhibit D, to which the letter Exhibit C is attached, is written the following: "This paper, marked Exhibit D, after due notice to Marcus P. Norton, and trial had before a commission appointed by the Commissioner of Patents, was by the said Commissioner adjudged to be fraudulent, and to have been surreptitiously introduced into the caveat file of Marcus P. Norton, for railroad ticket printing press, filed June 21st, 1855. In the order of the Commissioner of Patents, dated September 18th, 1871, and approved by the Secretary of the Interior, in the case of the trial of Marcus P. Norton for gross misconduct. (See the finding of the commission as to charge four.) This paper does not, therefore, form a valid portion of the above-named caveat. M. D. Leggett, Commissioner of Patents."

These endorsements were made by M. D. Leggett, Commissioner of Patents, without my knowledge or consent. The paragraph where he states, "This paper does not, therefore, form a valid portion of the above-named caveat," is absolutely false and fraudulent to my personal knowledge. The paper does belong to the caveat files of June 21st,

1855, and it was received by and filed in the Patent Office on the 25th day of August, 1855, and for aught I know is still somewhere in the Patent Office, unless destroyed or taken away by some person
777 unknown to me. It is true, as stated in the endorsement, that there was a "commission appointed by the Commissioner of Patents" for a trial of certain false and fraudulent charges presented against me, in writing, by M. D. Leggett, Commissioner of Patents. During the twenty-five years that I have been acquainted with and done business at the United States Patent Office, I have never been guilty of gross misconduct, or any other misconduct, in that office. As to the trial referred to in the certificate, I have to say what I stated in my answer to question number two, and in addition to that I here state that that pretended trial was a farce and a fraud upon me. I was not only not allowed the opportunity to make a defense, after I had been advised of the ex parte proof produced against me, at the so-called trial, but I was denied the privilege to cross-examine Mr. Leggett, who had made an ex parte affidavit against me, and also those persons from the city of Troy, and other places, who had also made ex parte affidavits. I never introduced into the caveat file of June 21st, 1855, "surreptitiously," any paper whatever.

As a part of my answer I now introduce, for the purpose of reference and consideration, in connection with this answer, certified copies of Exhibits C and D, referred to by me in this answer, and also referred to in Complainant's Exhibit M. D. Leggett, Fraud No. 1, August 30th, 1878.

I desire the examiner to file and mark these Exhibits C and D as Complainant's Exhibit M. D. Leggett, Fraud No. 2, August 31st, 1878, I. B., ex'r.

(The same are so marked.)

Q. 4. State what you may know with reference to Exhibit B, referred to in the first and second charges, and also in other parts of Complainant's Exhibit, Fraud No. 1, August 30th, 1878, I. B., ex'r.

(Same objection.)

778 A. I now hold in my hand a certified copy of the exhibit referred to in the last question, certified to on the 13th day of August, 1878, by Ellis Spear, Commissioner, as an "additional paper found in the caveat file of Marcus P. Norton, filed October 20th, 1853, for machine for mailing and folding letters." It is addressed to the Commissioner of Patents, dated Tinmouth, Vt., August 7th, 1854. I have examined the paper and believe it to be a correct copy of the original paper prepared by me in my handwriting, and signed by me on the 7th day of August, 1854, at Tinmouth, Vt., and by me transmitted to the United States Patent Office through the mails, and mailed at the post office, in Timmouth, on the same day or the following day after the date thereof. That additional paper was accompanied by a letter written by me to the Commissioner of Patents, bearing date the same day, to wit, August 7, 1854. Both of these papers were, to my personal knowledge, received by and placed on file in the Patent Office in the month of August, 1854; for on or about the 12th day of August, 1854, I received a letter from the then Commissioner of Patents acknowledging the receipt of my letter dated August 7, 1854, and also an additional description "to be added to my subjoined description for mailing and folding letters, for which I have a caveat in your office;" of which additional paper, the certified Exhibit B, which I now hold in my hand, is substantially and materially a copy of that original paper so prepared and sent by me to the Patent Office.

On the back of this certified Exhibit D, I find these words: "This paper, marked Exhibit B, after due notice to Marcus P. Norton, and trial had before a commission appointed by the Commissioner of Patents, was by the said commission adjudged to be fraudulent, and to have been surreptitiously introduced into the caveat file of Marcus P. Norton, for a machine for mailing and folding letters, filed October 20 and 27, 1853.

779 "In the order of the Commissioner of Patents, dated September 18, 1871, and approved by the Secretary of the Interior, in the case of the trial of Marcus P. Norton for gross misconduct, see the findings of the commission as to charges one and two.

"This paper does not, therefore, form a valid portion of the above-named caveat. M. D. Leggett, Commissioner of Patents."

That part of the endorsement which reads as follows, "this paper does not, therefore, form a valid portion of the above-named caveat," is, to my knowledge, absolutely false and fraudulent. The paper does and did, in August, 1854, belong to and form a valid part of my caveat, dated October 20, 1853, for a machine for mailing and folding letters. This endorsement upon Exhibit B was made by M. D. Leggett, Commissioner of Patents, without my knowledge or consent. With reference to the other parts of this endorsement, I make the same answer as I did to a similar endorsement on (Exhibit D) Complanant's Exhibit M. D. Leggett, Fraud No. 2, August 31, 1878, I. B., ex'r.

For aught I know the original paper, of which this certified paper is a copy, is still somewhere in the Patent Office, unless it has been abstracted from its proper file by some person unknown to me, or been mislaid in the Patent Office by some official.

As a part of this answer, and for the purposes of reference and for consideration in connection with this answer, I offer Exhibit B, and desire the examiner to file and mark the same, near the endorsement thereon by M. D. Leggett, as Complainant's Exhibit, M. D. Leggett, Fraud No. 3, August 31, 1878, I. B., ex'r.

(The same is so marked.)

Q. 5. State when you first learned, if at all, that there was any

780 trouble of any kind in the Patent Office, with reference to the caveat that you have to-day referred to, or that anybody claimed or pretended to claim that there was anything wrong with reference to either of those caveats.

(Same objection.)

A. It was on the 23d day of August, 1871, in the official room of M. D. Leggett, then Commissioner of Patents; never before that time had I known or heard of there being even a suspicion of anything wrong with those caveats, or either of them. Of the caveat of October 20, 1853, I frequently had certified copies from the Patent Office, previous to August 23, 1871. One such certified copy was used at the trial of the suit at law wherein Jacob Shavor and Albert C. Corse were plaintiffs, and Edmund Hoole was defendant, tried at the October term of the United States circuit court, at the city of Albany, in the year 1864. Another such certified copy was used in the United States Court of Claims, in the case of Jacob Shavor and Albert C. Corse, against the United States, tried, I think, during the year 1868. Another such certified copy was used at the hearing before the Postmaster-General in the winter of 1870 and 1871, under an act of Congress approved July 14, 1870. Another such certified copy, certified to, I think, in the spring of 1868, has been filed in this case as evidence by complainant's counsel. I have had other such certified copies for other purposes, one of which I kept

as a permanent file in my law office in this city for many years. Every one of those caveats contained the additional paper, dated August 7, 1854, a copy of which is attached to Complainant's Exhibit M. D. Leggett, Fraud No. 3, August 31st, 1878, I. B., ex'r.

As to my caveat of June 21, 1855, for railroad ticket printing press, I have to say that, previous to the 23d day of August, 1871, I had certified copies from the Patent Office of that caveat, each of which
781 contained the additional paper represented by Exhibit D, attached to Complainant's Exhibit M. D. Leggett, Fraud No. 2, August 31, 1878, I. B., ex'r.

On the 22d day of August, 1871, less than twenty-four hours before the outrage and fraud commenced against me by M. D. Leggett, then Commissioner of Patents, I received from the Patent Office a certified copy of my caveat, file-wrapper and contents, dated June 21, 1855, under the seal of the Patent Office and the signature of M. D. Leggett, on that day Commissioner of Patents. Those certified papers contained the additional description represented by Exhibit D, of Complainant's Exhibit M. D. Leggett, August 31, 1878, I. B., ex'r. That certified copy caveat, including paper, was delivered to me in person at the Patent Office, at about three o'clock, afternoon of the 22d day of August, 1873. The certified copy to which I now refer has already been filed in this case as evidence by the complainant, and to which I refer, and make it a part of this answer.

Q. 6. State whether, on the 23d day of August, 1873, there was pending in the Patent Office an application for the extension of the patent granted to T. J. W. Robertson, September 22, 1857?

A. There was such an application pending there on behalf of T. J. W. Robertson.

Q. 7. State whether the patent for which he applied to be extended by the Commissioner of Patents contained the same, or substantially and materially the same invention, as that described in the additional paper dated August 21, 1855, in your caveat of June 1, 1855.

(Same objection.)

A. They contained substantially and materially the same invention.

782 Q. 8. State whether you, in your own person, opposed the application for the extension of the patent of T. J. W. Robertson, of September 22, 1857.

(Same objection.)

A. I did, and assigned my reasons and grounds for that opposition, several objections in writing, among which was my caveat of June 1st, 1855.

Q. 9. State when those reasons or grounds of objection were filed in the Patent Office, if you know.

(Same objection.)

A. In the month of June or July, 1871, they were.

Q. 10. Pending that application, did you give permission to Mr. T. J. W. Robertson to examine your caveat file of June 21, 1855?

(Same objection.)

A. I not only gave him that permission, but I gave him permission to have a certified copy of it. That permission was in writing, and a certified copy of it has been filed in this case.

Q. 11. State whether the T. J. W. Robertson patent, of which you have spoken, was extended by M. D. Leggett, Commissioner of Patents, if you know, and state the time, as near as you remember, if that patent was extended.

(Same objection.)

A. That patent was extended by M. D. Leggett, Commissioner of Patents, and the order for the extension was made about the 20th day of September, in the year 1871.

Q. 12. State the day, if you know, when you were cited to appear before the Patent Office to answer to the charges made and filed by M. D. Leggett, the Commissioner of Patents.

(Same objection.)

783 A. On the 8th day of September, 1871, at ten o'clock, forenoon of that day.

Q. 13. State the day when M. D. Leggett, as Commissioner of Patents, made and filed the paper represented by Complainant's Exhibit M. D. Leggett, Fraud No. 1, August 30, 1878, I. B., ex'r.

(Same objection.)

A. September 8, 1871.

Q. 14. State the number of days intervening the day set by the Commissioner for the trial by him of the charges by him preferred against you, and the decision made by him upon those charges, which you have denominated as grossly wrong and fraudulent, and without foundation in point of fact.

(Same objection.)

A. The extraordinary number of eight days, having twenty-four hours in each day.

Q. 15. State whether you ever expressed any fear that M. D. Leggett, Commissioner of Patents, would not do you exact justice as to the several charges he had preferred against you, bearing date August 29, 1871, and previous to the trial of the same.

(Same objection, and also as tending to question the Patent Office records.)

A. I never did; I had no such fear, but on the other hand I wrote him a letter demanding an investigation of the charges indicated in his letter to me of August 23, 1871; in which letter I expressed my entire confidence in him to do me justice in the premises. I did not then have a personal acquaintance with the man; have had none since, excepting what I obtained during the pretended trial of the charges re-
784 ferred to. I never had any misunderstanding with him. I knew nothing then against him, but believe that if he were a fit and proper man to be Commissioner of Patents, he must be honest and honorable enough, at least, to deal fairly by me in those alleged charges. I have since become fully satisfied that my confidence in him was misplaced, and that he was one of the party ready and willing to do me wrong and injustice in the Patent Office. I now believe that the course pursued by him toward my caveat of June 21, 1855, was for the purpose of getting out of his way a valid caveat, so that the Robertson patent of September 22, 1857, might by him be extended to Robertson. The only mistake I made with reference to the matter contained in "Complainant's Exhibit, Fraud No. 1, August 30, 1878, I. B., ex'r," was ever going to the Patent Office to attend the so-called trial, or in having anything to do with it before M. D. Leggett. I knew I had done no wrong, or in any way meddled with, or changed or altered, or added to any record in the Patent Office, or attempted to put on record any paper that I had not a perfect right to do. Being conscious of no wrong committed by me in the Patent Office, and feeling deeply aggrieved and injured by Leggett's order dated the 23rd day of August, 1871, which by him had been furnished to the newspaper press for publication, as I had been informed, and which was published in a great many newspa-

pers all over the country, I demanded an investigation, not then knowing that it would be ex parte, or that I should be deprived of making a full defense, and attended at the day appointed for the trial, expecting to be allowed the opportunity to make a full and satisfactory defense. After that farce of a trial had proceeded a little way, I discovered the great mistake that I had made in asking for or attending the investigation I had called for, but it was then too late to retreat from the false position into which I had been unconsciously drawn. I now and
785 here again deny in the most solemn manner each and every charge and allegation stated against me in the printed paper marked Complainant's Exhibit M. D. Leggett, Fraud No. 1, August 30, 1878, I B., ex'r. I was not at that time a practicing attorney before the Patent Office, and had not been for about two years previous thereto, for reasons I have already stated in this cause.

Q. 16. During the last examination on the part of the defendant before this special examiner, a paper, purporting to be a certified copy of an indictment against you, in the District of Columbia, was offered by defendant's counsel, and not objected to by complainant's counsel; state what you may know with reference to that matter.

(Same objection.)

A. If I remember correctly, that indictment was made in January or February of the year 1872. I knew nothing of any such movement or proceedings until it was told to me, I think, in the early spring of that year. Some considerable time after it had been returned into court as a true bill, this was communicated to me in the city of New York, at that time, by Jeremiah D. Green, of the city of Troy, and while on my way to Washington. I met Mr. Green in the city of New York, told him I was going to Washington, and he said to me that he was also going to Washington. He advised me not to go at that time, for he said he had understood that there was an indictment there against me, growing out of my difficulties with Mr. Leggett, Commissioner of Patents. He said that he would look into the matter as soon as he reached Washington, and if he found such an indictment there he would write me at New York and let me know, so that I could keep out of the way of it and avoid being arrested. I told him that I should do no such
786 thing—that I should go to Washington that night and see about it personally. I went to Washington on that night, and Jeremiah D. Green was on the same train. I reached Washington on the Sunday morning following, stopped at the Arlington Hotel as a guest, and on Monday morning the first business that I did was to go to the district attorney's office and see about the indictment, which Green had given me information about in New York the Saturday before. I saw George P. Fisher, then district attorney, in relation to it. In answer to my inquiry about it, he stated that he did not know of any such indictment. As I was about leaving him he called me back, and said that I had better go into Mr. Harrington's room and inquire of him about it, he, being his assistant attorney, might know something more definite about it. I called upon Mr. Harrington, and in answer to my inquiry he stated that there had been such an indictment found by the grand jury, but that he did not have a copy of it, and would go with me to the clerk's office, at the court-house, that I might examine it. Before going, I asked him what the indictment was about. He said that it had something to do with my troubles at the Patent Office with Mr. Leggett. I asked him who was the mover of such kindly proceedings. He told me that Jeremiah D. Green was the man who came to him and furnished such evidence as they had, upon which the indictment was found. I

then went with Mr. Harrington to examine the indictment. After examining the indictment, I told him that I was ready to furnish bail, and asked him to have the court fix the amount of that bail. The court fixed the amount at three thousand dollars. I was thereupon put under arrest, taken to the jail of the District of Columbia, put into custody of its keeper, and there gave bail in the sum of three thousand dollars. Mr. Pugh, a friend of mine, and a wealthy citizen of Washington, in the District of Columbia, became my bondsman in that amount.

787 On the next day after that I met Jeremiah D. Green on the street in the city of Washington, and on meeting him he said, "I heard that you had been arrested and taken to jail." I said, "You see I am here, Mr. Green, as free a man as you are, with the exception that you are loaded down with the bonds of hypocrisy and consummate meanness." He says, "You ought not to say that, for Mr. Gregory and I intended to have gone to the jail and bailed you out to-day." I thereupon left Mr. Green and passed on. Subsequently I saw Mr. Fisher, the district attorney, and told him that I had engaged counsel and was ready to be tried at any time he might fix, and the sooner the better for me. He told me he would look into the case, and inquire about it, after which he would give me ample notice of the time when he would try the case on that indictment. Not hearing from him about it for nearly a year, being again in Washington on business, I again called upon Mr. Fisher with reference to that indictment. He told me he had examined the case and was not satisfied with it; that I had better wait until Mr. Harrington had again seen Mr. Jeremiah D. Green about it. I waited a long while after that without hearing anything from Mr. Fisher in reference to it, and, not wishing to have a thing of that kind standing against me, I wrote him a letter, stating the facts in the case, and demanded an immediate trial on that indictment. He answered my letter by saying, in substance, that so far as he could discover there was nothing in the case, and that the indictment ought not to have been found; that he was about finishing his work in his office as district attorney, preparatory to resigning that office, and that before his term closed he would try and bring the matter before the court and have it nolle prosequied, which I supposed had been done, until some time in June last, when I called Judge Williams', complainant's counsel, attention to it, and asked his advice with reference to it, and he said he would

788 see whether the matter had been disposed of by the district attorney, Judge Fisher. I thought no more about it until we came to this examination, and questions were put to witnesses by defendant's counsel to know if they had heard about any such indictment. Why there has been no trial on that indictment to the present time I know not, other than I have already stated. My bondsman, Mr. Pugh, and myself, after I had learned of the indictment and given bail under it, went to see the foreman of the grand jury who had indicted me. I stated to him the facts about the case, and he said in reply that but very little evidence had been presented to the grand jury on the subject, and that that jury had hesitated somewhat about the indictment, and he did not think the indictment would have been found at all, but for the course pursued by the assistant district attorney, Mr. Harrington.

I am not guilty of a single charge contained in that indictment in any way, manner, or shape, for reasons already stated by me in this case with reference to the paper described in that indictment being a forged one. The indictment was for offering that paper at the Patent Office, and not because of having signed it. That paper described in that indictment was nothing but a copy of a paper the original of which had

been filed in the Patent-Office in my application for a patent which was granted January 14, 1862. I had an affidavit with that paper at the time I offered it for evidence in the Patent Office, showing it to be a copy, and nothing but a copy, as I have before stated. Moreover, that paper, when I offered it for record in the Patent Office, on the 22d day of August, 1871, was dated the 29th day of July, 1859. It bore plain and unmistakeable evidence of being a new paper, just made, so that anybody, unless he were a fool, a knave, or a scoundrel, might know that it was a new paper of very recent preparation. It had no government internal-revenue stamp upon it, as all original papers of
789 that character at that time by law were required to have. Had I tendered it as an original paper for record, I would not have been so foolish, or shown myself so ignorant of the law, as to offer an original paper for record without its having been previously duly stamped as by law required. This fact alone—about the non-stamping of that instrument with internal-revenue stamps—is, in my judgment, sufficient evidence to show that it was not offered for record as an original paper. The entire paper, including signatures and every other word in the instrument, was in my handwriting, and the ink with which the whole paper was written had scarcely become set or dry at the time I offered it for record. The paper had no seals attached to it. It was not an assignment of any kind. It was merely an agreement reduced to writing. It did not in anywise affect or disturb the title held by Ransford and Low and others to the patent of August 9, 1859. It had no reference whatever to the title to that patent.

Just before—I think four or five months before—the expiration of the first term of the patent of August 9, 1859, Jeremiah D. Green came to me in this city, which was in the spring of 1873, and asked me to sign an application for the extension of the patent of August 9, 1859, which at that time I refused to do. Mr. Green told me if I did not do it, that he and Ransford, Low, and Shavor would have me in state's prison under the indictment found against me at Washington, in the District of Columbia. I told him that he could fire that gun just as soon as he pleased, for the question might turn as to whether he and the persons he had named might not get into state's prison themselves for attempting to rob me of my patented property by procuring that indictment in the District of Columbia; still I would consult with Mr. Charles Eddy, of this city, a man in whom I had always had great confidence. I saw and conferred with Mr. Eddy on the subject, and he thought that perhaps, under the circumstances, I better sign that
790 application; and within a day or two after that I did sign that application for that extension. Mr. Green conducted the entire case. The application was allowed, and the patent was extended for seven years from the 9th day of August, 1873. After the extension was granted, and without the consideration of a single dollar, I assigned the extended term of that patent to Jeremiah D. Green, Frederick G. Ransford, Jacob Shavor, and other persons, which is now held, so far as I know, by those persons. That assignment was put on record in the Patent-Office, and the persons I have named hold title under it to the extended term of the patent of August 9, 1859. This patent of August 9, 1859, is for an invention substantially and materially different from that contained in my patent of April 14, 1863, upon a reissue of which this suit is founded. The extended term of the patent of August 9, 1859, relates to and is the same identical patent referred to in the indictment of which I have spoken.

The paper referred to in that indictment as bearing date July 20, 1859,

and as being the one which I offered for record at the Patent Office on the 22d day of August, 1871, never has, and never could, in any way or manner, change, alter, or transfer the Ransford and Low title to that patent, as will appear upon the face of the paper itself.

I have always deeply regretted the fact of the finding and filing of this indictment against me, yet I have always stood up under it, without fear or favor, believing, as I have always and now do believe, that it was the result of a conspiracy on the part of the persons I have last above named, for them to use against me to force away from me my property, my right, and my reputation. Up to this hour I have never yielded to any threatenings by those men with reference to this indictment, and never will. I am ready now, and ever will be at any future time, to be tried under that indictment, believing, as I always
791 have, and now do, that it was obtained by fraud and deception, and that it was obtained to use against me in reference to my patent of April 14, 1863, as I have already stated.

Q. 17. Defendant's counsel, during his cross-examination of defendant's witnesses, has frequen tly referred to and inquired of them whether they had ever heard of an attempt to impeach your character for truth and veracity. State what you may know with reference to any such attempt or attempts.

(Same objection.)

A. In 1862 and the fore part of the year 1863 I was the attorney and counsel for Jacob Shavor, Louis Potter, and Smith Groom, with reference to patent matters in the Patent Office and in courts. In the spring of 1863 an interference case was in progress in this city, of William E. Hagan against Jacob Shavor and Louis Potter, assignees of Smith Groom, patentee. This interference case originated in the United States Patent Office, and was before the Commissioner of Patents, and I was counsel for the defendants. During the progress of the taking of testimony, I stated to one of the plaintiff's counsel, in substance, that I had personal knowledge of Groom's invention as far back as the year 1859, and that there were others who had knowledge at an earlier time. On making that statement to plaintiff's counsel, he inquired of me if I would testify under oath to the sta ement I made to him. I said I would be willing to if it were necessary, not, however, intending at that time ever to be a witness in that case. On the next morning, which was the 4th day of February, 1863, Mr. James Morrison, jr., of this city, a client of mine, called at my office and stated to me that he had been authorized by counsel for Hagan to say that if I was examined as a witness in that case they would impeach me as to truth and veracity. I told
792 Mr. Morrison that I had had no idea of being examined as a witness in that case; that I felt assured that I had abundant evidence without anything from me in the shape of evidence; that since they had threatened the impeachment, I most certainly would go on the witness stand, and be examined as a witness in that case, and would be the first witness examined on that day. I was the first witness examined that day, and testified to what I believed to be true with reference to having seen Groom's invention at a certain fixed time, Groom having shown it to me and asked my opinion about it. I regarded my testimony, at that time, as unimportant, because I knew I had other witnesses to prove the invention some years farther back than I had stated, and should not have been a witness in the case but for the threatened impeachment, of which I had been advised that day. The impeachment was undertaken by Mr. William E. Hagan's counsel, William A. Beach and Levi Smith. Thirteen witnesses, residing in the city, were

called and sworn against me, namely, Marcus Ball, George R. Davis, George B. Smith, William F. Burden, George Gould, Henry G. Giles, Anson Atwood, Neilson Forsyth, Simeon Goodfellow, Stephen S. Barnes, Lemuel H. Tupper, William A. Beach, and Levi Smith. Mr. Ball, Mr. Giles, and Mr. Levi Smith are the same persons that the defendant has examined against me in this case on the question of impeachment. In support of my character for truth and veracity, in this city, in that case, I called and examined sixty-seven, residing and doing business in the city of Troy, and from among the best and most respectable business and social portions of the city of Troy. Their names are as follows: Anthony Seiler, Lewis Lillie, James Freiot, Cole H. Denis, Austin C. Winslow, Gurdon G. Wolfe, Edward D. Beach, D. W. Tuthill, Samuel O. Gleason, David H. Jones, Nicholas Winslow, Charles W. Root, John McChesney, James Dennin, Lyman Garfield, William W. Whitman, Hezekiah S. Benedict, Nelson D. Ross, John B. Hyland, Charles M. Halstead, James Allen, Luther Greenman, Hosea Leach, Philip H. Baerman, Charles W. Moseley, David L. Seymour, Dr. Thomas W. Blatchford, William C. Buell, William H. Young, William Eddy, John F. Winslow, Ebenezer L. Mallory, Alfred Wotkyns, Joseph W. Fuller, Edward J. Hicks, Albert W. Scribner, Philo P. Stewart, Elisha Waters, Henry B. Nims, Edwin Brownell, Albe C. Daniels, Uriel Dexter, Willis Humiston, Pelatiah J. Marsh, Robert H. Hyde, Henry Stanley, Joseph P. Door, Robert G. Fox, William Kemp, Peter Saxe, Edward S. Randall, James A. Lawson, William H. Tibbitts, Zebulon P. Birdsall, John Shanahan, Benjamin D. Benson, William J. Dodge, William Iler, James C. Burch, John P. Albertson, John H. Snyder, Frederick Ells.

792½

The impeachment undertaken on that occasion was not a successful one, as was stated in the Patent Office, both by the examiner in charge of the case and also by the appeal board, and was so admitted by William E. Hagan himself, the plaintiff in that case, in whose behalf the impeachment was undertaken, during the fall of 1863, and at subsequent times since then, whenever we have referred to the matter; and the last time I heard him make the admission, while he was being examined as a witness in this case, the other day, to sustain my character for truth and veracity here.

Never, to my knowledge, did that attempt of my impeachment work me any harm, or do me any injury, in this city, or anywhere else, after the testimony in that case had been closed, and the case submitted for argument; indeed, for eight or nine years thereafter I was largely and extensively engaged in the practice of my profession in this city, having frequently a large number of cases on the calendar of the United States courts in this State, and in several other States, earning in my profession between twenty, twenty-five, and thirty thousand dollars a year, which I received in cash. I have not, to my knowledge, heard that matter referred to in this city by any one for the past twelve or thirteen years, until it was brought up in this suit. At that time I could have examined more witnesses than I did examine to support my reputation for truth and veracity here in this city, had I deemed it best to be done. That undertaking principally grew out of my connection with the litigated cases between Corning, Winslow & Co. and the Burdens. I was for several years, and until Mr. Winslow left this city to take up his residence at Poughkeepsie, one of the counsel for Corning, Winslow & Co. against Henry Burden, Henry Burden & Sons, and in several other suits in other States and districts. Mr. Henry Burden was very hostile to me during the progress of the cases in

792¾

which Corning, Winslow & Co. were interested. Levi Smith, of the then firm of Beach & Smith, testified against me in that interference case, and continuously therefrom and to the present time has been an enemy to me. He was examined in this case for the defendant on the question of impeachment, and I refer the court to his answers to my questions on his cross-examination to show his anxiety to do me harm. Most of the witnesses called and sworn against me in Troy were persons with whom I had had litigations for clients of mine. Two of them were the attorneys of Henry Burden and Henry Burden & Sons, namely, William A. Beach and Levi Smith, of the then law firm of Beach & Smith. Mr. Hagan and myself have frequently transacted business together since that attempted impeachment, and have been on friendly terms. I have very frequently employed him as expert witness in patent cases, regarding him always as among the best, if not the best expert
793 witness in this country. I believe him to be a perfectly truthful, honorable, and upright man.

Adjourned by consent to Monday, September 2d, at 9.30 a. m.

MONDAY, *September* 2, 1878.

Met pursuant to adjournment of August 31st.

Present same counsel as before.

Direct examination of the witness, MARCUS P. NORTON, resumed:

Q. 18. Counsel for the defendant, in his cross-examination of defendant's witnesses, inquired of some or all of them if they had heard about an attempt to impeach you at the time of the assassination trial of the conspirators of the murder of President Lincoln. State what you may know with reference to that matter.

(Same objection.)

A. I was examined as a witness on that trial on the part of the Government of the United States. The War Department at Washington, considering me an important witness in that trial, subpœnaed me to appear and be examined as a witness. I was examined as a witness. An attempt was made by counsel for the defense to impeach me, which was at the instance of Abram B. Olin, as I was informed by one of defendant's counsel. Two witnesses were called against me on that occasion and only two, whose names are as follows: Abram B. Olin and Henry Burden. Mr. Burden was a citizen and business man in the city of Troy, New York, a man who, for many years previous thereto, I had opposed to the best of my ability, in a series of bitter litigations between Corning, Winslow & Co. and Mr. Henry Burden, and
794 those associated with him in business at Troy, as one of the counsel and attorneys for Corning, Winslow & Co.; I had been such counsel and attorney for five or six years previous to that time; Mr. Burden was a bitter enemy of mine for many years, growing out of such litigation; at the time he was called as a witness against me in Washington, Mr. Burden was there attending to business in the Patent Office in a matter pending in an interference case where I had opposed him; after Mr. Burden had been examined by the defendants' counsel in that conspiracy trial, I met him at the Patent Office in Washington, and he told me that he had been subpœnaed to testify against me, and had done so; he said he was urged to do so by Abram B. Olin; Mr. Olin formerly resided in this city; he was at one time member of Congress from this congressional district; if I remember correctly, the last time he was in the field as a candidate for member of Congress for re-election he was

strongly opposed, and at the polls was defeated by John A. Griswold, of this city, elected to that office; I was one of those who opposed him; during the campaign I spoke from the "stump" in different parts of the district against Mr. Olin; I said some things about him to the people which I then and now believe I was justified in saying; he became angry and very bitter towards me after that; he came to my office during the progress of the campaign and personally denounced me in a bitter and profane manner; we may have spoken together once since that time, but I do not remember more than that; at one time I had an important case pending in the supreme court of the United States for the District of Columbia; as soon as I learned that he was to hold a term when that case must be tried, he being one of the judges in that District, I wrote him a letter stating that I regarded him as disqualified from trying that cause because of his conduct toward me, to which
795 I have referred in this answer, and suggested that he allow the cause to go over the term or go before some other judge in that District. He wrote me a letter in answer refusing to accede to my request. I thereupon employed Mr. John B. Gale, of this city, to argue that cause. The case was argued, and Mr. Olin decided it against me as well as against the evidence, and the law, as I then did and as I now do believe. The hostility of both Mr. Burden and Mr. Olin towards me was clearly manifested by their cross examination on that occasion of the assassination trial.

The War Department subpœnaed a large number of witnesses from Troy to sustain my character on that occasion. A few of such witnesses were examined, others were there ready to be examined, when that court held a secret session for a few moments, and thereupon decided that they would hear no more sustaining evidence, as the several judges of that court were satisfied that both Olin and Burden were too strongly opposed to me to give a correct expression with reference to my character for truth and veracity, and that under such circumstances, and from the fact that only two witnesses had been called against me, and considering the excellent character that had been given to me by the witnesses already examined from Troy, that court sustained my character for truth and veracity, and fully received my evidence in that case. This I was told by one of the judges of that court, and also by the attorney of the United States, who examined me as a witness on that trial.

I know of no place or of any people in this or any other country, where I have suffered even in the remotest way, or lost any credit, standing, or character for truth and veracity, in consequence of that attack so made against me by Olin and Henry Burden, as I have so stated.

I had, myself, almost entirely forgotten it, until the counsel for the
796 defense in this case called my attention to it. So, too, I had almo't forgotten the Hagan attempt at impeachment, until, in like manner, defendant's counsel called my attention to it during his attempt in this cause to impeach me. The best of friendship and confidence, without stint or reserve, has existed between Mr. William E. Hagan and myself since the summer of the year 1864 to the present time. I request the special and particular attention of his honor, Judge Blatchford, of New York, to the fact that Mr. William E. Hagan has appeared and been examined as an expert, or made several ex parte affidavits as an expert in some two or three causes tried by Judge Blatchford in the southern district of New York, where I was counsel for the defendant. I now refer to the suits known as the "Paper Bag Suits." I have also frequently acted as attorney for Mr. Hagan in several matters where he

thought it best to consult with me from the year 1864 to the present time. The testimony given by him as a witness in this case is, in brief, a manly exposition of that whole affair of attempted impeachment on his part. I do not know of a single business man in this city where that attempt at impeachment has done me any injury. I am satisfied that nearly this entire community has forgotten that undertaking, and would have entirely forgotten it but for this fresh stirring up of the same on the part of the defendant. Both attempts at impeachment were, beyond any question of doubt, unqualified failures, and I believe have been so regarded by this community and by everybody else acquainted with me.

During the twenty and more years that I have been in the practice of my profession in this city, I have been frequently engaged as counsel in several litigated cases considered of some importance between the parties residing here. In all that time my rule has been to know my clients, and only them, in such cases. If, therefore, I have made a few enemies here, I cannot help it, and only regret that there should be any.

797 Q. 19. During your examination, August 31st, ultimo, you spoke of two certain caveats, one dated October 20th, 1853, containing an additional paper under date of August 7th, 1854, and another caveat, dated June 21st, 1855, and an additional paper contained therein, under date of August 21st, 1855; state the substantial and material difference, if any, or the substantial and material similarity, if any, between the inventions described in these caveat papers.

(Same objection; and also that this evidence is not proper at this stage of the case.)

A. I am familiar with the invention in each of those papers described; there is no substantial or material similarity between them; they are substantially and materially different in all respects.

Q. 20. State on which of those caveats, if either, your application for a patent, filed in the United States Patent Office, on the 5th day of January, 1863, was founded, and on which your patent of April 14, 1863, for the combined post-marking and postage stamp canceling device described in your patent of April 14th, 1863, was issued.

(Same objection.)

A. The application referred to in the question was founded upon the caveat of October 20th, 1853, and upon the additional paper contained therein, dated August 7th, 1854, and in that month duly and regularly placed upon file in the Patent Office, in that caveat file containing other papers.

Q. 21. During your examination the other day you referred to a large number of witnesses called and examined on your behalf in the Hagan impeachment matter; state the names of such witnesses who have since died or removed from the city.

(Same objection.)

798 A. Those that have died are as follows, to wit: Lewis Lillie, John McChesney, Lyman Garfield, Lucas Shavor, Charles W. Mosely, Hon. David L. Seymour, Thomas W. Blatchford, M. D., William C. Buell, Alfred Wotkyns, M. D., Philo P. Stewart, Edwin Brownell, Uriel Dexter, Henry Stanley, Zebulon P. Birdsall, John Shanahan, Ebenezer L. Mallory. Those who have since removed from the city are as follows: Austin C. Winslow, Edward D. Beach, D. W. Tuthill, David H. Jones, Nicholas Wilson, Charles W. Root, Philip H. Baerman, John F. Winslow, Peter Saxe, Benjamin D. Benson, William J. Dodge, James C. Burch.

Q. 22. State also the names of those witnesses who were called against you in the Hagan matter who have since died, as well as those who have since removed from the city.

(Same objection.)

A. George R. Davis, William F. Burden, Judge George Gould, Neilson Forsyth, James Wager, Simeon Goodfellow, Stephen S. Barnes—those are dead. Those that have removed from the city are Anson Atwood and William A. Beach.

Q. 23. State whether after these two attempts at impeachment your professional business in this city was affected by them, or anything growing out of them, or either of them?

(Same objection.)

A. Never, to my knowledge. I always had all the business I could possibly attend to, and all that my office could do with the help employed in it, until the year 1871, when, having lost largely through undue efforts at speculation with stocks and other similar matters, I was forced to bankruptcy by two or three creditors for small amounts,
799 amounting in all to about five thousand dollars, a movement which had been gone into during a protracted absence of mine from home, and unbeknown to me until my credit was ruined by the course pursued by them toward me. This was during a time, too, when after a severe and dangerous illness at my home in this city, I had gone away from home with my family, seeking rest and health. My illness was the result of overwork in my office and in the courts during the years from 1865 to 1871. In the year 1864 I had also been ill, dangerously so, for several months, and growing out of similar causes. Still, with all this, my office was at all times crowded with business in the line of my profession, there being proper persons there to see to it and care for it in my absence. From 1861 to 1872 I had earned in my profession, and deposited in the State Bank and the National State Bank in this city about three hundred and fifty thousand dollars, which I call a fair business, considering the fact that in this time there had been the efforts made at impeachment as stated by me in this examination.

Q. 24. During the cross-examinaton of the complainant's witnesses called to support your character for truth and veracity, defendant's counsel inquired of them about your financial condition in this city, and as to whether you owed anybody anything or not. State what you may know about those matters.

(Same objection.)

A. My bank books will show this court or anybody else that honest claims and debts have been as fully and satisfactorily paid by me as would be the case among other persons in the community. I never refused payment of a fair and just claim in my life; there have been some doubtful and unjust claims that I have opposed, and sometimes litigated.

At the time of the commencement of the bankruptcy proceedings
800 in 1871, it was claimed I was owing about eighty thousand dollars.

Out of all those claims there are now standing about ten thousand dollars, which it is my purpose and desire to pay in full, both principal and interest, at such time or times as may be most suitable or convenient to me. Those creditors have not pressed me, nor are they now pressing me, for the payment of those debts; there is no misunderstanding between them and myself in reference to the same. It is, in my opinion, clearly a matter of right and of business between those creditors and myself, with which the defendant has nothing whatever to do; nor is it the matter or business of any of defendant's impeaching witnesses, for, with but one exception, namely, Mr. Edwin Chamberlin, I

do not owe a single dollar, not even one cent, to any of them. Since the bankruptcy proceedings I have made it a rule to avoid debt and pay at the time, or within a reasonable time after the contracting of the indebtedness. I have no trouble in respect to credit, or in getting all the credit I may ask for at the present time. Of course I have not had or asked for the money credit I had up to the time of the bankruptcy proceedings, nor do I expect any such until after all of the old indebtedness is settled and paid in full to the satisfaction of the creditors. At the time the trouble came with the two or three creditors of which I have spoken, had I known their real purposes and designs before they struck the blow, and ruined my credit for the time, I could have saved myself that disaster, and what to me I have ever regarded as an unpleasant affair, because I could have obtained the money to satisfy that claim of five or six thousand dollars before my credit was impaired in the manner I have stated. Precisely what a financial misfortune has to do with a man's ability to speak the truth, or as to his truth or veracity, I have not been able to discover since these suggestions made by defendant's counsel to the several witnesses on this occasion. The proceedings in bankruptcy remain in court in this district precisely
801 where they were in 1871. I have not gone, nor do I expect or wish to go, through bankruptcy, and be by law discharged from the payment of a just and honest debt. In several instances of claims against me they have been by the law paid by what is known as the statute of limitations. In such cases I have renewed the obligation or claim, regarding, as I do, the right of a man to have that which justly belongs to him, without being cut off by the statute of limitations. I am now, and shall continue, subject to the few remaining claims of my creditors until I shall have fully and satisfactorily paid the same. In the bankruptcy proceedings there was a conflict between the State and the United States court, and the sheriff of this county was allowed, by an order of the bankrupt court, to seize between fifty and sixty thousand dollars' worth of personal property of mine, and to sell the same at public sale, on a claim of about six thousand dollars; that property so seized was so sold in this city for less than its value, and the money went, so far as I have any personal knowledge, to "where the woodbine twineth." I never heard of any settlement by anybody with the sheriff for it. Had that property been allowed to remain in the hands of the assignees chosen by my creditors, that and other property would have paid every dollar of my just indebtedness, and left a large surplus for my family. I know that at the time it was generally conceded in this city a fraudulent, outrageous, and wicked transaction.

Q. 25. Counsel for defendant, in some of his questions to your sustaining witnesses, made effort to show that there had been a falling off in your professional business. State what you may know with reference to that matter.

(Same objection.)

A. For many years I had the entire patent business of nearly
802 all the stove manufacturers and venders in this city; they had retained my professional services, and those retainers hold good to the present time in every instance of which I have any knowledge. There came a time, about 1873, I think, when a series of litigations were commenced by one against the other. Of course I could not act on either ide, and did not. Notwithstanding that loss to me, I have had all the professional business from that time to this that I could attend to, and have frequently refused cases for want of time. Some of my old clients have died, some have removed from this city to other parts of the coun-

try, and others I took that good care and keeping of, when they had business, that they have had very little litigated business since. If I have lost any client or clients in this city, I do not know it, with one exception, namely, Charles Eddy, and Charles Eddy & Company. If, for any cause, there are any persons in this city who refuse to consult with me in my profession, I do not know that fact, except the persons named in my last answer, and also Jeremiah D. Green, Frederick G. Ransford, Nelson Pramer, Joseph C. Henderson, Henry G. Giles, and Richard M. Hermance, the stove-damper peddler.

(Complainant's counsel now offers in evidence a printed pamphlet of seventeen pages containing twenty-six letters of various dates during the forepart of the year 1869, and each having reference to the appointment of Marcus P. Norton to the governorship of the Territory of Wyoming, but before making the offer permanent the witness will be inquired of concerning it.)

Q. 26. Look at the pamphlet now shown you, and containing the letters contained in the above-named offer, and state what you may know with reference to them.

803 A. In the early part of the year 1869, desiring to go into the West for the purpose of a change of climate for the benefit of my health, as I had been advised by my physician to do, I contemplated giving up my business in the city of Troy, and complying with the advice of my physician, I made this known to some of my friends, and became a candidate for the office of governor of the new Territory of Wyoming. The letters contained in this pamphlet were written in support of that candidacy. Each of these letters is a true and correct copy of the original letter, under the same date, and written by the person whose name appears at the end of each letter. The original letters which appear here in print are in the handwriting of those persons who signed them. They are now in Washington, but I will get them and produce them at the final hearing of this cause, so that the court may see each one as it appears in the original. They are genuine letters, and were in good faith sent to me in support of my application for appointment to the governorship above spoken of. These letters were each shown to and examined by General Grant after he became President of the United States. My appointment was not made for the only reason that the appointment of Mr. Campbell had at that time been made, but not publicly known. The letters were retained by President Grant, and he afterwards offered me the government of the Territory of Utah, which I declined on account of the polygamous condition of that Territory, and no further effort was made by me in the direction of filling the position of governor of any Territory. After a year and a half of travel in the West and the Canadas, my health became very much improved; I may say, I became entirely well again, and thereupon resumed the practice of my profession again in the city of Troy, where for so many years previously I had practiced it. Since the making of these letters, and their delivery to me in 1869, I am not conscious of having done anything in this community, or anywhere else, that
804 would in any degree change the character of the opinions expressed in these letters of myself. I am sensitive over this, to me, wanton and unjustifiable attack upon my character by the defendant; indeed, I deeply grieve over the attack, because I am conscious positive that I have done nothing in this community or elsewhere to justify it. That the court may know at least something concerning me, as against a few irresponsible enemies of mine, who have endeavored to

testify against me in this case, I spread out upon this record, in connection with the large number of persons called in this city to sustain me, this pamphlet, containing the letters above named, that I may be able to repel and overcome the attack made upon my character for truth and veracity, or for anything else, holding my character and whole career to be sacred, and as dear to me and my family as life itself. I do not claim to be without faults. Like all men I have those, and sometimes more of them than I wish I had. I hold a man's character for truth and veracity, or anything else, to be the highest thing on earth.

(Complainant's counsel now offers in evidence the pamphlet above referred to for the purposes of evidence, concerning the attack made by the defendant upon the witness Norton, and the examiner is requested to mark it, Complainant's Exhibit Wyoming, numbers one to seventeen, inclusive. September 2d, 1878.—I. B., ex'r.

It is received, and so filed and marked.)

(Objected to on the ground that it is immaterial, irrelevant, and secondary.)

Q. 27. State whether, during the fall of 1867, you were ap-
805 pointed a delegate from this city and county to the National Convention of Southern Loyalists, held in Philadelphia.

(Objected to as immaterial and irrelevant.)

A. I was one of three, I think, from this county, and was appointed by a Republican county convention, held in this city about that time.

Cross-examination:

By Mr. CLARKE:

X Q. 28. Was the proceeding in bankruptcy voluntary or involuntary?

A. It was voluntary.

Redirect examination:

By Mr. NORTON:

R. D. 29. Explain the manner in which your bankruptcy proceedings were commenced, with reference to your last answer.

A. Two or three suits had been brought against me by John L. Flagg, a lawyer in this city, on some three or four claims, which I regarded as unjust and fraudulent. Going from home a few days after the commencement of those suits, to be absent for considerable time, I employed a lawyer, then in this city, by the name of A. S. Burdick, to act as my attorney in those cases. He prepared the answer in each case, and became my attorney of record. The causes were put upon the calendar, and some days before the suits were to be called in court I prepared and sent to Mr. Burdick proper and sufficient affidavits of merits. The rule of court then was, if I remember correctly, that an affidavit of merits must be filed on or before the second day of the term. This my attorney failed
806 to do, although those affidavits had been in his possession some days previous. Those affidavits not being filed, an inquest was had and judgment taken in each case. I was then ill and away from home. Executions upon those judgments were then issued and placed in the hands of the sheriff. The sheriff then entered my office and made a levy upon about twenty-five thousand dollars worth of property, and placed my office in the hands of one of his deputies, who was then known as a "figure-head" in Norton's office. At the time this levy was made, and this deputy was put in charge of my office, I was still away from home. That course on the part of the sheriff so injured my credit at the time, in my judgment, that I did not undertake to obtain the money to pay them, but did try to get the causes reopened, so that I

could make my defense. I obtained an injunction against Mr. Flagg and his clients, on coming home, driving his "figure-head" from my office and taking possession of it again myself. That injunction was afterwards dissolved, I think, by some judge residing in another judicial district. A new levy was made, but having a fresh injunction in my safe, I stopped the parties again. So the matter continued, until several injunctions had been obtained and dissolved. Seeing that I would not be able to make the defense in those suits which I desired to make in the State court, and that it was the intention of the moving parties to dispossess me of large and valuable personal property, it was thought best by counsel to go into the bankrupt court, where every creditor would have the same footing, and there prevent the sacrifice of my property and enable me to pay each creditor, principal and interest. Believing that, under the circumstances, to be a fair and honorable course to pursue toward my creditors, to preserve my property from a pack of thieves, I filed my petition in bankruptcy in the district court of this district. Mr. William H. Young and Lemuel H. Tupper
807 were elected assignees by my creditors. They took possession of the property under the proceedings in bankruptcy, and while taking an inventory of it, the sheriff of this county, under an order from the bankrupt court, obtained by deception and fraud, again seized the property under these executions, and publicly sold it in the manner I have before stated. I have now stated the reasons briefly, and the only reasons why I filed my petition in bankruptcy. As I have before stated, nothing has been done about the bankruptcy proceedings from that time to this, and as far as I am concerned, I do not propose to make any move in that case towards the consummation of those proceedings, but on the other hand to pay all just and honest debts. The sheriff making that seizure deprived me of my credit, and thus prevented me from paying those unjust judgments. The property that I lost in those bankruptcy proceedings, and that which I lost in Wall street, was all my own; nobody was on any paper for me to the extent of a dollar that I now remember of. Creditors who appear in the bankruptcy proceedings were such as happened to come in the current transactions of business.

MARCUS P. NORTON.

Subscribed and sworn to before me this 2d day of September, 1878.

IRVING BROWNE,
Special Examiner.

At 6 o'clock p. m., counsel for complainant's counsel requests counsel for defendant to allow him to-morrow as extra time to complete the examination of several witnesses who have been orally subpœnaed,
808 and promised to attend, but who for business reasons have not been able to do so. Defendant's counsel refuses to extend the time as asked for for one day only, whereupon complainant's counsel asks the examiner to adjourn these proceedings until 7.30 o'clock this evening, to enable him to continue the examination of witnesses, until the stipulated time shall expire at twelve o'clock midnight.

Defendant's counsel states, with reference to an extension of time, that he has engagements in New York to-morrow, and that he will probably be engaged there for two or three days after to-morrow, but that as he has no desire to deprive complainant of any testimony which he may have, he is willing, in consideration of the present adjournment, that complainant should have extra time, after the next three days, for

taking his testimony, when he, defendant's counsel, can attend to it; and he objects to an adjournment to half-past seven o'clock, on the ground that the examiner has no power to hold his session at an unusual and unreasonable hour. And defendant's counsel requests the examiner to note the facts, firstly, that counsel and the examiner have sat in the examiner's room since four o'clock, it being now half past six, taking no testimony, there being no witness present; and secondly, that it does not appear that any subpœnas have been served on witnesses for to-day; and thirdly, that there is no guaranty given that there will be any witnesses on hand at half-past seven; and defendant's counsel says that he has made all his arrangements for going to New York to-night on the eight o'clock boat.

809 The examiner notes said three facts as requested, but the examiner takes judicial notice that the witness Norton has been on the witness stand giving testimony on his own behalf alone for the last three days, and might reasonably have anticipated a cross-examination of considerable length, but said cross examination was unexpectedly brief. Under the circumstances, the examiner does not deem the failure to have witnesses in attendance immediately upon the close of said Norton's testimony, and the absence of such witnesses for the space of two hours to be unreasonable; and inasmuch as the additional testimony proposed to be given by the said Norton is announced by him to be for the purpose of sustaining his character for truth and veracity against the defendant's attack, the examiner deems that the adjournment asked for is not unreasonable, and decides to sit during the evening to enable the complainant to supply the time thus lost during the day, and especially because this is the last day for the complainant to put in his evidence.

At the time and place of said adjournment, the complainant's counsel appears, and states that he finds it inconvenient to have witnesses present this evening for examination, on account of their absence and previous engagements; that there are eight witnesses who have gone into the country to pass the night, to return on the early morning train to-morrow, who had promised to appear to-morrow and be examined on behalf of complainant, and in support of Marcus P. Norton's character for truth and veracity; but the defendant's counsel having refused to extend the time except upon his own conditions, and having re-
810 fused to go on with the case to-morrow, complainant's counsel is obliged to forego the benefit of said testimony, and to suffer the evidence here to be closed, because the stipulated time for the taking of the same expires to-night at 12 o'clock.

No counsel appears for defendant.

But the witness Norton desires to supply a matter which had escaped his recollection in his last testimony, and is therefore recalled by complainant's counsel.

Q. 1. The witness Frederick G. Ransford, during his examination on the question of your truth and veracity, by defendant, stated substantially that he had endorsed notes for you, and loaned you money, and that you were still indebted to him by reason thereof; state what you know about those matters.

A. I have had no dealings of any kind with him for the past seventeen or eighteen years, and during that time I have not been indebted to him in any manner whatever for a single dollar. He never during that time presented a claim of any sort to me, and I never heard of any such thing until I heard it from him on his examination in this case. Previous to 1860, I had some money transactions with him, but those

were all settled and paid in full before that year. On the contrary, if he would make a fair and honorable settlement of all our business transactions previous to the year 1860, he would be largely indebted to me, not only for professional services, but growing out of an interest which I had previous to that time in railroad rail or track chair, upon which there had been granted a patent some time in the early part of 1857, if I remember right; that patent Ransford sold out and received
811 pay for the same, all of which he converted to his own use, and refused to make a settlement with me for my interest in the same. His statements about sending money West to have my wife come to Troy; about the payment of house rent to prevent my being turned out of doors, and other similar matters, are absolutely and unqualifiedly false in every respect. Whatever money I had of him previous to 1860 was money fairly and justly my due on business transactions between us. Having failed to keep his agreement with me about the patent of August 9, 1859, it is not likely that after that I would have had any business relations with him involving money or other property, and I did not have any such, as before stated, after 1860, to the present time. He has been very bitter and hostile towards me for a great many years, having at different times made ex-parte affidavits against me, and filed them in the Patent Office. His hostility commenced about the beginning of the year 1865. About 1870, he, Peter Low, and Jacob Shavor, then living in this city, made some sort of an arrangement with Jeremiah D. Green to stay in or near Washington and watch and ascertain what was being done by me with reference to my patent of April 14, 1863. By their false ex parte affidavits, made from time to time and used in the Patent Office, they made me considerable trouble, and hindered and prevented the progress of my business with reference to that patent. In the patent of April 14, 1863, neither Ransford nor Peter Low, nor Jeremiah D. Green, ever had any interest whatever. The only interest that they ever had in any patent granted to me was in the patent of August 9, 1859, a machine of no practical utility, it having been tested in the post-offices at New York, Washington, D. C., and Troy, New York, and in each of those post-offices pronounced a perfect failure. In the year 1863 or '64, the Postmaster-General communicated the trial and failure of the cutting canceling instrument
812 to the Congress of the United States. That report may be found in the official Post Office Department report to Congress in the year 1863 or 1864.

MARCUS P. NORTON.

Subscribed and sworn to before me this 2d day of September, 1878.

IRVING BROWNE,
Special Examiner.

Whereupon the above examination is closed, for reasons stated by complainant's counsel, and at the hour of eleven o'clock p. m.

IRVING BROWNE,
Special Examiner.

813, 814 *Defendant's t stimony, taken by him under an order of the court, dated October 22, 1878.*

United States circuit court for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

SIR: Please to take notice that on the pleadings and evidence and all proceedings in this suit, and on affidavits and exhibits, copies of which are annexed, I shall move this court for leave to further cross-examine complainant's witness, Marcus P. Norton, with reference to the exhibits, and for such other order and relief as to the court shall deem meet, and that such motion will be made at the U. S. circuit court-room, in the city of New York, on the 21st day of October, inst., at 11 o'clock in the forenoon, or as soon thereafter as counsel can be heard.

New York, Oct. 14, 1878.

Yours, etc.,

STEWART L. WOODFORD,
U. S. Att'y, for Defendant.

To GEO. H. WILLIAMS, Esq.,
Of Counsel for Complainant, Washington, D. C.

815 At a stated term of the circuit court of the United States of America for the southern district of New York, in the second circuit, held at the United States court rooms, in the city of New York, on Tuesday, the 22d day of October, in the year of our Lord one thousand eight hundred and seventy-eight.

Present, the Hon. Samuel Blatchford, circuit judge.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES. } In equity.

On reading and filing the annexed notice of motion, the annexed affidavits of S. B. Clarke, T. L. James, and D. A. Secombe, and the annexed exhibits, numbered one to twelve inclusive, and on motion of Stewart L. Woodford, U. S. district attorney and solicitor for the defendant, and after hearing Samuel B. Clarke, assistant district attorney, for the motion, and Geo. H. Williams, of counsel for complainant, in opposition, it is ordered that defendant have leave, and leave is hereby given him, to further cross-examine complainant's witness, Marcus P. Norton, with reference to said annexed exhibits; and complainant may re-examine said Norton with reference to the same. For the purpose of this
816 examination, said exhibits may be removed from the files and placed in the custody of John A. Shields, esq., a standing examiner of this court.

(Signed) SAMUEL BLATCHFORD.

Form agreed to.
S. B. C.
G. H. W.

(Endorsed:) U. S. circuit court, southern district of N. Y. Christopher C. Campbell vs. Thomas L. James. Order granting defendant leave to examine witness Marcus P. Norton. U. S. circuit court. Filed Oct. 23, 1878. John I. Davenport, clerk.

817 United States circuit court for the southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

Testimony taken before John A. Shields, examiner, pursuant to an order made October 22, 1878, in the above-entitled cause.

NEW YORK, *Oct.* 23, 1878.

Present, S. B. Clarke, on the part of the defendant, and George H. Williams for the complainant.

MARCUS P. NORTON, recalled by the defendant for further cross-examination, being first duly sworn, testifies as follows:

X Q. 1. Look at the paper now shown you, which purports to be a letter from Marcus P. Norton to William W. Secombe, dated Washington, March 25, 1876, and state in whose handwriting it is.

A. It is in mine, written by me on the day of its date.

818 X Q. 2. Sent by you to Mr. Secombe, was it not?

A. I don't doubt but that it was.

X Q. 3. In that letter you ask Mr. Secombe to come to Washington. For what purpose did you wish that?

A. To answer the question it is necessary for me to make a statement by way of explaining this letter, and how I came to write it; that statement will necessarily be a part of my answer. If counsel will allow me to make it I will give full answer to the question, but cannot well answer it without making the statement in connection with the answer.

X Q. 4. Please state for what purpose you wished Mr. Secombe to come to Washington at that time.

A. To see whether he intended to fulfill a second but verbal agreement made with me concerning the obtaining of compensation of the government for the use of the invention and letters-patent upon which this suit is founded, and further to see what it meant, that a man by the name of Jeremiah D. Green, of Troy, should have to do with that patent, if anything, as I then discovered that Green had introduced a bill into Congress in which this patent was mentioned. I also wanted to see him about a patent granted to me upon the 14th day of January, 1862, upon revolving or changing dating type wheels, for I thought that there was an opportunity to show that one T. J. W. Robertson had defrauded us out of that patent and the invention contained in it, and that by the course I had in view we might get Congress to pass a bill referring that matter to the Court of Claims, when I would have the opportunity to present to the court those matters and practices on the part of Robertson which I then and now believe to have been fraudulent. I also wanted to see him about the efforts that had been made to remove M. D. Leggett, who had been Commissioner of Patents, from office and also his chief clerk, Mr. Grinnell, who I then believed were parties with Mr. Robertson in those fraudulent transactions. The

819 office then being free from those two persons, and with different

persons I could have access to the records of the Patent Office from which I had been debarred for nearly five years, by an ex parte order made by Commissioner Leggett. And the examiner who had been hostile to me during my trouble with the Patent Office in 1871, having resigned or been removed from office, and two of the commissioners appointed by Leggett in his proceedings against me in that year having also resigned, I thought I had sufficient evidence to reverse the former action of the Commissioner of Patents, and to show that those proceedings were fraudulent; and by showing that, we might in a suit have the extension of the Robertson patent vacated and declared void. I am not certain whether the two commissioners were then out of the office, but one of them, Mr. C. M. Parks, had been removed by the order of Commissioner Leggett. Mr. Secombe had been manufacturing largely under the patent of January 14th, 1862, and had had a suit with Mr. Robertson, above named, and that suit being decided against Secombe broke up his business that he previously had been engaged in in this city. The proceedings in that case is what I ask for in this letter, on the first page, to be sent to me by express, if he didn't come. Being at that time, March 25th, 1876, permitted to transact business in and about the Patent Office, as for many years I had been permitted to do previous to Leggett's appointment as Commissioner, I was of the opinion that we could revive the reissue application of th 1862 patent, containing the revolving dates, and that by doing so it was my opinion that the interference with Mr. Robertson, which I had asked in 1871, and which had then been denied, could then be obtained, and that even there I might be able to show the matters which I believed, as I now do believe, to have been corrupt and fraudulent on the part of Robertson and
820 the Commissioner of Patents and the examiner, to whom I referred in the obtaining of the extension of the Robertson patent of September 22, 1857, for revolving dates. I wanted to advise with Mr. Secombe about this matter, and see if he was in condition to furnish expenses to carry it through, in case he desired to, and I stated substantially in that letter that I was so well convinced that I was willing to try it at my own expense, that part of it, if he couldn't.

(Letter offered in evidence and marked Defendant's Exhibit 190, Oct. 23, 1878. J. A. S., examiner.)

X Q. 5. Look at the paper now shown you, which purports to be a letter from Marcus P. Norton to William W. Secombe, dated Washington, March 28, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. It is in my handwriting, written on the day of its date, and sent by me to Mr. Secombe through the mail.

X Q. 6. What deed of trust is referred to therein?

A. I think it was one dated the 4th day of March, 1871. There was, however, another deed of trust beside that one, which related to those revolving dating wheels, and also to several patents granted to me for canceling internal revenue stamps, which Mr. Secombe was at that time manufacturing, and it may have referred to that deed of trust; for it will be observed by the letter that I had just previously spoken about the Robertson matter, and I also spoke about the post-office case just previous.

X Q. 7. Is not the deed of trust referred to in that letter the one stated in the bill of complaint to have been delivered to Miss Ingalls by Mr. Secombe, bearing date March 4, 1871?

821 A. I should judge from the letter that it did refer to that deed

of trust; and also to a previous one, to which I have referred to in my last answer.

X Q. 8. Do you not know that it refers to that deed of trust of March 4, 1871?

A. The last sentence in the letter but one does refer to that deed of trust. The rest of the letter refers to another deed of trust. I will read the part referred to which contains the deed of trust referred to in the bill, namely, "Why can't you come here now, and see what can be done about the April 14, 1863, patent, mentioned in your deed of trust?"

X Q. 9. Did Mr. Eddy have anything to do with that other deed of trust you refer to?

A. Eddy & Co. owned one-third of the patent of January 14, 1862, but he had nothing to do with the other patents, and had nothing to do with either of the deeds of trust that I have spoken of, that I know of.

X Q. 10. Did he know of the existence of that other deed of trust to which you referred, so far as you know?

A. I don't know that he did; I don't know that he ever saw either of the deeds of trust. Mr. Secombe made some arrangement with him about the matter.

X Q. 11. Mr. Eddy referred to in the letter is Mr. Charles Eddy, of Troy, I suppose?

A. Yes.

X Q. 12. The Green referred to in the letter is Mr. Jeremiah D. Green, of Troy, I suppose?

A. Yes.

X Q. 13. Did Green have anything to do with that other deed of trust or know of its existence?

A. Not to my knowledge.

X Q. 14. What did you mean by saying "Green is at work for himself"?

A. Well, I meant that Green was trying to obtain compensation from the government for the use of the revolving date invention then in use in the several departments of the government at Washing-
822 ton, as well as in the post money order offices in various parts of the country, and covered by the Robertson patent of September 22, 1857, in which Green claimed to own an interest through Frederick G. Ransford and Peter Low, of Troy, and that, in my opinion, knowing the character of Green, he would take anything he could get and make no returns to the others?

X Q. 15. Where was Green so working?

A. Why, Green was in Washington, and had made me a great deal of trouble in the Patent Office, and there was a bill pending before Congress asking that this revolving type dating invention be referred to the Court of Claims for adjudication for the use of that invention in the several departments of the government that I have named. I suppose he was looking after those matters, but precisely where I can't say.

X Q. 16. Mr. Green was one of the men who claimed compensation from the government for the use of the post-office stamp, under the 1859 patent, for several years succeeding 1869, was he not?

A. Well, in 1870, I think it was, this Mr. Green claimed to be the agent of the owners of the patent granted to me August 9, 1859, for post-office postmarking stamp, and he has so acted, as I have been informed, down to the present time, and I believe has acted in that capacity with the defendant's attorneys in this cause.

X Q. 17. Mr. Green instigated the bill to which you refer in this letter of March 28th, did he not?

A. No, sir. He took a bill that had been agreed upon by the Senate committee at the previous session and changed it to suit his own purpose, and then had it introduced and referred, or at least I suppose so, from the fact that I was told that he was engineering a bill of that kind; and upon discovering that fact, I wrote to Mr. Secombe about it; and I also judge from the manner in which I speak of that bill in this letter.

823 X Q. 18. You sent Mr. Secombe a copy of it, did you?

A. I can't answer that, for I don't recollect. I cent him some bill in a previous letter, but I presume I may have sent him a printed copy of that bill.

X Q. 19. Do you say that that bill related solely to the revolving wheel patent?

A. I think Green had put all my patents into that bill, and therein consisted the fraud I spoke of in my letter, as he had no right whatever, from any source that I know of, to meddle with the patent of April 14th, 1863, or any of the several other patents that I have referred to; but he did have with reference to the patent of August 9th, 1859.

X Q. 20. Did the bill cover the patent in suit April 14th, 1863?

A. I don't think that patent was named in the bill, but the bill was so drawn that, in my opinion, at that time, it would cover that patent.

X Q. 21. Was the revolving wheel patent named in the bill?

A. I have no present recollections about that.

X Q. 22. When you said that Green is at work for himself, you meant that he was striving to obtain compensation for the combined post-office stamp, was he not?

A. Nothing of that kind. I think that letter clearly shows what I thought Green was about, and also my opinion of Green, which I have never changed from that time to now, and do not now change it. I have never doubted but that Green was fraudulently engaged in trying to make the 1859 patent cover an invention that it never contained and never was designed to embrace or to cover.

X Q. 23. Was not Mr. Green working at the time this letter was written, March 28, to obtain compensation for the use of the combined post-office stamp?

A. In no different way than I have already answered, that I had any knowledge of.

824 X Q. 24. What way was that; engineering that bill, as you have said?

A. Engineering what bill?

X Q. 25. The bill you have spoken of as having been engineered by Mr. Green.

A. Yes; that's the bill about which I suppose he was performing some labor or service of which I have no knowledge of my own, excepting having met him in one of the committee rooms about that time.

X Q. 26. Was it not because of the bearing of that bill upon the combined post-office stamp matter, and because of other matters connected with the combined post-office stamp, that you desired Mr. Secombe to come on to Washington?

A. No, sir. I have already fully explained my invitation to Mr. Secombe to come to Washington. I will further add, that at that time there was a bill pending before the Committee on Patents, drawn by myself, introduced into the Senate by Senator Ingalls, and which had

been referred to the War Department for it to report upon, and which afterwards was reported to the Senate Committee by the Secretary of War, favorably. I know of no bill pending at that time asking for special legislation but the fraudulent bill I have spoken of, and that bill was pigeon-holed in the committee room of the Senate, and is there now for aught I know, because the chairman of that committee told me himself he was satisfied there was fraud or something wrong about it, and the bill was reported upon by him adversely a few days after, and the Senate adopted his report; that report and action of the Senate, that I refer to, was made in July, 1876. I mean by being pigeon holed, that it was reported adversely, and killed by the action of the Senate, and has never since been revived to my knowledge.

X Q. 27. How do you know that Green was endeavoring to obtain compensation for the revolving wheel stamp in March, 1876?

825 A. I think Mr. Green told me so himself, and he afterwards proposed to join in a general bill that would take everybody's patent to the Court of Claims for adjudication, that had been used by the government; and he so joined in that undertaking and appeared with me before the Committee on Patents several times during the long session of 1876. And a bill of that kind was agreed upon and reported by Mr. Wadleigh, chairman of the Committee on Patents of the Senate, and I have a copy of that report with me.

X Q. 28. When, in this letter of March 28, you say "you cannot have forgotten the terms of your deed of trust"—to what deed of trust did you refer; did you not refer to the deed of trust mentioned in the bill?

A. No, sir; I think I referred to the first deed of trust about the other patents; I mean the revolving date patents and the internal revenue canceling devices patented by me; I do not think there is any doubt on that, because in an interrogatory in the latter part of the letter I specifically referred to the patent of April 14th, 1863, about which there was also a deed of trust, clearly showing that I did not wish him to be confounded as to those two deeds of trust. If I had meant the deed of trust referred to in the question, I would not have made the interrogatory I did about the patent of April 14th, 1863.

X Q. 29. When in this letter you say "I think it quite strange that you are unwilling to push the business along under the deed of trust," what deed of trust did you there refer to?

A. I there referred to the first deed of trust about the revolving dates and internal revenue stamp canceling patents.

X Q. 30. When was that revolving wheel deed of trust made?

826 A. It was made, I think, some time in the fore part of the year 1870; the spring time, I think, in the month of May; and I am not certain but it might have been earlier than that, but not later.

X Q. 31. Where is that deed of trust now?

A. At the time of my settlement with Mr. Secombe in July, 1873, when he and the Secombe Manufacturing Co. reassigned everything to Miss Ingalls which had been assigned to him or the company, by her or myself, I gave to him that original deed of trust as one of the conditions of the settlement, as I also at the same time gave up to him the original deed of trust relating to the patent of April 14th, 1863; and having never seen them since, I do not know where they or either of them are at this time.

(Letter offered in evidence, and marked Defendant's Exhibit No. 191, Oct. 23, 1878, J. A. S., Ex'r.)

X Q. 32. Look at the paper now shown you, which purports to be a

letter between the same parties, dated Washington, March 31, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. It is in my handwriting, written at the date of it, and sent to Mr. Secombe through the mail.

X Q. 33. What bill is referred to in it?

A. I think it is a modified bill, introduced into the House by hon. Martin I. Townsend, of Troy. My impression now is that I wanted to change the bill that had been introduced into the Senate by Senator Ingalls, and it having been acted upon and recommended by the Secretary of War, I thought it best not to undertake to change it, but to prepare an entire new bill and have it introduced into the House, and, by the Committee on Patents, referred to the Secretary of War for his opinion about it, and it was so done, and this is the second bill.

827 X Q. 34. Why did you send a copy of that bill to Mr. Secombe?

A. On my way to Washington some time about the middle of March, 1876, I called upon Mr. Secombe in New York, having heard that he had recovered from his financial embarrassments, and during our interview I told him what I was going to Washington for: I showed him a printed copy of the bill that Senator Ingalls had introduced into the Senate, and he said that if that bill should become a law, he would like to make a new arrangement, and furnish me with the necessary means required in Washington, and take an interest in the bill, or the different patents that he had had assignments of and deeds of trust about; we made an arrangement of that kind at that time, and he was to furnish the money and take an interest, and, as a matter of course, I desired he should see that bill, and sent him, I presume, a printed copy of that bill, as I also did of others on the same subject, after they had been amended or changed by the committee or by the different departments to whom they were submitted; my principal business in calling upon Mr. Secombe at that time was to see if we could not in some way revive the matter involved in his suit with Mr. Robertson, for I had been always dissatisfied with the course that had been pursued in that case by his counsel who argued the case before the court; it was in the course of the conversation about that matter that this Court of Claims bill came up between us.

(Letter offered in evidence, and marked Defendant's Exhibit No. 192, Oct. 23, 1878. J. A. S., Ex'r.)

X Q. 35. Look at the paper now shown you, which purports to be a letter between the same parties, dated May 3, 1876, and state whose handwriting it is, and whether it was sent to Mr. Secombe.

828 A. It is my handwriting, written on that day, and sent by me to Mr. Secombe.

X Q. 36. When you say in this letter, "If you intend to go any further with the deed of trust, it will be necessary for you to furnish some money," etc., what deed of trust do you there refer to?

A. It refers to the patent of April 14th, 1863, to the deed of trust referred to in the assignment by Miss Ingalls to Secombe on the 4th of March, 1871, as a part of that assignment, and referred to on page 13 of the amended bill, folios 51 and 52; and I meant by that language to refer to the second or subsequent agreement we made in New York, while on my way to Washington, as the original deed was substantially the same as our subsequent verbal agreement, and it was to stand in that condition until we ascertained whether that bill would become a law or not.

X Q. 37. The bill referred to in this letter, I understand, covers the patent of April 14, 1863?

A. No more that patent than any other patent used by the government in any of its departments. The patent on which the suit was founded is not mentioned in that bill at all; the bill proposed general legislation upon the subject of patents infringed by officers in the employ of the government.

(Letter offered in evidence, and marked Defendant's Exhibit No. 193, Oct. 23, 1878. J. A. S., ex'r.)

X Q. 38. Look at the paper now shown you, which purports to be a letter between the same parties, dated August 7, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. It is in mine, written on the date of it, and sent to Mr. Secombe through the mail.

X Q. 39. What bill is referred to in it?

829 A. It is a bill before Congress last above referred to, House bill No. 3743, which was substituted by the Senate committee for the bill which had been introduced by Senator Ingalls, and it was this Senate amendment that I inclosed in this letter, it being the bill reported by Mr. Senator Wadleigh, which I have before spoken of.

X Q. 40. You speak of "the case" being tried at the next term of court; what case?

A. I suppose that that referred to a case that might be brought under that bill, should it become a law.

X Q. 41. Under what patent?

A. I suppose it means the patent of April 14, 1863, about which Mr. Secombe and I had made a new and verbal arrangement in New York, when on my way to Washington, and I was trying to explain to him the practice under that bill were it a law, and showing my confidence in the proposed legislation, and to encourage him to carry out this subsequent verbal arrangement.

X Q. 42. You speak of there being "no more trouble about the stamp"; what stamp?

A. That refers to all kinds of stamps that I had patents upon, and that had been used by officers in the employ of the government, and the bill, were it a law, being general, anybody pretending to have any claim against the government could bring a suit under that bill; and that would include Mr. Green and all his party owning the August 9, 1859, patent, and each party coming in by separate bill before the court could have his rights, if he had any, properly adjudicated; and I meant by that, that that bill would save anybody else any further trouble of trying to defraud me of my patent of April 14, 1863, and I thought that that bill would set me free from those who had made me so much trouble about my patent of April 14, 1863, and put everybody upon an equal footing before the court; and I made an argument to that effect

830 before the committee having under consideration that bill, and the points suggested by me were unanimously adopted by the committee, and so reported in writing.

X Q. 43. You speak of money being had "on the stamp," and of persons who have "claimed in the stamp." What stamp did you refer to there?

A. Most undoubtedly to the one contained in and covered by the patent on which this suit is founded.

(Letter offered in evidence and marked Defendant's Exhibit No. 194, Oct. 23, 1878. J. A. S., ex'r.)

Adjourned by consent of counsel to Thursday, Oct. 24, 1878, at 10 o'clock a. m.

NEW YORK, *Oct.* 24, 1878.

Met pursuant to adjournment.
Present, counsel as before.

Cross examination of MARCUS P. NORTON resumed:

X Q. 44. Look at the paper now shown you, which purports to be a letter between the same parties, dated August 9, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe?

A. It is in my handwriting, written on the day of its date, and sent to Secombe through the mail.

(Letter offered in evidence and marked Defendant's Exhibit No. 195, Oct. 24, 1878, J. A. S., Ex'r.)

X Q. 45. Look at the paper now shown you, purporting to be
831 a letter between the same parties, dated August 11, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe?

A. The same answer as I made to the last question I make to this.

(Letter offered in evidence and marked Defendant's Exhibit No. 196, Oct. 24, 1878, J. A. S., Ex'r.)

X Q. 46. Look at the paper now shown you, purporting to be a letter between the same parties, dated September 23, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. I make the same answer that I made to the last question.

(Letter offered in evidence and marked Defendant's Exhibit No. 197, Oct. 24, 1878, J. A. S., Ex'r.)

X Q. 47. Look at the paper now shown you, purporting to be a letter between the same parties, dated October 30, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. The same answer as to the last question.

X Q. 48. What paper was it which you say you enclose herewith?

A. After my return from Washington, in August, 1876, and between the date of this letter of October 30, 1876, I ascertained that the reconveyance from the Secombe Manufacturing Co., and Mr. William W. Secombe, to Helen M. Ingalls, of the date of July 10, 1873, was not in her possession or in mine, and I went to Troy, saw Mr. Green, and asked him if he knew anything of the where-
832 abouts of that reconveyance, and he said he did not; I then came from Troy to New York, to see Mr. Secombe with reference to it, and I stated to him that that paper had been lost; as I had made diligent enquiries and searches for it, and could not find it, I asked him to make a new paper that would substantially be the same as the one that he had executed on the 10th of July, 1873, both for himself and the Secombe Manufacturing Company; he said that he would do so, but he thought I ought to be willing to refund him some part, at least, of the money that he had spent in the stamp business on my patents; that he was poor and needed it, and that he had been told that I was in ample condition to make such repayment if I chose to do so. I told him that I would not consent to do any such thing, as I had settled with him once all of our matters of difference and money dealings, and that I did not propose to do so again, simply because a paper that he had executed had been lost or could not be found. I told him that he knew that he had executed the paper, and that I would not submit to any such demand upon me as he had made because he had the advantage of the paper having been lost. I told him that I would put him in a position before the court where we would try the matters that were then being talked over between us. I left him, went to Canaan Four Corners,

where this letter is dated, where my family were then residing, and there talked the matter over with Miss Ingalls, stating to her the substance of my interview with Mr. Secombe. She thought it best to acceed to his demand, as it was but a few thousand dollars, and thus avoid any complication or further controversy with him. I thereupon prepared such paper as I thought sufficient, to take the place of the paper which I supposed at that time to have been lost. I put into that paper a clause covering the money demand that Secombe had made upon me in my interview with him in New York, and made the
833 conditions of its payment to correspond with his suggestions to me about the same while in New York, and also as had been repeated by him in a letter written by him to me on the 4th day of October, 1876, in which letter he promised to make the reconveyance if I complied with that demand; that paper, I have no doubt, is the one referred to in this letter of October 30, 1876, and covered by the question; it was a paper from him to Miss Ingalls, and should I see it I would be able to identify it. In that interview with Mr. Secombe in New York, I told him that what he had heard about my being in condition to pay money was not true. He then suggested that the writing could be so drawn as to secure to him the amount he had named, and that the payment should be paid to him out of the first money received, if any, from this patent, upon which this suit is founded. I made a provision of that kind in that paper.

X Q. 49. Do you say that between the month of August and October 30, 1876, you went to Troy, saw Mr. Green, and asked him as to the whereabouts of the assignment from the Secombe Manufacturing Company, and Mr. William W. Secombe to Helen M. Ingalls, of July 10, 1873?

A. My recollections about this matter being refreshed by the examination of these letters, I believe that I am now correct as to the time when I discovered the loss of this paper, and I went to inquire of Green about it because I then remembered of having sent it to him while he was in Washington, or of having handed it to him just before he went to Washington, for the purpose of having it put on record in the Patent Office; but whether he had returned it to me after that or not I did not know; hence my inquiry of him about it.

X Q. 50. Do you swear that between the month of August and October 30th, 1876, you asked Mr. Green in Troy as to the whereabouts of that assignment?

834 A. What I have already stated with reference to that matter are my present best recollections of it, and as to time I have given my best present recollections, aided as I have been by the examination of these letters; I cannot swear positive as to time, because I have no memorandum of it in writing.

X *B*. 51. Do you swear that at that interview with Mr. Green, he told you he did not know where that assignment was?

A. I do not swear as to the exact words used by Mr. Green, but in substance I understood him to say, that if he had not returned that paper to me he did not know where it was.

X Q. 52. Do you swear that that was the substance of what he said?

A. I have stated to you my best present recollections of that, and of my understanding of it; I certainly left him with that impression, and came to New York to see Secombe about it.

X Q. 53. Have you any doubt that that was the substance of what he said?

A. I have no doubt but that my last answer is the truth about that matter.

X Q. 54. Have you any doubt that the substance of what Mr. Green said was that he didn't know where that assignment was?

A. I have said that I could not tell the words used by Mr. Green; he might have said that he never had had it; I left him under the impression that he didn't know anything about it, and came to New York, as before stated. I certainly would not have come to New York if I had not understood that he did not know anything about it; this is what I call the substance of my interview with Mr. Green about that paper, and I have no doubts about it.

X Q. 55. You are a lawyer and understand the meaning of the last question; please answer it without evasion.

(Last question read.)

835 A. I have already given my best answer to the question as I understand it, and have not evaded or attempted to evade an answer to it. I have given my best recollections, my understanding and my impressions about the inquiries I made of Mr. Green, and his answer to me. I think I have substantially stated the substance of that interview, of which I have no doubt but what I am correct, and recollecting the fact that I came from Troy to New York to see Secombe, and saw him about the same matter, I have no doubt but what I have stated is correct in reference to my interview with Green.

X Q. 56. Why did you make that inquiry of Mr. Green at that time, as to the whereabouts of the assignment of July 10, 1873?

A. Not finding it among my papers, or those kept by Miss Ingalls, I became impressed with the idea that I had let Mr. Green take that paper, either personally or by mail, to have it recorded in the Patent Office, and I wanted to satisfy that impression and thought it best to see him about it, and I also wanted to find the paper.

X Q. 57. You gave or sent it to Mr. Green for the purpose of having it recorded in the Patent Office, did you?

A. That was my impression at that time.

(Letter of October 30, 1876, offered in evidence and marked Defendant's Exhibit No. 198. October 24, 1878, J. A. S., Ex'r.)

X Q. 58. Look at the paper now shown you, which purports to be a draft assignment of the patent of April 14, 1863, from William W. Secombe to Helen M. Ingalls, and also the draft acknowledgment appended, and state whether they are in your handwriting or not?

A. They are both in my handwriting, and this is the paper referred to in Defendant's Exhibit 198, the letter of October 30, 1876.

836 (Paper offered in evidence and marked Defendant's Exhibit 199, October 24, 1878, J. A. S., ex'r.)

X Q. 59. Look at the paper now shown you, purporting to be a letter from Marcus P. Norton to W. W. Secombe, also dated October 30, 1876, and state in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. It is in my handwriting, and was sent to Secombe through the mail, and written on the day of its date.

(Letter offered in evidence and marked Defendant's Exhibit 200, Oct. 24, 1878, J. A. S., ex'r.)

X Q. 60. Look at the paper now shown you, which purports to be a letter between the same parties, dated February 6, 1877, and say in whose handwriting it is, and whether it was sent to Mr. Secombe.

A. My handwriting, written on the day of its date, and sent to Mr. Secombe through the mail.

X Q. 61. What paper is that which you refer to in that letter a shaving been sent to Mr. Secombe about four months ago?

A. It is the paper that was sent in the letter of Oct. 30, 1876, and is Defendant's Exhibit No. 199.

(Letter offered in evidence and marked Defendant's Exhibit No. 201, Oct. 24, 1878, J. A. S., ex'r.)

Redirect examination:

R. D. 62. I find in this unsigned assignment, Defendant's Exhibit 199, that the proposition is to pay Mr. Secombe the money which he had
837 expended prior to the assignment of Miss Ingalls to him; is it to be understood from that that Mr. Secombe claimed nothing for money expended after the assignment, or was it some old claim brought up at the time of the conversation referred to by you with him?

A. That related to money that he had expended in the case of Robertson against the Secombe Manufacturing Co. on revolving dating type, and on an invention of that kind upon which a patent had been granted to me, and had no reference whatever to any money expended by him on the patent in suit.

R. D. 63. I understand, then, that Secombe did not claim that Miss Ingalls was indebted and should refund to him money that he had expended under her assignment?

(Objected to as leading.)

A. Your understanding about that is correct.

R. D. 64. You have mentioned in one of your answers that the deeds of trust at the time of your settlement with Mr. Secombe were delivered up to him; do you mean the declarations of trust which he gave to Miss Ingalls?

A. Yes; I mean those that were executed by him at the time that she assigned to him and the Secombe Manufacturing Co. the patents I have named, and which were papers not recorded in the Patent Office.

R. D. 65. You speak of a settlement with Mr. Secombe; state briefly what it was and the occasion of it.

(Objected to as not proper on this redirect.)

A. Mr. Secombe and the Secombe Manufacturing Co. had absolutely failed, and refused to comply with the terms and conditions of those two deeds or declarations in trust, each of which contained the
838 conditions upon which they received title to the patents I have named; they were indebted to Miss Ingalls and myself for royalties on the internal revenue canceling stamps manufactured under my patents; Mr. Secombe was also indebted to me for professional services that I had rendered to him, and also to the Secombe Manufacturing Company. Under these circumstances I thought it time to have those matters settled definitely. I called upon Mr. Secombe with reference to them; I stated to him that, according to the terms and conditions of those deeds of trust, he and the Secombe Manufacturing Company had forfeited all right and title to the patents that I had named, because they had not kept the conditions of those deeds of trust, and to this he assented. I then called his attention to my bill for services and to these royalties of which I have spoken, and about those we had a disagreement. After that I brought a suit against him in the supreme court of this State, and before the time to answer had expired, as stipulated between counsel, I was in New York and again saw Mr. Secombe, and all these matters were amicably settled between us, and the deed of reconveyance, dated July 10, 1873, was made and delivered to me as a per-

manent closing up of all those matters, and I discontinued the suit against him.

R. D. 66. Reference has been made in your examination by the defendant's counsel to two or more deeds of trust; did Miss Ingalls ever execute to W. W. Secombe more than one assignment? I do not now refer to any assignment to the Secombe Manufacturing Co.

(Objected to as not proper on this examination, and as immaterial.)

A. She never did but one, and that was dated March 4, 1871, and that was accompanied by a declaration of trust signed by him.

839 R. D. 67. Referring to the assignment by W. W. Secombe and the Secombe Manufacturing Company to Miss Ingalls, which has been frequently spoken of in the preceding examination, state where and by whom that assignment was drawn.

A. It was drawn by me in this city on the same day that it was signed by the Secombe Manufacturing Company and by Mr. Secombe.

R. D. 68. Why were not the patents referred to generally in that assignment named in detail by number and date?

(Objected to as not proper on this examination.)

A. When I began to prepare the instrument I intended to do that, but there being several patents I changed my purpose, because I could not furnish all of the dates or numbers accurately, and believing it was not necessary to specify the dates or numbers, I prepared the paper so that it should cover each and every of the patents I had testified about without reference to dates or numbers.

R. D. 69. State whether any, and, if so, what patents were issued in 1870, excepting the one on which this is brought, in which Secombe had any interest.

(Same objection.)

A. I know of none others, excepting those that related to the invention and improvements upon which the bill in this suit is founded.

R. D. 70. In your letter to Secombe, dated March 31st, 1876, you say, "Now, if you are wishing to continue under the deed of trust, you must help in this matter;" has that reference to your interview with Secombe on your way to Washington?

(Objected to as leading.)

840 A. Yes; on my way to Washington in 1876, during the long session of Congress in that year, and at the time the verbal agreement was made that I testified to in my examination.

R. D. 71. You say in your letter to Secombe of May 3d, 1876, "now if you intend to go any further with the deed of trust, it will be necessary for you to furnish some money at once to pay necessary expenses." To what does that refer?

A. That refers to my interview with Secombe on my way to Washington in 1876, when the verbal agreement was made which I have spoken of. The time, I think, was in February or March of that year.

R. D. 72. In your letter of August 7, 1876, to Secombe, you say: "When I last saw you I understood from you that you would, with me, bear one-half the expense, and so thinking, I came on here and have done as I have." To what does that refer?

A. That refers to my interview with Mr. Secombe and the new arrangement that was made between us in February or March, 1876, and which I have before spoken of.

R. D. 73. You say in that letter, "I would like you to give me prompt answer to this letter, for if you still refuse to share at least in these expenses, then I must at once make other arrangements." What did you mean by that?

A. That referred to this same new arrangement that I have spoken of, and I meant that if he did not furnish the means that he had agreed to, this verbal agreement should terminate.

R. D. 74. In your letter of August 9, 1876, you say, "I desire to know definitely and at once, because I will look elsewhere among my friends just as soon as you throw up the sponge, as you seem to have done;" and you further say in the same letter, "I want the money, and if you will not furnish it and do as you agreed to do, very well: of course
841 no one can prevent your entire abandonment of the case and claim." State what idea you intended to convey to Mr. Secombe in those expressions?

(Objected to because the words speak for themselves.)

A. Those words have reference to this same new arrangement of which I have spoken, and I intended to have him understand, that not having furnished the money he agreed to furnish me with at the time I have spoken of, that I considered it a forfeiture or abandonment of that arrangement, and that he could not expect to hold me to it. The case and claim before referred to there relates to the general patent bill that I had prepared and presented to Congress in that year, and about which I have testified.

R. D. 75. Was there any understanding between you and Secombe, or anything said to the effect that if he furnished means to secure the passage of this bill he might go on under the deed of trust?

(Objected to as leading.)

A. Yes; the understanding was that the old deed of trust should serve as a guide, but on my furnishing half of the means, as I agreed to, the amount fixed in that deed as his compensation should be reduced one-half, and I should be at liberty to charge for services rendered in preparing and attending to the passage of that bill; but the old deed of trust was in no way revived, excepting as a guide to our understanding, the title having been reconveyed to Miss Ingalls. I was unwilling to enter into any written agreement with him until after the bill had become a law, and I knew that he had furnished the necessary expenses that he had agreed to furnish.

R. D. 76. What do you mean by saying in your letter to Secombe of August 11, "you ought to help me under the deed of trust you
842 now hold and now in force, and will be, so long as you fulfill its provisions"?

A. That refers to this verbal agreement, and I treated it in that way on the grounds that I have stated in my last answer.

R. D. 77. What was your idea as to the assignment of the 10th of July, 1873, when you were unable to find it, as affecting the title between Secombe and Miss Ingalls?

A. My idea was that that assignment being lost and unrecorded in the Patent Office, that Mr. Secombe would be able to hold under the deed of trust between him and Miss Ingalls of the 4th of March, 1871, as that deed was then on record in the Patent Office. It being so recorded, my idea was that this verbal agreement of which I have spoken, as well as the lost re-assignment to her by Secombe, would, in law, be swept away by the fact that his recorded assignment that I have spoken of would appear upon the public record as showing the title in him, against which no verbal statement would prevail.

R. D. 78. When did you first discover that the assignment of Secombe to Miss Ingalls of July 10, 1873, was recorded?

A. It was in the month of June, 1877, in the Patent Office, while I was there examining the records for the purpose of obtaining certified copies

of such assignment papers as I thought would be necessary to use in this case. In looking over the digest of assignments I saw an entry of an assignment which the record stated had been delivered to Mr. J. D. Green. I took a memorandum of it, went to the record book to examine it—see what it was—and to my surprise found it to be a record of this identical assignment of July 10, 1873.

R. D. 79. Was that before or after this suit was commenced?

A. The bill in this suit was filed on the fourth day of that month in this court, and it was some days after the filing of the bill.

843 R. D. 80. You have stated in answer to defendant's counsel, and these letters also state, that you sent to Mr. Secombe for his consideration, bills, papers, etc.; did you ever exhibit to him any other documents or papers than those you have mentioned; and, if so, what were they?

A. I did; on the same day that I filed the bill in this case in court, I mean the original bill, I furnished him a written copy of it, and left that evening for Washington. On discovering the record of the re-assignment of July 10, 1873, I obtained from the Patent Office two certified copies of it. On my return to New York in July, after I called on Mr. Secombe, explained to him that that assignment was not lost, that it had been recorded within a short time after its date, and that I had a certified copy of it, which I delivered to him and have never seen it since. On communicating this discovery and other things to complainant's counsel he deemed it best to prepare and file an amended bill. That was done under stipulation of counsel. The original, and the bill as amended, were soon thereafter printed, and I furnished Mr. Secombe in his office with a printed copy of both bills, which was the last time I ever saw him alive.

R. D. 81. Was there anything said on the subject matter of the bill and assignment between you and him at that time; and, if so, what?

(Objected to on the ground as not proper in this examination.)

A. There was, about both; he said that the production of the certified copy of the assignment would deprive him of the money that he intended to compel me to pay, as had been proposed in my efforts to get him to make a new assignment when I supposed the one of July 10th, 1873, was lost; that the amended bill was proper, and that he had

844 no further claim to make. And I then asked him to deliver to me all the papers and models and engraved or stereotyped plates that he had relating to this invention and patent embraced in the bill in this case. He said he would, and at that time furnished me with part of them. Others he could not readily find at his office, but said that he would look them all up and deliver them to me the next time I came to New York. The engravings I speak of are now in the possession of the printer printing the complainant's case, and one of the models that he gave me at that time is in evidence in this case.

R. D. 82. When did you first see the administrator of W. W. Secombe's estate?

A. Never until the forenoon of to-day, when he came in this room, and was introduced to me by defendant's counsel, now present.

R. D. 83. Have you any reason to believe that he knew of the pendency of this suit before the first of the present month, when it is alleged that he communicated information as to these letters to the defendant's counsel?

A. I have.

R. D. 84. State what those reasons are?

(Objected to as immaterial.)

A. The next time I came to New York after the last time that I saw Mr. Secombe alive, I went to his office to get the papers that he had promised me; on entering the office I met Mr. Secombe's partner in business, saw that Mr. Secombe was not there, and, enquiring after him of his partner, was told that Mr. Secombe had suddenly died four or five days before. I enquired of him if he knew anything about Mr. Secombe's papers, and he told me that Secombe's brother had been there and had taken them all away. I obtained of him the name and address of that brother and wrote him, asking him to send to me those papers,
845 as they were needed for use, and he answered the letter, and this is how I have reasons to believe he knew about it, as I think I mentioned the circumstance of the suit in that letter.

R. D. 85. Has that brother and administrator ever claimed to you, in any way, that the estate of W. W. Secombe was interested in this suit? (Objected to as immaterial.)

A. No, I never heard or dreamed of any such thing until I received motion papers from you a few days ago about the matter that I have been examined here yesterday and to day by Mr. Clarke.

Re-cross by Mr. CLARKE:

R. C. 86. When was the verbal agreement made that you have spoken of between you and Mr. Secombe, to which as you say the statements in these letters about Mr. Secombe continuing under the deed of trust relate?

A. While on my way to Washington, either in the last part of February, or the fore part of March, 1876—I am inclined to think, however, that it was in the fore part of March, 1876.

R. C. 87. Whereabouts?

A. In this city and in Mr. Secombe's office.

R. C. 88. Where was that?

A. It was either in Broadway or else where Mr. Moore, his partner, is now or was carrying on the business of manufacturing Moore's pills; I don't remember the street or number.

R. C. 89. Mr. Secombe's usual place of business at that time, was it?

A. Yes; so far as I know.

R. C. 90. Who was present at the interview with him?

A. No one but Secombe and myself.

846 R. C. 91. I understand you to mean by your explanation, that it was only because of this verbal agreement that you made use of the expressions about Mr. Secombe's continuing under the deed of trust in these letters; is that the way you wish to be understood?

A. Substantially so, because I knew of the reconveyance which had been made July 10, 1873, and I knew that he knew it and understood it; and I suppose that he also understood the verbal agreement of which I have spoken, and that is the reason I used those expressions about the deed of trust in those letters.

R. C. 92. Was not the patent, division B. No. 4144, issued on the 4th of October, 1870, to the Secombe Manufacturing Company of New York, as your assignee by mesne assignments?

A. A certified copy of that patent has already been put in evidence by the complainant, and that will best show the action of the Patent Office in the reissuing the division referred to. I do not think that I made any assignment to the Secombe Manufacturing Company of that division, but that Miss Ingalls did some time in the summer of 1870, or after the application for reissue was made, and before the issuing of either division; and hence it was that division A was reissued to her,

and division B reissued to the Secombe Manufacturing Company, because the Patent Office would not have been apt to have reissued the divisions in the manner in which it did, if she had not, pending the application to reissue, assigned one division to the Secombe Manufacturing Company; otherwise both divisions must have been reissued to her on her application for reissue of that patent in two divisions, each division being for separate and distinct inventions, but embraced in the original patent.

R. C. 93. You say that you did not assign that division to the Secombe Manufacturing Company; did you ever assign any other pat-
847 ent to that company, or to W. W. Secombe, as president thereof?

A. I think I did; some patent about the internal revenue canceling device; I had several such patents, but I have no recollection of any assignment ever having made to Mr. Secombe, as president of that company; there are some applications for patents now before the Patent Office, some of which I think in 1871 I assigned to the Secombe Manufacturing Company, and the patents were never granted, and I have no recollection of making any assignment to anybody of division B inquired about, because the patent of which that was a reissue I had assigned to Miss Ingalls about the 20th of October, 1869, and since then have never had the title to it.

R. C. 94. Did you ever assign either the original patent now in suit, or any of its reissues, to the Secombe Manufacturing Company, or to W. W. Secombe, as president thereof?

A. I never did, to my knowledge.

R. C. 95. You say you had a conversation with Mr. Secombe about this suit in June, 1877; where was that?

A. That was in his office in Moore's Pill Factory that I have spoken of.

R. C. 96. With reference to the settlement that you have spoken of in 1872 or 1873, before the answer in your State court suit was received, was that settlement oral or in writing?

A. It was oral with the exception of the reconveyance of the 10th of July, 1873.

R. C. 97. Was that the time of the settlement, the 10th of July, 1873?

A. That is the day on which the settlement was consummated.

R. C. 98. Where was the settlement made and consummated?

A. The settlement was agreed upon in my room in the hotel I
848 was then stoping at in New York City; the assignment was signed by Mr. Secombe, at No. 7 Park Place, in this city, at his office and place of business.

R. C. 99. Who was present while that settlement was being made?

A. Nobody but Secombe and myself.

R. C. 100. What was done with the suit in the State court?

A. It was discontinued, and I paid my attorneys their costs.

R. C. 101. What deed of trust was ever recorded on the 4th of March, 1871?

A. I know of none; there was one dated on that day; that one was recorded a few days after.

R. C. 102. In your answer to question 77, you speak of a deed of trust of the 4th of March, 1871, as being on record; what did you mean?

A. I mean the deed of assignment made in trust, accompanied by a written declaration of trust; the declaration of trust was never recorded, but it is mentioned and described in the deed of assignment, made in trust by Miss Ingalls to Mr. Secombe, March 4th, 1871.

R. C. 103. Have you any of Mr. Secombe's letters, written in connec-

tion with these that have been put in evidence; I mean letters from Mr. Secombe to you?

A. I have not, but wish I had, for they would confirm every statement I have made on this examination; there were several of them.

R. C. 104. Where are they?

A. They were destroyed by me on reading, such as came to Washington, and those that came to Canaan and Troy.

R. C. 105. At the time of their receipts?

A. I mean the time they were received, or very soon after.

849 Redirect examination:

By Mr. WILLIAMS:

R. D. 106. You may state if I did not write to you, when I received notice of the motion under which this examination is made, to bring any or all letters of Mr. Secombe's you had in your possession for my examination, whether you brought any, and, if you did not, why not.

A. You did write to me such a letter; I brought none to you because they had been destroyed, as I have previously stated, and I so stated to you on your verbal inquiry made to me when we first met at the hotel on Tuesday.

R. D. 107. Did Mr. Secombe furnish you with money while in Washington, in accordance with the request in your letters?

(Objected to as not proper in this examination.)

A. Not a dollar, nor at any other time.

MARCUS P. NORTON.

Sworn to before me October 24th, 1878.

JOHN A. SHIELDS,
Examiner, etc.

Adjourned sine die.

UNITED STATES OF AMERICA,
Southern District of New York, ss:

I, John A. Shields, an examiner in equity, duly appointed, qualified, and sworn in the circuit court of the United States for the southern district of New York, in the second circuit, do hereby certify that
850 the foregoing are the proofs for final hearing taken before me in the cause in the caption named, pursuant to an order made October 22d, 1878.

And I do further certify that I have been attended by Hon. George H. Williams, on the part of the complainant, and by Samuel B. Clarke, esq., on the part of the defendant.

And I do further certify that I am not of counsel nor attorney for either of the parties in the said proofs and caption named, nor in any way interested in the event of the cause named in said caption.

JOHN A. SHIELDS,
Examiner.

851 Circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

SIR: Please to take notice that all defendant's depositions and ex-

hibits, taken and offered in evidence before John A. Shields, esq., examiner; Irving Browne, esq., special examiner; Nelson K. Hopkins, esq., special examiner; J. G. Pomerene, esq., special examiner; Hannibal Forbes, esq., special examiner; C. P. Taft, esq., special examiner, and A. J. Falls, esq., special examiner, have been filed in the office of the clerk of this court.

New York, October 11, 1878.

Yours, etc.,

STEWART L. WOODFORD,
U. S. Att'y for Defendant.

To MARCUS P. NORTON, Esq.,
Solicitor for Compl't.

852 (Endorsed:) U. S. circuit court, southern district of New York. Campbell vs. James. Notice of filing defendant's testimony. Stewart L. Woodford, U. S. att'y, for defendant.

Due and personal service by copy hereof is hereby admitted this 25th day of October, 1878.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

Served October 24, 1878.

Circuit court of the United States for the southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

To STEWART L. WOODFORD, Esq.,
U. S. Att'y and Solicitor for Defendant, New York:

SIR: Please to take notice that each and every deposition
853 taken, as well as the several exhibits offered and filed in this cause from time to time as evidence therein, as well as all proofs herein taken by and before John A. Shields, one of the standing examiners of this court; also by and before Irving Browne, of Troy, N. Y., special examiner duly appointed by the court; also by and before J. G. Pomerene, of Cleveland, Ohio; also by and before A. J. Falls, of Washington, D. C., also special examiner duly appointed by the court, have been by them duly transmitted to the clerk of this court and by him duly filed in this court, and that the same are now on file in said clerk's office.

MARCUS P. NORTON,
Complainant's Solicitor, Troy, N. Y.

Dated October 25th, 1878.

(Endorsed:) In the circuit court of the U. S., southern district of New York. In equity. Christopher C. Campbell vs. Thomas L. James.

Notice of the transmission and filing of complainant's proofs and evidence in this cause to the clerk of this court and by him filed therein.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

Due and personal service by copy hereof is hereby admitted this 25th day of October, 1878.

STEWART L. WOODFORD,
U. S. Att'y, Solicitor for Defendant, New York.

CAMPBELL
vs.
JAMES.

NATIONAL HOTEL (F. TENNEY & CO.),
Washington, D. C., March 25, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: I enclose herewith a bill introduced by a man by the name of Green, from Troy. It will show for itself. I think you had better come on here as early as next Monday night, and we will look after the fellow Green a little.

I want you to bring me a complete copy of your case with Robertson and his frauds. If you can't come send it to me by express at once. I am told in Patent Office that we can now get up that reissue application of the 1862, containing the revolving dates, and then get it into interference with Robertson; if so, we may yet save a little in that direction. I am willing to try it at my own expense. You could then sue Betts & Co., and make them come down for damages, too.

That office are now my friends—Grinnell, Leggett & Co., all frauds, are out, and out in disgrace, and to stay, too.

Yours, in haste,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed Nov. 2, 1878. John I. Davenport, clerk.

855 *Defendant's Exhibit No.* 191.—*October* 23, 1878.—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

NATIONAL HOTEL (F. TENNEY & CO.),
Washington, D. C., March 28, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: Your letter of yesterday's date is received. In answer, let me say that what I wanted from you was one of your printed books of evidence in the case of Robertson vs. Secombe Manufacturing Co. I meant to have said that in my letter. A "printed book" of our proofs in that case I wanted for my own use here at the Patent Office.

I did not ask you to come here about the Robertson case, but to see if something could not be done about my post-office case.

You cannot have forgotten the terms of your deed of trust.

Green is at work for himself. He don't work for or think of any one but "Green." Were he to be let alone in the business he is in, no one but Green would ever get a cent. I look upon him as a villain, a thief, and a most unscrupulous scoundrel, as well as a man void of the truth.

856 Now, let me ask if you approve of the bill I sent you in my last letter to you. I think it quite strange that you are unwilling to push the business along under the deed of trust. I have been trying to find where Eddy and his party stand, but have concluded that they are out, and yet it may be that they are with Green. The bill I

sent you never can pass this or any other Congress—never. It is a fraud, of the dirtiest kind at that; it is a cheat and a vile swindle.

Why can't you come here, now, and see what can be done about the April 14, 1863, patent, mentioned in your deed of trust? Send me the "printed book" of your proofs.

Truly, etc.,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed Nov 2, 1878. John I. Davenport, clerk.

857 *Defendant's Exhibit No.* 192—*October* 23, 1878..—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

Washington, D. C., March 31, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: I received a printed copy of motion papers in your case with Robertson on yesterday, and from you.

They were not what I wrote for or would like to have. I wrote as plain as I could, telling you what I wanted, and as you do not understand me, I will say no more about the same.

I enclose herewith printed copy of a bill which is now before the Committee on Patents in both Houses and having consideration. I hope you will look it over carefully and say what you think about it. It has the approval of the Secretary of War; also, of General Butler, my counsel, who is here.

I have spent two weeks' time on this matter, and gotten it where it now is. This is why I wrote you to come on here. Now, if you are wishing to continue under the deed of trust, you must help in this matter. Some expense money is wanted, and that too, now. Had
858 you come here, I would have convinced you that this bill can be passed. Senator Ingalls has introduced the same bill in the Senate, and that committee has acted. The House committee are now at work on it. Write me about it and just what you are willing to do.

In haste, etc.,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed November 2, 1878. John I. Davenport, clerk.

859 *Defendant's Exhibit No.* 193.—*October* 23, 1878.—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

NATIONAL HOTEL (F. TENNEY & Co.),
Washington, D. C., May 3, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: I enclose to you herewith executive document No. 158, 44th Congress, first session.

It contains the bill which has been agreed upon, and which I have marked in blue pencil along the margin thereof.

You will find also official communications from War Department; also letter from Chief of Ordinance, fully and without reserve approving the bill; also, letter of Secretary of War with recommendations.

I hope you will examine this bill carefully. I am sure that you will find that it covers the entire ground, and that it is just the thing it purports to be.

Now this bill has been considered by both committees of the Senate and of the House. I think it can be passed.

I have been here for six weeks and over on my own expense,
860 and now, if you intend to go any further with the deed of trust, it will be necessary for you to furnish some money at once to pay necessary expenses. We need no money for any other purpose, but actual and necessary expenses must be paid. Therefore I ask you for money for that purpose in the passage of this bill.

If you do not intend to go any further on your deed of trust with me in patent of April 14, 1863, then, of course, I will have to pay my own expenses.

I expected to have heard from you a long time ago on this matter of expenses.

I wrote you requesting you to send me a copy of the printed evidence in your Robertson stamp case. You don't send it to me. It is a book of two or three hundred pages, and was printed by some one in Fulton street, who did it for one dollar per page. It takes in all the evidence. You cannot have forgotten it.

You remember that some 100 pages of it was printed at Troy and the rest in New York.

Write me at once about this expense matter.

In haste,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed November 2, 1878. John I. Davenport, clerk.

861 *Defendant's Exhibit No.* 194.—*October* 23, 1878.—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

NATIONAL HOTEL,
Washington, D. C., August 7th, 1876.

WM. M. SECOMBE, Esq.

DEAR SIR: Some time ago you wrote me something what Barnard had told you. Well, I did not reply to that letter at the time because I wanted to wait and get some permanent action on the bill and then write you. I now send enclosed herewith the original bill first prepared by me, and the amendment to the same; also the "Committee on Patents Report" of Senate on the bill. This amendment is the same as the House bill No. 3743, which I sent you over a month ago, and which the House Committee of Patents have agreed upon, but not yet reported it because they are awaiting the regular call of the committees so as to report it. Now, Mr. Secombe, there is not one shadow of doubt about this bill passing Congress and becoming a law; it may not pass the House at this session, and yet it may; all will depend on the time of

adjournment, which is not yet fixed upon. If it does not pass this session it will early in December next. It will not hinder any in the
862 getting of the case ready, as it will require full two months' time to get the bill and necessary papers ready to commence a suit under this new law, as shown in and by the enclosed bill. Then it can be filed in the Court of Claims here, and the case be tried at next term of court—next winter, and that is all we can do were the bill a law at this very moment. So, as it now stands, we lose nothing, even if the bill does not pass the House until next December.

Now, about Barnard; he is wholly and entirely mistaken about Green. I told Barnard no such thing as you have written me. He did ask me about Green. I told him he was here. He then said: "How are you getting with him?" I said, "Well enough;" and there the conversation ended. I did not even tell Barnard what I was doing here, only that I was trying to get along with the matter which I thought would suit all, and that there would be no more trouble about the stamp. I saw him not over ten minutes, and Mr. Merchant was present, and Green stood in the hall.

Now, Secombe, not one dollar has been paid me by any person in Troy to help me in my expenses here, nor will they pay a cent.

Since you wrote me I have written Eddy and Shavor about money, and they refuse to send a dollar. You can see their letters if you wish. I have paid my own expenses—every cent—here this time; done all the work in my own way, too, and gotten a good bill so near passed, in which money can be had on the stamp in greater amounts than in any other way on this earth, and I have not had one cent from you, not one from Eddy, or Corse, or Ransford, or Shavor, or Green, or any one who ever claimed in the stamp.

Green had a bill in when I came; it was killed by my bill, which I send you.

Now, Secombe, as an honest man, and I most certainly hold you to be thoroughly honest, in all your ways and business, let me ask you
863 if you think this is right towards me. I am in want of $250 now, and that will carry me through this session, and is it right that I should do all this work—get a good law, and then have some one else come in and try to get away from me cash results? When I last saw you I understood from you that you would, with me, bear one-half of the expenses, and so thinking I came on here and have done as I have. You have been fully advised of it from time to time about it.

I would like you to give me prompt answer to this letter, for if you still refuse to share, at least in these expenses, then I must at once make other arrangements, as Congress will adjourn in a few days.

Truly yours,

MARCUS P. NORTON.

(Endorsed:) Defendant's Exhibit No. 194. J. A. S., ex'r. U. S. circuit court. Filed Nov. 2, 1878. John I. Davenport, clerk.

864 *Defendant's Exhibit No.* 195.—*Oct.* 23, 1878.—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

NATIONAL HOTEL,
Washington, D. C., August 9, 1876.

WILLIAM W. SECOMBE:

MY DEAR SIR: Your letter of the 8th came to-day. I am really sorry

that you, a man of brains, cannot tell what the bill is that I have sent you, etc. It is just the bill wanted for my post-office case, and everybody here understands it and calls it O. K. Do you refuse to furnish me any money in this matter or upon the P. O. stamp case? I desire to know definitely, and at once, because I will look elsewhere among my friends just as soon as you throw up the sponge, as you now seem to have done. I intend to put myself right, so that you, nor the court, nor anybody else, can find fault with me in any way, shape, or manner. I have already paid out $550 cash since I came here. I want $250 or $300 more to settle up, and so called on you as I called on Eddy, so that I might know just precisely where you all stand. I called on Shavor, too. I have his and Eddy's flat and positive refusal, and I will not further consider them as having to do with my stamp or any of my
865 business. I was in hopes that there would be no more controversy over this case and claim. I hope that you will look on this whole matter as it is, and then you will have no one to find fault with but yourself; certainly not with me.

I want the money, and if you will not furnish it, and do as you agreed to do, very well. Of course no one can prevent your entire abandonment of the case and claim.

I will soon pass through New York, on my way home, but there will be no use in seeing you under the circumstances attending this matter.

I have been here now five months—spent my time and cash, as I have before stated, and it will not have been all in vain.

I send you Eddy's letter of refusal, and will Shavor's, if you want to see it. Please send back Eddy's letter to me here, as I will be here until Congress adjourns.

Truly yours,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed Nov. 2, 1878. John I. Davenport, clerk.

866 *Defendant's Exhibit No.* 196.—*Oct.* 24, 1878.—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

NATIONAL HOTEL,
Washington, D. C, August 11th, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: In your letter you say you do not understand the bill I sent you. If you will carefully read the report accompanying it, I think that that will aid you about it; if not, then take it to your lawyer, Mr. Smith, and he will give you full explanation of it. I cannot do it in a mere letter. I will say this to you, and in the living truth, too, that it is just such a bill as we want for the patent of April 14, 1863, and all its reissues. I am convinced that you will be very much pleased with it and more than that when you do understand it.

I wish now to say that you cannot in any way, in my opinion, restore your losses and more, than to take hold and help me about this bill. I have gone along with expenses without saying much to you about the same until recently, because I knew that you had had losses, and was hard at work to right them up, and having had some such experience, I let you alone until now, and now I do think you ought to help

867 me under the deed of trust you now hold, and now in force, and will be so long as you fulfill its provisions; and I believe you will do that or surrender it, because I put you down as an honest man in every sense of the word. Besides this, I will say to you that some five or six persons, who have such kind of claims as ours against the government, have already been to me to have me prosecute them under this bill as soon as it becomes a law, and take an interest in the same, which I will do at the proper time. Now, if you want to come in there, and will aid in expenses, you can do so and make money. There is money in these cases under that bill, and no mistake. Please read the Executive Documents No. 158, 167, 168, 169, and 176, I sent you with the bill, and you will learn all the facts from the same.

This bill is one under which any patent claim against the government can be brought; it is known as a general bill—as a public measure—and is right in all its provisions.

We can sue the postmaster and get an injunction if we wish, for that has now been determined in a suit against War Department officers since I saw you.

This bill is in fact just the kind of bill that we talked over when I saw you last in New York. There is one clause in it, to save the 1863 patent from all the frauds who have tried to get it, I will not write about, but show it to you in person on my way home next week, when I will call and see you as you have requested.

Now, Mr. Secombe, in order that Troy men might not have cause to complain, I called on them about expenses, and they all refused, and now they cannot complain when it comes my time to refuse. There has not been any kind of change with them since you and I talked it all over. I want to do with you just as we agreed, and I hope you still will keep your part of that arrangement.

868 The Troy men can bring suit under their patent in this same bill, but the department will prove that the government never used one of their 1859 stamps, and they will take that course, so I am told, and so the 1863 will prevail.

Now it is for you to say; I have told you the amount of pressing want of money here, so as to square up and get away about the middle of next week. We may get the bill passed by then—the House.

Truly yours,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed November 2, 1878. John I. Davenport, clerk.

869 *Defendant's Exhibit No.* 196.—*Oct.* 24, 1878.—*J. A. S., ex'r.*

CAMPBELL *vs.* JAMES.

CANAAN FOUR CORNERS, COLUMBIA CO., N. Y., *September* 23, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: Are you in condition to furnish funds to carry forward the settlement with the government for the use of my invention in "postmarking and postage canceling hand stamps," patented April 14th, 1863, and afterwards reissued, and now in general use in the postal service of this government, and in accordance to and with the deed of trust

by which you came possessed of title, etc? If not, will you make the title back to Miss Ingalls, and be repaid whatever money you have advanced on the same in efforts to get a settlement with the government? I find that I cannot spend any more money on my own account, because I have it not. It will require money to complete the passage of the bill, and get the case in court so as to get proper pay. I am willing to do the work, but I cannot do the work and pay all the expenses as I did for 5½ months in last session of Congress.

870 Not a cent will come from Troy 1859 men. They furnish money to Green, but nothing to me. They may get 1859 patent into court, only to find the government will prove that it has never been used in the postal service, while 1863 has for 13 years been in use, and that something ought to be paid for the same.

Now if you cannot aid in cash, but will let the title become easy, I can make arrangements for all the money required to put it through, as I have just ascertained.

Work ought to be done at once, so as to get matters ready for Congress and for the court of claims. There is not time to delay. If you can furnish the money, I would prefer to have it as it now is; but if you cannot, then the next best thing ought to be done.

I want to act fairly with you, and have no sort of doubt but that you will do the same by me.

It is for you to say. If you do not do one of the two, I see no other way than to give it up entirely, because I cannot raise any more ready money for it, as I have been trying that ever since I saw you last. Write me just what you can and will do in the matter.

Write me here. I thank you for your kindness as to the overcoat, etc.

Truly yours,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed Nov. 2, 1878. John I. Davenport, clerk.

CAMPBELL
vs.
JAMES.

CANAAN FOUR CORNERS, COLUMBIA CO., N. Y.,
October 30, 1876.

WM. W. SECOMBE, Esq.:

DEAR SIR: Your letter of October 4th instant came duly at hand. Since then I have been trying to see if matters could not be arranged with those Troy Green people, and came from there on Saturday last. We could not make any sort of arrangement with the Green party; but I mean to give them a trial on the patent of 1863. As you cannot furnish any of the expenses required, and as I will have to go into a fight with Green & Co., I have thought you would reconvey the patent, etc., upon the terms mentioned in the paper I enclose herewith, which is to pay to you all you have paid out, with interest thereon. This paper will secure that to you, or else Miss Ingalls gets no title. Please show it to your attorney, and see if I am not right about it.

If you will sign it, I will have it put on record in Patent Office at once, and furnish you a certified copy of the same so recorded.

872 This saves to you all that you ask in your letter of the 4th in-

stant. I am not able to pay any cash down, but can make a fight on Green & Co. Please carefully examine it; and if correct, sign and return it to me here.

Truly yours,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed November 2, 1878. John I. Davenport, clerk.

873 *Defendant's Exhibit No.* 199.—*Oct.* 24, 1878.—*J. A. S., Ex'r.*

CAMPBELL
vs.
JAMES

Whereas, Marcus P. Norton, of the city of Troy, in the county of Rensselaer and State of New York, did obtain the letters patent of the United States of America, for and upon improvements in "post-office, postmarking, and canceling hand stamp," which letters patent were issued and delivered, bearing date the 14th day of April, 1863, and numbered 38175, which letters patent prior to the first day of January, 1870, were twice reissued under and bearing date as follows, to wit: August 23, 1864, and August 3, 1869, and which were subsequently reissued in two divisions, to wit: "division A" and "division B"; and

Whereas, the invention and improvements contained in the said letters patent and the several reissues thereof have been in general and continuous use in the postal service of said United States since on or about the first day of March, 1863, by the order and direction of the Postmaster-General; and

Whereas, Helen M. Ingalls, of the said city of Troy, county of Rensselaer and State of New York, did on or about the 20th day of October, 1869, by deed of assignment of that date, recorded in the U. S. Patent Office on the first day of August, 1870, in liber B 13, page 351, of transfers of patents, purchased of and from the said Marcus P. Norton,
874 the said letters patent and the invention and improvement therein contained, and as described and claimed in the said letters patent and in the several reissues thereof, to which deed of assignment reference is now and hereby had for a more full and perfect description of the letters patent and invention herein and hereby sold, assigned, and transferred; and

Whereas, the said Helen M. Ingalls, thereafter, to wit, on or about the 4th day of March, 1871, did, by a certain instrument in writing, together with a written deed in trust, assign and transfer to William W. Secombe, of the city, county, and State of New York, the said letters patent, invention, and reissues, to which assignment and deed in trust reference is now and hereby had for a better and more full understanding of the letters patent, reissues, and invention herein and hereby sold, assigned, and transferred in the manner herein set forth; and whereas the said Helen M. Ingalls, is desirious that the said assignment and deed of trust last above mentioned should be canceled, and that all the right, title, and interest obtained by me so as aforesaid in, to, or for the said letters patent, invention, improvements, and in or by the several reissues of the same; also any and every claim for the past use of each and every thereof, should be reassigned and re-transferred to her for her own use, benefit, and behoof, and for the use, benefit, and behoof of her legal representatives.

Now, therefore, this indenture and deed of assignment witnesseth, that for and in consideration of the sum of one dollar, to me the said Helen M. Ingalls in hand paid, the receipt of which is now and hereby acknowledged, and in the further and other valuable considerations, the receipt of which is hereby duly acknowledged, I, the said William W. Secombe, have sold, assigned, and transferred, and I do now and hereby sell, assign, and transfer, unto the said Helen M. Ingalls,
875 her heirs, assigns and lawful representatives, all the right, title, and interests, which I obtained and received so as aforesaid in the said invention, improvements, letters patent, and the several reissues thereof; and I also sell, assign, convey, and transfer unto the said Helen M. Ingalls, her heirs, assigns, and lawful representatives, any and every right, claim, or interest I have, or ever had against the Post-Office Department, government, or United States of America, for the past use of the said improvements, invention, letters patent, or any reissue thereof, intending herein and hereby to sell, assign, transfer and convey unto the said Helen M. Ingalls and her lawful representatives all the right, title, interest or claim which I now have, and which I obtained from her so as aforesaid, for the past and future use of the said invention, improvements, and letters patent, or any reissue of the same in the postal service of the United States aforesaid, by the Post-Office Department; and also the entire invention, improvements, letters patent, and all and every reissue of the same, herein and hereby selling and conveying unto her, the said Helen M. Ingalls, her heirs, assigns, and lawful representatives, all and every right, title, claim, interest, or privilege which I now have or ever had by reason of the said assignment and deed of trust, by and between herself and myself, made and executed so as aforesaid or otherwise obtained in any way, manner or form, from or by reason of the said letters patent or any reissue thereof; and the said deed of assignment in trust in the manner hereinbefore stated, to have, to hold, and to enjoy the same, and each and every thereof, to the full end of the term of seventeen years, for which the said letters patent were granted, on and commencing the 14th day of April, 1863, and in the same way and manner that she would have held and enjoyed the same had she never made to me the said deed of assignment in
876 trust; with full right, power and authority to settle, adjust, and to enforce a settlement by suit or otherwise, for the past use of the said invention and letters patent, or of any infringement thereof or of any reissue of the same.

This sale, assignment, transfer, and reconveyance of the said letters patent, reissues, inventions, and claims, in the manner as aforesaid, is upon the express condition and agreement that the said Helen M. Ingalls shall pay, or cause to be paid, out of the first money received from the United States aforesaid, to the said William W. Secombe, the full sum of money expended by him in and about the said invention and letters patent, or any reissue thereof, in effort to make settlement with said United States, or that he may have paid to said Marcus P. Norton, for or on account of the same, prior to the said assignment in trust from the said Helen M. Ingalls, together with lawful interest thereon from the date of such expenditures to the date of the repayment of the same with interest thereon by the said Helen M. Ingalls; and the same shall be paid to said Secombe in the manner aforesaid, from the first money received from the United States, for the use in the postal service of said invention, letters patent, and reissues. If not so paid by said Helen M. Ingalls, or by some one for her as aforesaid, then this in-

strument and deed of assignment and of reconveyance shall be null and absolutely void, and of no validity or effect whatever.

In testimony hereof, I have on this day of November, 1876, hereunto set my hand and seal in presence of—

[SEAL.]

CITY, COUNTY, AND STATE OF NEW YORK, *ss:*

On this day of November, A. D. 1876, personally came William W. Secombe, of the said city, county, and State, who to me is known
877 to be the person mentioned in the foregoing instrument, and who executed the same, and he duly acknowledged to me that he executed the same in the manner and for the purpose therein mentioned and set forth.

(Endorsed:) U. S. circuit court. Filed Nov. 2, 1878. John I. Davenport, clerk.

CAMPBELL
vs.
JAMES.

CANAAN FOUR CORNERS, N. Y.,
Oct. 30th, 1876.

WM. W. SECOMBE, ESQ.:

DEAR SIR: I wrote you to-day and enclosed therein a proposed assignment of the 1863 back to Miss Ingalls. The conditions of the retransfer are such that if she shall fail to pay or cause to be paid to you the money you have paid out on account of the invention and patent, then no reconveyance takes place; or, in other words, before she gets a perfect title she must pay that money with lawful interest up to the time she pays it; otherwise you would hold whatever your rights may be before you sign the paper. Unless you sign the same, it will be impossible for me to move further in the matter, for the want of necessary money, and I will have to give the matter up, and then of course those Troy men will push in the 1859 patent and make a point for themselves, and you and I will go out. But if you sign it and return it to me I can raise the necessary money and can get something out of it, and we can repay you your money with interest out of any settlement or judgment we may have in Court of Claims. If I can have money I can still defeat Mr. Green and Co. He is now worse than ever, and
879 says he don't care a d——n for 1863 patent, but does for 1859. Well, it is just the reverse with me. He will make no move unless it is all for Green. If the assignment paper sent to-day suits you, sign it, have it witnessed and acknowledged before a notary public, and then I will have it put on record, and send you a Patent Office certified copy.

I write this more full because I did not have time for morning's mail. This will go in the evening mail.

I see that Miss Grace Bell is married, etc.

Truly, yours,

MARCUS P. NORTON.

(Endorsed:) U. S. circuit court. Filed November 2, 1878. John I. Davenport, clerk.

880 *Defendant's Exhibit No.* 201.—*October* 24, 1878.—*J. A. S., ex'r.*

CAMPBELL
vs.
JAMES.

CANAAN FOUR CORNERS, COLUMBIA CO., N. Y.
February 6th, 1877.

WILLIAM W. SECOMBE, Esq.,
155 *Broadway, New York:*

DEAR SIR: I have thought it best to write you again about signing the paper which I sent to you about four months ago. I wrote you once to ask you what alterations you wanted in it, but as you did not answer my letter, I think you did not get it.

I have not been to Washington this session, because I have not had the money to go with. No one has been from Troy on the Green side. Shavor has failed in business, is worth nothing, and no one there can raise money for Green, so Shavor told me on Friday last. There are about twenty days more of this session remaining. Of course, the bill I sent you last summer from Washington will not be passed, for there is no one there to see to it, and remains just where I left it last August, having been once reached on the calendar and passed over. I
881 do not now expect anything from that source, but I have been thinking that were you to sign that paper and return it to me here, I would commence a suit against the postmaster in Troy, when I could test the whole ground, and get a decision on all the questions that would come up, and then if I could get anything out of it, I would pay you back some of your money you have put in, etc.

This I could do, because by doing the work myself it would not be very expensive; and then, should I succeed, I could get something out of it. I would like to make this effort, for the time is most gone for which the patent was granted—there are only two or three years more.

You have had it in your hands more than six years. It is six years and four months, and you have never succeeded in doing anything with it, and, as I understand you, you have no means to do anything with, and will not advance any cash in that business. I only know this from your letters to me, and from your conversation with me last August.

I am sorry that things have taken such a turn this session about the bill, but the real disposition is to "fuss away" on the presidential matter until the whole session is gone, and then no legislation will be done.

Had I had the means to have gone on to Washington on the first of the session, and remain there during the session, I might have done something with the bill. It is now too late unless I could go now, but I have not the means to go with. I wish you would write me here, and let me know your exact position in this matter, and just what you are willing to do. Should you sign the paper I sent you sometime ago, I think I could get your money for you out of it, after a while. Write me here.

Truly, yours,

MARCUS P. NORTON.

882 (Endorsed:) U. S. circuit court. Filed Oct. 22, 1878. John I. Davenport, clerk.

883 Circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

SIR: Please to take notice that the testimony taken herein before John A. Shields, esq., examiner, on the further cross-examination of complainant's witness Marcus P. Norton, pursuant to the order of court dated October 22, 1878, together with the Exhibits offered in evidence in connection with said testimony, has been filed in the office of the clerk of this court.

Yours, etc.,

STEWART L. WOODFORD, Esq.,
U. S. Attorney, for Defendant.

NEW YORK, *Dec.* 10, 1878.

To MARCUS P. NORTON, Esq.,
Complainant's Solicitor.

884 (Endorsed:) U. S. circuit court, southern district of New York. Christopher C. Campbell vs. Thomas L. James. Notice of filing testimony on further cross-examination. Stewart L. Woodford, U. S. att'y for defendant.

Service of notice, of which within is copy, admitted.
New York, Dec. 11, 1878.

MARCUS P. NORTON,
Complainant's Solicitor.

885 COMPLAINANT'S EXHIBIT EVIDENCE.

Complainant's Exhibit C.—J. A. S., Ex'r.

The United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office.

In testimony whereof, I, A. M. Stout, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed, this eleventh day of March, in the year of our Lord one thousand eight hundred and sixty-eight and of the Independence of the United States the ninety-second.

[SEAL.]

A. M. STOUT,
Acting Commissioner.

T. C. A., WEST POULTNEY, VT.

To the Commissioner of Patents:

SIR: I send enclosed a caveat which I wish entered on file, also a 20-dollar gold piece, for which you will no doubt send me a receipt.

I shall take up my brake for a rehearing soon, for I think it ought to have been laid before the office in a different light than it was. I wish you to send me the papers belonging to the brake if you can, and I will return them to their files.

Respectfully, yours,

MARCUS P. NORTON.

886 To the Commissioner of Patents:

The petition of Marcus P. Norton, of Troy Conference Academy, West Poultney, and county of Rutland, and State of Vermont, respectfully represents:

That he has invented a certain machine for mailing and folding letters in the outside wrapper with their way bills, and that he is now engaged in making experiments for the purpose of perfecting the same, preparatory to his applying for letters patent therefor. He therefore prays that the subjoined description of his invention may be filed as a caveat in the confidential archives of the Patent Office, agreeably to the provisions of the act of Congress in that case made and provided; he having paid twenty dollars into the treasury of the United States, and otherwise complied with the requirements of said act.

MARCUS P. NORTON.

TROY CONFERENCE ACADEMY,
WEST POULTNEY, VT.,
October 13, 1853.

Subjoined Descriptions.

My post-office stamp and way-bill folding machine is so constructed as to print the name of the town, State, month and day thereof, also the name of the postmaster, paid 3 cents, and unpaid 5 cents upon the letter, and to fold the same together with its way-bill, in an outside envelope. Said envelope and way-bill are made together, and in the form and manner as shown by a plan which I send enclosed.

That part of the machine which stamps the letter consists of a shaft, upon which is placed two arms, crossing each other at right angles, which contains the type in the form as shown upon the way-bill.

887 Upon the same shaft are two cams, one at or near each end of the same, which are used to move the continuous or sliding platform (upon which the letter is moved under the type) down so as to let it receive an impression from the type. The platform upon which the letter passes under the type is continuous, or to slide under and back as I may deem best upon experimenting. The platform belt is to be moved with the same speed of the type cylinder, by means of a band or its equivalent. The platform plays up and down by means of spiral springs around the guides of said platform, which are four in number. The belt or band is tightened at pleasure by means of movable boxes and screws. The type are to be inked by means of ink-rollers—two in number—placed in such a manner, by means of movable boxes and screws, so as to roll over the face of the type as they pass around. In order to change the motion of the platform belt or slide, two small gears are used—one on the cam and type shaft, the other on the crank shaft. The frame for the entire work is to be made in any form to suit the eye of the mechanic. A pulley is fastened to one of the cams for the purpose of moving the continuous belt or slide and the ink-rollers. That part for folding the letter with its way-bill in the outside envelope consists of a small table placed at one end of the stamping part, upon legs; a hole is made through the centre of this table large enough to receive any size letter; around this is made a box containing four folders, which turn upon hinges by means of levers, two of which move at a time only, which fold one-half of the envelope, after which the other two move and fold the remaining half, then the bottom of the aforesaid box opens and lets the letter drop out folded in its way bill envelope ready for transportation. The folders are worked by means of

levers fastened to them, at the end of which a cord is fastened which passes up through the table over pulleys, down through the
888 table, and are fastened to pedals; at the other end of the levers are fastened cords for the purpose of opening the folders when closed. Those cords for opening the folders are worked by means of weights or springs. Having thus described my machine, I will now state its object, and its object is—

1st. To facilitate mailing and wrapping up letters with their way-bills, and

2d. To save the expense of paper for wrapping purposes, lessening the cost about one-half and saving all of the paper as now required for way-bills.

3d. To lessen the number of laborers as now required in large post-offices.

T. C. A., WEST POULTNEY, VT.,
October 25, 1853.

HON. CHAS. MASON,
Commissioner of Patents,

SIR: I send enclosed an oath of my improvement in mailing and enveloping letters, etc., as described in my caveat. I consulted the patent laws for an oath to accompany a caveat, but did not find one; but one for an application for a patent. Pardon me, sir, for the mistake. I am anxiously waiting to hear from those papers, drawings and model for my improvement in R. R. car brakes, as rejected, etc.

Most respectfully, your obedient servant,

MARCUS P. NORTON.

HON. C. MASON,
Commissioner of Patents.

889 TROY CONFERENCE ACADEMY, WEST POULTNEY, VT.,
October 27, 1855.

To the Commissioner of Patents:

SIR: I send enclosed a plan for my type for letter stamp and way-bill folder, which should have gone with the caveat which I sent you yesterday, but was left out through a mistake and not noticed until too late for the mail.

Most respectfully, yours,

MARCUS P. NORTON.

Troy Conference Academy, West Poultney, and county of Rutland and State of Vermont, ss:

On this twenty-fifth day of October, one thousand eight hundred and fifty-three, before the subscribed, a justice of the peace, personally appeared the within named Marcus P. Norton, and made solemn oath that he verily believes himself to be the first and original inventor of the improvements described in his caveat for mailing and enveloping letters, together with their way-bills, in an outside envelope; and that he does not know or believe the same was ever before known or used; and that he is a citizen of the United States.

Before me.

J. B. BEAMAN,
Justice of the Peace.

(Endorsed:) Received and filed October 27, 1853. S. T. Shugert.

890 Know all men by these presents that I, Marcus P. Norton, of Tinmouth, in the county of Rutland, hereby constitute and appoint Silas H. Hodges, of said Rutland, for me and in my name and behalf to prosecute and attend to my application for a patent for a post-office letter stamp and way-bill folding machine, and I hereby request the commissioner of patents to correspond with him respecting the same, and also respecting my caveat, filed for the above improvements for me.

MARCUS P. NORTON.

RUTLAND, VT., *March* 11, 1854.

(Endorsed:) M. P. Norton's power of attorney to S. H. Hodges. Received and filed March 14, 1854,—A. B. L.

TINMOUTH, VT., *August* 7, 1854.

Commissioner of Patents:

SIR: I send to-day an additional description of my machine for mailing and folding letters, etc.

When will my caveat expire? The copy you sent me has no date. I wish to petition for a patent before the caveat shall expire. Please communicate the answer to Mr. Hodges. If I trespass your rules, etc.

Respectfully, your obedient servant,

MARCUS P. NORTON.

891 To the Commissioner of Patents:

SIR: I wish the following to be added to my subjoined description for mailing and folding letters, for which I have a caveat in your office.

In the mailing of letters I have provided means for post marking of letters, newspapers and the like, and for the cancellation of the postage-stamps thereon, at one and the same blow or operation of the instrument or machine by which the post-mark is had or made upon the letter, envelope, or wrapper, or package, in a plain and intelligible manner, and thereby always retaining the same, while the postage-stamp or stamps are more effectually and permanently canceled, so as to prevent frauds upon the revenue derived from the sale and use of such stamps.

The said device is arranged upon the type cylinder contained in first paper filed in my said caveat, between the-way bill form of type, and it gives the impression in ink upon the letter, envelope, or packet, by means of the revolving cylinder, and at the same time and operation it also gives a heavy impression in ink upon the postage-stamp when or where used upon the said letter or envelope, and the postage-stamp becomes thoroughly impregnated with ink by the means herein provided, and therefore it cannot be cleansed by chemical washing, or by other means, so as to allow of the same being used a second time, and thus frauds are prevented. If there should be no stamp used for payment of postage on letters, packets, etc., this device would do no sort of harm to the letter, envelope, etc., for it could only post-mark the same with the name of the town and date, such as month, day of month and year, and upon one side thereof at same time give a heavy impression in ink, which would appear was only intended for cancellation of the postage-stamp as aforesaid stated. This would make a plain
892 and more intelligible post-mark than by the old method now in use, while it would at same time, blow, and operation of the instrument, cancel in ink the postage-stamp or stamps, when such are

used, as aforesaid, in a most thorough, perfect, and permanent manner, so that the same could not be cleansed for the purpose of being used a second time. This part of my invention I construct of the ordinary form of type now used in the post-offices for the post-marking of letters with the name of the town, month, day of the month, and the year, etc., and I combine therewith in some good, practical, and suitable manner, a device which I denominate a postage-stamp conceling type, to be used in or with any kind of ink suitable for that purpose, and by such combined instruments one device is formed, which will give the name of post-office, month, day of the month, and year, and at same time and blow cancel and thus destroy the postage-stamp, thereby greatly economizing in the time now required in the making up of the mail, in fact, saving one-half of the labor required for post-marking, and for canceling of postage-stamps when it is desirable to give the impression of name of the town and date upon the envelope, letter, or packet, in order to preserve the same for any purpose of proofs or other thing. I now think that the best way to make this part of my invention is to use a cross-bar or cross-piece upon the periphery of the cylinder set forth in other papers in my caveat, and fasten in some suitable manner the post-marking stamp upon one end thereof, and the postage canceling type or device upon the other end of said bar or cross-piece, which would of course give dating stamp at one end and canceling stamp at the other end therof. This bar, thus constructed with said type arranged thereon as aforesaid, is securely fastened to the periphery of said cylinder in some suitable manner. The canceling type or stamp may be made of iron, steel, wood, rubber, cork, or of any other suitable
893 material, and the same may be combined with said cross-bar by the drilling of a suitable hole therein, or by a tube to receive the same, and said tube being suitably fastened to said cross-bar, or the same may be fastened directly upon and to the said cross-bar at any required distance from said dating part or dating type. A screw may pass through said cross-bar into the material used for the canceling type, and thus hold it firmly thereto, or a suitable tube may first be fastened to said cross-bar, and then the canceling material or part used for the canceling type may be inserted therein and thereon, and thereby held until worn out by use, when the same may be replaced. Rubber or cork, I think, will make the best and most suitable canceling type or device, while soft wood, used endwise, will make a most excellent canceling type. If it should be found impracticable to use the said cylinder and other parts of said machine as contemplated in the caveat papers now on file, then the said cross-piece or bar may be removed from the said type cylinder by means of loosening the screws by which it is fastened thereto, and a suitable handle affixed thereto in place of such cylinder, and the same then used as a hand stamping device for post-marking and for canceling postage-stamps. The said cross-bar may be removed from said cylinder in order to reset the type for the date to be given, or for the purpose of removing and replacing the said canceling type or stamp, and then the same may be replaced upon said cylinder as aforesaid. By means of this device I get a good and more perfect impression upon the letter, envelope or packet, of the name of the town, day of the month, month, ect., and at the same time and operation cancel the postage stamp or stamps in ink, in a most complete, thorough, and perfect manner. When cork is used it contains a greater quantity of the ink used, and being somewhat elastic, and somewhat rough upon the face containing the ink, it will to a considerable
894 extent break the enameled surface of the postage-stamp, formed

as such by means of the indelible ink used in the manufacture of such stamp so as to form a hard surface, in order that the stamp might not become defaced by transportation to places of sale, while on sale, or while being carried in a person's pocket ready for use, and having broken somewhat such surface of such postage-stamp by the blow of the cork upon the same, the ink impregnates in a most thorough manner the whole postage-stamp, and of course it cannot be removed without destroying the printed surface of such postage-stamp, and so defacing it that such efforts at reuse of it would be at once detected. Soft wood used endwise will have nearly the same effect; so, therefore, some soft and porous material will be most suitable to use in the construction of said canceling type or device used for the cancellation of all postage-stamps.

The cam-frame which draws the letter under said type cylinder for post-marking of letters, packets, etc., and for the cancellation of postage-stamps thereon, will give the blow against the said post-marking and postage-canceling device, which is done at one operation and at the same time, and when thrown out of gear, then the way-bill printing part may be worked and thus print the way-bills as I have described in former papers on file in my said caveat. I would prefer the use of an indelible ink with my said device or instrument, or machine, if the same could be had by all the postmasters who use the said machine, etc.

This part of said machine may easily and readily be converted into a hand stamp when and where no other part of said machine would be used, save and except the post-marker containing the name of the town where used, the month, and day of the month, and year, etc., and the postage stamp cancelor, or canceling device attached to and combined with the said cross-bar or cross-piece substantially as aforesaid, with a suitable handle at the centre of said
895 cross-bar or piece, or at some suitable place between the two stamping devices aforesaid, which handle is used for the giving of the blow or impression of the two devices attached to said cross-bar as aforesaid, and of course it would then be a simple device of post-marking stamp, of cross-bar, and cork, rubber, or wood (or other suitable material) postage-stamp canceling device thus combined into one instrument, and operated by the handle with one blow, and to be used in or with any kind of ink desired. One blow of the instrument in the hand of the operator will do the printing of the name of the town, of the month, of the day of the month, upon the letter or envelove, and the cancellation of the postage stamp in a most complete and effectual manner substantially as aforesaid—thereby saving great labor, and the rehandling over of the letters in order to postmark them, and afterwards to cancel the postage-stamps when it is desired to have an intelligible postmark preserved on the letter or envelope, and to have the postage-stamp permanently canceled so as to prevent frauds by the reuse of the same, as is often now the case. This instrument will therefore prevent such frauds, and very much simplify and economize in the time for the making up of the mails for transportation. This will be the effect and result if no other part of said machine be used, save the said parts converted into a simple hand stamp as aforesaid, to wit, the postmarking part, the postage-stamp canceling part, all attached to the said cross-bar and combined therewith as and in the manner aforesaid.

If the entire machine set forth in all the caveat papers be used, there will be great saving of labor and time in mailing of letters, and a large quantity of paper, twine, and sealing wax, etc., by the use set forth in all the papers of this caveat. There would be also great labor

saved as aforesaid, by the use of such hand stamp combined as aforesaid. I am having a full size machine made according to my
896 caveat papers, which, when done, I shall apply for a patent; or, at least, as soon hereafter as I may be able to get the Post Office Department to consider and adopt for use in the various post-offices my said improvements, or some parts thereof, preferring to submit the same to the judgment of that department before applying for my patent upon the invention herein contained. I desire you to file this with myother appers in my said caveat. I intend to renew my caveat, if such be at all necessary, in order to protect my rights while engaged in efforts with the Post Office Department for the general use of my invention, and especially that part which relates to the hand stamp form of postmarking and postage-stamp canceling, combined with and upon a cross-bar or piece, containing a suitable handle substantially as aforesaid, so as to give both impressions at one blow and operation of the instrument, as aforesaid, thereby saving great labor, and preventing frauds, etc.

MARCUS P. NORTON.

(Endorsd:) Certified copy of caveat filed in U. S. Patent Office in 1853, upon improvements in post-office stamps, and in mailing and enveloping letters, by Marcus P. Norton.

898 *Complainant's Exhibit D.—J. A. S., Ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of

this office of the letters patent granted Marcus P. Norton, dated April 14th, 1863, No. 38175, for "improvement in post-office stamps."

In testimony whereof, I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this eighth day of December, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

(Here follows diagram marked page 899.)

No. 38175.

United States of America to all to whom these letters patent shall come:

Whereas, Marcus P. Norton, of Troy, New York, has alleged that he has invented a new and useful improvements in post office stamps,
900 which he states has not been known or used before his application; has made oath that he is a citizen of the United States; that he does verily believe that he is the original and first inventor or discoverer of the said improvement, and that the same hath not, to the best of his knowledge and belief, been previously known or used; has paid into the Treasury of the United States the sum of thirty-five dollars, and presented a petition to the Commissioner of Patents, signifying a desire of obtaining an exclusive property in the said improvement, and praying that a patent may be granted for that purpose:

These are therefore to grant, according to law, to the said Marcus P. Norton, his heirs, administrators, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, constructing, using, and vending to others to be used, the said improvement, a description whereof is given in the words of the said Marcus P. Norton, in the schedule hereunto annexed, and is made part of these presents.

In testimony whereof, I have caused these letters to be made patent, and the seal of the Patent Office has been hereunto affixed.

Given under my hand, at the city of Washington, this fourteenth day of April, in the year of our Lord one thousand eight hundred and sixty-three, and of the Independence of the United States of America the eighty-seventh.

[SEAL.] J. P. USHER,
Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.
JOHN L. HAYES,
Acting Commissioner of Patents.

901 The schedule referred to in these letters patent and making part of the same:

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, have invented "new and useful improvements in postmarking and canceling revenue and postage stamps, etc., etc.," and I do hereby declare the following to be a full, clear, and

exact description of the construction and operation thereof, reference being hereby had to the accompanying drawings and to the letters of reference marked thereon, which drawings make a part of this specification.

Like letters refer to and represent like or corresponding parts.

Fig. 1 is a side elevation of the stamp and letter frank canceling device hereinafter described for canceling stamps issued by the "Post Office," "revenue," or other departments, with indelible or other ink, by the means hereinafter set forth.

Fig. 2 is a face view, showing the postmarking stamp ready for use, and the canceling stamp or device made of wood, cork, rubber, or other and similar material, and therein inserted and more fully described hereinafter.

Fig. 3 is a vertical section taken through the centre of the various parts of the post marking and canceling stamp.

Fig. 4 shows a marking, rating, or dating and canceling device more fully described hereinafter, and is more especially designed for rating, dating, and canceling revenue stamps.

Fig. 5 shows a device to cancel stamps or franks with indelible ink by means of wood, cork, rubber, or similar material, for type or blotter in combination with the postmarking device, and more fully hereinafter described.

902 The nature of my improvements, herein described, consists in the employment and combination of a device for canceling postage or other stamps by means of wood, cork, or similar material inserted in a tube or recess therein, for the purpose of effacing or blotting such stamps with indelible ink. It also consists in the combination of a canceling device, having wood, cork, rubber, or any similar material for the type or blotter therein, with any postmarking device so as to blot, cancel, or efface postage-stamps with indelible ink at the same time and operation of postmarking of letters, packets, etc., etc.

To enable others skilled in the art to which my invention relates to make and use the same, I will here proceed to describe the construction and operation thereof, which, as follows, to wit: I construct the postmarking stamp (D) of any suitable material. (E) Fig. 3 is the mortice or recess of suitable dimensions to receive the type for the month, the day of the month, and the year, around which is the name of the place where used, and is the same as the postmarking device described in my letters patent, bearing date the sixteenth day of December, 1862, and which is secured to the cross-piece (B) in the same manner and by the same means as described and set forth in the said patent, which is also the case with the canceling device (C).

I construct the canceling stamp or device (C) of any suitable material, of any size required in diameter, and in length to correspond to the postmarking device (D). (F) Fig. 3 is the tube or recess in the device (C) for the purpose of receiving the blotting or canceling device (G), Figs. 2 and 5, which device is made of wood, cork, rubber, or similar material, so as to closely fit the said tube or recess (F) Fig. 3. The face of this device may contain a plan or form for canceling with indelible ink, like that shown at Fig. 2, or it may have any plan or form for that pur-

903 pose thought best to devise or use. This device (G) may project somewhat below the lower end of the said tube (F), as seen at Fig. 5, and may also project below the face of the postmarking or rating device (D), Figs. 2 and 3, and it may be driven out of the said tube or recess by means of a pin or bolt operating through the hole (A), Figs. 3 and 5, for the purpose of repairs, or to replace it by a new one. The

said tube or recess (G) may be any size in diameter required or any depth desired. The said canceling stamp or device (C) being thus constructed with cork, rubber, or other elastic substance for type or blotter, will receive and hold on the face thereof ink in quantities sufficient to blot or cancel the postage-stamp in such a manner as to prevent the possibility of the said postage-stamp being cleansed of the canceling ink by any chemical or other process, for the said ink would be so effectually put thereon that any attempts to remove it therefrom would entirely destroy the said postage stamp, and thereby render the same incapable of a second or reuse. The said cork, rubber, or other elastic substance, as aforesaid, will render the said stamp capable of an easy and rapid use, for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continued use of the same as though it were of solid metal, and the same will greatly aid in raising the entire stamp from the paper and postage-stamp when the impression shall have been given by the operator. The said blotter or type can be more easily repaired or replaced by a new one at less expense than if made of solid metal. The said cork, rubber, or other elastic material may extend upward to the said cross-bar (B), and there be connected to the same by a screw or pin-bolt, if desired, which will be the same in effect and in operation.

In no case could any fraud be committed by a second or reuse of the government stamp or frank.

904 Having thus described my invention and improvements in marking and canceling stamps, what I claim and desire to secure by letters patent of the United States of America, therein, is:

1. The canceling device (C) with wood, cork, or rubber type or blotter (G) therein, or any device substantially the same, so as to cancel the postage-stamp with indelible ink, substantially as herein described and set forth.

2. I also claim the canceling device (C) with wood, cork, or similar material forming the type or blotter (G) therein, in combination with the cross-piece (B), and with the postmarking device (D) substantially as herein described and set forth.

In testimony whereof I have, on this 29th day of December, 1862, hereunto set my hand.

MARCUS P. NORTON.

Witnesses:
CHAS. D. KELLUM.
URIEL DEXTER.

905 *Complainant's Exhibit E.—J. A. S., Ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an assignment recorded in Liber C[7], p. 458.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-fifth day of July, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR.
Commissioner.

said tube or recess (G) may be any size in diameter required or any depth desired. The said canceling stamp or device (C) being thus constructed with cork, rubber, or other elastic substance for type or blotter, will receive and hold on the face thereof ink in quantities sufficient to blot or cancel the postage-stamp in such a manner as to prevent the possibility of the said postage-stamp being cleansed of the canceling ink by any chemical or other process, for the said ink would be so effectually put thereon that any attempts to remove it therefrom would entirely destroy the said postage stamp, and thereby render the same incapable of a second or reuse. The said cork, rubber, or other elastic substance, as aforesaid, will render the said stamp capable of an easy and rapid use, for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continued use of the same as though it were of solid metal, and the same will greatly aid in raising the entire stamp from the paper and postage-stamp when the impression shall have been given by the operator. The said blotter or type can be more easily repaired or replaced by a new one at less expense than if made of solid metal. The said cork, rubber, or other elastic material may extend upward to the said cross-bar (B), and there be connected to the same by a screw or pin-bolt, if desired, which will be the same in effect and in operation.

In no case could any fraud be committed by a second or reuse of the government stamp or frank.

904 Having thus described my invention and improvements in marking and canceling stamps, what I claim and desire to secure by letters patent of the United States of America, therein, is:

1. The canceling device (C) with wood, cork, or rubber type or blotter (G) therein, or any device substantially the same, so as to cancel the postage-stamp with indelible ink, substantially as herein described and set forth.

2. I also claim the canceling device (C) with wood, cork, or similar material forming the type or blotter (G) therein, in combination with the cross-piece (B), and with the postmarking device (D) substantially as herein described and set forth.

In testimony whereof I have, on this 29th day of December, 1862, hereunto set my hand.

MARCUS P. NORTON.

905 *Complainant's Exhibit E.—J. A. S., Ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an assignment recorded in Liber C⁷, p. 458.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-fifth day of July, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR.
Commissioner.

Liber C⁷, p. 458.

Whereas, I, Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, have invented "new and useful post mark canceling stamp," for and upon which, I did, on the 14th day of April, 1863, obtain of and from the United States of America letters-patent, to which reference is hereby had, for the invention this day sold and assigned;

And whereas, Jacob Shavor and Albert C. Corse, each of the city of Troy, county and State aforesaid, are desirous of purchasing,
906 and have purchased, of and from me all the right, title, and interest secured to me in said invention by said letters patent, or which may be secured to me by reissue of the same, or otherwise;

Now, therefore, this indenture of assignment witnesseth:

That for and in consideration of the sum of five hundred dollars to me in hand paid, the reciept whereof is hereby acknowledged, I have sold, assigned, and transferred, and do hereby sell, assign, and transfer, unto the said Jacob Shavor and Albert C. Corse, their heirs, assigns, executors, or administrators, all the right, title, and interest which I have in the said invention as secured to me by said letters patent, or as may be secured to me by reissue of the same, or otherwise; the same to be held and enjoyed by them, the said Jacob Shavor, and Albert C. Corse, for their own use, benefit, and behoof, and for the, use benefit, and behoof of their legal representatives to the full end of he term for which the same were and are granted, as by reference to said patent will fully appear, as fully, freely, and entirely as the same would have been held and enjoyed by me had this sale, assignment, and transfer not been made.

In testimony whereof, I have, on this 20th day of April, 1863, hereunto set my hand and seal.

MARCUS P. NORTON, [SEAL.]

Signed and sealed in presence of—
CHAS. D. KELLUM.
CHAS. E. PATTERSON.

[15 cent internal revenue stamp, canceled.]

Received and recorded March 8, 1864.

907 *Complainant's Exhibit F.—J. A. S., Ex'r.*

DEPARTMENT OF THE INTERIOR,

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of the reissue letters patent granted Shavor & Corse, dated August 23d, 1864, No. 1748, "for improvement in post office stamps."

In testimony whereof, I, W. H, Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed, this eighth day of December, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

(Here follows diagram marked page 908.)

No. 1748. *Reissue.*

United States of America, to all to whom these letters patent shall come:

Whereas Jacob Shavor and Albert C. Corse, of Troy, N. Y., assigees of Marcus P. Norton, of the same place, have alleged that said M. P. Norton invented a new and useful improvement in post-office stamps for which letters patent were issued to him, dated April 14, 1863, which letters having been surrendered by said assignees, the same
909 have been cancelled and new letters ordered to issue to them on an amended specification) which he stated had not been known or used before his application; had made oath that he was a citizen of the United States; that he did verily believe that he was the original and first inventor or discoverer of the s id improvement; and that the same hath not, to the best of his knowledge and belief, been prevously known or used; aid assignees having paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents, signifying a desire of obtaining an exclusive property in said improvement, and praying that a paten t may be granted for that purpose:

These are therefore to grant, according to law, to the said Shavor & Corse, their heirs, administrators, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, constructing, using, and vending to others to be used, the said improvement, a description whereof is given in the words of the said Shavor & Corse in the schedule hereunto annexed, and is made part of these presents.

In testimony whereof, I have caused these letters to be made patent, and the seal of the Patent Office has been hereunto affixed.

Given under my hand, at the city of Washington, this twenty-third day of August, in the year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States of America the eighty-ninth.

[SEAL.]

J. P. USHER,
Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.

D. P. HOLLOWAY,
Commissioner of Patents.

910 The schedule referred to in these letters patent, and making part of the same:

To all whom it may concern:

Be it know that Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, invented "new and useful improvements in post-marking letters, packets, etc., and canceling the postage-stamps thereon" in the manner and by the means substantially as hereinafter described and set forth. That the same were duly assigned and transferred to the undersigned, Jacob Shavor and Albert C. Corse, on the 20th day of April, 1863, and recorded in the U. S. Patent Office on the 8th day of March, A. D. 1864, Liber C[7], page 458 of transfers of patents; and we do hereby declare the following to be a full, clear, and exact description of the construction and operation thereof, reference being hereby had to the accompanying drawings and to the letters of reference marked thereon, which drawings make a part of this specification.

Like letters refer to and represent like or corresponding parts.

Fig. 1 is a side elevation of the post-marking and postage-stamp canceling device hereinafter described and set forth, for canceling stamps issued by the "Post-Office Department," with indelible or other ink at the same time and operation of the making of the post-mark on the packet one side of such frank or postage-stamp so canceled.

Fig. 2 is a vertical section taken through the centre of the various parts of the post-marking and postage canceling device herein described and set forth.

Fig. 3 is a face view showing the post-marking stamp ready for use and the postage canceling stamp or device made of wood, cork,
911 rubber, or other and similar material and therein inserted, and more fully described hereinafter.

Fig. 4 shows a device to cancel postage-stamps, or letter franks, with indelible or other ink by means of wood, cork, rubber, or any elastic or similar material for type or blotter, which may be used for that purpose separate and alone or in combination with the post-marking device, substantially as shown at Fig. 3.

Fig. 5 is a vertical section of a post-marking and canceling postage-stamp device combined, and entirely made of iron, steel, or similar material, and described hereinafter more fully.

Fig. 6 is a plan or face view, of Fig. 5, and fullg showing the postage canceling device made of iron, steel, or similar material.

Fig. 7 shows the wrench for securing the type for the month, day of the month, and year in the postmarking device.

Fig. 8 shows the punching tool or device for forcing the cork, wood, rubber, or similar material from the tube in which the same is held for use, so as to repair or replace the same with a similar blotter or postage-stamp canceling device.

The nature of the said invention and improvements herein described consists in the employment and combination of a device for the more complete and perfect cancellation of postage-stamps by means of wood, cork, rubber, or similar material, whereby such stamps are blotted or effaced with indelible or other ink in the manner substantially as herein described and set forth.

It also consists in the combination of a postage canceling device having wood, cork, rubber, or any similar material for the type or blotter with any post-marking device, so as to blot, cancel, or efface postage-stamps with indelible or other ink at the same time, blow, or operation of the instrument by which the post-mark is made upon the letter,
912 envelope, or packet, substantially as herein described and set forth.

It also consists in the post-marking of letters, envelopes, or packets, and in the cancellation of postage-stamps thereon with ink or similar material by means of wood, cork, rubber, steel, iron, or any other suitable material so combined with the post-marking instrument as to blot or efface such postage-stamps at the same blow or operation of the instrument thus constructed for such purpose.

To enable others skilled in the art to which said invention or improvements relate to make and use the same, we will here proceed to describe the construction and operation thereof, which is as follows, to wit: We construct the postmarking device or stamps, D, of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device herein described. E, Fig. 3, is the mortise or recess of suitable dimensions to receive the type for the month, day of the month, and the year, around which is the name of the place where

used, and is similar to the postmarking device described and set forth in our letters patent bearing date the 16th day of December, 1862, which was issued to the said Marcus P. Norton, and by him afterwards assigned and transferred to us; and which said type is secured to the cross-piece (B) in the same manner and by the same means as described and set forth in the said patent as well as in this specification hereinafter.

We construct the postage canceling stamp or device G, for the purpose of canceling in a more perfect and thorough manner the postage-stamps on letters, packets, etc., of wood, cork, rubber, or any similar or elastic material, and insert the same in the tube or recess F, which is in that part of the canceling device C connected to and combined with the said cross-piece B, as herein described.

The said tube or recess F, Figs. 2, 3, and 4, may be of any
913 diameter or depth desired. We prefer to have the diameter thereof at least the same as the width of the postage-stamp to be canceled or destroyed with ink as aforesaid.

The said canceling device G will of course be so made as to correspond with such tube or recess and to closely fit the same, and may be made of cork, wood, rubber, or any elastic material, as aforesaid.

The face of this device may contain a plan or form for canceling postage-stamps with ink like that shown at Fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

This device (G) will project somewhat below the lower end of the said tube F, as seen at Figs. 1 and 4, and it may also project somewhat below the face of the postmarking or rating device (D) if deemed best so to do, and it may be driven out of the said tube or recess (F) by means of a pin or bolt substantially like that shown at Fig. 8, the lower end of which operates in and through the hole *a*, Figs. 2 and 4, for the purpose of repairs or to replace it by a new one. (A) is the handle firmly secured to the cross-bar B.

The said postage-stamp canceling device (G) being thus constructed with cork, rubber, or other elastic material for the type or blotter, and combined with the said device C, with recess (F) therein, as aforesaid, will receive and hold on the face or configuration thereof ink in quantities sufficient to permanently blot, efface, and cancel the postage-stamp whereon the same is used, in such manner as to prevent the said postage-stamp being cleansed of the said cancelling ink by any chemical or other process, for the said ink so put on would be so effectual that any attempt to remove it therefrom would entirely destroy the said postage-stamp and thereby render the same incapable of a second or other use without immediate detection.

The said cork, rubber, or other elastic material, as aforesaid,
914 will render the said stamp and canceling device of an easy and rapid use, for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continued use of the same, and it will somewhat aid in raising the entire apparatus from the paper and postage-stamp when the impression and cancellation shall have been given by the operator. The said type, blotter, or canceling device can be easily repaired or replaced by a new one at very little expense or trouble. The said cork, rubber, wood, or elastic device for canceling postage-stamps as aforesaid may extend upward to the said cross-bar (B) and there be connected to the same by means of a screw, pin, bolt, or similar device if desired. The operation and effect produced would in such case be the same. The said postage canceling device may be of any desired distance from the said post-

marking or rating device, or it may be securely fastened to the immediate side of the said postmarking or rating part or stamp by any proper and sufficient means.

The said postage canceling device may also be made of iron, steel, or similar material, as shown at G, Figs. 5 and 6, which may be secured to the said cross-piece (B) in like manner as the said device C, Figs. 2 and 4, which is done either by screw and nut where the same unites with the said cross-bar, or it may there be firmly fastened by means of pins or rivets or solder, as deemed best. The said postmarking or rating device is secured to said cross-bar B, in like manner and by substantially the same means. The said metal canceling device G, Fgs. 5 and 6, may also be fastened to the immediate side of the said post-marking device by any good and sufficient means as hereinbefore described in reference to the said device C, Figs. 2 and 4. This metal device may also have, upon its face or lower surface, any configuration deemed best for the purpose of canceling the postage-stamp in ink at the same
915 blow of the instrument or apparatus, as hereinbefore stated. In every case the postmarking of the letter or packet and the effacing or cancellation of the postage-stamp thereon is done at the same time, and at one operation of the device constructed and combined substantially as herein described and set forth. Both the postmark and the cancellation of the said postage-stamp are done with indelible or other kind of ink and without any injury to the said letter, envelope, or packet, or the contents thereof, as would be the case were the said postage-stamp canceled by being cut in several places by means of cutters or knives constructed for that purpose. The instrument and devices herein described will not cut either the letter, envelope, or postage-stamp thereon, but performs the cancellation aforesaid with ink only, as aforesaid. No cutting device whatever is used.

In no case could any fraud be committed by a second or reuse of the government postage-stamp or frank without being immediately discovered. This combination of devices will greatly facilitate the making up of mails for transportati n, will reduce the labor in postmarking letters and in canceling the postage-stamps thereon to about one-half of that required when this combined instrument is not used. It therefore saves about one-half of the labor in the postmarking of letters and in the cancellation of the postage-stamps thereon. It also makes the cancellation of the said postage-stamps more effectual, so as to prevent a second or reuse by any means whatever, which are very important items in the successful management of the post-offices in this country, whereby large sums of money are annually saved this government.

Having thus described the original invention and improvements of the said Marcus P. Norton, in postmarking and canceling devices combined as and for the purposes aforesaid, what we claim and desire to secure by letters patent of the United States of America, is:

916 First. The postage canceling device (C) with "wood," "cork," or "rubber" type or blotter (G) therein, or any equivalent therefor, so as to cancel, blot, or efface the postage-stamp with indelible or other ink in the manner and for the purposes, substantially as herein described and set forth.

Second. We claim the canceling device (C), with wood, cork, or rubber, or any equivalent thereof forming the type or blotter (G) therein, in combination with the cross-piece (B) and with the post-marking device (D), substantially as and for the purposes herein described and set forth.

Third. We claim the post-marking of letters, envelopes, and packets, and the cancellation of the postage-stamps thereon with ink at one and the same blow or operation of the instrument in the manner and by the means substantially as herein described and set forth.

Fourth. We claim the employment and combination of a postmarking device with a postage-stamp canceling device, both being operated by one or the same handle for the postmarking the letter, envelope, or packet, and for the destruction of postage stamps thereon with indelible or other ink, substantially as herein described.

In testimony whereof, we have, on this 27th day of May, A. D. 1864, hereto set our hands.

JACOB SHAVOR.
ALBERT C. CORSE.

917 *Complainant's Exhibit G.—J. A. S., ex'r.*

DEPARTMENT OF THE INTERIOR,

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an affidavit and assignments recorded in liber U[11], page 319.

In testimony whereof, I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-fifth day of July, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR,
Commissioner.

Liber U[11], p. 319.

Affidavit and assignments.—Transfer of patents.

CITY OF TROY, COUNTY OF RENSSELAER,
AND STATE OF NEW YORK, *ss:*

Jacob Shavor and Albert C. Corse, of the city of Troy, being duly and severally sworn, each for himself, doth depose and say that they reside at the said city of Troy, in said county and State. That
918 they have so resided there for about twenty years. We know Marcus P. Norton, who also resides at same place. He is a practicing lawyer by profession, in the several courts of the State of New York, in the United States, as well as before the U. S. Patent Office. We have so known him for five or six years past. In the summer of the year 1860, he exhibited to us at his office in said city of Troy, a double or combined stamp or instrument for postmarking of letters, and for the cancellation of the postage-stamps thereon, in ink, at one l o v or operation of the same. This device consisted of the device for gi v-ing the name of the post office where used, together with the dat of the same, and with a device of either cork, wood used endwise, rub b r or metal having any suitable configuration upon the lower surface of the

same for the cancellation of the postage-stamp, and used and arranged in combination with such po-tmarking device. At about that time, the said Marcus P. Norton called upon us, we being then considered clients of his, and at that time he there made known unto us that he had a very valuable invention and improvements for the use in the postal service, of the kind, character, and for the purposes hereinbefore stated, and that, because of having endorsed so large an amount of paper as to cause him very great embarrassment in the years 1856 and 1857, and from all of which he at that time was a great financial sufferer, and thus being much distressed, he desired each of us to aid him in money for the purposes of obtaining letters patent upon his said invention and improvements, in this country and perhaps in Europe. Whereupon and after due consideration, we agreed with him, the said Marcus P. Norton, to furnish him with such sums of money as he might require, in order to get his said inventions into general use by the Post-Office or other departments of the government requiring such inventions
919 or instruments. The money so furnished by us, or either of us, as in the judgment of the said Marcus B. Norton he might need or require from time to time, in order to obtain such patents as he might deem best, in order to get his said improvements into general use, by the government or Post Office Department at as early a date or time as possible, or within his power to do, he having the entire management of the same; we agreed with and promised to the said Marcus P. Norton to receive one half interest or moiety part of the said inventions, improvements, and letters patents when obtained, for the uses and purposes aforesaid, while the other and remaining half interest or moiety part of such inventions, improvements, and letters patent were to be and the same were in any event or under any circumstances to remain the property and right of the said Marcus P. Norton, and of his lawful representatives; we were to make no charges whatever against him for any money thus furnished by us to him. His one-half interest and moiety part of the said inventions and patents were to be wholly and entirely free from any and every claim or charge for money or other matter or thing on our part or by us. The said Norton was not to charge our said one-half part with any professional services rendered by him in the premises. The said Norton was by the arrangement to assign all his said patents to us soon after or before the same were issued to him, in order that all his patents, inventions, and improvements and every one of them might be in safe hands while said Norton was so embarrassed, because of his losses aforesaid, or for other cause, as well as to permit of his being a witness of, and concerning his said inventions, improvements, and patents, in court or elsewhere, concerning such matters as were within his personal knowledge, and could not be proven by any other person,
920 such for example as matters appertaining to his caveat filed in the U. S. Patent Office in the year 1853, and containing among other things the several inventions herein named. It was also agreed that whenever the said Norton should be able in his own judgment to manage the affairs concerning and connected with his said inventions, improvements, and letters patent, and to us assigned and transferred in the manner as aforesaid, and upon being requested so to do, we were to reassign, reconvey, and retransfer unto him, the said Norton, his heirs and legal representatives, the invention, improvements, and letters patent dated December 16, 1862, also dated April 14, 1863, including each and every reissue of either of said patents, if at the time of such request and demand of and by said Norton upon us, there were any reissue or reissues of the said letters patent, or of either of them; we

were, also, to reassign, reconvey, and retransfer unto him, the said Marcus P. Norton, his heirs and legal representatives, each and every other letters patent than those hereinbefore named which at the time of his request and demand aforesaid might be in our possession through and by means of any assignments and transfer thereof from the said Norton to us, including the "Post Office Way Bill Envelope," patented on or about the 10th day of June, 1862, including, also, all other patents upon postmarking of letters or packets, and for the cancellation of postage-stamps thereon, and including each and every reissue of any of the said patents. That whenever he, the said Norton, should for any cause desire, request, or demand of us the reassignment, retransfer, or reconveyance of any or of all of his said patents by him assigned to us under our said agreement with him, and for the purposes aforesaid, then the same should be so done without any trouble to him, or unnecessary delay; and in consideration of such reassignments, retransfer, and reconveyances of the said inventions, improvements, and patents by
921 us to the said Marcus P. Norton, he was only to pay to us all sums of money and lawful interest thereon paid out by us at the request of the said Norton, when we should present to him the proper vouchers for the same, and that if, at the time when said Norton should desire or demand of us the reassignment, retransfer, or reconveyance of any, or of each and every of the said patents, by us as aforesaid, he might not be able to cash at once such money, and the lawful interest upon the same, then he, the said Norton, his heirs or lawful representatives, may at his or their own election, pay such money out of the first money had or received by him or them, out of any sale or sales made with the Government of the United States, by him or them, and which should under such circumstances be so paid as soon as possible, after any such sale, and payment of money in accordance therewith, we producing vouchers for all moneys so expended by us as aforesaid stated. It is also agreed that the said Norton was to have full and uninterrupted charge and control of, as well as the management and direction of all matters appertaining to each and every of said patents, both in the obtaining of the same, all legal matters thereon, or in the sale or either of them, or in the introducing of any or all of them into public use by the "Post Office Department," or other department of the government. The letters patent thus far obtained under our said understanding and agreement with him, the said Marcus P. Norton, are dated as follows, to wit: December 16th, 1862, assigned to us December 20th, 1862, also April 14th, 1863, assigned to us April 20th, 1863, and each for improvements in postmarking letters, packets, etc., and for the cancellation of postage stamps, and each recorded in the U. S. Patent Office; also, June 10th. 1862, assigned to us December
922 20th, 1862, and recorded in the U. S. Patent Office December 31st, 1862, and for and upon an invention entitled Post Office Way Bill Envelope, made by said Norton.

And deponents further say for answer to the position taken by the committee of the House of Representatives of the Congress of the United States of America, as well as in full statement and vindication of the facts, and that such committee may know the whole truth, to wit: The position aforesaid being, that deponents are mere speculators upon the invention and ingenuity of another, and that the purchase of said inventions and patents by Congress would not be a reward to or compensation to the said Norton or his family, nor would it be a reward by the government through Congress to the inventor for invention and valuable improvements made by him. That the real and true inventor

should himself be the recipient of the attention of Congress, as well as of the compensation, whereby to encourage, to reward, and to stimulate invention for the benefit of the government, and not persons who claim as mere assignees, for Congress cannot know how or in what manner they came by or unto the possession of the same. That the payment of a very large sum of money by Congress to such assignees would not have the tendency to stimulate and encourage invention. That Congress should reward the inventor and patentee directly, and thereby encourage other inventors as well as to discourage speculation by assignees. The deponents say that they were only to be temporary assignees, in order to aid said Norton in the manner hereinbefore stated, for deponents were by the arrangement to reassign, reconvey, and retransfer each and every of the said patents to them assigned by said inventor and patentee Norton, previous to the time when he might or should request or require of and from us such assignments and
923 transfers, no matter what may have been the name, or nature, or style of the same. Deponents further say, that it was their purpose and intention to render unto the said Norton all the aid in their power, whereby to enable him to complete his models, drawings, and specifications in order to obtain the patents contemplated by him, and to enable him to get the Post-Office Department or government to consider, adopt, and put into use the several inventions made by him, for the purposes and uses aforesaid, for the said Norton was at that time engaged for deponents, in and about business and certain matters appertaining to said Norton's profession, to wit, that of a practicing lawyer.

And deponents further say, that upon the said Norton's request so to do, deponents were to, and would duly and faithfully and freely, reconvey, reassign, and retransfer each and every of the aforesaid inventions and patents unto the said Marcus P. Norton, in legal form and condition, the same as we had received such inventions and patents and each of them in trust as aforesaid from him, whereby the title thereto should be full, free, and perfect, and clear from any, all, and every incumbrance whatever.

And deponents in further answer to said position of the said committee of Congress, do hereby make, execute, and deliver the following absolute assignment and transfer of the aforesaid patents, inventions, and improvements to the said Marcus P. Norton, his heirs, assigns, or legal representatives, to be by him or them used and put upon the record at the U. S. Patent Office, whenever he or they may desire so to do. That is to say, whereas, letters patent of the United States of America were duly granted, issued, and delivered unto the said Marcus P. Norton, under, and bearing date as follows, to wit: December 16th, 1862, also April 14th, 1863, for and upon improvements in instruments for
924 postmarking of letters, and for the cancellation of the postage-stamps thereon, as, and in the manner, form, and for the purposes substantially as hereinbefore stated and set forth, also, a certain letters patent, dated June 10th, 1862, for and upon an invention known and denominated a "Post-Office Way-Bill Envelope," as hereinbefore stated and set forth.

Now, therefore, and by virtue, force, and power of our said agreement and contract with the said Marcus P. Norton in the manner aforesaid, and in consideration of the premises hereinbefore set forth, and in the further consideration of the sum of three hundred dollars, the receipt of which is hereby duly acknowledged, we have sold, assigned, and transferred, and we do hereby sell, assign, and transfer unto the said Marcus

P. Norton, his heirs, assigns, and lawful representatives, the full, clear, entire, and the exclusive right and title to each, every, and all of the aforesaid named and described letters patent, inventions, and improvements, also, each and every reissue of any or either of the same, including together with those hereinbefore named and described, each and every invention and letters patent acquired by us, of and from him, the said Norton, under our aforesaid agreement and contract with him as aforesaid stated. To have and to hold the same, forever, for his own use, benefit, and behoof, and for the use, benefit, and behoof of his heirs, assigns, and legal representatives, for and during the full length of the term for which the same were and are granted, as fully, freely, and entirely as the same would have been held and enjoyed by us, had this grant and sale not been made by us.

925 In testimony whereof we do hereby set our hands and seals, and make our solemn oaths on this 23d day of February, A. D. 1864.

JACOB SHAVOR. [SEAL.]
ALBERT C. CORSE. [SEAL.]

Subscribed and sworn to before me this 23d day of February, 1864.

JOHN T. LAMPORT,
United States Commissioner for
Northern Dist. of New York, Troy, N. Y.

Recorded July 24, 1869.

[Stamps, $1.05, canceled.]

926 *Complainant's Exhibit H.—J. A. S., ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of the reissue letters patent granted M. P. Norton, dated August 3d, 1869, No. 3586, for "imp't in post-office postmarking and canceling hand-stamps."

In testimony whereof I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this eighth day of December, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

(Here follows diagram marked page 927.)

No. 3586. Reissue.

The United States of America, to all to whom these letters patent shall come:

Whereas Marcus P. Norton, of Troy, New York, has alleged that he has invented a new and useful improvement in post-office post-
928 marking and canceling hand-stamps (for which letters patent were issued to him, dated April 14, 1863; the same surrendered, and new letters issued to him, dated August 23, 1864; which last letters

having been surrendered by him, the same have been canceled, and new letters ordered to issue to him on an amended specification), and has made oath that he is a citizen of the United States; that he verily believes he is the original and first inventor or discoverer of the said improvement, and that the same hath not, to his knowledge and belief, been previously known or used; has paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents praying that a patent may be issued therefor.

These are, therefore, to grant to the said Marcus P. Norton, his executors, administrators, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, using and vending to others to be used, the said improvement, a description whereof is given in the annexed schedule, and made a part of these presents.

In testimony whereof, I have caused these letters to be made patent and the seal of the Patent Office to be hereunto affixed.

Given under my hand, at the city of Washington, this third day of August, in the year of our Lord one thousand eight hundred and sixty-nine, and of the Independence of the United States of America the ninety-fourth.

[L. S.]

W. T. OTTO,
Acting Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.

S. H. HODGES,
Acting Commissioner of Patents.

929 UNITED STATES PATENT OFFICE.

Marcus P. Norton, of Troy, New York. Letters Patent No. 38175, dated April 14, 1863; reissue No. 1748, dated August 23, 1864; reissue No. 3586, dated August 3, 1869. Improvement in post-office post-marking and canceling hand-stamps.

The schedule referred to in these letters patent and making part of the same.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer, and State of New York, have invented new and useful improvements in "post marking letters," "packets," etc., and in the "canceling" of the "postage-stamps" thereon, in the manner, and by the means, substantially as hereinafter described and set forth; that letters patent of the United States were duly issued thereon, under and bearing date April 14, 1863, which were assigned and transferred under a certain agreement, and by virtue of a certain instrument in writing, bearing date the 20th day of April, 1863, and recorded in the United States Patent Office on the 8th day of March, 1864, in Liber C[7], page 458 of transfers of patents, to Jacob Shavor and Albert C. Corse, of said city of Troy, county, and State, and who, on or about the 23d day of February, A. D. 1864, duly reassigned and retransferred the said invention, improvements, and letters patent to the said Marcus P. Norton, inventor and assignee aforesaid, by a certain instrument in
930 writing, duly executed, and bearing date on the said 23d day of February, 1864, and which assignment and transfer from said

Jacob Shavor and Albert C. Corse was duly recorded in the said United States Patent Office on the 24th day of July, 1869, in Liber U[11], page 319, of transfers of patents. Now, therefore, I the said Marcus P. Norton, do hereby declare the following to be a full, clear, and exact description of the construction and operation thereof, reference being had hereinafter to the accompanying drawings, and to the letters of reference marked thereon, which drawings, so marked and lettered, hereby make a part of these my specifications of and concerning my said invention and improvements herein contained and set forth.

Like letters refer to and represent like or corresponding parts of my said invention.

Figure 1 represents a side elevation of the postage-stamp canceling and post-marking device hereinafter described and set forth for canceling postage-stamps with any suitable ink contained upon such instrument, at the same time, blow, and operation of the making of the postmark on the letter, envelope, or packet, one side of and from such postage stamp or frank so canceled.

Figure 2 represents a vertical section taken on a line through the centre of the various parts of the post-marking and postage-canceling device or instrument herein contained, described, and set forth.

Figure 3 represents a face view of the device, showing the post-marking stamp ready for use, and the postage-canceling die or device, made of wood used endwise, or of cork, rubber, or other suitable material therein inserted, in the manner substantially as shown, and more at large described hereinafter.

Figure 4 shows a device for the purpose of canceling postage-stamps or letter franks, used to represent value, by the use and power of
931 any suitable ink, by the means of wood, cork, or any elastic material for the type or die, which may be used for that purpose separate and alone, or in combination with any suitably-constructed post-marking stamp or device, substantially as shown at Fig. 3 of the said drawings.

Figure 5 represents a vertical section of a post-marking and postage-stamp canceling device or die combined, and constructed entirely of iron, steel, or other metal, and more fully described hereinafter.

Figure 6 is a plan or face view of Fig. 5, showing the postage-stamp canceling device or die, made of iron, steel, or other suitable metal or material.

Figure 7 represents the wrench used for securing the dating-type in a proper place within the post-marking device, having the name of the town or post-office where used engraved thereon in relief letters.

Figure 8 represents the tool or instrument used for removing the cork, wood, or rubber die or type used for canceling postage-stamps from the tube or surrounding case where held or contained so as to repair, or replace the same with a new one when worn out or unfit for use.

The nature of my said invention and improvements herein contained and described consists in the employment and combination of a device or die used for the more complete and perfect cancellation of postage-stamps or letter franks by means of soft wood used endwise, or of cork, rubber, or other suitable material, whereby such stamp or frank is effaced and canceled in and by indelible or other ink, in the manner substantially as herein described and set forth.

It also consists in the combination of a postage stamp canceling device or die, constructed of wood, cork, rubber, or any suitable material, with any suitably arranged and constructed post-marking stamp or device, so as to cancel, efface, or destroy the postage stamp or let-

932 ter-frank, with indelible or any suitable ink at the same time, blow, or operation of the stamp or instrument by which the post-mark is given or made upon the letter, envelope, or packet, substantially as herein described and set forth.

It also consists of the post marking of letters, envelopes, or packets, and in the cancellation of the postage stamp or stamps thereon, with, in, or by any suitable ink, or similar material, by means of some soft wood used endwise against the postage-stamp, or by the means of cork, rubber, iron, or steel, or by means of any other suitable material, so combined with the post-marking stamp or instrument as to cancel, efface, or destroy the postage-stamp or stamps at one and the same blow or operation of the entire instrument, thus constructed for that purpose, whereby to prevent a second or reuse of such postage-stamp or stamps.

To enable others skilled in the art to which my said invention and improvements relate, to make and use the same, I will here proceed to describe the construction and operation thereof, which are substantially as follows; that is to say—

I construct the post-marking device or stamp (D) of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device and die or type.

E, Fig. 3, is the mortise or recess, of suitable dimensions to receive the type for the month, day of the month, and for the year, and called or known as the dating-type, around which is the name of the town or post-office where used, in relief-letters, and upon the lower face of such post-marking stamp or device. I construct the postage-canceling stamp or device G (for the purpose of canceling, in a more perfect and thorough manner, the postage-stamps on letters, envelopes, or packets) of wood, used endwise upon the postage stamp, or of cork, rubber, or of any suitable or elastic material, and insert the same in the tube or 933 recess F, which is that part of the canceling device marked (C) of the accompanying drawings, and which is connected to and combined with the said cross-piece B, as herein described.

I prefer to have the diameter of the canceling-device and die or type F, Figs. 2, 3, and 4, about the same as the width of the postage stamp to be canceled or destroyed by means of the same.

The said canceling-die or type (G) may be of any length required, and so made as to correspond with the tube or recess F, and closely to fit the same, and it may be made of wood, cork, rubber, or of any elastic material as aforesaid.

The face of this device may contain a plan or form for canceling the postage-stamp in, with, or by ink, like unto that shown at fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

The said device, die, or type G will project somewhat below the face of the post-marking device D, if deemed best so to do, and it may be removed out of the said tube or recess (F) by means of a pin or bolt, substantially like that shown at Fig. 8, the lower end of which operates in and through the aperature *a*, Figs. 2 and 4, for the purpose of repairs, or to replace it by a new one, when desired.

A is the operating handle, firmly secured to the cross-bar B by any suitable mechanical means, and it will be made of wood, &c.

The said postage-stamp canceling device, die, or type G, being thus constructed of cork, wood, or rubber, or other elastic material, and combined with the said device C, with recess or tube (F) therein as aforesaid, will receive and contain, on the face or configuration thereof, the ink aforesaid, in quantities sufficient to permanently cancel, efface, or de-

stroy the postage stamp whereon the same is used while post-marking letters, packets, &c., in such manner as to prevent the said postage-
934 stamp being cleansed of the said canceling-ink by any chemical or other process; for the said canceling-ink, so put upon the postage-stamp by means of said cork, die, or type, would be so effectual that any attempt or effort to remove it therefrom would entirely destroy, or nearly so, the aforesaid postage stamp, and thus and thereby render the same incapable for or of a second or other use without immediate detection.

The said cork, rubber, or other suitable elastic material, used as aforesaid, will render the said post-marking and postage-stamp-canceling die or type of a more easy and consequently rapid use, because of there being a yielding of the said canceling-die, or type (G), when the blow is given upon the letter, envelope, or packet and postage-stamp, as aforesaid; the operator will not tire as much by means of a constant, continuous, and rapid use of the same; and it will also somewhat aid the operator in raising the entire instrument or apparatus from the paper or packet and postage-stamp, when the impression thereon and the cancellation of such postage stamp shall have been given by the operator, in the manner substantially as aforesaid.

The said canceling type or die can be easily repaired, or replaced by a new one, whenever desired, and at very little expense; and such canceling die or type (G) may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small bolt. In such case there would not be any tube or pipe surrounding said canceling die or type, G. The operation and effect produced would, in such case of construction, be the same.

The said postage-stamp canceling device, die, or type G may be of any desired distance from the aforesaid post-marking or dating device or stamp D, or it may be securely fastened to the immediate side of the said post-marking and dating part or stamp or device (D) by any convenient and suitable mechanical means.

935 The said canceling-die, type, or device G, I prefer to use made of cork, as it will hold a much greater quantity of canceling-ink upon and in the lower face thereof, and when it comes in contact with the printed surface of the postage-stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus, and thereby, inject into, or impregnate such broken surface with the said canceling-ink, whereby such postage-stamp, so operated upon and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be reused, or used a second time, in fraud upon the postal revenue, without immediate detection of the same.

Soft wood, used endwise, will answer nearly the same purpose. Still, long and continued use, after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling-die or type used upon postage-stamps, as aforesaid.

The said tube or cylinder C, Figs. 2, 3, and 4, may be constructed in any suitable manner, or by any convenient means, and thereafter fastened to the under side of the said cross-bar, B, in or by any mechanical means which will answer the required purpose. It may also be of any form or shape deemed best.

I also construct my said postage-stamp-canceling device, die, or type of cast-iron, steel, or other suitable metal, substantially as shown at G′, Figs. 5 and 6, and which may be secured to the said cross-bar or piece B, in like manner as the said tube or cylinder C, Figs. 2 and 4, and which is done either by screw and nut, where the same unites with the said cross-bar, or it may there be firmly fastened by means of suitably

constructed and arranged pins, or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto.

936 The said post-marking and dating device (D) is also secured to the under side of said cross-bar or piece B, and at or near the end thereof, opposite that where said tube or cylinder C, or canceling-die, type, or device G, is securely fastened, as aforesaid, in like manner, and by substantially the same means as used for such fastening of said canceling-device to said cross-bar upon the under side of the same, as aforesaid.

The aforesaid metal canceling-device, die, or type G′, Figs. 5 and 6, may also be fastened or secured to the immediate side of the said post-marking-device by any good and sufficient means, substantially as hereinbefore described and set forth, in reference to the said device C, or tube, or cylinder, constructed to receive and contain the said type or die G, Figs. 2, 3, and 4.

Such metallic device, die, or type may also have upon its lower face or lower surface any suitable configuration deemed best to use for the purpose of canceling the postage stamp in, with, or by any suitable ink at the same time, blow, and operation of the instrument or apparatus, as hereinbefore stated and set forth.

In any and every case, the post-marking of the letter, envelope, or packet, and the effacing or cancellation of the postage-stamp or letter-frank thereon, representing value, are done at the same time, and by the same blow or operation of the said several devices and parts, constructed and combined in the manner and by the means substantially as herein described and set forth.

Both the post-marking and cancellation of the said postage-stamp are done with indelible or other and suitable ink used for such cancellation or effacing of the postage-stamp, and that, too, without any injury to the letter, envelope, or packet, or to the contents thereof, as would be the case were the said postage-stamp canceled by being cut in several parts and places by means of cutters or knives constructed for

937 that express use and purpose, as is the case by the cutters or knives contained and set forth in letters patent granted to me on the 9th day of August, A. D. 1859; also, on the 16th day of December, A. D. 1862, the first of which contains no guard or guards to said knives or cutters, while the second contains such guard or guards, for the purpose of preventing such cutters or knives from cutting too much or too deep in and upon said postage-stamps.

The said instrument and devices herein set forth and described, will not, under any circumstances, cut either the letter, envelope, or postage-stamp thereon, in any way or manner, but perform the cancellation required to be done in, with, and by ink only, as aforesaid, no cutting device whatever being used; but the said cork, device, die, or type will, when it comes in contact with the printed or enameled like surface of the postage-stamp, somewhat mar, bruise, or break the same by means of the blow given by the instrument, whereby to prepare the same to be filled by or impregnated with any suitable ink used for such cancellation substantially as aforesaid.

In no case could a fraud be committed by a second or reuse of the government postage-stamp, or letter-frank representing value, without being discovered.

This arrangement and combination of devices will greatly hasten or facilitate the making up of the mails for transportation. It will also economize in labor, and reduce the labor in post-marking letters, and in

the canceling of the postage-stamps thereon to about, if not entirely, one-half of the number of workmen, laborers, or clerks absolutely necessary when and where this combined instrument is not used in the manner aforesaid.

It therefore saves at least one-half of the labor required in the post-marking of letters, envelopes, or packets, and in the cancellation of the postage-stamps thereon. It also makes the cancellation of
938 the postage-stamps more effectual or permanent, so as to prevent a second or reuse of such postage-stamps by any means whatever, which is very important in the successful management of the post-offices in this country, whereby, and by means of which, large sums of money are annually saved this government; and frauds upon the postal revenue by the second and reuse of postage-stamps are also prevented by the use of my invention and improvements herein contained, described, and set forth.

By the use of said invention the letters to be mailed and prepared for transportation, by means of post-marking the same, and in canceling the postage-stamps thereon, as aforesaid, need not be handled over but once, thus and thereby economizing in time and in labor.

The cross-bar, or piece B, figs. 1, 2, 3, and 5, may be of any suitable width or thickness, or of any metal which will answer the required purpose. It may also be of any length deemed best to use, in order to get the said post-marking device and the said postage canceling device, die, or type suitably arranged upon the lower surface of the same, and thereto firmly and securely fastened or attached in the manner substantially as aforesaid.

The type whereby to give the date are arranged in the said mortise E, as shown at figs. 3 and 6, and are there held in their proper place by means of a set-screw, substantially as shown in figs. 2, 3, and 6.

The cork or other material used for the canceling device, die, or type will be pressed into the said tube, or pipe, at recess F, cylinder C, fig. 2, and the same is there firmly held, substantially as shown at G, fig. 4.

The device or configuration for the cancellation of the postage-stamp, in the manner substantially as aforesaid, may be seen at (C and G), fig. 3, where cork is used. But when iron, steel, or other suit-
939 able metal is used, the device or configuration may be as seen at G′, fig. 6.

The invention and improvements contained in and covered by the several claims hereto annexed or below given is and are not contained in the letters patent granted on my application, in due form, on "the 9th day of August, 1869"; nor is, nor are, the same to be found in my said letters patent granted to me "December 16, 1862"; but the said invention and improvements are contained in my caveat duly filed in the United States Patent Office in the year 1853, containing, also, other improvements.

Having thus described my original invention and improvements in "post-marking" and "postage canceling" devices, combined and arranged for the purposes aforesaid,

What I claim, and desire to secure by letters patent of the United States of America, is—

1. The postage-stamp-canceling-device cylinder, or tube C, containing a die, or type, G, made of cork, wood, or other suitable material, or any equivalent for said cylinder, or tube, C, or for the canceling-die, or type, G, whereby to efface, cancel, or destroy the postage-stamp with indelible or other ink, in the manner and for the purposes substantially as herein described and set forth.

2. The canceling-device cylinder, or tube C, with cork or wood, or any substantial equivalent thereof, forming the die or type G, therein, in combination with the cross-bar, or piece B, and with the post-marking device D, substantially as and for the purposes herein described and set forth.

3. The post-marking of letters, envelopes, and packets, and the cancellation of the postage-stamps thereon with ink, at one and the same blow or operation of the instrument, in the manner and by the means substantially as herein described and set forth.

940 4. The employment and combination of a post-marking device with a postage-stamp-canceling device, both being operated by one and the same handle for the post-marking of letters, envelopes, or packets, and for the cancellation of the postage-stamps thereon, with indelible or other ink, in the manner substantially as herein described and set forth.

In testimony whereof I have, on this 12th day of July, 1869, hereunto set my h nd in the presence of two witnesses, to wit—

MARCUS P. NORTON.

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is certify that the annexed is a true copy from the records of this office of an assignment recorded in liber B[13], page 351.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-fifth day of July, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR,
Commissioner.

Liber B[13], page 351.

Whereas I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer and State of New York, did obtain letters patent of the United States of America for and upon improvements in "post-office post-marking and canceling hand stamp," which letters patent were issued and delivered and bearing date the fourteenth day of April, 1863, which letters patent have been twice reissued under and bearing date as follows, to wit, August 23d, 1864, and August 3d, 1869, the last of which is numbered 3586;

942 And whereas the invention and improvements contained in the said letters patent have been in general and continued use in the postal service of said United States since the first day of March, 1863, by the order and direction of the Postmaster-General; and whereas Helen M. Ingalls, of the said city of Troy, county, and State, is desirous of having and acquiring all the right, title, and interest which I now have and ever had in, to, or for the said invention, improvements, and

etters patent, and the several reissues of the same; also, any and every claim for past use of the same.

Now, therefore, this indenture and assignment witnesseth that for and in consideration of the sum of one hundred dollars to me, the said Marcus P. Norton, in hand paid, the receipt of which is hereby acknowledged, and in the further and other valuable considerations, the receipt of which is hereby duly acknowledged, I have sold, assigned, and transferred, and I do hereby sell, assign, and transfer unto the said Helen M. Ingalls, her heirs, assigns, and lawful representatives, all the right, title, and interest which I now have or ever had in the said invention, improvements, and letters patent, and the several reissues thereof; and I also sell, assign, convey, and transfer unto the said Helen M. Ingalls, her heirs, assigns, and lawful representatives, all the right, interest, or claim I now have against the Post-Office Department or Government of the United States aforesaid, for the past use of the said invention and improvements under the said letters patent, intending herein and hereby to sell, assign, and transfer unto the said Helen M. Ingalls and her lawful representatives all my right, title, interest, or claim for the past and future use of the said invention, improvements, and letters patent in the postal service of the United States by the Post-Office Department, and also the entire invention, improvements, and letters patent, and all
943 and every reissue of the same, each and every of which is to be held and enjoyed by the said Helen M. Ingalls, for her own use, benefit, and behoof, and for the use, benefit, and behoof of her legal representatives, to the full end of the term for which the said letters patent and said several reissues are or were granted, as fully and entirely as the same would have been held and enjoyed by me if this sale and assignment had not been made in the manner aforesaid; hereby selling and conveying unto her, the said Helen M. Ingalls, and her assigns and lawful representatives, all and every right, interest, privilege, title, or claim which I now have or ever had, in any way, manner, or form, under the said letters patent, and any and every reissue of the same, to the full end of the term of seventeen years, for which said letters patent were granted, on and commencing the fourteenth day of April, 1863, with full right, power, and authority to enforce, settle, and adjust the same for the past use of the said invention, improvements, and letters patent.

50. 50.
Marcus P. Norton.
October 23rd, 1869.
50. 50.

In testimony whereof I have hereunto set my hand and seal on this twenty-third day of October, 1869.

MARCUS P. NORTON. [SEAL.]

944 *Complainant's Exhibit K.—J. A. S., ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of

this office of the reissue letters patent granted Helen M. Ingalls, dated October 4th, 1870, No. 4143, for "improvement in post-office postmarking and canceling hand stamps."

In testimony whereof I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this eighth day of December, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

No. 4143. Reissue.

The United States of America, to all to whom these letters patent shall come:

Whereas Marcus P. Norton, of Troy, New York, assignor to Helen M. Ingalls, of same place, has alleged that he has invented a new and useful improvement in post-office postmarking and canceling hand-stamps (for which letters patent were issued to him, dated April 14, 1863, the same surrendered and new letters issued to him, dated August 23, 1864, which second letters were surrendered and new letters issued to him,
945 dated August 3, 1869, which last letters having been surrendered, as well as letters patent for improvement in hand-stamps, issued to Helen M. Ingalls, as assignee of said Marcus P. Norton, dated August 23, 1870, the said two letters patent last named have been canceled, and new letters ordered to issue to said assignee on two separate amended specifications), and has made oath that he is a citizen of the United States; that he verily believes he is the original and first inventor or discover of the said improvement, and that the same hath not to his knowledge and belief been previously known or used; said assignee having paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents praying that a patent may be issued therefor.

These are therefore to grant to the said Helen M. Ingalls, her executors, administrators, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, using, and vending to others to be used, the said improvement, a description whereof is given in the annexed schedule, and made a part of these presents.

In testimony whereof I have caused these letters to be made patent, and the seal of the Patent Office to be hereunto affixed.

Given under my hand at the city of Washington this fourth day of October, in the year of our Lord one thousand eight hundred and seventy, and of the Independence of the United States of America the ninety-fifth.

[L. S.] W. T. OTTO,
Acting Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.
SAML. S. FISHER,
Commissioner of Patents.

(Here follows diagram, marked page 946.)

Marcus P. Norton, of Troy, New York, assignor to Helen M. Ingalls, of same place. Letters patent No. 38175, dated April 14, 1863; reissue No. 1748, dated August 23, 1864; reissue No. 3586, dated August 3, 1869; reissue No. 4143, dated October 4, 1870; and also letters patent No. 106716, dated August 23, 1870. Division A. Improvement in post-office postmarking and canceling hand-stamps.

The schedule referred to in these letters patent and making part of the same.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer and State of New York, have invented new and useful improvements in "postmarking letters," "packets," etc., and in the "canceling" of the "postage-stamps" thereon, in the manner and by the means substantially as hereinafter described and set forth; that letters patent of the United States were duly issued thereon, under and bearing date April 14, 1863, which were assigned and transferred under a certain agreement, and by virtue of a certain instrument in writing, bearing date the 20th day of April, 1863, and recorded in the United States Patent Office, on the 8th day of March, 1864, in liber C[7], page 458, of Transfers of Patents, to Jacob Shavor and Albert C. Corse,
948 of said city of Troy, county, and State, and who, on or about the 23d day of February, A. D. 1864, duly reassigned and retransferred the said invention, improvements, and letters patent to the said Marcus P. Norton, inventor and assignee aforesaid, by a certain instrument in writing, duly executed and bearing date on the said 23d day of February, A. D. 1864, and which assignment and transfer from said Jacob Shavor and Albert C. Corse was duly recorded in the said United States Patent Office, on the 24th day of July, 1869, in liber U[11], page 319, of Transfers of Patents; on or about the 23d day of October, A. D. 1869, I, the said Marcus P. Norton, by deed of assignment in writing, did lawfully assign and transfer unto Helen M. Ingalls, of the city of Troy, State of New York, the said invention and letters patent, dated and reissued as hereinbefore stated and set forth, which deed of assignment was duly recorded in the United States Patent Office, on the 1st day of August, 1870, in liber B[13], page 351, of Transfers of Patents, and who is now the lawful owner thereof under and by virtue of the said sale, assignment, and transfer so made, executed, and delivered, and recorded as before stated. Now, therefore I, the said Marcus P. Norton, do hereby declare the following to be a full, clear, and exact description of the construction and operation thereof, reference being had hereinafter to the accompanying drawings and to the letters of reference marked thereon, which drawings, so marked and lettered, hereby make a part of these my specifications of and concerning my said invention and improvements herein contained and set forth.

Like letters refer to and represent like and corresponding parts of my said invention.

Figure 1 represents a side elevation of the postage-stamp canceling and postmarking device hereinafter described and set forth for canceling postage-stamps, with any suitable ink contained upon such
949 instrument, at the same time, blow and operation of the making

of the postmark on the letter, envelope, or packet, one side of and from such postage-stamp or frank so canceled.

Figure 2 represents a vertical section taken on a line through the centre of the various parts of the postmarking and postage-canceling device or instrument herein contained, described and set forth.

Figure 3 represents a face view of the device, showing the postmarking stamp ready for use, and the postage-canceling die or device, made of wood, used endwise, or of cork, rubber, or other suitable material therein inserted, in the manner substantially as shown and more at large described hereinafter.

Figure 4 shows a device for the purpose o fcanceling postage stamps or letter franks, used to represent value, by the use and power of any suitable ink by the means of wood, cork, or any elastic material for the type or die, which may be used for that purpose separate and alone, or in combination with any suitably-constructed post-marking stamp or device substantially as shown at Fig. 3 of the said drawings.

Figure 5 represents a vertical section of a post-marking and postage-stamp canceling device or die combined and constructed entirely of iron, steel, or other metal, and more fully described hereinafter.

Figure 6 is a plan or face view of Fig. 5, showing the postage-stamp canceling device or die made of iron, steel, or other suitable metal or material.

Figure 7 represents the wrench used for securing the dating-type in a proper place within the post-marking device, having the name of the town or post-office where used engraved thereon in relief letters.

Figure 8 represents the tool or instrument used for removing the cork, wood, or rubber die or type used for canceling postage-
950 stamps from the tube or surrounding case where held or contained, so as to repair or replace the same with a new one when worn out or unfit for use.

The nature of my said invention and improvements herein contained and described consists in the employment and combination of a device or die used for the more complete and perfect cancellation of postage-stamps or letter-franks by means of soft wood used endwise, or of cork, rubber, or other suitable material, whereby such stamp or frank is effaced and canceled, in and by indelible or other ink, in the manner substantially as herein described and set forth.

It also consists in the combination of a postage-stamp canceling device or die, constructed of wood, cork, rubber, or any suitable material, with any suitably arranged and constructed post-marking stamp or device, so as to cancel, efface or destroy the postage-stamp or letter-frank with indelible or any suitable ink at the same time, blow, or operation of the stamp or instrument by which the postmark is given or made upon the letter, envelope, or packet, substantially as herein described and set forth.

It also consists of the postmarking of letters, envelopes, or packets, and in the cancellation of the postage-stamp or stamps thereon, with, in, or by any suitable ink, or similar material, by means of some soft wood used endwise against the postage-stamp, or by the means of cork, rubber, iron, or steel, or by means of any other suitable material so combined with the post-marking stamp or instrument as to cancel, efface, or destroy the postage stamp or stamps at one and the same blow or operation of the entire instrument thus constructed for that purpose, whereby to prevent a second or re-use of such postage-stamp or stamps.

To enable others skilled in the art to which my said invention and improvements relate to make and use the same, I will here pro-

951 ceed to describe the construction and operation thereof, which are substantially as follows; that is to say:

I construct the post-marking device or stamp (D) of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device and die or type.

E, fig. 3, is the mortice or recess, of suitable dimensions to receive the type for the month, day of the month, and for the year, and called or known as the dating-type, around which is the name of the town or post office where used, in relief letters, and upon the lower face of such post-marking stamp or device.

I construct the postage-canceling stamp or device G (for the purpose of canceling in a more perfect and thorough manner the postage-stamps on letters, envelopes, or packets) of wood, used endwise upon the postage stamp, or of cork, rubber, or of any suitable or elastic material, and insert the same in the tube or recess F, which is that part of the canceling device marked C of the accompanying drawings, and which is connected to and combined with the said cross-piece B as herein described.

I prefer to have the diameter of the canceling device and die or type F, figs, 2, 3, and 4, about the same as the width of the postage-stamp to be canceled or destroyed by means of the same.

The said canceling die or type (G) may be of any length required, and so made as to correspond with the tube or recess F, and closely to fit the same, and it may be made of wood, cork, rubber, or of any elastic material as aforesaid.

The face of this device may contain a plan or form for canceling the postage-stamp in, with, or by ink, like unto that shown at fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

The said device, die, or type G will project somewhat below the face of the post-marking device D, if deemed best so to do, and it may 952 be removed out of the said tube or recess (F) by means of a pin or bolt, substantially like that shown at fig. 8, the lower end of which operates in and through the aperture *a*, figs. 2 and 4, for the purpose of repairs, or to replace it by a new one, when desired.

A is the operating handle, firmly secured to the cross bar B by any suitable mechanical means, and it will be made of wood, etc.

The said postage-stamp canceling device, die, or type G, being thus constructed of cork, wood, or rubber, or other elastic material, and combined with the said device C, with recess or tube (F) therein as aforesaid, will receive and contain, on the face or configuration thereof, the ink aforesaid, in quantities sufficient to permanently cancel, efface or destroy the postage-stamp whereon the same is used while post-marking letters, packets, etc., in such manner as to prevent the said postage-stamp being cleansed of the said canceling-ink by any chemical or other process; for the said canceling-ink so put upon the postage-stamp by means of said cork, die or type would be so effectual that any attempt or effort to remove it therefrom would entirely destroy, or nearly so, the aforesaid postage stamp, and thus and thereby render the same incapable for or of a second or other use without immediate detection.

The said cork, rubber, or other suitable elastic material used as aforesaid will render the said post-marking and postage-stamp canceling die or type of a more easy, and consequently rapid use, because of there being a yielding of the said canceling die or type G, when the blow is given upon the letter, envelope, or packet and postage-stamp as aforesaid; the operator will not tire as much by means of a constant,

continuous, and rapid use of the same; and it will also somewhat aid the operator in raising the entire instrument or apparatus from the paper or packet and postage-stamp when the impression thereon
953 and the cancellation of such postage-stamp shall have been given by the operator, in the manner substantially as aforesaid.

The said canceling type or die can be easily repaired, or replaced by a new one, whenever desired, and at very little expense; and such canceling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small bolt. In such case there would not be any tube or pipe surrounding said canceling die or type G. The operation and effect produced would in such case of construction be the same.

The said postage-stamp canceling device, die, or type G, may be of any desired distance from the aforesaid post-marking or dating device or stamp D, or it may be securely fastened to the immediate side of the said post-marking and dating part or stamp or device D by any convenient and suitable mechanical means.

The said canceling die, type, or device G, I prefer to use made of cork, as it will hold a much greater quantity of canceling-ink upon and in the lower face thereof, and when it comes in contact with the printed surface of the postage-stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with the said canceling-ink, whereby such postage-stamp, so operated upon and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be re-used, or used a second time, in fraud upon the postal revenue, without immediate detection of the same.

Soft wood, used endwise, will answer nearly the same purpose. Still, long and continued use, after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling die or type used upon postage-stamps as aforesaid.

954 The said tube or cylinder C, Figs. 2, 3, and 4, may be constructed in any suitable manner or by any convenient means, and thereafter fastened to the under side of the said cross-bar B in or by any mechanical means which will answer the required purpose. It may also be of any form or shape deemed best.

I also construct my said postage-stamp canceling device, die, or type of cast-iron, steel, or other suitable metal, substantially as shown at G′, Figs. 5 and 6, and which may be secured to the said cross-bar or piece B in like manner as the said tube or cylinder C, Figs. 2 and 4, and which is done either by screw and nut where the same unites with the said cross-bar, or it may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto.

The said post-marking and dating device D is also secured to the under side of said cross-bar or piece B, and at or near the end thereof, opposite that where said tube or cylinder C or canceling die, type, or device G is securely fastened, as aforesaid, in like manner and by substantially the same means as used for such fastening of said canceling device to said cross bar upon the under side of the same as aforesaid.

The aforesaid metal canceling device, die, or type G′, figs. 5 and 6, may also be fastened or secured to the immediate side of the said post-marking device by any good and sufficient means, substantially as hereinbefore described and set forth, in reference to the said device C, or

tube, or cylinder, constructed to receive and contain the said type or die G, figs. 2, 3, and 4.

Such metallic device, die, or type may also have upon its lower face or lower surface any suitable configuration deemed best to use for the purpose of canceling the postage-stamp in, with, or by any suita-
955 ble ink at the same time, blow, and operation of the instrument or apparatus, as hereinbefore stated and set forth.

In any and every case the postmarking of the letter, envelope, or packet, and the effacing or cancellation of the postage stamp or letter-frank thereon representing value, are done at the same time and by the same blow or operation of the said several devices and parts, constructed and combined in the manner and by the means substantially as herein described and set forth.

Both the postmarking and cancellation of the said postage-stamp are done with indelible or other and suitable ink, used for such cancellation or effacing of the postage stamp, and that, too, without any injury to the letter, envelope, or packet, or to the contents thereof, as would be the case were the said postage-stamp canceled by being cut in several parts or places by means of cutters or knives, constructed for that express use and purpose, as is the case by the cutters or knives contained and set forth in letters patent granted to me on the 9th day of August, A. D. 1859, also on the 16th day of December, A. D. 1862, the first of which contains no guard or guards to said knives or cutters, while the second contains such guard or guards, for the purpose of preventing such cutters or knives from cutting too much or too deep in and upon said postage-stamps.

The said instrument and devices herein set forth and described will not, under any circumstances, cut either the letter, envelope, or postage-stamp thereon in any way or manner, but perform the cancellation required to be done in, with, and by ink only, as aforesaid, no cutting device whatever being used. But the said cork device, die, or type will, when it comes in contact with the printed or enameled-like surface of the postage-stamp, somewhat mar, bruise, or break the same, by means of the blow given by the instrument, whereby to prepare
956 the same to be filled by or impregnated with any suitable ink used for such cancellation, substantially as aforesaid.

In no case could a fraud be committed by a second or re-use of the government postage-stamp, or letter-frank representing value, without being discovered.

This arrangement and combination of devices will greatly hasten or facilitate the making up of the mails for transportation. It will also economize in labor and reduce the labor in postmarking letters, and in the canceling of the postage-stamps thereon to about, if not entirely, one-half of the number of workmen, laborers, or clerks absolutely necessary when and where this combined instrument is not used in the manner aforesaid.

It therefore saves at least one-half of the labor required in the postmarking of letters, envelopes, or packets, and in the cancellation of the postage-stamps thereon. It also makes the cancellation of the postage-stamps more effectual or permanent, so as to prevent a second or reuse of such postage-stamps by any means whatever, which is very important in the successful management of the post-offices in this country, whereby and by means of which large sums of money are annually saved this government; and frauds upon the postal revenue, by the second and reuse of postage-stamps, are also prevented by the use of my invention and improvements herein contained, described, and set forth.

By the use of said invention the letters to be mailed and prepared for transportation, by means of postmarking the same, and in canceling the postage-stamps thereon as aforesaid, need not be handled over but once, thus and thereby economizing in time and in labor.

The cross-bar or piece B, figs. 1, 2, 3, and 5, may be of any suitable width or thickness, or of any metal which will answer the required purpose. It may also be of any length deemed best to use, in order
957 to get the said postmarking device and the said postage canceling device, die, or type suitably arranged upon the lower surface of the same, and thereto firmly and securely fastened or attached, in the manner substantially as aforesaid.

The type, whereby to give the date, are arranged in the said mortise E, as shown at figs. 3 and 6, and are there held in their proper place by means of a set-screw, substantially as shown in figs. 2, 3, and 6.

The cork or other material used for the canceling device, die, or type will be pressed into the said tube or pipe at recess F, cylinder C, fig. 2, and the same is there firmly held, substantially as shown at G, fig. 4.

The device or configuration for the cancellation of the postage-stamp in the manner substantially as aforesaid may be seen at C and G, fig. 3, where cork is used; but when iron, steel, or other suitable metal is used, the device or configuration may be seen at G′, fig. 6.

The invention and improvements contained in and covered by the several claims hereto annexed or below given is and are not contained in the letters patent granted on my application, in due form, on "the 9th day of August, 1859," nor is nor are the same to be found in my said letters patent granted to me "December 16, 1862"; but the said invention and improvements are contained in my caveat duly filed in the United States Patent Office in the year 1853, containing, also, other improvements.

Having thus described my original invention and improvements in "postmarking" and "postage-canceling" devices, combined and arranged for the purposes aforesaid,

What I claim, and desire to secure by letters patent of the United States of America, is—

1. The postage-stamp-canceling device, cylinder or tube C, con-
958 taining a die or type, G, made of cork, wood, or other suitable material, or any equivalent for said cylinder or tube C, or for the said canceling die or type G, whereby to efface, cancel, or destroy the postage-stamp with indelible or other ink, in the manner and for the purposes substantially as herein described and set forth.

2. The canceling device, cylinder or tube C, with cork or wood, or any substantial equivalent thereof, forming the die or type G, therein, in combination with the cross bar or piece B, and with the postmarking device D, substantially as and for the purposes herein described and set forth.

3. The postmarking of letters, envelopes, and packets, and the cancellation of the postage-stamps thereon with ink, at one and the same blow or operation of the instrument, in the manner and by the means substantially as herein described and set forth.

4. The employment and combination of a post-marking device with a postage-stamp canceling device, both being operated by one and the same handle, for the post marking of letters, envelopes, or packets, and for the cancellation of the postage-stamps thereon with indelible or other ink, in the manner substantially as herein described and set forth.

In testimony whereof I have on this 14th day of September, 1870, hereunto set my hand, in the presence of two witnesses, to wit:

MARCUS P. NORTON.

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an assignment recorded in Liber X^{13}, page 316.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-fifth day of July, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR,
Commissioner.

X^{13}, p. 316.

Whereas I, Helen M. Ingalls, formerly of Troy, New York, am the owner by mesne assignment of one undivided third part of the entire interest granted by the United States to Frederick G. Ransford and Peter Low, as assignees of Marcus P. Norton, by letters patent, granted August 9th, A. D. 1859, for improvement in post-marking hand stamps;

And whereas I am in like manner the owner of the entire interest in three other patents for improvements in post-marking and postage canceling stamps granted by the United States to said Marcus
960 P. Norton, which said letters patent are respectively dated as follows, viz:

1st patent dated December 16th, A. D. 1862.

2d patent dated April 14th, A. D. 1863, and subsequently reissued August 23d, A. D. 1864, and again reissued August 3d, A. D. 1869, and again reissued as Div. A, on the 4th of October, A. D. 1870, and 3d patent dated July 13th, A. D. 1869;

And whereas Wm. W. Secombe, of the city and State of New York, is willing to accept the ownership and charge thereof:

Now, therefore, in consideration of the sum of five dollars, to me in hand paid by said Wm. W. Secombe, I have assigned, transferred, and set over, and by these presents do assign, transfer, and set unto the said Wm. W. Secombe and his assigns and personal representatives, all my right, title, and interest in and to each and all of the above recited letters patent, as fully as the same are vested in me, to have and to hold the same in trust for myself, my sister Minnie D., wife of said Marcus P. Norton, and the children of said Marcus P. Norton, as follows:

The said Wm. W. Secombe may manufacture under said patents, or grant licenses to others to manufacture, or may sell and assign said letters patent or any of them.

And I also assign to said Wm. W. Secombe all my right to compensation for the past use of said letters patent, or any of them, by the

United States or others, as conveyed to me by said Marcus P. Norton, on the twentieth day of October, A. D. 1869, and recorded in Liber B[13], p. 351, of transfers of patents, in the Patent Office of the United States; authorizing him to collect and receipt for the same.

The proceeds of sales, licenses, or collections to be accounted for according to the following rule: Said trustee is first to pay all the expenses of the trust, and reserving his compensation as trustee, to
961 pay over the balance of money remaining in his hands according to the terms of a declaration of trust executed contemporaneously herewith, to myself and the said wife and children of said Marcus P. Norton.

Executed at Washington, D. C., this fourth day of March, A. D. 1871.

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of the reissue letters patent granted Secombe Manufacturing Company, dated October 4th, 1870, No. 4144, for "Improvement in hand canceling stamps."

In testimony whereof, I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this eighth day of December, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

(Here follows diagram marked page 963.)

No. 4144. Reissue.

The United States of America to all to whom these letters patent shall come:

Whereas Marcus P. Norton, of Troy, New York, assignor, by mesne assignments, to the Secombe Manufacturing Company, of New York, New York, has alleged that he has invented a new and useful improvement in hand canceling stamps (for which letters patent were issued to him dated April 14, 1863, the same surrendered, and new letters
964 issued to him dated August 23, 1864; which second letters were surrendered, and new letters issued to him dated August 3, 1869; which last letters having been surrendered, as well as letters patent for improvement in hand stamps, issued to Helen M. Ingalls as assignee of said Marcus P. Norton, dated August 23, 1870; the said two letters patent last named have been canceled and new letters ordered to issue

to said assignee on two separate amended specifications), and has made oath that he is a citizen of the United States, that he verily believes he is the original and first inventor or discoverer of the said improvement, and that the same hath not, to his knowledge and belief, been previously known or used; said assignee having paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents praying that a patent may be issued therefor:

These are therefore to grant to the said Secombe Manufacturing Company, its successors, or assigns, for the term of seventeen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, using, and vending to others to be used, the said improvement, a description whereof is given in the annexed schedule and made a part of these presents.

In testimony whereof I have caused these letters to be made patent, and the seal of the Patent Office to be hereunto affixed.

Given under my hand at the city of Washington this fourth day of October, in the year of our Lord one thousand eight hundred and seventy, and of the Independence of the United States of America the ninety-fifth.

[SEAL.] W. T. OTTO,
Acting Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.
SAM'L S. FISHER,
Commissioner of Patents.

965 UNITED STATES PATENT OFFICE.

Marcus P. Norton, of Troy, assignor, by mesne assignments, to the "Secombe Manufacturing Company," of New York, N. Y. Letters patent No. 38175, dated April 14, 1863; reissue No. 1748, dated August 23, 1864; reissue No. 3586, dated August 3, 1869; reissue No. 4144, dated October 4, 1870; and also letters patent No. 106716, dated August 23, 1870. Division B. Improvement in hand canceling stamps.

The schedule referred to in these letters patent and making part of the same.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer, and State of New York, have heretofore invented certain new and useful improvements in a "device or machine for printing, for dating upon, and for canceling internal-revenue stamps" of value, by cutting, puncturing, or piercing them at the same time and operation of printing or forming the date thereon in the manner and by the means substantially as herein described and set forth; which said invention, after having been duly sold, assigned, and transferred to Helen M. Ingalls, of said city of Troy, county, and State, by deed of assignment dated on the 9th day of August, 1870, and duly recorded in the United States Patent Office on the 9th day of Au-
966 gust, 1870, in Liber H[13], page 132, of Transfers of Patents; and the same was thereafter duly sold, assigned, and transferred by her, the said Helen M. Ingalls, to the "Secombe Manufacturing Company," of the city, county, and State of New York, by an instrument in writing, bearing date on or about the 29th day of August, 1870, and

which was duly recorded in the United States Patent Office on the 31st day of August, 1870, in Liber W[12], page 388, of Transfers of Patents; now, therefore, I, the said Marcus P. Norton, do hereby declare the following to be a full, clear, and exact description of the nature, construction, and operation of the same, reference being hereby had to the accompanying drawings and to the letters of reference marked thereon, which drawings so marked and lettered make a part of these specifications of my said invention and improvements for the cancellation of internal-revenue stamps, and now owned by the "Secombe Manufacturing Company," as before stated and set forth.

Like letters represent and refer to like or corresponding parts upon the accompanying drawings, made in one sheet, and marked "Division B," and which are a part of these specifications.

Figure 1 is a vertical section on a line through or near the centre of the canceling device or machine herein described and set forth.

Figure 2 is a side elevation and view of the same machine.

Figure 3 is a plan or face view of the said device, or machine, or invention, showing the printing, forming, or dating, and the cutting or puncturing parts, device, and devices.

Figure 4 represents an ordinary stationary frame to receive and contain such printing or dating and cutting parts or device or devices.

Figure 5 shows a face or plan view and a vertical section on a line crosswise the cutting-canceling device, at or near the centre of the machine or device herein described and set forth, showing the type
967 or device for printing or forming the date upon the revenue stamp, arranged between and combined with the outside cutting, puncturing, or piercing devices.

Figure 6 shows a plan or face view and a vertical section on a line substantially the same as described under Fig. 5, and showing the cutters, knives, or canceling device used for cutting, puncturing, or piercing the revenue stamp, arranged between the type or device for printing or forming the month, the day of the month, and the year upon said revenue stamp.

The nature of my said invention and improvements consists in the employment of cutters, knives, or cutting-canceling device, constructed of any width, thickness, or length required for cutting, puncturing, or piercing the internal-revenue stamp in one or more places, or in such place or places as may be desirable, and so arranging and combining the same with the type or device for the date as to print or form the month, the day of the month, and the year, or the date, upon such revenue stamp at the same time and operation of such cutting, puncturing, or piercing thereof for the cancellation, thus and thereby securing a more perfect and permanent cancellation of the revenue stamp, with the date of the same printed or formed thereon in a plain and intelligible manner, in the midst of, or outside of, or between such cuts, piercings, or punctures, substantially as herein shown, described, and set forth, so as to prevent frauds upon the government by or from a second or reuse of the same, after having been once used in the payment of the government tax, as by law required.

To enable others skilled in the art to which my said invention relates to make and use the same, I will here proceed to describe the construction and the operation of the same, which is substantially as follows, to wit:

968 A, Figs. 1, 2, and 3, represents a device or machine for containing and firmly holding the cutting-canceling and dating devices herein described and specified, and it may be of any desired diameter or

size whereby the better to carry into successful operation my said invention.

The said cutting, puncturing, or piercing device, or cutters, or knives *a*, are arranged and combined with the type or dating device or devices for the printing or forming of the month, the day of the month, and the year or the date, either between and outside of the same, as shown; or such cutters, knives, or cutting-canceling device may only be arranged outside of the said type or dating device; or the same may be arranged immediately between such dating type or device; or the same may be arranged in a close and parallel line with the dating-type or device; or the said dating-type or device may be arranged with such cutting, puncturing, or piercing device or parts, so that some of the knives or cutters will be outside of and other ones between the said type, as may be the most efficient and successful in canceling the said revenue stamp.

The said cutting-canceling device should be made of fine cast-steel, and it may be made in one or more parts, cutters, or knives, and then arranged with the dating-type or device, substantially in the manner herein described and set forth; such cutters, knives, or cutting canceling device, have sharp edges constructed upon the lower end thereof, by the which the cutting, puncturing, or piercing of the revenue stamp is thoroughly done at the same time and operation of printing or forming the date upon the same for the cancellation of such stamp, and giving and showing thereon the date of that cancellation.

At Figs. 1, 3, 5, and 6 of the accompanying drawings—

d is the type for the month;

e is the type for the day of the month;

f is the type for the year; and

969 *a*, same figures, is the cutting device for cutting, puncturing, or piercing the said revenue stamp, thereby canceling it, when, or at the time the date thereof is printed, or formed, or impressed upon it, substantially as herein described and set forth.

In any and every modification of my said invention shown or described, the cutting, puncturing, or piercing device or devices will be so arranged and combined with the dating-type or device as to cancel the revenue stamp upon its exposed surface, by the union of those devices, at the same time and operation of the entire machine.

When the said revenue stamp shall have been canceled by the use or means of my said invention, device, or canceling-machine, it will be cut, punctured, or pierced, in one or more places, and the date will have been formed thereon at the same blow or operation of the machine, substantially as shown by the accompanying drawings, and as herein described and set forth, cutting through the revenue stamp and into or through the paper, to or upon which it shall have been affixed in the usual manner of affixing revenue stamps to paper or documents in payment of the government tax.

Such cancellation will prevent frauds upon the government revenue, from or by a second or reuse of the revenue stamp, as the cutting, or puncturing, or piercing, and the dating of and upon the same will greatly discourage any illegal or unlawful use of the revenue stamp once used, as by law provided; and if the same shall have been used a second time, or reused in any form, the same will be detected and exposed by reason of and on account of the aforesaid mode or manner of the cancellation of such revenue stamps.

Each and every part or device contained in my said machine and invention, and hereinbefore mentioned and specified, must be constructed

of proper and durable material, and of such size and strength as
970 shall the more successfully carry out and into operation my invention and improvements hereinbefore named and set forth.

The aforesaid canceling and dating apparatus, having suitably-constructed knives or cutters and type or dating device united and combined into one device or machine, for the purpose of canceling revenue stamps by cutting and dating upon the exposed or upper surface of the said stamp, may have surrounding the same the name of any person, office, bank company, business firm, officer, or corporation, so as to print or form upon the revenue stamp such name as shall perform the work of such cancellation, substantially as shown at Figs. 3, 5, and 6, of the accompanying drawings.

The machine, device, or instrument aforesaid described, is operated by a downward blow or force of the same upon the immediate and exposed surface of the revenue stamp.

But one blow or operation of such machine or device will be required to secure the aforesaid cancellation; still, however, more than one blow or operation of such machine may be given, if found necessary to do perfect work, as contemplated and provided in or by the construction or manufacture of my said machine, invention or device.

The above-described canceling and dating device, so constructed and combined, may be arranged for practical use and operation in any suitable manner, and the same inked for such use by means of a suitable roller passing over the surface of the same, in any usual and well-known manner or the same may be inked for use by means of a chemically prepared inked ribbon, in the usual and well-known manner, or the same may be inked for use in any other suitable manner, and by any suitable and convenient means.

Having thus described my said invention and improvements,

What I claim, and desire to secure by the letters patent of the United States of America, is—

971 In an internal revenue stamp canceling device, or machine, the arrangement and combination of cutters, or knives (or cutting-canceling device), with the dating, printing, or forming-type, or device, substantially as shown and described, so as to cancel revenue stamps by cutting, puncturing, or piercing the same, and by the printing or forming the date thereon, in the manner substantially as herein specified and set forth.

In testimony whereof, I have, on this 14th day of September, 1870, hereunto set my hand, in the presence of two witnesses.

MARCUS P. NORTON.

Witnesses:
FREDK. KOONES.
EDW. W. DONN.

972 *Complainant's Exhibit N.—J. A. S., ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an assignment recorded in liber B [17], page 430.

In testimony whereof, I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-fifth day of July, in the year of our Lord one thousand eight hundred

and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR,
Commissioner.

Liber B [17], page 430.

Whereas, at various times and under several and different dates, the letters patent of the United States of America were issued upon the application and petition of Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, for and upon improvements in hand printing and dating stamps, post-office postmarking stamps, internal revenue dating and canceling stamps, and for other improve-
973 ments not necessary here to name, among which were letters patent of the following date, to wit, January 14, 1862; December 16, 1862; August 4, 1865; and also during the years 1870 and 1871;

And whereas the aforesaid invention and letters patent were duly assigned, sold, and conveyed to the "Secombe Manufacturing Company," located at and doing business in the city, county, and State of New York, by the said Marcus P. Norton, inventor, and by Helen M. Ingalls, assignee of said Marcus P. Norton, which several deeds of assignment were duly recorded in and are now of record in the Patent Office of the United States, to which reference is now and hereby had for a more full and perfect description and understanding of the inventions and of the letters patent sold, assigned, and conveyed unto said Secombe Manufacturing Company by the said Marcus P. Norton and Helen M. Ingalls, assignee of said Marcus P. Norton or by either of them. And reference is now and hereby had to the invention and to the several letters patent mentioned in the said deeds of assignment to the said Helen M. Ingalls by the said Marcus P. Norton, and by the said Helen M. Ingalls and said Marcus P. Norton, or either of them, to the said "Secombe Manufacturing Company," or to William W. Secombe, as president of the said manufacturing company, for a more full and perfect description of the said several letters patent and inventions, and improvements so sold and conveyed, and herein and hereby sold and conveyed as hereinafter written;

And whereas the said Helen M. Ingalls is desirous of having and obtaining each and every of the aforesaid letters patent, inventions and improvements now held and owned by the said "Secombe Manufacturing Company," or by the said William W. Secombe, as president;

And whereas the said Helen M. Ingalls has purchased of the
974 said "Secombe Manufacturing Company" and of William W. Secombe, president, each and every of the aforesaid named and described inventions, improvements, and letters patent:

Now, therefore, for and in consideration of the sum of one thousand dollars, and in the other and further and valuable considerations, the receipt of which is hereby acknowledged, and in the additional consideration that the said Marcus P. Norton shall make no claim against the said "Secombe Manufacturing Company" for professional services rendered, we, the said Secombe Manufacturing Company, and William W. Secombe, president, have sold, assigned, and conveyed, and we do hereby sell, assign, and convey unto the said Helen M. Ingalls, her heirs, assigns, and executors, each and every of the said inventions, improvements, and letters patent, and all of our right, title, and interest in the same, or in either thereof, now and forever. The same to be held and enjoyed by the said Helen M. Ingalls, for her own benefit and behoof, and for the ben-

efit and behoof of her legal representatives, to the full end of the term or terms for which the said letters patent are granted or may be hereafter granted, issued, or extended, renewed, or reissued, as fully and freely as the same would or could have been held and enjoyed by us had this sale and assignment not been made as and in the manner aforesaid.

It is also the intention to sell, assign, and convey to said Helen M. Ingalls, each and every application for letters patent or for reissue of any letters patent, or for any extension of any letters patent, now pending in the U. S. Patent Office in the name of said Marcus P. Norton, in which said "Secombe Manufacturing Company," or by said William W. Secombe, president, have, or claim to have, any interest, right, or title whatever, and we do hereby sell, assign, and convey, now and forever, any and every right, title, claim, or interest we have, or either
975 have, in, to, or for any such pending case or application, to the said Helen M. Ingalls, her heirs and assigns, now and forever.

Meaning to convey, and we do hereby convey, unto her, the said Helen M. Ingalls, each and every claim, right, title and interest we now have, or can or would have, in any of said inventions, improvements, and letters patent, by means or reason of any contract between us, or either of us, and said Marcus P. Norton and Helen M. Ingalls, or either of them, in, to, or for the said inventions and said letters patent, or either of them, so that they, and each of them, shall have and possess the same rights, titles, interests, and privileges they, and each of them, would have *have* had and did have at the time of the making and executing of the said several deeds of assignments of said inventions, improvements, and letters patent to said "Secombe Manufacturing Company," or William W. Secombe, president.

In testimony whereof, I have, on this tenth day of July, A. D. 1873, hereunto set the hand and seal of the said "Secombe Manufacturing Company," and of the said William W. Secombe, president.

SECOMBE MANUFACTURING COMPANY. [SEAL.]
W. W. SECOMBE, *President*. [SEAL.]

976 *Complainant's Exhibit O.—J. A. S., ex'r.*

39th Congress, 1st session. House of Representatives. Report No. 98.

NORTON'S MARKING AND CANCELING STAMP.

(July 24, 1866.—Ordered to be printed.)

Mr. Ferry, from the Committee on the Post-Office and Post-Roads, made the following report:

The Committee on the Post-Office and Post-Roads, to whom was referred a "letter from the Postmaster-General transmitting additional papers relating to Norton's marking and canceling stamp," report:

That they find that letters patent of date April 14, 1863, were granted to Marcus P. Norton, of the city of Troy, N. Y., and by him assigned to Jacob Shavor and Albert C. Corse, on the 20th day of April, 1863, and duly recorded, as required by law, and a reissue granted to said Shavor-

and Corse on the 23d day of August, 1864; which said invention, so patented, assigned and reissued, was for and upon improvements in "post-office postmarking and postage-stamp canceling device," and which invention has been in practical and continuously exclusive use by and under the order and direction of the Postmaster General since the 1st of April, 1863, without compensation whatever to said patentees, nor upon any other stipulation than their consent that the same might
977 thus be used until its utility and advantage to the government should be effectually tested, when a fair and equitable compensation for either its use or the patent should be made to them by the government.

The invention having been sufficiently proved, and its utility satisfactorily tested by uninterrupted use in various post-offices of the States, application was made to the Thirty-eighth Congress for compensation therefor, in accordance with the informal stipulation already referred to. Another claimant to said invention appearing, the committee of that Congress who were then considering the subject of compensation decided that since the validity of the title to the same was called in question, that should first be determined by the courts, and the case was accordingly thereupon remanded.

By a transcript of the proceedings and judgment, now submitted as rendered in the United States circuit court of the northern district of the State of New York, it appears that the question of validity of title was tried and decided in favor of the patentees, Shavor and Corse. Again, therefore, the patentees appear before the present Congress, claiming a suitable remuneration for their invention, on condition of an assignment of all their right and title to the same to the United States.

The value of this invention to the government is verified in the nature and manner following, to wit:

Having in use the said stamp, the postmasters at Washington, District of Columbia; Baltimore, Maryland; New York City, Brooklyn, Albany, Troy, Syracuse, Rochester, and Buffalo, New York; Hartford, Connecticut; Boston, Springfield and Worcester, Massachusetts; Cincinnati, Ohio; Detroit, Michigan; and Chicago, Illinois, formally certify that in their several offices the government is thereby saved from one-third to one-half the stamping and canceling clerk-hire theretofore employed, and that "it greatly facilitates the despatch of letters for
978 transportation in the mails"; that "it greatly economizes in time in the making up of the mails for transportation"; that "it cancels, in the most perfect and permanent manner the postage stamps on letters, packets, &c., and, at the same time, gives on the envelope an intelligent postmark"; and that "it prevents frauds by the chemical cleansing or washing of postage stamps for reuse or reissue after once used."

Its utility, facility, and economy are so far established that it is being introduced to the larger post-offices of the States as rapidly as they can be supplied. The government has contracted for their manufacture with Messrs. Fairbanks & Co., of New York, at the price of six dollars each, and is now supplying offices at the average rate of five hundred per annum. From the interruption of postal facilities, growing out of the late rebellion, the Southern States have not been supplied, but will be, as stated by the Postmaster-General, as fast as the department can effect their introduction.

The Post-Office Department seems committed to their general and continuous use, so long at least as no other improvement shall commend supersedure. The nearest approach to a practical substitute for this in-

vention is one of English device, manufactured by Turner & Co., London, and to be seen at the Washington post-office. This is a more complex and expensive stamp. Its only novel merit is self-inking. The stamp employed is the same combination of stamping and canceling covered by the "Norton patent," and is claimed by him to be an infringement of his invention, and that he holds a patent for his like combination stamp under the English crown of date February 4, 1863. The similarity of the two stamps, in this respect, is quite obvious. The cost of this English stamp is one hundred dollars, ninety-four dollars more than the Norton make, and, by the complication of its structure, must, by use, be subject to frequent repairs. A trial of the two methods
979 of execution, fairly tested in the presence of your committee, attested the superiority of the Norton stamp. The same number of letters (100) was stamped and canceled by the Norton stamp in twenty-eight seconds, which by the same operator required forty five seconds with the English stamp. The Norton stamp is therefore deemed the most perfect and serviceable device extant. The government, in consulting its interest, has fully committed itself to its adoption, and over three years' use determines it an indispensable requisite to the safe, rapid, and economical operation of marking, stamping, and canceling in the postal department.

The patentees claim, as a just compensation for the title and past and future use of their said invention, the sum of one hundred and twenty-five thousand dollars.

The Postmaster-General, on the other hand, in a letter on the subject, filed with the papers in the case, recommends as a proper compensation therefor the sum of twenty thousand dollars, and the further sum of $12,282.70, with interest, being the amount of expenses incurred by the patentees in establishing their legal title to the invention. It is set forth in said letter from the Postmaster-General that at the date thereof the government saved by the use of said stamp the compensation of 254 clerks of the various salaried classes. At an average salary of $800 per annum, this saving would amount to the sum of $203,200, and an aggregate at this rate, for the three years the government has enjoyed the use of the stamp, the sum of $609,600. In view of this computable saving directly traceable to the use of this stamp, and without approximating the gain by its future use in many more offices throughout the States where they are being rapidly substituted for the old discarded device, it would seem that the sum stated by the Postmaster-General is not an adequate or just compensation for such undeniable and
980 valuable benefits which the government derives. The committee, therefore, after a thorough consideration of the subject, have determined upon the sum of fifty thousand dollars as a full and just compensation to the patentees for the use of and the device and patent, with the alternative that if not accepted by the patentees withing thirty days from the approval of the resolutions providing for the same, as in full compensation for their claim, and the transfer of the patent, they, by their non-acceptance, elect to receive whatever may be adjudged to them therefor by the Court of Claims as full and final payment. To carry out such determination, the committee recommend the passage of the accompanying joint resolutions.

981 *Complainant's Exhibit P.—J. A. S., ex'r.*

Senate. 30th Congress, 2d session. Rep. Com. No. 164.

(In the Senate of the United States, February 9, 1867.—Ordered to be printed.)

Mr. VAN WINKLE made the following report (to accompany Senate bill No. 582):

The Committee on the Post-Offices and Post-Roads, to whom was referred the petition of Jacob Shavor and Albert C. Corse, asking compensation for past and future use of "Norton's marking and canceling stamp," report:

That they have duly considered the same, and they find that letters patent, dated April 14, 1863, were granted and issued to Marcus P. Norton, of the city of Troy, New York, and by him assigned to Jacob Shavor and Albert C. Corse, on the 20th day of April, 1863, and duly recorded as by law provided, and afterwards a reissue granted to said Shavor & Corse, on the 23d day of August, 1864, as by law provided, which said invention, so patented, assigned, and reissued, was for and upon improvements in "post marking and postage-canceling device," and
982 which invention has been in practical and continuously exclusive use, by and under the order and direction of the Postmaster-General, since the 1st day of April, 1863, the said invention having previously been tested in the most thorough manner in the New York City post-office for more than one year, and approved and recommended to the Postmaster-General by that office, without any compensation whatever to the said inventor or said assignees, nor upon any other stipulation than his and their consent that the same might thus be used until its utility and advantages to the government should be effectually tested, when a fair and equitable compensation for either its use or the patent should be made to them by the government.

This invention having been sufficiently proven as a labor-saving instrument, and its utility in every respect satisfactorily tested by uninterrupted use in various post-offices in the United States, application was made to the Thirty-eighth Congress for compensation therefor, in accordance with the informal stipulation already referred to. Another claimant to said invention appearing, the House committee of that Congress, who were then considering the subject of compensation, decided that since the validity of the title to the same, as well as that of prior invention, was called in question, that should first be determined by the courts, and the case was accordingly thereupon remanded.

By a transcript of the proceedings and judgment now submitted as rendered in the United States circuit court for the northern district of New York, it appears that the questions of invention and of the validity of title were tried, and decided in favor of the patent and the assignees, Shavor & Corse. Again, therefore, the assignees appear before the present Congress, claiming a suitable remuneration for said invention and patent, on condition of an assignment of all their right and title to the same to the United States.

983 The value and importance of this invention to the government is verified in the nature and manner following, to wit:

Having used the said invention, the postmasters at Washington, District of Columbia; Baltimore, Maryland; New York City, Brooklyn, Albany, Troy, Syracuse, Rochester, and Buffalo, State of New York; Hartford, Connecticut; Boston, Springfield, and Worcester, Massachu-

setts; Cincinnati, Ohio; Detroit, Michigan; and Chicago, Illinois, formally certify that, in their several offices, the government is thereby saved from one-third to one half the stamping and canceling clerk hire theretofore required and employed, and that "it greatly facilitates the despatch of letters for transportation in the mails"; that "it greatly economizes in the time in the making up of the mails for transportation"; that it "cancels, in the most perfect and permanent manner, the postage stamps on letters, packets, &c., and, at the same time, gives on the envelope an intelligent postmark"; and that "it also contributes to prevent frauds on the revenue by the chemical cleansing or washing of postage stamps for reuse or reissue after once used."

Its utility, facility, and economy in labor are so far established that the invention is being put into use in the larger post offices of the United States as rapidly as they can be supplied by the government manufacturers. The government has contracted for their manufacture with Messrs. Fairbanks & Co., of New York, at a price of six dollars each, whose contract bears date on or about the 1st day of April, 1863, and for a term of four years, and consequently it will expire on the 1st day of April, 1867. The Post Office Department is now supplying post offices at the rate of more than five hundred per annum.

The government, in consulting its interest, has fully committed itself, though the Post Office Department, to the adoption, general, and
984 continuous use of said invention; and over four years' use determines it an indispensable requisite to the safe, rapid, and economical operation of marking, stamping, and canceling in the postal department.

It is shown by a letter from Postmaster-General Dennison, under date of 15, 1866, addressed to Senate Committee on the Post Offices and Post Roads, that at that time the government was saving, by the use of said invention, the compensation annually of two hundred and fifty-four clerks of the various salaried classes. At an average salary of $900 per annum, this saving for labor alone would amount to the sum of $228,600, and an aggregate at this rate for the four years which the government has already enjoyed the use of this invention, it will amount to the sum of $914,400, to say nothing of the other benefits and advantages derived from this invention during the past four years. In view of this saving in labor, directly traceable to the use of said invention, the saving must be much larger annually, by its future and increased use in many more and other large post offices throughout the United States, where the Norton stamp is being rapidly substituted for the old, unreliable, and discarded device, used prior to the making of the Norton invention aforesaid.

The present Postmaster-General, in his letter to this committee, bearing date January 15, 1857, states that the Post Office Department has already saved several hundred thousand dollars by the use of said invention; that the question of value to that department has long since been settled; that the continued use of the invention by that department is a necessity beyond question; that it is the best invention there is for the post-marking of letters and packets, and for the cancellation of stamps thereon, and that there is no doubt but that the government will continue to save large sums by its future use.

The committee, therefore, after a most thorough examination
985 and consideration of the whole subject, have determined upon the sum of ($100,000) one hundred thousand dollars, as a full and just compensation to the assignees, Shavor & Corse, for the past and future use of said invention and patent, as in full compensation for the transfer

of the said patent to the Post Office Department. To carry out such determination, the committee recommend the passage of the accompanying bill.

986 *Complainant's Exhibit Q.—J. A. S., Ex'r.*

Senate. 41st Congress, 2d Session. Report No. 243.

In the Senate of the United States. July 6, 1870.—Ordered to be printed.

Mr. RAMSEY made the following report (to accompany joint resolution S. R. No. 207):

The Committee on Post Offices and Post Roads, to whom were referred the petition and accompanying papers of Marcus P. Norton, and Charles Eddy acting as trustee for himself and Jacob Shavor and Albert C. Corse, asking a settlement and compensation for the past and for the future use of Norton's post-marking and postage stamp canceling device or instrument, report:

That they have duly considered the same, and they find that the letters patent of the United States of America, dated the 14th day of April, 1863, were duly granted and issued to Marcus P. Norton, of the city of Troy, in the State of New York, and that the same were twice reissued under and bearing the following dates, to wit, August 23,
987 1864, and August 3, 1869, as by law provided, which invention and improvements so patented and reissued were for and upon a device or instruments for the post marking of letters and other mail matter, and for the cancellation of the postage stamps thereon. The device, as a whole, consists of two separate and distinct instruments, combined by suitable mechanical means into one device or machine, so that the post-marking was and is done upon the envelope of the letter at the same time and operation of the cancellation of the exposed surface of the postage-stamp by the canceling device or instrument coming into contact therewith, in the manner fully and particularly specified in said letters patent, whereby a more successful and permanent cancellation was secured, thereby preventing frauds by a second or reuse of washed or chemically cleaned postage stamps. The canceling instrument consists of the use of cork, rubber, or other suitable elastic material secured in proper position and especially constructed and arranged for successful operation, and operated in conjunction with the post-marking instrument by mechanical means constructed for that purpose. Upon the lower surface of such canceling instrument is constructed any form or configuration desirable for the purpose of holding a quantity of ink sufficient to impregnate and destroy the postage-stamp, thereby rendering the cancellation of the same permanent. The cork, rubber, or soft wood used endwise, upon coming into contact with the enameled like, or hard-ink surface of the postage stamp, by the blow or force of the instruments so combined will to a certain degree mar or break such ink and exposed surface of the stamp as to permit or allow the same instrument to inject into and impregnate the fibers of the paper of the postage stamp with ink of such kind or quality as may be used, and showing at once a full and perfect cancellation of the postage-stamp.

988 This invention and device has been in practical and continuously exclusive use in the postal service of the United States, by and under the order and directions of the Postmaster-General, since the month of March, 1863, it having been previously tested and experimented with in the most thorough manner in the New York City post-office for

setts; Cincinnati, Ohio; Detroit, Michigan; and Chicago, Illinois, formally certify that, in their several offices, the government is thereby saved from one-third to one half the stamping and canceling clerk hire theretofore required and employed, and that "it greatly facilitates the despatch of letters for transportation in the mails"; that "it greatly economizes in the time in the making up of the mails for transportation"; that it "cancels, in the most perfect and permanent manner, the postage stamps on letters, packets, &c., and, at the same time, gives on the envelope an intelligent postmark"; and that "it also contributes to prevent frauds on the revenue by the chemical cleansing or washing of postage stamps for reuse or reissue after once used."

Its utility, facility, and economy in labor are so far established that the invention is being put into use in the larger post offices of the United States as rapidly as they can be supplied by the government manufacturers. The government has contracted for their manufacture with Messrs. Fairbanks & Co., of New York, at a price of six dollars each, whose contract bears date on or about the 1st day of April, 1863, and for a term of four years, and consequently it will expire on the 1st day of April, 1867. The Post Office Department is now supplying post offices at the rate of more than five hundred per annum.

The government, in consulting its interest, has fully committed itself, though the Post Office Department, to the adoption, general, and
984 continuous use of said invention; and over four years' use determines it an indispensable requisite to the safe, rapid, and economical operation of marking, stamping, and canceling in the postal department.

It is shown by a letter from Postmaster-General Dennison, under date of 15, 1866, addressed to Senate Committee on the Post Offices and Post Roads, that at that time the government was saving, by the use of said invention, the compensation annually of two hundred and fifty-four clerks of the various salaried classes. At an average salary of $900 per annum, this saving for labor alone would amount to the sum of $228,600, and an aggregate at this rate for the four years which the government has already enjoyed the use of this invention, it will amount to the sum of $914,400, to say nothing of the other benefits and advantages derived from this invention during the past four years. In view of this saving in labor, directly traceable to the use of said invention, the saving must be much larger annually, by its future and increased use in many more and other large post offices throughout the United States, where the Norton stamp is being rapidly substituted for the old, unreliable, and discarded device, used prior to the making of the Norton invention aforesaid.

The present Postmaster-General, in his letter to this committee, bearing date January 15, 1857, states that the Post Office Department has already saved several hundred thousand dollars by the use of said invention; that the question of value to that department has long since been settled; that the continued use of the invention by that department is a necessity beyond question; that it is the best invention there is for the post-marking of letters and packets, and for the cancellation of stamps thereon, and that there is no doubt but that the government will continue to save large sums by its future use.

The committee, therefore, after a most thorough examination
985 and consideration of the whole subject, have determined upon the sum of ($100,000) one hundred thousand dollars, as a full and just compensation to the assignees, Shavor & Corse, for the past and future use of said invention and patent, as in full compensation for the transfer

of the said patent to the Post Office Department. To carry out such determination, the committee recommend the passage of the accompanying bill.

986 *Complainant's Exhibit Q.—J. A. S., Ex'r.*

Senate. 41st Congress, 2d Session. Report No. 243.

In the Senate of the United States. July 6, 1870.—Ordered to be printed.

Mr. RAMSEY made the following report (to accompany joint resolution S. R. No. 207):

The Committee on Post Offices and Post Roads, to whom were referred the petition and accompanying papers of Marcus P. Norton, and Charles Eddy acting as trustee for himself and Jacob Shavor and Albert C. Corse, asking a settlement and compensation for the past and for the future use of Norton's post-marking and postage stamp canceling device or instrument, report:

That they have duly considered the same, and they find that the letters patent of the United States of America, dated the 14th day of April, 1863, were duly granted and issued to Marcus P. Norton, of the city of Troy, in the State of New York, and that the same were twice reissued under and bearing the following dates, to wit, August 23,
987 1864, and August 3, 1869, as by law provided, which invention and improvements so patented and reissued were for and upon a device or instruments for the post marking of letters and other mail matter, and for the cancellation of the postage stamps thereon. The device, as a whole, consists of two separate and distinct instruments, combined by suitable mechanical means into one device or machine, so that the post-marking was and is done upon the envelope of the letter at the same time and operation of the cancellation of the exposed surface of the postage-stamp by the canceling device or instrument coming into contact therewith, in the manner fully and particularly specified in said letters patent, whereby a more successful and permanent cancellation was secured, thereby preventing frauds by a second or reuse of washed or chemically cleaned postage stamps. The canceling instrument consists of the use of cork, rubber, or other suitable elastic material secured in proper position and especially constructed and arranged for successful operation, and operated in conjunction with the post-marking instrument by mechanical means constructed for that purpose. Upon the lower surface of such canceling instrument is constructed any form or configuration desirable for the purpose of holding a quantity of ink sufficient to impregnate and destroy the postage-stamp, thereby rendering the cancellation of the same permanent. The cork, rubber, or soft wood used endwise, upon coming into contact with the enameled like, or hard-ink surface of the postage stamp, by the blow or force of the instruments so combined will to a certain degree mar or break such ink and exposed surface of the stamp as to permit or allow the same instrument to inject into and impregnate the fibers of the paper of the postage stamp with ink of such kind or quality as may be used, and showing at once a full and perfect cancellation of the postage-stamp.

988 This invention and device has been in practical and continuously exclusive use in the postal service of the United States, by and under the order and directions of the Postmaster-General, since the month of March, 1863, it having been previously tested and experimented with in the most thorough manner in the New York City post-office for

more than one year, and was approved and recommended in writing under date of January 3, 1863, after such test and use, to the Postmaster-General by the postmaster at that office, without any compensation whatever to the inventor and patentee—Marcus P. Norton—nor upon any other stipulation than his consent that the same might thus be used until its utility and advantages to the postal service and government should be effectually tested and proven, when a fair, just, and equitable compensation for either its use or for the letters patent should be made to him by the government.

This invention and device having been sufficiently proven and admitted to be a great labor-saving machine by many postmasters throughout the country, and its utility in each and every respect, as claimed for it by the said inventor and patentee, satisfactorily tested and maintained by uninterrupted use in the larger post-offices in the United States, application was made by said inventor and patentee to the thirty-eighth Congress for compensation therefor, in accordance with the informal stipulation already referred to. Another claimant to the invention appeared before the House committee, and, without any letters patent, claimed this invention as having been made by him, as the original and first inventor of the same. While still, and at the same time, another person appeared, claiming on behalf of himself and others to own the title to the said invention. Under this state of the case, the House committee of that Congress, who were then considering the subject of compensation, determined and decided that since the validity of the patent and
989 of the title to the same as well as that of prior invention was thus called in question, those should first be determined by the proper courts, and accordingly the case was thereupon suspended and remanded.

By a transcript of the proceedings and judgment of the court and jury in a suit founded upon the said letters patent and submitted for the consideration of that committee, under the certificate of the clerk and seal of the court, as rendered in the circuit court of the United States for the northern district of New York, Judges Hall and Nelson presiding, it fully and satisfactorily appears that the questions of the invention and of the validity of the said letters patent and title thereto were duly tried, determined, and decided in favor of the letters patent, dated April 14, 1863, and at that time reissued, with the date of August 23, 1863, and also in favor of Marcus P. Norton, as the original and first inventor of the invention for which compensation is now asked of the government.

The same petitioners appear before the present Congress, claiming and asking that a suitable compensation be awarded them for the said invention, device, and letters patent through the Postmaster-General, on condition of an assignment and transfer of the exclusive right and title to the said letters patent to the United States, and an acquittance and release for the past use of said invention and device for more than eight years. They ask that Congress refer the matter to the Postmaster-General for investigation and final settlement, and express a willingness to abide his findings and judgment in the premises as to the amount of compensation to be paid them for the past and future use of this valuable and important invention to the postal service of the United States.

The value and importance of this invention to the postal service in the post-offices and upon the postal railway cars throughout the country is beyond any question an established fact. It is, in fact, fully
990 admitted by the Post-Office Department to be an indispensable device for the post-marking of letters and for the cancellation of postage stamps, and there are many proofs submitted to this committee upon the same points, by which it is conclusively shown that by its use

the government has actually saved from one-third to one-half the stamping and canceling clerk hire theretofore required and employed; and that it greatly facilitates the dispatch of letters for transportation in the mails; that it greatly economizes in the time for the preparation of the mails for transportation; that it cancels, in the most perfect and permanent manner, the postage stamps on letters, packets, etc., and at the same time gives upon the envelope, near the postage stamp, a plain and intelligent post-mark; and that it also contributes largely to prevent frauds on the postal revenue by the washing or chemical cleansing of postage stamps that have been once used, for reuse or reissue, and that the letters do not require to be handled over the second time, as was the case under the old system for the performing of the post-marking and postage stamp cancellation.

Its utility, facility, importance, and economy in labor or clerk hire are so far established that the invention and device protected by and embraced in the said letters patent has already been put into general and extensive use in all the larger post-offices throughout the country, and it is being put into use in all of the post-offices of the United States of any considerable size, and known in the Post-Office Department as first, second, third, and fourth class, as rapidly as they can be supplied by the government manufacturers. The Postmaster-General desiring that the department and postal service should have the benefit and advantages of this simple and yet most useful and important invention, in the early part of the year 1863 entered into a contract with Fairbanks & Co., of New York City, for a term of four years, commencing on the 1st day of April, 1863, to manufacture for and deliver to the Post-
991 Office Department the said device and instruments for use in the postal service at a price of six dollars for each completed instrument. That contract expired on the 1st day of April, 1867. A new contract was made by the Postmaster-General with B. Chambers, jr., of the city of Washington, D. C., to manufacture for the Post-Office Department the same device and instrument for another term of four years, for use in the postal service of the United States. This contract went into operation on the 1st day of April, 1867, and has but a few months longer to run before it will expire by its own limitation. The contract price with Mr. Chambers is five dollars for each completed device. The Post-Office Department is now supplying post offices at the rate of more than one thousand per annum.

The government, in consulting its interests, has fully committed itself, through the Post Office Department, to the permanent adoption, general, and continuous use of the said invention and device; and more than eight years' use determines it an indispensable requisite to the safe, rapid, and economical operation of post-marking, stamping, and canceling postage-stamps in the postal service and department.

It is shown by a letter from Postmaster-General Dennison, under date of March 15, 1866, addressed to Senate Committee on Post Offices and Post Roads, that at that time the government was actually saving, by the use of the said invention and device, the compensation annually of two hundred and fifty-four clerks of the various salaried classes, at an average salary of $900 per annum. This saving for labor alone would amount to the sum of $228,600, and an aggregate at this rate for the eight years which the government has already enjoyed this invention, it will amount to the sum of $1,828,800, to say nothing of the other and many benefits and advantages derived from this invention dur-
992 ing the past eight years. It is believed that at this time there is at least the saving to the government annually the compensation

of three hundred clerks, at an average salary of $1,000 per annum, in the post-offices alone, without taking into this account the postal railway cars. In view of this saving in labor, directly traceable to the use of said invention and device, the saving must be much larger annually by its future and increased use in many more and other post-offices throughout the United States, where this invention and device is being rapidly substituted for the old, unreliable, and discarded device, used prior to the making and introduction into general use of the aforesaid Norton invention and device.

The Postmaster-General, in a letter to the Senate Committee on Post Offices and Post Roads, bearing date January 15, 1867, stated that the Post Office Department had already saved several hundred thousand dollars by the use of said invention and device; that the question of value to that department had long since then been settled; that the continued use of the invention by that department was a necessity beyond question; that it was the best invention known for the postmarking of letters and packets, and for the cancellation of postage-stamps thereon, and that there was no doubt but that the government would continue to save large sums by its future use.

The present Postmaster-General, in a letter to this committee, in answer to inquiries made by this committee to him concerning the matter set forth in the joint resolution introduced and referred to this committee, states that the said invention and device is very useful, valuable, and important in the postal service of the United States, and, in substance, that it is regarded as almost indispensable to a safe, rapid, and economical management of certain postal affairs. He says that the claim should be now settled upon fair, just, and honorable terms, and leaves the matter for Congress to determine what course
993 shall be taken to perfect a settlement with claimants for the past as well as future use of the invention during the term of the letters patent.

The committee, therefore, after a most careful and thorough examination and consideration of the whole subject, have determined that the better way to dispose of the matter in a manner more satisfactory to the government and to the claimants is to refer the entire case to the Postmaster-General for investigation, settlement, and final determination as between the government and claimants for the past and future use of the said invention, device, and letters patent granted and reissued as before stated. To carry out such determination and conclusion, the committee recommend the passage of the accompanying amendment to Senate joint resolution No. 207.

994 *Complainant's Exhibit R.—J. A. S., Ex'r.*

[Private resolution No. 36.]

A resolution authorizing the Postmaster-General to continue to use in the postal service a certain invention and device for the postmarking of mail packages and for the more permanent cancellation of postage-stamps, and to make a just and equitable compensation for the past and future use of the same by the Post Office Department.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Postmaster-General be, and he is hereby, authorized and directed to investigate the right and title of claimants to the invention, device, or instruments for the postmarking and postage-stamp cancel[l]ing in the postal service, pat

ented on the fourteenth day of April, eighteen hundred and sixty-three, reissued the twenty-third day of August, eighteen hundred and sixty-four, and again reissued the third day of August, eighteen hundred and sixty-nine, and now and for many years past in general use in the postal service of the United States; and to ascertain and determine upon a fair, just, and equitable compensation for the use of the said invention and device from the date of its use by the Post Office Department, and also to ascertain and determine upon a fair and equitable com-
995 pensation for its future use and value to the Post Office Department and government while the said letters patent shall continue, and to whom it should be paid under the said letters patent and reissues thereof; and to report the amount thus ascertained and determined to Congress at its next session.

Approved July 14, 1870.

996 *Complainant's Exhibit S.—J. A. S., Ex'r.*

Senate. 41st Congress, 3d session. Ex. doc. No. 49.

Letter of the Postmaster-General, communicating information in relation to the claims to the invention for postmarking and postage-stamp canceling in use in the postal service.

March 1, 1871.—Referred to the Committee on Post-Offices and Post-Roads, and ordered to be printed.

POST-OFFICE DEPARTMENT,
Washington, February 25, 1871.

SIR: By a joint resolution of Congress, approved July 14, 1870, the Postmaster-General is authorized and directed to investigate the right and title of claimants to the invention, device, or instruments for the postmarking and postage-stamp canceling in the postal service, patented on the 14th day of April, 1863, reissued the 23d day of August, 1864, and again reissued the 3d day of August, 1869, and now and for many years past in general use in the postal service of the United States, and to ascertain and determine upon a fair, just, and equitable compensation for the use of the said invention and device, from
997 the date of its use by the Post-Office Department, and also to ascertain and determine upon a fair and equitable compensation for its future use and value to the Post-Office Department and government while the said letters-patent shall continue, and to whom it should be paid under the said letters-patent and reissues thereof; and to report the amount thus ascertained and determined to Congress at its next session. (See pamphlet laws, 41st Congress, 2d session, page 68.)

In endeavoring to carry this resolution into effect, I have given every reasonable opportunity to all parties in interest to present their claims. They have been fully heard, in person and by counsel, when they have presented themselves for the purpose, and the hearing has been repeatedly postponed, on the applications of the claimants, to allow them every facility in procuring their testimony.

The patent referred to in the above-mentioned resolution of Congress was issued to Marcus P. Norton, as No. 38175, on the 14th April, 1863, reissued to his assignees as No. 1748, on the 23d August, 1864; again reissued to him as No. 3586, on the 3d August, 1869; and again reissued since the date of the private resolution of Congress as No. 4143, on the 4th October, 1870, to Helen M. Ingalls, assignee of Marcus P. Norton.

It appears from the certified abstract of title furnished by the Commissioner of Patents, that the original patent of 1863 was assigned by Marcus P. Norton, on the 20th of April, 1863, to Jacob Shavor and Albert C. Corse; that on the 23d day of February, 1864, they reassigned to said Norton; and that on the 20th October, 1869, he assigned his entire interest in the invention, and all right to compensation for the use of the same by the United States; to Helen M. Ingalls. She afterwards surrendered the letters-patent and procured a reissue thereof in her own name, in two parts, or divisions, of which division A is identical with the reissued patent of 1869. It is believed that this
998 action of the Patent Office vests the title of the patent of 1863, and the subsequent reissues to Norton, in Helen M. Ingalls.

Other letters-patent were issued to Peter Low and F. G. Ransford, as assignees of Marcus P. Norton, on the 9th day of August, 1859, for a post-marking and postage-stamp canceling device, in which a post-marking stamp is shown with a steel cutter attached, having sharp cutting edges to cut and mutilate the adhesive stamp. It seems that a number of stamps made after the plan suggested in that patent were tried by the department and condemned as unfit for use, because of the injury done to the contents of letters.

In 1862, Mr. Norton took out letters-patent for an alleged improvement on the 1859 stamp, in which the attempt was made to provide against the injury done by the cutter, by combining therewith guards to limit the depth of the cut; but I can find no evidence that this stamp was ever used by the department.

The stamp patented in 1863 has been in use in the department, and furnished by contractors, under contracts commencing April 1, 1863, and April 1, 1867, each for four years. No other stamp appears to have been used in the department containing this combination for postmarking and canceling at one and the same blow, except experimentally, all the cutting cancellers having been rejected as worthless.

A claim has been set up by Messrs. Peter Low, F. G. Ransford, and William B. Hatch to a share of any compensation that may be paid for the use of the patent of 1863, founded upon the allegation that the machine made under the patent of 1863 is subject to and infringes the patent of 1859. This question of title and the rights of the parties claiming compensation for the use of the combined stamp and canceler is one that, in my judgment, can only be properly settled by judicial authority, and hence I feel unwilling to take the responsibility of
999 deciding it. While there can be no question that the canceler covered by the patent of 1863 is the one the department has been using, and is still using, I do not feel authorized by the aforesaid joint resolution to undertake to decide whether it is subject to and infringes the patent of 1859, as has been alleged. When the joint resolution was adopted it was not probably known to Congress that there were parties who claimed a share of compensation for the use of the patent of 1859; and I think it my duty now to submit the whole matter, with all the evidence, to the end that Congress may pursue such course as justice demands in the settlement of the rights of the several claimants.

The combined stamp has been demonstrated, by continuous use during nearly eight years, to be valuable in the larger post-offices and in the railway service. Simple as it is, no other device has been hit upon that will do the work of this one without adding largely to the number of stamping clerks employed, and consequently increasing the expenses of the department. It is impossible to estimate, with any degree of ac-

curacy, the amount of money which has been or which may be saved by its use. Since the 1st day of April, 1863, the number of these stamps purchased by the department is 3,707, as will more fully appear by a detailed statement herewith filed, marked I. Nothing has been paid by the government to any one as royalty for the use of the invention. Although I indorse its usefulness in decided terms, I am obliged to wait an authoritative settlement of title before expressing an opinion as to the amount of money that should be paid for its use, or as to the manner and proportion of its distribution.

I submit with the accompanying exhibits an application made by the Hon. Horatio King for a share, in satisfaction of his services as an attorney to Mr. Norton, of whatever compensation may be allowed. Claims of this character do not appear to come within the scope of the reso-
1000 lution; I nevertheless, at his request, forward his papers, with an affidavit of Mr. Norton in relation thereto.

The House Post-Office Committee has also presented certain papers filed by Mr. C. E. Wheeler, in which he claims to have invented the combined postmarking and canceling stamp known as the Norton stamp, and charges that the patent for the same was improperly given to Mr. Norton. A certificate, issued by the Commissioner of Patents, shows that on the 12th of September, 1863, Mr. Wheeler filed an application for letters patent, which on the 21st of September was rejected on a reference to Mr. Norton's patents, and that on the 10th of December, 1863, the Commissioner refused to grant Wheeler's application for an interference with Norton's patent of 1859. This seems to have ended Mr. Wheeler's case. The papers relating to it are, however, herewith inclosed.

Another paper, dated February 23, 1871, has been filed by Helen M. Ingalls, the owner by assignment and reissue of the patent of April 14, 1863, notifying the department that the postmarking and canceling device now used in the postal service has been manufactured under a parol license, granted to the contractor in 1867, and subject to the right of the inventor to claim compensation therefor from the United States; that the contract and parol license to manufacture said stamps terminates on the 1st day of April, 1871; and that the department has invited proposals for a new contract for similar stamps. (See advertisement filed with accompanying exhibits, which fixes the time of the letting of said contract on the first day of March next.)

Miss Ingalls proceeds to give the department notice that unless a just compensation for the past use of this device is made and a contract entered into with her for the right to use it, she will, after the 1st day of April next, invoke the interposition of the courts of the United States to enjoin any contractor, not properly licensed by her, from man-
1001 ufacturing any stamps covered by any of the patents originally issued to Marcus P. Norton, and now held by her as assignee; and further, that she will in like manner seek to enjoin the postmasters now using said combined stamps and cancels from the further use thereof, the license and authority heretofore given having been conditional and not absolute; and that, unless said conditions are complied with upon the part of the United States, in manner aforesaid, the license to make and use said stamps shall stand revoked.

Accompanying this report will be found all the testimony taken in this investigation, together with the exhibits filed, with a schedule of the same.

Submitting the whole matter for the consideration of Congress, I have the honor to be, with great respect,

JOHN A. J. CRESWELL,
Postmaster-General.

Hon. SCHUYLER COLFAX,
Vice-President of the United States.

1002 *Complainant's Exhibit T.—J. A. S., Ex'r.*

Senate, 42d Congress, 2d session. Report No. 186.

In the Senate of the United States, May 15, 1872.—Ordered to be printed.

Mr. GILBERT submitted the following report:

The Committee on Post-Offices and Post-Roads, to whom, at the first session of the Forty-second Congress, was referred S. 213, a bill authorizing the Postmaster-General to continue in use in the postal service of the United States a machine for postmarking and for the cancellation of postage stamps, and to make settlement with the inventor, patentee, and assignees thereof for the past and future use of the same by the Post-Office Department, and on the 4th of May, 1872, were referred to same committee Senate bills 1077 and 1078, report:

That they have duly considered the same, and heard the inventor and patentee, Marcus P. Norton, in person, and by an argument in writing, in explanation of such machine and the invention, of its utility, of its use by the government and saving in clerk hire, and in the an-
1003 nual expenditures of the Post-Office Department. As that argument contains the facts in the case, and in order that the Senate may be fully advised of the same, it is herewith submitted, having ascertained that the statement of facts therein contained is correct, not only from the mass of evidence submitted for the consideration of the committee, but by referring the written argument itself to the Postmaster-General for his examination and opinion thereon, who informed the committee that the facts therein contained are substantially true and correct.

Your committee, after a careful and thorough examination of the whole subject, have determined that the better way to dispose of the matter is to refer the same to the United States Court of Claims, with full jurisdiction for investigation and determination of the entire case as between the government and the claimants for the past and future use of the inventions and letters patent thereon, as claimed by them and admitted by the Post-Office Department.

To carry out such conclusions and determinations, your committee recommend the passage of the accompanying bills, S. 1077 and S. 1078, as substitute for Senate bill 213, of the first session of the Forty-second Congress, and referred to this committee on the 15th day of March, 1871.

Argument of Marcus P. Norton, inventor and patentee of the "Norton postmarking and postage-canceling-machine," now in general use in the postal service of the United States; also of the type-wheel dating and printing machine now in use in the Postal and Internal Revenue Departments of the government.

MR. CHAIRMAN AND GENTLEMEN OF THE COMMITTEE: In appearing before you to-day in the matter now before you for your consid-
1004 eration, I shall endeavor to briefly state the main facts and law

upon which this claim is founded. Every fact I shall state is amply verified and sustained by the proofs in the case, and much of my argument will be quotations from the official records of the Post-Office Department.

On the 14th day of April, 1863, the letters patent of the United States of America were duly and lawfully granted and issued to me for and upon an invention and improvements for the postmarking of letters and other mail matter, and for the cancellation of the postage-stamps. The device, as a whole, consists of two separate and distinct instruments, combined by suitable mechanical means into one device or machine, so that the postmarking is done upon the envelope of the letter at the same time and operation of the cancellation of the exposed surface of the postage-stamp by the canceling device or instrument coming into contact therewith, in the manner fully specified in the letters patent now before you in evidence, whereby a more successful and permanent cancellation of the postage-stamp is secured, thereby preventing frauds from a second or re-use of washed or chemically cleaned postage-stamps. The canceling instrument consists of the use of cork, rubber, or other elastic material, secured in proper position and especially constructed and arranged for successful operation, and is operated in conjunction with the postmarking instrument or device by mechanical means constructed for that purpose. Upon the lower surface of such canceling instrument is constructed any form or configuration desirable for the purpose of holding a quantity of ink sufficient to impregnate and to destroy the postage-stamp, thereby rendering the cancellation of the same permanent. The cork, rubber, or soft wood used endwise, upon coming in contact with the enameled-like or hard indelible ink surface of the postage-stamp, by the blow or force of the instrument so con-
1005 structed and combined will to a certain degree mar or break such exposed ink surface of the postage-stamp, and permit or allow the same instrument to inject into the postage stamp, and impregnate it with the ink of such kind as may be used, and a full and perfect cancellation of the same will at once appear without injury to the letters or packages or to the contents of the same.

This machine or device so patented has been in successful and continuously exclusive use in the postal service of the United States, by the order and directions of the Postmaster-General, since the month of March, 1863, it having been previously tested by an experimental use in the most thorough manner in the New York City post-office for more than one year and a half, and it was approved and recommended in writing, by a letter under date of January 3, 1863 (after such test or trial use), to the Postmaster-General by the postmaster at that post-office, to whom it had been referred by the Postmaster-General for experimental use, and for his opinion thereon as to the success of the invention and of its value and importance to the postal service. Such use was without any compensation to the inventor or any other person, nor upon any other stipulation than my consent that the invention and improvements might be so used until its utility and advantages to the postal service and government should be effectually tested and proven, when a fair, just, and equitable compensation for either its use or for the purchase of the letters patent should be made by the Government of the United States.

The letter to which I have referred is in the following words, to wit:

POST OFFICE,
New York, January 3, 1863.

SIR: Some time since you requested that I should test the
1006 utility of Norton's double postmarking and canceling stamping-iron, and report my opinion thereon. It was in use in this office when I first entered upon my duties. Since then the canceling part has been changed in various forms. We have tried the cutter thoroughly. This is the most complete method of cancellation, but it is liable, even if used with the greatest care, to injure the contents of the envelope, especially if the inclosures are cards, photographs, and the like. We have also used cork by inserting it in the cylinder of the canceler. This has proved successful and our cancellation is now performed in this way. I am confident no office in the country performs cancellation more thoroughly. The design of Mr. Norton is indispensable to us. Indeed, unless I should nearly double the stamping force, we could not dispense with its use. I am satisfied the interest of the department would be subserved by securing its general use. We are now testing a stamp and canceler on Norton's plan made of boxwood. It promises well, and can be made at a very trifling expense. I am fearful, however, its liability to yield to the wear to which it will be subject may prevent its general adoption. Time will determine this.

Very respectfully, your obedient servant,

ABRAM WAKEMAN,
Postmaster.

Per Secretary.

A. N. ZEVELY, Esq.,
Third Assistant Postmaster-General.

This device having been sufficiently proven and admitted to be a labor-saving machine, not only by the postmaster at the New York post-office, but also by many postmasters throughout the country, and its utility in each and every respect having been satisfactorily tested and maintained by uninterrupted use in the larger post-offices in the
1007 United States, and its general adoption having taken place on the 1st day of April, 1863, and a contract concluded for the manufacture and supply of the same to the Post-Office Department for a term of four years, I made application to the Thirty-eighth Congress for the settlement and compensation promised me therefor by and in accordance with the informal stipulation to which I have before referred you in this argument.

A person claiming the invention as having been made by him appeared before the House committee, and, without any letters patent, claimed to be the original and first inventor of the invention, device and improvements; while, at the same time, another person appeared before the same committee, claiming, on behalf of himself and others, to own the right and the title to said invention by a deed of assignment from Marcus P. Norton, who, being present at that time, in positive language denied the truthfulness and the lawful right of each of said claims. Under this state of the case the House committee of that Congress, who were then considering the subject of compensation, determined and decided that, since the validity of Norton's letters patent, and of the right and the title to the same, as well as that of prior invention, was thus assailed and called into question, that should first be determined by the proper courts; and accordingly the case was thereupon suspended and remanded, with the understanding that a suit should be brought in the

proper court to settle and to determine, by a judicial investigation, the question of the original and prior invention of said machine or device; and also in like manner to settle and determine the right and the title to the invention, improvements, device, and letters patent thereon, and sufficient time was given for that purpose.

In about one year and a half thereafter, as appears from the records now before you, a transcript of the proceedings and judgment of
1008 the court and jury, in a suit founded upon the aforesaid letters patent, was presented to and submitted for the consideration of that committee, under the seal of the court, as rendered in the circuit court of the United States for the northern district of New York, Judges Hall and Nelson presiding, from which it fully and satisfactorily appears that each and every question of priority of the invention, and of the validity of the said letters patent, and also of the right and of the title thereto, were duly and regularly tried, adjudicated, and decided in favor of the said letters patent, dated the 14th day of April, 1863, and at that time reissued, bearing date the 23d day of August, 1864; and also in the favor of Marcus P. Norton as the real or the original and first inventor of the invention, machine, or device for which compensation is now and was then asked of the government for the past and future use thereof in the postal service.

The said original inventor and assignees appear before the present Congress, claiming and asking that suitable compensation be awarded them for the said invention, device, and letters patent, on condition of an assignment and transfer of the said letters patent to the United States, and an acquittance and release for the past use of said invention and device.

The value and importance of this machine and invention to the postal service in the post-offices and upon the postal railway-cars throughout the country is beyond any question an established fact. It is admitted by the Post-Office Department to be an indispensable device or machine for the rapid post-marking of letters, and for the cancellation of postage-stamps thereon, and there are many proofs submitted to you, gentlemen, by which it is most conclusively shown that by its use the government has actually saved, and is now saving, from one-third to one-half the post-marking and postage-stamp canceling force or clerk hire
1009 heretofore required and employed in that business; and that it greatly facilitates the despatch of letters for transportation in the mails; that it greatly economizes in the time of the preparation of the mails for transportation; that it cancels in the most perfect and permanent manner the postage-stamps upon letters, packets, or other mail matter, and at the same time and operation of the machine gives upon the envelope or wrapper, at or near the postage-stamp, a plain and intelligent post-mark and the date of the mailing and of the cancellation of the postage-stamp; and that it also contributes largely to prevent frauds on the postal revenue by the reuse or reissue of postage-stamps that have been once used, as the cancellation is so permanent that no successful washing or chemical cleansing can be had of postage-stamps once used in the payment of postage, thereby preventing any reuse of the same; and that letters do not require to be handled over the second time, as was the case under the old system, in order to post-mark, to give the date thereof, and to cancel the postage-stamp. The proofs submitted to you, gentlemen, show several other advantages gained and benefit derived to the postal service by the use of this invention and machine, which is unnecessary for me to mention in detail at this time, having given the

main or leading features of value and importance in that service by the use of the said device under said letters patent.

Its utility and economy in time, labor, and clerk hire are so far established that the invention and device protected by the said letters patent and the reissue thereof has already been put into general and extensive use in all the larger post-offices and upon all the postal railway cars throughout the country, and it is now being put into use in all the post-offices of the United States of any considerable size. The Post-Office Department is now supplying post-offices and postal railway
1010 cars at the rate of about two thousand per annum, with a constant increase in the demand for the use of the same from all parts of the country. The government, in consulting its interests, has fully determined, through the Post Office Department, a necessity for the permanent and general use of the said invention, machine, or device; and nearly ten years' use of the same determines it to be an indispensable requisite to the safe, rapid, and economical operation of postmarking, stamping, dating, and canceling postage-stamps in the postal service of the United States. The highest and best authorities have borne testimony to the efficacy of the aforesaid postmarking, dating, and canceling hand stamp; the amount which it has saved to the government in the past is large and the fact is unquestionable; and many of those whose testimonials have been given and put before you, gentlemen, have emphatically declared that the business of the department cannot be carried on without it, unless it be done by a very large increase of clerical force, as well as increased expenditure in money, increased labor, and great delays in making up the mails for transportation. Hence the expediency and necessity for its use. Its continued employment seems to be demanded beyond any doubt.

Letters patent, gentlemen, were also granted to me upon a type-wheel dating and printing and canceling machine, dated August 9, 1859, numbered 25036, for a term of fourteen years from the date of the same. This invention consists of a series of cylinders or type-wheels for printing the dates, such as the year, month, day of the month, and a stationary form used in combination therewith. The canceling device was combined therewith, and was for cutting the postage or internal revenue stamp, when forming the date of the use of the same. These devices are fully described in said letters patent, as well as their mechanical changes and separate combined uses. These devices and improve-
1011 ments have also been extensively used by the government in its several departments, money order bureau, Internal Revenue Department, and elsewhere, by the order of the Commissioner of the Internal Revenue Bureau, and by the heads of other departments. The said patents being owned by different assignees, two separate and distinct claims thereupon appear against the government in connection with the same inventor and patentee, and hence the necessity for the two bills referred to you.

The Postmaster-General, in a letter to the Senate Committee on Post-Offices and Post-Roads, under date of the 15th day of January, 1867, says:

"The department has already saved several thousand dollars by its use, and I have no doubt will continue to save large sums by its future use. The question of value to the department has been long settled. The necessity to the department of its continuing it in use is beyond question. It is also necessary that some settlement be immediately made with the owners of the patent for this canceling and postmarking

and dating stamp. If no settlement is made by the government, so that these stamps can be made and furnished to the department without interference or embarrassment from the owners of the patent, it is apprehended the department will be compelled to resort to a more expensive and less approved method of postmarking and canceling stamps, and thus incur great expense and suffer great loss."

The same Postmaster-General, in another letter to the same committee, bearing date the 13th day of March, 1867, calling the attention of the committee to the fact that the department desired to enter into a four years' contract with the government contractor to furnish,
1012 for use in the postal service, this invention and device under the letters patent of April 14, 1863, and its reissue of August 23, 1864, and granted to said Marcus P. Norton, says:

"Information has been received at this department that no arrangement or settlement was made by the last Congress for the payment for the past use, and for the purchase of the invention made by Marcus P. Norton, of Troy, N. Y., for the postmarking of letters and for the canceling of postage stamps thereon. This being the state of facts, the department finds itself very much embarrassed. It desires, and must, as a matter of economy and facility in the making up of the mails for transportation, continue in use this invention.

"If this department cannot have the right to continue to use this invention, it will be compelled to increase the stamping force about one-half in all the large post-offices, in which event the postage stamps would not be as perfectly canceled. It has been ascertained that if the government owned Norton's patent at the time of making contracts to furnish to the department postmarking and postage-canceling stamps, it would be able to save from $1 to $2 on each stamp, and, as there are several hundred required during each year, it is submitted that for the four years of this contract a saving in the manufacture of these instruments alone would be several thousand dollars. Permit me to urge for these reasons that Congress make immediately some settlement for the continued use of this valuable and almost indispensable invention by this department. In conclusion, I most earnestly hope that some arrangement will be made by Congress with the owners of the patent, in order to relieve the department of much trouble and expense. I would not have called your attention to this matter, at this time, but for the great necessity that the same should now be disposed of, so as to give relief to the department."

1013 Again, in another letter, dated the 24th day of April, 1868, the same Postmaster-General says:

"I have always understood that when the department was about to enter into a contract for marking stamps, with Norton's canceling device combined therewith, he expressed an entire willingness that the same should be used by the department without let or hindrance on his part, he relying upon the justice and liberality of the government for such compensation as he was fairly and equitably entitled to for the use of his patent. It has always been conceded by my two immediate predecessors, as well as myself, that he should receive a just and fair compensation for his invention, which has proved a great saving of expense to the department."

The present Postmaster-General, in a letter to the Senate committee, in answer to inquiries made by that committee to him concerning the

matters set forth in a bill referred to your honorable committee by the Senate, and bearing date the 14th day of June, 1870, says:

"In reply, I beg to state that a postmarking and canceiing stamp, known as the 'Norton stamp,' has been in use by this department for several years. No compensation has been paid to the inventor and patentee, or his assignees, for the past use of said stamp. The invention is valuable to the department, and the inventor and patentee of it, in my judgment, deserves to be fairly and reasonably compensated by the government for its past and future use in the postal service."

He also says, in substance:

"It is regarded as almost indispensable to a safe, rapid, and economical management of certain postal matters. The claim should
1014 now be settled by the government upon fair, just, and honorable terms, and I leave the whole matter for Congress to determine what course shall be taken for a settlement for the past as well as for the future use of the invention during the term of the letters patent, which I now have before you, bearing date the 14th day of April, 1863, numbered 38175, and its last reissue, dated October the 4th, 1870, and numbered 4143 of reissued patents and 'Division A.'"

In a letter from the Postmaster-General to the Senate of the United States, dated the 25th day of February, 1871, and in answer to the requirements of a joint resolution of Congress concerning the aforesaid letters patent, approved the 14th day of July, 1870, and in reference to the invention and machine contained in the aforesaid letters patent, he says:

"The stamp patented in 1863 has been in use in the department, and furnished by contractors, under contracts commencing the first day of April, 1863, and April first, 1867, each for four years. No other stamp appears to have been used in the department containing this combination for postmarking and canceling at one and the same blow, and containing the devices and mechanical arrangement and combinations specified and covered by that patent."

Long-continued use of this machine by the department in the postal service must be satisfactory evidence of the value and importance of the same in and to that service.

It also appears from the proofs I have submitted to you, gentlemen, that there have been three different contracts made by the Postmaster-General, each for a term of four years, and for the furnishing for the use of the department, in the postal service, of the invention and machine patented under the dates and numbers of letters patent as here-
1015 inbefore stated, and at large set forth, with which contracts we have nothing whatever to do, and was made with the lowest responsible bidder, as by law provided concerning that department.

In the same letter, dated the 25th day of February, 1871, the Postmaster-General also says:

"The combined stamp has been demonstrated by continuous use during nearly eight years to be valuable in the larger post-offices and in the railway service. Simple as it is, no other device has been hit upon that will do the work of this one without adding largely to the number of stamping-clerks employed, and consequently increasing the expenses of the department. It is impossible to estimate, with any degree of accuracy, the amount of money which has been or which may be saved

by its use. Nothing has been paid to any one as royalty for the use of the invention. I indorse its usefulness in decided terms."

By a recent decision of the Supreme Court of the United States, letters patent upon mechanical invention are held as, and by that court declared to be property, the same as real estate or personal property, and that the inventor and his lawful representatives are justly entitled under the law to full protection as against any one using the invention under the letters patent without having first obtained a right or license to use the same. In that decision the court use the following language, to wit:

"Inventions secured by letters patent are property in the holder of the patent, and as such are as much entitled to protection as any other property, consisting of a franchise, during the term for which the franchise or the exclusive right is granted."

In view of this decision, coming from the highest court in the land, it has occurred to me whether or not the inventor and his assignees might not, by proceedings in the equity court of the United States, be
1016 lawfully entitled to an injunction against any person or persons using this machine and invention, to prevent and to restrain further use of the same; and that should we pursue that course it would make very great trouble to and might greatly inconvenience the Post-Office Department, and also delay the transportation of the mails by preventing the making up of the same ready to go upon the cars, until the old post-marking and postage-canceling stamps could be refurnished from the government manufacturers, and the clerical stamping force in the post-offices and upon the postal railway cars could be increased to that number sufficient to do the work required by the change, to wit, double the force now required in post-offices and on postal cars. Were this course to be pursued, it is manifest that serious inconveniences and delay would follow, necessitating a large increase in the annual appropriations for the expenses of the Post Office Department, and in many ways work injuries and delays in the postal service. All such results may now be prevented by the act of Congress in the making of some fair, just, and equitable provisions for the speedy settlement and adjudication of this claim.

Article five of the amendments of the Constitution of the United States, among other things, provides:

"Nor shall private property be taken for public use without just compensation." "Private property" is the sacred right of individual dominion. It is one of the great absolute rights of every citizen of the republic to have his property protected, and the government has no right whatever to deprive the citizen of his property except for the use of the public; not even then without a fair, just, and equitable compensation or remuneration; and, continuing a little further on with this doctrine of the law, it is a well-settled principle that no man "shall be disseized of his freehold or of his private property without a fair and just compensation therefor when taken for the use, gain, and profit of the
1017 public by the order, directions, or by the contract, specific or implied, on the part of the government."

The learned Mr. Story says:

"This is an affirmance of a great doctrine established by the common law for the protection of private property. It is founded on natural equity, and is laid down by jurists as a principle of universal law."

I need not say to you, gentlemen, that more than ten years have passed away since this invention first went into use, and the govern-

ment promised to compensate me for it in a fair and just manner in case it proved successful. It is now in general use in the post-offices and upon the postal railway cars of the country, and I need not here recapitulate the facts concerning its utility, economy in time, and saving of expenses to the government in the postal service.

1018 *Complainant's Exhibit Y.—J. A. S., Ex'r.*

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE *against* EDMUND HOOLE. } At law.

Plaintiffs' costs:

For fee by statute on trial before a jury		$20 00
Fees of witness three days, at $1.50		4 50
Six miles' travel for witness		60
Marshal's fees, service of capias on defendant, $2; six miles' travel fee, 60 cents; service of narr., $2		4 60
For narr. filed with United States circuit court clerk		10 00
Government stamp on capias		50
		$40 20

Clerks' fees:

Issuing capias, $1; two certified copies, $1; docketing case, $1	$3 00	
Narr. filing and rule, 50 cents; entering of dockets, 50 cents; do. narr. and stipulation, 50 cents	1 50	
1019 Issuing in all six subpœnas and six copies for term	$4 50	
Filing and entering answer, 50 cents; do. amended one, 50 cents; issuing second capias, $1	2 00	
Calendar fees, $1; trial fees, oaths, orders, filings, etc., $5	6 00	
Certified minutes of trial, 50 cents; do. of stipulation, 50 cents	1 00	
Making judgment record, 165 folios, at 15 cents	24 75	
Final fee on taxation and "proofs" in case	3 00	
Execution, $1; filing papers on tax, and certified return of execution, 50 cents	1 50	
		$47 25
		$87 45

Taxed at eighty-seven dollars and forty-five cents, this 22d November, 1864.

A. A. BOYCE, *Clerk.*

Circuit court of the United States, in and for the northern district of New York, ss:

Pleas in the circuit court of the United States for the northern district of New York, of the term of October, A. D. 1864.

Witness Hons. Samuel Nelson and Nathan K. Hall, judges: A. A. Boyce, clerk.

NORTHERN DISTRICT OF NEW YORK, *ss:*

Be it remembered that heretofore, in the term of June last past, in said court, the said Jacob Shavor and Albert C. Corse, plaintiffs,
1020 by John B. Gale, their attorney, came and brought into the said court, before the said judges thereof, their certain declaration against Edmund Hoole, defendant, and which follows in the words and figures, to wit:

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. } At law.

The President of the United States of America to the marshal of the northern district of New York, greeting:

We command you that you take Edmund Hoole, if he shall be found in your district, and that you safely keep him so that you may have his body before the circuit court of the United States of America for the northern district of New York, to be held at Albany, in the second circuit, in and for the said northern district of New York, before the judges of the same court, on the second Tuesday of October next, to answer unto Jacob Shavor and Albert C. Corse, in an action of trespass on the case for infringement of (their) letters-patent issued by the United States, to their damage $300,000, and that you also have then and there this writ.

Witness the honorable Roger B. Taney, Chief Justice of the Supreme Court of the United States of America, at Canandaigua, in the said northern district of New York, the 29th day of June, in the year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States the eighty-ninth.

[L. S.] A. A. BOYCE, *Clerk.*

JOHN B. GALE,
Plaintiffs' Attorney, Troy, N. Y.

[U. S. rev. stamp, 50 cts.]

1021 United States district court, northern district of New York. Of the term of June, 1864, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. } At law.

Jacob Shavor and Albert C. Corse, citizens of the United States of America, and residing at the city of Troy, county of Rensselaer, and State of New York, and citizens of said State of New York, plaintiffs in this suit, by John B. Gale, of the city of Troy, county of Rensselaer, and State of New York, their attorney, and by capias duly served herewith, commence this their action against Edmund Hoole, defendant, residing at Mount Vernon, county of Westchester, State of New York, and a citizen of said State of New York, and thereupon file this their declaration or complaint in the office of the clerk

of this honorable court, at the city of Utica, in said district, entering with the said clerk a rule to plead thereto, and serving a copy of said declaration with a notice of said rule upon the said defendant according to the rules of this court, and thereupon complain of the said defendant in an action or plea of trespass on the case.

For that whereas Marcus P. Norton of the city of Troy, county of Rensselaer, and State of New York, then a citizen of the United States of America before and at the time of the granting of the letters patent as hereinafter set forth, was the original an first inventor and discoverer of new and useful improvements in "post-marking letters, packets, and canceling postage stamps thereon," to wit, at Troy, within the State of New York, and thereupon, heretofore, to wit, on the 14th day of April, one thousand eight hundred and sixty-three, at the city
1022 of Washington, District of Columbia, upon the application of the said Marcus P. Norton, in due form of law, and upon the payment of fifteen dollars into the Treasury of the United States upon said application, and upon the further payment of twenty dollars upon the granting of the patent upon said application before the issuing of the same, as by law provided, and in all other respects complying with the act or acts of Congress in such case made and provided, letters patent were duly granted and issued in due form of law unto the said Marcus P. Norton, under the seal of the Patent Office of the United States, signed by the Secretary of the Interior, and countersigned by the Commissioner of Patents, according to the provisions and requirements of the law, bearing date on the day, the month, and the year as aforesaid, to wit, on the 14th day of April, 1863, and were afterwards duly delivered to the said Marcus P. Norton, wherein and whereby was granted to the said Marcus P. Norton, his heirs, administrators, or assigns, for the full and only term of seventeen years from and after the date thereof, the full and exclusive right or liberty of making, constructing, using, and vending to others to use or to be used, the said new and useful improvement hereinbefore mentioned, all of which was in due form of law, as will fully appear by said letters-patent ready in court to be produced, as by law, rule, or order of this honorable court may be required.

And the said Marcus P. Norton afterwards, to wit, on or about the 20th day of April, 1863, at the city of Troy, county of Rensselaer, State of New York, by a certain deed of assignment then and there made and delivered by him, the said Marcus P. Norton, to the said plaintiffs, Jacob Shavor and Albert C. Corse, which said deed of assignment, sealed with the seal of the said Marcus P. Norton, the plaintiffs now bring here into court, for good and valuable consideration therein named, did assign, sell, and transfer unto the said Jacob Shavor and
1023 Albert C. Corse, their heirs, administrators, or assigns, the entire said letters patent, and the invention and improvements therein and thereby secured to him, the said Marcus P. Norton, by the said letters patent, or as might afterwards be secured by any reissue of the said letters patent, which said deed of assignment afterwards, to wit, on or about the 8th day of March, A. D. 1864, was duly recorded in the said Patent Office, at the city of Washington, District of Columbia, in liber C7, page 453 of Transfers of Patents, as by reference to the said deed of assignment and to the certificate of the recording thereof thereon indorsed, will fully and at large appear. By virtue of which said deed of assignment so made and recorded, the said plaintiffs, Jacob Shavor and Albert C. Corse, became and were on the 20th day of April, A. D. 1863, and have ever since been, and still are, the exclusive owners of, and vested with all the rights, liberties, and privi-

leges so as aforesaid granted to the said Marcus P. Norton, in and by the said original letters patent, dated April 14, 1863, and all reissues thereof.

And whereas the said Jacob Shavor and Albert C. Corse, plaintiffs in this action, thereafter, to wit, on or before the first day of June, 1864, in pursuance of the statute in such case made and provided, did surrender the said letters patent so as aforesaid granted to the said Marcus P. Norton, and the same were duly canceled as by law provided and required, and new letters patent were ordered to issue to the said Jacob Shavor and Albert C. Corse, on amended and corrected specifiactions, and thereupon and thereafter, to wit, on or about the 23d day of August, 1864, at the said Patent Office, upon the application of the said Jacob Shavor and Albert C. Corse, in due form of law made to the honorable Commissioner of Patents, letters patent for and upon the said new and useful improvements in "post-office stamps for
1024 post-marking letters, etc., and canceling postage-stamps thereon," were duly reissued on the aforesaid amended and corrected specifications in the name of the United States of America, signed by J. P. Usher, Secretary of the Interior, and countersigned by D. P. Holloway, Commissioner of Patents, bearing date on the 23d day of August, 1864, wherein and whereby was granted to the said Jacob Shavor and Albert C. Corse, their heirs, administrators, or assigns, for the term of seventeen years from and after the said 14th day of April, 1863, the full and exclusive right and liberty of making, constructing, using, and vending to others to use or to be used, the said improvements in "post-office stamps for postmarking letters, etc., and canceling postage-stamps thereon," as by the said letters patent, with the specifications, claims, and description hereto annexed, and which make a part of the pleadings in this complaint, which said letters patent, so as aforesaid granted, assigned, and reissued, with the corrected and amended specifications annexed thereto and forming a part thereof, the said plaintiffs bring here into court.

And the said plaintiffs in fact and in truth say, that the said exclusive right and privilege so as aforesaid secured to the said Marcus P. Norton in and by the said letters patent granted as aforesaid and sold, assigned, and transferred to the plaintiffs, Jacob Shavor and Albert C. Corse, and by them reissued as aforesaid, has been and is possessed and used by them, the said assignees, and the said patentees, plaintiffs, since the said granting of the same by reissue on the 23d day of August, 1864, as aforesaid, and is of great and important value to the said plaintiffs, to wit, of the value of "three hundred thousand dollars." And also of great and important value to the public, and especially so to the Post Office Department or Government of the United States of America, in the postmarking of letters, packets, etc., and in the
1025 cancellation of postage-stamps thereon, so that great labor is saved in the postmarking of letters, etc., and in the cancellation of the postage-stamps thereon, and in facilitating the making up of mails for transportation, and in canceling postage-stamps in such thorough and effectual manner as to prevent frauds by a second or reuse of any postage stamp, substantially as described and set forth in the specifications attached to and forming a part of the letters patent assigned, reissued, and bearing date August 23, 1864, as hereinbefore set forth.

Yet the said defendant, well knowing the premises, but contriving and wrongfully intending to injure the said plaintiffs, and to deprive them of the value, profits, benefits and advantages which they might and otherwise would have acquired and derived from the said exclusive

right and privilege of making, using, and vending to others the right to sell and to use the said invention and improvements in "post-office stamps for postmarking letters, etc., and for canceling postage-stamps thereon," described and set forth in the said letters patent, and thereby secured, which said reissued letters patent bear date the 23d day of August, 1864, and hereinbefore described, a correct and printed copy of which, together with a description and claims of the invention and improvements thereof, is hereto annexed as hereinbefore stated, and accompanied by a copy of the drawings thereof, which said letters patent were granted, delivered, assigned, and reissued as aforesaid; and after the assignment and reissue of the said letters patent as aforesaid, and during the term of time of the said reissued letters patent, from August 23, 1864, and on divers days and times thereafter, and before the commencement of this suit, hitherto, to wit, at the village of Mount Vernon, county of Westchester, and State of New York, unlawfully and wrongfully, and without the consent or allowance and against the will of the said plaintiffs, Jacob Shavor and Albert C. Corse, did
1026 manufacture, use, vend, and put in practice the said invention and improvements, and did vend to others to sell, to use, and to be used, and did cause to be used, vended, and put in practice by others, "post-office stamps for postmarking letters, etc., and for canceling postage-stamps thereon," which were and are constructed in accordance to and with, and containing the invention, plan, features, and improvements, invented, patented, assigned, and reissued, as hereinbefore stated and set forth, in violation of and infringement upon the said exclusive rights and privileges so secured to said plaintiff by said assignment and letters patent as aforesaid, and contrary to the form of the statute of the United States in such case made and provided.

And the said plaintiffs say, and charge the fact and the truth to be, that the said defendant is now, and has for a long time been, engaged in the manufacture of the said post-office stamps for postmarking of letters, packets, etc., and for the cancellation or destruction of postage-stamps thereon, substantially as specified in said patent, for Fairbanks & Co., of the city, county and State of New York, under a certain contract with the said Fairbanks & Co., which said stamps, so manufactured by said defendant, are an infringement upon and infraction of plaintiffs' said reissued letters patent, bearing date August 23, 1864, and in violation of plaintiffs' exclusive rights and privileges, so secured to them by said assignment and said reissued letters patent, which said stamps, so manufactured, were and are manufactured at Mount Vernon, Westchester County, and are delivered by the said Fairbanks & Co. to the United States Post-Office Department, unlawfully and against the will of plaintiffs, as hereinbefore stated.

Whereby and by means of which grievances the said plaintiffs have been greatly injured and deprived of great gains, profits, sales, and advantages, which they might and otherwise would have derived
1027 from said invention, in said letters patent, specifications, claims, and drawings described as aforesaid, to wit, at the said village of Mount Vernon, in the county of Westchester and State of New York, and southern district of New York, and have sustained by such acts of infringement actual damages to the amount of three hundred thousand dollars.

By means of which several premises, and by force of the statutes aforesaid, an action has accrued to them the said plaintiffs, Jacob Shavor and Albert C. Corse, to recover the said actual damages, and such additional amount, not exceeding in the whole three times the

amount of such actual damages, as the court may see fit to order and adjudge.

Yet the said defendant, Edmund Hoole, though often requested so to do, has not settled or paid the same or any part thereof to the said plaintiffs, but has refused, and still does refuse so to do, to the damage of the said plaintiffs of three hundred thousand dollars, to recover which, together with just costs, they bring suit.

JACOB SHAVOR.
ALBERT C. CORSE.

JOHN B. GALE,
Plaintiff's Attorney, Troy, N. Y.

[U. S. rev. stamp, 50 cts.]

NORTHERN DISTRICT OF NEW YORK,
City of Troy, County of Rensselaer, ss:

On this 31st day of August, 1864, before me, the subscriber, a United States commissioner, personally appeared Jacob Shavor and Albert C. Corse, plaintiffs in the foregoing action, and each for himself made oath, according to law, that they have heard read the foregoing narr or complaint by them subscribed, respectively, and know the contents thereof, and that the same is true of their own knowledge, except as to
1028 those matters therein stated on information and belief, and as to those matters they and each of them for himself believes it to be true.

mmissioner, Northern District of New York.

(Here follows diagram marked page 1029.)

Reissue No. 1748.

The United States of America, to all to whom these letters patent shall come:

Whereas Jacob Shavor and Albert C. Corse, of Troy, New York, assignees of Marcus P. Norton, of the same place, have alleged that said M. P. Norton invented a new and useful improvement in post-office stamps (for which letters patent were reissued to him, dated April 14, 1863, which letters patent having been surrendered by said assignees, the same have been canceled and new letters ordered to issue to them on an amended specification), which he stated had not been known or used before his application; had made oath that he was a citizen of the United States; that he did verily believe that he was the original and first inventor or discoverer of the said improvement; and that the same hath not, to the best of his knowledge and belief, been previously known or used; have paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the Commissioner of Patents, signifying a desire of obtaining an exclusive property in said improvement, and praying that a patent may be granted for that purpose:

These are therefore to grant, according to law, to the said Shavor & Corse, their heirs, administrators, or assigns, for the term of seven-
1030 teen years from the fourteenth day of April, one thousand eight hundred and sixty-three, the full and exclusive right and liberty of making, constructing, using, and vending to others to be used, the said improvement, a description whereof is given in the words of the

said Shavor and Corse in the schedule hereunto annexed, and is made part of these presents.

In testimony whereof, I have caused these letters to be made patent, and the seal of the Patent Office has been hereunto affixed.

Given under my hand, at the city of Washington, this twenty-third day of August, in the year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States of America the eighty-ninth.

[L. S.]

J. P. USHER,
Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.

D. P. HOLLOWAY,
Commissioner of Patents.

The schedule referred to in these letters patent, and making part of the same:

To all whom it may concern:

Be it known that Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, invented new and useful improvements in post-marking letters, packets, etc., and canceling the postage-stamps thereon, in the manner and by the means substantially as hereinafter described and set forth. That the same were duly assigned and transferred to the undersigned, Jacob Shavor and Albert C. 1031 Corse, on the 20th day of April, 1863, and recorded in the United States Patent Office on the 8th day of March, A. D. 1864, Liber C[7], page 458 of transfers of patents; and we do hereby declare the following to be a full, clear, and exact description of the construction and operation thereof, reference being hereby had to the accompanying drawings and to the letters of reference marked thereon, which drawings make a part of these specifications.

(Like letters refer to and represent like or corresponding parts.)

Fig. 1 is a side elevation of the post-marking and postage-stamp canceling device hereinafter described and set forth, for canceling stamps issued by the "Post-Office Department," with indelible or other ink, at the same time and operation of the making of the post-mark on the packet one side of such frank or postage-stamp so canceled.

Fig. 2 is a vertical section taken through the centre of the various parts of the post-marking and postage canceling device herein described and set forth.

Fig. 3 is a face view showing the post-marking stamp ready for use and the postage canceling stamp or device made of wood, cork, rubber, or other and similar material and therein inserted, and more fully described hereinafter.

Fig. 4 shows a device to cancel postage-stamps, or letter franks, with indelible or other ink by means of wood, cork, rubber, or any elastic or similar material for type or blotter, which may be used for that purpose separate and alone or in combination with the post-marking device, substantially as shown at Fig. 3.

Fig. 5 is a vertical section of a post-marking and canceling postage-stamp device combined, and entirely made of iron, steel, or similar material, and described hereinafter more fully.

Fig. 6 is a plan or face view of Fig. 5, and fully showing the postage canceling device made of iron, steel, or similar material.

Fig. 7 shows the wrench for securing the type for the month, day of month, and year, in the postmarking device.

Fig. 8 shows the punching tool or device for forcing the cork, wood, rubber, or similar material, from the tube in which the same is held for use, so as to repair or replace the same with a similar blotter or postage-stamp canceling device.

The nature of the said invention and improvements herein described consists in the employment and combination of a device for the more complete and perfect cancellation of postage-stamps by means of wood, cork, rubber, or similar material, whereby such stamps are blotted or effaced with indelible or other ink, in the manner substantially as herein described and set forth.

It also consists in the combination of a postage canceling device, having wood, cord, rubber, or any similar material, for the type or blotter, with any post-marking device, so as to blot, cancel, or efface postage-stamps with indelible or other ink at the same time, blow, or operation of the instrument by which the post-mark is made upon the letter, envelope, or packet, substantially as herein described and set forth.

It also consists in the post-marking of letters, envelopes, or packets, and in the cancellation of postage-stamps thereon with ink or similar material by means of wood, cork, rubber, steel, iron, or any other suitable material, so combined with the post-marking instrument as to blot or efface such postage-stamps at the same blow or operation of the instrument thus constructed for such purpose.

To enable others skilled in the art to which said invention or improvements relate to make and use the same, we will here proceed to describe the construction and operation thereof, which is as follows, to wit: We construct the post-marking device, or stamp (D), of any suitable material and of any size in diameter required, while in length it must
1033 correspond to the canceling device herein described. E, Fig. 3, is the mortice or recess of suitable dimensions to receive the type for the month, day of the month, and the year, around which is the name of the place where used, and is similar to the post-marking device described and set forth in our letters patent, bearing date the 16th day of December, 1862, which was issued to the said Marcus P. Norton, and by him afterwards assigned and transferred to us, and which said type is secured to the cross-piece (B) in the same manner and by the same means as described and set forth in the said patent, as well as in this specification hereinafter.

We construct the postage-canceling stamp, or device (G), for the purpose of canceling in a more perfect and thorough manner the postage-stamps on letters, packets, etc., of wood, cork, rubber, or any similar or elastic material, and insert the same in the tube or recess (F), which is in that part of the canceling device (C), connected to and combined with the said cross-piece (B), as herein described.

The said tube, or recess (F), Figs. 2, 3, and 4, may be of any diameter or depth desired.

We prefer to have the diameter thereof at least the same as the width of the postage-stamp to be canceled or destroyed with ink as aforesaid. The said canceling device (G) will, of course, be so made as to correspond with each tube or recess, and to closely fit the same, and may be made of cork, wood, rubber, or any elastic material, as aforesaid. The face of this device may contain a plan or form for canceling postage-stamps with ink like that shown at Fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid. This device (G) will project somewhat below the lower end of the said tube (F), as seen at Figs. 1 and 4, and it may also project somewhat below the face of the post-marking or rating device (D), if deemed best so to do, and it may

be driven out of the said tube or recess (F) by means of a pin or
1034 bolt substantially like that shown at Fig. 8, the lower end of which operates in and through the hole (a), Figs. 2 and 4, for the purpose of repairs or to replace it by a new one. (A) is the handle firmly secured to the cross bar (B).

The said postage stamp canceling device (G), being thus constructed, with cork, rubber, or other elastic material for the type or blotter, and combined with the said device (C), with recess (F), therein as aforesaid, will receive and hold on the face or configuration thereof ink in quantities sufficient to permanently blot, efface, and cancel the postage-stamp whereon the same is used in such manner as to prevent the said postage-stamp being cleansed of the said canceling ink by any chemical or other process; for the said ink so put on would be so effectual that any attempt to remove it therefrom would entirely destroy the said postage-stamp and thereby render the same incapable of a second or other use without immediate detection. The said cork, rubber, or other elastic material as aforesaid will render the said stamp and canceling device of an easy and rapid use, for there being a yielding of the same when the blow is given, the operator will not tire as soon by a constant or continuous use of the same, and it will somewhat aid in raising the entire apparatus from the paper and postage stamp when the impression and cancellation shall have been given by the operator. The said type, blotter, or canceling device can be easily repaired or replaced by a new one at very little expense or trouble. The said cork, rubber, wood, or elastic device for canceling postage-stamps as aforesaid may extend upward to the said cross-bar (B), and there be connected to the same by means of a screw, pin, bolt, or similar device, if desired. The operation and effect produced would in such case be the same. The said postage canceling device may be of any desired distance from the said post-marking or rating device, or it may be securely fastened
1035 to the immediate side of the said post-marking or rating part or stamp by any proper and sufficient means.

The said postage canceling device may also be made of iron, steel, or similar material, as shown at (G′), Figs. 5 and 6, which may be secured to the said cross-piece (B) in like manner as the said device (C), Figs. 2 and 4, which is done either by screw and nut where the same unites with the said cross bar, or it may there be firmly fastened by means of pins or rivets, or soldered, as deemed best. The said post-marking or rating device is secured to said cross bar (B) in like manner, and by substantially the same means. The said metal canceling device (G′), Figs. 5 and 6, may also be fastened to the immediate side of the said post-marking device by any good and sufficient means as hereinbefore described in reference to the said device (C), Figs. 2 and 4. This metal device may also have upon its face or lower surface any configuration deemed best for the purpose of canceling the postage-stamp in ink at the same blow of the instrument or apparatus, as hereinbefore stated. In every case the post-marking of the letter or packet, and the effacing or cancellation of the postage-stamps thereon, is done at the same time, and at one operation of the devices, constructed and combined substantially as herein described and set forth. Both the post-mark and the cancellation of the said postage-stamps are done with indelible or other kind of ink, and without any injury to the said letter or packet, or contents thereof, as would be the case were the said postage-stamp canceled by being cut in several places by means of cutters or knives constructed for that purpose. The instrument and devices herein described will not cut either the letter, envelope, or postage-stamp thereon, but

performs the cancellation aforesaid with ink only as aforesaid; no cutting device whatever is used.

In no case could any fraud be committed by a second or reuse of the government postage-stamp or frank without being immediately
1036 discovered. This combination of devices will greatly facilitate the making up of mails for transportation, will reduce the labor in post-marking letters, and in canceling the postage-stamps thereon, to about one-half of that required where this combined instrument is not used. It therefore saves about one-half of the labor in the post-marking of letters and in the cancellation of the postage-stamps thereon. It also makes the cancellation of the said postage-stamps more effectual, so as to prevent a second or reuse by any means whatever, which are very important items in the successful management of the post-offices in this country, whereby large sums of money are annually saved this government.

Having thus described the original invention and improvements of the said Marcus P. Nortion in post-marking and canceling devices combined as and for the purposes aforesaid, what we claim and desire to secure by letters patent of the United States of America is:

First. The postage canceling device (C) with "wood," "cork," or "rubber" type, or blotter (G) therein, or any equivalent therefor, so as to cancel, blot, or efface the postage stamp with indelible or other ink, in the manner and for the purposes substantially as herein described and set forth.

Second. We claim the canceling device (C) with wood, cork, or rubber, or any equivalent thereof, forming the type or blotter (G) therein, in combination with the cross-piece (B) and with the post-marking device (D), substantially as and for the purposes herein described and set forth.

Third. We claim the post-marking of letters, envelopes, and packets, and the cancellation of the postage stamps thereon with ink, at one and the same blow or operation of the instrument, in the manner and by the means substantially as herein described and set forth.

Fourth. We claim the employment and combination of post-
1037 marking device with postage-stamp canceling device, both being operated by one or the same handle for the postmarking the letter, envelope, or packet, and for the destruction of postage stamps thereon, with indelible or other ink, substantially as herein described.

In testimony whereof we have, on this 27th day of May, A. D. 1864, hereunto set our hands.

JACOB SHAVOR.
ALBERT C. CORSE.

C. L. ALDEN.

Deed of assignment.

Whereas, I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer and State of New York, have invented "new and useful post-mark and canceling-stamp," for and upon which I did, on the 14th day of April, 1863, obtain of and from the United States of America letters patent, to which reference is hereby had, for the invention this day sold and assigned;

And whereas Jacob Shavor and Albert C. Corse, each of the city of Troy, county and State aforesaid, are desirous of purchasing and have

purchased of and from me all the right, title, and interest secured to me in said invention by said letters patent, or which may be secured to me by reissue of the same or otherwise: now, therefore, this indenture of assignment witnesseth that for and in consideration of the sum of five hundred dollars to me in hand paid, the receipt whereof is hereby acknowledged, I have sold, assigned, and transferred, and do hereby sell, assign, and transfer unto the said Jacob Shavor and Albert C. Corse, their heirs, assigns, executors, or administrators, all the right, title, and interest which I have in the said invention as secured
1038 to me by said letters patent, or as may be secured to me by reissue of the same or otherwise, the same to be held and enjoyed by them, the said Jacob Shavor and Albert C. Corse, for their own use, benefit, and behoof, and for the use, benefit, and behoof of their legal representatives, to the full end of the term for which the same were and are granted, as by reference to said patent will fully appear, as fully, freely, and entirely as the same would have been held and enjoyed by me had this sale, assignment, and transfer not been made.

In testimony whereof I have, on this 20th day of April, 1863, hereunto set my hand and seal.

MARCUS P. NORTON. [L. S.]

Signed and sealed in presence of—

U. S. PATENT OFFICE.

Received and recorded March 8, 1864, in liber C[7], page 458, of Transfers of Patents.

In testimony whereof I have hereunto caused the seal of the Patent Office to be affixed.

[L. S.] D. P. HOLLOWAY,
Commissioner of Patents.

Order for defendant to answer.

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
vs.
EDMUND HOOLE. } At law.

On issuing capias ad respondendum, and on filing narr or com-
1039 plaint in this action, and on motion of John B. Gale, attorney for plaintiffs, ordered, that defendant plead to or answer the plaintiffs' said narr. or complaint within twenty days after service thereof and of this order upon defendant, and on failure thereof, judgment by default, etc., etc.

JOHN B. GALE,
Solicitor for Plaintiffs, Troy, N. Y.

TROY, August, 1864.

To EDMUND HOOLE, Esq.,
Defendant.

Answer to narr or complaint.

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. } At law.

The above-named defendant, Edmund Hoole, of Mount Vernon, county of Westchester, State of New York, and southern district of New York, for answer to the narr or complaint in the above entitled action, answers and says that he has been informed, and believes it to be true, and therefore admits the same, that letters patent of the United States of America were duly issued and delivered to Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, a citizen of the said United States of America, upon improvements in pos-toffice stamps for post-marking letters, packets, etc., and for the cancellation of postage stamps thereon, bearing date April 14, 1363, as charged and set forth in the said complaint. And this defendant also admits that the said plaintiffs are citizens of the United States; that the said letters patent were duly assigned to them, the said Jacob Shavor and Albert C. Corse, by the said Marcus P. Norton, and
1040 afterwards duly recorded in the United States Patent Office at the city of Washington, as stated and set forth in their said complaint in this action.

And this defendant, further answering said complaint, hereby admits, that after the making and recording of the said assignment, as stated in said complaint, the said plaintiffs, Jacob Shavor and Albert C. Corse, duly surrendered the said letters patent of April 14, 1863, as by law provided, and upon their application, in writing, made to the Commissioner of Patents, consisting of a petition, amended and corrected specifications, new drawings, oath, and of the payment of thirty dollars into the Treasury of the United States upon said application, the said original letters patent of April 14, 1863, were duly canceled, as by law provided and required, and new letters patent were duly granted as a reissue of the said original letters patent, as by law provided, upon the said amended and corrected specifications and new drawings, which said reissued letters patent were signed by J. P. Usher, Secretary of the Interior, and countersigned by D. P. Holloway, Commissioner of Patents, as charged and set forth in the said complaint in this action, all of which was in due form of the law and in compliance with the provisions of the statutes in such case made and provided.

And this defendant, further answering the said complaint, hereby admits, that he now is, and has for a long time past been, engaged at Mount Vernon, county of Westchester, southern district of New York, in the manufacture of post-office stamps for postmarking of letters, packets, etc., and for the cancellation of postage-stamps thereon, and in vending the same to Fairbanks & Co., of the city of New York, who deliver the same to the Post Office Department of the Government of the United States of America, under and in pursuance with a contract with the said Post-Office Department as the party of one part, and the said Fairbanks & Co., party of the second part, which said post-office
1041 stamps, so made and delivered, were and are for use in the several post-offices of the said United States named upon the face or printing surface of such stamps. And the said post-office stamps, so made and delivered by this defendant, were and are made in the man-

ner and for the purpose described and set forth in the specifications and drawings attached to and forming a part of the plaintiffs' said reissued letters patent, bearing date August 23, 1864, and were made substantially in accordance to and with the plan and principle described and set forth in the plaintiffs' said reissued letters patent, as charged and set forth in the said narr. or complaint in this action.

And this defendant, further answering the said complaint, hereby admits that the said post-office stamps for postmarking of letters, packets, etc., and for cancellation of postage-stamps thereon, so made and vended, and described and set forth in the specifications and drawings of the plaintiffs' said reissued letters patent bearing date the 23d day of August, A. D. 1864, are valuable, labor saving, and important to the said Post-Office Department for the postmarking of letters, packets, etc., and in the cancellation or destruction of postage-stamps thereon, as charged and set forth in said complaint.

And this defendant, further answering the said complaint, denies that he has damaged the said plaintiffs by reason of such manufacture and vending of the aforesaid post-office stamps in the manner hereinbefore admitted by this defendant, or to the amount of any any other sum whatever, as charged and set forth in the said complaint inthis action.

And this defendant, further answering the said complaint, avers and charges the fact and the truth to be that the said plaintiffs, Jacob Shavor and Albert C. Corse, are not and never were the sole and exclusive owners of and vested with all the rights, liberties, and privileges of the aforesaid invention and improvements for the use and purpose aforesaid, or of any material and substantial part thereof, as
1042 stated and set forth in their said complaint; but, on the contrary, defendant charges the fact and the truth to be that the said invention and improvements are now, and have for a long time prior to the commencement of this suit been, owned, enjoyed, and held by the following firm and persons, to wit, Charles Eddy & Co., Frederick G. Ransford, and Peter Low, each and all now, and then, residing at the city of Troy, county of Rensselaer, State of New York, and William B. Hatch, of the city and county of New York, who is a member of and a partner in the firm of said Fairbanks & Co., of said city of New York, who purchased the said invention and improvements of the said Marcus P. Norton by deed of assignment duly executed and delivered by said Norton to the said Frederick G. Ransford and Peter Low, and dated May 2, 1859, and afterwards by them duly recorded in the said United States Patent Office on or about the 6th day of May, 1859, who afterwards duly assigned a certain interest in the said invention and improvements to the said Charles Eddy and Co., and to the said William B. Hatch, by deeds of assignment duly executed and delivered by said Ransford and said Low to the said Charles Eddy & Co., and to the said Hatch, as by reference to the said assignments, duly recorded as aforesaid, and now ready here in court to be produced, will fully and at large appear.

And this defendant, further answering the said complaint, avers and charges the fact and the truth to be, that the said invention and improvements mentioned in the said complaint, and described and set forth in the drawings, specifications, and claims of plaintiffs' said letters patent, dated April 14, 1863, and reissued, bearing date August 23, 1864, as stated in said complaint, were patented to the said Frederick G. Ransford and Peter Low on the 9th day of August, A. D. 1859, as by the said original letters patent, or a certified copy thereof,
1043 now here in court, ready to be produced, will fully appear, which

said letters patent were so granted and delivered by reason and virtue of a deed of assignment, made and dated the 2d day of May, 1859, and duly recorded May 6, 1859, and delivered to them by the said Marcus P. Norton, as hereinbefore stated, who made the application to the Commissioner of Patents as the original and first inventor of the said invention and improvements, upon which the said letters patent of August 9, 1859, were granted as aforesaid, which said assignment was duly recorded in the United States Patent-Office before the granting of the said patent, and subsequent to the said application by said Norton to said Commissioner of Patents for said patent of August 9, 1859, to issue as aforesaid, and which said application was so made some time during the forepart of the year 1859, and more than two years prior to any application by said Marcus P. Norton to the Commissioner of Patents, upon which the plaintiffs' said letters patent bearing date the 14th day of April, 1863, were granted and issued, as stated in the plaintiffs' said complaint. And the said Ransford & Low afterwards sold, assigned and transferred unto the said Charles Eddy & Co., and said William B. Hatch, certain rights, liberties, and privileges in and to the said letters patent of August 9, 1859, as by reference to said assignments duly recorded as by law required, and as hereinbefore stated, will fully and at large appear, through which and by which the said Fairbanks & Co. did obtain the right and privilege to contract with this defendant to manufacture for them, the said Fairbanks & Co., to be delivered by them to the Post-Office Department at Washington, D. C., the kind and character of post-office stamps named in said complaint, and described and claimed in the plaintiffs' said reissued letters patent bearing date August 23, 1864, and having reference and relation to the said original letters patent dated April 14, 1863, issued and delivered
1044 to the said Marcus P. Norton, as set forth in said complaint

And this defendant avers and claims, as a part of his defense in this suit, that the said Fairbanks & Co., of the said city of New York, had and now have the full and legal right and privilege to contract with the Post-Office Department of the government of the said United States to furnish and deliver to the said department, for use in the various post-offices in the said United States, post-office stamps of the same kind, character, and nature as those mentioned in plaintiffs' said complaint, and described, set forth, and claimed in the specifications of their said original patent, dated April 14, 1863, and also in the specifications of their said reissued letters patent bearing date August 23, 1864, and also had such right to contract with the defendant to manufacture and deliver to them, the said Fairbanks & Co., such post-office stamps, to be delivered to and used by the said department or government of the said United States aforesaid.

And this defendant, further answering said complaint, avers and charges the fact and truth to be that the said Marcus P. Norton was not the original and first inventor of the invention and improvements described, set forth, and claimed in the plaintiffs' said original letters patent bearing date the 14th day of April, 1863, and reissued upon amended and corrected specifications on the 23d day of August, 1864, and fully shown by the drawings thereto annexed and forming a part thereof and mentioned in the complaint or declaration in this cause, or of any substantial or material part thereof; but that, on the contrary, the said invention and improvements and substantial and material parts claimed as new were prior to any invention thereof by the said Norton well known to and publicly used by divers persons in the said United States of America; and that among the persons who had such prior knowledge

of said invention and improvements and of substantial and ma-
1045 terial parts thereof, and who publicly used the same as aforesaid,
are Major-General John A. Dix, then postmaster at the city of New York, and who now resides at said city, and there had such prior knowledge of said invention and improvements, and publicly used the same in the New York City post-office in the fall of the year A. D. 1860, and also C. E. Wheeler, a clerk in the post-office at the city of Cleveland, State of Ohio, and and who now resides at said city, and there had such prior knowledge of the said invention and improvements, and there publicly used the same in the month of August, A. D. 1861, in the post-office at the said city of Cleveland, Ohio, and who communicated such knowledge and public use of the said invention and improvements and of material and substantial parts thereof to the "Post Office Department," at thecity of Washington, in the fall of the year A. D. 1861, or at or about that time.

Wherefore this defendant demands judgment for his costs and disbursements in this suit, and that plaintiffs' said patent of August 23, 1864, and their alleged title thereto be declared void.

Dated at Mount Vernon, southern district of New York, this 6th day of September, 1864.

EDMUND HOOLE,
Defendant and Attorney, in Person, Mount Vernon, New York.

NORTHERN DISTRICT OF NEW YORK,
City of Troy, County of Rensselaer, ss:

On this 6th day of September, 1864, before me, the subscriber, a United States commissioner, personally appeared Edmund Hoole, defendant in the foregoing action, and made oath according to law that he has read the foregoing "answer" by him subscribed and knows the contents,
thereof, and that the same is true of his own knowledge except
1046 as to those matters therein stated on information and belief, and
as to those matters he believes it to be true.

JOHN T. LAMPORT,
U. S. Commissioner, Northern Dist. of N. Y.

[U. S. rev. stamp, 5 cents.]

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. } At law.

JOHN B. GALE, Esq.:

SIR: Take notice that the paper hereto appended is a copy of my amended answer filed in the above-entitled suit.

EDMUND HOOLE,
Attorney, in Person.

Dated New York, October 8, 1864.

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. } At law.

The above-named Edmund Hoole, pursuant to the stipulation made

by John B. Gale, esq., attorney for plaintiffs in the action dated the 24th day of September, 1864, hereby alters and amends the answer heretofore filed in this action and dated the 6th day of September, 1864, as follows, to wit:

1047 By striking out of said answer all after the first paragraph thereof which ends with the words "and in compliance with the provisions of the statutes in such cases made and provided," and inserting instead thereof the following:

And this defendant, further answering and pleading, says that as to the truth of the allegation contained in said bill that the said Norton was the original and first inventor and discoverer of any new and useful improvement or improvements in postmarking letters and packets and cancelling postage stamps thereon, described and claimed in said letters patent and in said reissue, or as to any of said allegations, defendant has no knowledge or information save what is contained in the said bill, and leaves the plaintiffs to make such proof of the same as they may be advised.

And this defendant, further answering and pleading, says that he has no knowledge save what is contained in the said bill of complaint as to the truth of the allegation contained in the said bill; that the said specification and claim, forming part of the said reissued patent, is an amended and corrected specification and claim, and leaves the plaintiffs to make such proof of the same as they may be advised.

And this defendant, further answering said complaint, says that he has no knowledge save what is contained in the said bill of complaint that the said reissued letters patent are for the same invention described and set forth in the said patent dated 14th of April, 1863, surrendered as aforesaid, and leaves the plaintiffs to make such proof thereof as they may be advised.

And this defendant, further answering said bill of complaint, says as to the allegations contained in the said bill that the exclusive right and privilege granted to the plaintiffs by the said patent dated 14th April, 1863, assigned as aforesaid and reissued on the 23d day of August,

1048 1864, as aforesaid, is of great and important value to the said plaintiffs, to wit, of the value of $300,000, and also of great and important value to the public and especially to the Post-Office Department or Government of the United States of America; that he denies each and every said allegation except as herein otherwise stated, and says that the said right and privilege is not an exclusive right and privilege to the joining of a canceling blotter of whatever kind employing ink to the printing stamp, because a canceling blotter employing ink to assist in canceling and destroying postage stamps had been long previously known and used and had been long previously patented by said Norton and assigned to other and different parties.

And this defendant, further answering the said complaint, avers, on information and belief, that the said improvement is not of the value of three hundred thousand dollars, or of any other considerable sum.

And this defendant, further answering the said complaint as to the allegations that he has contrived and wrongfully intended to injure said plaintiffs, and to deprive them of the value, profits, benefits, and advantages which they might and otherwise would have acquired and derived from the said exclusive right and privilege of making, using, and vending to others the right to sell and use the said invention and improvements in post office stamps for post-marking letters, etc., and for canceling postage stamps thereon, described and set forth in the said reissued

letters patent bearing date 2 3d day of August, 1864, by unlawfully and wrongfully manufacturing, using, vending, and putting in practice the said inventions and improvements, or by vending to others to be used, vended, and put in practice by others, post-office stamps which are constructed in accordance to and with, and containing inventions and improvements invented, patented, assigned, and reissued, as herein-
1049 before said and set forth, in violation of and infringement upon said exclusive rights and privileges secured to said plaintiffs, by said assignment and letters patent as aforesaid, denies each and every of the said allegations.

And this defendant, further answering the said bill of complaint, in reference to the said allegation, hereby admits and avers that he is by trade an engraver of dies and stamps, and that he is and has been for considerable time engaged in the manufacture of hand stamps for post-office use; and that he has, within the four years last past, manufactured post office stamps adapted to cancel the postage stamp with ink at the same time and the same blow or operation with the printing or impression on the letter or packet of the place and date of mailing; that he has manufactured altogether in the interval of time from the beginning of 1859, down to the present date, the number as follows: Seven sold to General Dix, for the New York post-office, five sold to William B. Taylor, or Abram Wakeman, for the same post-office; sundry single specimens, less than ten specimens, for various parties; and four hundred and forty-one made for and delivered to Messrs. Fairbanks & Co., of the city, county, and State of New York, under an agreement with the said Fairbanks and Co. And this defendant is informed and believes that the said four hundred and forty-one stamps made for Fairbanks & Co. have been delivered by them to the Post Office Department at Washington, under a contract made between said Fairbanks & Co. and the Post-Office Department of the United States; that such contract has several years yet to run, and requires the delivery of said stamps at such a price that the said articles are so manufactured and delivered at a loss to this defendant, or to the said Fairbanks & Co., or to both, because of and during the continuance of the present extraordinary high
1050 prices of materials and labor. But this defendant denies that the said four hundred and forty-one hand stamps for printing and canceling as aforesaid, made by him as aforesaid, or any hand stamps or instruments or articles made by him and delivered to the said Fairbanks & Co., or sold by him to any parties, or delivered by him or with his knowledge or contrivance to the Post-Office Department, or to any parties to be by them sold or delivered for use in the Post-Office Department, or to be used in any post-office, or made by him, or sold by him, or used by him in any place or places, were made, sold, or used in violation of the plaintiffs' exclusive right and privileges secured to them by said assignment and said reissued letters patent.

And this defendant further says that the following is a full and exact description of the combined printing and canceling stamps made by him and delivered to Fairbanks & Co., as aforesaid: Each of said stamps is made entirely of metal, with the exception of the handle. The handle is round, as usual, armed with a brass ferrule at its lower end, and receives a shank of iron to form an attachment for the printing and canceling pieces. This shank is widened immediately below the handle, and the canceling and printing parts are attached thereto, side by side, with about one-fourth of an inch clear space between them.

The printing device is a piece of steel engraved or otherwise lettered in a circle on its lower face, and adapted to receive changeable type,

with straight steel bodies, in the centre, and to confine the same by aid of a binding screw inserted through the side, all substantially the same as has been made by this defendant for more than twenty years past.

The canceling device is a solid piece of steel. Its face is engraved or otherwise prepared with four concentric circles adapted to strike upon and print corresponding impressions on the postage stamp. The
1051 circles project about one thirty-second of an inch beyond the surface in the spaces between them, but not sufficiently sharp to cut into the postage stamp. They cancel the stamp by blotting it with ink; all substantially the same as has been made by this defendant for upwards of fifteen years, except that it is attached to the same handle and forms one instrument with the aforesaid printing piece.

The printing piece is cylindrical in form, as usual. The canceling piece is also cylindrical. The diameter of the printing piece is one inch, and that of the canceling piece three fourths of an inch.

Each of these said pieces is one inch long, and is secured independently to the shank piece by a separate screw countersunk into the shank and tapped each into the separate pieces. The printing piece is more nearly in a right line with handle than is the canceling piece, but neither is exactly in a line with the handle. The centre of the printing piece is about three-eighths ($\frac{3}{8}$) of an inch from the prolonged axis of the handle, and the centre of the canceling piece is about three forths ($\frac{3}{4}$) of an inch from such prolonged axis. All these stamps are very accurately proportioned according to the gauges provided for the work. This defendant is informed and believes that they operate successfully and give good satisfaction. Defendant has operated them and seen them operated, in printing the date, etc., and canceling the postage stamp at a single blow. The operation of these stamps is as follows: The instrument is taken hold of by the handle, and the ink pad and the letters or packages to be marked are struck therewith alternately in rapid succession. The blow upon the ink pad supplies the face of both the printing piece and the canceling piece with ink, and the succeeding blow upon the letter or packet, being skilfully aimed, prints the name of the place and the date, in black ink, upon the plain surface of the letter, and prints the canceling circles or marks with similar ink upon the face of
1052 the postage stamp, and thereby cancels it with ink, so that it can not be afterwards removed or used again.

This defendant, further answering the said complaint, says that he did not, either directly or indirectly, individually or in connection with any other person or parties, make, use, or vend any post-office stamps for post-marking letters, etc., and canceling postage-stamps thereon at the same time and operation of the making of the post-mark thereon, on or after the date of the said reissued patent, to wit, the 23d day of August, 1864, and before the commencement of the suit; and that he did not in or during that time make, use, or vend any of the alleged improvements patented by said Norton, or make, use, or vend any article or thing containing any of said alleged improvements, and did not perform or do any act or thing which was an infringement upon said letters patent.

And this defendant, further answering said bill of complaint, says that all the hand stamps or instruments adapted to print the date, etc., and to cancel the postage-stamps with ink at the same time, and by the same blow by which the printing of the date, etc., is effected, so manufactured and delivered by him as aforesaid, in and since the year 1860, to the successive New York city postmasters, and to the said Fairbanks & Co., were made under and according to certain letters patent of the

United States issued to F. G. Ransford and Peter Low, of Troy, of the county of Rensselaer, in the State of New York, as earlier assignees of the said Marcus P. Norton, which letters patent were duly applied for, granted, signed, countersigned, sealed, and issued according to law, and bear date on the 9th day of August, 1859, and are numbered 25036, and that a consent and agreement that he (this defendant) should manufacture the combined printing and canceling hand stamps so made by this defendant was contained in the aforesaid agreement with
1053 Fairbanks & Co., and that an interest in said patent and a right to so authorize him was acquired by them, Fairbanks & Co., from the patentees, through certain assignments, as follows: One assignment from the said Ransford & Low, the original patentees, as assigns of said Norton, duly executed and delivered to Charles Eddy & Co., of Troy, aforesaid, for one-fourth part of said patent, dated December 31, 1860, and recorded January 22, 1861, in liber A[6], page 446, Transfer of Patents, and another assignment from said Ransford, and said Low, and said Eddy to William B. Hatch, of New York City aforesaid, one of the said firm of Fairbanks & Co., for one-fourth part of said patent, dated April 19, 1861, and recorded April 26, 1861, in liber E[6], page 372, Transfer of Patents, both of which assignments are ready to be produced on the trial of this cause.

And this defendant, further answering said bill of complaint, says that he is advised and believes that the said hand stamps, so constructed and delivered by him as aforesaid, were made and operated in accordance with the principle of the whole or a material and important and substantial part of the new and original invention, described and set forth in said patent, dated 9th August, 1859, issued to Ransford and Low, as aforesaid, and not in accordance with the principle of the whole or any part of any new and original invention described and set forth in the patent, dated 14th April, 1863, assigned to the plaintiffs and reissued as aforesaid.

And this defendant, further answering the said plaintiffs' said bill of complaint, says, on information and belief, that if the first clause of the claim of the aforesaid patent, reissued in 1864, be held to include a claim to the use of a canceling device of any and all kinds adapted to cancel with ink and affixed to the printing stamp, or be held to include a claim to such a blotting stamp thus affixed, as is made and delivered by this defendant as above described, then said reissued patent
1054 is void, so far as such claim is concerned, for the reason that the construction and operation of defendant's stamp is the same, and a material and substantial part of the same, as is described in the patent issued in 1859, and assigned, etc., as aforesaid.

And that if the second clause of the claim of the aforesaid patent, reissued in 1864, be held to include a claim to the exclusive right to the use of a cross-piece or widened shank as a means of connection to connect two separate stamps or marking devices to one and the same handle for operating at a single blow as aforesaid, or of connecting the parts in the same manner as in the hand-stamp made by this defendant as above described, then said reissued patent is, so far as such claim is concerned, void, for the reason that similar plates or cross-pieces, or widened shanks for similar purposes, were not first invented by said Norton, but have been known upwards of twenty years before, and that such devices, so made and so used, prior to any invention thereof by said Norton, were known generally to the trade of die-sinkers and engravers, and made for a great variety of purposes; and that they were known generally to the trade of bookbinders for stamping different

marks and words at different points on book backs by one and the same stamp; and to bank clerks generally for stamping words and marks similarly situated on checks; and to bakers generally for docking and stamping crackers with marks and impressions similarly situated; and were known to the leather and fur trade generally for stamping impressions and marking leather and hides, and especially furs, with separate marks similarly situated; and were known to the soap trade generally for stamping soap with marks similarly situated; and were known to gentlemen generally for marking linen with movable types confined in such cross bar and producing with such types separate marks similarly situated. And this defendant says that such making and using
1055 of such cross-piece, handle, and separate printing or impressing devices, prior to any invention thereof by said Norton, was known specifically to James Harper, one of the firm of Harper & Brothers, in New York City, twenty years ago; and to John R. Hoole, of New York City, twenty years ago; and to Henry McCollom, formerly of New York City, but now residing at Owego, in the county of Tioga, in the State of New York, twenty years ago; and to Isaac McGay, of New York City, fifteen years ago; and to Robert Rogers, of New York City, fifteen years ago.

And that if the third clause of the claim in the aforesaid patent, reissued in 1864, be held to include a claim for all modes or methods of postmarking and cancellation of postage-stamps with ink at a single blow, or be held to include a claim to such method of so doing, as is practiced in using the hand-stamps made by this defendant, as above described, then such patent is, so far as such claim is concerned, void, for the reason that the same is described in the patent issued in 1859, and assigned as aforesaid.

And that if the fourth clause of the claim in the aforesaid patent, reissued in 1864, be held to include a claim to the employment and combination of postmarking devices with (any and all) postage-stamp canceling devices, both being operated by one and the same handle for the postmarking of letters, packets, etc., and for the destruction of postage-stamps thereon with ink, or be held to include such instruments as are made by defendant as above described, then said reissued patent is, so far as such claim is concerned, void, for the reason that the same is contained in the patent issued in 1859, and assigned as aforesaid.

And this defendant, further answering and pleading, avers, on information and belief, that if the said letters patent, dated 14th April, 1863, assigned and reissued, as aforesaid, shall be held to include
1056 in either of the above or any other point such a construction of hand-stamp as shall cancel the postage-stamp with ink, and print the place and date at the same operation, or shall be held to include such a construction and such mode of operation for so doing as is involved in the said hand-stamp and canceler manufactured and delivered by this defendant, as aforesaid, then the said letters patent of 1863, reissued 1864, aforesaid, owned by the said plaintiffs, are, so far as such claim is concerned, void, for the reason above cited, and for the further reason that if the said patent of 1863, reissued 1864, be so held to contain any point in said stamps so made by defendant not contained in said 1859 patent, which had been contained in the caveats of said Norton, dated 1853 and 1854, or had been invented by said Norton at an earlier date than May 2, 1859, such point was conveyed to the said Ransford and Low, and through them to the present owners of the 1859 patent, by the deed of assignment executed by said Norton, dated May 2, 1859, and recorded in liber G^5, page 73; and for the further reason

that if it shall be held to have been not so assigned, then that it had been either abandoned or was fraudulently concealed by said Norton.

And this defendant, further answering said bill of complaint, avers, on information and belief, that if the said letters patent dated 14th April, 1863, assigned and reissued as aforesaid, shall be held to include a claim to all means of constructing a hand-stamp which shall cancel the postage-stamp with ink, and print the place and date at the same operation, or shall be held to include such a construction and such mode of operation as is involved in the said hand-stamp and canceler, manufactured and delivered by this defendant, as aforesaid, then the said letters patent of 1863, reissued 1864, aforesaid, owned by the said plaintiffs, are, so far as such claim is concerned, void, for the rea-
1057 son that said Norton was not the original and first inventor of such point or feature, but that such invention had been previously made by this defendant and others, which fact was known to Thomas H. Corbett, now residing at New York as aforesaid, and Abram C. Beardsley, now residing in said city, and to Wm. A. Clement, Charles Smith, Munson Clark, John Post, James Gaylor, James Riley, and others, now employed in the New York City post-office, and residing in said New York City; and for the further reason that such stamps were in use more than two years prior to the application for patent of 1863, reissued in 1864, aforesaid, which was dated January 5, 1863, and that such stamps were made by Thomas H. Corbett, at his manufactory, at No. 167 William street, New York City, aforesaid, and sold by him for the purpose of being used in the New York post-office and elsewhere, in the year 1860, and that this was known to the said Thomas H. Corbett, now of the city of New York, and to Abram C. Beardsley, of said city, and for the reason that the said invention was publicly used, and was used for profit as a part of the post-office machinery of the United States for stamping the date, etc., and canceling the postage-stamps with ink at the same operation on many thousands of letters per day, with the knowledge and consent of said alleged inventor, Norton, in the year 1860, and that such extensive and prolonged use in 1860 was known to General John A. Dix, of the city of New York aforesaid, and to Charles Smith, a stamper in the New York City post-office, and to John Post and W. A. B. Clement, aforesaid, and to the aforesaid Thomas H. Corbett and Abram C. Beardsley, now of said city, and to Cyrus A. Sherwood, of Troy, aforesaid, and that such use was in the New York City post-office during that year; and for the further reason that the said reissue dated 23d day of August, 1864, so far as it can be held to include any claim to the hand-stamps made by this defendant, as
1058 aforesaid, was surreptitiously and fraudulently obtained, and was obtained by misrepresenting the scope and character of said reissue, and of the said patent dated 1863, and of the said previous patent dated 1859, which fact will be proved on the trial of this cause.

All of which matters and things this defendant is ready and willing to aver, maintain, and prove in such manner as this honorable court shall direct, and he prays that he may hence be dismissed with judgment against the plaintiffs for his reasonable costs and disbursements in his behalf most wrongfully sustained.

EDMUND HOOLE,
Attorney in Person.

NEW YORK, *October* 8, 1864.

Wherefore it is now ordered that the issue so joined by and between the parties aforesaid be tried, adjudged, and determined at a circuit

court in and for the said district, to be held at the city hall in the city of Albany, in said district, before the said judges, on the second Tuesday of October, A. D. 1864, and to which time and place the proofs and pleadings is continued and brought by a certain stipulation in writing signed by the said parties and duly filed in the office of the clerk of said court on the 8th day of September, 1864, and bearing date the 6th day of September, 1864, as hereto annexed. And now at the said term, this day, to wit, the second Tuesday of October, A. D. 1864, at the city hall, in the said city of Albany, come the said plaintiffs Jacob Shavor and Albert C. Corse, by their said attorney, John B. Gale, and the said defendant Edmund Hoole comes in person and by his counsel, George Gifford. Whereupon, as to the issues of each and every matter of fact so joined between the parties aforesaid, it is now ordered by the
1059 said court then and there, to which time and place the same is continued and brought by the aforesaid stipulation, that the same be tried and determined by a jury.

At which time and place, and on Thursday, the 13th day of said October, A. D. 1864, before the honorable Nathan K. Hall, judge of said court, come the said Jacob Shavor and Albert C. Corse, plaintiffs, by their counsel, Joel Tiffany; and the said defendant, although duly and solemnly called, comes not on this said day, but makes default; whereupon the jurors of the jury, being duly summoned, do come, who to speak the truth of all the matters aforesaid, being duly chosen and sworn on this said 13th day of October, in the term aforesaid, say upon their oaths and upon the proofs produced, that Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, is the original and first inventor of the invention and improvements mentioned, contained, and set forth in the said plaintiffs' declaration above thereof described, and so as especially specified and contained in their letters patent thereto annexed and forming a part thereof, which said original patent was dated on the 14th day of April, 1863, and reissued bearing date the 23d day of August, 1864, and for and upon improvements in postmarking letters, packets, etc., and canceling postage-stamps thereon, as and in the manner therein described and claimed.

And that the said invention and improvements so described and claimed in said reissued letters patent is useful, valuable, and important as and for the purposes specified and set forth in the plaintiffs' said declaration.

And that the said invention and improvements contained in said letters patent is now the sole and exclusive property of the said plaintiffs as set forth in their said declaration, and owned and held by them under and by virtue of a certain deed of assignment executed and delivered to them by the said Marcus P. Norton, said original and first in-
1060 ventor of said invention and improvements, which said deed of assignment bears date the 20th day of April, A. D. 1863, and duly recorded in the U. S. Patent Office, as set forth in their said declaration.

And that the said defendant, Edmund Hoole, has violated the said exclusive rights and privileges of the said plaintiffs, and infringed upon their said letters patent reissued, bearing date the 23d day of August, 1864, in the manner as the said plaintiffs hath alleged, complained, and set forth in their said declaration (here in the court aforesaid) against him, the said defendant, Edmund Hoole, and they assess the damages of the said plaintiffs, by reason of the said premises, over and above their just costs, at six cents—(nominal damages only being asked by the said plaintiffs upon the trial of said cause).

Therefore it is now considered that the said plaintiffs do recover against the said defendant, Edmund Hoole, damages to the sum of six cents, by the jurors in form aforesaid assessed, and costs, now here adjudged to the said plaintiffs, which said damages, costs, and charges, in the whole, amount to eighty-seven dollars and fifty-one cents. And the said defendant in mercy, etc.

Judgment signed this 23d day of November, 1864.

A. A. BOYCE, *Clerk.*

Stipulation for trial of this cause.

United States circuit court, northern district of New York.

JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. } At law.

It is hereby agreed, by and between the above-named plaintiffs
1061 and the above-named defendant, that this cause may be brought on for trial at the next term of this court, to be holden at the city hall, in the city of Albany, in said district, on the second Tuesday of October, 1864, or as soon thereafter as the court will hear the same or order trial thereof.

Trial of this cause may, at such time, be moved by either party; and the respective parties will, at such time, be ready to proceed to the trial of this cause, and if either party shall then fail to be ready for trial thereof, the party ready for trial may then and there proceed to the trial of this cause without any objection by the other party.

Dated at Troy, northern district of New York, this 6th day of September, 1864.

(Signed) JACOB SHAVOR,
ALBERT C. CORSE,
Plaintiffs, Troy, N. Y.

EDMUND HOOLE,
Defendant, Mount Vernon, N. Y.

Witness—
(Signed) CHARLES D. KELLUM.

A true copy.—Attest: A. A. BOYCE, *Clerk.*

At a United States circuit court, held in and for the northern district of New York, in Albany, at the city hall in said city, on the 13th day of October, A. D. 1864—

Present, the Hon. Nathan K. Hall, judge.

1062 JACOB SHAVOR AND ALBERT C. CORSE
against
EDMUND HOOLE. }

On motion of Mr. J. Tiffany, of counsel for the plaintiffs, ordered that a jury be empanneled in the cause, and that the parties proceed to trial.

The defendant being called failed to appear. Ordered, that his appearance be entered, etc. The following jurors, having been duly summoned, appeared, were openly drawn and sworn, to wit:

Jurors sworn: James Coats, Andrew Keef, N. Armitage, John Young, George Davison, John Wilkins, William Adams, James McBride, J. Rundall, R. S. Orcutt, Jacob Ebel, F. Hughes.

Plaintiffs' testimony: Marcus P. Norton.

Documentary evidence was then read on behalf of plaintiffs.

The jury having agreed upon their verdict, and being called, on their oath do say that they find for the plaintiffs six cents damages. Ordered judgment nisi.

AUGUSTUS A. BOYCE, *Clerk.*

UNITED STATES OF AMERICA:

Circuit court clerk's office, northern district of New York, ss:

I, Charles Mason, clerk of said court, do hereby certify that I have compared the foregoing copy of judgment record with the original now on file in this office, and that the same is a correct transcript therefrom, and of the whole of said original.

In testimony whereof I have caused the seal of the said court to be affixed at the city of Utica, in said district, this 21st day of December, A. D. 1877.

[SEAL.] CHARES MASON, *Clerk.*

1063 (Endorsed:) United States circuit court, northern district of New York. Jacob Shavor and Albert C. Corse vs. Edmund Hoole. (Copy)—Judgment record. J. B. Gale, plaintiffs' attorney. Damages, $00.06; taxed costs, $87.45—amount, $87.51. Filed Nov. 23, 1864.

1064 *Complainant's Exhibit P P.—April 25, 1878.—A. J. Falls, special examiner.*

POST-OFFICE DEPARTMENT,
April 24th, 1878.

I hereby certify that, by the records of this department, the post office at Pleasant Grove, in the county of Alleghany, and State of Maryland, was established on the 28th day of January, 1850, and that Edmond S. Zevely was appointed postmaster at said office on the same day. I further certify that the office was discontinued on the 2d day of May, 1854, and that it was re-established on the 10th day of January, 1855, and Edmond S. Zevely was appointed postmaster at said office on that day. And I further certify that the office was discontinued on the 1st day of April, 1856.

In testimony whereof I have hereunto set my hand and caused the seal of the Post Office Department to be hereunto affixed, at Washington City, the twenty-fourth day of April, in the year of our Lord 1878.

[SEAL.] D. M. KEY,
Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1065 *Complainant's Exhibit Q Q.—April 25, 1878.—A. J. Falls, special examiner.*

United States Court of Claims.

JACOB SHAVOR AND ALBERT C. CORSE
vs.
THE UNITED STATES. } No. 2571.

Deposition of Edmund Hoole, filed December 2d, 1867.

The deposition of EDMUND HOOLE, a witness on the part of the claimants in the above-entitled cause, taken at the city of New York on the eighteenth day of November, 1867, before John J. Latting, a commissioner of the Court of Claims of the United States, in the presence of A. L. Merriman, esq., of counsel for the claimants, and of John J. Weed, esq., assistant solicitor of the said court and of counsel for the United States.

First interrogatory by the commissioner. Please to state your name, your occupation, your age, your place of residence for the past year; whether you have any interest, direct or indirect, in the claim which is the subject of inquiry in this suit, and whether, and in what degree, you are related to the claimant.

Answer. My name is Edmund Hoole; my occupation manufacturer of baggage checks; my age is forty-seven; my residence the past
1066 year the city of Brooklyn, Kings County, New York. I have no interest, direct or indirect, in the claim which is the subject of inquiry in this suit, and am in no degree related to the claimant.

Being interrogated by the counsel for the claimants, the witness says:

For the last seventeen years I have been engaged in manufacturing marking, rating, and canceling stamps for the Post-Office Department of the United States Government, said stamps being used for postmarking, rating, and canceling the postage-stamps on letters in the several post-offices of the United States. Prior to 1860 the postmarking and canceling were done by separate instruments or stamps; the first combined canceling and postmarking stamp put in use, to my knowledge, was invented by Marcus P. Norton, manufactured by me, and used in the New York City and Troy City post-offices. In April, 1863—the first of April, 1863—I commenced to manufacture said combined postmarking and canceling stamps for Fairbanks & Co., of New York City, who then held the contract from the United States Post-Office Department; said stamps were made according to the patent of Marcus P. Norton. I manufactured for them two years and seven months, during which time I made about thirteen hundred stamps. They were delivered by me to the Post-Office Department on behalf of Fairbanks & Co. I then gave up the work in favor of Mr. Chambers, of Washington City, who has continued to manufacture them up to the present time. In February, 1863, I was a bidder for the contract which was awarded to Fairbanks & Co. Others bid for it at the same time, but Fairbanks & Co. took the contract. These bids were put in in pursuance of advertisements in the manner provided by law. I have been conversant with the manufacture and using of postmarking stamps in the New
1067 York post-office since 1838. I have observed the working of the combined postmarking and canceling stamp patented by Marcus

P. Norton in the New York City post-office, and consider it a great labor-saving contrivance, enabling one man to postmark a letter and cancel the postage-stamp with one blow of the instrument, whereas under the former mode of stamping two persons were required to do the same work; also effecting a more permanent cancellation of the postage-stamp than has been effected by any other contrivance.

Having been engaged in the manufacture of postmarking stamps for the past twenty-nine years, and conversant with their general use, I feel competent to form a correct estimate of the value of this invention by Mr. Norton. I should say that one hundred dollars for each stamp manufactured would be a fair price for the government to pay for the use of this patent.

Another advantage of this invention is that it is a great saving of time in the making up of the mail and expediting it for transportation. From my knowledge of its working, I am of opinion that it is a saving of nearly one-half of the labor of preparing letters for the mail.

On cross-examination by JOHN J. WEED, Esq., assistant solicitor of the Court of Claims and of counsel for the United States, the witness says:

Mr. Norton furnished me with the model from which I made the stamps. No model was ever furnished me by the Post-Office Department. The model stamp on which the contract was awarded to Fairbanks & Co. was one manufactured by me. I changed the model subsequently by adopting a cross-bar, on account of simplicity of construction. The first stamp I ever saw was one with a canceling attachment brought to me by Mr. Ransford, of Troy, and was, as I understood at the time, the invention of Mr. Norton. I had no knowledge on the subject of an arrangement having been made with the govern-
1068 ment for the use of this stamp. On the contract being awarded to Fairbanks & Co., I said to Governor Randall, who was then First Assistant Postmaster General, that Fairbanks & Co. had not the right to manufacture those stamps. He stated to me that he should hold them to the contract; that they were responsible parties; but that if I would take the contract and furnish the patent stamp, it would be awarded to me. I declined, not having the control of the patent. This was all the conversation I had on the subject with the authorities of the Post-Office Department.

(The counsel for the claimants objects to this testimony of the witness relative to the alleged conversation with Governor Randall.)

I was made a party to a proceeding instituted in the United States court for the northern district of New York to test the validity to this patent. I did not defend that suit at the instance of the United States. They did not give me any instructions in relation to it. I was not present at the trial, neither was my counsel, Mr. Gifford, of this city, who was to have been there, but did not get there, but he left the case in the hands of my expert in the case, who was present. I was not there by advice of my counsel, Mr. Gifford. I called no witnesses for the purpose of proving the facts set up in my answer. Three witnesses, however, were subpœnaed, but it was not considered expedient by my counsel to try the case. I commenced the thing, believing that Marcus P. Norton was not the inventor of the patent. I came out of it believing that he was. The failure of my efforts to procure testimony to the contrary was the cause of my believing that Mr. Norton was the original first inventor.

On further direct examination by the counsel for the claimants, the witness says:

The change I made in the model did not change the invention in any respect.

1069 Second general interrogatory by the commissioner. Do you know of any other matter relative to the cause in question? If you do, state it.

Answer. I don't know of anything else.

EDMUND HOOLE.

Subscribed and sworn to before me this eighteenth day of November, 1867.

JOHN J. LATTING,
Commissioner of U. S. Court of Claims.

Commissioner's return.

United States Court of Claims.

JACOB SHAVOR AND ALBERT C. CORSE
vs.
THE UNITED STATES.

STATE OF NEW YORK,
City and County of New York, ss:

The foregoing deposition of Edmund Hoole, the witness within named, was duly taken by and before me, pursuant to the consent of the counsel for the parties, and upon waiver of notice, on the eighteenth day of November, 1867, at the city of New York, in the presence of the persons and parties named in the caption of said deposition. The said witness was first, and before any questions were put to him, properly and duly sworn by me, to tell the truth, the whole truth, and nothing but the truth, relative to the said cause; and the answers and testimony of the said witness were taken down by me, and read over by me to him, and by him signed in my presence.

JNO. J. LATTING,
Commissioner of U. S. Court of Claims.

1071 *Complainant's Exhibit R. R.—April 25, 1878.—A. J. Falls, special examiner.*

POST-OFFICE DEPARTMENT,
OFFICE OF THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., October 7th, 1862.

Your letter of 2d inst., to the Postmaster-General has been referred to me.

Your "postmarking and canceling stamp," as originally presented, seems to be approved at New York and other large offices where it has been tested.

The improvement which you now speak of evidently makes the instrument still more effective, and, indeed, fully obtains the end desired by this department, namely, the destruction of the postage stamps.

The only doubt about it arises from the danger of cutting through the envelope and damaging letters and enclosures. If you expect soon to visit Washington on other business, please call at this department.

The Postmaster-General is now absent, but I think he will view your invention favorably, and while he might not be able to make you any direct allowance, he might possibly arrange with you to manufacture stamps for the larger post-offices.

Very respectfully,

A. N. ZEVELY,
Third Assistant Postmaster-General.

MARCUS P. NORTON, Esq.,
Attorney at Law, Troy, N. Y.

1072 POST OFFICE DEPARTMENT,
April 24th, 1878.

I hereby certify that the foregoing is a true copy of a letter now on the records of the office of the Third Assistant Postmaster-General.

In testimony whereof I have hereunto set my hand and caused the seal of the Post-Office Department to be affixed, at Washington City, the twenty-fourth day of April, in the year of our Lord 1878.

D. M. KEY,
Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1073 *Complainant's Exhibit S S.—April 25, 1878.—A. J. Falls, special examiner.*

POST-OFFICE DEPARTMENT,
OFFICE OF FIRST ASSISTANT POSTMASTER-GENERAL.
Washington, D. C., July 25th, 1862.

MARCUS P. NORTON,
Troy, N. Y.:

SIR: Your letter of the 23d inst. is received, and will be referred to the postmaster at New York for a full report as to whether the experience of his office shows that your canceling stamp so effectually destroys the postage-stamp as to prevent its being cleansed and used a second time.

In regard to the use heretofore made of your stamp in offices, the department can only be held responsible (if at all) in cases where it has authorized its use. Other parties using it without the approval of the

department, or the consent of the patentee, have done so on their own responsibility, and with these cases the department can have nothing to do.

Propositions for a canceling stamp, distinct from the postmarking stamp, which will (it is claimed) so effectually destroy the postage-stamp without injury to the letter enclosed as to preclude the possibility of its being used a second time, are now under consideration in the department.

GEN'L SKINNER,
First Assistant Postmaster General.

1074 POST-OFFICE DEPARTMENT,
April 24th, 1878.

I hereby certify that the foregoing is a true copy of a letter now on the records of the office of the First Assistant Postmaster General.

In testimony whereof I have hereunto set my hand and caused the seal of the Post-Office Department to be hereunto affixed, at Washington City, the twenty-fourth day of April, in the year of our Lord 1878.

[SEAL.] D. M. KEY,
Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1075 *Complainant's Exhibit T T.—April* 25, 1878.—*A. J. Falls, special examiner.*

POST-OFFICE, NEW YORK,
January 3, 1863.

A. N. ZEVELY, Esq.,
Third Assistant Postmaster-General, Washington, D. C.:

SIR: Some time since, you requested that I should test the utility of Norton's double postmarking and canceling stamping iron, and report my opinion thereon. It was in use in this office when I first entered upon my du ies. Since then the canceling part has been changed in various forms. We have tried the cutter thoroughly. This is the most complete method of cancellation, but it is liable, even if used with the greatest care, to injure the contents of the envelope, especially if the enclosures are cards, photographs, and the like.

We have also used cork by inserting it in the cylinder of the canceler. This has proved successful and our cancellation is now performed in this way. I am confident no office in the country performs cancellation more thoroughly.

The design of Mr. Norton is indispensable to us. Indeed, unless I should nearly double the stamping force, we could not dispense with its use. I am satisfied the interests of the department would be subserved by securing its general use.

We are now testing a stamp and canceler, on Norton's plan, made of boxwood. It promises well and can be made at a very trifling expense.

I am fearful, however. its liability to yield to the wear to
1076 which it will be subject may prevent its general adoption. Time will determine this.

Very respectfully, your obt. serv't,

ABRAM WAKEMAN,
Postmaster.

Per Sec'y.

(Endorsed:) Postmaster at New York, Jan. 3, 1863. As to the utility of Norton's postmarking and canceling stamp.

UNITED STATES OF AMERICA:

POST OFFICE DEPARTMENT,
Washington, D. C., July 13, 1877.

I, D. M. Key, Postmaster-General of the United States of America, certify that the annexed is a true copy of the original letter now on the files of this department.

In testimony whereof I have hereto set my hand and caused the seal of the Post-Office Department to be affixed, at the city of Washington, the day and year above written.

[SEAL.] D. M. KEY,
Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1077 *Complainant's Exhibit U U.—April* 25, 1878.—*A. J. Falls, special examiner.*

POST-OFFICE, NEW YORK, 28*th August*, 1860.

Gen'l SKINNER:

DEAR SIR: I have received your favor in regard to the combination stamp of Mr. Ransford. I fear Mr. Norton's letter refers to a different stamp, and not to the one exhibited to me by Mr. Ransford. The latter gentleman had two with him, one to be used with type, and the other with rotating alphabet and numbers. I wanted the latter. If made by machinery, they may be afforded for $6 apiece; if by hand, I should think not. Still, I shall consider Mr. Norton's letter as referring to the kind we want. It is, of course, a very important object to have them introduced, and presume there will be no difficulty about it. I enclose an article I wrote for "The World," in reply to a very plausible and, indeed, an able article, published in that paper last week, attacking the new "post-office regulations," as the number denominated the late orders in regard to the carriers' department.

I thought it proper to answer this article, though I think I shall stop here, unless there is some special misrepresentation to be corrected. Our carrier system is working very well, and with increasing vigilance I think there will be no cause of complaint. The attacks come,
1078 for the most part, I believe, from the patrons or friends of the private expresses.

I am, dear sir, yours truly,

JOHN A. DIX.

(Endorsed:) Aug. 29, 1860. N. Y. New York postmaster wants new marking stamp.

UNITED STATES OF AMERICA:

POST-OFFICE DEPARTMENT.
Washington D. C., July 1877.

I, D. M. Key, Postmaster-General of the United States of America, certify that the annexed is a true copy of the original letter now on the files of this department.

In testimony whereof I have hereto set my hand and caused the seal

of the Post-Office Department to be affixed, at the city of Washington, the day and year above written.

[SEAL.] D. M. KEY,
Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1079 *Complainant's Exhibit V V.—Davis, April* 25, 1878.—*A. J. Falls, special examiner.*

POST-OFFICE DEPARTMENT,
OFFICE OF THIRD ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., April 22, 1878.

GEORGE H. WILLIAMS,
Washington, D. C.:

SIR: Referring to your request of this date, you are informed that the original correspondence in the case in question was sent to the postmaster at New York for the use of the U. S. district attorney. It is therefore impracticable to comply with your request to furnish a certified copy of the letter of C. E. Wheeler to the then Third Assistant Postmaster General.

Respectfully,

A. D. HAZEN,
Third Assistant Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1080 *Complainant's Exhibit W W.—Davis, April* 25, 1878.—*A. J. Falls, special examiner.*

E. S. ZEVELY'S CONTRACT.

This agreement, made and entered into this first day of April, A. D. 1863, between the United States of America, of the first part, by Montgomery Blair, Postmaster-General of said United States, and Edmund S. Zevely, of the city of Cumberland, in the State of Maryland, of the second part, witnesseth:

That whereas the said Postmaster-General did, on the 13th day of January last past, or soon thereafter, cause to be inserted in certain newspapers printed within the United States, a certain advertisement, headed "Proposals for circular marking and rating stamps," a copy of which advertisement is hereunto annexed; and whereas, on the day named in the said advertisement, to wit, on the 21st day of March, 1863, the several proposals which had been received, in answer to said advertisements, at the Post-Office Department at the city of Washington, were opened and examined, and after due deliberation it was decided that the proposals of the party of the second part should be accepted for stamps designated in his proposals by the following words, viz, "Class No. 1 (or for No. 4 or any other class), boxwood office stamp, with brass rim or ferrule, brass screw, cocoa handle, and copper-faced date changes, one dollar and fifty cents ($1.50 each, made any size or style, and no additional charge for inserting additional words or figures within the circle), three extra year blocks, 10 cents each." Also for class No. 3, "boxwood office stamps, without brass rim, and ordinary type-metal changes and walnut handle, 90 cents each, either class
1081 made any size or style, and no additional charge for extra words

or figures within the circle, such as are used in foreign stamps, etc." Also for rating stamps named in said proposals, to wit, "Rating stamps of boxwood with walnut handles, free, paid, ship, due, due 1, 10, 15, etc., without brass rims, 18 cents. Missent, forwarded, advertised, steamboat, paid 10, paid 15, due 3."

"Unclaimed, etc., without brass ferrules, 20 cents." "United States, 6 cents; P. O. B, free, held for postage, missent, and forwarded, without brass rims, 25 cents." "Canceling stamps, separate, of hard wood, 12 cents," which said proposals are to be taken and construed in connection with said advertisement, both of which are to form a part of this contract.

Now, therefore, the said party of the first part hereby agrees to order such stamps mentioned in said advertisement and proposals as are above described, as may from time to time be required, from the first day of April, 1863, until the 31st day of March, 1867, under the rules, regulations, and orders of the Post-Office Department as are now existing or hereafter be made, for such post-offices and route agents in the United States as are to be furnished therewith, to be made by the said party of the second part, under this contract, and to pay for the same at the rates named in the said proposals of the said party of the second part; which payment shall be made on the presentation of the account of the said party of the second part, with proper vouchers at the Post-Office Department in the city of Washington, quarterly, to commence on the first day of July next.

And the said party of the second part agrees to deliver at the Post-Office Department in the city of Washington, at his own cost and expense, within a reasonable time after the same may be ordered by the Postmaster-General, any stamps named in said advertisement and proposals as herein described, at the prices named in said proposals, the names of the office and State, and railroad and river lines in
1082 the circular stamps to be such as the Postmaster-General shall in each case direct.

It is further agreed that each of the stamps shall be made in the filling up, mounting, materials, and workmanship, in all respects equal to the samples furnished by the said party of the second part to the Postmaster-General, which said samples shall be deposited with, and kept by, the First Assistant Postmaster-General, subject to the inspection and use of all parties interested.

And it is further agreed and understood that the said party of the second part shall furnish the rating stamps named in his proposals and said advertisement, as herein described, of the material and at the prices named in said proposals, and all other rating stamps which may be ordered by said Postmaster-General at pro rata prices.

And it is further agreed and understood that no member of Congress shall be admitted to any share or part of this contract, or to any benefit to arise therefrom, and this agreement shall, in all parts, be subject to the terms and requisitions of an act of Congress passed on the 21st day of April, 1808, entitled, "An act concerning public contract."

And it is further agreed that this contract may be annulled or repealed for repeated failures, or for not furnishing the articles ordered of the kind and quality required by this contract, within a reasonable time after the same shall be ordered.

In witness thereof the said party of the second part has affixed his

hand and seal, and the said Postmaster-General has affixed the seal of the said Post-Office Department, this first day of April, 1863.

M. BLAIR, [SEAL.]
Postmaster General.
E. S. ZEVELY. [L. S.]

Signed, sealed, and delivered by the Postmaster-General in presence of—

ST. JOHN B. L. SKINNER.
Witness: J. WICKARD.

1083 In consideration of the making of the foregoing contract by the United States, and of the sum of one dollar to us in hand paid by the said United States, we, the undersigned, do hereby undertake and guarantee that the party of the second part in the said contract named shall faithfully and promptly in all things comply with, fulfill, and perform the foregoing contract; and that in case of his failure so to do, we will pay to the United States, on demand, all damages which they may sustain in consequence of such failure.

In witness whereof we have hereunto set our hands and seals this first day of April, 1863.

JNO. H. YOUNG. [L. S.]
HENRY FLURY. [L. S.]

Witness:
J. WICKARD.

The undersigned, postmaster of the city of Cumberland, Maryland, hereby certifies that he believes the above-named sureties to be fully able to make good their guaranty.

GEO. A. HOFFMAN.

PROPOSALS FOR MARKING AND RATING STAMPS.

Hon. A. W. RANDALL,
First Assistant Postmaster-General:

Referring to specimen impressions and specimen stamps herein and herewith presented for your inspection, I desire to bid for furnishing post-office marking and rating stamps, as follows:

1084 Class No. 1 (or for No. 4, or any other class.)

Boxwood office stamp, with brass rim or ferrule, brass screw, cocoa handle, and copper-faced date changes, $1.50.

(Made any size or style, and no additional charge for inserting additional words or figures within the circle.) 3 extra year blocks, 10c.

Class No. 2.

Boxwood office stamp, with brass rim and screw, but with ordinary type metal changes, and walnut handle, $1.00.

Class No. 3.

Boxwood office stamp, without rim, and ordinary type-metal changes, and walnut handle, 90c.

☞ Either class made any style or size, and no additional charge for

extra words or figures within the circle, such as used in foreign stamps, etc.

New style boxwood office stamp.

As per specimen stamp and specimen impressions on sheet with other impressions, and on envelopes, made in one solid block so as to cancel the postage stamp and leave the name of the post-office and date on the envelope clear of the postage stamp—this new style boxwood office stamp, any size or shape made for $1.50.

I also bid for making Norton & Co.'s patent combined stamp, with their permission. Also, for Miller's hammer stamp, with his permission, as follows:

I will furnish Norton's combination stamp of steel (not iron), made as per specimen submitted to the department, provided the de-
1085 partment adopts (*i. e.*, purchases said stamps) office stamp with canceller attached, for $10.00.

I will furnish Miller's hammer stamps, under his patent, as per specimen stamps and patent papers submitted to, and now in possession of the department.

Made of steel, not iron, case-hardened, or cast.

Office hammer stamp, etc., as per specimen, $8.00.

Circular rating hammer stamp, as per specimen, each $1.00.

Stamps on the periphery of said circular stamp, or if for four rating stamps only, they be made in form of a cross +. See on page 3.

Rating stamps of boxwood, with walnut handles (as per specimen).

Free, paid, ship, due, due 1, 10, 15, etc., with brass rim, 25c.

Ditto, ditto, without brass rim, 18c.

Missent, forwarded, advertised, steamboat, paid 10, paid 15, due 3, unclaimed, etc., with brass ferrules. 30c.

Same, without brass ferrules, 20c.

United States, Cd., P. O. B., and all, held for postage, missent, and forwarded, with brass, 35c.

Same, without brass, 25c.

Canceling stamps, separate, common wood, say dogwood, 10c.

Same, hard wood, 12c.

Same, brass tubes with cork, gum, etc., 20c.

(Canceling stamps in form of a star, same price.)

I will furnish pads, as per specimen, for 25c.

1086 Box black printers' ink, 25c.,

and directions how to use and keep in order the stamps, and how to make the ink and pad, I will furnish without extra charge.

All sorts of foreign stamps (class 4), I furnish at same price, viz:

Such as similar to office stamps.....90 cents to $1 50
Such are without dates, but large circular.....50c.
Other sorts.....25 to 35c.

☞ I beg to call your attention to many advantages of wooden stamps (besides their cheapness), one of which is that they retain the ink better, and give clearer impressions than metal.

I would also furnish for large offices, office stamps cut solid, daily re-

newed, at such low figures as to make the use of boxwood stamps in the New York post-office, using a new one every day, less per annum than it now costs for metal stamps. I will thus furnish, giving me the use of the stamps after each day, returning them to me for alteration and re-cutting, 366 office stamps with solid dates furnished along during the year for each day as wanted, for $35.

(See enclosed slip and impressions.)

Being known in the department, I am prepared in all respects to comply with the terms of your advertisement as to the contract, and hoping for your very favorable consideration, am very respectfully yours, etc.,

E. S. ZEVELY.

1087 The Miller hammer-stamp.

E. S. Zevely has, by arrangement with the patentee, the exclusive right to make and vend these stamps.

See patent, letters, and sample herewith, and will furnish them of steel or wood, as follows:

Steel office hammer-stamp, with attachment as the model, $8.00.

Same, of boxwood, with brass ferrules, and copper type-metal changes, $2.00

Same, of boxwood, without brass ferrules, and common type-metal changes, $1.50.

The circular rating hammer-stamp as stated at bottom of page 2. Each, $1.00.

Same, of wood, 50 cents each.

E. S. ZEVELY.

Self-inker.

I also herewith present a self-inking pad, which I will furnish to the department at $2 each.

(Endorsed:) Contract of E. S. Zevely, for making and rating stamps. For four years from April, 1863.

POST-OFFICE DEPARTMENT,
April 24, 1878.

I hereby certify that the within is a true copy as shown by the records of this department.

In testimony whereof I have hereunto set my hand, and caused the seal of the Post-Office Department to be affixed, at Washington City, the twenty-fourth day of April, in the year of our Lord 1878.

[SEAL.] D. M. KEY,
Postmaster-General.

Opened and filed, as per stipulation, this first day of July, 1878.

1088 *Complainant's Exhibit X X.—King, April* 25, 1878.—*A. J. Falls, special examiner.*

TROY, NEW YORK, *April* 11, 1859.

HON. HORATIO KING,
First Assistant Postmaster-General, Washington, D. C.:

SIR: In relation to my communication to your department, dated the 2d inst., and your reply thereto, dated the 4th instant, I have to say

that I think your department have not understood me as regards the request contained in my letter of the date as above referred. The refusal to comply with my wish therein expressed is the evidence by which I judge such to be the fact. I simply asked, and I to day renew it, for the privilege of testing my "postmarking stamp" in the post-office in this city for the space of sixty days from the date thereof, and that the postmaster here be directed, under the authority of your department, to receive such stamp for trial, etc., as furnished him by myself. I am not asking or seeking a contract now, nor am I making a proposition, neither do I wish to, under the late advertisement. The fact of a contract having been "concluded and executed for making stamps of all descriptions" does by no means in anywise interfere with my request. While the order given by your department was in force I was unable, in consequence of sickness, to thoroughly test my stamp. It was used upon about three thousand letters only during that time.

I have since made some changes in it which seem to make it a
1089 much better thing for the purpose designed. Now, I ask the opportunity to test it without any expense to the government; am I asking too much of your department? Shall I be denied this request of importance, perchance, to me as well as the government? Will your department be wronged or the government in anywise injured by allowing me the sixty days, or even more "if needs be," to test and prove my invention? If so, then I will not press my request further upon your consideration. In all of my business transactions at and with your department I have been kindly, generously, and gentlemanly dealt with. If now I have asked of you too much, the error is mine; if not, I hope you will grant me the order. I herewith enclose you an envelope containing a postmark from the stamp at the left, and an erasure upon the stamp made at the same operation of postmark. As now constructed, is believed to work well.

Respectfully, your ob't serv't,

MARCUS P. NORTON.

(Endorsed:) Marcus P. Norton, April 11, '59.

TROY, N. Y., *Oct. 31st*, 1859.

Hon. HORATIO KING,
First Assistant Postmaster General, Washington, D. C.:

SIR: I send you per mail this day a government post-office circular stamp with canceling improvement attached thereto, which is under an arrangement with Judge Allen, and is designed for trial at
1090 the post-office at Washington, under the supervision of Mr. Tree.

Your ob't serv't,

MARCUS P. NORTON.

(Endorsed:) Oct. 31, 1859, Troy, N. Y. Marcus P. Norton sending circular stamp with canceling improvement attached. 3 Nov. Given to Mr. Tree for trial. 7 inst. Mr. Tree reports this stamp consumes too much time. Ans's Norton hold stamp to his order.

POST-OFFICE DEPARTMENT,
Washington, D. C., April 24, 1878.

I certify that the annexed are true copies of the originals now on file in this department.

In testimony whereof I have hereto set my hand and caused the seal

of the Post-Office Department to be affixed the day and year above written.

[SEAL.] D. M. KEY,
Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1091 *Complainant's Exhibit Y Y.—Davis, April* 25, 1878.—*A. J. Falls, special examiner.*

F. S. ZEVELY'S CONTRACT.

This agreement, made this first day of April, in the year of our Lord one thousand eight hundred and sixty-seven, between the United States of America, by Alex. W. Randall, Postmaster-General, of the first part, and Edmund S. Zevely, of Cumberland, in the State of Maryland, of the second part, witnesseth: That whereas the Postmaster-General did cause to be published in certain newspapers in the United States a certain advertisement bearing date the 12th day of February, 1867, inviting "Proposals for circular and octagon marking stamps and rating stamps," a copy of which is hereunto annexed; and whereas certain proposals were made pursuant to said advertisement, and received at the Post-Office Department in the city of Washington, and were duly opened and examined and, after mature consideration, it was decided by the Postmaster-General that so much of the proposals of the party of the second part hereto as is hereinafter specified should be accepted, in conformity to the advertisement aforesaid, and the proposals offered; and whereas the same were accepted as aforesaid:

Now, therefore, in consideration of the premises and of the mutual covenants and agreements of the parties aforesaid, herein contained, it is hereby covenanted and agreed between the parties aforesaid as follows, to wit:

The said party of the second part hereby covenants and agrees
1092 to and with the said party of the first part to make, furnish, and deliver to the blank and stamp agency of the Post Office Department in the city of Washington, D. C., the following-described circular marking-stamps, and rating-stamps, at the prices specified for the same, and following the description thereof, the same being accepted by the Postmaster-General as aforesaid, and designated as follows, to wit:

Class 3.

Circular office marking-stamps, with type for months and dates, about one inch in diameter, of solid hard wood, and of model and size similar to the sample furnished and equal thereto in workmanship and finish, and of the same material as the sample, at eighty-five cents for each stamp furnished.

Rating-stamps.

For cancel stamps of solid wood, and equal to the sample furnished, at ten cents for each stamp.

All other rating-stamps of the various kinds mentioned in the advertisement, cut on solid hard wood and equal to the samples furnished, at twenty-two cents each (22c.).

And the said party of the second part hereto further covenants and agrees to comply in every respect with the particulars named in his

said proposals, so far as the same have been accepted by the Postmaster-General, and to deliver at the agency aforesaid any quantity of said stamps as above specified, within a reasonable time after the same may be ordered, at his own cost and expense and in good order and condition, and equal to the samples presented, and at the prices herein specified.

And it is further covenanted and agreed between the parties hereto, that in case of repeated failures upon the part of the party of the second part hereto to furnish and deliver as aforesaid any quantity
1093 of marking and rating stamps that may be ordered, of the kinds accepted, in due time thereafter, then the Postmaster General shall be at liberty to annul and rescind these presents, and all covenants and agreements entered into by virtue of this indenture, but unless so annulled and rescinded, this agreement shall be and remain in full force and effect for four years from and after the date hereof.

The said party of the first part hereby covenants and agrees to and with the said party of the second part to pay the said party of the second part for any stamps furnished, at the prices aforesaid, and for the kinds accepted, within one month after the expiration of each quarter of a year, upon the production of the proper vouchers therefor to the auditor of the treasury for the Post-Office Department.

And it is further covenanted and agreed upon the part of the party of the second part hereto, that no member of Congress of the United States shall be admitted to any share any part of these presents, or to any benefit to arise therefrom.

In witness whereof the seal of the Post-Office Department, the signature of the Postmaster-General, and the hand and seal of the party of the second part hereto are hereunto affixed.

ALEX. W. RANDALL, [SEAL.]
Postmaster-General.

E. S. ZEVELY. [SEAL.]

Witnesses to the signature of E. S. Zevely—
JNO. H. YOUNG.
JOHN H. ZEVELY.

In consideration of the making of the foregoing contract by the United States, and in consideration of one dollar to us in hand
1094 paid by the United States, we, the undersigned, do hereby undertake and guarantee that the party of the second part in said contract named, shall faithfully and promptly in all things comply with, fulfill, and perform the foregoing contract; and in case of the said party failing to do so, we will pay to the United States, on demand, all damages which it may sustain in consequence of such failure.

In witness whereof, we have hereunto set our hands and seals.

AMOS GROSS. [SEAL.]
HENRY FLUNY. [SEAL.]

Signed, sealed, etc., in the presence of us—
CHAS. F. BEAN.
BENJAMIN BARRITT.

[$1 stamp canceled.]

I certify that the above-named Amos Gross and Henry Fluny, sureties to the foregoing contracts executed by the said E. S. Zevely, are, in my opinion, good and able to respond to all damages which may arise from any default on the part of the principal in said contract.

JOHN H. YOUNG,
Postmaster.

[5 cent stamp canceled.]

Advertisement on file.

MARCH 25, 1867.

To Gen'l ST. JOHN B. L. SKINNER,
First Assistant Postmaster-General:

I propose to furnish stamps under the annexed advertisement
1095 for four years from the first of April, at the following prices, and as per models or samples accompanying this, i. e.:

Class 1. (I do not bid on.)

Class 2.

Brass-bound office stamps, with coppered dates, $1.30.
Brass-bound office stamps, with canceler attached, $2.00.

Class 3.

Office stamp, 85c.
Octagon, with year, $1.25.

Rating-stamps. (For class 2 and 3.)

All the various or different kinds of rating-stamps mentioned in the advertisement, made by attaching a heavily-coppered plate to a handle, as per samples, all same price, each 18c.

☞ If cut on solid wood, 22 cts. all round.
☞ Cancelers of solid hard wood, 10c.

I refer to my past record as to my ability to comply with my bid.

Yours, truly,

E. S. ZEVELY.

[Hammer-stamp, F. 2.]

POST-OFFICE DEPARTMENT,
Washington, D. C., April 24th, 1878.

HON. GEO. W. WILLIAMS,
Washington, D. C.:

SIR: Referring to your letter of April 18th, 1878, asking, among

other thing, for a copy of a letter from the office of the First Assistant Postmaster-General to the postmaster at Troy, N. Y., and dated May 4th, 1859, I have to state that after dilligent search having been made for the same, it cannot be found.

Very respectfully, etc.,

JAMES H. MAN,
Acting 1st Assistant Postmaster-General.

Opened and filed as per stipulation this first day of July, 1878.

1098 *Complainant's Exhibit No.* 1.—*Post-Office Department.—J. G. Pomerene, special examiner, June 1st,* 1878.

POST-OFFICE, NEW YORK,
August 8, 1860.

HON. HORATIO KING,
First Assistant Postmaster-General:

SIR: The order of the Postmaster General of the 23d ult., prohibiting the canceling of postage-stamps by the dating or postmarking stamp, and requiring the work to be done by separate instruments, could not be executed in this office without an increase of the clerical force. We were compelled a few days ago to keep back a mail nearly half an hour, in order that the postage-stamps on the letters to be transmitted by it might be properly canceled.

When the letters amount to tens of thousands, the duplication of the work of canceling and postmarking is a very serious matter. On Monday our carriers and messengers brought to the office 11,985 letters for the mail. In this extremity, and with an extreme reluctance to augment the clerical force of the office for the purpose of doing the work, I have hit upon an expedient which answers the purpose perfectly.

It occurred to me that the separate instrument required by the department might be attached to the postmarking stamps, and I sent
1099 for the stamp-maker and gave him my ideas, which he has carried out very well. The canceling stamp is soldered on to the other, so that one handle answers for both. The double operation is performed with one blow. There is, therefore, no increase of work. I send on a specimen of the work on the enclosed envelope.

Respectfully yours,
(Signed) JOHN A. DIX,
Postmaster.

1100 *Complainant's Exhibit No.* 2.—*Post-Office Department.—J. G. Pomerene, special examiner, June 1st,* 1878.

POST-OFFICE DEPARTMENT,
Washington, D. C., August 10th, 1860.

SIR: I have to acknowledge the receipt of your letter of the 8th inst., in relation to canceling stamps. The arrangement is an excellent one, and will save much labor in making up the mails; but I fear the attachment you have affixed to your marking stamps has not only been thought of before, but has actually been patented; if so, it may at some future time subject your office to a heavy charge to the patentee for its use, or perhaps to a law-suit.

The Postmaster-General, therefore, desires that you will give the subject such timely attention as will be calculated to avoid such consequences.

POST-OFFICE DEPARTMENT,
Washington, D. C., August 10*th*, 1860.

SIR: I have to acknowledge the receipt of your letter of the 8th inst., in relation to canceling stamps. The arrangement is an excellent one, and will save much labor in making up the mails; but I fear the attachment you have affixed to your marking stamps has not only been thought of before, but has actually been patented; if so, it may at some future time subject your office to a heavy charge to the patentee for its use, or perhaps to a law-suit.

The Postmaster-General, therefore, desires that you will give the subject such timely attention as will be calculated to avoid such consequences.

He also desires me to call your attention to the imperfect impression made by the marking stamps in your office, and to ask if a remedy cannot be found for the defect.

Complaints are received at the department almost daily from all parts of the Union on the subject, and the Postmaster-General would be much gratified if some plan could be devised to make them less frequent.

Very respectfully, etc.,
(Signed) ST. JOHN B. L. SKINNER,
Acting First Assist. Postmaster-Gen'l.

POSTMASTER, *New York, N. Y.*

1101 *Complainant's Exhibit No. 3.—Post-Office Department.—J. G. Pomerene, special examiner, June* 1, 1878.

POST-OFFICE, NEW YORK,
January 3d, 1863.

A. N. ZEVELY, Esq.,
Third Assistant Postmaster-General, Washington, D. C.,

SIR: Some time since you requested that I should test the utility of Norton's double postmarking and canceling stamping iron, and report my opinion thereon. It was in use in this office when I first entered upon my duties.

Since then the canceling part has been changed in various forms. We have tried the cutter thoroughly. This is the most complete method of cancellation, but it is liable, if even used with the greatest care, to injure the contents of the envelopes, especially if the contents are cards, photographs, and the like.

We have also used cork by inserting it in the cylinder of the cancelor. This performed successful, and cancellation is now performed in this way. I am confident no office in the country performs cancellation more perfectly. The design of Mr. Norton is indispensable to us. Indeed, unless I should nearly double the stamping force, we could not dispense with its use. I am satisfied the interests of the department would be subserved by securing its general use.

1102 We are now testing the stamp and cancelor on Norton's plan made of boxwood. It promises well, and can be made at a very trifling expense. I am fearful, however, its liability to yield to the wear to which it will be subject may prevent its general adoption. Time will determine this.

Very respectfully, your obedient servant,
(Signed) ABRAM WAKEMAN,
Postmaster.

Per Secretary.

1103 *Complainant's Exhibit No. 4.—Post-Office Department.—J. G. Pomerene, special examiner, June* 1, 1878.

POST-OFFICE DEPARTMENT,
Washington, March 1st, 1865.

HON. J. COLLAMER,
Chairman Com. Post-Offices and Roads, U. S. Senate:

SIR: I have the honor to return herewith the papers submitted to me, with your letter of the 24th ultimo, in relation to the claim of the assignees of the patent granted to Marcus P. Norton for a combined postmarking and canceling stamp now in use by this department.

In reply to your inquiries on the subject, I have to state, that this stamp is an invention of importance and value to the postal service, particularly at our larger post-offices, where expedition in making up the dispatch of the mails is always an object of importance; and it is also an effectual instrument for canceling postage-stamps, and in that respect it is of value to the extent that it diminishes the chances of cleansing postage-stamps and using them a second time. While I have no hesitation in stating that the Norton stamp is a desirable and useful instrument, in the particulars above mentioned, and that the interests of the department would be promoted by a purchase of the patent at a moderate price, I am not prepared at present to express an opinion as
1104 to its worth, having no satisfactory data on which to base an estimate, even approximately, of its actual value to the postal service.

It is stated that the use of these stamps effects a saving of labor of seven clerks at the New York post-office, and of two clerks at each of the offices at Philadelphia and Washington; and it is probable that a saving of clerical labor, in like proportion, has been effected by its use in other large post-offices.

The extent to which this canceling stamp may have protected the postal revenues from losses, incidental to the cleansing of postage-stamps once used, and using them a second time, it is of course impossible to determine. But while stating these items, it is proper to observe, that they do not, in my judgment, form a satisfactory basis for estimating the amount which should be paid to the assignees of this patent for the use of the invention; there being other considerations which must necessarily be taken into account in such an estimate.

If your committee should not find time to examine the merits of this application, and conclude that it is advisable to postpone the subject to the next session of Congress, I will cause a more thorough inquiry to be made on the points submitted to me by the committee, and report at a future day.

(Signed) W. DENNISON,
Postmaster-General.

1105 *Complainant's Exhibit No. 5.—Post-Office Department.—J. G. Pomerene, special examiner, June* 1, 1878.

POST-OFFICE DEPARTMENT,
January 15, 1867.

SIR: I have examined the papers sent me in regard to Norton's canceling stamp, as suggested by your letter of the 20th of December.

It is difficult for me to determine the amount which ought to be allowed for the use of that invention. The department has already saved several hundred thousand dollars by its use, and I have no doubt will continue to save large sums by its future use. The question of value to the department has long been settled. The necessity to the department of its continuing in use is beyond question. It is also necessary that some settlement be immediately made with the owners of the patent for this canceling stamp.

About the 1st of February next, the department must again advertise for furnishing canceling stamps, and Norton's stamp is the one desired. It is the best there is. If no settlement is made by the government so that these stamps can be made and furnished to the department without interference or embarrassment from the owners of the patent, it is apprehended the department will be compelled to resort to a more ex-

Your post marking and canceling stamp, as originally presented, seems to be approved at New York and other large offices where it has been tested.

The improvement which you now speak of evidently makes the instrument still more effective, and, indeed, fully attains the end desired by this department, namely, the destruction of the postage-stamp.

The only doubt about it arises from the danger of cutting through the envelope and damaging letters and enclosures.

If you expect soon to visit Washington on other business, please call at this department. The Postmaster-General is now absent, but I think he will view your invention favorably, and while he might not be
1112 able to make you any allowance, he might possibly arrange with you to manufacture stamps for the larger post-offices.

Very respectfully,

(Signed) A. N. ZEVELY,
Third Assistant Postmaster-General.

MARCUS P. NORTON, Esq.,
Attorney at Law, Troy, N. Y.

POST OFFICE DEPARTMENT,
Washington, D. C., March 21, 1868.

I hereby certify that the foregoing is a true copy of a letter on file in this department.

In testimony whereof, I have hereunto set my hand and caused the seal of the Post Office Department to be affixed at the General Post Office, in the city of Washington, the day and year above written.

[SEAL.] ALEX. W. RANDALL,
Postmaster-General.

1113 *Complainant's Exhibit No.* 9.—*Post Office Department.—J. G. Pomerene, special examiner, June* 1, 1878.

POST OFFICE DEPARTMENT,
APPOINTMENT OFFICE,
Washington, July 25th, 1862.

SIR: Your letter of the 23d instant was received, and will be referred to the postmaster of New York, for a full report as to whether the experience of his office shows that your canceling stamp so effectually destroys the postage-stamp as to prevent its being cleansed and used a second time.

In regard to the use heretofore made of your stamp in offices, the department can only be held responsible (if at all) in cases where it has authorized its use. Other parties using it without the approval of the department, or the consent of the patentee, have done so on their own responsibility, and with these cases the department can have nothing to do.

Propositions for a canceling stamp, distinct from the post-marking stamp, which will (it is claimed) so effectually destroy the postage-stamp without injury to the letter enclosed as to preclude the possibility of its being used a second time, are now under consideration in the department.

I am, respectfully, etc.,

JOHN A. KASSON,
First Assistant Postmaster-General.

MARCUS P. NORTON, Esq.,
Troy, N. Y.

1114 POST OFFICE DEPARTMENT,
Washington, D. C., March 12, 1868.

I hereby certify that the foregoing is a true copy of a letter on file in this department.

In testimony whereof, I have hereto set my hand and caused the seal of the Post Office Department to be affixed, at the General Post Office in the city of Washington, the day and year above written.

[SEAL.] ALEX. W. RANDALL,
Postmaster-General.

POST OFFICE DEPARTMENT,
APPOINTMENT OFFICE,
Washington, April 29, 1862.

SIR: Your letter of the 26th instant is received. The contract for furnishing marking and rating stamps will expire on the 31st of March, 1863, and an advertisement for new proposals will be issued in the early part of that year.

Very respectfully,

JOHN A. KASSON,
First Assistant Postmaster-General.

MARCUS P. NORTON, Esq.,
Troy, N. Y.

POST OFFICE DEPARTMENT,
Washington, D. C., March 23, 1868.

I hereby certify that the foregoing is a true copy of a letter on file in this department.

In testimony whereof I have hereunto set my hand and caused the seal of the Post Office Department to be affixed at the General Post Office, in the city of Washington, the day and year above written.

[SEAL.] ALEX. W. RANDALL,
Postmaster-General.

1116 *Complainant's Exhibit J. D. Green.—Norton's caveat.—J. G. Pomerene, special examiner, June* 7, 1878.

DISTRICT OF COLUMBIA,
County of Washington, ss:

On this eleventh day of September, A. D. 1871, before me, the undersigned, personally came Jeremiah D. Green, who being duly sworn deposes and says: My name is Jeremiah D. Green, I reside in Troy, N. Y. I know Marcus P. Norton, of Troy, N. Y., and have known him for about sixteen years. I know S. H. Sweatland, patent agent of the city of Washington, and have known him for about eighteen years. During the hearing before the Postmaster General, under a joint resolution of Congress, approved July 14, 1870, I appeared as attorney for Frederick G. Ransford, Peter Low, and others, against Marcus P. Norton, claiming for them certain interests in the patent granted April 14, 1863, to said Norton, founding such claim upon and under letters patent granted upon said Norton's application, dated August 9, 1859, and for improvements in post marking hand stamps. The said Sweatland appeared upon that occasion for Peter Low, Frederick G. Ransford and others, as

their attorney with me. During that trial, the said Sweatland produced a certified copy of a caveat dated October 20th, 1853, with an additional paper therein, dated Tinmouth, Vermont, August 7th, 1854, this was Marcus P. Norton's caveat of those dates, for a machine for mailing and folding letters, which certified copy is here produced, and marked
1117 Exhibit A Norton. This exhibit and caveat copy I obtained of the said S. H. Sweatland during last winter. I understood from Mr. Sweatland that he obtained such copy from the U. S. Patent Office. It is marked in pencil "Sweatland and Co'py," on the certificate thereon. I furnished the annexed copy to Mr. Norton, at his request, he having learned that such copy was in my possession.

J. D. GREEN.

Notary Public.

1118 *Complainant's exhibit.—U. S. Patent Office.—J. G. Pomerene, special examiner, June 7,* 1878.

(Endorsed:) Exhibit A Norton, Sept'r 11, 1871. Chas. Cons. Callan, notary public. [Seal.]

The U. S. Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify, that the annexed is a true copy from the files of this office.

[Sweatland & Co., in pencil.]

In testimony whereof, I, Sam'l A. Duncan, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this eighteenth day of January, in the year of our Lord one thousand eight hundred and seventy-one, and of the Independence of the United States the ninety-fifth.

[SEAL.] SAMUEL A. DUNCAN,
Acting Commissioner.

To the Commissioner of Patents:

The petition of Marcus P. Norton, of Troy Conference Academy,
1119 West Poultney, and county of Rutland, and State of Vermont, respectfully represents:

That he has invented a certain machine for mailing and folding letters in the outside wrapper with their way bills, and that he is now engaged in making experiments for the purpose of perfecting the same, preparatory to his applying for letters patent therefor. He therefore prays that the subjoined description of his invention may be filed as a caveat, in the confidential archives of the Patent Office, agreeably to the provisions of the act of Congress in that case made and provided; he having paid twenty dollars into the Treasury of the United States, and otherwise complied with the requirements of said act.

MARCUS P. NORTON.

TROY CONFERENCE ACADEMY,
West Poultney, Vt., Oct 13th, 1853.

SUBJOINED DESCRIPTION.

My post-office stamp and way bill folding machine is so constructed as to print the name of the town, State, month, and day thereof, also the name of the postmaster, paid 3 cts. and unpaid 5 cts., upon the letter, and to fold the same together with its way bill in an outside envelope. Said envelope and way bill are made together, and in the form and manner as shown by a plan which I send enclosed.

That part of the machine which stamps the letter consists of a shaft, upon which is placed two arms, crossing each other at right angles, which contain the type in the form as shown upon the way bill. Upon the same shaft are two cams, one at or near each end of the same, which are used to move the continuous or sliding platform (upon which the letter is moved under the type) down so as to let it receive an impression from the type. The platform upon which the letter passes
1120 under the type is continuous, or to slide under and back as I may deem best upon experimenting. The platform belt is to be moved with the same speed of the type cylinder by means of a band or its equivalent. The platform plays up and down by means of spiral springs around the guides of said platform, which are four in number. The belt or band is tightened at pleasure by means of movable boxes and screws. The types are to be inked by means of ink rollers, two in number, placed in such a manner by means of movable boxes and screws, so as to roll over the face of the type as they pass around. In order to change the motion of the platform belt or slide, two small gears are used, one on the cam and type shaft, the other on the crank shaft. The frame for the entire work is to be made in any form to suit the eye of the mechanic. A pulley is fastened to one of the cams for the purpose of moving the continuous belt or slide and the ink rollers.

That part for folding the letter with its way-bill in the outside envelope consists of a small table placed at one end of the stamping part upon legs. A hole is made through the centre of this table large enough to receive any size letter; around this is made a box containing four folders, which turn upon hinges by means of levers, two of which move at a time only, which fold one-half of the envelope; after which the other two move and fold the remaining half; then the bottom of the aforesaid box opens and lets the letter drop out, folded in its way-bill envelope, ready for transportation. The folders are worked by means of levers fastened to them, at the end of which a cord is fastened, which passes up through the table over pulleys down through the table, and are fastened to pedals. At the other end of the levers are fastened cords for the purpose of opening the folders when closed. Those cords for opening the folders are worked by means of weights or springs. Having thus described my machine, I will now state its object, etc.

1121 Its object is—

1st. To facilitate mailing and wrapping up letters with their way-bills, etc.

2nd. To save the expense of paper for wrapping purposes, lessening the cost about one-half, and saving all the paper as now required for way-bills.

3rd. To lessen the number of laborers as now required in large post-offices.

Rec'd 2 oath, written for Oct. 20, 1853.

S. T. S.

To the Commissioner of Patents:

SIR: I wish the following to be added to my subjoined description for mailing and folding letters for which I have a caveat in your office.

In the mailing of letters, I have provided means for postmarking of letters, newspapers, and the like, and for the cancellation of the postage-stamps thereon at one and the same blow or operation of the instrument or machine by which the postmark is had or made upon the letter, envelope, or wrapper, or package, in a plain and intelligible manner, and thereby always retaining the same, while the postage stamp or stamps are more effectually and permanently cancelled, so as to prevent frauds upon the revenue derived from the sale and use of such stamps.

The said device is arranged upon the type cylinder contained in first paper filed in my said caveat, between the way-bill form of type,
1122 and it gives the impression in ink upon the letter, envelope, or packet by means of the revolving cylinder, and at the same time and operation it also gives a heavy impression in ink upon the postage-stamp, when or where used upon the said letter or envelope, and the postage stamp becomes thoroughly impregnated with ink by the means herein provided, and therefore it cannot be cleansed by chemical washing or by other means, so as to allow of the same being used a second time, and thus frauds are prevented.

If there should be no stamp used for payment of postage on letters, packets, etc., this device would do no sort of harm to the letter, envelope, etc., for it would only postmark the same with the name of the town and date, such as month, day of the month, and year, and upon one side thereof, at same time, give a heavy impression in ink, which would appear was only intended for cancellation of the postage-stamp, as aforesaid stated.

This would make a plain and more intelligible postmark than by the old method now in use, while it would at same time, blow, and operation of the instrument, cancel in ink the postage stamp or stamps when such are used as aforesaid in a most thorough, perfect, and permanent manner, so that the same could not be cleansed for the purpose of being used a second time.

This part of my invention I construct of the ordinary form of type now used in the post-offices for the postmarking of letters, with the name of the town, month, day of the month, and the year, etc., and I combine therewith, in some good, practical, and suitable manner, a device which I denominate a postage-stamp canceling type, to be used in or with any kind of ink suitable for that purpose; and by such combined instruments one device is formed which will give the name of post-office, month, day of the month, and year, and at same time and blow cancel and thus destroy the postage-stamp, thereby greatly econ-
1123 omizing in the time now required in the making up of the mail; in fact, saving one-half of the labor required for postmarking and for canceling of postage-stamp when it is desirable to give the impression of name of the town and date upon the envelope, letter, or packet, in order to preserve the same for any purpose of proofs or other thing.

I now think that the best way to make this part of my invention is to use a cross-bar or a cross-piece upon the periphery of the cylinder set forth in other papers in my caveat, and fasten in some suitable manner the postmarking stamp upon one end thereof, and the postage canceling type or device upon the other end of said bar or cross-piece, which would, of course, give dating stamp at one end and canceling stamp at the other end thereof.

This bar, thus constructed, with said type arranged thereon as aforesaid, is securely fastened to the periphery of said cylinder in some suitable manner. The canceling type or stamp may be made of iron, steel, wood, rubber, cork, or of any other suitable material, and the same may be combined with said cross-bar by the drilling of a suitable hole therein, or by a tube to receive the same, and said tube being suitably fastened to said cross-bar; or the same may be fastened directly upon and to the said cross-bar at any required distance from said dating part or dating type. A screw may pass through said cross-bar into the material used for the canceling type, and thus hold it firmly thereto, or a suitable tube may first be fastened to said cross-bar, and then the canceling material or part used for the canceling type may be inserted therein and thereon, and thereby held until worn out by use, when the same may be replaced.

Rubber or cork, I think, will make the best and most suitable canceling type or device, while soft wood, used endwise, will make a most excellent canceling type.

1124 If it should be found impracticable to use the said cylinder and other parts of said machine as contemplated in the caveat papers now on file, then the said cross-piece or bar may be removed from the said type cylinder by means of loosening the screws by which it is fastened thereto, and a suitable handle affixed thereto in place of such cylinder, and the same then used as a hand stamping device for postmarking and canceling postage stamps.

The said cross-bar may be removed from said cylinder in order to reset the type for the date to be given, or for the purpose of removing and replacing the said canceling type or stamp, and then the same may be replaced upon said cylinder as aforesaid.

By means of this device I get a good and more perfect impression upon the letter, envelope, or packet, of the name of the town, day of the month, month, etc., and at the same time and operation, cancel the postage stamp or stamps in ink in a most complete, thorough, and perfect manner. When cork is used, it contains a greater quantity of the ink used, and being somewhat elastic and somewhat rough upon the face containing the ink, it will, to a considerable extent, break the enameled surface of the postage-stamp, formed as such by means of the indelible ink used in the manufacture of such stamp, so as to form a hard surface, in order that the stamp might not become defaced by transportation to places of sale, while on sale, or while being carried in a person's pocket ready for use; and, having broken somewhat such surface of such postage-stamp by the blow of the cork upon the same, the ink impregnates in a most thorough manner the whole postage-stamp, and of course it cannot be removed without destroying the printed surface of such postage-stamp and so defacing it that such efforts at reuse of it would be at once detected.

Soft wood used endwise will have nearly the same effect; so therefore some soft and porous material will be the most suitable to use in the construction of said canceling type or device used for the cancellation of all postage-stamps.

1125 The cam-frame which draws the letters under said type cylinder for postmarking of letters, packets, etc., and for the cancellation of postage-stamps thereon, will give the blow against the said postmarking and postage canceling device, which is done at one operation and at the same time; and when thrown out of gear, then the way-bill printing part may be worked and then print the way-bills as I have described in former papers on file in my said caveat. I would prefer the

use of an indelible ink with my said device or instrument or machine, if the same could be had by all the postmasters who use the said machine, etc.

This part of said machine may easily and readily be converted into a hand-stamp when and where no other part of said machine would be used, save and except the postmarking containing the name of the town where used, the month and day of the month and year, etc., and the postage-stamp cancelor or canceling device attached to and combined with the said cross-bar or cross-piece substantially as aforesaid, with a suitable handle at the centre of said cross-bar or piece, or at some suitable place between the two stamping devices aforesaid; which handle is used for the giving of the blow or impression of the two devices attached to said cross-bar as aforesaid, and of course it would then be a simple device of postmarking stamp, of cross-bar, and cork, rubber, or wood (or other suitable material) postage-stamp canceling device combined thus into one instrument, and operated by the handle with one blow, and to be used in or with any kind of ink desired. One blow of the instrument in the hand of the operator will do the printing of the name of the town, of the month, of the day of the month upon the letter or envelope, and the cancellation of the postage stamp in a most complete and effectual manner, substantially as aforesaid, thereby saving great labor and the rehandling over of the letters in order to
1126 postmark them, and afterwards to cancel the postage-stamps when it is desired to have an intelligible postmark preserved on the letter or envelope, and to have the postage-stamp thoroughly canceled, so as to prevent frauds by the reuse of the same, as is often now the case.

This instrument will therefore prevent such frauds and very much simplify and economize in the time for the making up of the mails for transportation. This will be the effect and result if no other part of said machine be used save the said parts converted into a simple hand stamp as aforesaid, to wit: The postmarking part, the postage-stamp canceling part, all attached to the said cross-bar and combined therewith as and in the manner aforesaid. If the entire machine set forth in all the caveat papers be used, there will be great saving of labor and time in mailing of letters, and a large quantity of paper, twine, and sealing wax, etc., by the use set forth in all the papers of this caveat. There would be also great labor saved as aforesaid, by the use of such hand-stamp combined as aforesaid.

I am having a full-size machine made according to my caveat papers, which, when done, I shall apply for a patent, or at least as soon thereafter as I may be able to get the Post-Office Department to consider and adopt for use in the various post-offices my said improvements or some parts thereof, preferring to submit the same to the judgement of that department before applying for my patent upon the invention herein contained.

I desire you to file this with my other papers in my said caveat. I intend to renew my caveat if such be at all necessary in order to protect my rights while engaged in efforts with the Post Office Department for the general use of my invention, and especially that part which relates to the hand-stamp form of postmarking and postage-stamp canceling combined with and upon a cross-bar or piece containing a suitable handle substantially as aforesaid, so as to give both impressions

1127 at one blow and operation of the instrument as aforesaid, thereby saving great labor and preventing frauds, etc.

POST-OFFICE, CLEVELAND, O.,
Nov. 28, 1863.

HON. A. N. ZEVELY:

DEAR SIR: * * * * You will probably recollect, when you were in Cleveland, having a conversat on with Mr. Cowles and myself about that combination dating and rating stamp, of which I was the inventor. Mr. Cowles promised, when he went to Washington, to bring the matter before the Postmaster-General, and endeavored to have my salary increased, as an acknowledgment of its value and utility to the service. My object in addressing you is to secure, if possible, your co-operation

in the matter; and, as you may have forgotten the circumstance, allow me to state that about the first of July, 1861, the department issued an order discontinuing the canceling of stamps with the dating stamp, and requiring that thereafter the regular canceling stamp should be used for that purpose. We followed instructions one day after receipt of the order with two separate stamps. It was about all one man could
1130 do before to stamp our letters, circulars, and newspapers, and by the change it would require twice the labor. The idea struck me that by a combination all might be done as required by one operation, and I immediately took the stamps to a locksmith and had them soldered together. The order and receipt you will find among your records. The smith's name is Jacob Schwartzenburg.

Ours was the first office that used the combined stamp, and very soon we were in receipt of inquiries as to how it was done. The uniformity of the impressions were noticed. We soon found it adopted in nearly every large office, and many smaller ones, and now it has become almost universal. The saving in large offices, where clerks are paid by government, is, you will perceive, quite a large sum annually. In our own office it saves the services of one man, in larger offices more. Some one should be rewarded for the improvement. True another person has the patent for it, but in a test case I can prove priority without doubt. And in this connection I will state that a short time after you were here, in a conversation with a friend on the subject, he advised me to apply for a patent, and he would advance the funds necessary. My own circumstances prevented me doing so before. I accepted his generous offer and made my application, which of course was rejected. I have called for an interference case, which has not as yet been set down, but will be, I hope, in a few days. * * *

Yours, respectfully,
(Signed) C. E. WHEELER.

1131 *Complainant's Exhibit A. A, C. E. Wheeler.—J. G. Pomerene, special examiner, Feb. 22d, 1878.*

(For identification.)

CLEVELAND POST-OFFICE,
Cleveland, O., May 7, 1864.

HON. M. BLAIR:

DEAR SIR: I understand that certain parties have presented a claim for $35,000 against the government, and that it is now pending before the House Committee on Claims, for the use of the combined dating and canceling stamp by the Post-Office Department, the invention of which is claimed by said parties.

I have every reason to believe that the original inventor of that stamp is a clerk in this office. He invented it immediately upon the receipt of the order issued by Postmaster-General Holt, several years ago, requiring a separate stamp to be used in canceling the stamps on letters. Consequently the claim of the parties alluded to above cannot have legal foundation.

Should you require testimony, the name of the clerk is Charles E. Wheeler.

I am, very respectfully, yours very truly,

E. COWLES, *P. M.*

1132 (Endorsed:) Respectfully referred to the Committee on Post-Offices and Post-Roads of the House of Representatives. M. Blair, Postmaster-General. May 10th, 1864.

1133 *Complainant's Exhibit Norton No.* 10.—*J. A. S., ex'r, June* 29, 1878.

DISTICT OF COLUMBIA,
City and County of Washington, ss:

Chas. Cons. Callan, being by me duly sworn, doth depose and say: I am a notary public in and for the said city of Washington and District. I know Marcus P. Norton, of the city of Troy, State of New York, and have known him personally for some years past. On the morning of the 22d day of August, 1871, at or near nine o'clock in the morning of that day, I was called by said Marcus P. Norton from my office to his room, No. 113, National Hotel, in said city, to administer to him the usual oath to a deposition or an affidavit. I attended at his said room, and there, at or near the time aforesaid, I duly administered to him, the said Marcus P. Norton, a most solemn oath, in the manner and form as by law required, after said Norton had signed his name to the affidavit for which I had been called to administer such oath. The affidavit then and there signed by said Marcus P. Norton, and for and upon which I administered to him said oath, is hereto attached, and the same is marked Exhibit O, Norton. The same is duly signed by me in my official capacity, and it was duly made and sworn to by said Norton on the morning of August 22d, 1871, at about nine o'clock in the morning of that day. The said Marcus P. Norton at that time informed me that he desired to use such affidavit in the Patent Office on that day. That he had thus sent for me to come to his room to administer said oath
1134 because he needed all his time to prepare other papers for use in Patent Office on that day, as he desired to facilitate his business in the Patent Office.

Deponent further says, that not having his official seal with him at the room of said Norton, he remarked to said Norton that he, deponent, would take to his office said affidavit so made and hereto annexed, and would then attach deponent's official seal, to which said Norton replied, "Very well; do so, and on my way to the Patent Office this morning I will call at your office for the same." That this deponent did so take and seal the said affidavit, and said Norton called at deponent's said office for it at or near ten o'clock in the morning of August 22d, 1871, and taking the said affidavit, left my office in the direction of the said Patent Office, and at the same time had a bundle of legal papers with him, the contents of which deponent knew not. The said affidavit, hereto annexed and marked as aforesaid, was made by said Marcus P. Norton in due form before me as a notary public, between nine and ten o'clock on the morning of the 22d day of August, 1871, and delivered by me to said Norton when on his way to the U. S. Patent Office same morning as before stated and set forth.

CHAS. CONS. CALLAN.

Subscribed and sworn to before me this 14th day of September, 1871.
[SEAL.] H. CLAY JOHNSON,
Notary Public.

J. Q. S.

1135 *Complainant's Exhibit Norton, No. 12.—J. A. S., ex'r, June 29, 1878.*

DISTRICT OF COLUMBIA,
City and County of Washington, ss:

Marcus P. Norton, being by me duly sworn, doth depose and say: My name is Marcus P. Norton. In the year 1859 I resided at the city of Troy, in the State of New York. I then and now personally know Frederick G. Ransford and Peter Low, then residing at said city of Troy. During that year I made an agreement with them to procure a patent for me upon certain improvements in "hand stamps," and according to the terms thereof I made the application for letters patent. That application was divided into two applications after examination and rejection of some of the claims thereof. And before the second application was made the said agreement was modified so that a patent should issue for a term of fourteen years, four years of which should be held and owned by said Ransford and Low, while deponent should be at liberty to make the second or new application for a patent upon the improvements for which the several claims had been rejected in the old application. I accordingly made the second application, and a patent was duly granted to me, bearing date the 14th day of January, 1862, and which I have now caused to be surrendered for a reissue, and which has been held by the examiner in charge to be a part of the application of 1859. Deponent says that the patent of January 14, 1862, was issued in pursuance of the said modified agreement, a true and correct copy of which is hereto annexed and forming a part hereof, which deponent has first caused to be recorded in the Patent Office for reasons that will herein appear. Deponent further says that the original agreement,
1136 whereof the annexed is a true, correct, and faithful copy, was by him put on file in the U. S. Patent Office, either in the file from which the patent of January 14, 1862, issued, or else in the file from which the patent of August 9, 1859, issued to said Ransford and Low. That said original agreement, of which the annexed copy is a true and correct one as above stated, can not now be found in either of said files, to wit, of 1859 and 1861-'2. And deponent further says that the said original agreement so put on file has either been mislaid and lost or else some one unknown to deponent has abstracted or taken the same from such filing. And deponent further says that he never made and executed such an assignment as that which now appears upon the U. S. Patent Office records as being dated May 2d, 1859, and recorded May 6th, 1859, under and by which the patent of August 9th, 1859, issued to said Ransford and Low, and I now refer to a former affidavit made and sworn to by me and filed in said application for reissue of said patent of January 14th, 1862, but did make an agreement as above stated which gave that device to them for a term of four years from the date of the patent. The said agreement hereto annexed was executed and delivered to me for the reasons stated therein, and it was originally prepared by deponent, while the copy hereto annexed has been prepared from an old and wornout copy not suitable to be put into the record file for said reissue of patent of January 14th, 1862, but which is a correct copy as hereinbefore stated.

MARCUS P. NORTON.

Subscribed and sworn to on this 22d day of August, 1871.
[SEAL.] CHAS. CONS. CALLAN,
Notary Public.

J. Q. S.

(Endorsed:) Exhibit O, Norton.

1137 *Complainant's Exhibit Norton No.* 14.—*J. A. S., ex'r, June* 29, 1878.

NATIONAL HOTEL,
Washington, D. C., August 23d, 1871.

HON. COMMISSIONER OF PATENTS:

SIR: In the matter of my application for reissue of my letters patent, dated January 14, 1862, for and upon improvements in "Post-office hand stamps," and now pending upon a letter of rejection, by which said case is rejected upon letters patent granted upon my petition, and dated August 9. 1859, for "Improvement in post-office marking hand stamps," I herewith present for permanent file in said pending reissue file, a copy of an original agreement between "Peter Low" and "Frederick G. Ransford," of Troy, N. Y., of and concerning my invention for "type wheel dating and printing stamp." This copy I have first caused to be put upon record so that in case of "another loss," there will be something to indicate that there was and had been such an agreement in the patented files, and that said letters patent and the "reissues" thereof had been duly, properly, and regularly granted to me upon my application.

I also enclose my affidavit of explanation and of verification of said enclosed copy agreement, which I desire to be filed in said reissue application of said patent of January 14th, 1862, with said "copy agreement," it having been first put upon record as the certificate thereof thereon will more fully appear. Upon a case thus made up, to wit: 1st, the application for reissue of the patent of January 14, 1862; and, 2d, of said recorded copy of agreement of Ransford & Low on one
1138 part, and Norton upon the other; and 3d, my personal affidavit, explaining and verifying the said copy agreement so recorded, I desire, and I now request and demand an "interference case" to be made and had by and between said application for reissue and the letters patent granted to "T. J. W. Robertson," on the 22d day of September, 1857, and a certain patent granted upon Marcus P. Norton's application for a patent, which is dated August 9th, 1859. I claim not only to be the lawful inventor of the invention and improvements contained in each and every of these patents, but I also claim to be the lawful owner of the invention and patent dated August 9th, 1859. I desire, therefore, that you give each party ample time wherein to get ready for the questions and the points at issue, and that each person, to wit, "F. G. Ransford" and "Peter Low" be duly notified of the same, and of the contents of this letter, that each may fully understand what points are at issue in such "interference case," and thereby be better prepared to go on with the same. I would prefer that only 20 days be given to each party to file the preliminary statement required by the rule, and that after that you give 60 days for the taking of testimony. By pursuing the course above indicated, the rights and interests of each one concerned would be more fairly reached.

Such an interference would involve questions of priority of invention as well as questions of title thereto.

The affidavit of verification more fully explains the record of copy agreement, as well as other matters connected with the same. I would wish to have entered upon the file paper the name of the aforesaid named paper, including the date of said recorded paper and said affidavit. I desire immediate action, as I desire to return to my family at once.

Respectfully, etc.,

MARCUS P. NORTON.

No. 7 Park Place, New York City, N. Y.

1142 *Complainant's Exhibit Norton No. 22.—J. A. S., ex'r, June 29, 1878.*

The U. S. Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office of the file wrapper and contents and drawings in the matter of the application of Marcus P. Norton and C. A. Haskins, filed Oct. 15th, for "hand-printing stamp."

In testimony whereof I, J. M. Thacher, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this nineteenth day of October, in the year of our Lord one thousand eight hundred and seventy-two, and of the Independence of the United States the ninety-seventh.

[SEAL.] J. M. THACHER.
Acting Commissioner.

NEW YORK, *Oct. 13th*, 1857.

Hon. COM'R OF PATENTS:

SIR: Enclosed I send a withdrawal and receipt of $20.00 in the application for a patent for R. R. chairs; also the treasurer's receipt for $10.00, which will complete the fee in the application for a patent for "hand-printing stamp" by myself and C. A. Haskins forwarded this day per express.

In the matter of the R. R. chair we have concluded to make
1143 another application under some alterations from the present form, as the office have already hinted, previous to the examination, that it would be rejected.

Your obedient servant,

MARCUS P. NORTON.
Troy, N. Y.

P. S.—Since writing the above I have endeavored to exchange Troy money for gold, but in vain. I will send $10.00 in gold upon my return from here to Troy to-morrow.

MARCUS P. NORTON.

(Endorsed:) Received and filed October 15, 1857. R. S. G.

To the Hon. COMMISSIONER OF PATENTS:

The petition of Marcus P. Norton, of Troy, N. Y., and C. A. Haskins, of New York, in the county of New York, and State of N. Y., respectfully represents:

That your petitioners have invented a new and improved hand-printing stamp, with self inking reservoir and date-changing apparatus, which they verily believe has not been known or used prior to the invention thereof by your petitioners. They therefore pray that letters patent of the United States may be granted them therefor, vesting in them and their legal representatives the exclusive right to the same, upon the terms and conditions expressed in the act of Congress in that case made and provided, they having paid ($30.00) thirty dollars into the Treasury, and complied with the other provisions of the said act.

And your petitioners do hereby appoint Marcus P. Norton, of
1145 Troy, Rensselaer County, State of New York, their attorney, and authorize him to alter or modify the within specification and claim as he may deem expedient and receive their patent, and also to

receive back any moneys which they may be entitled to withdraw, and to receipt for the same.

MARCUS P. NORTON.
C. A. HASKINS.

STATE OF NEW YORK,
County of New York, ss:

On this thirteenth day of October, A. D. 1857, before me, the subscriber, a commissioner of deeds, personally appeared the within named Marcus P. Norton and C. A. Haskins, and made solemn oath, according to law, that they verily believe themselves to be the original and first inventors of the within described new and improved hand stamp, and that they do not know or believe the same was ever before known or used, and that they are citizens of the United States.

EDWARD A. FRASER.
Commissioner of Deeds, New York.

(Here follows diagram, marked page 1144.)

SPECIFICATION.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of Troy, N. Y., and C. A. Haskins, of New York, in the county of New York, and State of New York, have invented a new and improved hand printing stamp, with self-inking reservoir and date-changing apparatus, and we do hereby declare that the following is a full and exact description of the nature, construction and operation thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon. We describe our invention in the following manner, to wit:

1st. The nature,
1146 2d. The construction,
3d. The operation, and
4th. The claim,

which we draw out of and base upon the said nature, construction, and operation.

NATURE OF THE INVENTION.

The nature of our invention consists in making a hand stamp with a reservoir and self-inking roller, the reservoir being upon the inside of said roller, and contains ink for from six months to one or more years. It also consists in a chase, hereafter to be described, which will admit of different forms of type to the same machine without alteration in it. It also consists in the passing of the roller over the type by the downward motion of the same, and the restoration of said roller to its proper place by means of a spring and frame hereafter to be described. It also consists in a set of wheels governed by an index pointer for changing the month and day of the month, also the manner of attaching to form so as to give the month and day of the month required without taking away the form or resetting of the type. It also consists in constructing a wheel with type thereon for the use of banks, so that by the same wheel or die banks may stamp upon notes, checks, bills of exchange, etc., any endorsement required, all of which is done by one machine, and at one transaction, if required. It also consists in arranging the machine so that postmasters may print way-bills upon the outside of envelopes or otherwise, a form of which may be seen in the drawings.

CONSTRUCTION.

We construct our invention in the following manner, to wit: Fig. 1 is a perspective view; fig. 2 is a side view of the type wheels for the month and day of the month; fig. 3 is a sectional view of the
1147 type wheels, also of the index for each; fig. 4 is a reverse view of the form for way-bills, and showing the month and day of the month in the same, ready to use for an impression; it also shows a part of the said type wheels; fig. 5 shows the reservoir inking-roller, with the cloth upon one part, while at the other may be seen a representation of ink, also the passages of the ink from said reservoir to the outside covering of cloth or other substance which will distribute the ink upon the type. At fig. 1 (*m*) shows a recess in the bottom of the plate upon which the impression is made. (*n n*) also shows a recess for the purpose of receiving some kind of elastic substance to prevent an injury to the type when the impression is given. (*m''*) shows the stem of the frame (*l*) which holds upon the arm (*f f*) the roller frame. (*e e* and *n'*) is a thumb-screw. (*q*) is a flat spring fastened in the arm (*f f*). (*m'*) shows the head of the impression-rod (*a*), which part of the rod is made larger than at (*h*), which is for the purpose of holding the coiled spring at dotted lines (*o o o*) in the tube (*g'*). (*d*) is a guide-pin passing in the groove (*b*) and stops the rod (*a*) at (*c*). (*l*) is the stem of the frame holding the type wheels, and is secured in (*h*) by the thumb-screw (*j*). (A and B) represent the frame holding the type-wheels. (*k*) is the index pointer which moves the day of the month wheel, which wheel is held in its proper place (*k' k*) by the pin (*h*); said pointer is held upon the shaft (*s*) by the nut (*v*). (*c* and *f*), fig. 3, are the same as (*k* and *h*), fig. 1, only they are to move the month wheel. (*y*), fig. 1, shows the type form secured by the pins (*c' c'*) and the thumb screw (*c'*). (*r*) is the reservoir inking roller resting in the frame (*e e*) at (*a a*). (*w*) shows the place where the ink is received in the roller, and is also the stop The figures and initial for the month and day of the month are shown—figs. 1 and 3; (*c* and *c'*), fig. 2 shows the screws holding the chase to
1148 the index and frame for type-wheels (*c' c*). Fig. 1 is the head of the ink-roller, which contains its bearings (*a'*). Fig. 3 is the head or stop of the shaft (*a* and *s*). At fig. 6 (*w*) is the bearing screwed into the head (*b' b'*), which is for the purpose of securing the ink within the roller (*r*), and at which place the said ink is admitted into said roller. The passages are represented at the small dots in the part of the roller not shown with cloth upon it. The type wheels may be disconnected from (*h*), fig. 1, by means of the thumb-screw (*j*), which part is seen at fig. 3, and in its place may be put a chase, which shall be fastened by the same screw, and which may receive any form of type required. The upper part of the frame may swing from over the plate (*n n*) so as to stamp a large package of letters as they may be upon the desk or table. The self-inking roller, being made hollow, will hold ink sufficient for any length of time from one day to ten or more years, and will thereby always be ready for use. The type-wheels are of the same size each to each; one has twelve sides for the respective months, while the other has thirty-one for the respective days of each month. Said wheels move upon a shaft independent of each other, also of the form of type used. We also use a wheel for bank purposes, and which contains as many sides for type as may be used or required by the bank using the same. For banks we use as many different rollers as they require different kinds of ink, which rollers may be so arranged as to bring into use the kind of ink required. Each roller contains a different color of

ink. It also may be done by a variegated roller. The cylinder for the day of the month may be made in two wheels, which shall number from one to nine, and a blank which could then number ninety-nine, and any number less. The two wheels would be smaller and exactly alike. All the wheels would then be less in diameter, and might all be operated by one index. Type upon the said wheels are dovetailed in the pe-
1149 riphery of the same, or may be soldered upon the outmost part of them, or the wheels may be cast at one time with type complete, at the circular end of the form. Fig. 4 may operate a wheel which shall give the number of letters and their value in each respective envelope.

OPERATION.

By pressing upon the head (m''), the type or form is carried down to make an impression, and as it thus goes down the inking roller passes over it, distributing ink upon the type. The type or form is returned to its former place by the coiled spring (o o o), in the cylinder (g'), fig. 1. At the same time the inking reservoir is returned by the flat spring (g), upon the lower end of which rests the cross bar of the frame (e e and c). To change the month, the pointer (e' and f') is moved one space; so to change the day of the month, the pointer (k and h) is moved one space, as seen at (k). This operation brings the type for month and day thereof in their proper position for an impression, as seen at fig. 4. The form (y) may be removed and another take its place by the thumb-screw (c'), fig. 3, being loosened, etc. The reservoir inking roller, fig. 5, is covered with cloth or any other substance that will allow the ink to distribute through and upon it. One, two, or more thicknesses may be used, as the case may require. The ink is admitted to the reservoir by taking out the screw (w). When the chamber is full, then the said screw is returned to its proper place, and when so returned forms one of the bearings of said roller. The said roller may be taken out at pleasure, as seen at (o o), fig. 1. When the index for month and day of month are set to their right place, they are or may be strongly secured there by the screw (v) on the shaft (s). Each index operates separate and independent of each other. Any required form may be used, as herein-
before explained. The index (k' and c) may be made upon the re-
1150 spective wheels, and the frame (H B) lessened in size and weight.

CLAIM.

We do not claim the passing of the ink roller over the type (y) by the downward motion of the same. Nor do we claim printing words or figures by means of a wheel, or cylinder; but what we do claim and desire to secure by letters patent is,

First. The self-inking reservoir roller, as herein described.

Second. The arrangement of the month and day of month wheel upon one shaft, combined with and operated by the pointers and indexes, and the arrangement of the form (y) in the chase, independent of, and giving an impression with the initials and figures of the respective type-wheels, as herein substantially set forth.

MARCUS P. NORTON.
C. A. HASKINS.

(Endorsed:) Received and filed Oct. 15, 1857. A. S. G.

18th.

U. S. PATENT OFFICE,
Nov. 18th, 1856.

GENTLEMEN: Your application for letters patent for a hand printing stamp has been considered and rejected.

The device presented under your first claim is found in E. E.
1151 Barrett's improvement in printing presses, patented July 21st, 1857. Its equivalent obtains also in L. Bailey's hand-stamp, patented March 3d, 1857. The contrivances embraced under your second claim have likewise been anticipated. See T. J. W. Robertson's improved hand stamp, patented September 22d, 1857, and Richard Walker's book-paging machine, for which a patent was refused December 12th, 1855.

Respectfully, etc.,

Messrs. M. P. NORTON and C. A. HASKINS, care of M. P Norton, esq., Troy, New York.

(Endorsed:) Brief letter V. M. P. Norton and C. A. Haskins. Hand-printing stamp. Nov. 18th, 1857.—Rhodes.

NEW YORK, *Nov.* 23, 1857.

To the COMMISSIONER OF PATENTS,
Washington, D. C.:

DEAR SIR: Will you be so kind as to inform me if Mr. Marcus P. Norton and Peter Low, of Troy, N. Y., have forwarded to your department the desired amount of money for the procuring of a letter patent of a reservoir, date-changing hand-stamp, which stamp and drawings were sent to your department on or about the 27th or 28th of October last. My agreements with those parties were that they were to furnish the money for the procuring of the patent of the same.

I cannot get the satisfaction from them that I desire. I therefore appeal to you for this information. They say that they have entered a caveat some time since, and paid the amount, $20.00, and have
1152 since sent the balance of money required for the procuring of the patent. If they have not sent the balance, or any part, you will confer a great favor by answering this by return of mail, if possible.

P. S.—Please to address me at 23 Scammel street, New York.

Yours, respectfully,

C. A. HASKINS.

(Endorsed:) C. A. Haskins. Answered and filed Nov. 27, '57.

PATENT OFFICE DEPARTMENT.

Business for Marcus P. Norton and C. A. Haskins, of Troy and New York.

Application for a patent for "hand-printing stamp." (Pending.)
Caveat enclosed. Dated , 185 .

To the Hon. COMMISSIONER OF PATENTS:

SIR: In accordance with a power of attorney given me by M. P. Norton, of Troy, and C. A. Haskins, of New York, county of New York, and State of New York, I do hereby withdraw their application for a patent for an improvement in hand-printing stamp, now in your office, and request that ($20.00) twenty dollars may be returned to my office

by mail, agreeable to the provision of the act of Congress authorizing such withdrawal.

MARCUS P. NORTON,
Attorney for Applicants.

Dated at Troy, N. Y., Nov. 23d, 1857.

1153 Nov. 23*d*, 1857.

Hon. COMMISSIONER OF PATENTS,
Washington, D. C.:

SIR: Enclosed you will please find withdrawal and receipt in the above entitled case.

Your obedient servant,

MARCUS P. NORTON.

DEPARTMENT OF THE INTERIOR.

United States Patent-Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an assignment recorded in liber O^{22}, page 12, and that said annexed copy has been compared by me with the original, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof, I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent-Office to be hereunto affixed this seventeenth day of May, in the year of our Lord one thousand eight

hundred and seventy-eight, and of the Independence of the United States the one hundred and second.

[SEAL] W. H. DOOLITTLE,
Acting Commissioner.

Liber O[22], p. 12.

Whereas the letters patent of the United States of America were duly granted and issued to Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, upon certain improvements in post-office postmarking and canceling hand stamps, dated and num-
1156 bered as follows, to wit, January 14th, 1862, No. 34184; December 16th, 1862, No. 37175; April 14th, 1863, No. 38175; reissued August 23d, 1864, No. 1748. Also letters patent for internal revenue canceling stamp, dated August 15th, 1865, No. 49432. Also letters patent for improvement in postmarking and canceling hand-stamps, issued July 13th, 1869, and ante-dated to June 10th, 1869, No. 92688. And also letters patent for postmarking letters and canceling stamps by cutting the same, and dated August 9, 1859, No. 25036, and extended for seven years by the Commissioner of Patents. And whereas Charles Eddy, of the city of Troy, county of Rensselaer, and State of New York, has consented to accept the right, title, and ownership of each and every of said letters patent, in trust for the sole benefit of the owners thereof, in accordance with a memorandum in writing of even date herewith. And whereas it is desirable that but one person shall have the management and control of the said patents for the sole purpose of effecting settlements under the same with any and all infringers of the same, or any one or more thereof, or with whomsoever may use the inventions and improvements contained in the said letters patent or any of them; which settlement for the past or future use may be in any way the said Eddy may deem proper and expedient:

Now, therefore, for and in consideration of the sum of one dollar, and in the further and other valuable considerations which we now and hereby duly acknowledge the receipt of the same, we, Jacob Shavor and Albert C. Corse, of the said city of Troy, county and State aforesaid, have sold, assigned, and transferred, and do now and hereby sell, assign, and transfer unto the said Charles Eddy, in trust, in the manner so as aforesaid stated, all the right, title, and interest of every name and description which we now have in, to, or for the said letters patent, and the inventions and improvements there-
in named, described, and claimed as new and patentable, or in
1157 either of them. To have and to hold the same, and each and every thereof, in trust as aforesaid, with full power to enforce settlement and payment for the past or the future use of the said inventions and patents, or either of them. He, the said Charles Eddy, having full and absolute control of each and all of the said several patents hereinbefore named by date as well as by numbers, commencing with the date of each thereof, intending herein and hereby to sell, assign, and transfer unto him, the said Charles Eddy, in trust, all our right, title, and interest and ownership in any or all the said several letters patent, from the date of each of the same and until the expiration of the term for which they were respectively granted and issued unto the said Marcus P. Norton. And hereupon and hereby the said Charles Eddy is vested with full and absolute power over and control of any and all settlements, and to settle and receipt for, and to sign any and all nec-

essary papers concerning either the past or future use of the said inventions and patents, or either one or more thereof, in settlement and payment for such use by and with person or persons, corporations, government, or any body whomsoever.

In testimony whereof we have, on this 18th day of December, A. D. 1876, hereunto set our hands and seal in presence of two witnesses, namely:

C. H. McGRATH.
C. G. EDDY.

JACOB SHAVOR. [SEAL.]
ALBERT C. CORSE. [SEAL.]

Recorded January 11th, 1878.

1158 *Sherwood's affidavit, attached to Norton's caveat.*

United States circuit court, southern district of New York. In equity.

THOMAS J. W. ROBERTSON
vs.
THE SECOMBE MANUFACTURING COMPANY.

NORTHERN DISTRICT OF NEW YORK,
County of Rensselaer, ss:

Cyrus A. Sherwood, of the city of Troy, in said county, being by me duly sworn, doth depose and say: That on the 19th day of March, 1872, he made a deposition before John T. Lamport, a United States commissioner, in which, among other things, deponent stated that during the construction of a certain model therein described he was aided in the construction of the same by means of certain copies of a caveat then on file in the Patent Office as deponent was informed by Marcus P. Norton, and believes the same to be true, and for a more full statement of the same deponent refers to that deposition.

Deponent further says that he has carefully read the certified copy of caveat hereto annexed and marked Exhibit B., Norton, and dated June 21st, 1855, for railroad ticket printing press, and especially so the additional paper therein contained and dated Tinmouth, Vt., August 21st, 1855, and signed Marcus P. Norton; and deponent believes the
1159 same to be a true and faithful copy of the additional description paper from which deponent was aided in the construction of the model mentioned in two former depositions dated respectively "March 19th, and April 5th, 1872." The said additional description paper in the certified copy of the caveat hereto annexed, contains the same identical invention as is represented by the said model.

Deponent further says that the certified copy of the caveat above referred to was certified by M. D. Leggett, Commissioner of Patents, on the 22d day of August, 1871, as will appear by reference to the certificate thereof of said Commissioner of Patents.

CYRUS A. SHERWOOD.

Subscribed and sworn to before me this 5th day of April, 1872.

Notary Public, Troy, N. Y.

1160 *Complainant's Exhibit Norton's Caveat, dated June 21st, 1855.—J. A. S., Ex'r, June 29, 1878.*

The U. S. Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office of the caveat of M. P. Norton, filed June 21st, 1855, for "railroad ticket printing press."

In testimony whereof, I, M. D. Leggett, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this 22d day of August, in the year of our Lord one thousand eight hundred and seventy-one, and of the Independence of the United States the ninety-sixth.

[SEAL.] M. D. LEGGETT,
Commissioner.

To the COMMISSIONER OF PATENTS:

The petition of Marcus P. Norton, of Tinmouth, in the county of Rutland, and State of Vermont, respectfully represents:

That he has made certain improvements in a machine for the purpose of printing railroad tickets, which is called the "railroad ticket printing press," and that he now is engaged in making experiments for the purpose of perfecting the same preparatory to his applying for
1161 letters patent therefor. He therefore prays that the subjoined description of his invention may be filed as a caveat in the confidential archives of the Patent Office, agreeably to the provisions of the act of Congress in that case made and provided; he having paid into the Treasury of the United States twenty dollars, and otherwise complied with the requirements of said act.

MARCUS P. NORTON.

TINMOUTH, VT., *June 4th*, 1855.

SUBJOINED DESCRIPTION OF RAILROAD-TICKET PRINTING PRESS.

My invention consists of a machine for the purpose of printing and cutting railroad tickets, cards, etc. A frame is made of iron and in shape sufficient to contain the machinery for the above purpose. A semi-cylinder is made stationary at or near the bottom of the frame; on the surface of said cylinder passes the inking rollers, which are moved over its entire surface by the rotation of a crank hereafter described. A square bar passes up through said cylinder in its highest part. In the upper end of this bar the form of type is made fast by sliding into a dovetail groove, so as to admit of different forms of type for the purpose of printing tickets or cards for different stations on the line of railway. The form or forms thus secure, is moved up and down by means of a cam revolving in the semi cylinder or by a toggle-joint lever working in the aforesaid cylinder. It is moved up for the purpose of giving the impression, and down to ink the type. When the form is brought down by the cam or toggle-joint lever, it is on a line with the surface of the said cylinder, then the inking rollers pass over it and ink the type, then, by working the machine, it moves up and leaves the desired
1162 impression on the under side of the paper, which is under the impression plate. The cam in the cylinder is made fast to a shaft extending under the said cylinder. At one end the said shaft there is a cog-wheel, geared with a cog-wheel on the shaft, which holds the crank

moving the inking rollers; said cog-wheels are made of a size required, so as to let the ink rollers pass over the type when the form is at rest, and to let the form move up to give the impression when the inking rollers are brought to the extreme end of the semi-cylinder by the roller crank. In the cog-wheel upon the crank shaft there are cogs left out, for the purpose of letting the form of type remain at rest, when the inking rollers pass over to ink the type. At one end of the said roller crank shaft the driving power is applied. Over the semi-cylinder passes a part of the frame, through which passes the type in its upward and downward motions, and into which slides the required form, held fast by means of a dovetail groove. Said form is made of iron and steel. The upper part is made to conform to or with the impression plate, thus forming a shear-box for the purpose of cutting the ticket or card the required size. Over this shear-box is an impression plate, with an India rubber face, made the exact size of the shear-box blow. The said plate is made to rise and fall by means of a crank attached to a shaft below and connected by a crank-rod with said plate. The said plate moves up to let the sheet of paper pass under, which when done moves down into the shear box, cuts the ticket or card and remains at rest while the impression is given. The paper is fed to the machine in sheets, and is cut into the required size, one at a time, then printed. In the said shear-box there are two springs, extending the whole length of the said box, and on opposite sides; one is placed higher than the other, so as to take off the printed ticket or card as the form of type moves down to receive ink. Said springs give back so as to let the type pass
1163 up to give the impression. After the impression is given, the aforesaid impression plate moves back to its place. The said plate remains at rest while the impression is being given, by the omission of cogs in the proper place of the upper cog-wheel to correspond to the omission in the cog-wheel below governing the form of type. At the extreme line of the semi-cylinder, and upon each side, there is a reservoir for ink, under which are distributing rollers, if required, made to revolve by being attached to some part or parts of the machine. The form of ticket is made like the one hereafter annexed. The name of the road, the name of the town where the ticket was sold, the day of the month and year when sold, and name of town to which it is sold, are stereotype plates, made of an exact size to fit each place respectively, and held there by means of dovetail grooves. The word Clarendon, for example, is drawn out, and Rutland, of the same size, is inserted. The word Rutland, at one end of the ticket, is drawn out, and Clarendon, of the same size, is inserted; then you have a ticket from Clarendon to Rutland, the reverse of the present form. Then take out the day of month and put in the required date, change the month and year in the same manner, when required. In the same manner as above described, all the different towns are changed upon the line of the road. For printing coupon tickets, remove the shear-box and impression plates, and put in the coupon form and impression plate, which is done by drawing the said form out of the aforesaid dovetail groove, and sliding the coupon form into the same place. The coupon form is made of any of the other forms, as the case may require, all of which are put in dovetail grooves in a plate of the required length.

THE OBJECT OF THE PRESS.

1st. To save the trouble and expense for railroad companies of
1164 getting tickets printed at common printing offices, also to save so many forms as required now.

2nd. To print the ticket with the day of the month on which it is sold, and for which it is good.

3rd. To have the ticket clerk print the ticket or tickets when called for, and distribute them along the line of road the day previous to the sale, or

4th. To have a press in each ticket office along the road, and print the ticket or tickets when sold.

MARCUS P. NORTON.

1165 AUGUST 10, 1870.

HON. COMMISSIONER OF PATENTS:

SIR: Please have made for me certified copy of file wrapper and contents thereof, of my caveat upon "R. R. ticket printing press," filed June 21st, 1855.

I want two copies of these papers, certified in two separate packets.

MARCUS P. NORTON.

Additional paper to railroad printing press.

TINMOUTH, VT., *August 21st*, 1855.

HON. COMMISSIONER OF PATENTS:

SIR: I wish to file this paper as an additional caveat description to my railroad printing press, now on file, under date of June 4th, 1855, and sworn to the 11th day of June, 1855.

I propose to make the form of type as I have described in my caveat, or make a cylinder of sufficient size to contain upon its surface or periphery the name (in stereotype) of *the name of* stations on the line of road in order as they are on said road; this I call the cylinder of towns to where tickets are sold; this cylinder is placed into the form and made to revolve at the will of the operator. There is another cylinder of the same form like unto the other and this is called cylinder from which the

tickets were sold. The name of the road and all other printed matter to be done may be done by cylinders constructed for that purpose, or stationary type may be used for all, excepting for the month, the day of the month and the year, which will be done by cylinders made for that purpose. At one end of each cylinder there is an index for each
1166 cylinder, and a pointer connected with the cylinder revolves the same to where it may be desired to use the same, where it is then held by the use of a pin and spring. The operator moves these cylinders to and fro from whatever name or date he wishes to sell and date tickets for use on the railroad. This press is chiefly designed to be used in the general ticket office by the general ticket master or his clerks, or it may be used in any office on the line of the road where printing and dating is desired. The said cylinders when moved to their respective places are held fast by a spring connected with the pointer and governed or regulated by the indexes, as will more fully appear herein. I now set forth a series of revolving type wheels or cylinders for printing certain matter on railroads, but I also intend such wheels to do all kinds of printing required in any office other than the printing the name of towns on railway line with the date of the selling of the tickets, all of which is done by means of suitable cylinders for that purpose. I now deem it best to give a more full description of the dating wheels, and it is substantially as follows: I make two wheels or more, if necessary, and on the circumference or periphery of which I have the required type arranged so as to print the several months in the year, and on another cylinder or wheel I have arranged the type to print the day of the month. There may also be a type for the years, so that several years may be printed when desired, from the type put on a wheel in same manner as for the month and day of the month. These wheels or cylinders containing such type as may be desired to print from, and put and arranged on a central shaft or other good bracing or turning point, and the printing surface is brought together on a line or in a suitable form when the month, the day of the month, and the year, with any other matter connected with the same as printed by a blow of the in-
1167 strument arranged to give the impression. It may be used as a hand printing or stamping device for dating anything desired to have the date printed or formed thereon. This would be very convenient, for then there would be no type to lose, for all the dates would be on the cylinders, from which the same may easily and readily be set or arranged to print the correct date.

The dating cylinders may be of any size that will answer the purpose required. The day of the month wheel may be made of such size as to require two wheels in order to give the correct dates and to reduce the size of the wheels or cylinders. In that case one wheel would have figures 1, 2, 3 on the periphery of the same, while on the wheel to correspond to the same there would be on the periphery the figures 1, 2, 3, 4, 5, 6, 7, 8, 9, and a (0) or cypher.

These when changed will give any date required. It will now be seen that the correct date is given from and by type wheels or revolving and changing cylinders or disks.

The letters or type may be cast on the periphery of such wheels, or formed in slips or pieces and soldered upon the periphery of the wheel desired, or they may be engraved on the same.

Or they may be swedged, formed, or pressed thereon out of the same circumference or periphery, or they may be so constructed as to be dovetailed therein. There are various other ways for forming or constructing on such wheels such letters or figures as may be required.

The wheels or cylinders may be made of malleable cast-iron, or of other cast metal, or made of brass or similar metal. Brass would be the better metal to use when the letters or figures are to be engraved, or swedged, or raised, or pressed, or formed thereon, because it would work more easy and make better work.

Stereotyped letters and figures can be made and then soldered on such circumference surface of such wheels. I think the best way will
1168 be to dovetail them in, because when worn out a new one can be put in its place, as it would require expensive machinery to cast a press form, or swedge the letters or figures on said circumference or periphery of such type and dating wheels or cylinder.

To ink the said wheels or type cylinders when arranged for printing and dating, I pass an ordinary inking roller over the face or surface of all the type to be printed from, and then it is returned to its proper place. This roller is passed over a suitable distributing surface, which is for the purpose of getting the ink on the type wheels more evenly, and thus make a better impression on the paper to be printed and dated.

These wheels are each operated in a suitable form or chase constructed for that purpose. To set them each in proper condition or order for the date, and as a matter of convenience, I use pointer or arm of any suitable construction, and secure the same to the shaft or the type wheel or the wheel itself, and then I have indexes on the frame or on the respective type wheel, so arranged as to enable the operator to put the right month, day of the month, or year, etc., into the printing line or surface, so that the same will print the date required. These indexes will be of any suitable construction, and engraved, stamped, or otherwise put upon the said type wheel frame-work, or upon each wheel as may be best, and in such manner that the operator may readily see the same, so as to know how to govern the setting of the wheels in order to print correctly the matter desired.

These wheels or cylinders are held in their fixed position by a small pin having a suitable spring attached, which may be in the arm or pointer, or in the said frame-work, and extending into the respective wheels, having a corresponding hole or opening for the spring to pass into to hold it.

The spring is to hold the pin in its place so that the wheel can
1169 not move when in its fixed position and in use. By moving any one of the type wheels or cylinders forward to change its use, either to change the month or the day of the month or the year, the pin will be forced into a corresponding opening by the spring, and thus held until another change is had; so the operation will continue. Words or figures may be used to index or represent the month, and may be on the side of the wheel or on the frame holding the type wheels on their shaft, and will of course always be so constructed as to be in sight the most convenient. This will apply to all the wheels or cylinders for printing the month, the day of the month, or the year. So, too, if any cylinder be used to print any other matter, the same may have an index to correspond to the matter to be printed.

The said dating-type wheels may be in a fixed frame and the impression taken from the top by any suitable device, to give the force or blow thereon, and the inking roller made to pass over the top in any good and convenient way, or the said type dating wheels and frame in which the same operate may be so arranged as to give a striking like blow by the hand, or put into a frame on a stem, and be forced down upon the paper and then brought back by a spring.

I am having a machine made with these improvements in, and hope

to apply for a patent within the caveat year, yet there are some other improvements I propose to make in this machine as a whole. The machine may be used for banks, railroad companies, business firms, and in post-offices.

Respectfully, your obedient servant,

MARCUS P. NORTON.

Ex'd.—V. E. L.

1170 TINMOUTH, VT., *August* 21*st*, 1855.

COMMISSIONER OF PATENTS:

Will you please send me the 2d part of your report of 1854?

Can I make application for a patent (on my caveat) for post-office waybill printing and folding machine at two different times? The caveat has expired. I wish to make application on the folding part first, as the whole machine will be subject to two patents or applications. If I can apply for one at a time, can the caveat fee be applied on that one application?

Respectfully, your obedient servant,

MARCUS P. NORTON.

(Endorsed:) Received and filed August 25th, 1855. S. T. Shugert.

AUGUST 5, 1871.

I hereby consent that Mr. Robertson have a duly certified copy of my caveat herein named.

MARCUS P. NORTON.

Please furnish a certified copy of the file and contents of caveat of Marcus P. Norton for railway ticket printing press, dated June 21, 1855.

T. J. W. ROBERTSON.

File and contents caveat, see Aug. 5.

Great haste.

1172 *Complainant's Exhibit. File wrapper and contents of Norton's letters patent of January 14th, 1862.—J. A. S., Ex'r, June 29th,* 1878.

The United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office of the file wrapper and contents in the matter of letters patent granted Marcus P. Norton, assignor to self and Charles Eddy & Co., dated January 14th, 1862, No. 34184, for "hand stamps for post-office."

In testimony whereof I, J. M. Thacher, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this nineteenth day of October, in the year of our Lord one thousand eight hundred and seventy-two, and of the Independence of the United States the ninety-seventh.

[SEAL.] J. M. THACHER,
Acting Commissioner.

To the Hon. COMMISSIONER OF PATENTS:

The petition of Marcus P. Norton, of city of Troy, in the county of Rensselaer, and State of New York, respectfully represents that
1173 your petitioner has invented new and useful improvements in post-office post-marking hand stamps, which he verily believes has not been known or used prior to the invention thereof by your petitioner. He therefore prays that letters patent of the United States may be granted him therefor, vesting in him and his legal representatives the exclusive right to the same, upon the terms and conditions expressed in the act of Congress, and all amendments thereof, in that case made and provided, he having paid ($15) fifteen dollars into the Treasury of the United States, and complied with other provisions of the said act and the several amendments thereof.

And your petitioner does hereby constitute and appoint Marcus P. Norton, of Troy, county of Rensselaer, State of New York, his attorney, and fully authorize and empower him to alter or modify the within specification and claim as he may deem proper, expedient, and in conformity to law, and the decision or decisions of the Hon. Commissioner of Patents, hereby recognizing and confirming all that his said attorney may lawfully do or perform in relation thereto, and also to receive his letters patent when granted.

MARCUS P. NORTON.

Witness:
WARREN K. SOUTHWICK.

STATE OF NEW YORK,
City of Troy, County of Rensselaer, ss:

On this third day of August, A. D. 1861, before me, the subscriber, a commissioner of deeds, personally appeared the within-named Marcus P. Norton, and, being sworn according to law, says that he verily believes himself to be the original and first inventor of the within-

1174 described new and improved post-office postmarkin ghand stamp; that he does not know or believe the same was ever before known or used; that he is a citizen of the United States.

MARCUS P. NORTON.

Subscribed and sworn to before me on the day, month, and year first above written.

FRANK SCOTT,
Commissioner of Deeds, Troy, N. Y.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, have invented new and useful improvements in "post-office post-marking hand stamps," and I do hereby declare that the following is a full and exact description of the nature, construction, and operation thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon, and making a part of this specification.

Fig. 1 is a perspective view. Fig. 2 shows a division of the entire hand stamp, vertically through the centre. Fig. 3 shows the face of the stationary form of type (D D), and each of the cylinder type as in a condition ready to give an impre-sion in print upon an envelope, railroad ticket, letter, package, or anything else desired. Fig. 4 shows the channel or groove for the cast type as shown in Fig. 5.

Like letters represent and refer to like parts.

The nature of my invention consists in constructing, combining, and arranging a hand stamp, hereinafter described, so as to contain a cylinder with initials of each and every month in the year, and two 1175 other cylinders with figures for the respective days of each and every month; also a cylinder with figures or characters to represent ten successive years, more or less, as the case may be, and which cylinders shall each and all revolve upon the same shaft, and within a stationary form of type, and thereby print the month, the day of the month, and the year, in connection with each, and each in connection with and at the same time of the printing of the subject-matter upon the aforesaid stationary form of type.

It also consists in constructing a ring or stationary type holder with a dove-tail channel or groove, so that the name of any town required may be set therein, together with the initials of any State required, and when thus arranged, are then and there firmly secured, ready for use.

It also further consists in firmly securing and fastening each and every of the aforesaid cylinders in their respective places, as and where adjusted, by the means hereinafter described. The respective parts are so arranged as to render them easily cleaned and readily adjusted to their proper and required places, also easily repaired or replaced when worn out. By arranging and combining each and every part required to postmark any letter or envelope, in the manner and form hereinafter described and set forth, there will be no liability or possibility of any part thereof being lost while being transmitted in the mails, or being lost at the post-office, or elsewhere where the same may be required or transmitted, unless the entire stamp be lost. This stamp is more convenient for postmasters and others using it on account of its being easily and readily adjusted to the month, day of the month, and to the year, and requiring not as much care to look after the various parts as now required by other stamps. It occupies much less room in the mail

bags while being transmitted to its place of destination. It takes less time, trouble, and expense to prepare it for such transmission.

1176 All the difficulties attending the efficient and successful use of the present hand stamps for postmarking letters as now used by the government are fully and completely overcome by the use of this stamp.

Each and every part containing letters or figures may be cast in a mould made expressly for that purpose, which parts, when in their respective places, are ready for use without any engraving thereon.

The letters or figures may be cast, chilled, or case-hardened, thereby making them cheaper than if made of wrought iron or steel, although they may be made of such or other material, and engraved if desired. This stamp may be used by railroad companies for the purpose of dating tickets, etc., etc., and may be also used by banks for any purpose there required. It may be used whenever and wherever desired, when and where it may be.

To enable others skilled in the art to make and to use my invention, I will now proceed to describe the construction and operation thereof.

I construct my post-office postmarking hand stamp as follows, to wit:

(A) Fig. 1 is the handle, and is also seen at Fig. 2, and is also made of wood; (B) is the frame to receive and hold type-wheels or cylinders (*a*, *b*, *c*, *d*), also the stationary form (D D). This frame is made of malleable cast-iron, and is cast in a mould to give the desired form or shape; (*a*) is the type cylinder containing initials for each and every month in the year, and is cast in a mould made expressly for the purpose of making such cylinder and letters thereon ready for use This mould is made in six, twelve, or more parts, so that it may be drawn from said cylinder when cast; (*b*) is a cylinder of the same diameter of (*a*), and contains the numerals 1, 2, 3, which are the only ones required upon the cylinder, to give in connection with the cylinder (*c*) the respect-

1177 ive days of each month as may be required.

This cylinder is made in the same way and manner as the cylinder (*a*); (C) is another type cylinder of the same diameter as (*a* and *b*), and contains the numerals 1, 2, 3, 4, 5, 6, 7, 8, 9, and a (0) or cipher. This cylinder, in connection with cylinder (*b*), will give any day in any month desired, and is made in the same way and manner as the cylinder (*a b*), and is placed in close proximity to the cylinder (*b*); (*d*) is another type cylinder of the same diameter as the cylinders (*a b c*), and contains figures, an abridgement for ten successive years, and is made in the same way and manner as each of the aforesaid cylinders.

These cylinders are each and all arranged upon the shaft (*c*), fig. 2, and are made fast in the required place of each by the screw (F) upon one end of the said shaft (C). This shaft (C) has a shoulder or stop upon the end opposite of the said screw, which shoulder bears directly against the cylinder (*a*), and the said cylinder (*a*) against the cylinder (*b*), and the cylinder (*b*) against the cylinder (*c*), and the cylinder (*c*) against the cylinder (*d*), and the cylinder (*d*) against that part of the frame (B) having therein the female part of the said screw (F). By moving the said shaft (C), each cylinder is drawn against the other next adjoining, as aforesaid, thereby holding each cylinder by the friction of the cylinder or cylinders next thereto. The shaft (C) has a bearing of greater diameter at one end thereof than at the other end. This is for the purpose as hereinbefore described.

The said stationary form (D D) may be made in a circle or any other shape desired, which shall contain the name of post office, where used, and the initials of the State where such post-office may be located, or

any other matter may be therein contained as the case may require. It is made of any required thickness, and has an inside and an out-
1178 side ring or circle around the said type, representing the name of the town or post office where used, etc., etc. It may be cast, chilled, case-hardened, or otherwise constructed, in the same manner as the aforesaid type-cylinders, but the cheapest, best, and most convenient way or manner to construct it is shown at fig. 4, where (*e*) represents or shows a channel or groove down and in the said ring (D D). This channel or groove is cut from one-fourth to three-eighths of an inch in depth, or more or less as may be found necessary.

It is cut square down with the inner ring, while the side next to the outer ring is cut "dove-tailing," thus making the said channel or groove wider at the bottom than at the top thereof. This is to hold any type set therein in the proper place for each, and in condition for printing, etc., as aforesaid. At (*f*) is an opening so as to receive the type as shown at fig. 5. This groove is also shown at fig. 2 in said form (D). When the type, as required for any name of any town or post-office are placed in the said channel or groove, through the said opening (*f*), then the remaining channel or groove is filled up with blocks or "spaces" of the same or other material than the said type, which prevent any type from coming out of the said channel or groove. When the said form, as shown at fig. 4, is placed within the frame (B), figs. 1 and 2, then the opening (*f*) is closed up by means thereof. When the type, as shown at fig. 6, are placed in the channel or groove (*e*) fig. 4, the face of said form and the face of the said type are upon a line with each, and thereby give an impression in print, even, and at the same time and operation. The said type are cast in a mould as required, to fit the said channel or groove. By this arrangement there will be no engraving required, nor any setting up of form for the purpose of casting from, for the respective post-offices, towns, States, railroad stations, names
1179 of railroads, etc., for such can be set from a font of such type made on purpose and kept at the "Post Office Department" or elsewhere, and set up in the said channel or grooves as aforesaid. The form (D D) figs. 1, 2, and 4, is fitted into the lower part of the frame (B), and there firmly fastened by means of the screws (E E), figs. 1 and 2.

There is a mortice or opening in and through the aforesaid form (D D), for the purpose of receiving the aforesaid cylinders (*a*, *b*, *c*, *d*), whereby the printing surface of the same are upon a direct and even line of and with the aforesaid stationary form of type (D D), so as to give an equal impression in print, each with each.

The aforesaid type or cylinders (*a*, *b*, *c*, *d*) revolve upon the shaft (C) within the said form of type (D D), and the printing surface of each are then and always upon a line with each other, whereby the desired impression in print and in ink is given. The frame (B) may be screwed or fastened to the handle (A), in any manner deemed best.

This stamp can be made at much less expense than any other kind of stamp or stamps for the same use and purpose, and is much more convenient, and is not as liable to get out of repair. No part of it can well be lost unless the entire stamp is lost, which is to be considered in the transmission of post marking stamps through the mails, for now there are so many separate and disconnected members or pieces, that they are liable to and in very many instances are lost in such transmissions and at post-offices where used, which are expensive and often inconvenient to replace.

It is more easily adjusted for use, and can be kept in repair at much less expense than any other stamp for the same use and purpose. Any

other matter required to be printed upon envelopes, letters, etc., etc., at any post-office, or at any railroad station, or any bank, etc., etc., may be done in the same way and maner, by preparing type expressly
1180 therefor upon one, two, or more cylinders, to revolve in such stationary form.

Having thus described the nature and the construction of my hand-stamp aforesaid, I will now proceed to describe its operation, which is simple and easy to be understood.

The cylinder (A) for the month revolves upon the shaft (C), and is brought into any required position on a line with the printing surface of the stationary type or form (D D) and there remains, and during the months for which it is set or fixed, which, when the month is ended, is then moved forward for the next month in succession, and so the operation is continued until the year is completed, when the same operation is again repeated. The cylinder (*b*) is moved forward one figure every ten days during any month or year. The cylinder (*c*) is moved forward one figure every day of the week, month, and year. The cylinder (*d*) is moved forward one figure every year during the term of ten years, when a new cylinder is put in its place to answer to the next ten successive years, and so on the operation continues without limitation. By the use of these cylinders as herein described, any year, month, and day of the month of any year may be given and printed, while at the same time the name of the town, post office, railroad station, bank, etc., etc., is given as aforesaid.

When each of the aforesaid cylinders is adjusted to its proper place as desired, it is there firmly held by turning the shaft (C), which, by means of the said screw thereon, will then bring each cylinder against the other next adjoining thereto, and the side of cylinder (*d*) against the frame (B), in the manner and form as hereinbefore described. The impression is made upon the envelope, letter, package, or whatever desired, by giving a downward and striking motion thereon. And so the operation continues for post-marking letters or anything else desired by the use of this stamp.

1181 This stamp may be made any size and strength desired. Any part thereof can easily be replaced, whenever for any purpose it may be required.

Having thus set forth and described my invention, what I claim and desire to secure by letters patent of the United States is the combination of four cylinders (*a*, *b*, *c* *d*) upon the shaft (C), with the stationary form of type (D D), whereby the day, month, and year are given together by one impression, substantially as herein described and set forth.

I also claim the combination of the shaft (C) with four cylinders (*a*, *b*, *c*, *d*) thereon arranged, with the frame (B), whereby the said cylinders are firmly held in their adjusted position, substantially as herein described and set forth.

In testimony whereof I have hereunto set my hand in presence of—

WARREN C. SOUTHWICK.
S. E. BLAKELY.

MARCUS P. NORTON.

TROY, N. Y., *August 3d*, 1861.

(Endorsed:) Specification, etc., post-office hand stamp. Recorded and filed August 8, 1861. P. E. W. Marcus P. Norton, Troy, N. Y.

PATENT OFFICE, *Aug.* 22, 1861.

SIR: Your application for letters patent for alleged improvements in hand stamps has been examined and the patent is refused.

The first or second sections of your claim have been anticipated by the patent granted to T. J. W. Robertson, Sept. 22, 1857. The
1182 last is met by an arrangement substantially equivalent in the patent of E. E. Barrett, granted July 21, 1857.

T. R. P.

MARCUS P. NORTON,
Troy, New York.

(Endorsed:) Off. Aug. 22, 1861.

OFFICE OF MARCUS P. NORTON,
ATTORNEY AND COUNSELOR AT LAW,
Troy, N. Y., August 28th, 1861.

Hon. COMMISSIONER OF PATENTS:

SIR: In reply to your letter of the 22d inst., rejecting my application for a patent upon "hand stamps," etc., I have to say that I claim to be the original and first inventor of the "Improvements in post-office post-marking hand stamps," as described in my specification, drawings, and model, in the application which you rejected on the 22d of August, 1861, and therefore and thereupon request your honor to declare an interference with the parties named in your letter of rejection, that I may have the opportunity to prove the priority of the invention, upon which you reject my application for a patent.

Yours respectfully,

MARCUS P. NORTON.

(Endorsed:) Rej. See Judge Merrick's decision. Appeal. Philip P. Justice, ass'r to Edw'd Young. June 13, 1859. M. P. Norton asks interference. Received and filed, Sept. 5, 1861. T. R. P.

1183 PATENT OFFICE, *Sept.* 6, 1861.

SIR: Your letter of the 28th ulto. is just received, and the request for an interference with certain patents referred on the 22d ulto. cannot be granted, both patents having been in existence more than two years, and it is presumed the articles patented have been on public sale.

See Judge Merrick's decision, June 13, 1859, on the appeal of Philip S. Justice, ass'r to Edw'd Young.

T. R. P.

MARCUS P. NORTON,
Troy, New York.

(Endorsed:) Off., Sept. 6, 1861.

OFFICE OF MARCUS P. NORTON,
ATTORNEY AND COUNSELOR AT LAW,
Troy, N. Y., September 9th, 1861.

Hon. COMMISSIONER OF PATENTS:

SIR: Your letter of the 6th inst. is at hand. In reply I have to say that I am morally and legally entitled to the interference asked for in the matter of my application for a patent upon improvements in "post-office hand stamps," so far as relates to that part of the invention said to interfere with the patent granted to "T. J. W. Robertson," Sept. 22,

1857. The opinion or rule establishing the doctrine that where a patent has been granted for more than two years prior to the application of another person claiming the same invention, an interference cannot be granted with any chance of success, is, I believe, the doctrine of the law. But my case does not come under such rule, or within that
1184 principle of the law. I cannot but believe that there has been an oversight in the examination which led to such a conclusion, "that the interference asked for cannot be granted, etc." I will state the case, which will most undoubtedly lead to a different conclusion, which is as follows, to wit:

1st. I have a caveat now on file in the Patent Office for the same invention for which Robertson obtained a patent, Sept. 22d, 1857, which caveat was filed in 1855.

2d. In September, 1857, I filed an application in connection with inking improvements, invented by C. A. Haskins, of New York, which were assigned to myself and Peter Low (by assignment) Nov. 16th, 1857, in liber P[4], page 67, of Transfer of Patents, in the Patent Office. My application was then rejected upon this same patent of Robertson. Since then the improvements have been separated and left as before the said application.

3d. In the month of May, 1859, I made a new application for a patent upon the same invention, with some additional improvements, and on the 27th day of June, 1859, this application was rejected upon the same patent granted to Robertson, Sept. 22d, 1857, and on the 16th of July following a re-examination was had, which led to a patent issuing to me, dated Aug. 9, 1859, under and by reason of an amendment dated July 20, 1859, and marked B, wherein was expressly reserved the right to make the application rejected Aug. 22d, 1861.

Here is a succession of applications, all within two years of each other, and covering the same invention, with new specifications, making three applications for a patent upon this invention since Robertson's patent was granted, Sept. 22, 1857. I am now within the rule of the Patent Office, and within the spirit and letter of the law. I have not forfeited my right to a patent upon this invention, but, on the other hand, have preserved it by a succession of applications within two years of
1185 each other, the last one being filed Aug. 7th, 1861. The decision of Judge Merrick of June 13, 1859, does not therefore apply to this case. I therefore ask that an interference be declared with the patent of Robertson, granted Sept. 22, 1857. The improvements said to interfere with the patent granted to Barrett, July 21, 1857, I hereby withdraw from said application.

Hoping that this statement will lead to different conclusions,

I remain, your obedient servant,

MARCUS P. NORTON.

(Endorsed:) M. P. Norton. Argument. Received and filed Sept. 14, 1861. T. R. P.

PATENT OFFICE, *Sept.* 14, 1861.

SIR: Your argument of the 9th inst., in relation to your rejected application for a hand stamp, has been received.

The decisions of the office are still believed to be correct, both in refusing the patent and also refusing the interference, for the following reasons:

1st. Caveats are ignored when suffered to expire by limitation. A caveat filed in 1855 should not have been consulted in 1857.

2d. Norton & Haskins' application, rejected Nov. 18, 1857, was withdrawn on the 24th of the same month, two-thirds of the office fee returned to the applicants, and the case thus abandoned without re-examination.

3d. The patent granted to you on the 9th of August, 1859, was then, as now, believed to cover all that was patentable in the device. Your reserving the right to apply for a patent on that which was
1186 then refused does not restore the novelty requisite for the issue of a patent.

T. R. P.

MARCUS P. NORTON,
Troy, New York.

(Endorsed:) Off., Sept. 14, 1861.

OFFICE OF MARCUS P. NORTON,
ATTORNEY AND COUNSELOR AT LAW,
Troy, N. Y., October 8th, 1861.

Hon. COMMISSIONER OF PATENTS:

SIR: In the matter of the application of Marcus P. Norton for letters patent upon "post-office hand stamps," rejected August 22, 1861, I have to request you to send me the specification and drawing.

Respectfully, etc.,

MARCUS P. NORTON.

(Endorsed:) Letter from applicant. Filed Oct. 10, 1861. D. S. S. Requesting specification and drawing.

UNITED STATES PATENT OFFICE.
Washington, Oct. 10, 1861.

SIR: Agreeably to your request of the 8th inst., the specification and drawing of your application for letters patent are herewith returned.

Yours respectfully,

Commissioner of Patents.

(Endorsed:) Office, Oct. 10, 1861. Returning specification and drawing.

1187 OFFICE OF MARCUS P. NORTON,
ATTORNEY-AT-LAW, COUNSEL AND
ADVOCATE IN PATENT CASES.
Troy, N. Y., November 6th, 1862.

Hon. COMMISSIONER OF PATENTS:

SIR: Herewith I enclose you specification with amendments and argument thereon, in my application for letters patent upon improvements in "post-marking and canceling stamps," also renewal oath in same case, and have to request that the same be taken up immediately upon reaching the files of the Patent Office, if you can consistently do so. My reason for this request is founded upon the fact that the government is desirous of an immediate introduction of these improvements into public or general use. I am not certain that a renewal oath is at all necessary at this stage of the case, but have enclosed it to save delay, in case you should require one. Hoping that my request is not unreasonable,

I remain, your obedient servant,

MARCUS P. NORTON.

(Endorsed:) M. P. Norton. Nov. 6, 1862. Sends paper. Received and filed Nov. 10, 1862. T. R. P.

Renewal oath.

STATE OF NEW YORK,
City of Troy, County of Rensselaer, ss:

On this fourteenth day of October, A. D. 1861, before me, the subscriber, a commissioner of deeds, personally appeared Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New
1188 York, and being duly sworn according to law, says that he verily believes himself to be the original and first inventor of the new and useful improvements in post-office post-marking hand stamp, described and set forth in his specification in his application for letters patent for and upon said improvements, filed in the U. S. Patent Office on the 8th day of August, 1861, and rejected by the Hon. Commissioner of Patents on the 28th day of August, 1861; that he does not know or believe the same to have been ever before known or used; that he is a citizen of the United States of America; that this is a second or renewal oath for and upon said improvements in said application, as by the specification and amendments thereof the same will more fully appear.

MARCUS P. NORTON.

Subscribed and sworn to before me, on the day and year first above written.

FRANK SCOTT,
Commissioner of Deeds, Troy, N. Y.

(Endorsed:) Renewal oath. Filed Oct. 23, 1861. D. S. C.

Amendment A.

Hon. COMMISSIONER OF PATENTS:

SIR: I hereby amend my specification in my application for letters patent upon improvements in "post-office post-marking hand stamps," rejected on the 28th day of August, 1861, by striking therefrom each and every claim thereof, and inserting in place and stead of the following claims, to wit:

1189 I do not claim the particular device patented to T. J. W. Robertson, on the 22d day of September, 1857, but what I do claim is the combination of four cylinders (*a*, *b*, *c*, *d*) upon the shaft (C) with the stationary form of type (D D), whereby the day, month, and year are given together by one impression, substantially as herein described and set forth.

I also claim the combination of the shaft (C) with four cylinders (*a*, *b*, *c*, *d*) thereon arranged, with the frame (B), whereby the said cylinders are firmly held in their adjusted position, substantially as herein described and set forth.

MARCUS P. NORTON.

(Endorsed:) No. 1. Amendment A. Filed Oct. 23, 1861. D. S. C. Patent, Jan. 14, 1862.

Hon. COMMISSIONER OF PATENTS:

SIR: I hereby amend Amendment (A) in my application for letters patent upon improvements in "post-office post-marking hand stamp," by inserting the following, to wit: "I do not claim the particular device

patented to T. J. W. Robertson, on the 22d day of September, 1857, but what I do claim is."

MARCUS P. NORTON.

WASHINGTON, D. C., *October* 26, 1861.

POST-OFFICE DEPARTMENT,
Washington, D. C., April 27, 1878.

I hereby certify that the annexed is a true copy of the original now on file in this department.

In testimony whereof I have hereto subscribed my name, and caused the seal of the Post-Office Department to be affixed the day and year above written.

D. M. KEY,
Postmaster-General.

POST-OFFICE,
Cleveland, O., Nov. 28th, 1863.

HON. A. N. ZEVELY:

DEAR SIR: You will please pardon me for trespassing on your valuable time with a matter which does not directly concern you, but which is of much importance to me, however; but as we are all under the necessity of asking favors from time to time I throw myself upon your kindness and proceed.

You will probably recollect, when you were in Cleveland, having a conversation with Mr. Cowles and myself about that combination dating and rating stamp, of which I was the inventor. Mr. Cowles
1194 promised when he went to Washington to bring the matter before the Postmaster-General and endeavor to have my salary increased, as an acknowledgement of its value and utility to the service. My object in addressing you is to secure, if possible, your co-operation in the matter; and as you may have forgotten the circumstances, allow me to state that about the first of July, 1861, the department issued an order discontinuing the canceling of stamps with the dating-stamp, and requiring that thereafter the regular canceling-stamp should be used for

that purpose. We followed instructions one day after receipt of the order with two separate stamps. It was about all one man could do before to stamp our letters, circulars, and newspapers, and by the change it would require twice the labor. The idea struck me that by a combination all might be done as required by one operation, and immediately took the stamps to a locksmith and had them soldered together. The order and receipt you will find among your records. The smith's name is Jacob Schwartzenburgh.

Ours was the first office that used the combined stamp, and very soon we were in receipt of inquiries as to how it was done. The uniformity of the impressions were noticed.

We soon found it adopted in nearly every large office and many smaller ones, and now it has become almost universal. The saving in large offices where clerks are paid by government is, you will perceive, quite a large sum annually. In our own office it saves the services of one man. In larger offices, more. Some one should be rewarded for the improvement. True, another person has the patent for it, but in a test case I can prove priority without doubt, and in this connection I will state that a short time after you were here in a conversation with a friend on the subject he advised me to apply for a patent and he would advance the funds necessary. My own circumstances prevented my doing
1195 so before. I accepted his generous offer and made my application, which, of course, was rejected. I have called for an interference case, which has not, as yet, been set down, but will be, I hope, in a few days.

I have been connected with this office over fourteen years, ten of which have been spent in the distribution room, and for seven years I have been foreman. The duties are arduous and very confining, as you are aware. I have a large family (wife and four children), am getting along in years, and in these times my salary, which is $850, hardly suffices for the necessaries of life. There, the whole story is told and the object given. Now, if anything can be done, and you will please assist in accomplishing it, you will place me under lasting obligations. Favors are asked nearly every day of officials, and I wish to add my name—for the first time however—to the illustrious number.

Please let me hear from you either by letter or through Mr. Cowles, who will probably be in Washington next week, and very much oblige

Yours, respectfully,
(Signed) C. E. WHEELER.

1196 *Complainant's Exhibit Norton, A E O.—J. A. S., Exr., June 27th*, 1878.

Declaration of trust.

I, William W. Secombe, of the city of New York, county and State of New York, do hereby declare that in accepting an assignment from Helen M. Ingalls, formerly of the city of Troy, in said State of New York, of her right, title, and interest in certain letters patent therein named, and dated April 14th, 1863, and last reissued under date of October 4th, 1870, in "Division A," and for "postmarking and postage-stamp canceling" purposes, and which is charged with the following trusts, to wit:

I hereby consent and agree to manage all the interests attached to, or in any wise arising out of, said letters patent and the several reissues thereof, for the best interests and for the benefit and approval of all the

parties concerned and interested therein. The said inventor, Marcus P. Norton, shall do all in his power to do to facilitate, aid, and dispose of such matters as shall be calculated to bring about and to consummate a final settlement with the government of the United States for the past and future use of said device and letters patent in the postal service.

Out of any money coming into my hands I agree to pay all the necessary expenses from and after this date, and of the trust, for which I am to produce vouchers to said Helen M. Ingalls in settlement of
1197 the trust, including such attorney fees as may come under a certain contract heretofore made, and to which I am now a party with the said inventor, Marcus P. Norton, and his assignee, Helen M. Ingalls.

I am to retain two-fifths part of the whole sum of money agreed upon and paid for the past and future use of said machine and letters patent, and reissues thereof, by the Post-Office Department, government or Congress, as compensation for my personal services, expenses, and cash advances from time to time to said inventor, Marcus P. Norton, in and about the said machine, letters patent, and in efforts to obtain a fair and just compensation for the past and future use thereof in the postal service of the United States; and the remaining three fifths of the said whole sum I hereby agree and covenant to pay over to the persons hereinafter named, in the following sums or proportions, to wit:

To said Helen M. Ingalls one-fifth, and the remaining four-fifths thereof to Minnie D., wife of said Marcus P. Norton, for the use, benefit, and behoof of herself and the "daughters" or "children" of herself and of said Marcus P. Norton. Reference is now and hereby had to the assignment deed in trust and of even date hereof, as to invention, letters patent, or other matter herein set forth, which deed of assignment shall form a part hereof.

In testimony whereof I have, on this 4th day of March, A. D. 1871, hereunto set my hand and seal in presence of—

CHAS. P. BARNARD.
MARCUS P. NORTON.

W. W. SECOMBE. [SEAL.]

[5 cent stamp canceled.]

On this 4th day of March, 1871, it is hereby understood and agreed by and between the said inventor, Marcus P. Norton, and the said patentee, Helen M. Ingalls, and the assignee, Wm. W. Secombe,
1198 president of the Secombe Manufacturing Company, of New York, that all the expenses expended prior to the date hereof by said Marcus P. Norton, amounting to the sum of $35,000 (thirty-five thousand dollars), also the sum of ten thousand dollars expended by said Wm. W. Secombe in and about the business appertaining to said letters patent and matters of compensation, shall be charged against the aforesaid named patent, and paid out of any proceeds arising out of any sale of said letters patent to the government of the United States pro rata—that is to say, the entire patent proceeds shall pay to each the expenses so charged by each, as before stated. All attorney fees, or other fees or charges for aid or services rendered, or to be rendered, or expenses for settling and paying off any claim, pretended or otherwise, as agreed upon by said Secombe and Norton, shall be chargeable to and paid in same manner, so that each shall share his portion or part of all necessary expenses in the premises.

In testimony whereof we hereunto set our hands and seals on the day first above written.

1206 *Complainant's Exhibit Secombe, G H I.—I. B. Ex., May* 17, 1878.

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of an assignment recorded in Liber T[14], p. 434.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twentieth day of December, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] ELLIS SPEAR,
Commissioner.

Liber T[11], p. 434.

Whereas Charles Eddy, Jacob Shavor, and Albert C. Corse (formerly comprising the firm of Charles Eddy & Co., of the city of Troy, N. Y.), and William W. Secombe, of the city of New York, are together interested in the prosecution of a certain claim against the government of the United States, to recover certain moneys for the use of an improved patented canceling stamp, known as the Norton's Post-Office Canceling Stamp, invented and patented by Marcus P. Norton;

And whereas the said William W. Secombe is also trustee for other parties interested in the prosecution of said claims to the amount of one-half of said claim;

1207 Now it is understood and agreed by and between the said Charles Eddy, Jacob Shavor, and Albert C. Corse, parties of the first part, and William W. Secombe, trustee as aforesaid, party of the second part, that the said parties of the first part will accept and receive in full payment and satisfaction of their claim and demand the sum of thirty thousand dollars. It is further agreed that the said sum of thirty thousand dollars shall be paid by the party of the second part out of the moneys so received by said party of the second part, as trustee aforesaid, provided his said trust fund amounts to the sum of sixty-two thousand dollars. And in case said trust fund does not amount to said sum of sixty-two thousand dollars, then the parties of the first part agree to take and receive in full satisfaction and payment of their said claim the pro-rata sum or amount of such sum as shall be received by the party of the second part, as trustee as aforesaid, in connection, Holloway & Mason, of the city of Washington, D. C., whose interest in said claim against the government is twenty thousand dollars, and William W. Secombe, whose personal claim therein is twelve thousand dollars, it being understood that each of the parties shall accept the said pro rata amount in full satisfaction of their several claims.

In witness whereof the parties have hereunto set their hands this seventh day of October, 1871.

CHARLES EDDY.
JACOB SHAVOR.
ALBERT C. CORSE.
W. W. SECOMBE.

In presence of—
FRANCIS RISING, as to Shavor, Corse, & Secombe.
G. H. MCGRATH, witness for Charles Eddy.

Recorded, January 29, 1872.
Ex'd, F. C. T.
[5 cent stamp canceled.]

1208 *Complainant's Exhibit, Bishop Letter, No. 1.—I. B., Ex'r.*

TROY, *April 30th*, 1872.

DEAR SIR: I called on Alexander to-day, and find his books show $1,600 in his hands due Miss Aynesworth. He gave McClellan a cer-

tificate at the time he received the $2,600. On the 23d inst. he had a notice served on him, claiming this money was a gift from McClellan to Miss Aynesworth, and revoking the gift. He will not pay the money in that suit, and to-morrow I shall sue him. That will prevent him from paying any one else on the certificate he issued.

I would like to know if Miss Aynesworth ever had the certificate Alexander gave you in her actual possession. I think we will get the $1,600 easy enough, if not more. I have not learned yet anything definite about McClellan's affairs, except that Alexander says he was dissipated and worthless.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 2.—I. B., Ex'r.

TROY, *May 1st*, 1872.

DEAR SIR: Yours and Mrs. Browning's letter came to hand this morning. I have been to West Troy again to-day, and served papers on Alexander. I have spent considerable time in trying to find out about McClellan. I learn he sold out his shop for $600 cash,
1209 with which he cleared out. He had no real estate. I will push the suit against Alexander as fast as I can. I have sued him for the whole $2,600. Will keep you posted as the case progresses.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 3.—I. B., Ex'r.

TROY, *May* 16, 1872.

DEAR SIR: Your wife's letter, with Alexander's certificate enclosed, came to hand this afternoon. I am glad you sent it. I have the suit pending against him, and his time to appear will expire the 21st inst. I presume he will fight it, but I don't see how he can escape for the whole amount. I will keep you posted in the matter.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 4.—I. B., Ex'r.

TROY, *May 21st*, 1872.

DEAR SIR: I received a letter from Alexander this afternoon, complaining about my claiming to recover the whole $2,600, and intimating that I made the claim from personal motives. He says in his letter that your wife admitted that the payments were correct. I would like to know about it, and know what was said between her and Alexander upon that subject.

Truly yours,

P. W. BISHOP.

1210 *Bishop Letter No. 5.—I. B., Ex'r.*

TROY, N. Y., *June 8th*, 1872.

DEAR SIR: Yours came to hand this morning. I think Alexander has found out satisfactorily that the money belonged to your wife, and would be glad to get out of the suit by paying the $1,600 and interest.

That is, if you would allow him the endorsements made on the contract. I have not informed him that I had the original contract, for I did not think it prudent to do so. He has put in his answer, and says in reference to the payments endorsed:

"And in further answering, said defendant avers that on said 9th day of January, 1871, one Alexander McClellan was, and for a long time prior thereto had been, the agent and confidential friend and adviser of said plaintiff, and continued to be such until near or about the time of the commencement of this action."

This he sets up to show that McClellan was your wife's agent. He then sets up the payment of moneys as a set-off—the money paid McClellan.

I have not yet replied to his answer. I want to know what your wife has to say about McClellan's being her agent. I supposed he was only a special agent to take the money to Alexander. The only question in the case is one of agency. Your wife is sure of the $1,600 anyway, and I hope to get it all.

Truly yours,

P. W. BISHOP.

1211 *Bishop Letter, No. 6.—I. B., Ex'r.*

TROY, *June 13th*, 1872.

MRS. B.: Your letter came to hand this morning. I have put in a reply to his answer, and have denied McClellan's agency. The case will be at issue in twenty days, unless he should amend his answer. If he does I will write you. I will hurry up as fast as the rules of the court will permit, yet you are safe. There is no danger of your not getting any judgmet you can obtain against Alexander. I am satisfied he is worth $100,000.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 7.—I. B., Ex'r.

TROY, N. Y., *July 2d*, 1872.

DEAR SIR: E. T. Stetson, the actor, whom I presume you know very well, has applied to me for the loan of $1,500 for one year, and is willing to pay fifteen per cent. for the use of it. I have lent him money often, and found him square and honorable. I have the money, and can lend it to him for a short time, but I want to use it in the fall. He has profitable engagements at Denver, Salt Lake City, and San Francisco, and after that in New York—a long engagement. He will secure it by his note payable to my order, and get his life insured in $10,000, and assign that as collateral. By the time I should want to use the money I will have your wife's suit tried and disposed of. If she
1212 would take the note from me, I will guarantee its payment and assign her the policy. Then she will be sure of her money at fifteen per cent., and if anything should happen, she would get $10,000 on his policy of insurance provided Stetson dies. I look upon it as a safe investment for her, and it may be by that means she can make up what she has lost by McClellan. Please answer at once, so I can let Stetson know. If she concludes to do it I will see that the papers are made out properly, and the policy of insurance assigned and transmitted to her.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 8.—I. B., Ex'r.

TROY, *Aug.* 3, 1872.

MRS. B.: I went to Albany to-day, and examined the records carefully and thoroughly. There is no mortgage there to you or McClellan. I am satisfied he lied about it. I did not have time to go to the hospital. I want to see Richardson and find out more about Butterfield, and then if I think there is any show for him I will try it.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 9.—I. B., Ex'r.

TROY, *Aug.* 10, 1872.

MRS. B.: Yours came to hand this morning. I will write to
1213 Flushing. I think within a month I can let you have some money. We came near having plenty of money. Our friend Stetson was on the Central Pacific when three cars were telescoped through. Six persons were killed, and he escaped by about eighteen inches only.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 10.—I. B., Ex'r.

TROY, *Aug. 20th*, 1872.

MRS. B.: I wrote to the postmaster at Flushing, but have yet had no answer. Since then I saw Seymour Scott, and he informs me that he believes he is there. I then wrote directly to McClellan, inquiring about the mortgage, etc. I have not had an answer. I think it would be well for me to go down and see him, and will do so if you desire it. If I go I will get judgment against him on his note you sent me. Mr. Rising told me you had referred to me on purchase of some goods. I have told him you were good—perfectly so. It has been so very hot here that I have not yet been to the hospital to see Butterfield, but will soon. I suppose Mr. B. has got his tools by this time.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 11.—I. B., Ex'r.

TROY, *Aug. 20th*, 1872.

MRS. B.: After writing you to-day I went to Albany and saw Mr. Butterfield. He is at the hospital at an expense of one dollar a
1214 day. He is nearly blind and infirm. He claims he has made a provision for the child if he has anything left. He also says you have no claim against him for keeping her—that you wanted him to give the child to you and he did. I took the papers along to serve on him, but after hearing his story concluded not to serve them until I heard from you. It seems Richardson is his confidant, and that he is acting under his advice. I have no doubt that he would defend a suit if you brought it, and perhaps he would outswear you, although he told me he had no witnesses about the affair. If you can prove enough to win, I will bring suit if you desire it.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 12.—I. B., Ex'r.

TROY, *Aug. 24th*, 1872.

MRS. B.: Yours came to hand this morning. I send you check for $150 as you wished. You may endorse that amount on Stetson's note, and I will collect it from him as soon as I can. You can get the money at any bank in your place, I presume. If, however, you cannot, return me the check, and I will send you the money by express. I think I will go and see McClellan within a week or ten days, and lea.n what I can about his affairs, and also whether he is to be a witness for Alexander or not. You can send me the enclosed receipt after endorsing the money on Stetson's note.

Truly yours,

P. W. BISHOP.

1215 *Bishop Letter, No. 13.—I. B., Ex'r.*

TROY, *Sept.* 18, 1872.

MRS. B.: Yours came to hand this morning. I am sorry you have agreed to pay any money the first of next month, for I do not know how I shall stand at that time for funds. I expected to have disposed of your suit this month, but the referee cannot attend to it. He has had a severe accident in his family—one of his daughters almost or quite fatally injured by a runaway. He is attending her constantly. However, we will hope it will all come out right.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 14.—I. B., Ex'r.

TROY, *Sept.* 28, 1872.

DEAR SIR: Yours came to hand this afternoon. I am sorry your wife worries so about her money matters. I will have to contrive some way to help her out. I think by the tenth of next month I shall be in funds. A man has just promised me $4,000 by that time. I have at present not more than $100 on hand in bank. Let your wife hold on as long as possible, and by the tenth I have no doubt I shall have plenty of funds. There is no time set for the trial of her case. She may have to come here as a witness, but I will try and get along without it unless absolutely necessary.

Truly yours,

P. W. BISHOP.

1216 *Bishop Letter, No. 15.—I. B., Ex'r.*

TROY, *Oct. 7th*, 1872.

DEAR SIR: Yours came to hand this morning. I am very sorry your wife made calculations to use money just now, for I am short as blazes, and the man who was to pay me $4,000 has disappointed me. Still something will turn up soon and place me in funds. I went this morning, after getting your letter, and saw Mr. Kellogg, the referee who is to try the case against Alexander, and he cannot attend to it before the 25th inst. I will try and get along without your wife's coming, if possible. I met Rising in the street last week, and he informed me that his letter sent to your wife in answer to hers was returned unopened to him,

consequently she did not receive it. I told him she was good for all she wanted. I enclose her check for $100, which will help her a little.

Truly yours,

P. W. BISHOP.

Let her sign the receipt, and return.

Bishop Letter, No. 16.—I. B., Ex'r.

TROY, *Nov.* 6, 1872.

DEAR SIR: Yours came to hand this afternoon. I am sorry to say I have not yet been able to get your wife's cause tried. The election and other matters have prevented. Tell her not to worry. Her money is sure. I shall go to Flushing and see McClellan in a few days, and shall try and collect something for her; besides, I want to subpœna
1217 him as a witness in the Alexander case. I hope to collect some money in a few days, and if I do, will send it to your wife. Tell her to be easy, it will all come out right.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 17.—I. B., Ex'r.

TROY, *Nov.* 16, 1872.

DEAR SIR: Yours came to hand this morning. I enclose check for $100, which is all I can spare at present. I am scrimping myself, for I have to go away next week with my family, and my expenses will be considerable. I enclose receipt for her to sign and return to me.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 18.—I. B., Ex'r.

NEW YORK, *Nov.* 27, 1872.

MRS. B.: I have been to find McClellan. I was not able to see him. I will have to come again next week, and then will be sure, I hope, to find him. I want to see how he is fixed about paying that note, and must have him for a witness in your suit against Alexander. I presume you received my check for $100, and have sent me the receipt. I have been away from home some time.

Truly yours,

P. W. BISHOP.

1218 *Bishop Letter, No. 19.—I. B., Ex'r.*

TROY, *Dec. 5th*, 1872.

DEAR SIR: Yours came to hand this ning. I do not know as I shall use McClellan as a witness. I can tell better after seeing him. Besides, I want to serve the papers on him for the collection of that note. The trial is for the 23d inst. I hope then to be able to dispose of the case. Although it is liable to be postponed if either party is not ready.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 20.—I. B., Ex'r.

TROY, N. Y., *Dec.* 26, 1872.

MRS. B.: Yours came to hand containing the notice served on me. I hope to be able to get along without putting you to the trouble and expense of coming here. At any rate, I shall not do so unless absolutely compelled to do it. We have unavoidably had to submit to a further delay in your cause. J. G. Bacon, of this city, died, and Mr. Kellogg, the referee, was one of the bearers. The funeral was the same day your cause was to be tried, consequently the reference fell through. I have seen Kellogg this morning, and he has set the trial down for the 21st of next month, which was the earliest day he could attend to it. So you will see you have to be patient for a while longer.

Truly yours,

P. W. BISHOP.

1219 *Bishop Letter, No. 21.—I. B., Ex'r.*

TROY, *Jan.* 21, 1873.

MRS. B.: We have been at work all day trying your suit against Alexander. We did not finish it, and have adjourned to the 28th February next. The testimony given by Alexander himself and his clerk looks rather hard against you. Alexander swears, amongst other things, that you called upon him some time last April, after you had been to New York with McClellan, and expressed yourself satisfied with him because he had not paid McClellan any more on that certificate, and that what there was left in his hands was all there was out of about $5,000 which you had entrusted to McClellan.

His clerk testified that he took that letter (a copy of which I sent you) and handed it to you personally, and that you read it, and that McClellan was present at the time, and that he waited for an answer, and that you told him to tell Alexander it was all right. If that was so, it hurts your case as to the money paid to McClellan. I wish you would write me how that was.

The way it looks now you will stand some chance to lose that part of your claim.

Tell Mr. B. I have bought out Shaffer, and I enclose my card.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 22.—I. B., Ex'r.

TROY, *Jan. 27th*, 1873.

MRS. B.: Your letter came to hand this morning. I wish you
1220 to write me where I can see your sister, that I may learn what she will say about what occurred at the time the letter was sent you by Alexander. I shall most likely take a commission to take your testimony at Columbus. Therefore I want you to give me the name of some lawyer there to take your testimony. Please answer immediately.

Truly, yours,

P. W. BISHOP.

Bishop Letter, No. 23.—I. B., Ex'r.

TROY, *Jan.* 27, 1873.

DEAR SIR: Yours came to hand since I received your wife's letter. I begin to have some hopes of success. I hope to hear from her soon as to what I wrote her. I think her testimony had better be taken there by commission rather than here. I can shape it better. I can write out what she can testify to from what she has written me, and it will save her a cross-examination to a very great extent. I want to hear where her sister is, and what she knows about that letter. Shaffer is here doing nothing.

Truly, yours,

P. W. BISHOP.

Bishop Letter, No. 24.—I. B., Ex'r.

TROY, *February* 13, 1873.

MRS. B.: Upon consultation with counsel, we have come to the conclusion to cross-examine Alexander before taking a commission to
1221 examine you. We shall do that on the 28th inst., and immediately thereafter shall send a commission to take your testimony. In the meantime I hope to see McClellan.

Truly, yours,

P. W. BISHOP.

It has been so cold, I have not yet been to see your sister.

Bishop Letter No. 25.—I. B., Ex'r.

TROY, *March* 11, 1873.

MRS. B.: We met again in your Alexander suit to-day, and adjourned to take your testimony. It has to be taken by commission. I think you sent me the name of a lawyer who would act as commissioner and take the testimony, but I have mislaid the letter. Please send me his name at once, so as not to delay the trial any longer than is absolutely necessary.

Truly, yours,

P. W. BISHOP.

Bishop Letter, No. 26.—I. B., Ex'r.

TROY, *April* 1, 1873.

MRS. B.: We have not yet got our interrogatories settled for that commission. It has dragged on account of the prior engagements of counsel, but cannot much longer. Be patient; it will all come out right, I think.

In haste,

P. W. BISHOP.

1222 *Bishop Letter, No. 27.—I. B., Ex'r.*

TROY, *April* 2, 1873.

MRS. B.: Your letter came to hand this morning. I wrote you yesterday the reason of the delay.

I am short of ready money now, but before the first of next month will be in funds without doubt, and shall be glad to do as requested.

In haste,

P. W. BISHOP.

Bishop Letter, No. 28.—I. B., Ex'r.

TROY, *April* 21, 1873.

MRS. B.: The cashier of the Central Bank informs me that you sent my note to him to be discounted. I did not expect you to do that. I supposed you might pay it in your business. If the bank was discounting I could have got it discounted as well as you could. Money is tight here, commanding from twelve to twenty per cent.

If you use the note it will be paid when due. If you cannot use it, you can return it.

Truly, yours,

P. W. BISHOP.

Bishop Letler, No. 29.—I. B., Ex'r.

TROY, *April* 29, 1873.

DEAR SIR: Yours came to hand this afternoon. I do not blame
1223 your wife for being out of patience. It has taken longer than usual in getting the interrogatories settled, but I suppose it has been done to-day. It will be there now very soon. I should be pleased to have your wife present at the trial, but, as I have written her, I thought her testimony would be more effectual taken by commission. This case shall be hurried. I may be present at the execution of the commission.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 30.—I. B., Ex'r.

TROY, *May 5th*, 1873.

MRS. B.: I enclose to you what I suppose will be your answers to the interrogatories in your suit with Alexander. They are drawn up as I understand the facts from you. If I am wrong you can correct them, and answer as the facts are. You want to keep them, and not show them to the commissioner (Wallace), for he might impugn my motives in writing out your answers. After you have been examined you will return them to me. If you are not examined until next week I shall try and be present.

Yours, P. W. B.

Will mail him the commission to-day.

1224 *Bishop Letter, No. 31.—I. B., Ex'r.*

TROY, *May 14th*, 1873.

MRS. B.: Your letter and papers came to hand last evening. As soon as the testimony is received by the referee I will immediately give Mr. Alexander the necessary notice of hearing.

Yours,

P. W. BISHOP.

Bishop Letter, No. 32.—I. B., Ex'r.

TROY, *May 17th*, 1873.

DEAR SIR: Yours came to hand this morning. I will let you know as requested. I do not believe he dare call him as a witness. If he does, we will make it hot for him.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 33.—I. B., Ex'r.

TROY, *June 7th*, 1873.

MRS. B.: We met again to day in your case. Our circuit court being in session the referee announced that he could not proceed to-day. Alexander then wanted to put it off until July. We insisted on an early day, and it is put down for next Wednesday. I hope then to be able to inform you that it is concluded satisfactorily.

Truly yours,

P. W. BISHOP.

1225 *Bishop Letter, No. 34.—I. B., Ex'r.*

TROY, *June 11th*, 1873.

MRS. B.: We have finished your case to-day. I think we have the inside track. I believe we will surely succeed. The only question in the case is one of agency. Both parties are to prepare written points for the referee, which are to be presented on or before the 2 inst. We shall have ours ready by the 15th. I think you can calculate surely that we shall win; still you can't always tell.

In haste,

P. W. BISHOP.

Bishop Letter, No. 35.—I. B., Ex'r.

TROY, *June 19th*, 1873.

DEAR SIR: Yours came to hand this morning. All the delay there will be in the suit is the necessary one of substituting his executor as defendant. That can be done as soon as he qualifies. Stetson is now in the West, traveling with some theatrical company. I am expecting him here next month. In the mean time hold on.

Yours, etc.,

P. W. BISHOP.

1226 *Bishop Letter, No. 36.—I. B., Ex'r.*

TROY, *June 24th*, 1873.

DEAR SIR: Your letter came to hand this afternoon. I am sorry you are dissatisfied with the progress made in that suit. I have urged and crowded it in season and out of season, as all know who have had anything to do with the case. You need not send the Stetson note here unless you wish to. He is not here, and I am afraid will not be in time. I hereby waive notice of protest to save any expense.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 37.—I. B., Ex'r.

TROY, *June 14th*, 1873.

MRS. B.: I presume before you get this you will learn from the newspapers of the death of Andrew Alexander by drowning, which occurred last night. This will tie up your case until letters of administration are taken out, which I will see is done as soon as can be. I have no fear of the final result in your favor.

Truly yours,

P. W. BISHOP.

1227 *Bishop Letter, No. 38.—I. B., Ex'r.*

TROY, *April 16th*, 1873.

MRS. B.: Your letter came to hand yesterday. We do not know the day your cause will be tried. After the commission is returned it has to be noticed for trial over again. It was thought best to have your testimony taken by the commission rather than to have you come personally for examination. In case of personal examination you would be subjected to a cross-examination in which you might say something having a tendency to weaken your cause, which would be avoided if your testimony was taken by commission. I have been in hopes I should be able to be present at your examination to aid you, but if I am not, shall write you out the necessary answers as you have informed me the facts are. Unless absolutely necessary, you had better delay coming until your testimony is taken.

Respectfully yours,

P. W. BISHOP.

Bishop Letter, No. 39.—I. B., Ex'r.

TROY, *July 4th*, 1873.

MRS. B.: Yours came to hand this morning. I supposed I had given you an "insight" into your matters heretofore. I have endeavoredt o keep you posted. If you have any questions to ask me about your matters, do so, and I will answer them all fully.

In haste,

P. W. BISHOP.

1228 *Bishop Letter, No. 40.—I. B., Ex'r.*

TROY, *July 11th*, 1873.

MRS. B.: Yours of the 9th inst. came to hand this morning. There has nothing further been done with your case since the 20th of June. Mr. Ball, who is assisting, has made an arrangement to have Mrs. Alexander substituted as defendant, and save the expense and trouble of an application to the court. It will be attended to at once. There are often a good many things to retard a suit. Sometimes the lawyers are not ready, and sometimes the witnesses are absent. I have not been to McClellan's since I wrote you, but I expect to go again, and find him, if possible, next week. I should be pleased to see you here, but your presence can not expedite a settlement of your matters. After the executrix of Mr. Alexander is substituted, then the case is with the referee for his decision. He may decide it within a week, and he may not in two or more. He can if he likes take time. I will use my personal

influence with him to have an early decision, but do not wish to have him do so as to endanger the final result. I have no doubt of a final recovery of your whole claim.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 41.—I. B., Ex'r.

TROY, *July 24th*, 1873.

MRS. B.: I have delayed answering your letter to see if I could not in any way expedite your cause. Messrs. Smith, Cowen & Furs-
1229 man are the attorneys for Mrs. Alexander, who, as executrix, is to be substituted as defendant. I find that Kellogg, the referee, and defendant's attorneys are out of the city, and that nothing can be done this month or next. The truth is the lawyers here—most of them who have any practice—will not work during the hot weather. If you do not understand how it is, ask your lawyer who took your testimony and he will explain it to you. I will crowd the case the very earliest minute I can.

Yours, etc.,

B.

Bishop Letter, No. 42.—I. B., Ex'r.

TROY, *July* 26, 1873.

MRS. B.: Yours came to hand this morning. I will get through with the case as soon as possible. Still I want to win it if possible, if it takes longer.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No 43.—I. B., Ex'r.

TROY, *July 30th*, 1873.

DEAR SIR: Your letter came to hand. There have been some delays in your wife's suit, but there are many recorded cases of even greater delays. There is the case of Jarndyce agt. Jarndyce, the Tichborne claimant, and several others I might name. However, I took the pains to go and see Mr. Kellogg, the referee, to-day, and he refuses to
1230 stir in the matter before September. There is no power in the courts to compel him to, and besides, the attorneys on the other side will not do anything this hot weather. Mr. Smith, one of the attorneys, is laid up, having been accidentally shot, at Ballston Spa, a few days ago. However, if your wife comes on, I will make her as comfortable as I can, and she is welcome to make my house her home as long as she stays.

The opinion of your lawyer in Columbus was given under a misapprehension of all the facts concerning delays, I presume.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 44.—I. B., Ex'r.

TROY, *Feb'y 17th*, 1873.

MRS. B.: Mr. Alexander has applied for a postponement of the cause, and it has on that account been adjourned to the 11th day of March.

The more I think of your cause the greater is my confidence that we shall succeed.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 45.—I. B., Ex'r.

TROY, N. Y., *June 3d*, 1873.

MRS. B.: Your case came on this morning before the referee, Mr. Ball, associate counsel with me. Mr. Alexander applied for a postponement. He wanted it put off for some considerable time, but
1231 we opposed it. The referee finally adjourned to this week on Saturday, on which day we hope to make a finish of it.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 46.—I. B., Ex'r.

TROY, 12*th July*, 1873.

To M. S. BROWNING:

Take notice that a promissory note made by E. T. Stetson, dated Troy, N. Y., 10th July, 1873, due this day, for 1,500 dollars and interest, endorsed by you, is protested for non-payment; and that the holders look to you for the payment thereof, payment having been demanded and refused.

J. S. GAMSEY,
Notary Public.

Bishop Letter, No. 47.—I. B., Ex'r.

TROY, *Aug. 24th*, 1873.

MRS. B.: I saw Mr. Kellogg, the referee, last Friday. He said he should remain away with his family until next month, and that as soon as he returned he would finish up your case.

If you would like hotel keeping, I would trade up a half interest in the International for your claim. I sold on the 17th of July a half interest to Mr. E. B. Carpenter for $2,600. Since then we have
1232 made improvements and put in furniture, etc., to the amount of about eight hundred dollars.

If you wish to deal for a half interest I will give you a good trade.

Truly yours,

P. W. BISHOP.

Bishop Letter, No. 48.—I. B., Ex'r.

TROY, *Oct. 19th*, 1873.

MRS. B.: The referee has appointed the 30th inst., at 11 a. m., for the hearing of your case, and I have noticed it. I hope then to be able to report progress.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 49.—I. B., Ex'r.

TROY, *Jan.* 13, 1874.

DEAR SIR: Your letter came to hand this evening. Your case is still undecided by the referee. I can lead a horse to the water but I cannot make him drink. I have tried the cause, and the referee will take his own time to decide it. Mr. M. Ball was counsel with me in the case; he is now at 211 West 38th street, New York. If you like you can write him.

Yours, etc.,

P. W. B.

1233 *Bishop Letter, No. 50.—I. B., Ex'r.*

TROY, *Oct.* 15, 1874.

DEAR SIR: Yours came to hand this evening. I have been waiting as usual to have your case decided. The referee has not given his decision yet as I know of. He nor the opposite counsel have notified me in any way, and your letter that he has decided it is news to me.

Since you were here I have written Stetson, urging him to send money if possible, so as to help you.

Yours,

P. W. BISHOP.

Bishop Letter, No. 51.—I. B., Ex'r.

TROY, *Oct. 20th*, 1874.

DEAR SIR: Yours came to hand this evening. There has been no decision yet. It is not very important to have one against you unless you are to appeal.

I have this moment written to Stetson, urging him to send you money. I am really sorry you are so much in want of it, and if it was in my power at this time to help you I would.

Yours, etc.,

P. W. B.

1234 *Bishop Letter, No. 52.—I. B., Ex'r.*

TROY, *Oct. 29th*, 1874.

DEAR SIR: Your note came to hand this morning. I received a letter from Stetson yesterday, saying he would in a short time send at least $100.

When I came back here yesterday I found there had been left in my office a bill of costs in your case to be taxed to-day. It amounts to over $400. There has been no report served on me yet.

I am afraid they may send the bill of costs out to Columbus to try and collect of your wife. You ought at once to go to your lawyer and have things fixed up so nothing could be collected.

In haste,

P. W. BISHOP.

Bishop Letter, No. 53.—I. B., Ex'r.

TROY, *Oct. 29th*, 1874.

DEAR SIR: Since I wrote you this morning I have seen Smith, and

he tells me that he has understood that your wife was not worth anything and he should not make any effort to collect the costs from her.

I think he will do so; still I should have her do as I wrote you today.

I found out from him another thing which has satisfied me how he came to beat us in our suit. The referee, he says, was largely indebted to the Alexander estate. I think that is what beat us.

Yours, etc.,

P. W. B.

1235 *Bishop Letter, No. 54.—I. B., Ex'r.*

TROY, *Nov. 11th*, 1874.

DEAR SIR: Your letter came to hand and contents noted. I also had a letter from Stetson yesterday, who is still in hard luck. You have said heretofore that you never expected a cent. I think eventually he will pay; at any rate I have two French carom billiard-tables, with the patent Delaney cushions, which cost $450 each, and are as good as new with the exception of some very little wear, at Red Hook, where I moved them from this city, which I will ship you at East Chatham for Columbus upon your sending me a receipt for $600 (six hundred) to be applied on his note. I think you could realize that amount on them. Here the town is full, and cannot sell without too much sacrifice. The two tables cost me $900 and are worth $800 to any one who wants them; they are the best in use, in style and workmanship.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 55.—I. B., Ex'r.

TROY, *Nov. 17th*, 1874.

DEAR SIR: Your letter came to hand to-day. It is true you ought to have money; I know it, but now I am several thousand dollars in debt and have nothing in my hands, but can control some things. You have professed to believe that you never would get one cent from Stetson. I thought if you believed that, it would be doing you a favor, under the circumstances of my poverty, to let you have two tables that cost me $900, for $600, on what you considered a bad debt. I will do better than I wrote you; I will pay the expenses on them to Col-
1236 umbus. I have a large oil painting of Aridnee, a naked female, that you often saw in Griswold Hall, that originally cost $500, for which I paid $205, that I will send you for $100. I do this because I have no money, and to put you in shape to realize something right off on your claim. The tables are all boxed and can be shipped any day.

I also have a patent right for Rensselaer, Albany, and Columbia counties for rods, which cost me $600, that you may have for $300. I enclose you one of the bills, with cut and the prices, showing the profits.

I do this to satisfy you that anything I can possibly do I will to make my endorsement good.

I hope Stetson will soon make some money himself. Please answer by return mail. I would advise you to take the tables to apply on his note. The note calls for a large interest, but it will be paid.

Yours, etc.,

P. W. BISHOP.

Bishop Letter, No. 56.—I. B., Ex'r.

TROY, *Nov. 27th*, 1874.

DEAR SIR: I have traded off one of those billiard tables. I have done so at such a lay as it will pay at least $500 of my debts. I think you had better let me send you the other before some creditor may want it. It is a bargain, and if you have no sale at present for it you can afford to store it at the price I named.

Yours, etc.,

P. W. BISHOP.

1237 *Bishop Letter, No. 57.—I. B., Ex'r.*

TROY, *March* 23, 1875.

MRS. B.: Your letter came to hand this morning. I have just returned from the country. Have been sick some time and unable to do but little. I have not heard from Stetson but once since Mr. B. saw him here. He should have sent some money to me, and I was to forward it. He has not sent any. Mr. B. knows how hard up I was when he was here, and through sickness I have not been able to get ahead any. My rent, due on the first day of this month, I have not been able to pay yet. The landlord is running after me for it when I am here; so he can. I wish it was in my power to help you, for I am under very strong obligations to do so; in fact, I should strain every nerve to do it, but it is simply impossible now. I hope and trust you will in some way get through your embarrassments, and as soon as it is possible I will do all that you or Mr. B. will say I can do.

Respectfully yours,

P. W. BISHOP.

Bishop Letter, No. 58.—I. B., Ex'r.

COLUMBUS, *Nov.* 1, 1874.

To Mr. G. B. KELLOGG:

DEAR SIR: If it is not any trouble to you, I should like to know how much money Mr. Bishop drew from Mr. Alexander at the time he received the order from the court.

Respectfully,

M. S. BROWNING.

1238 It was admitted on the trial that Alexander, under the order of the court, paid to your attorney, on the 7th June, 1872, $1,741.

Yours, etc.,

G. B. K.

TROY, *Nov.* 4, 1874.

STATE OF NEW YORK,
Rensselaer County, ss:

I, Irving Browne, special examiner in the suit of Christopher C. Campbell, complainant, against Thomas L. James, defendant, in the United States circuit court for the southern district of New York, do hereby certify that the foregoing are true and correct copies of the originals, and of the whole of the originals, of fifty-eight paper writings produced in evidence by the said complainant on the hearing of said suit

before me, and by me marked "Complainant's Exhibit—Bishop Letters," number one to number fifty-eight inclusive, with my initials.

IRVING BROWNE,
Special Examiner.

1239 *Complainant's Exhibit, decision of the board of appeal, U. S. Patent Office.—I. B., Ex'r., August* 22, 1878.

(65.)

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy taken from the files of this office of the decision of the examiners-in-chief in the matter of the application for the reissue of letters patent granted Marcus P. Norton, dated April 14, 1863, and reissued August 23, 1864, for improvement in post-marking letters and cancellation of postage-stamps thereon.

In testimony whereof, I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed, this thirteenth day of August, in the year of our Lord one thousand eight hundred and seventy-eight, and of the Independence of the Republic of the United States the one hundred and third.

[SEAL.] ELLIS SPEAR,
Commissioner.

1240 No. 3952.

U. S. PATENT OFFICE.

July 29, 1869.

Before the examiners-in-chief, on appeal.

Application of Marcus P. Norton for a reissue of his patent for post-marking letters and cancellation of postage stamps thereon, April 14, 1863. Reissued August 23, 1864.

The soul of the invention is the construction and use of a hand letter postmarking and postage canceling stamp, whereby the posting and canceling is provided for and accomplished by one motion.

The material used and construction is of but secondary importance, and anything equivalent to those specially mentioned in the specification, in producing the result aimed at, was covered by the original invention.

The inventor asks for nothing in this reissue not fairly embraced and covered by his original invention, and allowed in his patent of April 14, 1863, and reissued August 23d, 1864.

The ingenious examiner would hardly allow a patent for a new invention where the only feature different from that shown by the original application should be a metallic canceling device, especially when he considers that in his original specification the applicant says, "I construct the canceling stamp or device of any suitable material."

As the use of these words appears to furnish the only ground for the rejection by the examiner in charge of the first claim, we think the reason and argument fallacious.

The references cited do not show an anticipation of the invention presented in this application for reissue.

It is possible that these cumbersome and complicated machines may perform as they are designed to do, and effect similar results to those
1241 attained by this single, cheap, and easily managed hand instrument; but as the present invention is a self-evident improvement both in structure, effective working, and cheapness, and as applicant only asks his third and fourth claims for his process and method of stamping the postmark and canceling the postage stamp at one blow of his hand instrument, for wh ch the examiner concedes he is entitled to a patent, by allowing the second claim, we see no good grounds for rejecting those claims. The holding and the decision of the examiner in charge is hereby reversed, and a patent will be reissued as asked.

R. L. B. CLARKE,
SAMUEL C. FESSENDEN,
Examiners in-Chief.

Ex'd, E. E. McC.—F. F.

(Endorsed:) No. 3952. Decision of board of appeal. July 29, 1869. U. S. Patent Office. Application of Marcus P. Norton for a reissue of his patent granted April 14, 1863, and reissued August 23, 1864, for an improvement in postmarking letters and cancellation of postage stamps thereon. Reissue again allowed by the examiner-in-chief

1242 *Complainant's Exhibit C C. (E. S. Zevely).—(Signed) H. F., sp'l examiner, March* 6, 1878.

OFFICE OF THE UNITED STATES ATTORNEY FOR
THE SOUTHERN DISTRICT OF NEW YORK,
New York, February 2d, 1878.

E. S. ZEVELY, Esq.,
Cairo, Ritchie Co., W. Va.:

SIR: There is a suit in equity pending here against Mr. James, U. S. postmaster at this city, which is based on a patent granted to Marcus P. Norton in 1863, for an improvement in post-office stamps.

I am informed by Mr. J. H. Zevely, of Wheeling, W. Va., that prior to the year 1860 you made of boxwood a combined postmarking and postage-stamp cancelor, so constructed that the postmark would appear wholly on the envelope and apart from the postage stamp, and would be made by the same blow which put the cancellation mark on the postage stamp. Will you do me the great favor to examine the enclosed papers and write out your answers in the manner indicated and take them before a notary public and swear to them. I will see that the fees of the notary are paid.

I request this, as the facts as stated by Mr. J. H. Zevely seem to me to have a very important bearing upon the suit. I request, also, that you give as early attention to the matter as you conveniently can.

Very respectfully yours,
(Signed) STEWART L. WOODFORD,
U. S. Att'y.

J. D. J.

(Endorsed:) S. B. C., C. H. B.

1243 *Complainant's Exhibit D D. (E. S. Zevely).—(Signed) H. F., sp'l examiner, March* 6, 1878.

Will you oblige me by taking the affidavit in the following manner: Entitle the affidavit as follows:

United States circuit court, southern district of New York.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES.

STATE OF WEST VIRGINIA,
County of Ritchie, ss:

E. S. Zevely, being duly sworn, testifies as follows, to wit: I am, etc.

(Answer the questions contained in the annexed paper, in writing, in narrative form, repeating the substance of the question in the answer; go before a notary public, who will administer the oath and attach his official seal.)

1. Have you ever been employed in any post-office? If so, state in what office, and at what time, as accurately as you can.

2. Have you ever known of the use in any post-office of a hand instrument by which the letter was postmarked wholly on the envelope and apart from the postage stamp, and the postage-stamp was canceled at one blow? If so, state what office, when it was first used, who made it, and how it was constructed—specifying particularly the man-
1244 ner in which the postmarker and canceler were attached to each other, and to the handle, and the material of which they were each made.

3. Was the instrument referred to in question 2 used in the year 1860 or earlier? Speak to the best of your recollection.

4. Who invented or contrived the instrument above referred to? Did you ever know of the inventor using the same; if so, where and in what year?

5. Did you yourself ever make or partially make such an instrument? If so, state when and how it was constructed. Give the date according to the best of your recollection.

1245 *Complainant's Exhibit E E. (E. S. Zevely).—H. F., sp'l examiner, March* 6, 1878.

CAMPBELL
vs.
JAMES.

OFFICE OF THE UNITED STATES ATTORNEY FOR
THE SOUTHERN DISTRICT OF NEW YORK,
New York, February 11, 1878.

E. S. ZENELY, Esq.,
Cairo, W. Va.:

DEAR SIR: I have to acknowledge the receipt of your letter of the 9th inst. in reference to your familiarity with the facts of the above case, and to say in reply that your testimony will be of great service to Mr. James, the postmaster in this city, who is personally liable in this action. The affidavit which I ask for in my former letter

certainly cannot take a great deal of your time, and will be very gratefully received by me as the representative of Mr. James. I am not authorized to pay you for the testimony which is within your knowledge, but I will pay for the procuring of the same the necessary expenses; that is to say, I will agree to pay the amount which can reasonably be charged for drafting and swearing to the statement referred to in my last letter. I trust that you will reconsider the conclusion expressed in your letter and consent to give me the benefit of your knowledge.

Very respectfully,
(Signed) STEWART L. WOODFORD,
U. S. Att y.

J. D. J.

1246 *Defendant's Exhibit.—Marcus P. Norton, A. & B.—I. B., Ex., May* 18, 1878.

CANAAN FOUR CORNERS, N. Y.,
November 27, 1876.

JACOB SHAVOR, Esq.:

DEAR SIR: Your letter of the 25th instant came to me this morning and from Troy to-day. I am up again and getting better every day. I will be in Troy one week from to day and in the mean time will have papers you name prepared in good shape. I have twice written Mr. Secombe since I sent his last letter to me to Mr. Eddy and I am waiting his reply to each of them. I little care whether he signs the paper that I sent him or not, because he has utterly failed in his trust and the title reverts, at least all the title he ever had.

He took no absolute title but a title subject to a certain trust. Whenever the trust fails then fails the title. He failed in that trust more than four years ago, and when called on for money to carry out the trust then he refused, and has so refused three or four times, and I have it in writing, still I have thought it best to have him make a reassignment. If he will do so, very well; and if not, then just as well.

I have good letters from Attorney-General Williams, also from General Butler, about my 1863 letters patent, dated April 14th of that year, and all the subsequent reissues, and they fully concur in my views and opinions about the title, use by the government, its great value, and certainty of recovery under that patent for the past thirteen
1247 years' use of that invention. And they are strongly in favor of the court of claims' bill No. S. 571, which you have.

I have also a letter from "Mr. Senator Wadleigh," who reported bill 571, dated the 24th instant, which I will let you three see when in Troy. I come to Troy to take proofs in a patent case and will be there four days.

The 21st joint rule of the Senate and House will not admit of our bill coming up until after six days from the commencement of next session, which will be on next Monday. The "six days" will be up on the following Monday, to wit, December 11th, or two weeks from to-day.

Congress convenes on Monday, one week from to-day.

If you, Corse and Eddy, will now take hold and push the 1863 invention on in the line of S. bill 571, you will be pursuing the right course and that which will certainly succeed and bring money to your entire satisfaction. It must not be encumbered with the 1859 patent in any way of association or compromise, because such a course will bring

with it certain defeat, even of the 1863 patent. That patent must and will stand alone in the claim against the government for its use; and when put into Mr. Eddy, as trustee, it must be that in no way or manner shall it be coupled with the 1859 patent. I have very carefully examined the whole matter since I came from Washington last August, and my conclusions are stated in a few words just above. Messrs. Butler and Williams both agree with me in this. I have now the evidence which will satisfy you about it. If the 1859 men have any claim for the use of that patent let them put in a case on their own hook and then they can find out all about it. Congress, on the 14th day of July, 1870, expressly authorized the government, by the Postmaster-General, "to continue in use" the patent of April 14th, 1863, and its reissues, and that has been done and is being done to-day. Every report made
1248 in Congress, without an exception, has spoken of and confirmed the use of the April 14th, 1863, patent and of its reissues. This has been done by giving the dates of that patent and by describing the invention in the reports. The August 9th, 1859, patent is nowhere thus mentioned. There is much more on these points, but enough now. You will please let Messrs. Eddy and Corse see this letter.

Truly yours,

MARCUS P. NORTON.

1249 *Defendant's Exhibit, No.* 180.—*I. B., Ex'r, Troy, July* 16*th*, 1878.

TROY, N. Y., *Feb.* 6, 1864.

HON. ABRAM WAKEMAN,
Postmaster, New York:

SIR: Your letter of the 22d ult. is before me for answer, it having been referred to me for that purpose by Mr. Ransford, to whom it is addressed. Mr. Ransford is not, and does not claim to be, the inventor at all of the stamp to which you refer. The "double canceling stamp" now used by you in your post-office is my invention as far back as the year A. D. 1856, as I can most fully and satisfactorily prove. It was patented to me in the early part of the year 1863 upon an application made by me a long time before then. I had several such stamps made in 1858, as I can prove by the person who made them. In the year 1859, I conceived the plan of attaching a cutting device to a cylinder dating stamp, which combination of "cylinder dates" and "cutting device" was patented to me in August, 1859. This patent was by me assigned to "F. G. Ransford, Peter Low, and Chas. Eddy & Co.," some time during that year. This device was tested in the Washington City post-office in the year 1859, by order of Hon. Horatio King, First Assistant Postmaster-General. It was found not to operate well, and Mr. Tree, of the Washington post-office, reported against it. I then returned to the original invention which I found by test made in the New York office to be the best invention. The "cutting device"
1250 was also tested in your office, and found to cut too much into the letter; but at the same time making a more effectual cancellation of the stamp. I then made improvements upon the double canceling stamp (by cutting) which were also patented to me in the early part of 1862. In the year 1859 a patent was granted to me. In the year 1862 two patents were granted to me, and in the year 1863 one patent was granted to me, all of which were for improvements of a different character in post-office stamps. In the year 1856 I first submitted the double canceling stamp to the Post Office Department for consideration. This is the same stamp in principle and combination which you now

use, and have for about three years used in the New York post-office. During each year from 1856 to the year 1863 inclusive, I have urged upon the Post Office Department the use of said stamp. So I have the improvements covered by the patent of 1859–'62, and after having tested them all in the manner and the time (as well as place) selected and directed by the Post Office Department, the improvements of 1856 patented in 1863 were selected and adopted as the best and which at first I thought of the least value. The patents of 1862 and 1863 are now held by assignment by "Jacob Shavor and Albert C. Corse," of this city, as the Patent Office records will most fully show, and who also own one-third of the patent of the "cutting device" of 1859, and which was invented by me in that year. I first began with the Post Office Department for a change in the then existing unwieldy plan of postmarking and mailing of letters in the year 1854, and have letters, etc., to show that fact. The Post Office Department at Washington contains a large number of letters written by me in the years 1858, 1859, '60, '61, '62, and '63, upon the matter of postmarking letters and canceling stamps thereon, also in making up of the mails. I have the best of proof of this. More than that, the records fully show it to be true. These
1251 improvements I have also patented in Europe, and which are now meeting with great favor there. The Postmaster-General gave me an order in the fore part of 1859 to use for three months in the Troy post office my invention now used by you. I have the original order. Any other information you may desire, I will furnish you with if in my power to do so within the strict rule of right. You can address Messrs. "Shavor and Corse," aforesaid.

Your obedient servant,
(Signed) MARCUS P. NORTON.

POST OFFICE DEPARTMENT,
Washington, D. C., March 28, 1878.

I, David M. Key, Postmaster-General of the United States of America, certify this to be a true copy of the original now on file in this department.

In testimony whereof, I have hereto set my hand and caused the seal of the Post Office Department to be affixed at the city of Washington, the day and year above written.

[L. S.] D. M. KEY,
Postmaster-General.

1252 *Defendant's Exhibit, No.* 181.—*I. B., Ex'r, Troy, July* 16*th*, 1878.

WASHINGTON, D. C., *March* 14, 1866.

HON. WILLIAM DENNISON,
Postmaster-General;

SIR: In addition to the amount of money expended by Messrs. Shavor and Corse for me and on my account, as stated by them in their affidavit made on the 2d day of January, 1866, and to be found on page 6 of Ex. Doc. No. 30, 39th Congress, 1st session, I have expended full $5,000 (five thousand dollars), which was done before my assignment of the patents to them. This sum was expended in the perfecting of the invention described in the patents (there being two and one reissue) and in getting the same into use. This is for money actually and necessarily expended, nothing being charged for my services rendered as attorney in the suit brought to establish the validity of the patent, nor was there

anything charged for counsel who tried the cause before the court on part of the plaintiffs. I may further say that this invention has been in use by the department in the New York office since the fall of the year 1860 at a saving in that office of six thousand dollars per year in the item of clerk hire alone. It is now in extensive use by the department. I have never received from the department or government, in any manner whatever, a single dollar for the use of this invention, nor have my said assignees. In order to successfully defend my right to this
1253 invention as the original and first inventor, it became necessary to part with the title by deed of assignment to Shavor and Corse, as at that time parties to suits in the United States courts could not be witnesses in their own behalf. Since then Congress has changed the law in that respect. But for this I would to-day have been the owner of the entire invention. So it is, and all I now ask or expect is a fair, just, and liberal compensation in an equitable proportion to the real and actual value of the invention for the term or life of the patient, to wit: 17 (seventeen) years from the date thereof.

Very respectfully, your ob'd't servant,

(Signed) MARCUS P. NORTON.

POST-OFFICE DEPARTMENT,
Washington, D. C., March 28, 1878.

I, David M. Key, Postmaster-General of the United States of America, certify this to be a true copy of the original now on file in this department.

In testimony whereof I have hereto set my hand and caused the seal of the Post-Office Department to be affixed, at the city of Washington, the day and year above written.

[L. S.] D. M. KEY,
Postmaster-General.

(Here follows diagram marked page 1254.)

1255 *Complainants Exhibit Hand-stamp, patented August* 23, 1870.—*I. B., Ex'r, August* 22, 1878.

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office, of the canceled letters patent granted Helen M. Ingalls, dated August 23, 1870, No. 106716, for improvement in hand stamps.

In testimony whereof, I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this thirteenth day of August, in the year of our Lord one thousand eight hundred and seventy-eight, and of the Independence of the United States the one hundred and third.

[SEAL.] ELLIS SPEAR,
Commissioner.

I hereby certify that the foregoing is a true copy of the certificate of the Commissioner of Patents prefixed to Complainant's Exhibit "Hand stamp, patented August 23, 1870," filed with me on the 22d of August, 1878, in the cause of Christopher C. Campbell against Thomas L.

1256 James, in the United States circuit court for the southern district of New York.

IRVING BROWNE,
Special Examiner.

No. 106716.

The United States of America to all to whom these letters patent shall come:

Whereas, Marcus P. Norton, of Troy, New York, hasalleged that he has invented a new and useful improvement in hand stamps (he having assigned his right, title, and interest in said improvement to Helen M. Ingalls, of same place), and has made oath that he is a citizen of the United States, that he verily believes he is the original and first inventor or discoverer of the said improvement, and that the same has not, to his knowledge and belief, been previously known or used; has paid into the Treasury of the United States the sum of thirty-five dollars, and presented a petition to the Commissioner of Patents praying that a patent may be issued therefor. These are therefore to grant to the said Helen M. Ingalls, her executors, administrators, or assigns, for the term of seventeen years from the twenty-third day of August, one thousand eight hundred and seventy, the full and exclusive right and liberty of making using, and vending to others to be used, the said improvement, a description whereof is given in the annexed schedule and made a part of these presents.

In testimony whereof I have caused these letters to be made patent, and the seal of the Patent Office to be hereunto affixed. Given
1257 under my hand, at the city of Washington, this twenty-third day of August, in the year of our Lord one thousand eight hundred and seventy, and of the Independence of the United States of America the ninety-fifth.

W. T. OTTO,
Acting Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.

SAML. L. DUNCAN,
Acting Commissioner of Patents.

U. S. PATENT OFFICE,
October 4, 1870.

This patent and reissued letters patent No. 3586, granted to Marcus P. Norton August 3, 1869, for improvement in post-office postmarking and canceling hand stamps, were jointly surrendered for cancellation, and in lieu therof reissued letters patent Nos. 4143 and 4144 were granted, bearing date October 4, 1870.

These letters patent No. 106716 are therefore, at the request of the patentee, annulled and canceled.

SAML. S. FISHER,
Commissioner of Patents.

(Here follows diagram, marked page 1258.)

1259 UNITED STATES PATENT OFFICE.

Marcus P. Norton, of Troy, New York, assignor to Helen M. Ingalls, of same place. Improvement in hand stamps.

Specifications forming part of letters patent No. 106716, dated August 23, 1870.

To all whom it may concern:

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer, and State of New York, have heretofore invented certain new and useful improvements in a device or instrument for printing, dating, and canceling internal revenue or other stamps of value, by cutting or puncturing the same in the manner and by the means substantially as herein described; and I do hereby declare that the following is a full, clear, and exact description of the nature, construction, and operation of the said invention.

Like letters represent and refer to like or corresponding parts upon the accompanying drawing, made in one sheet.

Fig. 1 is a vertical section on a line through the centre of my canceling device or instrument. Fig. 2 is a perspective view of same device or instrument. Fig. 3 is a face view, showing the printing and cutting or puncturing devices arranged and combined for printing any name and the date, and for cancellation purposes. Fig. 4 is a modification representing the invention attached to an ordinary stationary
1260 frame to receive and contain such printing, dating, and cutting or puncturing devices. Fig. 5 represents an enlarged view or plan of cancellation, and printing and dating an internal revenue stamp, represented by said figure. Fig. 6 represents an internal revenue stamp canceled by being cut in several places, together with the month, day of month, and the year; also the name and residence of the person printed or impressed upon the surface of such revenue stamp who performs the operation of cancellation.

The nature of my invention and improvements consists in the employment of cutters or knives between the type for the month, the day of the month, and the year.

A, Figs. 1, 2, and 3, shows a device or instrument for printing or impressing the name of any bank, corporation, company, or person, and the month, the day of the month, and the year, upon the government revenue stamp, and at the same time and operation of the instrument cancel such stamp and the check, note, draft, receipt, or other paper on which said stamp may have been secured or affixed in the usual manner, by cutting or puncturing the said revenue stamp, and also cutting through both the stamp and paper or document on which the same shall have been used or affixed, by means of the cutting devices *a*, or knives, constructed in any suitable and desirable form or shape, and arranged and combined for that purpose, as herein stated.

The said knives or cutters, *a*, are placed between and alternate with the type for the month, the day of the month, and year, as shown both between and outside of the said type for the date, and they are each properly adjusted to the face of the dating type or printing surface of the device or instrument in which they are placed, arranged, combined, and firmly held or secured therein by means of a suitable screw-bolt, *c*, or by other suitable and convenient means.

1261 At Figs. 1 and 3 *d* is the type for the month, *e* is the type for the day of the month, and *f* is the type for the year.

The cutters or knives may be seen at *a*, same figures, which may each have upon the cutting or puncturing edge any form, shape, or configuration in or with which it is desirable to cancel the revenue stamp.

The said cutting and puncturing canceling device should be made detachable, for the purpose of repairs or supplying new ones when needed.

When the revenue stamp shall have been canceled by the use of my said invention and device, it will be cut or punctured, and the date thereof printed or impressed thereon, substantially as shown in accompanying drawing, cutting through the stamp and the paper to which it is affixed in the usual manner. Such cancellation is permanent, and will prevent a second or re-use of the revenue stamp.

The blow is given by the instrument or device upon the exposed surface of the revenue stamp, and the date is thereby given thereon, and at the same time the revenue stamp is cut or punctured in such form and in as many places as desirable.

Having thus described the nature, construction, and operation of my said instrument or device, what I claim and desire to secure by the letters patent of the United States of America, is—

The arrangement of the knives or cutting devices *a*, when used alternately with the type for forming or printing the month, the day of the month, and the year, in the manner and for the purposes substantially as herein described and set forth.

In testimony whereof I have, on this 12th day of June, 1870, hereto set my hand in the presence of two witnesses.

MARCUS P. NORTON.

To wit:
CHARLES P. BARNARD,
FREDERICK KOONS.

Ex'd. E. E. McC—F. F.

1262 *Complainant's Exhibit William E. Hagan and Smith Groom. (October* 30, 1863.)—*I. B., Ex'r, August* 23, 1878.

The United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office.

In testimony whereof, I, D. P. Holloway, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this twenty-seventh day of November, in the year of our Lord one thousand eight hundred and sixty-three, and of the Independence of the United States the eighty-eighth.

[SEAL.] D. P. HOLLOWAY.

U. S. PATENT OFFICE, *Oct.* 30, 1863.

Interference between the application of Wm. E. Hagan, for a method of burning fuel for generating heat, and the patent granted to Smith Groom, June 10th, 1862, for improvement in stoves.

On appeal to the examiners-in-chief.

The invention in controversy consists essentially in injecting
1263 superheated steam into the fire of a stove or furnace in small jets, by which means the steam is decomposed, and the hydrogen gas, thus set free, is subjected to combustion, and aids in generating heat.

Both parties claim to produce this result in substantially the same way. A boiler for generating steam is located in the upper part of the stove, from which the steam is conducted through pipes or suitable passage-ways to an annular chamber (or chambers) surrounding the fire box, with small apertures in its inner wall through which the steam, highly heated, is injected immediately into the fire. This general description is equally applicable to the apparatus and process of both parties. The claim of Groom is in these words:

"What I claim," etc., "is the introduction of highly-heated steam into the fire-chambers by means of annular chambers or pipes surrounding the said fire-chamber, on the inside thereof, and having therein apertures through which such steam or hydrogen is admitted into the fire around the outside thereof, whereby combustion is greatly aided and fuel economized, substantially as herein described and set forth."

Hagan makes three claims, two of which only have been adjudged to interfere with Groom's patent, and are as follows:

"1. What I claim as my discovery, or invention, in the management of combustion in fire-chambers, is the application, substantially as herein described, of superheated steam in jets, so as to impinge without admixture with atmospheric air, directly against the incandescent coals in addition to, or in combination with, the supply separately of atmospheric air either by draught or blast, in the usual manner as set forth and for the purpose specified.

"2. I also claim, in the construction of fire-chambers for the combustion of fuel, and provided with apertures at or near the bottom for the admission of atmospheric air, combining therewith a steam chamber or chambers having numerous small apertures next to the fuel for the escape of the superheated steam to impinge without admixture of atmospheric air against the incandescent coals, substantially as and for the purpose specified."

1264

There is one material difference between the processes described by the parties respectively, which does not become apparent, however, on reading their claims independently of the specifications.

It will be observed that Hagan, in both his claims above quoted makes it an essential element that the superheated steam shall be used as described, in combination with a supply of atmospheric air from below the fire. Groom, on the contrary, specially sets out in the body of his specification that "no air is admitted to the fire, or any part thereof. The entire structure is constructed air-tight, so that air is only admitted to start the fire and generation of steam, which, when done, is then shut off." His model is evidently constructed in accordance with this theory.

The testimony of an eminent chemist in the case is, that without a supply of atmospheric air to the fire "it would not be possible to maintain combustion for any great length of time," and it appears manifest to us that such would be the case. If this be so, then Hagan has at least made a valuable improvement on Groom's invention, even conceding that Groom is the prior inventor of all that he describes and claims, and that what he describes and claims constitutes a patentable invention. In this view of the case, it is questionable whether Hagan is not entitled to his patent at all events, leaving the question to be decided by the courts whether it shall be held subordinate to the prior patent of Groom or not.

But inasmuch as the parties have gone fully and elaborately into the evidence touching the priority of invention of that part of the process which consists in introducing superheated steam directly to the fire from an annular chamber surrounding the fire-box, or, in

1265

the language of Hagan's claim, "so as to impinge, without admixture with atmospheric air, directly against the incandescent coals,' we shall not shrink from an examination of that evidence, or from giving an opinion as to the side upon which it preponderates.

Hagan filed a caveat, accompanied by elaborate drawings, on the 3d of February, 1862, very clearly describing and illustrating the invention which he now claims.

Groom filed his application by petition only, on the 13th day of February, 1862, but did not file his specification and drawings until the 21st day of that month.

"Hagan's caveat was either overlooked or misunderstood by the examiner-in-charge, and so no notice was given to him (Hagan) to complete his case in order to a delaration of interference." But for this inadvertence the contest would have been between two applicants for patents, instead of being as it now is between an applicant and a patentee.

So far as the record evidence is concerned, it proves the priority of invention on the part of Hagan. Both parties, however, have introduced evidence tending to prove invention at much earlier dates than their respective applications to the Patent Office.

By an agreement between the parties both Hagan and Groom were examined as witnesses.

The testimony is clear and undisputed that Hagan had the invention in practical operation in a stove at his store in Troy, New York (where both parties reside), in the month of January or about the first of February, 1862. It is proved also, by his own testimony, that he made a practical application of the same invention in a stove at the same place in the year 1858. He states, however, that the only person who had any knowledge of the experiments made by him at that time (one

1266 Kelley, who was then in his employ) is now dead, and so his testimony on that point stands wholly uncorroborated, except by one circumstance tending slightly to corroborate it, as testified to by another witness. Nevertheless it stands wholly uncontradicted, and as, by the agreement of the parties, Hagan was made a competent witness, we cannot reject his testimony as long as it remains unimpeached. We must, therefore, regard his testimony as establishing the fact that he discovered the invention which he now claims, and tested its practicability, in 1858.

There is no direct and positive evidence that Groom discovered the invention described in his patent as early as 1858, or in fact at any time previous to the winter of 1861–'2. Although he was put upon the stand, and examined for some time by his own counsel, he did not state when he made the invention described in his patent, nor was that question asked him. What he might have said if his examination had not been interrupted by his illness, it is impossible for us to know or surmise.

Smith Groom was not put upon the stand until late in the afternoon of Saturday preceding the Monday on which the testimony was to be closed. The counsel of Hagan and his assignees objected to his being called at that late hour "of the last day of taking proofs," on the ground that it would be "impossible to cross examine him within the remaining business hours of the day." The Commissioner, however, overruled the objection, on the ground that the time for taking testimony included the Monday following. The witness was then put upon the stand and testified that he made the model upon which his patent of June 10th, 1862, was issued in the fore part of the year 1856; that he made an application to Marcus P. Norton, esq., in 1857 to aid him in obtaining "a

patent upon that model," and that Norton objected to it, and told him that he was a fool or crazy. He then had the model with him,
1267 and explained to him (Norton) what it was for, that is, the burning of steam in connection with fuel. There were two other men present, one of whom took sides with Norton, and ridiculed him (witness) as being a fool or crazy, while the other (a Mr. Hardman) took sides with the witness, and argued that he was right in his views. He testified that the words "Smith Groom, Troy, N. Y.," engraved on the model were engraved by James Hagerman about a year after the model was made. In answer to a question by his counsel as to certain alterations which appeared to have been made in the model, and by whom and when they were made, he stated that the alterations were made by himself shortly before the model was sent to the Patent Office (February, 1862). The questions of his counsel on this point only referred to two alterations in the model—one "in the upper part of its construction," and one in the hearth-piece, consisting in stopping up three openings which appeared to have originally been therein. The answers of the witness were strictly responsive to the questions in stating by whom and when said specified alterations were made. But neither did the nterrogations call for nor the answers give any light upon the important question whether these were the only alterations made in the model shortly before it was sent to the Patent Office. There is nothing in his testimony from which it can fairly be implied that the alterations mentioned were the only alterations so made.

When the witness had answered the question touching these two alterations, it being 7½ o'clock in the evening, the further examination was adjourned until Monday morning. On Monday morning the witness was taken suddenly ill, so that his examination could not be proceeded with that day, on which the testimony was closed, thus terminating the testimony of the witness at the very unsatisfactory point above indicated.

The counsel of Groom and his assignees offered to consent to an
1268 extension of the time of taking the testimony, to give counsel on the other side an opportunity of cross-examining the witness (Groom), but to this the counsel on the other side did not assent.

If the two alterations referred to by Groom in his testimony were in fact the only alterations made in the model after the model was made in 1856, it is more unfortunate for his side than for the others that his examination should have been interrupted at the point at which his testimony terminated. As it is, his testimony falls very far short of proving that said model, in a form to embody and illustrate the invention now in controversy, had any existence prior to his application for the patent, or a short time previous thereto. The model was undoubtedly made prior to 1858; there is abundant evidence of that fact. But whether it embodied the invention now in controversy depends upon the fact whether certain apertures in the interior, not apparent on the outside, were then in it or not. We refer to the apertures from the annular chamber leading into the fire-box. Without these apertures the model would afford no evidence of the existence of the invention now in controversy. They could have been made subsequently to the making of the model more easily than the alterations which Groom testifies that he did make shortly before sending the model to the Patent Office, and would have changed the appearance of the model much less. It is quite probable that Smith Groom is the only man in the world who knows whether these perforations were made in the model originally or at some subsequent time; and if at a subsequent time, when? If there is any other man who

knows that fact, his evidence on that important point has not been produced in this case.

In view of the fact that it is proved that the model has been altered quite recently, by stopping up some holes and opening others, evidence that it was made in 1856 is not sufficient to establish the
1269 fact that the perforations in the annular chamber were then made.

The utmost that has been proved is that it had the same general appearance in 1856, or prior to 1858, that it has now. But the addition of said perforations in the annular chamber would not have changed its outward appearance at all, or its appearance internally, except to a very critical observer.

It is important to be borne in mind that it is an essential element of the invention now in controversy that the superheated steam shall be injected immediately into the fire. To introduce it above or below the fire would not involve this invention, nor would it effect the object in view. In a stove constructed according to Groom's model, without the perforations in the inner wall of the annular chamber, it would be impossible to cause the steam to be injected into the fire, as is required to be done in applying the invention now in controversy. With said perforations a stove so constructed would be adapted to carrying the invention into practical operation. Whether the existence of the model at any given time, therefore, tends to prove that the invention now in controversy had then been discovered depends upon the fact whether it then contained said perforations.

The only witness besides Smith Groom who testifies to having seen the model prior to 1859 is James Hageman, who testifies that he engraved on the model in 1856 the words "Smith Groom, Troy, N. Y.," which now appear upon it. He does not pretend, however, to recollect anything more about the model at that time than its general appearance. He cannot say whether it has been altered since that time or not. In fact, his testimony wholly fails to prove that the model, as he saw it in 1856, was adapted to the invention now in controversy or not. He does not even state that he was then aware, or that Groom informed
1270 him, what was the object of the model, or what was the nature of the invention it was intended to represent.

There are two other witnesses who testify to having seen the model in 1859 and in the winter of 1859–'60; both of whom have attempted to described it as they saw it. These witnesses are Peter P. Groom, son of Smith Groom, and Marcus P. Norton, his attorney.

Peter P. Groom says he first saw the model in January, 1859. He says his father then explained to him its object and its operation, so that he understood it that "he was a going to use water to save fuel." He describes the model as having two annular pipes or tubular wings around the fire-pot, one at the bottom, resting on the grate, and one at the top of the fire-pot, both being perforated and both being connected by pipes with the reservior above. The counsel (Mr. Norton) did not appear satisfied with this description representing the lower annular chamber as consisting of a round pipe, and strove hard, apparently, to lead the witness to change his testimony on that point, but only succeeded in getting him to contradict himself in such a manner as to utterly destroy his testimony.

Norton himself testified to having seen a model in the possession of Smith Groom in the winter of 1859–'60 which resembled the model in question, but could not swear it was the same. In form and shape it was like it to appearance in all its parts. He saw no round pipe encircling the model at or near the lower part of the fire-box (as testified to

by Peter P. Groom), and no such pipe, "except the one at the top of the fire chamber;" "but did see an annular chamber opening into the fire-chamber, near the bottom, by means of small apertures."

Both Peter P. Groom and Norton represent the model seen by them as having two annular chambers round the fire box, one at the
1271 top and the other at or near the bottom. They differ only as to the form of the lower chamber, Groom representing both as being in the form of round pipes, and Norton insisting that the upper one only was in that form.

But when, at a later stage in the case, Smith Groom himself was put upon the stand, he showed that both of said witnesses were mistaken as to the condition of the model or the time of which they speak, and that said upper annular chamber or circular pipe was not then in the model at all. For when his attention was called by Norton (Q. 12) to certain alterations which appeared to have been made in the upper part of the model, and asked when and by whom they were made, he answered: "The alterations were made by myself shortly before I sent it to the Patent Office," and then in answer to question 13, as to when the alterations were made in the hearth-piece, he answered, "They were made by myself at the same time I put the ring in above, in 1861."

This "ring" which Smith Groom swears he put in himself in 1861 (and the latter part of that year) Peter Groom and Norton both swear to having seen in the model previously, the former in January, 1859, and the latter in the winter of 1859–'60. When it is shown that these witnesses were so much mistaken in regard to the said upper ring, how can we place the least reliance upon the accuracy of their recollections as to the more obscure device of the perforation in the "lower ring" or annular chamber?

There is another witness, Albert C. Corse, who testifies to having seen a model in the possession of Smith Groom, similar in appearance to the model in question, in February, 1860, and which Groom said was for "burning steam." He, however, either did not examine it sufficiently, or did not recollect its construction well enough, to be able to say whether it then contained the features essential to adapt it to
1272 the invention now in controversy or not. He recollects the annular chamber around the lower part of the fire-pot, but has no recollection whether there were any perforations in it or not.

There can be no doubt, from the evidence, that Smith Groom had been experimenting with a view to "burning steam" for a good many years previous to his application for the patent now in controversy. One witness speaks of experiments made by him in that line so early as 1852. There can be no doubt, either, that he made the model upon which that patent was granted, but not in its present condition, as early as 1856.

The only mode, however, in which it has been attemped to prove that he discovered the invention now in controversy at any time previous to filing his application, is that of showing the existence of the model at an earlier date, and that it was represented by him as a model of an invention for "burning steam." We have already shown that there is no evidence that the model ever existed in its present condition or in any condition embodying or illustrating the invention now in controversy, prior to the time when Hagan had made a practical test of the invention in 1858. We have also shown that there is no satisfactory evidence of its existence in such condition subsequently, until shortly before it was sent to the Patent Office.

It is not pretended that there is any evidence that Smith Groom ever reduced the invention now in controversy to practice, by introducing it

in a working stove or furnace, prior to his application for a patent. In fact, we think it is certain that he never had done so, or he would not have fallen in the fatal error of saying, as he does in his specification, that "no air is to be admitted to the fire, or any part thereof," during the process of combustion. All the evidence in the case proving that he ever made any experiments in "burning steam" or in attempting to do so shows that his plan was to introduce the steam under the
1273 grate. His son-in-law, Wadsworth, testifies to an experiment in 1852, which consisted in placing water in the ash pan of the stove, under the grate. He also testifies to another experiment of the same character "three or four years ago" (from January, 1863), at the store of Hicks, Wolfe & Co., in Troy, N. Y., when he, witness, made the box to be set under the grate to contain the water to be converted into steam.

Edward Hicks and G. G. Wolfe, of the said firm of Hicks, Wolfe & Co., stove merchants, of Troy, both testify to an experiment made at their store, to test Groom's invention, in the fall of 1859, or winter of 1859–'60, when a pan of water was placed under the grate. This was doubtless the experiment testified to by Wadsworth at the time he made the pan as above stated. These witnesses also state that a short time afterwards, on the invitation of Smith Groom, they visited his house to witness further experiments with his invention. He had there a cooking stove in operation, with pipes discharging jets of steam under the grate. They remained one or two hours examining what was represented as his invention, and both say they understood it, and that it consisted in introducing the steam under the grate as aforesaid. The object of Groom in inviting them to witness his experiments was to induce their firm to take an interest in his invention.

If it be true (as both parties claim) that the invention now in controversy of injecting the steam directly into the fire has proved eminently successful, it is very difficult to believe that Groom had discovered it previous to the time when he was trying to interest the firm of Hicks, Wolfe & Co. in the useless invention of introducing the steam under the grate. An inspection of Groom's model does not impress us with the probability that the perforations in the annular chamber, surrounding the lower part of the fire-box, was an original feature in it.
1274 Said annular chamber has a transverse partition across it, and it is evident that as the model was originally constructed it had one pipe for conducting the steam down from the boiler into the annular chamber, on one side of said partition, and another pipe rising from said chamber on the other side of the partition, for the escape of the steam after it had performed the circuit of said annular chamber. If the perforations for conducting the steam from said annular chamber directly into the fire-chamber then existed, we conceive of no reason why an escape-pipe from said chamber should have been provided.

But we have in evidence statements made by Smith Groom himself to Hagan, about the first of February, 1862, which are wholly inconsistent with the hypothesis that he (Groom) was then in possession of the invention now in controversy.

Hagan testifies that Smith Groom called upon him early in February, 1862, and requested "to see that wonderful stove he had heard so much about." There was no fire in the stove at that time, and so it was not shown to him. He then solicited the job of making Hagan's model. He told Hagan he had made experiments with a view to obtaining the same results that Hagan had obtained, and asked Hagan how he arranged his pipes. He said he understood that Hagan's steam-pipe came down

inside of the stove, while he brought his down on the outside, under the fire.

Alexis Wager, who was present at this interview between Hagan and Groom, fully corroborates the testimony of Hagan. He says that Groom asked Mr. Hagan in what way he used his steam; he asked him if he brought it down outside of the stove in pipes and carried it under the grate. Mr. Hagan answered that he did not use that method; that that had been tried before and failed. Mr. Groom remarked that he had tried it that way himself and failed, and had given it up. Groom
1275 then solicited the job of making Hagan's model. He remarked that he had made a number of models, and could make them as cheap as anybody. He again remarked to Mr. Hagan that he need not be afraid of him, as he had failed in his experiments, and had given it up.

Taking all the evidence together, it not only utterly fails to prove that Groom had discovered the invention now in controversy previous to the discovery thereof by Hagan in 1868, but goes to show that it is highly improbable that he had ever discovered it until after Hagan had notoriously made a practical application of it, in January, 1862.

It is insisted, however, by Groom's counsel, that if Hagan actually discovered the invention, and reduced it to practice in 1858, he has "forfeited all his rights to this invention to the public forever: 1st, by abandonment; 2d, by laches in not applying for a patent in a reasonable time after having thus made, completed, and perfected his said alleged invention; and 3d, by gross negligence in secreting and failing to patent his alleged invention for more than two years after its discovery by him in December, 1858."

It is sufficient for us to say that there is no law by virtue of which an inventor forfeits his right to a patent by failing to apply for one within two years from the discovery of his invention, or by failing to make the invention public within that time. The first inventor can only lose his right to a patent by an express abandonment to the public, or acts or omissions from which an intention to abandon the invention to the public can be fairly presumed; or by permitting it to go into public use or upon sale for the space of two years; or by reason of the same invention having been discovered and reduced to practice by another while he was not using due diligence in adapting and perfecting it. So far as the cited decisions of the judges of the late circuit court of the district on appeals from the Patent Office assert a different doctrine, they
1276 are in direct conflict with the whole current of judicial decisions on the subject, and are not regarded as authority. The decisions of the Supreme Court cited by counsel (Pennock vs. Dialogue, 2d Pet., 1; and Kendall vs. Windsor, 21 How., 328) utterly fail to sustain the positions they relied upon to establish.

It is also insisted that Hagan's testimony that he discovered the invention and reduced it to a practical test in 1858 is contradicted by his caveat filed in February, 1852, inasmuch as by his caveat he asks time to "mature and perfect" the invention. It is insisted that either in his testimony touching the discovery and practical test of the invention in 1858, or in his caveat, he "committed a falsehood." Nothing is more common, however, than for an inventor, after having discovered the principle of an invention, and tested its practicability in one way or more, to require further time to "mature and perfect it," and to devise the best means of developing its utility, before taking out a patent. It was for the very purpose of giving him such time to mature and perfect

his invention, and devise the best means of adapting it to practical use, that the law provided for provisional protection by a caveat.

There is one very voluminous branch of this case to which we have not yet adverted. We allude to the attempt to impeach the witness Norton on the part of Hagan, and to sustain him on the part of Groom and his assignees. Thirty-three witnesses were called to impeach his character for truth and veracity, and eighty-one to sustain it, and many of these witnesses on both sides were subjected to a very tedious examination. We have not deemed it incumbent upon us to wade through this immense volume of depositions for two reasons, viz, first, because the testimony of Norton, if true and accurate, does not prove the discovery of the invention now in controversy by Groom at as early a date as Hagan proves the discovery and practical test of it by him-
1277 self; second, because, however good Norton's character may be, and however honestly and sincerely his testimony may have been given, the testimony of Smith Groom shows that he was mistaken in a material point as to the condition of the model when he saw it in the winter of 1859–'60.

And as his (Norton's) testimony only tends to prove that Groom had at that time discovered the invention now in controversy, in so far as it shows that Groom then had a model embodying or illustrating the invention, this conclusive proof of the inaccuracy of his recollection as to the condition of the model would render his testimony on that point utterly worthless. It is wholly immaterial whether he misrepresented the condition of the model by mistake or design.

It has been argued on behalf of Mr. Norton that "it is due to him that this attack should receive a judicial reproof and rebuke 'at our hands,' or at least that it should be adjudged that his testimony is credited."

So far as the attempt to destroy his testimony by impeaching his character for truth is concerned, we have no hesitation in saying that in view of the large number of sustaining witnesses it must be regarded as an unsuccessful one. We cannot, however, credit the accuracy of his testimony, for the reasons already given; but, in saying this, we by no means intend to impute to him wilful perjury.

It is considered that there is no error in the decision of the examiner, and it is affirmed.

(Endorsed:) No. . Hagan vs. Groom. Decision of the examiner-in-chief.

1278 I hereby certify that the foregoing is a true copy of the "Complainant's Exhibit William E. Hagan and Smith Groom, October 30, 1863," filed with me on the 23d day of August, 1878, in the cause of Christopher C. Campbell against Thomas L. James, in the United States circuit court for the southern district of New York

IRVING BROWNE,
Special Examiner.

genuine and true paper or assignment for record, on said August 22, 1871; all of which he did in defiance of the rights of said assignors, viz, F. G. Ransford and P. Low; and the said Marcus P. Norton was, and is, guilty of gross misconduct as a patent attorney or agent, and is unworthy of the confidence or respect of the United States Patent Office.

M. D. LEGGETT,
Commissioner.

(Copies of the exhibits were served on Mr. Norton, but being voluminous, are omitted here.)

By the request of the attorney of said Marcus P. Norton, the hearing in the matter of the above charges was postponed until September 14, at 10 o'clock a. m. Understanding that Mr. Norton was fearful the Commissioner would not do him exact justice, he was informed that, if agreeable to his wishes, a commission of three gentlemen connected with the Patent Office would be appointed to hear and investigate the charges, and to report their findings to the Commissioner. He expressed his satisfaction with such arrangement, provided he might designate persons whom he did not want on the commission. He was granted such privilege, whereupon Examiners T. C. Connolly, Ellis Spear, and C. M. Parks were appointed such commission. At the time to which said case had been postponed, said Marcus P. Norton appeared before the commission, and was assisted in his defense by two able attorneys. He pleaded "not guilty" to all the charges. Over two days were occupied in the hearing. The report of the commission is as follows, to wit:

1284 UNITED STATES PATENT OFFICE,
September 18, 1871.

SIR: We, the undersigned, having been appointed a commission to investigate certain charges made against Marcus P. Norton, a practicing attorney before the United States Patent Office, by order dated September 14, 1871, have carefully investigated said charges, examined the papers and witnesses in the case, and heard the arguments of counsel on both sides, and respectfully submit the following report:

We find that the accused, Marcus P. Norton, is—

Of the first charge, guilty.

Of the second charge, guilty.

Of the third charge, not guilty.

Of the fourth charge, guilty, except of the words "purloining from said files," * * said papers, etc.

Of the fifth charge, guilty.

Of the sixth charge, guilty.

Of the seventh charge, guilty.

Of the eighth charge, guilty.

All of which is respectfully submitted.

T. C. CONNOLLY,
ELLIS SPEAR,
C. M. PARKS,
Commission.

Hon. M. D. LEGGETT,
Commissioner of Patents.

It is therefore adjudged—

I. That said Marcus P. Norton has been guilty of such "gross miscon-

duct" as to make it the duty of the Commissioner of Patents to
1285 refuse longer to recognize him as a patent agent; and it is accordingly ordered, by virtue of the authority conferred upon the Commissioner of Patents, under the 17th section of the act approved July 8, 1870, that the said Marcus P. Norton, or any firm of which he shall be a continued member, after said firm shall have been notified of this order, be hereafter excluded from practicing before the Patent Office, in any and all cases.

II. In view of the fact that said Marcus P. Norton is also an inventor, and frequently appears in his own behalf in prosecuting applications for patents, extensions, interferences, etc.; and whereas it having been clearly proven in this case that he is an unsuitable person to be trusted with the files in this office, it is further ordered that hereafter said Marcus P. Norton shall not be permitted to have personal access to any of the files, drawings, or models in the Patent Office for any purpose whatever. When necessary, in the transaction of business connected with his own personal interests, to know the contents of documents on file in the office, he must call for certified copies, or make examination by attorney.

III. The examiners and other employees of the Patent Office will take cognizance of and enforce the above orders.

M. D. LEGGETT,
Commissioner of Patents.

Approved:

C. DELANO,
Secretary of the Interior.

I hereby certify that the foregoing is a true copy of the Complainant's Exhibit "M. D. Leggett—Fraud No. 1," filed with me on the 30th of August, 1878, in the cause of Christopher C. Campbell against Thomas L. James, in the United States circuit court for the southern district of New York.

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office, of additional papers found in the caveat file of Marcus P. Norton, filed October 20th, 1853, for machine for mailing and folding letters.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this thirteenth day of August, in the year of our Lord one thousand eight hundred and seventy-eight and of the Independence of the United States the one hundred and third.

ELLIS SPEAR,
Commissioner.

1287 EXHIBIT D.

Additional paper to railroad printing press.

TINMOUTH, VT., *Aug.* 21, 1855.

Hon. COMMISSIONER OF PATENTS:

SIR: I wish to file this paper as an additional caveat description to my railroad printing press now on file under date of June 4th, 1855, and sworn to the 11th day of June, 1855.

I propose to make the form of type as I have described in my caveat, or make a cylinder of sufficient size to contain upon its surface or periphery the name (in stereotype) of the name of stations on the line of railroad in order as they are on said road. This I call the cylinder of towns to where tickets are sold. This cylinder is placed into the form and made to revolve at the will of the operator. There is another cylinder, of the same form, like unto the others, and this is called cylinder from which the tickets were sold. The name of the road, and all other printed matter to be done, may be done by cylinders constructed for that purpose; or stationary type may be used for all, excepting for the month, the day of the month, and the year, which will be done by cylinders made for that purpose. At one end of each cylinder there is an index for each cylinder, and a pointer connected with the cylinder, revolves the same to where it may be desired to use the same, where it is then held by the use of a pin and spring. The operator moves these cylinders to and from whatever name or date he wishes to sell and date tickets for use on the railroad. This press is chiefly designed to be used in the general ticket office by the general ticket master or his clerk; or it may be used in any office on the line of the road
1288 where printing and dating is desired. The said cylinders, when moved to their respective places, are held fast by a spring connected with the pointer, and governed or regulated by the indexes, as will more fully appear herein. I have set forth a series of revolving type-wheels or cylinders for printing certain matter on railroads; but I also intend such wheels to do all kinds of printing required in any office other than the printing the name of towns on a railway line, with the date of the selling of the tickets, all of which is done by means of suitable cylinders for that purpose. I have deemed it best to give a more full description of the dating wheels, and it is substantially as follows: I make two wheels, or more if necessary, and on the circumference or periphery of which I have the required type arranged so as to print the several months in the year; and on another cylinder or wheel I have arranged the type to print the day of the month. There may also be a type for the years, so that several years may be printed, when desired, from the type, put on a wheel in same manner as for the month and day of the month. These wheels, or cylinders, containing such type as may be desired to print from, are put and arranged on a central shaft, or other good bearing and turning points, and the printing surface is brought together on a line, or in a suitable form, when the month, the day of the month, and the year, with any other matter connected with the same, are printed by a blow of the instrument, arranged to give the impression. It may be used as a hand-printing or stamping device for dating anything desired to have the date printed or formed thereon. This would be very convenient, for then there would be no type to lose; for all the dates would be on the cylinder, from which the same may easily and readily be set or arranged to print the correct dates. The

dating cylinders may be of any size that will answer the purpose required. The day of the month wheel may be made of such size
1289 as to require two wheels, in order to give the correct dates and to reduce the size of the wheels or cylinders. In that case one wheel would have figures 1, 2, 3 on the periphery of the same, while on the wheel to correspond to the same there would be on the periphery the figures 1, 2, 3, 4, 5, 6, 7, 8, 9, and a 0, or cipher. These when changed will give any date required. It will now be seen that the correct date is given from and by type-wheels, or revolving and changing cylinders or disks. The letters or type may be cast on the periphery of such wheels, or formed in slips or pieces and soldered upon the periphery of the wheel desired; or they may be engraved on the same; or they may be swedged, formed or pressed thereon out of the same circumference or periphery; or they may be so constructed as to be dovetailed therein. There are various other ways for forming or constructing on such wheels, such letters or figures as may be required. The wheels, or cylinders, may be made of malleable cast iron, or of other cast metal, or made of brass or similar metal. Brass would be the better metal to use when the letters or figures are to be arranged, or swedged, or raised, or pressed or formed thereon, because it would work more easy and make better work. Stereotyped letters and figures can be made and then soldered on such circumference surface of such wheels. I think the best way will be to dovetail them in, because when worn out a new one can be put in its place, and it would require expensive machinery to cast or press, form or swedge the letters or figures on said circumference or periphery of such type and dating wheels or cylinders. To ink the said wheels or type cylinders, when arranged for printing and dating, I pass an ordinary inking roller over the face or surface of all the type to be printed from, and then it is returned to its proper place. This roller is passed over a suitable distributing surface, which is for the purpose of getting the ink on the type wheels more evenly, and thus make a better impression on the paper to be printed and dated.

1290 These wheels are each operated in a suitable form or chase constructed for that purpose. To set them each in proper condition or order for the date, and as a matter of convenience, I use pointer or arm of any suitable construction, and secure the same to the shaft of the type wheel, or to the wheel itself; and then I have indexes on the frame, or on the respective type wheels, so arranged as to enable the operator to put the right month, day of the month, or year, etc., into the printing line or surface, so that the same will print the date required. These indexes will be of any suitable construction, and engraved, stamped, or otherwise put upon the said type wheel, framework, or upon each wheel, as may be best, and in such manner that the operator may readily see the same, so as to know how to govern the setting of the wheels, in order to print correctly the matter desired. These wheels, or cylinders, are held in their fixed position by a small pin having a suitable spring attached, which may be in the arm or pointer, or in the said framework, and extending into the respective wheels, having a corresponding hole or opening for the spring to pass into to hold it. The spring is to hold the pin in its place, so that the wheel cannot move when in its fixed position and in use. By moving any one of the type wheels or cylinders forward to change its use, either to change the month, or the day of the month, or the year, the pin will be forced into a corresponding opening by the spring, and there h ld until another change is had, and so the operation will continue. Words or figures

may be used to index or represent the month, and may be on the side of the wheel (or on the frame holding the type wheels on their shaft), and will of course always be so constructed as to be in sight the most convenient. This will apply to all the wheels or cylinders for printing the month, the day of the month, and year; so, too, if any cylinder be used to print any other matter, the same may have an index to
1291 correspond to the matter to be printed. The said dating type wheels may be in a fixed frame, and the impression taken from the top by any suitable device to give the force or blow thereon, and the inking roller made to pass over the top in any good and convenient way; or the said type-dating wheels, and frame in which the same operate, may be so arranged as to give a striking like blow by the hand; or put into a frame on a stem and be forced down upon the paper, and then brought back by a spring.

I am having a machine made with these improvements in, and hope to apply for a patent within the caveat year; yet there are some other improvements I propose to make in this machine as a whole. The machine may be used for banks, railroad companies, business firms, and in post offices.

Respectfully, your obedient servant,

MARCUS P. NORTON.

(Endorsed:) Complainant's Exhibit M. D. Leggett, Fraud No. 2, August 31, 1878. I. B., ex'r.

This paper, marked Exhibit D, after due notice to M. P. Norton, and trial had before a commission appointed by the Commissioner of Patents, was by the said commission adjudged to be fraudulent, and to have been surreptitiously introduced into the caveat file of M. P. Norton for a railroad ticket printing press, filed June 21st, 1855.

In the order of the Commissioner of Patents dated September 18th, 1871, and approved by the Secretary of the Interior, in the case of the trial of M. P. Norton for gross misconduct, see the finding of the
1292 commission as to charge 4. This paper does not, therefore, form a valid portion of the above-named caveat.

M. D. LEGGETT,
Commissioner of Patents.

EXHIBIT C.

TINMOUTH, VT., *Aug.* 21, 1855.

COMMISSIONER OF PATENTS:

Will you please send me the second part of your report of 1854? Can I make application for a patent (on my caveat) for post office way-bill printing and folding machine at two different times?

The caveat has expired. I wish to make application on the folding part first, as the whole machine will be subject to two patents or applications. If I can apply for one at the time, can the caveat fee be applied on that one application?

Respectfully, your obedient servant,

MARCUS P. NORTON.

Ex'd. S. P. P.—M. McK.

(Endorsed:) Complainant's Exhibit M. D. Leggett, Fraud No. 2, August 31, 1878. I. B., ex'r. Received and filed August 25, 1855. S. T. Shugert, Exhibit C.

This paper (marked Exhibit C, and to which the paper marked Exhibit D is attached) does not pertain to the caveat file of M. P. Norton for a railroad ticket printing press, filed June 21st, 1855, but does pertain to the caveat file of M P. Norton for a machine for mailing and folding letters, filed October 20th and 27th, 1853. See the endorsement upon the back of Exhibit D, hereunto attached.

M. D. LEGGETT,
Commissioner of Patents.

1293 I hereby certify that the foregoing is a true copy of the Complainant's Exhibit "M. D. Leggett. Fraud No. 2," filed with me on the 31st of August, 1878, in the cause of Christopher C. Campbell against Thomas L. James, in the United States circuit court for the southern district of New York.

IRVING BROWNE,
Special Examiner.

1294 *Complainant's Exhibit M. D. Leggett, Fraud No. 3.—August* 31, 1878, *I. B., ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office of additional papers found in the caveat file of Marcus P. Norton, filed October 20th, 1853, for machine for mailing and folding letters.

In testimony whereof I, Ellis Spear, Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this thirteenth day of August, in the year of our Lord one thousand eight hundred and seventy-eight and of the Independence of the United States the one hundred and third.

[SEAL.]

ELLIS SPEAR,
Commissioner.

EXHIBIT B.

To the Commissioner of Patents:

1295 SIR: I wish the following to be added to my subjoined description for mailing and folding letters, for which I have a caveat in your office. In the mailing of letters I have provided means for postmarking of letters, newspapers, and the like, and for the cancellation of the postage-stamps thereon at one and the same blow or operation of the instrument or machine by which the postmark is had or made upon the letter, envelope, or wrapper, or package, in a plain and intelligible manner, and thereby always retaining the same, while the postage stamp or stamps are more effectually and permanently canceled, so as to prevent frauds upon the revenue derived from the sale and use of such stamps. The said device is arranged upon the type cylinder contained in first paper filed in my said caveat, between the way-bill form of type, and it gives the impression in ink upon the letter, envelope, or packet by means of the revolving cylinder, and at the same time and operation it also gives a heavy impression in ink upon the postage stamp when or where used upon the said letter or envelope, and the postage stamp becomes thoroughly impregnated with ink by the means herein provided, and therefore it cannot be cleansed by chemical washing, or by other means, so as

to allow of the same being used a second time, and thus frauds are prevented. If there should be no stamp used for payment of postage on letters, packets, etc., this device would do no sort of harm to the letter, envelope, etc., for it would only postmark the same with the name of the town and date, such as month, day of the month, and year, and upon one side thereof, at the same time give a heavy impression in ink, which would appear was only intended for cancellation of the postage stamp as aforesaid stated. This would make a plain and more intelligible postmark than by the old method now in use, while it would at the same time, blow, and operation of the instrument cancel in ink the postage stamp or stamps when such are used, as aforesaid, in a most
1296 thorough, perfect, and permanent manner, so that the same could not be cleansed for the purpose of being used a second time. This part of my invention I construct of the ordinary form of type now used in the post-office for the postmarking of letters with the name of the town, month, day of the month, and the year, etc., and I combine therewith, in some good, practical, and suitable manner, a device which I denominate a postage stamp canceling type, to be used in or with any kind of ink suitable for that purpose, and by such combined instruments one device is formed, which will give the name of post-office, month, day of the month, and year, and at the same time and blow cancel and thus destroy the postage stamps—thereby greatly economizing in the time now required in the making up of the mail; in fact, saving one half of the labor required for postmarking and for canceling of postage stamps—when it is desirable to give the impression of name of the town and date upon the envelope, letter, or packet, in order to preserve the same for any purpose of proofs or other thing. I now think that the best way to make this part of my invention is to use a cross-bar or cross-piece upon the periphery of the cylinder, set forth in other papers in my caveat, and fasten, in some suitable manner, the postmarking stamp upon one end thereof and the postage canceling type or device upon the other end of said bar or cross-piece, which would of course give dating stamp at one end and canceling stamp at the other and thereof; this bar thus constructed with said type arranged thereon, as aforesaid, is securely fastened to the periphery of said cylinder in some suitable manner. The canceling type or stamp may be made of iron, steel, wood, rubber, cork, or of any other suitable material, and the same may be combined with said cross-bar by the drilling of a suitable hole therein or by a tube to receive the same, and said tube being suitably fastened to said cross-bar, or the same may be fastened directly upon and to the said cross-bar at any required distance from said dating part or dating type. A screw may pass through said cross-bar into the material used for the canceling type, and thus hold it firmly thereto, or a suitable tube may first be fastened to said cross-bar, and then the canceling material or part used for the canceling type may be inserted therein and thereon, and thereby held until worn out by
1297 use, when the same may be replaced. Rubber or cork, I think, will make the best and most suitable canceling type or device, while soft wood, used endwise, will make a most excellent canceling type. If it should be found impracticable to use the said cylinder and other parts of said machine, as contemplated in the caveat papers now on file, then the said cross-piece or bar may be removed from the said type cylinder by means of loosening the screws by which it is fastened thereto, and a suitable handle affixed thereto in place of such cylinder, and the same then used as a hand-stamping device for postmarking and canceling postage-stamps. The said cross-bar may be removed from said cylinder in order to reset the type for the date to be given, or for

the purpose of removing and replacing the said canceling type or stamps, and then the same may be replaced upon said cylinder as aforesaid. By means of this device I get a good and more perfect impression upon the letter-envelope, or packet, of the name of the town, day of the month, month, etc., and at the same time and operation cancel the postage stamp or stamps in ink in a most complete, thorough, and perfect manner. When cork is used it contains a greater quantity of the ink used, and being somewhat elastic and somewhat rough upon the face containing the ink, it will, to a considerable extent, break the enameled surface of the postage stamp, formed as such by means of the indelible ink used in the manufacture of such stamp, so as to form a hard surface, in order that the stamp might not become defaced by transportation to places of sale, while on sale, or while being carried in a person's pocket ready for use; and having broken somewhat such surface of such postage-stamp by the blow of the cork upon the same, the ink impregnates in a most thorough manner the whole postage-stamp, and of course it cannot be removed without destroying the printed surface of such postage-stamp, and so defacing it
